There are certain indications which seem to show that primitive peoples adopt or drop the practise without much ado, possibly because it is not regarded as definitely religious. The Zulus and the Gallas have discarded the custom since Europeans have become acquainted with them, and Reinach gives reasons for believing that the Philistines, though specifically mentioned as uncircumcised (Judges xiv. 3; I Sam. xvii. 26, 36; xviii. 25; Ezek. xxxii. 30), had adopted circumcision by the time of Herodotus (ii. 104) and Aristophanes ("Birds," p. 507)—*i.e.*, between 575 (Ezekiel) and 445 B.C. (Herodotus)—while the Idumeans, who appear to have been circumcised in the time of Jeremiah (Jer. ix. 26), had entirely discarded the practise by the time of John Hyrcanus, who forcibly reintroduced it among them ("L'Anthropologie," iv. 28-31).

Object: The exact object for which this widespread custom is practised has been long a subject of dispute. The theories mainly held point to three originating causes: tribal, sacrificial, and utilitarian. For the tribal view there is to be said that circumcision, like other mutilations of the body intended for tribal marks, takes place at the age of puberty, when, for example, the Hereros of Africa knock out the front teeth; but as the organ is almost invariably hidden, it is difficult to see how circumcision could be regarded as a tribal mark (see Gerland in Waitz, "Anthropologie," vi. 40).

The sacrificial theory, which sees in circumcision an offering to the deity of fertility, has to draw for illustration from the practises of Yucatan and Nicaragua, where the custom itself is only in a stage of survival, if it exists at all. Others regard it as a substitute for human sacrifice (Movers and Ghillany), and place it on the same level as eunuchism (Letourneau, Elie Reclus). Hence Herbert Spencer suggests that it was a mark of subjection introduced by conquering warriors to supersede the punishment of death. The appeal made to Samson by his father (Judges xiv. 3), and that made to the Israelites and to Saul by David (I Sam. xvii. 26, 36), give a certain amount of plausibility to this theory; but the fact that the practise is either common to all the tribe or is reserved for the upper classes, as in Mexico, the Celebes, and Rook Island, tells strongly against this last form of the sacrificial theory.

Utilitarian Theories.

The suggestion of Sir Richard Burton ("Memoirs Anthrop. Soc." i. 318) that it was introduced to promote fertility seems to be contradicted by the practise and arguments of many tribes (see Riedel, in "Verhandlungen der Gesellschaft für Erdkunde zu Berlin," 1885, No. 3). The claims of cleanliness and health have been strongly urged, especially for hot countries, where phimosis is likely to be induced if the natural secretions of the parts are retained by the prepuce. Philo ("De Circumcisione," ed. Mangey, ii. 210) gives this as one of the motives for the Biblical injunction; and later writers, such as Claparède ("La Circoncision," Paris, 1861) and Rosenzweig ("Zur Beschneidungsfrage," 1878), have for this reason recommended its general adoption. But the practise is found among so many tribes who have not the most elementary notions of cleanliness, not to speak of hygiene, that this is not likely to be the prevailing motive for its adoption.

An Initiation Ceremony.

The fact that circumcision is almost invariably found practised as a rite of initiation, and frequently on both sexes, gives the clue to its general adoption, as H. Ploss contends in an essay ("Geschichtliches und Ethnologisches über Knaben-Beschneidung," in "Deutsches Archiv für Gesch. der Medicin," viii. 312-344) mainly based on Andree's materials. According to the wise custom among savages of initiating their youth into all the duties of the mature life, the elders prepare the lads for their marital life at this time; and circumcision, often of both sexes, is resorted to as part of the preparation. The only ancient legend about Zipporah circumcising Moses (as would seem to be implied by her exclamation, Ex. iv. 25, 26) confirms Ploss's view to some extent; but the exceptionally early age at which Jews perform the rite takes it entirely out of the category of initiation ceremonies among them, and proves it to be of a religious or symbolic nature, as indeed is expressly claimed for it.

BIBLIOGRAPHY: *Index Catalogue of Surgeon-Major's Library*, Washington, 1st and 2d series, s.v. *Circumcision (ritual)*, gives a tolerably complete list of works and papers. The above article is founded mainly on the material collected by Andree and Ploss, with the use of M. Zaborowski's *La Circoncision, sa Superstition en Afrique*, in *L'Anthropologie*, vii. 653-675; idem, *De la Circoncision des Garçons et de l'Excision des Filles Comme Pratique d'Initiation*, in *Bulletin Soc. Anthrop.* Paris, 4th series, v. 81-104. Special references are only introduced in correction or supplementally; for other statements authorities will be found in Andree.

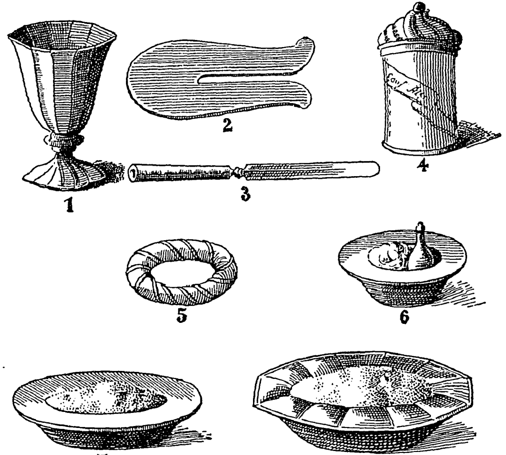
J.

——**In Medicine:** To perform the operation and to avoid any danger that may be connected with it, an acquaintance with the anatomy of the tissues involved is necessary. The organ terminates in a conical fleshy substance called the glans.

Anatomy of the Parts.

The skin covering the organ is prolonged forward in a loose fold, which covers the glans and is supplied with an inner lining of the character of a mucous membrane, which, being reflected, also forms a covering of the glans proper. The prolonged portion of skin with its lining is termed the prepuce or foreskin. The prepuce has no large blood-vessels; and therefore circumcision is not attended by any dangerous hemorrhage, except when the glans is injured by unskilful handling of the knife, or in very exceptional cases where there exists an abnormal tendency to bleeding.

Circumcision varies considerably as practised by the Jews and by the Mohammedans. Among the Jews it means not only the excision of the outer part of the prepuce, but also a slitting of its inner lining to facilitate the total uncovering of the glans.



Implements and Accessories of Circumcision (18th Century).

1. Cup of benediction. 2. Shield. 3. Knife. 4. Spice-box. 5. Tape. 6. Cotton and Oil. 7. Sand. 8. Powder.

(From Bodenschatz, "Kirchliche Verfassung," 1748.)

The Mohammedans pursue the simple method of cutting off the integumental portion of the foreskin, so that almost all of the inner layer remains, and the glans continues covered.

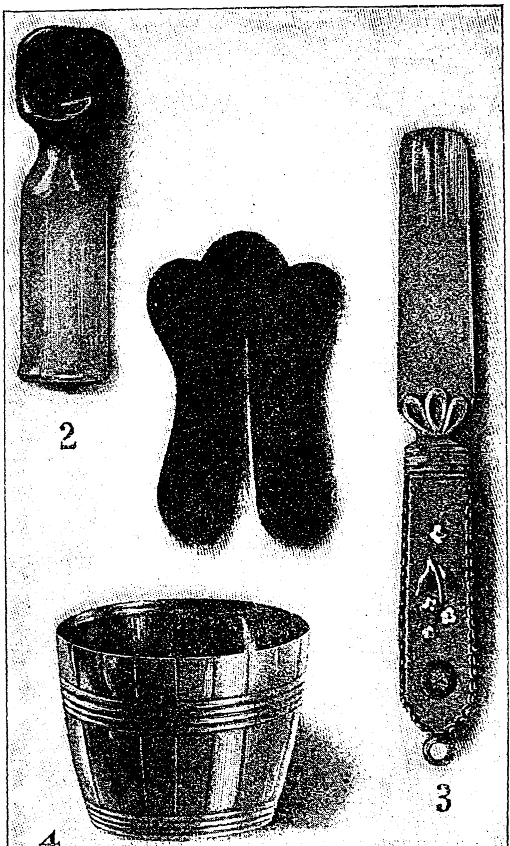
The operation up to very recent times was exclusively performed by laymen, to whom the act had been taught by others who, by experience, had acquired the necessary knowledge and skill. The tests of a good operator, or "mohel" (circumciser), were that he should perform his work quickly, safely as to its immediate effect, and successfully as to the condition which the parts would permanently assume. As a rule, the majority of these operators developed great dexterity; and accidents were remarkably rare. In case the glans was not sufficiently exposed after the healing process was completed, much anxiety was occasioned; for in some exceptional instances a second operation was resorted to.

The operation consists of three parts: "milah," "peri‘ah," and "meẓiẓah."

Milah: The child having been placed upon a pillow resting upon the lap of the godfather or "sandeḳ" (he who is honored by being assigned to hold the child), the mohel exposes the parts by removal of garments, etc., and instructs the sandeḳ how to hold the child's legs. The mohel then grasps the prepuce between the thumb and index-finger of his left hand, exerting sufficient traction to draw it from the glans, and places the shield (see Fig. 1, next column) in position just before the glans. He now takes his knife and with one sweep excises the foreskin. This completes the first act. The knife (see Fig. 3) most commonly used is double-edged, although one like those ordinarily used by surgeons is also often employed.

Peri‘ah: After the excision has been completed, the mohel seizes the inner lining of the prepuce, which still covers the glans, with the thumb-nail and index-finger of each hand, and tears it so that he can roll it fully back over the glans and expose the latter completely. The mohel usually has his thumb-nail suitably trimmed for the purpose. In exceptional cases the inner lining of the prepuce is more or less extensively adherent to the glans, which interferes somewhat with the ready removal; but persistent effort will overcome the difficulty.

Meẓiẓah: By this is meant the sucking of the blood from the wound. The mohel takes some wine in his mouth and applies his lips to the part involved in the operation, and exerts suction, after which he expels the mixture of wine and blood into a receptacle (see Fig. 4, below) provided for the purpose. This procedure is repeated several times, and completes the operation, except as to the control of the bleeding and the dressing of the wound. The remedies employed for the former purpose vary greatly among different operators and in different countries. Astringent powders enter largely into these applications. In North Germany the following mixture is extensively used: dilute sulfuric acid, one part; alcohol, three parts; honey, two parts; and vinegar, six parts. A favorite remedy with many operators is the tincture of the chlorid of iron, which is a recognized efficient styptic. These solutions are

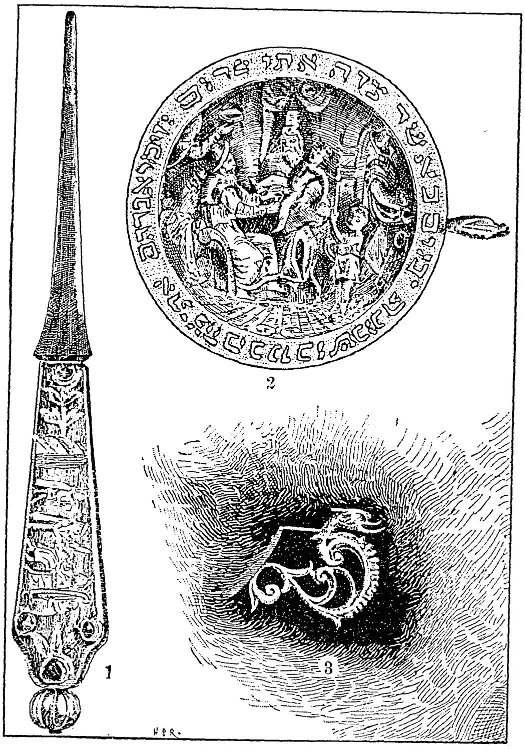


Modern Implements of Circumcision.

1. Shield. 2. Mouthpiece. 3. Knife. 4. Cup for Meẓiẓah.

applied by means of small circular pieces of linen with openings in the center, into which the glans is placed, and the dressing is closely applied to the parts below. This is secured in its place by a few turns of a small bandage. A diaper is now applied, and the operation is finished. The dressings are usually allowed to remain until the third day. The nurse in the mean time is instructed to apply olive-oil, plain or carbolized. When the parts are then uncovered the wound will in most cases have healed.

To guard against any mishap through suppuration or erysipelas, the genitals should be washed with soap and water, and afterward with a solution of bichlorid of mercury, 1 to 2,000. The mohel should deal similarly with his hands, and especially with his nails, using a nail-brush; and all the instruments to be used should be immersed in boiling water for about five minutes. The dressings should consist of sterile or antiseptic gauze or similar material. All the preparations relating to the dressings, the instruments, and the hands of the operator should be made before the child is brought into the room in which the operation is to be performed, in order to avoid unnecessarily prolonging the anxiety of the mother. A basin with the bichlorid of mercury solution should be at hand, into which the operator may dip his hands immediately before he begins his work.



Articles Used in Circumcision.
1. Knife. 2. Platter, bearing as inscription Gen. xxi. 4. 3. Handle of platter.
(In the Musée de Cluny, Paris.)

Pre-cautions to Be Observed.

Care must be exercised in grasping and making traction on the foreskin just before the knife is used. The outer layer is much more elastic than the inner; and if the outer and inner layers are not held firmly together at the margin, it may happen in making traction that the outer layer may become folded upon itself, with the result that the cut will remove a circular piece of skin just behind the edge of the foreskin. Of course this will require the subsequent removal of the remaining edge.

Some operators dispense with the shield, but this is not to be commended; for it will expose the child to the risk of having a piece of the glans cut off, and to dangerous bleeding in consequence.

When the operator uses his nails to tear the inner layer (peri'ah), he should be careful to have them absolutely clean. Should they not have the requisite shape or firmness, or should he prefer avoiding any risk attaching to that method, two pairs of short forceps may with advantage be substituted, and are now often used. The tear should be made carefully, so that it will not deviate greatly from the median line, and should not be carried back too far; for at the margin of the corona it might give rise to unnecessary bleeding. When the inner lining is tough, or bound down by adhesions, a probe-pointed scissors may be used for the peri'ah. Drs. Kehlberg and Löwe recommend the use of the scissors in all cases; claiming that the wound made by them is more favorable, and infection less liable. Against this, however, is the well-established principle in surgery that a lacerated wound is less apt to bleed than one made by a sharp instrument.

Danger of Meẓiẓah.

Considerable opposition has of late years been made against the meẓiẓah on the ground that it is entirely in conflict with the aseptic treatment of wounds, which should be adhered to in all instances, but more especially in consequence of a case in Cracow in which it became known that syphilis was communicated to a large number of Jewish children through an infected condition of the mohel's mouth (Glassberg, "Die Beschneidung," p. 27). The result has been that a number of mohels have discarded the meẓiẓah altogether. The majority of Jews, however, remain averse to such an innovation, the more so because it is condemned by the Orthodox rabbis. As a compromise, which has received satisfactory ecclesiastical authority, a method has been adopted which consists in the application of a glass cylinder that has a compressed mouthpiece, by means of which suction is accomplished. Before the cylinder is applied a small quantity of sterilized absorbent cotton is placed in the mouthpiece, which effectually protects both the child and the operator.

The inner layer, when it is folded back after its laceration, meets with the outer retracted layer, and the application of the dressing will satisfactorily keep the edges in fair apposition. Drs. Kehlberg and Löwe, in an article in Glassberg's work, recommend the closing of the wound by stitches after the method practised in surgery and known as the continuous suture. There are two objections to this treatment of the wound. It prolongs the operation unnecessarily, and entails the annoyance of removing the sutures when the union of the wound has taken place.

The sponge, which has almost invariably been made use of for cleansing the parts (which are more or less covered with blood), should be entirely discarded. It has been found difficult to keep sponges surgically clean; and pledgets of sterile gauze—fresh ones for every case—are to be preferred.

Treatment of Wound.

The most important consideration after the completion of the operation is to guard against hemorrhage. When the wound is limited to the prepuce itself, hemorrhage need not be dreaded; for the pressure of the simple dressings alone will be sufficient to control it effectually. Many operators apply a little tincture of iron, to which there can be no serious objection; for it is the most reliable of the remedies usually applied for the arrest of hemorrhage. The mohel should remain with the child for at least an hour to be perfectly satisfied that no hemorrhage follows, and to stop it should it occur. If the bleeding does not proceed from an artery, the tincture of iron with somewhat firmer pressure of the bandage will usually prove satisfactory. Should the bleeding come in jets, a catch-artery forceps must be applied, which acts as a clamp; and a surgeon should be sent for, as a ligature may be needed.

There is one form of bleeding which has thus far not been mentioned, and which needs consideration. It is well known that there are individuals who bleed very profusely and very persistently upon the slightest provocation. The old rabbis must have known of this condition; for they taught that, when a mother lost two children from circumcision, those that might be born afterward should not be subjected to the operation. This abnormal tendency to bleeding is of hereditary character. It is transmitted through the mother and through the daughters of such a mother. The son, who might be a bleeder himself, will not transmit it to his children. Should such a condition be met with in circumcision, the ordinary methods for the arrest of hemorrhage must not be relied upon. The actual cautery will have to be resorted to, or a short piece of a metal or hard flexible catheter must be inserted in the urethra and firm pressure applied by means of a bandage. The catheter has the advantages of not interfering with urination, and of offering a firm surface for the application of pressure. It goes without saying that mechanical provisions must be made to prevent the catheter from slipping either in or out.

As illustrating the extreme rarity of disasters as a consequence of the hemorrhagic diathesis in circumcision, Dr. A. B. Arnold writes that in an experience of more than 1,000 cases he met with one case only ("New York Medical Journal," Feb. 19, 1886).

It happens not infrequently that the attending physician, on account of some unfavorable condition of the child, advises a postponement of the operation. The Jewish law sanctions such a proceeding until the child has fully recovered its health.

The following reasons for postponing the operation are enumerated by Drs. Kehlberg and Löwe: "pronounced feebleness of the child, febrile conditions, obstinate diarrhea, refusing to take the breast, diseased conditions of the skin, general or local convulsions or jerkings, inflammation of the eyes or eyelids, fungous excrescences in the mouth, very frequent vomiting, continued sleeplessness" (Glassberg, *l.c.* p. 36).

Circumcision among the Jews has been accepted and adhered to simply as a religious rite; but it is of interest to make manifest the advantages that accrue to the individual from having the prepuce removed in early life.

Medical Advantages of Circumcision.

Sometimes the physiological changes in the prepuce are interfered with and it can not be retracted at all, or only to a partial degree. These conditions are termed respectively complete and partial phimosis. Phimosis is followed by a train of disturbances more or less serious in character; one of the most frequent troubles arising from this cause being interference with the emptying of the bladder. As a result of phimosis, or even of the ordinary exudations, inflammation of the inner lining of the prepuce and the covering of the glans is extremely liable to arise. This inflammation, termed balanitis, will cause pain, especially during urination, and will have a tendency to increase the impediment to the voiding of urine.

Various authors enumerate a number of other troubles due to phimosis; viz., habitual wetting of the bed by children, masturbation, prolapse of the rectum, hernia, and hydrocele, the latter three conditions being excited by the excessive pressure exerted by the abdominal muscles in overcoming the resistance of the prepuce to the flow of urine.

Paraphimosis.

An even more severe form of inflammatory change is known under the name of paraphimosis, which at times leads to ulceration of the parts or even gangrene.

The glans in the circumcised, besides being uncovered, presents another change to which considerable importance has been attached. The covering of the glans, which before had the character of a mucous membrane, on being exposed assumes the properties of true skin, which is less vulnerable, and on theoretical grounds alone leads to the inference that it is less liable to syphilitic infection. In addition to this, however, there has been weighty authority which bases this opinion on a wide experience. That it offers some protection, there can be no doubt; but the present writer has observed too many cases of primary syphilis in the circumcised to warrant the assumption that circumcision offers any very decided immunity.

A communication was made to the convention of the American Medical Association in 1870 by Dr. Lewis A. Sayre, in which he demonstrated that partial paralysis might result from congenital phimosis and adherent prepuce, and could be removed by circumcision. In 1887 Dr. Sayre, at the Ninth International Medical Congress, gave the testimony of a large number of other observers, who corroborated his own.

J. A. Fr.

——**Among the Arabs:** It is difficult to determine whether Mohammed deemed circumcision ("khitan" or "taṭhir") to be a national custom of no religious importance, and therefore did not mention it in the Koran, or whether he judged the prescription of a rite that had been performed by the Arabs from time immemorial to be superfluous. Abulfeda counts circumcision among the rites of pagan Arabia that were sanctioned by Islam ("Historia Ante-Islamitica," ed. Fleischer, p. 24). Ibn al-Athir, in his ante-Islamic history, attributes to Mohammed the following words: "Circumcision is an ordinance for men, and honorable for women." On the other hand, the traditionalist Hurairah reported on the part of the prophet that circumcision is one of the observances of "fiṭrah" (natural impulsion), and has consequently no religious character ("Ṣaḥiḥ al-Bukhari," p. 931). Be that as it may, circumcision became in Islam a religious obligation, to which every one was required to submit.

Age.

The difference of opinion which prevails among the historians and traditionalists as to the character of the rite before Mohammed, prevails also as to the age at which circumcision had to be performed. According to Josephus, the Arabs circumcised after the age of thirteen, "because Ishmael, the founder of their nation, was circumcised at that age" (Josephus, "Ant." i. 12, § 2). Ibn al-Athir and many other Arabic authorities assign different ages. It is probable that there existed no regulation as to age; and each locality followed its own custom. Thus, in Yemen, where Jews exercised great influence, the Arabs circumcised their children on the eighth day after birth (compare Pocock, "Specimen Historiæ Arabum," pp. 319 *et seq.*). The Mohammedan law recommends circumcision between the ages of seven and twelve years, but it is lawful to circumcise a child seven days after its birth. The circumcision of females is also allowed, and is commonly practised in Arabia.

The operation on males is generally performed by a barber, in the following manner: The operator seizes with the forefinger and thumb of the left hand the summit of the prepuce, which he fastens with a string provided with a knot. This string is passed through a hole made in a disk of hardened leather. The operator then makes with a razor or scissors a circular section of the prepuce between the knot and the disk. The hemorrhage which follows is stopped by the application of burned rags and ashes. In India a bit of stick is used as a probe, and carried round and round between the glans and prepuce, to ascertain the exact extent of the frenum, and that no unnatural adhesions exist. No splitting ("peri'ah") is known to the Arabs, as is attested by Simon ben Ẓemaḥ Duran, who expresses himself as follows: "Mohammed sanctioned also circumcision that the Arabs performed since the time of Abraham, as is said in the Talmud: 'A circumcised Arab'; but he adopted it without peri'ah" ("Ḳeshet u-Magen," 19b).

Ceremonies.

The ceremonies preceding circumcision give to this act the character of a religious initiation. After having performed the prescribed ablutions, the candidate makes his confession before the imam, and a new name is added to his former one. As among Jews, circumcision is followed among Mussulmans by feasting and rejoicing. The custom among Orthodox Jews in Russia and Poland, of inviting pious men to spend the night preceding circumcision in prayer and study in the house in which the ceremony is to take place, finds a striking parallel in that current among the Mussulmans of Egypt, where priests are hired to recite prayers in the house of the candidate the night before the ceremony. That night is called "lailah al-kabirah" (the great night), in opposition to the preceding night, "lailah al-ṣaghirah" (the small night), in which an entertainment is given to friends.

J. I. Br.

CIRCUMSTANTIAL EVIDENCE: Evidence consisting of circumstances which afford reasonable ground for believing in the guilt or innocence of an accused person. Circumstantial evidence is generally stated to be inadmissible according to Jewish law; but this assertion is incorrect. All evidence is more or less circumstantial, the difference between direct and circumstantial evidence being only a difference in degree. The former is more immediate, and has fewer links in the chain of connection between the premises and the conclusion than the latter.

The Mosaic law requires that every fact be proved by the testimony of two witnesses (Num. xxxv. 30; Deut. xvii. 6, xix. 15), and the Talmudic law requires that each witness testify to the whole fact, and that the witnesses shall not be permitted to supplement each other's testimony (B. Ḳ. 70b). But, admitting that it requires the positive testimony of two witnesses to every material fact in the case, this does not preclude the court from drawing inferences from the facts proved; and wherever such inferences are drawn—this is necessarily done in every case at law—circumstantial evidence is to that extent recognized as legal.

In criminal law the necessity for at least two witnesses is strictly maintained (Sanh. 37b; Maimonides, "Yad," Sanhedrin, xii. 3, xx. 1).

In civil matters the testimony of one witness is in some cases sufficient to compel the party against whom the witness is produced to take the oath of purgation; and, on the other hand, the production of one witness in favor of the party absolves him from taking this oath, in cases where he would otherwise have been obliged to take it (Shebu. 32a). The law likewise recognizes certain presumptions arising from a given state of facts: although these presumptions may be rebutted by positive testimony, they establish a prima facie case without further proof (Ḳid. 80a).

For further discussion of this subject see Evidence and Presumption.

J. SR. D. W. A.

CIRCUS: In antiquity a large enclosure used for horse- and chariot-races, and sometimes for gladiatorial combats, etc. Public games and theatrical representations being such important factors in the life of the Greeks and Romans, the Jews living in the classical age had to take a definite attitude toward them. As in the case of everything else characteristic of paganism, the Jews had little to say in favor of the circus, though only after numerous differences of opinion among them, and even of concessions in favor of the popular amusement. This applied also to all public amusements; and Jewish rabbinical literature discusses especially two types of these—the circus and the theater—so frequently together and from so similar a point of view that they must be treated as a unit in this article.

Hellenists and Herodians.

The pre-Maccabean Hellenistic party had introduced gymnasia into Jerusalem (I Macc. i. 14; II Macc. iv. 12), greatly to the abomination of the orthodox. Herod the Great founded, in honor of the emperor, quinquennial gladiatorial contests, built a theater and an amphitheater in Jerusalem (Josephus, "Ant." xv. 8, § 1; "B. J." i. 21, § 8), and also helped maintain such contests in foreign cities. The pious Jews thought it criminal that men should be thrown as food to wild beasts to amuse the multitude. They were most shocked, however, by the trophies and images set up in the theaters ("Ant." xv. 8, § 1): upon one occasion a riot occasioned thereby was quelled by Herod only after much bloodshed. The other Herodians also had a predilection for the theater, Agrippa I. contracting a mortal malady in that at Cæsarea. As a matter of course there were theaters in the Palestinian cities which held a Hellenistic population; hence the Rabbis knew this side of the Greco-Roman life at first hand. A circus at Cæsarea is especially mentioned (Tosef., Oh. xviii. 16), as well as the theater ("Ant." xix. 7, § 4); a hippodrome at Jerusalem ("B. J." ii. 3, § 1); and a stadium at Tiberias, in which 1,200 Jews were killed by Vespasian ("B. J." iii. 10, § 10). Hence the Jews looked upon the circus, the theater, and the stadium as distinctive institutions of pagan Rome.

The Midrash interprets the "sinner" denounced by the Psalmist (Ps. xiv. 1) as being Rome, which fills the whole world with iniquity by building temples for idols, theaters, and circuses. "In four ways the Roman empire eats up the wealth of the nations: with taxes, with baths, with theaters, and with imposts" (Ab. R. N. xxviii.). "The feet of man will take him as he wills either into the house of God and the synagogue, or into the theater and the circus" (Gen. R. lxvii. 3). "What confusion there is in the games that the heathens give in their theaters and their circuses! What have the doctors of the Law to do there?" (Pesiḳ. 168b). The Jews are accused of keeping away from the circus, and thus diminishing the revenues of the state (Esther R., Preface).

Rabbinical Opinions.

Nevertheless, Jews probably often went to the circus; and it is even permitted in the Halakah to go to the theater and the circus on the Sabbath, if public affairs are to be discussed there (Ket. 5a). It is well known that the theaters were frequently used for assemblies of the people, since they were the largest public buildings (Josephus, "B. J." vii. 3, § 3). R. Judah I. was even inclined to find something good in the public games: "We must thank the heathens that they let mimes appear in the theaters and circuses, and thus find innocent amusement for themselves, otherwise they would be constantly getting into great quarrels as soon as they had anything to do with one another" (Gen. R. lxxx. 1). It was even hoped that the time would come when the theaters and circuses would become the homes of the Torah (Meg. 6a). R. Nathan also found reasons to justify visiting the circus ('Ab. Zarah 18b).

In the course of time, however, it was formally forbidden to visit the public games. Sad remembrances connected with the circuses, especially the massacres of thousands of Jews in the theaters under Vespasian and Titus, made those places hateful to the Jews, who came to regard them as scenes of bloodshed, as indeed they were. But even at peaceful representations, when there was no bloodshed, the Jews were jeered and flouted on account of their peculiarities. In reference to this there is an interesting Midrash to the passage, "They that sit in the gate" (Ps. lxix. 13 [A. V. 12]): "The heathens are meant who sit in the theaters and circuses; after they have feasted and become drunk they sit and scoff at Israel. They say to one another: 'Let us beware that we do not resemble the Jews, who are so poor that they have nothing to eat but locust-beans.' Furthermore, they say: 'How long are you going to live?' 'As long as the Sabbath garment of the Jews lasts.' Then they bring a camel swathed in clothes into the theater and ask: 'Why does this camel mourn?' And they answer: 'The Jews are now celebrating their Sabbatical year; and since they have no vegetables, they eat up the camel's thistles: hence it mourns.' Then a mime with shaved head comes into the theater. 'Why is your head shaved?' 'The Jews are celebrating their Sabbath, eating up on that day everything that they earn during the week-days; hence they have no wood for cooking, and they burn up their bedsteads. They must, therefore, sleep on the ground, getting entirely covered with dust; then they must cleanse themselves freely with oil; and the latter, in consequence, is excessively dear'" (Lam. R., Introduction, No. 17).

Ordinances Against Attendance.

Every public place of amusement was looked upon as a "seat of the scornful," in reference to Ps. i. 1. "He who frequents the stadia and the circuses, and sees there the magicians, the tumblers, the 'buccones,' the 'maccus,' the 'moriones,' the 'scurræ,' and the 'ludi sæculares'—this is 'sitting in the seat of the scornful'" (Tosef., 'Ab. Zarah, ii. 6: Yer. 40a, Bab. 18b; Yalḳ., Ps. 613). "I sat not in the assembly of the mockers nor rejoiced" (Jer. xv. 17) is the cry of the Jewish congregation. "Lord of the world! never do I set foot in the theater and the circus of the 'people of the earth'" (Pesiḳ. 119b). Still a third passage is interpreted as being an ordinance against the pagan theater (Sifra, Lev. xviii. 3). It is reprovingly said —apparently in reference to Ex. i. 7, but really to Roman times—that the theater and circus are filled with Jews (Tan. on the passage). Hence an actual anathema is pronounced against attendance at the circus (Targ. Yer. Deut. xxviii. 19). Devastating earthquakes come in consequence of the theater and the circus (Yer. Ber. 13c). A Talmudic sage writes an especial prayer of thanks that Israel has no part in the heathen circus: "I give thanks to Thee, O Lord my God and God of my fathers, that Thou hast placed my portion among those who sit in the house of learning and the house of prayer, and didst not cast my lot among those who frequent theaters and circuses" (Yer. Ber. 7d; Bab. 28b). This prayer is even now found in many prayer-books as a part of the daily morning prayer. According to this prayer, people should keep away from the theater because it is a waste of time, and study is more profitable. It was, moreover, felt that these diversions had their root in idolatry, especially as images of royalty were placed in the theater and circus (Lev. R. xxxiv.).

Christian View.

Similar reasons also induced early Christianity to look askance at the pagan games, and perhaps it was against them that Paul spoke in I Cor. xv. 32. It is certain that Christians as well as Jews furnished victims for the theaters (Renan, "Histoire des Origines du Christianisme," 3d ed., iv. 163): they likewise recognized their idolatrous origin; and Tertullian, in forbidding attendance ("De Spectaculis," ch. iii.), refers to Ps. i. 1, as do the Rabbis. Tertullian's phrase (ch. x.), "Theatrum proprie sacrarium Veneris" (the theater is a place for sexual immorality), is not, however, put so strongly by the Rabbis.

It is curious that, in spite of the iniquity attaching to the circus, the later Midrashim have much to say of a splendid circus and hippodrome which was said to have existed at Solomon's court, the description being based on the Byzantine pattern of Constantinople. Even in the later Middle Ages Jews attended the races, often at their peril (Malalas, "Chronicle," p. 446; Grätz, "Gesch. der Juden," 3d ed., v. 16). See ATHLETES; GAMES; THEATER.

CITRON, SAMUEL LÖB: Hebrew writer of fiction and literary critic; born at Minsk, Russia, May 24, 1862. He attended the rabbinical school at Wolozhin, and made his first appearance as a Hebrew author at the age of fourteen, in the periodical "Ha-Maggid." He contributed to other Hebrew periodicals, and in 1884 translated Leon PINSKER'S "Autoemancipation" from German into Hebrew, under the title "Im en ani li mi li." His works of fiction are: (1) "Asefat Sippurim," 1885, a collection of short stories translated from the German and French; (2) "Mi-Shuḳ ha-Ḥayyim" (From the Fair of Life), 1885; (3) "Abraham ben Joseph," a translation of Levanda's Russian historical novel, "Abraham Jesophovich"; and (4) "Yonah Fotah" (Foolish Dove), 1888. Of his literary and critical essays the following are the most important: (1) "Mapu and Smolensky," a critical estimate of their works; (2) "The Development of Hebrew Literature in Russia During the Nineteenth Century," in "Oẓar ha-Sifrut," vol. ii.; (3) "Ha-Sifrut we ha-Ḥayyim" (Literature and Life), in "Pardes," vols. i. and ii.; (4) "Life of Levanda," in "Aḥiasaf," 1897; and (5) "Ha-Meshorer be-Ḥayyaw ube-Moto" (The Poet Living and Dead), in "Aḥiasaf," 1900.

H. R. A. R.

CITY: The Hebrews distinguished in size between villages and cities. The individual homesteads (חצר, Ex. viii. 9; Lev. xxv. 31; Josh. xiii. 23; Isa. xlii. 11; Ps. x. 8; Neh. xi. 25, xii. 39) developed either into villages (טירה, Gen. xxv. 16, or כפר, I Sam. vi. 18; Cant. vii. 12; I Chron. xxvii. 25, Neh. vi. 2) or into cities (עיר or קריה, Gen. iv. 17, xix. 25, 29). The larger settlements were formed where the banks of a lake or river widened into a plain, as at Tiberias and Jericho; at the confluence of several rivers, as at Beth-shean and Nineveh; at a convenient fording-place, or where an isolated mountainside afforded a natural protection against attacks, as was the case at Jerusalem. Villages and cities are not always distinguished as unfortified and walled places respectively, as Benzinger ("Arch." § 18, 2) maintains: for ערי הפרזות ("cities of the flat or open country") are also mentioned (Esth. ix. 19); and these are equivalent to ערי המישור, as Ḳimḥi correctly interpreted in his work on Hebrew roots under פרז. The same may be inferred from עיר חומה (Lev. xxv. 29; compare Prov. xxv. 28), according to which there might also be עיר; *i.e.*, without walls. Naturally, however, most of the cities were surrounded by walls in those ancient times, when attacks from hostile, roving bands were imminent, and this danger probably gave the first stimulus to the building of cities. In any case it is significant that Cain undertook to build a city only after the birth of his first son, and that he named it for this son. It was meant to be a place of refuge for his family.

Water-Works.

In the enumeration of the chief features of a city mention must first be made of the water-sources; for an abundant supply of good water for drinking purposes is the first prerequisite for the welfare of a city. This view is supported by passages in the Old Testament. At the siege of Jebus, David offered a prize to the hero who should advance as far as the water-works ("ẓinnor," II Sam. v. 8), and in Isa. vii. 3 King Ahaz's care in having the water-works protected against the attack of the enemy is recorded.

The streets ("ḥuẓ," "shuḳ") formed the second important feature. They were as narrow in the cities of the ancient Orient as they are in those of the modern East (Josephus, "B. J." vi. 8, § 5; Benzinger, *l.c.* § 18, 4). It was also an exception if a street could be called straight, as, for example, the street in Damascus referred to in Acts ix. 11; for the majority were very crooked, with many corners. The Law commands that the roads leading to the cities of refuge shall be kept in repair (Deut. xix. 3); but in early times the paving of streets was probably unknown. Josephus ("Ant." viii. 7, § 4), indeed, relates that Solomon had the streets leading to Jerusalem paved with black stones; but the statement is ambiguous, since the mud of the streets is often mentioned as something proverbial (Isa. v. 25, x. 6; Micah vii. 10; Zech. ix. 3, x. 5; Ps. xviii. 43). Since Herod, however, had the principal street of Antiochia paved (Josephus, "Ant." xvi. 5, § 3), it may be assumed that he showed like favor to the inhabitants of Jerusalem. It is certain that under Herod Agrippa the streets of Jerusalem were paved with white stones (Josephus, "Ant." xx. 9, § 7). In antiquity the cleaning of streets was almost as little known as lighting them; the latter being a very recent innovation in Oriental cities. It is recounted, however, that Herod constructed in the recently built port of Cæsarea a subterranean channel, to carry off the rain and the refuse of the streets (*ib.* xv. 9, § 6).

Streets and Gates.

The streets were named after the place to which they led ("the highway of the fuller's field," Isa. vii. 3), or after the occupation of the majority of its inhabitants ("the street of the bakers," Jer. xxxvii. 21; "the valley of craftsmen," Neh. xi. 35; and the quarter of the "goldsmiths and merchants," Neh. iii. 32). Here and there the streets broadened out into open places, which were formed at the parting of ways (ראש; Ezek. xxi. 24 [A. V., 21]), or at the corners of streets (פנה; Prov. vii. 8), or where two streets crossed. These points are called "mother of the way," or "head of the two ways" (Ezek. xxi. 26 [A. V., 21]), or "the house of ways" (Prov. viii. 2). Open squares were mainly found near the gates. Here travelers tarried overnight (Judges xix. 15); and here the children played (Zech. viii. 5).

In a walled town the gates were most important parts; for near them citizens were wont to gather in the dusk to watch or greet the caravans of travelers (Gen. xix. 7; Job xxix. 7); and here also court was held (Deut. xiii. 17; Isa. lix. 14; Ps. lv. 12), compacts were made (Gen. xxiii. 10; Ruth iv. 11), and the market-place was situated (II Kings vii. 1).

Extent and Cultural Importance.

The designation "mother city" (metropolis) indicated that the city so styled was one of importance. This epithet is expressly applied to the old city of Abel Beth-maachah (II Sam. xx. 19); while the same idea is indirectly expressed when the "daughters" of a city are spoken of (Num. xxi. 25). Occasionally a city is explicitly designated as a large one, as in Gen. x. 12, where the clause "the same is a great city" can not refer to Calah, but is evidently meant as a designation for Nineveh together with the three neighboring cities. Nineveh is also called "great" in Jonah iii. 3, where it is hyperbolically described as "a city of three days' journey": this must refer to its diameter and not the circumference, for it is more natural to assume that a person would go through a city than around it. The actual size of the cities of Palestine can not be definitely ascertained, as explicit statistics regarding the number of inhabitants are seldom found. Not even the statement that the total population of Ai was 12,000 (Josh. viii. 25) can be regarded as a fact. Benzinger (*l.c.* § 10, 5) estimates the number of the inhabitants of Jerusalem to have been about 110,000, a number that coincides with the statement that 80,000 of the inhabitants of Jerusalem perished and yet many remained (II Macc. v. 14). The statement of Josephus ("B. J." vi. 9, § 3) that at the time of the Passover Jerusalem had 3,000,000 inhabitants is manifestly an exaggeration.

Life in the villages was more simple and natural than that in the cities. But the large cities had of course many attractions; for there magnificent temples and palaces, and whole streets taken up by bazaars displaying the treasures of the most distant countries, were to be found. These sights are described very picturesquely in reference to Tyre in Ezek. xxvii. 5 *et seq.* The large cities were also the seats of learning, and contained the colleges and the libraries (Isa. xlvii. 10; Dan. ii. 2). But luxuriousness to the utmost degree also prevailed in the large cities, as may be gathered from Isaiah's description of the feasts (Isa. v. 11, xxviii. 8). Extravagance in dress was also carried beyond due limits (Isa. iii. 16 *et seq.*), and, worst of all, boldness and shamelessness kept pace with the vices mentioned (Amos iv. 1 *et seq.*; Isa. xxxii. 9 *et seq.*; Nahum iii. 4).

Changes in Names.

The frequent changing of the names of the cities is an interesting fact to note; and the Old Testament has been especially careful in recording these changes. The long and detailed series of these records begins with the words "Bela which is [the later] Zoar" (Gen. xiv. 2, 8), other examples being Luz, *i.e.*, Beth-el (*ib.* xxviii. 19; xxxv. 6, 27; Josh. xviii. 13; Judges i. 23, 26; xviii. 29); Kirjath-arba, *i.e.*, Hebron (Gen. xxiii. 2; Josh. xiv. 15; xv. 13, 54; xx. 7; xxi. 11; Judges i. 10); Kirjath-sepher, *i.e.*, Debir (Josh. xv. 15, 49; Judges i. 11); Jebus, *i.e.*, Jerusalem (Judges xix. 20 = I Chron. xi. 4). This process of changing the names of cities was continued in later times. The ancient Shechem, for example, was called "Neapolis" (New City); and the name of Jerusalem was changed by the Romans (Hadrian) to Ælia and by the Arabs to al-Ḳuds (the Sanctuary). Thus, many of the cities of Biblical antiquity have continued their existence down to modern times under new names, and not infrequently under their old ones. For the city in post-biblical times see Community, Organization of.

CIUDAD REAL (formerly **Villa Real**): Capital of the former province of La Mancha (now the province of Ciudad Real) in New Castile, founded in 1255 by Don Alfonso X. of Castile. Among its first inhabitants were Jews as well as Moors, the former of whom, chiefly from the neighboring Alarcos, settled in such numbers that as early as 1290 the Jewry paid 26,486 maravedis in taxes, a sum larger than that paid by all the other inhabitants together. Like the Moors, the Jews had their own quarter, apart from the Christians. This Jewry extended from the eastern part of the city, between the gates De la Mata and De Calatrava, along the wall to the west as far as the Calle de la Paloma or De Leganitos, as it is called in all documents; on the north and the south it was bounded by the streets De Calatrava and Lanza, as well as the street De la Mata. It formed a large square which was divided from west to east into two unequal parts by the Jews' street proper, or the Calle de la Juderia. The Jews' street (which was called "Calle de Barrio Nuevo" after 1391, "Calle de la Inquisicion" after the introduction of the Inquisition, and is now known as the "Calle de la Libertad") had on its right Calle de la Culebra, Calle de Sangre, and Calle de Lobo; on its left, Calle de Tercia, Calle de Combro, and Calle de Refugio. Calle de la Barrera, now called "Compas de S. Domingo," and Calle de la Peña, ran in the direction of the first three streets, the Great Synagogue being situated between them. No traces remain of the other synagogues of Villa Real. The Jewish cemetery (Fonsario de los Judios), having an area of about 3,000 square feet, was situated on the outskirts of the city, between the roads De la Mata and De Calatrava, on the street leading along the Guadiana.

Trade of Jews.

The Jews of Villa Real traded extensively in the products of the country and in other goods, which they exposed for sale in the large markets called "Alcana" or "Alcaiceria." They also lent money to the agricultural population of the city and vicinity; but their monetary transactions occasioned frequent complaints. In a decree of Sept. 5, 1292, the king, Sancho IV., permitted the Jews to charge three or, at the utmost, four per cent interest. One of the richest Jews of Villa Real was Don Zulema aben Albagal, who, like his son-in-law, Abraham aben Xuxen (Susan), was a mill-owner and a farmer of the royal taxes, and had business relations with the grand masters of the Order de Calatrava, which was very powerful in the city. Donna Maria de Molina, the wife of Sancho IV., and, after his death, regent of Castile, protected the Jews and guarded their privileges during the continuous internal dissensions of the country, because she was dependent on the taxes they paid. Like all the Jews of Castile, those of Villa Real enjoyed peace during the reign of Pedro I. Nor were they subjected to the punishments which Henry II., after Pedro's death, inflicted upon the aljama of Toledo. For faithful services to Henry II., the grand master of Calatrava received a grant of from 500 to 1,000 maravedis, "payable from the taxes of the Jews residing between Guadalerza and Puerto de Muradal, together with Villa Real and its vicinity." This grant was confirmed by Juan I. (Aug., 1379).

Persecution in 1391.

The great persecution of the Jews in 1391 visited Villa Real in all its horrors. "The storm swept over Muradal and fell with equal severity upon Villa Real," writes a contemporary chronicler. On a day not precisely indicated, but probably between the tenth and twentieth of June, the mob rushed into the Jewry and plundered the dwellings, the warehouses, and the synagogues. Every Jew that resisted was mercilessly cut down, and the whole Jewry was destroyed in a few hours. All the Jews who did not seek safety in flight were baptized. According to a document dated Aug. 6, 1393, the Great Synagogue, with its outbuildings and the Jewish cemetery, was presented by the king, Don Henry III., to his steward, Gonzalo de Soto, who sold it in 1398 for a consideration of 10,000 maravedis to Juan Rodriguez de Villa Real, the last named intending it for a monastery dedicated to San Domingo.

Notwithstanding their conversion to Christianity, the secret Jews, or Maranos, were bitterly hated by the Christians. In June, 1449, a bloody battle occurred between the Christian inhabitants of Villa Real and the Maranos, who were mostly tax-farmers and tax-gatherers. The first victim was Alfonso de Cota, a man of immense wealth, whose house was stormed and plundered. The mob, led by knights and nobles, rushed into the quarter De la Magdalena, where the richest Maranos were living, and into the former Jewry, robbing, plundering, and killing. The corpses of the noblest Maranos were dragged through the streets and hung up by the legs in the public places. The ringleader, Pedro Sarmiento, led away 200 mules laden with gold, silver, tapestries, and everything portable of sufficient value to tempt cupidity; he, as well as all the other miscreants, went unpunished. Thenceforth no Marano was allowed to hold public office at Villa Real. The chroniclers say that it is doubtful whether any Jews ever returned to the city after this occurrence. In April, 1483, the activities of the Inquisition were extended to Villa Real; the first victims being the rich tax-collector Juan Gonzales Pampan and his wife, known as "La Pampana."

CIVIDALI: Italian city, in the province of Udine. It is a part of the ancient duchy of Friuli, now divided between Austria and Italy. Aside from certain inscriptions preserved in the Cividali Museum, which would date the first Jewish settlement at about 604 B.C., the first mention of Jews is by Paulus Diaconus, who refers to it, and by the council at Friuli in 796, which complained that the Christians as well as the Jews celebrated the Sabbath. The chroniclers state that Cividali was the rallying-point of the Jews from Göritz, Triest, and Vienna. There is also a report that Jewish corpses were brought to Cividali for burial from distant countries, even from Moravia. The cemetery near the city wall gave to that quarter the name "Zudaica," which name it still bears.

The graves found there date from the fourteenth century, the earliest decipherable inscriptions being of the year 1428, 1464, and 1606. In 1646 that part of the city wall, as well as part of the cemetery, was destroyed.

The presence of Jews in Cividali at an early date is shown by the fact of Jewish families bearing the name of that town. At the present day (1902) there are no Jews residing there.

G. I. E.

CLAAR, EMIL: Austrian poet, playwright, and actor; born Oct. 7, 1842, in Lemberg. Early in life he went to Vienna with the intention of studying medicine; but, in compliance with the desire of his relatives, he adopted a commercial career. After long struggles he determined to give this up also and to become an actor. He made his début in 1860 at the Vienna Burgtheater, and afterward played in Graz, Linz, and the Berlin Hoftheater. Subsequently Claar was engaged to play at the city theater of Leipsic, and remained there for five years, and during the later part of this period also acted as a dramatic collaborator of Laube. From Leipsic Claar went to Weimar, becoming there stage-manager of the Court Theater till 1872, when he gave up this position and became chief stage-manager of the Landestheater at Prague. In 1876 he was appointed director-manager of the Berlin Residenztheater, and has since July 1, 1879, been superintendent of the United City Theaters of Frankfort-on-the-Main.

Besides two volumes of poems ("Gedichte," Leipsic, 1868; Berlin, 1885) Claar published a number of dramatic productions, such as "Simson und Delila," a comedy (1869); "Der Friede" (1871); "Auf den Knieen," a comedy (1871); "In Hamburg," a comedy (1871), "Die Heimkehr," a drama (1872); "Gute Geister" (1872); "Shelley," a tragedy (1874), and others.

S. B. B.

CLASSICAL WRITERS AND THE JEWS: The name ’Ιουδαῖος is apparently first mentioned by **Theophrastus,** a philosopher of the fourth century B.C. He regards the Jews as a nation of philosophers who "spend their days in discussions about God, and their nights in observing the stars." **Aristotle** met a Jew in Asia who knew Greek perfectly and was, according to Clearchus, a Greek at heart and a philosopher. **Megasthenes,** a historian of the first half of the third century B.C., says that "all the ideas expressed by the ancients in regard to the laws of physics were also known to non-Greek philosophers, partly to the Brahmans of India, and partly to those in Syria called Jews." The learned Greeks were naturally in sympathy with the monotheistic doctrines of the Jews, and at first assumed a friendly attitude toward them. Hecatæus of Abdera, Strabo, Varro, and even Tacitus himself have words of praise for the religious beliefs and for many of the institutions of Judaism. It was not long, however, before the religious isolation of the Jews, and their contempt of the heathen beliefs, created much antagonism.

As early as the third century B.C. the unfriendly feelings toward the Jews found expression. This is particularly true of Egypt, where the fable originated of the Jews being the descendants of lepers and unclean persons. **Hecatæus,** of Abdera (third century B.C.) tells of the expulsion of the Jews from Egypt in his history of that country. According to him there was a plague in Egypt, which the people ascribed to the anger of the gods. This they thought was caused by the increase in the land of foreigners not believing in their divinity. It was decided to expel them. The bravest and strongest of the foreigners united and moved to Greece and other places; the lower classes settled in Judea, which had been uninhabited theretofore. Describing the laws and customs of the Jews as established by Moses, Hecatæus says that Moses persuaded his followers that God has no form, and that He is the "sky surrounding the earth." Moses, he adds, established laws prohibiting humanity and hospitality.

Manetho, a learned Egyptian priest, is quoted by Josephus as describing the origin of the Jews, in substance, as follows: Amenophis, the king, compelled all the unclean persons and lepers, numbering 80,000, to work with criminals in the stone-quarries along the Nile. Among the lepers were some learned priests. After some time the king allowed them to leave the quarries, and gave them the city of Avario for their habitation. Settling there, they appointed a priest named Osarsiph—who afterward changed his name to Moses—as their leader, repaired the walls of the city, and called to their aid the inhabitants of Jerusalem, which city had been settled by shepherds expelled from Egypt. They made war on Egypt, and reigned there for thirteen years, after which the fugitive king returned with a great force and drove the shepherds and lepers into Syria ("Contra Ap." i. 26–27).

The same story with variations is repeated by **Diodorus Siculus** (first century B.C.). **Cleomedes** refers to the "beggars ever present near the synagogues"; and **Agatharchides** (second century B.C.) says that the Jews spend every seventh day in idleness, discarding their weapons, and playing in their temple. According to Josephus, **Apollonius Molo** (a contemporary of Cicero) wrote a treatise against the Jews, "in which he scattered his aspersions in all directions throughout the work." He calls Moses "a conjurer and deceiver," and the Jews he describes as "godless and hostile to other men." **Strabo,** the geographer (*c.* 60 B.C.–25 C.E.), does not repeat the story of the Jews being descendants of lepers, though he evidently follows Diodorus in his representation of Jewish theology. While Manetho ascribes the expulsion of the Jews to the king's desire to regain the favor of the gods, **Chæremon,** a Stoic of the first half of the first century B.C., traces it to a dream which Amenophis had and in which the goddess Isis appeared to him. Isis rebuked the king for allowing her temples to be demolished in the war. "Phritiphantes, the sacred scribe, informed him that if he would purge Egypt of the men who were diseased he should no longer be troubled with such apparitions. Amenophis thereupon collected 250,000 unclean persons and drove them out of Egypt. The leaders of these people, called Moses and Joseph, made their way to Pelusium, united with 380,000 men whom Amenophis would not allow to enter the country, made war on Egypt, and overran the land for thirteen years. The son of Amenophis, when he attained to manhood, drove these persons into Syria."

Lysimachus of Alexandria is also mentioned and criticized by Josephus. The version by Lysimachus from the Christians. This Jewry extended from the eastern part of the city, between the gates De la Mata and De Calatrava, along the wall to the west as far as the Calle de la Paloma or De Leganitos, as it is called in all documents; on the north and the south it was bounded by the streets De Calatrava and Lanza, as well as the street De la Mata. It formed a large square which was divided from west to east into two unequal parts by the Jews' street proper, or the Calle de la Juderia. The Jews' street (which was called "Calle de Barrio Nuevo" after 1391, "Calle de la Inquisicion" after the introduction of the Inquisition, and is now known as the "Calle de la Libertad") had on its right Calle de la Culebra, Calle de Sangre, and Calle de Lobo; on its left, Calle de Tercia, Calle de Combro, and Calle de Refugio. Calle de la Barrera, now called "Compas de S. Domingo," and Calle de la Peña, ran in the direction of the first three streets, the Great Synagogue being situated between them. No traces remain of the other synagogues of Villa Real. The Jewish cemetery (Fonsario de los Judios), having an area of about 3,000 square feet, was situated on the outskirts of the city, between the roads De la Mata and De Calatrava, on the street leading along the Guadiana.

Trade of Jews.

The Jews of Villa Real traded extensively in the products of the country and in other goods, which they exposed for sale in the large markets called "Alcana" or "Alcaiceria." They also lent money to the agricultural population of the city and vicinity; but their monetary transactions occasioned frequent complaints. In a decree of Sept. 5, 1292, the king, Sancho IV., permitted the Jews to charge three or, at the utmost, four per cent interest. One of the richest Jews of Villa Real was Don Zulema aben Albagal, who, like his son-in-law, Abraham aben Xuxen (Susan), was a mill-owner and a farmer of the royal taxes, and had business relations with the grand masters of the Order de Calatrava, which was very powerful in the city. Donna Maria de Molina, the wife of Sancho IV., and, after his death, regent of Castile, protected the Jews and guarded their privileges during the continuous internal dissensions of the country, because she was dependent on the taxes they paid. Like all the Jews of Castile, those of Villa Real enjoyed peace during the reign of Pedro I. Nor were they subjected to the punishments which Henry II., after Pedro's death, inflicted upon the aljama of Toledo. For faithful services to Henry II., the grand master of Calatrava received a grant of from 500 to 1,000 maravedis, "payable from the taxes of the Jews residing between Guadalerza and Puerto de Muradal, together with Villa Real and its vicinity." This grant was confirmed by Juan I. (Aug., 1379).

Persecution in 1391.

The great persecution of the Jews in 1391 visited Villa Real in all its horrors. "The storm swept over Muradal and fell with equal severity upon Villa Real," writes a contemporary chronicler. On a day not precisely indicated, but probably between the tenth and twentieth of June, the mob rushed into the Jewry and plundered the dwellings, the warehouses, and the synagogues. Every Jew that resisted was mercilessly cut down, and the whole Jewry was destroyed in a few hours. All the Jews who did not seek safety in flight were baptized. There is also a report that Jewish corpses were brought to Cividali for burial from distant countries, even from Moravia. The cemetery near the city wall gave to that quarter the name "Zudaica," which name it still bears.

The graves found there date from the fourteenth century, the earliest decipherable inscriptions being of the year 1428, 1464, and 1606. In 1646 that part of the city wall, as well as part of the cemetery, was destroyed.

The presence of Jews in Cividali at an early date is shown by the fact of Jewish families bearing the name of that town. At the present day (1902) there are no Jews residing there.

G. I. E.

CLAAR, EMIL: Austrian poet, playwright, and actor; born Oct. 7, 1842, in Lemberg. Early in life he went to Vienna with the intention of studying medicine; but, in compliance with the desire of his relatives, he adopted a commercial career. After long struggles he determined to give this up also and to become an actor. He made his début in 1860 at the Vienna Burgtheater, and afterward played in Graz, Linz, and the Berlin Hoftheater. Subsequently Claar was engaged to play at the city theater of Leipsic, and remained there for five years, and during the later part of this period also acted as a dramatic collaborator of Laube. From Leipsic Claar went to Weimar, becoming there stage-manager of the Court Theater till 1872, when he gave up this position and became chief stage-manager of the Landestheater at Prague. In 1876 he was appointed director-manager of the Berlin Residenztheater, and has since July 1, 1879, been superintendent of the United City Theaters of Frankfort-on-the-Main.

Besides two volumes of poems ("Gedichte," Leipsic, 1868; Berlin, 1885) Claar published a number of dramatic productions, such as "Simson und Delila," a comedy (1869); "Der Friede" (1871); "Auf den Knieen," a comedy (1871); "In Hamburg," a comedy (1871), "Die Heimkehr," a drama (1872); "Gute Geister" (1872); "Shelley," a tragedy (1874), and others.

S. B. B.

CLASSICAL WRITERS AND THE JEWS: The name ’Ιουδαῖος is apparently first mentioned by **Theophrastus,** a philosopher of the fourth century B.C. He regards the Jews as a nation of philosophers who "spend their days in discussions about God, and their nights in observing the stars." **Aristotle** met a Jew in Asia who knew Greek perfectly and was, according to Clearchus, a Greek at heart and a philosopher. **Megasthenes,** a historian of the first half of the third century B.C., says that "all the ideas expressed by the ancients in regard to the laws of physics were also known to non-Greek philosophers, partly to the Brahmans of India, and partly to those in Syria called Jews." The learned Greeks were naturally in sympathy with the monotheistic doctrines of the Jews, and at first assumed a friendly attitude toward them. Hecatæus of Abdera, Strabo, Varro, and even Tacitus himself have words of praise for the religious beliefs and for many of the institutions of Judaism. It was not long, however, before the religious isolation of the Jews, and their contempt of the heathen beliefs, created much antagonism.

As early as the third century B.C. the unfriendly feelings toward the Jews found expression. This is particularly true of Egypt, where the fable originated of the Jews being the descendants of lepers and unclean persons. **Hecatæus,** of Abdera (third century B.C.) tells of the expulsion of the Jews from Egypt in his history of that country. According to him there was a plague in Egypt, which the people ascribed to the anger of the gods. This they thought was caused by the increase in the land of foreigners not believing in their divinity. It was decided to expel them. The bravest and strongest of the foreigners united and moved to Greece and other places; the lower classes settled in Judea, which had been uninhabited theretofore. Describing the laws and customs of the Jews as established by Moses, Hecatæus says that Moses persuaded his followers that God has no form, and that He is the "sky surrounding the earth." Moses, he adds, established laws prohibiting humanity and hospitality.

Manetho, a learned Egyptian priest, is quoted by Josephus as describing the origin of the Jews, in substance, as follows: Amenophis, the king, compelled all the unclean persons and lepers, numbering 80,000, to work with criminals in the stone-quarries along the Nile. Among the lepers were some learned priests. After some time the king allowed them to leave the quarries, and gave them the city of Avario for their habitation. Settling there, they appointed a priest named Osarsiph—who afterward changed his name to Moses—as their leader, repaired the walls of the city, and called to their aid the inhabitants of Jerusalem, which city had been settled by shepherds expelled from Egypt. They made war on Egypt, and reigned there for thirteen years, after which the fugitive king returned with a great force and drove the shepherds and lepers into Syria ("Contra Ap." i. 26–27).

The same story with variations is repeated by **Diodorus Siculus** (first century B.C.). **Cleomedes** refers to the "beggars ever present near the synagogues"; and **Agatharchides** (second century B.C.) says that the Jews spend every seventh day in idleness, discarding their weapons, and playing in their temple. According to Josephus, **Apollonius Molo** (a contemporary of Cicero) wrote a treatise against the Jews, "in which he scattered his aspersions in all directions throughout the work." He calls Moses "a conjurer and deceiver," and the Jews he describes as "godless and hostile to other men." **Strabo,** the geographer (*c.* 60 B.C.–25 C.E.), does not repeat the story of the Jews being descendants of lepers, though he evidently follows Diodorus in his representation of Jewish theology. While Manetho ascribes the expulsion of the Jews to the king's desire to regain the favor of the gods, **Chæremon,** a Stoic of the first half of the first century B.C., traces it to a dream which Amenophis had and in which the goddess Isis appeared to him. Isis rebuked the king for allowing her temples to be demolished in the war. "Phritiphantes, the sacred scribe, informed him that if he would purge Egypt of the men who were diseased he should no longer be troubled with such apparitions. Amenophis thereupon collected 250,000 unclean persons and drove them out of Egypt. The leaders of these people, called Moses and Joseph, made their way to Pelusium, united with 380,000 men whom Amenophis would not allow to enter the country, made war on Egypt, and overran the land for thirteen years. The son of Amenophis, when he attained to manhood, drove these persons into Syria."

Lysimachus of Alexandria is also mentioned and criticized by Josephus. The version by Lysimachus

—thanks to Apion and Tacitus—was well known in the ancient world. According to him, in the reign of Bochoris, King of Egypt, the Jewish people, being infected with leprosy, scurvy, and other diseases, took refuge in the temples, and begged there for food. In consequence of the vast number of the persons infected, there was a failure of crops in Egypt. The oracle of Ammon being consulted, the king was told to drive into desert places all impure and impious men, and to drown all those affected with scurvy and leprosy. The king ordered the first to be driven out, and caused the others to be wrapped in sheets of lead and thrown into the sea. The former took counsel together, selected a priest named Moses as their leader, traveled amid great privation until they reached Judea, conquered it, and founded a city which they named Hierosyla (from their disposition to rob temples), but later changed it to Hierosolyma.

Apion, a grammarian and lawyer of Alexandria, expressed his evident enmity to the Jews by collecting, from whatever source, all current stories unfavorable to them. He repeats the story of their descent from unclean persons, represents their laws as antagonistic to those of their neighbors, and describes also their Temple and its interior. He even goes a step further and adds another fable—an invention of his own most probably. He relates that it was the custom of the Jews to capture every year some Greek stranger, to fatten him with good food, to kill him in sacrifice, and to eat his entrails. Stories similar to the above found credulous hearers, made curious by the mysteries of the Jewish religion. The customs of the Jews, so different from those of other peoples, formed a fruitful subject for discussion; as, for instance, their abstinence from pork, their rite of circumcision, their Sabbath, etc.

The claim of the Jews that theirs was the only true religion created not only interest, but also enmity. **Celsus** (second century C.E.), who wrote against Christians, also mentions the Jews. He accuses them of never having given anything useful to the world and of never having earned the respect of other peoples. They worship the imaginary, and neglect what is real; they look down upon the beliefs of non-Jews, and try to induce others to adopt the same views. **Philostratus** (180–250 C.E.) can not understand why Rome takes so much interest in the kingdom of the Jews. "From olden times," he says, "they have been opposed not only to Rome, but to the rest of humanity. People who do not share with others their table, their libations, their prayers, their sacrifices, are further removed from us than Susa, or Bactria, or even farthest India."

At the beginning of the third century of the present era the character of the Jews seems to change in the eyes of pagans: they cease to be a nation, and come to be regarded as a religious body. Proselytism becomes a feature of their activity, and is beginning to cause concern. **Dion Cassius** (150–236 C.E.) writes: "I do not know the origin of the term 'Jew.' The name is used, however, to designate all who observe the customs of this people, even though they be of different race. Therefore we find them also among native Romans. The Jews differ from all other peoples in their whole manner of life, but especially in that they do not honor any of the other gods, but worship with much fervor only one. Even at Jerusalem they never had an image of their divinity; they believe Him to be ineffable and invisible. . . . The day of Saturn is devoted to him. On this day they carry out many peculiar rites, and consider it a sin to work. All that relates to this God, His nature, the origin of His worship, and of the great awe with which He inspires the Jews, has been told long ago by many writers." In the same century **Porphyry,** a Neoplatonic philosopher, gives some oracles of Apollo. Among other things, he says: "The way of the happy is steep and rough, . . . and the Phenicians, Assyrians, Lydians, and the race of Hebrew men taught many ways of the happy. . . . The Chaldeans and Hebrews alone received wisdom as their destiny, worshiping in a pure manner, the self-produced Ruler as God."

The Roman writers devote considerably more attention to the Jews than do the Greek. The reason for this is the greater familiarity of the Romans with the Jews, whose numbers in Rome had largely increased. **Cicero,** the great orator, philosopher, and statesman (103–43 B.C.), often refers to the Jews in his orations, and in a tone of evident enmity. He calls them "nations born to slavery"; and in his defense of Flaccus he says, among other things: "While Jerusalem maintained its ground and the Jews were in a peaceful state, their religious rites were repugnant to the splendor of this empire, the weight of our name, and the institutions of our ancestors; but they are more so now, because that race has shown by arms what were its feelings with regard to our supremacy; and how far it was dear to the immortal gods, we have learned from the fact that it has been conquered, let out to hire, and enslaved."

Horace (65–8 B.C.) refers in his satires to the persistence with which the Jews try to convert people to their religion, and ridicules their Sabbath. **Ovid** also refers to "the seventh day kept holy by the Syrian Jew." **Seneca** (d. 65 C.E.) strongly attacks the Jewish Sabbath. He denies the utility of such an institution, and considers it even injurious; for the Jews, "by taking out every seventh day, lose almost a seventh part of their own life in inactivity, and many matters which are urgent at the same time suffer from not being attended to." Seneca admits the great moral power of "this most outrageous nation," and considers their successful proselytizing as an instance where "the conquered have given laws to their conquerors."

Martial (d. 104 C.E.) repeatedly pokes fun at the Jews, their Sabbath, the offensive odor of the keepers of the Sabbath, their custom of circumcision, and their beggars. **Juvenal** (d. 140 C.E.) also mentions the great swarms of Jewish beggars and their extreme poverty, the abstinence of the Jews from the flesh of swine, etc. **Tacitus** in his history, written between 104 and 109 C.E., devotes considerable space to the Jews. He derives his information from the Greek writers, and repeats the fable of the Jews being descendants of unclean persons, of lepers, etc.; tells of their wanderings and their suffering in the desert; discourses about Moses and the laws that he established contrary to those of other nations; and attempts to account for the origin of their various customs. He says:

> "These rites and ceremonies, however introduced, have the support of antiquity; but other institutions have prevailed among them, which are tainted with low cunning. For the refuse of other nations, having renounced the religion of their own country, were in the habit of bringing gifts and offerings to Jerusalem; hence the wealth and growth of Jewish power. And, whilst among themselves they keep inviolate faith and are always prompt in showing compassion to their fellows, they cherish bitter enmity against all others, eating and lodging with one another only, and, though a people most prone to sensuality, having no intercourse with women of other nations. Among themselves no restraints are known; and in order that they may be known by a distinctive mark, they have established the practise of circumcision. . . . They show concern, however, for the increase of their population. For it is forbidden to put any of their brethren to death, and the souls of such as die in battle, or by the hand of the executioner, are thought to be immortal; hence their desire to have children, and their contempt of death. . . . The Jews acknowledge one god only, and conceive of him by the mind alone."

These, in brief, are the views held by the classical writers concerning the Jews. In most cases they are far from complimentary. These unfriendly, unjust, and at times very naive opinions are expressed by writers, many of whom in other cases show much kindly yet critical judgment. In fact, to them can be attributed the lack of familiarity of the ancient world with the life and customs of the Jews, as is amply proved by Josephus in his work "Contra Apionem"; and there is no doubt that it was the social and religious isolation of the Jews, and their contempt for the pagan beliefs, that gave birth to an enmity that has descended to more recent times.

G. J. G. L.

CLAUDIUS (Tiberius Claudius Drusus Nero Germanicus): Roman emperor, 41–54 C.E. Claudius was the second son of Drusus, the brother of the emperor Tiberius. Being of a feeble constitution, and unprepossessing in appearance, he was slighted by everybody, even by his own mother. During his reign both his freedmen and his wife Agrippina exerted a great influence over him. Finally, Agrippina, in order to secure the succession of Nero, her son by her first marriage, had Claudius poisoned.

After the murder of Caligula, Claudius had been brought forth from his hiding-place by a pretorian and proclaimed emperor. Thanks to the advice and diplomatic skill of his friend, the Jewish king Agrippa I., the accession of Claudius was, on the following day, recognized by the senate. In return he confirmed Agrippa in his possession of the dominions granted him by Caligula, and added thereto Judea and Samaria, so that Agrippa had now under his rule the whole former kingdom of Herod. He also interposed between the Jewish and the pagan citizens of Alexandria, who had been in open hostility to one another since 38 C.E. The leaders of the anti-Jewish Alexandrians, Isidorus and Lampon, were called to account in Rome, and executed (Wilcken, in "Hermes," xxx. 481 *et seq.*; "Berliner Philol. Wochenschrift," 1896, pp. 1617 *et seq.*; *ib.* 1897, pp. 410 *et seq.*; Th. Reinach, in "Rev. Et. Juives," xxxi. 161 *et seq.*; *ib.* xxxii. 160; *ib.* xxxiv. 296; Weil, in "Revue des Etudes Grecques," xi. 243 *et seq.*; Mommsen, in "Sitzungsberichte der Berliner Akademie," 1898, p. 498; idem "Römisches Strafrecht," p. 265; Mitteis, in "Hermes," xxxiv. 88 *et seq.*). The governor of Egypt was ordered to suppress the disorder; the Alexandrian Jews had their privileges reconfirmed; and, at the instigation of Agrippa and Herod, an edict of tolerance was issued for the Jews of the whole Roman empire. On the death of Agrippa his kingdom was again taken under Roman administration. Repeated charges brought against the governor by Jewish envoys received favorable attention from the emperor, owing chiefly to the intervention of Agrippa the Younger. Thus, on one occasion the garments of the high priest were handed back to the Jews; and Agrippa's brother Herod was put in charge of the Temple, with the right of appointing the high priests. On the decision of Claudius in a dispute between Samaritans and Judeans, see Cumanus.

The Jews in Rome itself, however, in the year 49, were forbidden to hold religious gatherings, owing to continued disturbances resulting from the frequency of Christian Messianic sermons. No expulsion took place; but many Jews no doubt left Rome voluntarily. However, this measure of Claudius was certainly not directed against the Jewish religion.

G. H. V.

CLAUDIUS, RUTILIUS NAMATIANUS: Roman poet. He held high public offices in Rome, but returned (416) to Gaul, the land of his birth, after the devastation of the latter by the Goths. He depicts his return in his poem "De Reditu Suo." As a polytheist he was antagonistic to Judaism; and his aversion was the more emphatic because he wished thereby to strike covertly at Christianity. He scorned the Jews mainly on account of their dietary laws, their rite of circumcision, and their strict observance of the Sabbath. He ends his diatribes by expressing the wish that Pompey and Titus had never subdued the Jews, for the insidious plague was spreading farther than before, and the vanquished had subdued the victors.

His poems were edited by Lucian Müller, 1870; a German translation was published in 1872 by Itasius Lemniacus (A. von Reumont).

G. H. V.

CLAVA, ISAIAH: Spanish poet of Amsterdam. He translated from Hebrew into Spanish a Purim song, under the title "Cancio de Purim, Establecido Sobre su Historia, Echo por un Anonimo, y Ahora Nuevamente Sacado del Hebrayco al Espagnol," Amsterdam, 1772. The poem contains 110 strophes of nine lines each.

T. J.

CLAY ("ḥomer," "ṭiṭ"): A word used in the Old Testament to denote several kinds of soil, including the clays of the East as well as the loam of the Nile valley. Clay, in its technical sense, is "a mixture of decomposed minerals of various kinds. Alumina, silica, and potash are the principal constituents; but along with these may be variable quantities of lime, magnesia, and iron, which give variety both to the quality and color" (Hull, in Hastings' "Dict. of the Bible," *s.v.*). Clay was used among ancient peoples and in Biblical times for at least three specific purposes: (1) for making bricks; (2) for making pottery; (3) as writing-material.

(1) *For Making Bricks*: The great mounds of earth marking the remains of ancient cities testify to the prevalent use of clay bricks as building-material. Throughout Babylonia, and mainly in Assyria, sun-dried and kiln-burnt bricks were the chief materials of which the people built their magnificent palaces and huge and massive city walls. Lower Egypt, according to the representations in the pictures of ancient life, and to the remains discovered by Naville at Tell el-Maskhuta, has always been a place where brickmaking was an important industry. Most of its villages, ancient and modern, have been constructed of sun-dried brick.

(2) *For Making Pottery*: Among the ruins of the most ancient cities of Egypt, Babylonia, Palestine, and Assyria remains are found of the potter's art. In the Old Testament the potter at his wheel is used as a symbol of divine power over the fate of men (compare Jer. xviii. 1–3; Isa. lxiv. 8; Rom. ix. 2).

(3) *As Writing-Material*: This was the most remarkable use made of clay in ancient times. The tens of thousands of tablets found in the ruins of ancient cities testify to the prevalence of this curious custom. On the soft material, carefully selected for its freedom from hard bodies, cuneiform characters were impressed; and to preserve the tablet from ruin it was carefully baked. Some tablets were not only impressed with cuneiform signs, but sealed by rolling over the soft clay the private seals of the principals or witnesses: such tablets are called "contract tablets." Others when written were enclosed within an envelope of clay, upon which the matter of the inner document was more or less faithfully reproduced. It is not improbable that "the evidence" mentioned in connection with Jeremiah's transfer of land bought before the fall of Jerusalem refers to a clay document (compare xxxii. 10–14; also Job xxxviii. 14). Up to the present (1902) only one cuneiform tablet has been found in Palestine, that at Tell al-Ḥasi. It dates from the fourteenth century B.C.—the so-called Amarna period (see Bliss, "A Mound of Many Cities," pp. 52–60).

CLEAN AND UNCLEAN ANIMALS.—Animals ceremonially pure and fit for food, and such as are not. **Biblical Data:** The distinction between clean and unclean animals appears first in Gen. vii. 2–3, 8, where it is said that Noah took into the ark seven and seven, male and female, of all kinds of clean beasts and fowls, and two and two, male and female, of all kinds of beasts and fowls that are not clean. Again, Gen. viii. 20 says that after the flood Noah "took of every clean beast and of every clean fowl, and offered burnt offerings on the altar that he had built to the Lord." It seems that in the mind of this writer the distinction between clean and unclean animals was intended for sacrifices only; for in the following chapter he makes God say: "Everything that moveth shall be food for you" (Gen. ix. 3). In Leviticus (xi. 1–47) and Deuteronomy (xiv. 1–20), however, the distinction between "clean" and "unclean" is made the foundation of a food-law: "This is the law . . . to make a difference between the clean and the unclean, and between the living thing that may be eaten and the living thing that may not be eaten" (Lev. xi. 46–47). The permitted food is called "clean," "pure" (טהור, ṭahor): the forbidden food is not simply not clean, but is positively unclean, polluted, impure (טמא, ṭame), "an abomination" (שקץ, sheḳeẓ). The terminology "clean and unclean" in the food-law has to a certain extent a different implication from that borne by the same terms as used in the sacrificial law (see SACRIFICE).

Distinction Between "Clean" and "Unclean."

The clean animals were: (1) All quadrupeds that chew the cud and also divide the hoof (Lev. xi. 3; Deut. xiv. 6); for instance, the ox, the sheep, the goat (*i.e.*, the sacrificial animals), the hart and the gazel, the roebuck, the wild goat, the pygarg, the antelope, and the chamois (Deut. xiv. 4–5). Among other forbidden animals, the camel, the rock-badger (see CONEY), the hare, and the swine were excluded by name (Lev. xi. 4–7; Deut. xiv. 7–8), probably because used as food or for sacrifice by the neighboring tribes.

(2) Fish proper; *i.e.*, "whatsoever hath fins and scales . . . in the seas and in the rivers" (Lev. xi. 9; compare Deut. xiv. 9).

(3) Birds. Here the Law proceeds by way of elimination. From the rather lengthy list of forbidden birds (Lev. xi. 13–19; Deut. xiv. 11–18) it may be concluded that all the birds of prey and most of the water-fowl were considered unclean. The bat closes the list.

(4) The winged creeping things "that go upon all four" which "have legs above their feet to leap withal," of which four kinds of locusts are named (Lev. xi. 21–22). All the other creeping things (see ANIMALS) are most emphatically and repeatedly forbidden and held up as the greatest abomination (Lev. xi. 20, 31–38, 42–43). A list of creeping things to be avoided includes the weasel, the mouse, four kinds of lizards, and the chameleon (Lev. xi. 29–30).

Restrictions were also placed on the use of the flesh of clean animals: it was forbidden to eat it when the animal had been torn in the field by a carnivorous beast (Ex. xxii. 30), or when it had died a natural death, or had been carried off by disease (Deut. xiv. 21). Although, however, the use of such meats rendered people unclean, strictly speaking, their prohibition belongs to the law concerning Blood.

Theories of Distinction.

——**Ethnological View:** For the distinction between clean and unclean animals various origins have been suggested; though few of them seem to have fully satisfied any one but their own originators. Omitting the most ancient ones (Origen, "Contra Celsum," iv. 93; ed. Migne, xi., col. 1171; Theodoret, on Lev. ix. 1, ed. Migne, lxxx., col. 299, and others, analyzed in Vigouroux, "Dict. de la Bible," i. 615 *et seq.*), only the most popular ones in our own day need be mentioned. According to Grotius, on Lev. xi. 3; Spencer, "De Leg. Hebr. Rit." i. 7, 2; S. D. Michaelis, "Mosaisches Recht," iv., § 220, etc., the distinction between clean and unclean animals is based on hygiene: it is a sanitary law. According to others, the law was a national one, intended to separate Israel from the neighboring nations, Arabians, Canaanites, and Egyptians (Ewald, "Antiq. of Israel," pp. 144 *et seq.*), and partly a sanitary one (Rosenmüller, "Scholia in Vetus Testamentum"—Leviticus). According to Keil, "Handbuch der Biblischen Archäologie," pp. 492 *et seq.*, the law is a religious one, intended to deter men from the vices and sins of which certain animals are the symbols, which view is a mere variation of the allegorical interpretation proposed by Philo ("De Concupiscentia," 5-10).

Of these explanations the first two have been refuted by Sommer in his "Biblische Abhandlungen," i. 187-193; Keil's opinion has been opposed by Nowack, "Lehrbuch der Biblischen Archäologie," i. 117, and others. The most popular theory at the present day is perhaps that offered by the late W. Robertson Smith, in his article "Animal Worship and Animal Tribes Among the Ancient Arabs" ("Journal of Philology," 1880), according to which the unclean animals were forbidden because they were totems of the primitive clans of Israel. This theory has been accepted by Cheyne ("Isaiah," i. 99; ii. 123-124, 303) and Stade ("Gesch. Israels," i. 408), but by Dillmann is either entirely and without discussion rejected ("Genesis," p. 382), or restricted to the prehistoric times of Israel, as being a survival of the old totem-worship and totem-clan organization, resembling in historic times the case of the horse in England, which anthropologists say is not eaten because it was once sacred to Odin, and thus tabooed (Joseph Jacobs in his "Studies in Biblical Archeol." p. 89, and similarly Salomon Reinach, "Les Interdictions Alimentaires et la Loi Mosaïque," in "Rev. Etudes Juives," xli. 144). See Blood; Food; and Totemism.

30

——**In Rabbinical** and **Hellenistic Literature:** The distinctions between clean and unclean animals, as described in the Scriptures, are more fully drawn in the Halakah. To chew the cud and to have split hoofs (Lev. xi. 3) are the marks of the clean tame quadruped ("behemah"), and the Talmudic traditions add that an animal without upper teeth always chews the cud and has split hoofs (see Aristotle, "Natural History," ix. 50), the only exceptions being the hare and the rabbit, which, in spite of having upper teeth, chew the cud and have split hoofs, and the camel, which has, in place of upper teeth, an incisor on each side (ניב). Even the meat of the clean and the unclean animals can be distinguished. The meat of the former below the hipbones can be torn lengthwise as well as across, which, among unclean animals, is only possible with the flesh of the wild ass. These differences apply also to clean wild animals (חיה טהורה) as against unclean wild animals (חיה טמאה).

Quadrupeds.

In order, however, to distinguish clean wild from clean tame animals attention must particularly be paid to the horns. The horns of the former must be forked, or, if not forked, they must be clear of splinters, notched with scales, and be הדורות ("round"), or, as others read, חדודות ("pointed"). It is important to distinguish the clean wild animals from the clean tame animals, because the tallow of the former may be used, while that of the latter is forbidden, and the blood of the clean wild animal must be covered up (Lev. xvii. 13), which is not the case with that of other animals (Ḥul. 59a, b).

Birds.

It was hard for the rabbinical authorities to distinguish clean from unclean birds, as the Scripture (Lev. xi. 13-19) enumerates only the birds which shall not be eaten, without giving any of the marks which distinguish them from the clean birds. This is all the more important as the names of some of the birds mentioned in the Scriptures are followed by the word "lemino" or "leminehu"—*i.e.*, "after its kind"—and it is therefore necessary to recognize certain fixed distinguishing characteristics. The following rules are fixed by the Talmud, by which a clean bird may be distinguished. It must not be a bird of prey; it must have a front toe, if that be the meaning of אצבע יתירה; but according to most explanations the hind toe is meant. Although most birds of prey have the hind toe, the toes of the clean bird are so divided that the three front toes are on one side and the hind toes on the other, while the unclean bird spreads his toes so that two toes are on each side; or if it has five toes, three will be on one side and two on the other (compare Rashi to Ḥul. 59a, and Nissim b. Reuben on the Mishnah to this passage).

The clean birds, furthermore, have craws, and their stomachs have a double skin which can easily be separated. They catch food thrown into the air, but will lay it upon the ground and tear it with their bills before eating it. If a morsel be thrown to an unclean bird it will catch it in the air and swallow it, or it will hold it on the ground with one foot, while tearing off pieces with its bill (Ḥul. 59a, 61a, 63a). As this distinction is not found in Scripture, opinions differed greatly during and since Talmudic times. According to the Talmud (Ḥul. 62a, 63b), only the twenty-four kinds of birds mentioned in Scripture are actually forbidden. If certain birds are positively known as not belonging to these, no further investigation as to characteristic signs is necessary, and they may be eaten. The marks of distinction are laid down only for cases in which there is doubt whether the species is clean or unclean. Authorities, especially in Germany, would only permit the eating of such kinds as have always been eaten (מסורת). Accordingly some birds are permitted to be eaten in certain countries, but not in others. There are many controversies in the casuistic literature concerning this matter. Menahem Mendel Krochmal ("Ẓemaḥ Ẓedeḳ," No. 29), for instance, declares the wild goose forbidden, while Eybeschütz ("Kereti u-Peleti," § 82) permits it. When the turkey was brought to Europe Isaiah Horwitz forbade it to be eaten; and although his opinion did not prevail, his descendants refrain from eating it even to-day.

Fishes.

In regard to clean and unclean fishes the authorities of the Talmud have also made some additions to the regulations in the Scriptures. While it is stated in Lev. xi. 9 that only those fishes are to be considered clean which have scales and fins, the Mishnah (Niddah vi. 9) declares that all fishes with scales have, doubtless, fins also. According to this all fishes having scales but no fins may be eaten, as under that opinion it may be taken for granted that all scaly fishes have fins; apparent exceptions are accounted for by the supposition that sometimes fins are so small or rudimentary that they can not be distinguished. On the other hand, a fish with fins may be without scales and thus be unclean. The formation of the spinal cord and head also affords means of distinction. The clean fishes (דגים טהורים) have a perfect spinal column, and a head of a more or less flat projection; the unclean fishes have no spinal bone, and their heads end in a point ('Ab. Zarah 39b, 40a). There is a difference in the form of the bladder and roe in clean and unclean fishes. In clean fishes the bladder is blunt at one end and pointed at the other; while the unclean have the ends either both blunt or both pointed. Whether these marks can be depended on when the scales and fins are absent, or when the actual condition can no longer be positively ascertained, has been much discussed by old authorities (compare Jacob b. Asher, Ṭur Yoreh De'ah, 83). As a "cause célèbre" of modern times may be mentioned the controversy of Aaron Chorin with many Orthodox rabbis concerning the eating of sturgeon, which Chorin declared permissible, contrary to all former usage.

Insects.

Concerning the use of the four kinds of locust permitted in the Scriptures (Lev. xi. 21-22) the Mishnah (Ḥul. iii. 8) says that a clean locust must have four feet, two of which are for jumping, and four wings, which must be long and broad enough to cover the whole body. But it is still subject to the restriction that, to be eaten, it must belong to the species חגב, and there must be a reliable tradition recognizing it as eatable. Later authorities (compare Samuel b. David ha-Levi on Yoreh De'ah, 85) forbid its use entirely. Very rigorous are the rules set down by the Rabbis concerning the eating of "creeping things which crawl upon the ground" (Lev. xi. 41). According to the Rabbis only such "worms" are permitted for food as do not live in an isolated condition, but are found only in other substances; for instance, the maggots in meat, fruit, fish, drinking-water, etc. But even in such cases the eating is forbidden if the worms have been removed from the place in which they originated, or if they have left that place and returned to it, thereby practically excluding all worm-eaten food (Ḥul. 67a, b). The conditions concerning the enforcement of these rules are very complicated (compare Yoreh De'ah, 84), but it may suffice to point out the following: Fruit and vegetables must be thoroughly examined before use to see whether they contain worms, and Orthodox families pay strict attention to the fact that should the food, after cooking, be shown to have been worm-eaten, it is not fit for consumption (compare Danzig, "Ḥokmat Adam," pp. 35, 22).

Reasons for Distinction.

There was much speculation as to the reasons why certain species of animals should be allowed as food and others forbidden. In the Letter of Aristeas (lines 144-154) it is explained at length that "these laws have been given for justice' sake to awake pious thoughts and to form the character." It is especially emphasized that birds of prey have been forbidden, to teach that man shall practise justice; and not, depending upon his own strength, do injury to others. The marks which distinguish the clean animal are allegorically explained, as shown in the following instance: To have two feet and split hoofs signifies that all actions shall be taken with consideration of the right and wrong (compare Allegorical Interpretation). The martyr Eleazar, in IV Macc. v. 25, answers the king, who ridicules the laws forbidding unclean animals, "Whatever is congenial to our soul He permits us to eat; the use of obnoxious meats He forbade us." In this is apparently expressed the same idea which is stated later on by Ẓarẓa in the words: "All these things are forbidden, because they deprave the blood and make it susceptible to many diseases; they pollute the body and the soul" (Meḳor Ḥayyim, "Tazria'," beginning).

The prolix allegories of Philo concerning the clean and unclean animals (compare "De Agricultura Noe," xxv.-xxxi.) have been far surpassed by the Church Fathers (Irenæus, "Adversus Hæreses," v. 8; Clemens Alexandrinus, "Pædagogus," iii.; Origen, Hom. 7 in Lev.; and many others), and for this reason in many Jewish circles no exposition of the law whatever would be heard. One should not say "The meat of the hog is obnoxious to me," but "I would and could eat it had not my Heavenly Father forbidden it" (Sifra, Ḳedoshim, end). In Talmudic-Midrashic literature no attempt is made to bring these laws nearer to human understanding. It was feared that much defining would endanger the observance of them, and all were satisfied "that they are things the use of which the Torah forbids" (Tanḥuma, Lev. ed. Buber, Shemini, iii. 29), although they were not capable of explanation.

Beginning with Saadia, the Jewish commentators started to explain the Biblical laws either rationalistically or mystically. It is remarkable that Saadia's theory bears great resemblance to the modern theory of totemism. He asserts, namely, that some animals which were worshiped as divine were declared eatable as a protest against that worship, and for the same reason others were declared unclean ("Kitab al-Amanat Wal-I'tiḳadat," 117, bottom; Hebrew translation, iii. 2; ed. Slucki, p. 61). Ibn Ezra is of the opinion that the flesh of unclean animals has been forbidden because it is impure and obnoxious, and the substance swallowed and digested goes into the flesh and blood of those who have eaten it (commentary to Lev. xi. 93; concerning other passages of Ibn Ezra compare Ẓarẓa, *l.c.*).

Maimonides ("Moreh Nebukim," iii. 48) finds in these ordinances mainly sanitary, and partly esthetic, principles. Similar is the opinion of the great French exegete Samuel b. Meïr, in his commentary on Leviticus. Naḥmanides agrees only partly with these theories, and mentions only one sanitary reason concerning fishes. The clean, he argues, get nearer the surface of the water, and therefore possess a degree of heat which drives away too much humidity; while the fishes without fins and scales, which stay in the deep water, and especially those in swampy water, possess a degree of cold and humidity which acts mortally. It is different with the birds, which, with exception of the "peres" and "'ozniyyah," two species of eagles, are all birds of prey, the black and thick blood of which causes a marked inclination to cruelty. Concerning the quadrupeds, Naḥmanides wavers between ethical and sanitary reasons, and refers to non-Jewish physicians to maintain the objections to the flesh of the hog (commentary on Lev. ix. 13; compare his "Derasha," ed. Jellinek, p. 29). The explanations which Baḥya b. Asher (on Lev. xi.) gives concerning the forbidden animals are mainly taken from Naḥmanides. He adds the new explanation that this law is merely an expansion of the rules of the cult of sacrifice, so that many animals which can not be used for sacrifice shall not be eaten (*idem*, 163d, ed. Riva di Trento). Isaac Arama is especially opposed to sanitary reasons ("'Aḳedat Yiẓḥaḳ," part 60, ed. Pollak, iii. 33b), and acknowledges psychological and ethical motives only. "The unclean animals," says Arama, "cause coarseness and dulness of the soul." Arama, evidently referring to Abravanel, but without mentioning his name, gives other theories of Jewish scholars. In his remarkable polemic against the rationalistic explanation by Maimonides of the laws regulating food, Viterbo tries to show the untenableness of the sanitary grounds ("Ta'am Zeḳenim," ed. El. Ashkenazi, pp. 42-43).

Like the Jewish religious philosophers, the mystics have stated their speculations concerning the grounds of these laws. According to the cabalistic theory which makes the negative Sefirot the cause of the existence of evil in the world, the Zohar (Shemini, iii. 41b) explains that the unclean animals originate from some of these negative Sefirot, and therefore they are forbidden as food; but as with the arrival of the Messiah all will become purer and nobler, these animals will then be permitted as food (Yalḳ. Ḥadash, Liḳḳutim, 36, 79). In this manner the mystics explained the idea, expressed in Midrash Tehillim to cxlvi., that in the future God will declare the unclean animals clean. This Midrash caused Abravanel and other Jewish scholars much embarrassment (see Buber, *ad loc.*), so that several of them did not hesitate to declare it a Christian interpolation; but without reason, as similar opinions have been held and expressed in the remotest time (compare Antinomianism), and probably had their origin in pre-Christian times. Regarding the view taken by Reform rabbis and by modern Bible exegetes of clean and unclean animals, see Dietary Laws; Purity; Reform; Totemism.

CLEANNESS AND UNCLEANNESS. See Purity.

CLEIF, DANIEL ḤAYYIM: Russian rabbi; born in Amsterdam 1729; died there May 14, 1794. He settled in Hasenpoth, in the government of Courland, originally as a jeweler; later he officiated there as rabbi for many years. At this time he wrote "'Arugah Ḳeṭannah" (The Small Garden-Bed), a booklet in which the 248 mandatory precepts are formulated in rime (Altona, 1787, and reprinted several times). He also left in manuscript a commentary on the Pentateuch.

One of Cleif's sons was a physician in the service of the Russian government, with the title of councilor of state: he died in the government of Orel in 1846.

H. R.

CLEMENT XIV. (LORENZO GANGANELLI): Two hundred and fifty-sixth pope; born at San Arcangelo, near Rimini, Oct. 31, 1705; elected May 19, 1769; died Sept. 22, 1774. His election was hailed with particular joy by the Jews, who trusted that the man who, as councilor of the Holy Office, declared them, in a memorandum issued March 21, 1758, innocent of the slanderous blood accusation, would be no less just and humane toward them on the throne of Catholicism. In this they were not deceived. Two months after his accession Clement XIV. withdrew the Roman Jews from the jurisdiction of the Inquisition and placed them under that of the "Vicariato di Roma" (Aug. 5, 1769). Another token of his benevolence toward the Jews was the confirmation (March 29, 1773) of the bull of Clement VIII. concerning the Jus Gazaka, which was of very great importance to the Roman Jews.

The memorandum of Clement XIV. (Ganganelli), referred to above, deserves special mention, as much from the importance of the subject treated therein as from the great authority of its author. It was called forth by a blood accusation against the Jews of Yanopol, Poland. Alarmed by this frequently repeated accusation, the Polish Jews sent one Jacob Selek to Rome to implore the protection of the pope. Benedict XIV. thereupon ordered a thorough examination of the matter, and the councilor of the Holy Office, Lorenzo Ganganelli (later Clement XIV.), was charged with the preparation of a report on the subject. This report, bearing on its title-page the motto "Non solis accusatoribus credendum," was presented to the congregation of the Inquisition March 21, 1758. The author shows therein not only the groundlessness of the Yanopol accusation, but, passing in review all the principal cases of blood accusation since the thirteenth century, demonstrates that they were all groundless. Only in two cases did Ganganelli hesitate to declare the falsity of the accusation; namely, in that of Simon of Trent, in 1475, and in that of Andreas of Rinn, in 1462. The future pope could not very well acknowledge that the canonization of these two pretended martyrs was undeserved. But he pointed out that the popes themselves hesitated a long time before admitting the worship of Saint Simon and Saint Andrew; the former having waited more than 110 years, and the latter almost 300 years—a proof that the veracity of the accusation was doubted. No account is to be taken of the testimony of some baptized Jews, such as Julio Morosini and Paul Sebastian Medici, who, in their hatred of their former coreligionists, claim in their writings that the Jews use Christian blood. Moreover, these writings were triumphantly refuted by high authorities. Ganganelli concludes his memorandum by reminding the Christians that they themselves were once accused by the heathen of the same crime, as attested by Tertullian, Minucius Felix, Theodoret, and Rufinus.

The effort of Ganganelli was crowned with success. Benedict XIV., impressed by the arguments in the memoir, declared the Jews of Yanopol innocent, and dismissed Jacob Selek with honors, recommending him, through Cardinal Corsini, to Visconti, Bishop of Warsaw, who received orders to protect the Polish Jews in the future from such accusations.

Ganganelli's memorandum was translated into German by A. Berliner, under the title "Gutachten Ganganelli's (Clemens XIV.) in Angelegenheit der Blutbeschuldigung der Juden," Berlin, 1888. The original Italian text was published by Isidore Loeb in "Rev. Etudes Juives," xviii. 179 *et seq.*

J. I. BR.

CLEMENTINA or **PSEUDO-CLEMENTINE LITERATURE:** A series of kindred works of a Judæo-Christian sect of the second century, of which only the Homilies, the Recognitions, and the Epitomes have been preserved. The Homilies, published first in 1853, present in the form of dialogues between Peter, Clement of Rome, and others, a gnostic system based on revelation. By revelation alone can knowledge be obtained, not by philosophy (Hom. i. 19, ii. 5). This is illustrated by the history of Clement, who vainly tried to arrive at the truth by means of philosophy. The Homilies assume a twofold revelation—the primal revelation, and the continuous revelation through the true prophets. The first was given in the act of creation, especially in that of man. The Homilies say, like the Mishnah (Sanh. 37a): "God revealed Himself by making man in His image; were there another god he also would have to reveal himself, and create other men in his image" (Hom. xvi. 10). Man as the image of God is God's revelation, and as he also has in him God's spirit (*πνεῦμα*), the whole truth lies in him like a seed, needing only to be developed. Had men recognized the will of God and been ready to obey it, there would have been no need of a further revelation; but as they have sinned, the primal revelation is obscured and a new revelation is always necessary (*ib.* i. 18, viii. 5). This is afforded by the true prophet, who knows the past, the present, and the future. His knowledge is not derived from the external world, but is innate, as is the spirit in him; and his revelation is not ecstatic, but clear and unambiguous (*ib.* ii. 6–12, iii. 11–20). The true prophet has appeared not in one, but in various forms; changing name and shape, he will traverse this world until he finds rest in the coming world, *αἰών μέλλων* (*ib.* iii. 20).

Eight persons are exalted above the rest of humanity and brought into special connection with revelation—Jesus and the "seven pillars of the world," Adam, Enoch, Noah, Abraham, Isaac, Jacob, and Moses; and among these eight Adam, Moses, and Jesus are preeminent as possessing all the qualities of the true prophet (compare Uhlhorn, "Die Homilien," pp. 164–166). The Haggadah (Ḥag. 12b) also says that the world rests on seven pillars, but according to other authorities one pillar, צדיק by name, supports the world (compare Prov. x. 25). *'Αναμάρτητος* (צדיק) is, according to the Homilies (ii. 6), the true prophet (compare also Suk. 52c on the haggadic interpretation of the "seven shepherds and eight princes"; Micah v. 4).

Theological Teaching of the Homilies.

As the person of the true prophet is always the same, so the religion revealed by him is always the same: the primal revelations through Adam, through pure Mosaism, and through Christianity are identical (Hom. xviii. 3). The fundamental doctrine of this, the only true, religion is that of the one God, the Creator of the world. "Before all things, consider that no one shares His rule, no one has a name in common with Him; that is, is called 'God.' For He alone both is, and is called, 'God.' Nor is it lawful to think that there is any other, or to call any other by that name. And if any one should dare do so, eternal punishment of soul is his" (*ib.* iii. 37). The attacks on those who deny the unity of God, and the positive proofs of that unity, constitute the greater part of the Homilies. The conception of monotheism is entirely Jewish, and all attempts to modify abstract monotheism in the Christian way are emphatically rejected. So much stress is laid on monotheism that it almost becomes pantheism, God being designated as *τὸ Πᾶν*, *τὸ 'Ον*, and everything else as nothing. He alone is; He is the tangible and the intangible, near and far, here and there; He alone exists. He penetrates everything. As the sun warms and illuminates the surrounding air, so God warms and illuminates the world; He is the heart of the world, and the center from which all life irradiates (*ib.* xvii. 7, xviii. 8, and *passim*; compare Uhlhorn, *l.c.* p. 174). Although this pantheistic conception is originally Greek, it must be remembered that it was also known to the Jewish scholars of Alexandria and of Palestine. Similar to the statement in the Homilies (xvii. 8): "The space of God is the non-existent, but God is that which exists," is the statement in the Midrash: שהוא מקום עולמו ואין העולם מקומו (Gen. R. lxviii. 10; Midr. Teh. xc.).

From this pantheistic point of view the Homilies regard the development of the world as a development within God; the πνεῦμα ("spirit") and the σῶμα ("body"), which were originally united in God, were separated, and this was the beginning of the world. The Creation is explained by assuming that the spirit of God changed into air, the air into water, and the water into fire. The Homilies teach not the emanation of the world from God, but the eternal flux of things, God being the beginning and the end. Herein the Book of Yeẓirah corresponds with the Homilies, holding likewise that the world was created out of the first four Sefirot; the last six Sefirot treated in this book—namely, the three dimensions of space in the two opposite directions, by means of which, out of the prototypes of the world, the world was produced as a reality—also occur in a passage of the Homilies, which, however, has often been misunderstood (xvii. 9; compare Grätz, "Gnosticismus," p. 113; Epstein, in "Rev. Et. Juives," xxix. 73).

Syzygies.

Like the Book of Yeẓirah and the Cabala in general, the Homilies also hold the doctrine of contrasts, which constitutes their conception of the world. All things separate (διχῶς καὶ ἐναντίως) and go in opposite directions, unite, separate, and finally unite again. As the material world is made up of the four elements mentioned above, which oppose each other in pairs (Homilies, xix. 12), so the spiritual world is governed by contrast. The ruler of this world is Satan, the ruler of the better future world is the Messiah, who was produced by the spirit or pneumatic side of God. While the greater, masculine principle—heaven—earth, day—night, sun—moon, life—death; etc.—has precedence in the original syzygial series, the reverse takes place among men, the smaller, feminine principle preceding. Hence in history, especially in that of Israel, Cain is opposed to Abel, Ishmael to Isaac, Esau to Jacob, etc. The principles that appeared separate in Adam and Eve, but which are mixed in the majority of men, appear from time to time separated again. The final outcome of this evolution is a return to God by a process of purification or annihilation. When the Messiah, the eternal light, appears, all darkness will vanish (*ib.* ii. 17). At the resurrection all men will be transformed into creatures of light so that they may behold God (*ib.* xvii. 16). This rests on the assumption that He can not be seen by man in the flesh. "He who sees God can not live [Ex. xxxiii. 20], for the excess of light dissolves the flesh of him who sees, . . . but . . . at the resurrection of the dead, when they shall have been changed into light and become like the angels, they shall be able to see Him" (*l.c.*)—a theory found also among the tannaim of the second century, whom Akiba attacked (Sifra, Wayiḳra, 2; Sifre, Num. 103; compare also Abba Arika's description of the joys of the future world, when the pious "shall enjoy the glory of God"—נהנין מזיו השכינה; Ber. 17a; Tan. iv. 145, ed. Buber). This is an instance of that anthropomorphic conception of God which is found in the Homilies side by side with the pantheistic conception, and although in its present form it betrays attempts to reconcile these two diametrically opposed conceptions, yet the contradiction between the two is often very marked. The anthropomorphism is less pronounced in the metaphysical portions of the Homilies; but it forms the basis of their ethics, which is founded on the doctrine that man was made in the image of God (compare the teaching of the Jewish Gnostic Ben Azzai; Gen. R. xxiv. 7); and this doctrine they can establish only by assigning a shape to God (compare especially *ib.* xvii. 11).

Judaism and Christianity.

As regards the attributes of God, which are, however, only given in human similes, the Homilies hold that the מדת הדין ומדת הרחמים ("justice and mercy") of Jewish theology (Sifre, Deut. 27) constitute the nature of God (Homilies, iv. 13). It is this conception especially that stamps the Homilies as consisting entirely of Jewish gnosis, admitting of no contrast between the "righteous" God of the Old Testament and the "merciful" God of the New Testament, but identifying the teachings of Jesus with those of Moses, so that the salvation of those who follow Moses is as assured as that of those who believe in Jesus; the former, however, must not hate Jesus, nor the latter, Moses (*ib.* viii. 6, 7). Hence the Homilies never speak of Christians, their point of view being always designated as the "Jewish" one (see Langen, "Die Klemensromane," p. 90); and it is pointed out that the daughter of the Canaanite woman was healed only after the latter had become a Jewess (Homilies, ii. 19); that is, had accepted the Jewish Law. The Pentateuch did not originate entirely with Moses, for he put nothing into writing; and those who recorded his teachings after his death introduced much that was contrary to those teachings. The sacrifices especially do not belong to the original Law (an Essene heresy), and as these and similar interpolations obscured the meaning of the Torah, it became necessary for the true prophet to appear in the person of Jesus. It is difficult to say how the authors of the Homilies conceived of the incarnation of Jesus; they, however, decidedly opposed the doctrine of the divinity of Jesus, and considered the Christian doctrine of the atonement and salvation through the sufferings of Jesus as without importance. The strict asceticism found in the Homilies may be traced back to Essenism. It is a sin to possess anything whatever: the eating of meat is absolutely forbidden, only bread and water being allowed (compare Abot vi. 4); and the Homilies, like the Essenes, lay great stress on ablutions and bodily cleanliness. Bathing is legally prescribed after cohabitation, as in the Talmud (Ber. 21b, 22a); but marriage itself is highly regarded and recommended, even early marriage being insisted upon—in which points the Clementina follow entirely rabbinical Judaism (Yeb. vi. 6, based upon Gen. i. 28, ix. 1).

The Recognitions are extant only in the Latin translation of Rufinus. Regarding their relation to the Homilies, and regarding the historical value of the Clementina in general, opinions differ. While Baur and many representatives of the Tübingen school regard them as a chief source for the history of the early Christian Church, Harnack thinks that they contribute nothing toward determining the origin of that Church. It can not be denied, however, that the Clementina are highly important for the history of gnostic Judæo-Christianity, as well as for that of Jewish Gnosticism, being among the few extant literary documents of those sects. Compare ADAM ḲADMON; ELCESAITES; GNOSTICISM AND JUDAISM; SIMON MAGUS.

K. L. G.

CLEOPATRA: Queen of Egypt 52–30 B.C.; daughter of Ptolemy Auletes. Through her association with the rulers of Rome, Cleopatra was of importance not so much to the Jews of her own country as to those of Judea. When Herod fled in great distress before Antigonus, he turned toward Egypt; but it was only after suffering many indignities at Pelusium that he was enabled to embark for Alexandria, where he saw Cleopatra. However, although she invited him to remain, he hastened on to Rome (40 B.C.) (Josephus, "Ant." xiv. 13, § 2; "B. J." i. 14, § 2).

After Herod became king by the help of the Romans, Cleopatra tried in every way to injure him. Alexandra, Herod's mother-in-law, complained to Cleopatra that the office of high priest was denied to her son Aristobulus, and she sent the pictures of her beautiful children, Mariamne and Aristobulus, to Antony, at that time held captive by Cleopatra's charms. Antony desired the handsome youth as a companion, and to prevent this Herod was forced to appoint Aristobulus as high priest (35 B.C.). Alexandra's ambition went so far as to desire the throne for her son. Hidden in coffins, mother and son intended to have themselves transported to Egypt to Cleopatra, but the plan was discovered, and Herod had Aristobulus secretly murdered ("Ant." xv. 2, §§ 5–7; 3, §§ 1–3). Alexandra notified Cleopatra of the deed (*ib.* 3, § 5); but Herod, protected by Antony, went unpunished.

Cleopatra's ambitious spirit seriously injured Herod. She not only induced Antony to give to her in fief the entire coast-line, except Tyre and Sidon, but appropriated Jericho, a region of Judea rich in palms and the far-famed balsam. She traveled to Judea by way of Apamæa and Damascus; and Herod was forced not only to appease her animosity with presents, but also to rent Jericho from her for a yearly sum of two hundred talents, and to send her at his own expense as far as Pelusium (*ib.* xv. 4, §§ 1–2; "B. J." i. 18, § 5). Through her machinations he was drawn into a war with the Nabatæan king Malich; and when he was victorious, Cleopatra sent her general Athenion to help the Nabatæans; whereupon the Jews were defeated and retired across the Jordan (31 B.C.). Herod had great difficulty in surmounting the consequences of this defeat ("Ant." xv. 5, §§ 3–4; "B. J." i. 19, §§ 5–6).

The anti-Jewish APION not incorrectly looked upon Cleopatra as a ruler hostile to the Jews; for she seems indeed to have been inimical to them. Still Josephus says ("Contra Ap." ii., § 5) that Apion should rather have denounced the vices of this devilish woman, and thinks it redounds to the honor of the Jews that they received no wheat from her during a famine in Alexandria. Cleopatra's hatred went so far that when her capital, Alexandria, had been taken by Cæsar Augustus and she had lost everything, she conceived the idea that all could yet be saved if she should murder the Jews of her city with her own hands (*ib.*). Her death immediately afterward saved the Jews from this fate (30 B.C.).

Rabbinical literature also reports one of her cruel deeds. The bodies of some of her female slaves, who had been condemned to death, were torn open and the contents examined (Tosef., Niddah, iv. 17; Talmud, Niddah, 30b). A question that she is said to have addressed to R. Meïr (Sanh. 90b) can scarcely be historical, owing to the anachronism involved in making them contemporaries, and it is probable that the reading קלפטרא מלכתא ("Queen Cleopatra") in this passage is a corruption of פטריקא דכותאי ("patriarch of the Samaritans"; see Bacher, in "Rev. Et. Juives," v. 185, vi. 159; *idem*, "Ag. Tan." ii. 68).

G. S. KR.

CLEOPATRA OF JERUSALEM: One of the nine wives of Herod I., whom he married late in life. She bore to him Herod and Philippus (Josephus, "Ant." xvii. 1, § 3; "B. J." i. 28, § 4).

G. S. KR.

CLERGY. See PRIEST AND PRIESTHOOD; RABBI.

CLERICAL ERRORS: Errors made in the writing of documents, especially legal documents, for the prevention of which the Jews have many stringent laws. The Jewish official scribes were notably exact in the preparation of legal documents (Giṭ. 2b); for an error was often fatal to the validity of the instrument. Care is taken not to write an acknowledgment of indebtedness on any substance on which it may be easily altered. Such an instrument would be absolutely invalid even though it were intended to be used immediately for the collection of the debt (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 42, 1). But if the instrument is a bill of sale, it is valid (*ib.*, gloss), because there would be no reason for the holder of the instrument to make any alteration in its terms.

Some authorities adopt the general rule that an instrument which is not prepared in accordance with the rabbinical ordinances is ipso facto invalid (*ib.*, gloss). The instrument of indebtedness may be written in any language, but the scribe must take care that it does not deviate from the prescribed form of documents (*ib.* 42, 2). If an erasure is made, it must be noted on the instrument before the witnesses sign (*ib.* 44, 5–11). It is the duty of the witnesses and the court to scan the instrument carefully to note whether the rules for writing it have been complied with (*ib.* 45, 2).

Alterations in Deeds.

These rules are numerous. The scribe must write his letters of equal size and equidistant (*ib.* 42, 3). He must spell the amounts of money in full, and not merely use the letters (corresponding to modern figures) to designate the amount (*ib.* 42, 4). He must not write at the end of a line words that can easily be altered, such as the amounts from three to ten; as these by the addition of a letter or two can be raised to ten times their original amount (*ib.* 42, 4). The failure to close the instrument with the universally accepted formula, "All is fixed and established," is absolutely fatal (*ib.* 44, 9). If the scribe has omitted the date of the instrument, it is nevertheless valid, but is no lien on goods sold to third persons (*ib.* 43, 1). If the date is partially written, it is sufficient; as, for instance, if the scribe has omitted the thousands of the date (*ib.* 43, 2), or has written "on the fourth day," omitting "beshabbath" (of the week) (*ib.* 43, 4), or if he has erred in the day of the week (*ib.* 43, 5). But if the instrument is written by the debtor himself, it is valid even though it has no date at all and is without witnesses, and was delivered in the presence of witnesses without the customary "livery of seizin" (*ib.* 40, 2; 43, 6). If the instrument is wilfully antedated it is void; but if antedated by mistake it is valid, though it can not serve as a lien on property sold to a third person (*ib.* 43, 8). If the document is postdated it is valid (*ib.* 43, 12); but a bill of sale should not be postdated unless this fact is noted thereon (*ib.* 43, 13). If the date appears to be a Sabbath, or the Day of Atonement, the instrument is valid; for, inasmuch as no instrument can be written on those days, it is presumed to have been postdated (*ib.* 43, 14; 239, 2).

Contradictions and Erasures.

If there is a contradiction in the amounts mentioned in the instrument, the amount last stated governs (*ib.* 42, 5). If the coinage in which payment is to be made is not stated, the coinage of the place where the contract was made governs. If the place is not stated, then the coinage of the place where the debt is sought to be collected governs (*ib.* 42, 14).

If there is an erasure of one letter of the name on the last part of the instrument, it may be supplied from the statement of the name in the beginning; but if more than one letter is obliterated, the instrument is void. If by the error of the scribe there is more than one letter entirely omitted from the name in the last part of the instrument, it is valid for the bearer of the last name, it being presumed that the scribe has erred in the first name by writing two letters too many; but it is not to be supposed that he would err in omitting two letters of a name (*ib.* 42, 6).

All interlineations, obliterations, and erasures must be noted before the final formula; and if they occur in the names of the parties or in the amount, and are not so noted, the instrument is void (*ib.* 44, 5). The formula used is "The word . . . is interlined," or "The words . . . are obliterated." In bills of divorce, erasures or interlineations in the formal parts do not affect the validity of the instrument; but if they occur in the essential parts, it is void, unless they are noted at the end as in the case of other instruments (Shulḥan 'Aruk, Eben ha-'Ezer, 125, 19). The modern rule, however, is stricter and will not tolerate any such imperfections in the "geṭ." To insure accuracy and freedom from clerical errors the Seder ha-Geṭ (Eben ha-'Ezer, Rules 46–52) prescribes that the writing must be clear and neither crooked nor confused; the letters must be separately written and not joined together; the letters of two lines must not run into each other; nor should the letters extend beyond the marginal line. There must be no erasure of ink-spots or of words, no roughness in the letters, and no writings over erasures. In case any of these rules be violated a new geṭ must be written.

J. SR. D. W. A.

CLERMONT-FERRAND: Chief town of the department of Puy-de-Dôme, France. The origin of the Jewish community of Augusta-Nemetum (Clermont) is usually assigned to the third century of the common era. It is said that the first apostle of Auvergne, St. Austremoine (Stremonius), was killed about 286, by order of Lucius, the Jewish governor of Issoire, by a Jew, the owner of the village Perrier (compare Labbe, "Nova Bibliotheca," ii. 482; Gonod, "Chronologie des Evêques de Clermont"; A. Tardieu, "Histoire de Clermont"). This is evidently a legend, as perhaps is also the story told by the Abbé Marmeisse ("Vie de St. Verny et de Ste. Marcelle," Clermont, 1858), that, about the second half of the thirteenth century, a Jewish working man murdered a young Christian child named Verny, who was afterward proclaimed a saint. It is certain, however, that the Jews established themselves in Clermont at a very early period. They then occupied the entire eastern part of the market-town Fontgiève, called "Fontjuifs" or "Fontjuifve" in the fourteenth century; and they owned the hillock Montjuzet; *i.e.*, "Mons Judæus" or "Judaicus" (Cohendy, "Inventaire des Chartes des Archives, Département du Puy-de-Dôme," pp. 11, 51).

Early History.

Sidonius Apollinarius, Bishop of Clermont (472–488), held the Jews in great esteem. He speaks in the highest terms of the Jew Gozolas, servant of the Bishop of Narbonne ("Epistle," vi. 4), and recommends to the bishop Eleutherus the cause of a Jew. In a third letter, addressed to the bishop Nonnechius, Sidonius Apollinarius recommends to him Promotus, a Jew of Clermont (*l.c.* ii. 13). Bishop Gallus, uncle of Gregory of Tours, also showed good-will to the Jews. When he died (551) the Jews of Clermont took part in the general mourning, weeping for the man who had treated them so kindly, and carrying the wax tapers at his funeral (Gregory of Tours, "Vitæ Patrum," vi. 7). Bishop Cautinus (551-571) esteemed them no less. "He was dear to the Jews," says Gregory of Tours (*l.c.* iv.), "and was much attached to them." The historians of Auvergne, Savaron in his "Origines de Clairmont," and Audigier in his "Histoire de Clermont," censure this prelate for his familiarity with the Jews, saying that "he lived on friendly terms with them, not with the view of enlightening them, but in order to buy his furniture and jewels cheap from them." On his death the presbyter Euphrasius sent to the king many valuable things which Cautinus had bought from the Jews—a proceeding quite different from those of Bishop Avitus a few years later (see Avitus of Auvergne).

The councils which met at Clermont in the sixth century occupied themselves repeatedly with the affairs of the Jews. Those of 535 and 549 forbade intermarriages between Jews and Christians, and the appointment of Jews as magistrates of the people (Conc. Arverne, Canons vi. and ix.).

It does not appear that Jews were living at Clermont at the time of the first Crusade (1096). Only toward the end of the thirteenth century are traces of a Jewish community again found in that city. At that time (1298-99) the Jews of Auvergne paid into the royal treasury a tax of 992 livres, 6 sous, 6 deniers (Library of Clermont, Auvergne MS. No. 62; compare "Revue Etudes Juives," xv. 248). In 1293 Jews dwelt in several market-towns or villages of Auvergne, such as Herment, Ennezat, Montaigut, Lignat, etc. (see article by M. A. Tardieu, in "La Dépêche du Puy-de-Dôme," Sept. 14, 1891). At Orbeil lived one of the disciples of R. Ḥayyim of Blois, R. Isaac, author of "Menahel" (The Guide), a collection of ritual rules known only by the quotations from it found in the ritualistic work "Orḥot Ḥayyim" of Aaron of Lunel (Renan-Neubauer, "Les Rabbins Français," p. 448). The Manuscript de Rossi 313, 3, cited by Gross ("Gallia Judaica," p. 589), contains the haggadic explanations of Nathan ben Joseph. This scholar probably came from Clermont.

There were also Jews in other French places which bore the name of Clermont. Some are found in 1321-23 at Clermont-en-Argonne, in the department of the Meuse ("Revue Etudes Juives," xix. 257), and some at Clermont, Hérault, in 1350-1400 (S. Kahn, "Les Juifs de Tarascon," p. 25). In 1808 thirty-eight Jews were living at Clermont; in 1901 it had twenty-five to thirty families. The community is part of the consistory of Lyons.

CLEVE, GERMANY. See Jülich.

CLEVE, ELIJAH. See Gomperz Family.

CLEVELAND: Capital of Cuyahoga county, Ohio, U. S. A.; situated at the mouth of the Cuyahoga River, and an important port on Lake Erie. The history of its Jewish community dates back to the year 1837, when a Bavarian, Simson Thorman, settled here. He was soon followed by others of his countrymen—Cleveland being then a thriving town of about 6,000 inhabitants—and in 1839 the colony had increased sufficiently to warrant the establishment of a permanent religious organization.

This first congregation, called The Israelitish Society, began with twenty members. In 1842 it was divided, the seceding branch forming the Anshe Chesed society; but four years later these two again united, and formed the Anshe Chesed congregation, the oldest existing religious organization in the town. Its first synagogue was built on a lot exchanged for land which had been presented to the Anshe Chesed society, for building purposes, by Leonard Case, a wealthy non-Jewish landowner.

First Settlements.

Dissensions in 1848 resulted in the withdrawal of members, who in 1850 formed the Tifereth Israel congregation, the second of the now existing congregations. A legacy of $3,000 bequeathed by Judah Touro of New Orleans in 1854, purchased the site upon which its first synagogue was erected. These two congregations have always been the leading factors in Cleveland Jewry—the Anshe Chesed representing the Conservative branch, its present membership being 210; the Tifereth Israel, the Radical Reform, with a membership of 513, and a Sabbath school enrolment of 775. Both are prosperous, and worship in splendid modern edifices.

The rabbis of Anshe Chesed congregation have been: Fuld, 1850; E. Hertzman, 1860-61; G. M. Cohen, 1861-66; Nathan, 1866-67; Gustave M. Cohen, 1867-75; M. Tintner, 1875-76; M. Machol, the present incumbent, from 1876.

The rabbis of Tifereth Israel congregation have been: Isidor Kalisch, 1850-55; Wolf Fassbinder, 1855-57; Jacob Cohen, 1857-66; G. M. Cohen, 1866-1867; Jacob Mayer, 1867-74; Aaron Hahn, 1874-92; Moses J. Gries, the present incumbent, from 1892.

The congregation next in importance is the B'ne Yeshurun Hungarian, which was founded in 1865, reorganized in 1886, and has (1903) a present membership of about 200. Its rabbi is Dr. Sigmund Drechsler.

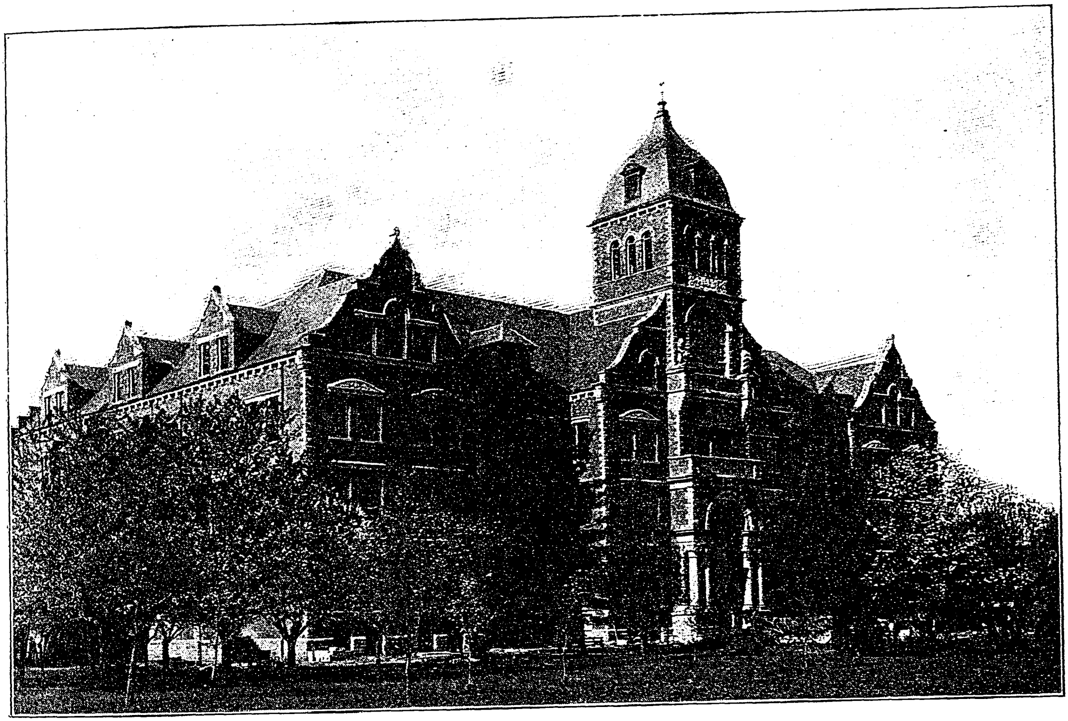
The year 1881 saw the arrival of the first Russian refugees, who, in point of numbers, have since become a highly important part of the community. Besides the three leading congregations mentioned, there are no less than eleven minor congregations, mostly Russian, with a combined membership of about 700—the largest of them, Beth Hamidrash Hagodol Beth Israel, having 600 seat-holders. There are also many so-called "ḥebrahs," formed only for services during the principal holidays. On Oct. 17, 1885, the first American Rabbinical Conference was held in Cleveland. The first annual conference of of the existing Conference of American Rabbis was held in Cleveland, July 13, 1890.

The Jewish Orphan Asylum of Cleveland, founded by the Independent Order of B'nai B'rith, District No. 2, was established in 1868; its superintendent since 1878 has been Dr. S. Wolfenstein. This institution, which shelters 500 children, has become famous, being considered a model of its kind (see article thereon in "Ohio State Bulletin of Charities and Corrections," vol. iv. 47), and exerting a wide-spread influence in furnishing (from its trained assistants) superintendents and matrons for other similar institutions. The heads of the Jewish orphan asylums of San Francisco, Atlanta, Chicago, Philadelphia, and Rochester were formerly assistants at the Cleveland institution. The Educational League, formed for the higher education of orphans, and now a national organization, was founded in Cleveland in 1896.

Charitable and Other Organizations.

In 1875 the Hebrew Relief Association, the oldest benevolent society of importance, was organized; in 1890 it joined the National Conference of Jewish Charities. Its annual income is about $4,500. There are many lesser charitable organizations in the community, among them the Daughters of Israel, the oldest women's benevolent society, founded in 1860. The Russian part of the community has recently developed several of its own. In 1881 the Sir Moses Montefiore Home for Aged and Infirm Israelites, founded by the Order Kesher Shel Barzel, was established in the city. It has at present 54 inmates. In 1889 the Young Men's Hebrew Association was formed; but after a more or less active life of eight or nine years it went out of existence in the fall of 1899, for want of interest and support.

In 1894 the Council of Jewish Women was organized by the federation of the older women's societies—the Benevolent Society, the Sewing Society, the Personal Service Society, and others. This organization joined the National Council of Jewish Women in 1896, and has since become an active power in educational and philanthropic work. It assumes the care of the sick poor, and in this works jointly with the older society, the Hebrew Relief Association, in which charity the larger part of its funds is expended. It supports also a free Sabbath-school of about 500 children, a working girls' club of 160 members, a free kindergarten, and several other departments. Its annual expenditure is nearly $3,000. In 1899 an educational organization, called the Council Educational Alliance, was formed, and a building for its use was presented by Moritz Joseph. Though not a social settlement, its work is along settlement lines; being educational and social in character, and having a resident director. In its building are a large gymnasium with baths, a free public library with reading-rooms, and club, class, and social rooms. Courses of free lectures and entertainments are given during the winter. A public playground is maintained by the Alliance. The monthly expenditure is $400; the average monthly attendance (1902) was about 25,000.



THE JEWISH ORPHAN ASYLUM, CLEVELAND, O.

(From a photograph.)

The Jewish lodges in Cleveland are as follows: Independent Order B'nai B'rith, 3; Independent Order Sons of Benjamin, 9; Order B'rith Abraham, 5; Order Kesher Shel Barzel, 2; Independent Order Free Sons of Israel, 2; Order Knights of Joseph, 7. The B'nai B'rith lodges now form Cleveland Lodge, No. 16. There are also several Zionist societies and two newspapers, "The Jewish Review and Observer," an amalgamation of the "Hebrew Observer," founded in 1888, and the "Jewish Review," founded 1893; and a Yiddish paper which has led a precarious existence under various names, and is now (1903) appearing as the "Jewish Free Press."

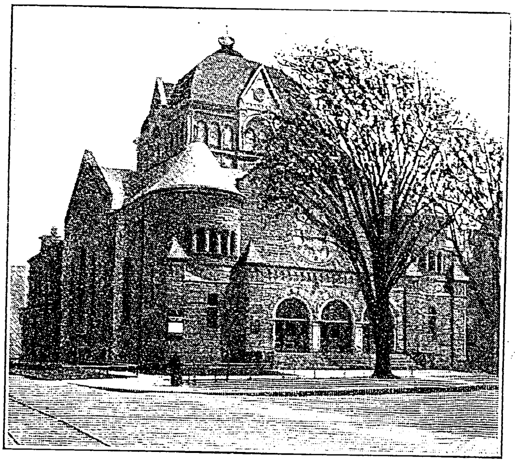
In a total population of about 400,000, estimates place the number of Jews between 15,000 and 25,000.

Of these not more than 7,000 to 9,000 are permanently affiliated with any religious organization.

The older part of the community is rapidly increasing in wealth and importance, an extensive cloak and clothing manufacturing interest being almost entirely under its control. Its members are also well represented among the prominent merchants, and in law, medicine, art, and music.

Social Status.

The younger part of the community, the Russian and Polish element, is also rapidly forging to the front. Some of its earlier arrivals have already attained to affluence; and they also are well represented in the medical profession. The majority, however, are still small tradesmen and pedlers, with a good percentage of tailors, cloak-makers, cigar-makers, carpenters, shoemakers, plumbers, etc.



Temple of Tifereth Israel Congregation, Cleveland, O.
(From a photograph.)

The early struggles of the Jews of Cleveland were perhaps more severe than those of other communities, and development was slower. It is indeed only within the last decade that university education has become fairly general; and perhaps it is for this reason that Cleveland has not given more Jews of prominence to the world. The best known now living here is Dr. Marcus Rosenwasser, for some years dean of the Wooster Medical College, and for many years professor of abdominal surgery in the Cleveland College of Physicians and Surgeons. In the early days Benjamin F. Peixotto was a resident and active communal worker here. Simon Wolf also lived here for some years. Besides these the community boasts of but two famous sons—the artists George P. M. Peixotto and Louis Loeb.

The religious attitude of the community differs but little from that of others in the West, save perhaps in that the Reform movement has advanced more rapidly in Cleveland than elsewhere. All shades and varieties of Judaism are to be found, from the most rigidly Orthodox to the ultra-radical Reform—on the one hand, an unswerving adherence to tradition; on the other, at Tifereth Israel synagogue, now called "The Temple," almost an entire abolition of it. The Temple congregation worships on Sunday, a large number of its attendance being non-Jews. It has abolished the reading of the Torah and practically all Hebrew from its service and Sabbath-school. Its Sabbath school session is held on Sunday afternoon. In its house of worship are given regular public courses of lectures and entertainments. It has a public library and reading-room; and recently a large, well-equipped gymnasium, with baths, has been added.

A. S. WOL.

CLIMATION or **ACCLIMATIZATION:** The adaptation of the individual to a new climate. It has been observed that when people emigrate to a strange country, even when the new climate differs but little from that of the mother country, there occurs a transformation which affects the entire organism. It has been shown by Virchow that it is not only the individual who is affected by a prolonged sojourn away from his native country, but his posterity as well. At present one of the most urgent problems confronting modern statesmen and sociologists is whether Europeans can emigrate to other climates, particularly the tropics, live healthful lives, and perpetuate their kind and ethnic type there (see C. H. Pearson, "National Life"; B. Kidd, "Control of the Tropics," p. 79, note).

Jews an Example.

The Jews furnish perhaps the best statistics for solving the problem of climation. They live, thrive, perpetuate their kind, and preserve their identity in almost every climate. Many students of the problem of acclimatization have shown that the Jews are a cosmopolitan race (see particularly Boudin, "Mémoires de la Société d'Anthropologie," i. 117). Andree aptly says that "the Jew is able to acclimatize himself with equal facility in hot and in cold latitudes, and to exist without the assistance of native races. He lasts from generation to generation, in Surinam (Dutch Guiana) or in Malabar (India), tropical climates where Europeans, in the course of time, die out unless they are constantly reenforced by immigration from the mother country" ("Zur Volkskunde der Juden," pp. 70, 71). In Algiers, where the French find it so difficult to adapt themselves, the Jews are known to prosper and multiply, as the following figures show:

Year.	Mortality per 1,000 Population.	
	Europeans.	Jews.
1844	44.6	21.6
1845	45.5	36.1
1847	50.0	31.5
1848	42.5	23.4
1849	105.9	56.9

The climation of the Jews in Algiers appears the more striking in view of the following figures for the year 1856, given by Boudin (*l.c.* p. 119), showing the relation of the birth-rate to the death-rate among the Jews in comparison with Europeans and the native Mohammedans:

	Births.	Deaths.
Europeans	1,234	1,553
Mohammedans	331	514
Jews	211	187

A similar vitality and power of acclimatization are shown by the Jews in India (for statistics see M. Legoyt, "De Certaines Immunités Biostatiques de la Race Juive," pp. 21-24), in the tropical countries of South America (Montano, "L'Hygiène et les Tropiques," in "Bulletin de la Société de Géographie," series 6, xv. 418-451), in the southern portion of the United States, and in Cuba. The same holds good in South Africa and Australia.

Extremes of Temperature.

A. R. Wallace considers the Jews "a good example of acclimatization because they have been established for many centuries in climates very different from that of their native land; they keep themselves almost wholly free from intermixture with the people around them. . . . They have, for instance, attained a population of near two millions [at present nearly six millions] in such severe climates as Poland and Russia; and according to Mr. Brace ('Races of the Old World,' p. 185), their increase in Sweden is said to be greater than that of the Christian population; in the towns of Algeria they are the only race able to maintain its numbers; and in Cochin China and Aden they succeed in rearing and forming permanent communities" ("Acclimatization," in "Encyclopædia Britannica," 9th ed., vol. i.).

It is important to note that wherever they live the Jews preserve their peculiar typical Semitic features, and in most cases also their habits of life.

Felkin ("Can Europeans Become Acclimatized in Tropical Africa?" in "Scottish Geographical Magazine," ii. 653) states that it is probably due to a certain amount of Semitic blood that the southern Europeans possess in a higher degree the power of adapting themselves to a subtropical climate. Discussing the overwhelming superiority in adaptability of the Maltese over the Spaniard, Virchow says that it is derived from the mixture of foreign (Semitic) blood ("Ueber Akklimatisation," in "Verhandlungen der Versammlung der Naturforscher und Aerzte in Strassburg," 1885).

Investigation tends to show that even a little Semitic blood in the veins of nations is a great help in acclimatization, and that the power to adapt themselves to a strange climate is a racial trait of the Jews. Another important point is that while other white races find it advantageous to climation to intermarry with the native races, and while many have shown that this is absolutely necessary for successful climation, the Jews do not, as a rule, inter-marry with their neighbors, and still adapt themselves easily to new climatic conditions. See INTERMARRIAGE.

Suggested Causes.

Some consider that the superior power of climation of the Jews is a racial trait, acquired by their constant migrations, and even their temporary stay in Egypt; and their slow progression ("petit acclimatement") is stated by Bertillon ("Acclimatement," in "Dictionnaire des Sciences Anthropologiques," Paris, 1884) to have had its influence on their power of climation. But Schellong ("Akklimatisation," in Weyl's "Handbuch der Hygiene," i. 334) points out that the center of dispersion of the Jews was in the countries near the Mediterranean, whence they have slowly penetrated into the heart of Europe (an opinion not shared by all authorities on the subject); and that in this manner they have reached the northern countries of Europe, their progression being constantly in the direction of the colder regions, for which less aptitude for climation is necessary.

Another point especially worthy of notice is the fact that the Jews in the tropical countries are not engaged in pursuits requiring much exertion and exposure to the hot rays of the sun. This is especially emphasized by Ripley ("Races of Europe," p. 563), who says that Jews confining all their activities to shops in the towns can not be compared with others who take up the cultivation of the soil.

Another view of the question of the causes of the Jew's power of climation is that his sobriety, purity of home life, and freedom from vicious habits contribute largely to his easy adaptation to a new climate. That there is a great deal of truth in this can not be denied, because it is well known that immigrants in tropical countries are prone to do things which they would not even think of amid the restraints of home life. The English (according to Wallace), who can not give up animal food and the use of spirituous liquors, are less able to sustain the heat of the tropics than the more sober Spaniards and Portuguese. The Boers in South Africa are another example of a people who keep sober and prosper in a tropical land. The sobriety of the Jew is admitted by all, and has undoubtedly a great influence on his adaptability to new climates, although this adaptability seems to be a racial characteristic of the Semites, not dependent upon the merely negative virtue of sober and temperate living.

CLISSON: Town in the department of Loire-Inférieure, France, formerly belonging to the province of Brittany. Clisson was a center of Jewish learning, several renowned scholars having resided there; and its name, variously written קולצון, קלצון, לצון, קלבון, קלאצוף, קלצין, occurs in the Hebrew writings of the thirteenth century. Its most prominent scholars were: (1) the Tosafist Joseph, called also "Joseph the Jerusalemite"; (2) Meïr Clisson, mentioned as a Biblical commentator in the commentary "Ẓofnat Pa'neaḥ"; (3) Isaac of Clisson, mentioned in the "Semaḳ"; (4) Jacob, mentioned by Mordecai ben Hillel.

CLOAK. See MANTLE.

CLOUD.—Biblical Data: The Hebrew equivalents for "cloud" are: (1) "'Anan," (Gen. ix. 13, 14; Ex. xiii., *passim*), which occurs once in the feminine form "'ananah" (Job iii. 5), and once in the Aramaic form ענן (Dan. vii. 13). (2) "'Ab" is generally used in the poetic books instead of the more prosaic "'anan" (Job xxxvi. 29; xxxvii. 11, 16; I Kings xviii. 44; Isa. v. 6, etc.). (3) "Shaḥaḳ," a purely poetic form, occurring frequently in the plural, but only twice in the singular (Ps. lxxxix. 7, 38), is used for "heavens" (Job xxxvii. 15; Ps. lxxxix. 7, 38). In Deut. xxxiii. 26; Isa. xlv. 8; Jer. li. 9; Job xxxv. 5, xxxviii. 37; Ps. xxxvi. 5, lvii. 11, cviii. 5, it is used as a parallel for "heaven." (4) "'Arafel," a thick, heavy, dark cloud (Deut. iv. 11, v. 22; II Chron. vi. 1; Job xxii. 13, xxxviii. 9; Isa. lx. 2). (5) "Nesi'im," rendered "vapors" in Jer. x. 13, li. 16. Ps. cxxxv. 7 seems to echo Jer. x. 13 and li. 16, having a very similar phraseology. "Nesi'im" occurs also in Prov. xxv. 14, "clouds and wind and no rain."

In the peculiar climatic conditions of Palestine clouds were an important feature. The year was divided into a rainy season, from October to May, and a dry season, from May to October. During the rainless season not only was there no rain, but not even a cloud appeared in the heavens (I Sam. xii. 17, 18), and when the rain-cloud did appear it arose gradually from the west—that is, from the sea—and then the heavens were darkened and a tremendous downpour followed (I Kings xviii. 45). Many figurative expressions are derived from the qualities of the clouds. They are driven across the sky very quickly; hence it is said that the enemy "shall come up as the clouds" (Isa. xix. 1, lx. 8; Jer. iv. 13). Job complains of his welfare passing away as the cloud (Job xxx. 15). Here, too, is the thought that the cloud leaves no trace behind it. Originating from this thought is the phrase in Isa. xliv. 22, "I have blotted out, as a thick cloud, thy transgressions." The clouds of the rainy season foreshadow the rain, hence symbolize a favor bestowed (Prov. xvi. 15). In the dry season the dew-cloud revives the dried vegetation; God's favor is therefore pictured as the dew (Hosea xiv. 5). The blackness of the clouds betokens misfortune (Ezek. xxx. 18; Lam. ii. 1), and even a curse, as in Job iii. 5.

Clouds are frequently pictured as hiding God from man and as intercepting man's petitions (Lam. iii. 44; Job xxii. 13, 14). In Job xxvi. 8 there is the strong figure of the cloud used to bind up and contain the waters. As direct manifestations of God, the clouds are His chariots (Ps. civ. 3; Isa. xix. 1). When God appeared over Mount Sinai it was in clouds and thunder and lightning. A cloud covered the mercy-seat (Lev. xvi. 2) in the Tabernacle, and later on it rested over the Temple (I Kings viii. 10, 11; II Chron. v. 13, 14). A pillar of cloud accompanied the Ark, showing the way by day through the wilderness (Ex. xiii., *passim*). See Rainbow.

J. G. B. L.

——**In Rabbinical Literature:** The observation of clouds for the purpose of divination (עונן) was one of the forbidden methods of forecasting the future (Lev. xix. 26). Notwithstanding this, the pillar of cloud of the altar was observed for that purpose in the Temple on New-Year's or Atonement Day (compare Yoma 21b.; B.B. 147a), the direction which the pillar of cloud took being thought to indicate what part of the land would be blessed with plenty during the year (Lev. R. xx.; compare Abraham's forecasting of the year while observing the stars on New-Year's eve [Book of Jubilees, xii. 16]). A cloud stationary over the top of Mount Moriah, betraying the presence of the Shekinah, was the means by which Abraham recognized "the place afar off" (Gen. xxii. 4; Gen. R. lvi.; Tan., Wayera, 46; Pirḳe R. El. xxxi.; Targ. Yer. to the passage). A cloud over the entrance to the tent of Sarah also indicated the presence of the Shekinah (Gen. R. lx.).

Of Moses it is narrated that when he was about to ascend to heaven, a cloud came to meet him, and, forming about him, carried him up (Pesiḳ. R. 20; ed. Friedmann, p. 96). God wrapped Moses in a cloud to protect him when the angels of heaven, who were jealous of him, wanted to cast him down (Ex. R. xli., xlii.). The cloud of the divine glory also appeared at Aaron's death on Mount Hor, and gradually covered him until he disappeared from before Moses (Yalḳuṭ, Mas'e, § 787). Moses was sanctified by the cloud so that he could receive the Law from God on Sinai (Ab. R. N. i.). When Moses' life was drawing to an end, the cloud of glory surrounded his successor, Joshua, at the gate of the tent, and Moses, standing outside, felt that his leadership was transferred to Joshua (Jellinek, "B. H." i. 116). Josephus ("Ant." iv. 8, § 48) relates of Moses' end that after he had dismissed the elders and was still discoursing with Eleazar, the high priest, and Joshua, a cloud suddenly stood over him and he disappeared (compare Samaritan Book of Joshua, vi.).

The clouds carried along from the River Pishon in paradise the precious stones for the ephod and the high priest's breastplate, as well as the sweet odors, the sacred oil, the balsam for the candlestick, and the ointment and incense for the Tabernacle (Targ. Yer. to Ex. xxxv. 27, 28, the word **נשיאים**, used in the passage, denoting both "princes" and "clouds"). The clouds spoken of in Isa. lx. 8 ("Who are these that fly as a cloud?") are miraculous clouds, carrying the righteous every morning and evening from all parts of the world to the Temple at Jerusalem, so that they may participate in the divine service (Pesiḳ. R. 1.; compare I Thess. iv. 17: "We which are alive and remain shall be caught up together with them [the angels] in the cloud to meet the Lord in the air").

The cloud of divine glory which carries the Son of man in the Messianic vision (Dan. vii. 13) has given rise to the identification of Anani, the descendant of David (I Chron. iii. 24), with the Messiah as "the one who will come down from the clouds" (see Targ. and Sanh. 92b: בר נפלי [*νεφέλη*], "the son of the cloud"; hence Matt. xxiv. 30, *passim*).

Clouds of a miraculous character appeared to R. Ḥiyya ben Luliani in the time of a drought, saying to one another: "Come, let us bring rain to Ammon and Moab" (Ta'an. 25a). For the cloud-vision in the Baruch Apocalypse (liii. *et seq.*), see Baruch, Apocalypse of.

Regarding the origin and nature of the clouds, R. Eliezer holds, pointing to Gen. ii. 6 and Job xxxvi. 28, that the clouds above sweeten the water rising from the ocean as mist, while R. Joshua, referring to Deut. xi. 11 and Job xxxvi. 37, says that the clouds form a receptacle through which the water coming from above pours down as through a sieve; whence the name "sheḥaḳim" (grinders), as they "grind" the water into single rain-drops (Gen. R. xiii.; compare Bacher, "Die Agada der Tannaiten," i. 136). These views seem to have given rise to another controversy between R. Johanan and R. Simon b. Laḳish, the former referring to Dan. vii. 13, the latter to Ps. cxxxv. 7 (Gen. R. *l.c*). The five Biblical names for "cloud" are explained: "'ab" = the cloud thickening the upper atmosphere; "ed" = the cloud bringing, in the form of rain, "calamity" upon corn-speculators; "'anan" = the cloud rendering people "pleasant" toward one another through prosperity; "nesi'im" = the cloud rendering people "princes," either by benefiting all or by favoring some; "ḥaziz" = the "shining" cloud causing men to have "visions" (Gen. R. *l.c.*, and Yer. Ta'an. iii. 66c).

CLOUD, PILLAR OF (עמוד הענן, Ex. xiii. 21).—**Biblical Data:** When Israel was marching through the wilderness, Yhwh, wrapped in a pillar of cloud, preceded the people in order to show them the right way. During the night the cloud turned into a pillar of fire (Ex. xiii. 21; xiv. 19, 24; Num. xiv. 15; Deut. i. 33; compare Ps. lxxviii. 14; Neh. ix. 12, 19). On one occasion the pillar of cloud moved behind the Israelites in order to shield them from the pursuing Egyptians (Ex. xiv. 19, 24).

The historic basis of this account is doubtless found in the frequently mentioned custom of carrying fire before an army on the march, so that the route might be indicated by day by the rising smoke and after nightfall by the light. When Alexander was marching through Babylonia and Susiana he gave the signal for his army to set out, not by trumpet, but by means of a long pole fastened above the chief tent, on which a fire burned by night, and from which smoke rose by day (Curtius, v. 2, 7). Thrasybulus, leading home banished men through untrodden regions, was preceded at night by a fire (compare Clement of Alexandria, "Stromata," ed. Colon, i. 348). In Arabia to-day iron vessels filled with burning wood are carried on long poles at the head of caravans (compare Harmer, "Beobachtungen," i. 348; Pococke, in "Morgenland," ii. 51). Since Yhwh is Israel's leader, and clouds and fire signify His presence (Ex. iii. 2, xix. 9), smoke and fire are transformed into cloud and firelight.

E. G. H. W. N.

——**In Rabbinical Literature:** The Haggadah, taking the words "I placed the children of Israel in tents" ("sukkot," Lev. xxiii. 43) in an allegorical sense as signifying that the Israelites were surrounded with clouds for protection, and the name of the city Sukkot (Ex. xii. 37, xiii. 20) as the place where they were covered with clouds (see Mek., Bo, xiv.; Mek., Beshallaḥ, i.), mentions not one, but seven, "clouds of glory" as having accompanied Israel on its march through the desert (ענני כבוד); namely, one on each of the four sides, and one above, one below, and one in front of, these four. According to another passage there were even thirteen clouds, two on each side, two above, two below, and one in front. Others, again, speak of only four, or of two (Mek., Beshallaḥ, i.; Sifre, Num. 83). The cloud in front prepared the way by leveling the heights and depths (see Arnon), killing the snakes, and making the way pleasant. These "clouds of glory" prevented the garments of the Israelites from becoming soiled or worn during the forty years in the wilderness (Pesiḳ., ed. Buber, x. 32a; compare the parallel passages in Buber, *l.c.*). They were combined with the standards of the twelve tribes as follows: a strip of the seventh cloud, on which the initials of the names of the three patriarchs flashed in heavenly light, rested on the standard of the tribe of Judah, while a second strip of the same cloud, on which the second letters of the names of the three patriarchs flashed, rested on the standard of the tribe of Reuben; the standards of the tribes of Ephraim and Dan were similarly distinguished by strips of the seventh cloud. Hence the first strip of cloud bore the letters אׄיׄיׄ; the second strip, בׄצׄעׄ; the third, רׄחׄקׄ; and the fourth, מׄקׄבׄ, the name of Abraham being spelled without the letter ה, and appearing on these strips of cloud as "Abram." This ה combined with י and forming the name of God (יׄהׄ), appeared on the pillar of cloud that hovered over the Ark of the Covenant. During the seven days of the week the pillar of cloud went the rounds of all the camps of Israel, giving light as the sun by day and as the moon by night. When God wished the Israelites to remove their camps, the cloud on which the letters יׄהׄ were marked moved upward from the Ark of the Covenant. The four other strips of cloud followed after it, and as soon as the priests noticed these clouds following in the wake of the first, they blew their trumpets as the signal to continue the journey ("The Chronicles of Jerahmeel," pp. 149–157; a slightly different version is found in the description of the cloud in the "Ḳanah," ed. Korez, p. 32b–c). These clouds receded from the Israelites when they had committed sins, and thus failed to protect them; this happened in the case of the tribe of Dan, which, having been guilty of idolatry, was assailed by Amalek, and many were slain (Mek., Beshallaḥ, Amalek, 1). Compare Fire, Pillar of; Standard.

E. C. L. G.

——**Critical View:** An account somewhat different from that in the two earlier sources of the Pentateuch, J and E, is found in the latest source, the Priestly Code. The latter never speaks of a pillar, but merely of a cloud, and this appeared only after the erection of the Tabernacle, which it covered by day, while by night it contained fire, which was perceived on the Tabernacle and taken as an omen. When the cloud rose the Israelites broke camp, and when it was lowered they set up their tents (compare Ex. lx. 34 *et seq.*; Num. ix. 15 *et seq.*, x. 11 *et seq.*, xvii. 7). Hence the conception in the Priestly Code seems to be based on the idea of the continually burning altar-fire in the tent (compare Dillmann, on Ex. xiii. 21).

E. G. H. W. N.

COAL: Expressed in the Bible by two words, פחם (Prov. xxvi. 21; Isa. xliv. 12, liv. 16) and

גחלת, גחלים (Ps. xviii. 9 [A. V. 8]; Prov. xxv. 22). Since גחל means "to glow" or "to burn," גחלים probably means "the glowing," and פחם, "black coal" (compare Prov. xxvi. 21), although this distinction does not always obtain (Isa. xliv. 12, liv. 16). Of course, charcoal is always meant, which was made of tamarisk and broom, the kind formed of the thick roots of the latter (רתם) giving an especially strong and lasting heat, and being still much sought in the East (Robinson, "Biblical Researches in Palestine," i. 203; Germ. ed., iii. 683). According to Jer. vi. 29, the flame was fanned by a bellows (מפח), probably the ancient variety worked with the feet and hands; but in a picture found in Wilkinson's "Ancient Egyptians," iii. 339, the Egyptians are shown using for that purpose long reeds protected against the flame by long metal points.

Though the coal-fire was used chiefly for cooking food, and for baking bread, meat, and fish (Isa. xliv. 19), it was also used for heating the homes. In the winter, live coals were placed in a brazier standing in the middle of the room (אח, Jer. xxxvi. 22; כיור אש, Zech. xii. 6); in the houses of the poor they were placed in a hole in the floor. As there were no chimneys, the smoke found vent either through the door or through the grated window (ארבה), which was generally rather high in the wall (Hosea xiii. 3).

The word "coal" is often used in a metaphorical sense: II Sam. xiv. 7 speaks of the "quenching of the coal" of a man, meaning the complete annihilation of his issue; while in Prov. xxv. 22 kindness bestowed upon an enemy is called "heaping coals of fire upon his head," since it tends to waken his deadened conscience and help him to realize his wrong. Ecclus. (Sirach) viii. 10 compares the smoldering and easily roused passion of the godless man to the coal that is easily lighted and breaks forth into flame.

E. G. H. W. N.

COAT: An outer garment with sleeves, for the upper part of the body; in the Bible it is an article of dress for both men and women, worn next to the skin, and is distinct from the "cloak," or outer garment (compare Matt. v. 40); either "shirt" or "tunic" would be a more correct rendering. The Hebrew has "kuttonet," rarely "ketonet," which is sometimes translated "robe" or "garment" (Isa. xxii. 21; Neh. vii. 70, 72; II Sam. xiii. 18, 19; Ezra ii. 69). "Kuttonet" is a word of doubtful etymology (coming, perhaps, from a root meaning "to clothe"), but its cognate forms are found in Arabic ("kattan"), Ethiopic ("ketân"), Assyrian ("kitinnê"), and Greek ("chitôn").

Originally (Gen. iii. 21) the garment worn by the Hebrews was a simple loin-cloth of leaves or skins, like that adopted by Elijah (II Kings i. 8, "girdle of leather"; compare the use of the "puntî" on the border of the Red Sea: Müller, "Asien und Europa," p. 108). In course of time this developed into a short shirt, with an aperture for the head to pass through, and was gradually lengthened to the knees (especially when used by women), and sometimes to the ankles. Even tunics with trains are mentioned (Isa. vi. 1; Jer. xiii. 22; Nahum iii. 5). The shirt was made at first without sleeves, and also failed to cover the left shoulder (see Müller, *l.c.* pp. 296 *et seq.*). The working classes continued to wear the "primitive loin-cloth" (Müller, *ib.* p. 297), or the sleeveless coat, as this allowed full freedom of movement for both arms and legs. When the shirt was long, a belt or girdle was worn over it, partly for the purpose of holding it together, but mainly to enable the wearer to tuck in the laps when running, walking, or working.

The expression "mouth of the coat" can not be understood to mean that the shirt had a collar. It denotes simply the opening at the top, fitting closely round the neck (Job xxx. 18). At night (Cant. v. 3) this undergarment was taken off. Later, as outer garments came into use, one clothed only with the kuttonet was considered to be "naked." As a sign of mourning, originally, every article of dress was removed, and cuts were made in the flesh; but as soon as the wearing of the kuttonet alone came to be regarded as equivalent to "nakedness," that garment was rent to express grief (II Sam. xv. 32; compare Morris Jastrow, in "Journal of the American Oriental Society," xxi. 23, 39; and see CUTTINGS). That a loin-girdle was regarded as equally inadequate with the kuttonet is shown in Talmudic allusions (Shab. 62b; Soṭah 9a; Esth. R. 104b).

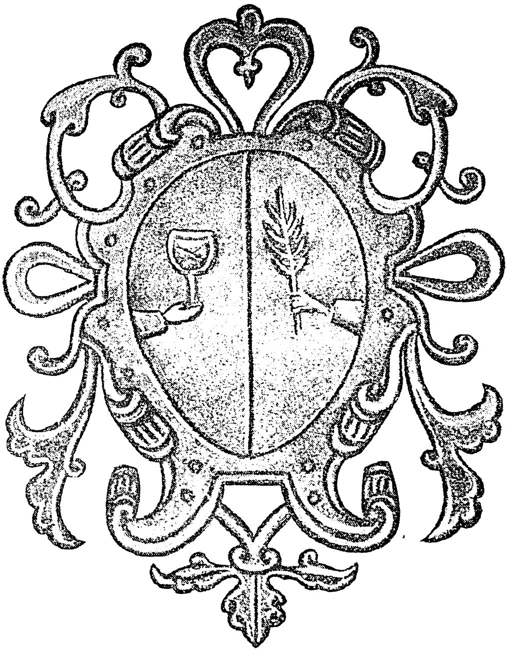
The more luxurious classes of society—*e.g.*, women of royal blood (II Sam. xiii. 18, 19) and men of leisure—wore tunics with sleeves. This is the meaning of the Hebrew "passim" occurring in the description of the garment presented to Joseph by his father (Gen. xxxvii. 3). It was not "of many colors" (see Septuagint); the color of the shirt worn even by those of high rank was yellow, or red, or black (Müller, *l.c.* pp. 297-299); the upper garment, wound spirally round the body, was of blue and red, and showed various patterns, like those worked into rugs; but its significance lay in the fact that the sleeves (Targ. and Bereshit R. parashah 84) marked the favorite son, who was absolved from work. These sleeves sometimes extended only to the elbow-joint; when they covered the whole length of the arm, the lower part was, as a rule, richly ornamented with fringe. Whether or not the common shirt had seams is not clear. The more costly shirts appear to have been sewed together, the seams, especially those round the neck, being heavily covered with embroidered strips (Müller, *l.c.* pp. 298, 299). The materials from which these tunics were made were wool—woven by the women—flax, and, for the more costly ones, worn by officials, both secular and sacerdotal (Ezek. xxvii. 16; Isa. xxii. 21), imported Egyptian byssus ("shesh," Gen. xli. 42; Ex. xxviii. 39; and "buz," Ezek. xxvii. 16).

In Mishnaic times this coat, or shirt, was still worn. It is found under the name "onḳali" ("nokli," Yer. Shab. 15d), which sometimes seems to denote a garment worn by women, and is correctly explained in the "'Aruk" as "a thin article of apparel worn next to the skin" (compare also Meg. 24b; Sanh. 82b; M. Ḳ. 24a). It was, however, provided with sleeves (Brüll, "Trachten der Juden"; Krauss, "Lehnwörter," *s.v.*). "Sarbalin" in Dan. iii. 21 is not "coat," but "trousers." (See COSTUMES IN BIBLICAL TIMES).

E. G. H. G. B. L.—E. G. H.

COAT OF ARMS: Armorial bearings of families to which the right to bear arms has been granted by the recognized heraldic authorities. This right is in a heraldic sense distinctly feudal in character; and it seems to have originated, toward the end of the twelfth century, in the international relations during the Crusades, which rendered it desirable to introduce some system into the devices on shields. As Jews had no recognized position in the feudal system after this period, they could not use these devices, though for some time they were ranked with nobles, and had the right of deciding their disputes by duel. Consequently, no Jewish coats of arms were recognized by the heralds in the Middle Ages; though rich Jewish families of means used devices, as is shown by the occurrence of heraldic SEALS.

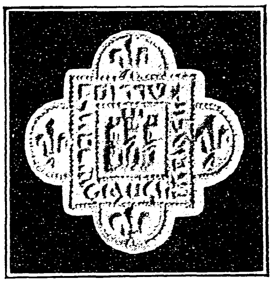
The first recorded Jewish coat of arms is that of Bassevi von Treuenfeld, which was granted by the German emperor Ferdinand II. Jan. 18, 1622. Grätz ("Gesch." x. 37) blazons his shield a blue lion, eight red stars in a blue field, thus committing one of the most elementary heraldic blunders in thus putting color upon color. The true blazon will be found below. In the same year two Jewish envoys from Candia arrived at Venice bringing with them designs practically the same as coats of arms. One of these (Samuel Abdala) is figured below; but it is unlikely that they were granted by any heraldic authority, since one of the envoys had a device referring to his given, and not his family, name.



Arms of Samuel Abdala.
(From the "Jewish Chronicle.")

The practise of bearing coats of arms became more general among the Jews at the time of the Maranos. When a Jew became converted in Spain, he was generally adopted by some noble family, and thereby obtained the right to bear the family arms. In this way many Jewish families gained the right to shields, which they carried with them to Holland, and had carved on their tombstones, even after they had repudiated Christianity, which had given them the right to such shields. It would appear that at an even earlier period certain Spanish Jews had adopted arms; since there is on record the elaborate seal of the Ha-levis of Toledo, bearing the triple-turreted castle of Castile, a device afterward adopted by the earl of Beaconsfield.

Sephardic Coats of Arms.



Arms of the Halevi Family.
(In the British Museum.)

In more recent times a grant of arms has lost its feudal significance; and it now merely implies that the grantee is a person of some wealth who desires to have the same external trappings as other persons in his social position. Jews have occasionally yielded to this desire, and a certain number of coats of arms have been granted in England by the heraldic authorities. Besides these, those Jews who have been received into the ranks of the nobility on the continent of Europe have, as a matter of course, been granted armorial bearings, which are recorded in the usual works on heraldry. There is rarely anything distinctively Jewish in the coats of arms thus granted. Occasionally, as with the Montefiores and the Sassoons, a Hebrew word is used; but as a rule the ordinary heraldic signs are utilized.

The subjoined list of coats of arms of Jewish families—the first that has been made—has been compiled from the standard works on heraldry of the respective countries, with occasional reference to Jewish books in which armorial bearings sporadically occur. The full titles of the works cited under names of authors at the end of each blazon are as follows:

COATS OF ARMS OF JEWISH FAMILIES.

Abarbanel (Spain, Portugal, Holland): Argent, a lion gules, rampant, toward a tower gules. [Rietstap, i. 1; Da Costa, p. 511.]

Abarbanel de Sousa (Portugal): Quarterly, 1 and 4, argent, a lion gules, rampant, toward a tower gules (for Abarbanel); 2 and 3, argent, four crescents, appointé, affronté, gules (1. 2. 1) (for Sousa). [Rietstap; Da Costa, *ib.*]

Abarbanel da Veiga (Portugal): Quarterly, gules, an eagle argent; argent, three fleurs-de-lis azure. [*Ib.*]

Abdala (Corfu, 1622; grant for Samuel Abdala): Divided, dexter, in an outstretched hand the goblet for the Ḳiddush in a field azure; sinister, in an outstretched hand a twig of myrtle (which in Corfu supplies the place of the spice-box), in a field or. ["Jewish Chronicle," Sept. 19, 1902, pp. 23–25, 55. See illustration on page 125.]

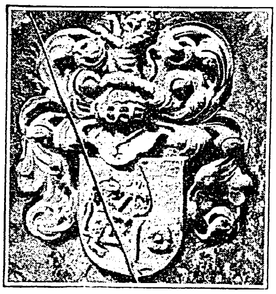
Abendana (Amsterdam): Two swords, put in saltier, the hilts below. Crest: Upon a helmet two ostrich-plumes. [JEWISH ENCYCLOPEDIA, i. 52.]

Abendana: An eagle upon a bolt of lightning, surrounded by a sun. Crest: A sinister hand. Colors or metals unknown. [Da Costa, p. 513.]

Aboab: Or, five stars, 2. 1. 2, put saltier-like (see Frontispiece, Fig. 4). [Piferrer, i. 21; compare Da Costa, p. 515.]

Aboab (Altona, Hamburg): A house or fortress with cannon and banner. ["Ost und West," Aug., 1902, p. 534, from Grunwald, "Portugiesengräber," 1902.]

Abolais (Portugal, Holland): Divided, 1, a lion rampant toward 2, half of a tree, a rose in the point. Crest: A lion issuant, turned the reverse way (dexter). Colors unknown. Date, 5392 = 1632. [De Castro, plate xiv.]



Abolais.

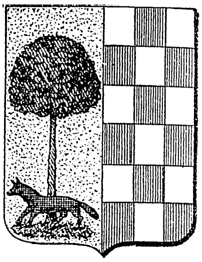
Abravanel: Per bend, charged with a star (8 points) between two arrows, the points upward, accompanied by two stars (8). Crest: Upon a helmet two serpents entwined, combatant. Colors unknown. [JEWISH ENCYCLOPEDIA, i. 127.]

Acosta (Spain, Portugal, Holland): Quarterly, 1, or, a mountain, surmounted by a plantation of reeds, proper; 2, gules, a duck natant, proper; 3, gules, a hill, surmounted by a towered castle argent, embattlements azure; at the entrance to the castle a pomegranate, half opened, proper; 4, azure, five stars (8) argent (2. 1. 2), saltier-like. [Piferrer, i. 17; Rietstap, i. 7.]

Aguilar (Spain): Gules, an eagle sable, holding in its beak a shield gules, charged with three bars or. [Rietstap, i. 16; Piferrer's plate gives shield in center of the eagle.]

Aguilar or **D'Aguilar** (London, Spain, Portugal): Gules, an eagle or, surmounted by a bezant argent; in a chief argent, three hills sinople, surmounted each by a pear or, stem and leaves sinople. Crest: A lion issuant or, charged by a bezant argent. [Rietstap, i. 16.]

Alvarez (Spain, Holland): Per pale, 1, or, a tree sinople, at the base of the trunk a wolf sable; 2, checky argent and gules. [Piferrer, iv., No. 1573.]



Alvarez.

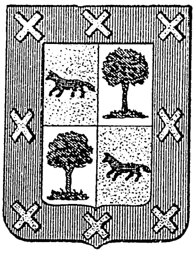
Andrade or **D'Andrade** (Spain, etc.): Or, five wolves passant sable (2. 2. 1). [Rietstap, ii. 47.]

Arnstein, Arnsteiner (Austria; creation: knight 1793; baron 1793–98): Quarterly, 1 and 4, azure, an eagle argent; 2 and 3, argent, a fess azure, charged by a sun or. Over all, sable, a crown or, surmounted by a bunch of five ostrich-plumes or. Two crests: (1) Wings, alternately azure and argent. Lambrequins: Argent and azure. (2) Five ostrich-plumes or. Lambrequins: Or and sable. [Rietstap, i. 69; Kneschke, i. 114.]

Asser (Amsterdam): Azure, a bend argent, a border or, sometimes charged by four "A's" sable, put in the cantons. Supporters: Two lions regardant, proper. [Rietstap, i. 76.]

Avernas-le-Gras. See SUASSO and LOPEZ-SUASSO-DIAZ-DA FONSECA, below.

Azevedo (**Acebedo** = holly-tree) (Castile): Quarterly, 1 and 4, argent, a holly-tree sinople; 2 and 3, or, a wolf passant sable. The shield is surrounded by a border gules, charged with eight small saltiers or. [Rietstap, i. 92; Piferrer, iii., No. 1272.]



Azevedo.

J. H. GUT.—J.

COBLENCE, ADOLPHE: French army surgeon; born at Nancy May 11, 1812; died in Paris Sept 18, 1872. He entered the service of the army as an assistant surgeon in the military hospital at Metz in 1832; became surgeon in 1834; and subsequently was made head of the clinic at the Hôtel des Invalides, Paris, by Baron Larrey. While at the Invalides he received the degree of M.D. from the faculty of Paris, and was appointed surgeon, with the rank of adjutant, to the Fifty-fifth Regiment of the line and to the engineer corps stationed at Metz. In 1846 he was promoted to surgeon-major of the Twelfth Infantry, which took part in the last expedition against 'Abd-al-Ḳadir.

In 1849, in recognition of his self-sacrificing devotion to his duties during the outbreak of the cholera in Oran, he was presented by the civil authorities with a gold medal, and was made a chevalier of the Legion of Honor. Coblence was attached in 1856 to the military hospital at Bayonne, but gave up his position and went to the Crimea, afterward devoting himself to the typhoid-stricken soldiers quarantined in the island of Porquerolles. In 1859 he was made an officer of the Legion of Honor for his splendid services with the Renault division during the Italian campaign, particularly at Magenta and Solferino, and subsequently was appointed physician-in-chief of military hospitals, with quarters at Algiers. His excessive exertions and an unfavorable climate brought on blindness in 1863, whereupon he returned to Paris, and was retired.

S. A. R.

COBLENZ: Prussian city on the Rhine. Jews settled there between 1135 and 1159, and are first mentioned in the "Judenschreinsbuch" (Archives) of Cologne. As early as 1100 there is mention of a custom-house in Coblenz at which Jews were obliged to pay four denarii for every salable slave. Perhaps a note in the "Memorbücher," according to which Jizchak and his wife Bela brought about the "abolition of the tax," refers to the above-mentioned duty. Between 1160 and 1173 the traveler Benjamin of Tudela found a large community in Coblenz. Marsilius, the mayor of Treves, and the knights Heinrich and Dithard of Pfaffendorf, testified, in 1265, that the archbishop Heinrich of Treves had freed the Jews in Coblenz of all taxes for a year. In the same year the Jews of this city were subjected to a persecution, as a result of which more than ten were killed. In 1334 the "Judenschläger" (Jew-beaters) attacked the Jews in Coblenz; in 1349 they suffered under the Flagellants, who killed almost all of them.

The records show that from 1352 the houses of the Jews were frequently subject to confiscation and sale for the benefit of the reigning prince. In 1322 and 1326 there is mention of a cemetery, and in 1333 and 1352 of a Jewry. The emperor Charles IV. ordered, in 1354, that a certain Jew named Samuel receive protection. In 1356 he granted Archbishop Boemund II. of Treves the right for Jews to settle in his district; and from 1366 Jews are found in Coblenz as house-owners. This prelate took the Jew Symon for his court physician. In 1418 Archbishop Otto drove them out of his domains, and in 1421 he gave in fief the Jewish cemetery of Coblenz to the daughters of Gottfried Sack of Dieblich, and presented the Jewish houses in the Burggasse to the religious order of St. Florin. In 1512 the elector Richard admitted two Jewish families to Lützel-Coblenz, and in 1518 five more families to Coblenz itself. The Council first extended civil protection to them in 1518. In 1583 they were again ordered to leave, and until 1592 they were excluded from the electorate.

In 1597 John VII. granted a Jewish firm permission to settle in Treves and Coblenz, and carry on a trade with the East. Their religious center was in Frankfort-on-the-Main. Twenty-one years later the elector Lothar von Metternich issued an order regulating the status of the Jews. In 1723 a statute was enacted reestablishing the Jewry, and permitting Jews to have a rabbi. When the elector Wenceslaus made his public entry into Coblenz in 1786, the Jews wished to take part in the ceremonies. On Nov. 23 they held religious services in his honor, and were admitted by him to an audience. On Jan. 24, 1851, a new synagogue was dedicated, and in 1901 there were 600 Jews in the city, out of a total population of 45,146.

Among the rabbis and scholars of Coblenz Moses Kohen ben Eliezer, the author of "Sefer Ḥasidim" (1473), should be mentioned. Wolf of Coblenz took part in the convention of rabbis at Frankfort in 1603. In 1650 Judah Löb Heilbronn ben Abraham David Eliezer, as rabbi of Coblenz, signed a letter of introduction for David Carcassonne. From 1666 to 1669 Jair Ḥayyim Bacharach, author of the responsa "Ḥawwot Yaïr," was rabbi in Coblenz. He was succeeded by Moses Meïr Grotwohl, a member of the rabbinate in his native city, Frankfort-on-the-Main, who died in 1691. His successor was Aaron Spira, who died in 1697. From 1697 to 1717 Jacob Kohen Poppers was rabbi in Coblenz; he is the author of the responsa "Sheb Ya'aḳob," and died in 1740 in Frankfort-on-the-Main. He was followed by Eliezer Lipman, son of Isaac Benjamin Wolf, rabbi in Berlin and the Mark, and author of "Naḥalat Binyamin." Eliezer (d. 1733) was teacher and tutor of Simon von Geldern, Heine's maternal grandfather. Mannele Wallich, who came of an old family of physicians, and was himself a physician, succeeded in the rabbinate, and died on the first day of the Feast of Weeks in 1762. The founder of the Altona printing-house (1715), Samuel Sanvel Poppert, who was also publisher of several short works, likewise came from Coblenz. The author of "Mafteaḥ ha-Yam" (novellæ to the Pentateuch; Offenbach, 1788) calls himself Jacob Meïr ben Wolf Coblenz. Ḥayyim Löb Gundersheim of Frankfort-on-the-Main had been rabbi in Coblenz for nearly thirty-five years, when he went back to Frankfort, became a member of the rabbinate there, and died in 1803. Ben Israel, born 1817, in Diersdorf, was preacher (1843), later rabbi, in Coblenz. He died Nov. 6, 1876, and was succeeded by Dr. Adolf Levin (1878–85), who is now rabbi of Freiburg, and by Dr. M. Singer (died in 1901).

Coblenz has the following Jewish charitable associations: Männer- Krankenverein, Wohlthätigkeitsverein, Wittwen- und Waisenverein, Sterbekassenverein, Seligmannsche Stiftung, Alberti-Stiftung, and Bragsche Stiftung.

COBLENZ, GERSON BEN ISAAC MOSES: French rabbi and author; born about 1717; died at Metz in the first half of the eighteenth century. He was a pupil of R. Jacob, author of "Shebut Ya'aḳob," and officiated as dayyan at Metz. Of his works the following are known: "Ḳiryat Ḥanah," responsa, finished by the author at the age of twenty-five, and published by his son Jacob (Metz, 1785); many responsa found in "Shebut

Ya'aḳob" and in the "Keneset Yeḥezḳel" of Ezekiel Katzenellenbogen. Coblenz also wrote novellæ on the "Ṭurim," and corresponded on rabbinical subjects with the rabbis Judah Möller, Samuel Helmann, and Jacob Joshua of Cracow.

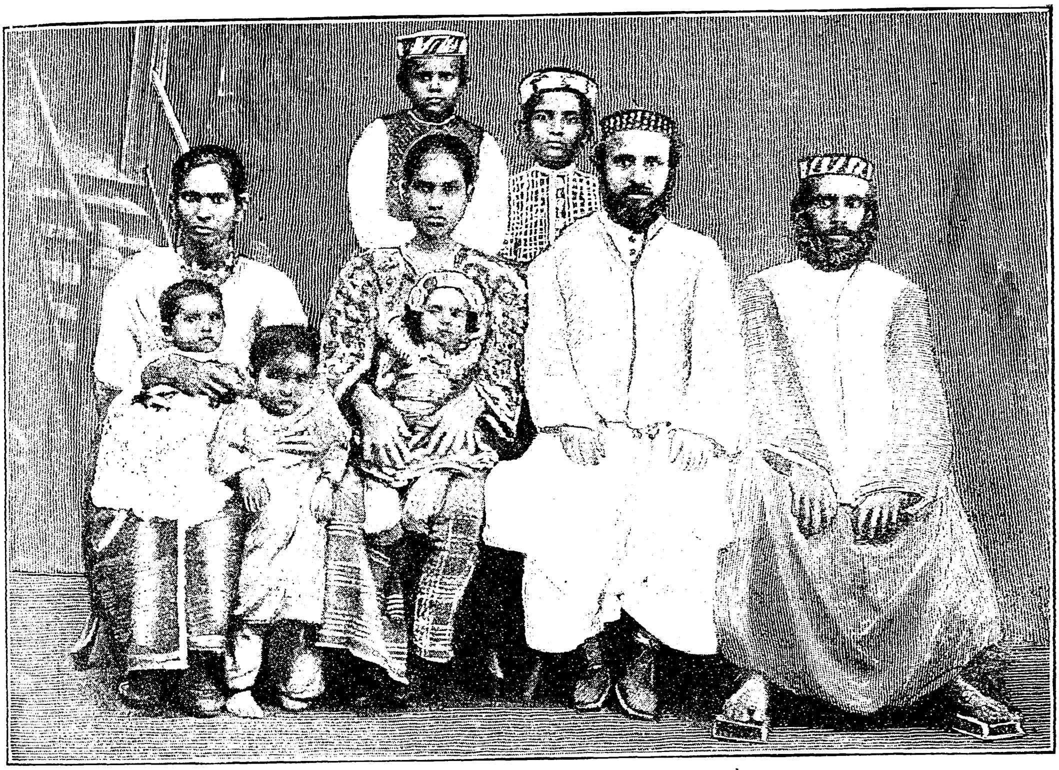
Sasanam of the Jews of Cochin, Granting Privileges to Joseph Rabban, About 750 C.E.
(From "Indian Antiquary.")

COCCEIUS (KOCH), JOHANNES: German theologian and Hebraist; born at Bremen 1603; died at Leyden Nov. 5, 1669. He was appointed professor of Hebrew at Bremen in 1629, and at Franeker in 1636, where, after 1643, he also held the chair of theology. In 1650 he was appointed professor of theology at Leyden. He was the founder of the school of theology known by his name.

Cocceius wrote commentaries on most of the books of the Old Testament, in which he maintained that sentences and phrases should be interpreted only according to their context.

He compiled a Hebrew dictionary of the Old Testament, which was published at Leyden in 1669 under the title "Lexicon et Commentarius Sermonis Hebraici et Chaldaici Veteris Testamenti," which to a certain extent marks an epoch in Hebrew lexicography among Christians. Of interest to Judaism are his "Versio Latina Mischnæ cum Excerptis ex Gemara Tractatuum Synhedrin et Makkot," 1629; "Judaicarum Responsionum et Quæstionum Consideratio," with a "Præfatio de Fide Sacrorum Codd. Hebræorum ac Versionis LXXII. Interpretum et Oratio de Causis Incredulitatis Judæorum" (Amsterdam, 1662); "Tractatus Makkot Versio Latina" (in Surenhusius, "Versio Latina Mischnæ et Commentationum Maimonidis et Obadjæ)", 1698–1703.



Jews of Cochin.
(From a photograph.)

All three essays were reprinted in his complete works, which were published in Amsterdam, two years after his death, under the title "Opera Omnia."

COCHABI, JOSEPH BEN ABRAHAM.

See Kokabi, Joseph ben Abraham.

COCHIN: State of India, within the Madras Presidency. The Jews in Cochin numbered 1,142 in 1891, and are divided into two classes: the Whites, whose complexion is almost as fair as that of European Jews, and the Blacks, who, though darker than the former, are not so black as negroes, and are of the same complexion as the Jews of Yemen or Kurdistan.

The White Jews number at present about fifty families, and these are divided into six stocks: the Zakkai, who are the oldest, and are said to have come from Cranganore in 1219; the Castillia, exiles from Spain in 1492, who arrived at Cochin in 1511; the Ashkenazi and Rothenburg, who came from Germany in the sixteenth century; and the Rahabi and Haligua families, who came from Aleppo about 1680. There are three hundred families of the Blacks.

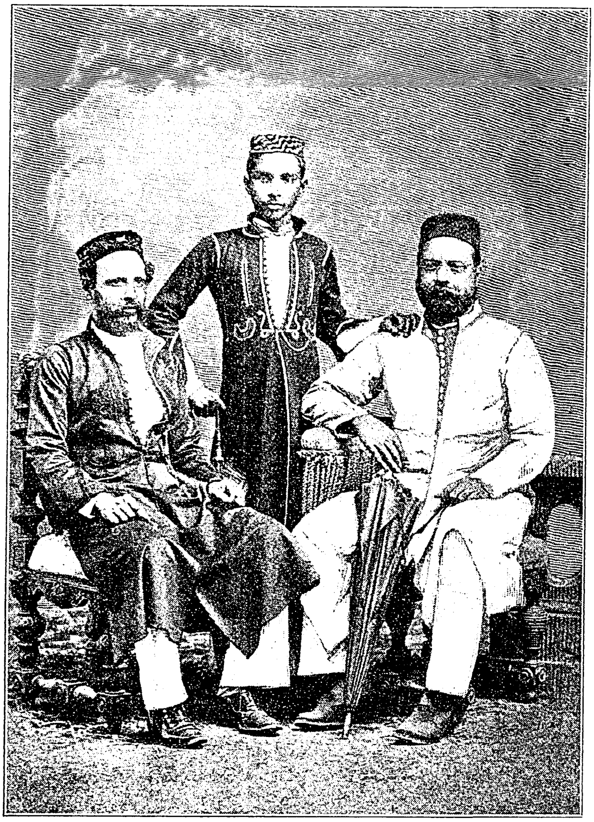
Earliest Mention—the "Sâsanam."

The earliest trace of the Cochin Jews is to be found in two bronze tablets known as the "Sâsanam" (Burnell, "Indian Antiquary," iii. 333–334), which are now in the possession of one of the elders and contain a charter given by Cheramal Perumal, King of Malabar, to Isuppu Irabbân (Joseph Rabban), probably a Jew of Yemen who led an expedition of Jews to Cranganore about the year 750. By the terms of the charter, engraved in Vatteluttu characters on the plate, Rabban, who is referred to as the prince of Ansuvannam, was granted seventy-two "free houses" and feudal rights in Ansuvannam, near Cranganore. The date of the charter can be fixed at about 750: it can not, for paleographical reasons, have been much earlier than this, nor later than 774, since a grant made to the Nestorian Christians at that time was copied from it.

Traces in Middle Ages.

These Jews intermingling with the natives became the progenitors of the Black Jews of Cochin. These are mentioned by Ibn Wahab in the ninth century; and Benjamin of Tudela appears to have visited or heard of them about 1167. He reports that they were one hundred in number and as black as the rest of the inhabitants of Coilum or Quilon, then the most important port on the Malabar coast. There Marco Polo found them a century later ("Travels of Sir Marco Polo," ed. Yule, ii. 263), and when Vasco da Gama reached Calicut in

1487, the first person he met was a Jew said to have come from Posen via Turkey and Palestine (Kayserling, "Christopher Columbus," pp. 113-114). In 1511 they were joined by Jews from Portugal. In 1565 they were threatened with the Inquisition by the Portuguese Christians settling at Cranganore, and fled to Cochin, where their number increased so rapidly that the Portuguese historian De Barros (1496-1570) refers to the King of Cochin as the "king of the Jews" ("Asia," III. ii. 234).



Group of Cochin Jews.
(From a photograph.)

Slaves.

Slavery was formerly allowed in Malabar, and the White Jews could make others slaves. The native males and females whom they bought were admitted as slaves according to the Jewish law, and even those who voluntarily entered the fold of Judaism were not admitted and treated as "strangers of righteousness," but as slaves. The males had to undergo the rites of circumcision and ablution, and the females were subjected to ablution. Their offspring were also treated as slaves. At the time of circumcision the mohel who performed this rite recited the blessing of circumcising slaves, and a similar blessing was recited at the time of their ablution. Even after undergoing these rites they were not allowed to intermarry with the other Jews, to study the Holy Scriptures, or to wear ẓiẓit and tefillin, unless they obtained a certificate of emancipation from their masters or mistresses. To make this emancipation known to the community of the White Jews, the freed slave went about and kissed the hands of all the Jews of the city. The children and children's children of all such freed slaves were also considered emancipated and were at liberty to wear ẓiẓit and tefillin, but were not called up to the reading of the Law except on Simḥat Torah. On the first two Seder nights the emancipated slaves with their families were allowed to join their masters at the table and to chant the Haggadah. This was the only occasion on which they were treated as free men and women. At the conclusion of the service on the Day of Atonement they kissed the hands of their former masters. The property of one who had no heir went to his or her former master. In the synagogue they were formerly made to sit on the ground in the veranda outside the synagogue proper.

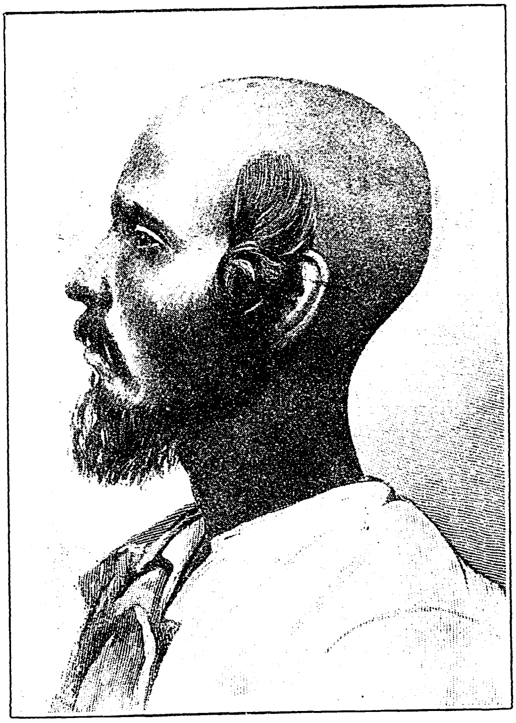
In 1848 the freed slaves asked permission of the White Jews to use the benches in the synagogue; being refused, they moved within the boundary of the British territory, where no distinction is made between masters and slaves. Led by Ava, a wealthy emancipated slave, who acted as sofer and shoḥet, they built a synagogue; but their numbers were soon diminished by the plague, and after Ava's death they were obliged to return to the White Jews, and to reassume their old position in the synagogue. Though they neither eat nor drink together, nor intermarry, the Black and the White Jews of Cochin have almost the same social and religious customs. They hold the same doctrines, use the same ritual (Sephardic), observe the same feasts and fasts, dress alike, and have adopted the same vernacular, Malayalam, a dialect of Tamil. Their chief articles of food are rice and the milk of the coconut. Maẓẓot are eaten only at the Seder, and though the Whites eat cooked fishes and chicken on the Sabbath, the Blacks eat no meat.

Religious Observances.

The two classes are equally strict in religious observances. The Blacks have two synagogues, one of which was built in 1625. The synagogue of the Whites, a magnificent edifice, was erected in 1568, burned by the Portuguese in 1662, rebuilt by Shem-Ṭob Castillia in 1668, and finally completed by Ezekiel Rahabi in 1730. It is situated next to the raja's palace, and is richly endowed with landed property. The Ark in these synagogues is situated in the western end of the building, not in the eastern, as in European lands, so that the congregation may turn in prayer toward Jerusalem.

Among the Blacks there are no Kohanim or Levites, so that they hire impoverished White Jews of the tribe of Levi and of the family of Aaron on the occasions when their presence is necessary. In 1615 a false Messiah appeared among the Jews of Cochin (Schudt, "Jüdische Merckwürdigkeiten," i. 42).

Connection with Europe. Pereyra de Paiva ("Notisias dos Judeos de Cochin") states that during the week of Nov. 21–26, 1686, some Dutch merchants of the Sephardic congregation of Amsterdam visited Cochin, at that time an important commercial port, and at the request of David Rahabi had rolls of the Pentateuch, prayer-books, and various rabbinical works sent from Amsterdam to Cochin. The books were received on the Fifteenth of Ab, and this day was appointed a holiday to be observed every year. In 1757 the White Jews had their own prayer-books printed at Amsterdam, and brought out a second edition in 1769. Their houses, situated in the section of the city called the "Jewish Town," are of one story, built of chunam and teak-wood, and are situated on the east and west of the road leading to the synagogues. In the yard is usually found a cistern required for the "ṭebilah" and a tabernacle for the festival. The whole locality is kept clean, and lighted on Sabbath, new moon, and holiday nights. The commercial and synagogal affairs of the community are looked after by five elders with a זקן הראשון ("chief elder") at their head.



Black Jew of Cochin.
(From "Globus.")

During the Portuguese and Dutch periods, that is, until about 1790, the greater part of the business of Cochin was in the hands of the White Jews. But their money was lost by Baruch David Rahabi, and for a time the community was very poor. About 1860 their condition improved, and while few are still able to live on the income of their ancestral landed property, none are dependent on charity. The Whites are engaged chiefly as merchants or farmers, the Blacks as fishermen, fruiterers, wood-choppers, or oil-pressers; while many of the freed slaves are bookbinders, clerks, or merchants.

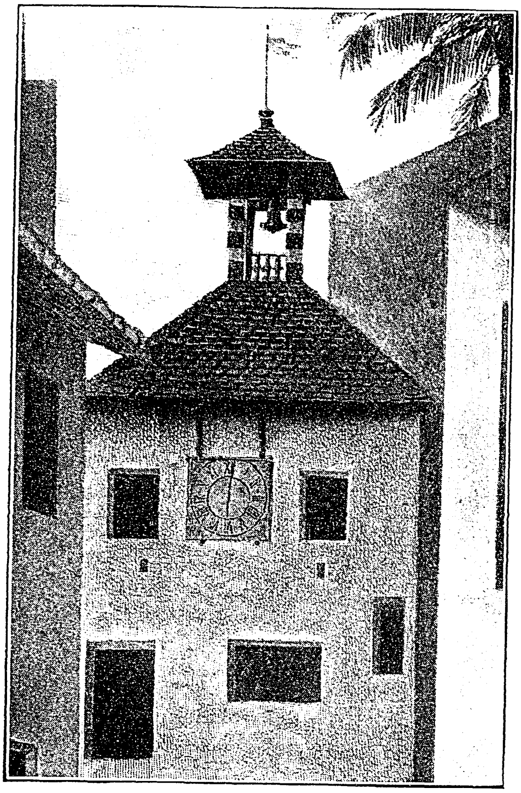
Social Conditions. In education the Jews of Cochin are extremely unprogressive. Formerly boys of thirteen or fourteen were taught to pray and to read the Law; now there are no Talmudists among them, few are well versed even in the Torah, and most of them learn only sufficient English to enable them to do clerical work. There are both Black and White teachers in the schools. The women, if instructed at all, are taught merely to recite their prayers. **Literary Efforts.** The only Cochin Jews who have made any contributions to literature are David Rahabi, author of "Ohel David," a calendar, printed at Amsterdam in 1791; and Solomon Rinman, author of "Mas‘ot Shelomoh," Vienna, 1884. Rinman taught the Blacks the Torah and sheḥiṭah, and was the first to consider them eligible for Minyan.

The week-day dress of the White Jew is the same as that worn by the natives; but the Blacks are covered only from the waist down, wear a red kerchief on the head, and have "pe'ot." In the synagogue, the Black wears the kaffa; the White, a turban, a shirt, a jacket with twelve buttons, over this a jubha, and trousers. Some of the younger men have adopted European dress. The "tahli," a gold chain with a peculiar coin in the middle, is worn by all married women, including widows; but the latter are not allowed to wear their wedding-rings.

The rites and ceremonies of the Cochin Jews are usually conducted on a very extravagant scale.

Birth Rites. The only ceremony which is performed in the case of a female child is its naming, in the synagogue or at home, eight days after birth; while the male child, eight days after birth, is carried under a canopy by his maternal uncle from the house to the synagogue, where he is circumcised; the occasion is then observed by the usual feast. If a woman dies in childbirth, and the child dies even one hour after, the dowry, contrary to the usual Jewish custom, remains in the husband's family.

The proposal of marriage is made to the father of the girl by the father of the man, through professional match-makers for both parties. Two days before the wedding, which usually takes place on Tuesday evening, the girl is taken to the synagogue for "ṭebilah" (purification); on her return, taking four threads of ẓiẓit in her hands, she kisses seven times the portion of the Bible containing the Decalogue. The making of the wedding-ring, and the cutting of the bridegroom's hair, usually done on the day of the wedding, are attended with music and festivities. At the beginning of the ceremony the bridegroom, who wears a white head-covering, takes a glass of wine and a ring, and recites a responsive formula. To his salutation, "With the permission of you all," those present respond, "With the permission of Heaven."



A Synagogue in Cochin.
(After a photograph.)

Marriage Rites.

He then repeats the usual blessings of betrothal, followed by a betrothal formula in which the exact name of the bride is mentioned. He drinks of the wine, and handing the cup to the bride, whose face is covered with a silk or embroidered network, says, "With this, also, do I betroth thee." Hereupon the officiating minister reads with cantillation the "ketubbah" (marriage contract), which is handsomely engrossed upon parchment. Before the last sentence is read the bridegroom hands the fringe of his ẓiẓit to the rabbi, and while both hold it the minister adjures him: "By the command of the Holy and Sanctified, by the Mighty One, who revealed the Law at Sinai, 'her support, her clothing, and her conjugal right he shall not diminish!'" The bridegroom replies: "Her support, her clothing, and her conjugal right I will not diminish." The rabbi says, "Dost thou undertake this?" and the bridegroom replies, "I undertake it." The minister adds, "A promise before Heaven and earth?" and the response is, "A promise before Heaven and earth."

When the reading of the contract is completed, the signatures of the bridegroom and witnesses are appended and read aloud, and the bridegroom presents the contract to the bride; while those assembled exclaim, "Be-simana ṭaba!" (May it be for a good sign!) The whole company then joins in singing a quaint epithalamium.

On the Sabbath after the wedding, the bridegroom is called up to the reading of the Law, and after the recital of the usual portion of the day, the passage Gen. xxiv. 1-7 is read by him and the ḥazzan alternately, verse by verse, in Hebrew and Aramaic. Verses from Isaiah lxi. 10-lxii. 5 are similarly added to the Hafṭarah (lesson from the Prophets). After the ceremony the guests are invited to a feast at the home of the bride, at which the poor sit above the rich; and the festivities are continued for seven days, the bride's parents defraying most of the expenses.

Other Ceremonies.

In case of adultery (Deut. xxiv.), bills of divorce, written in Hebrew, are given; but divorces are very rare. "Yibbum," the obligation to marry the childless widow of a deceased brother (Deut. xxv. 5, 6), is still observed by the Cochin Jews, as is the ceremony of Ḥaliẓah (Deut. xxv. 7, 10). Bigamy and polygamy are almost unknown among them.

The funeral and mourning ceremonies are observed in accordance with the prescriptions of the Shulḥan 'Aruk. Soon after a death the shirt of the chief mourner is torn from his body; and on returning from the cemetery, the funeral party, except the mourners, wash themselves and their clothes. During the seven days of mourning, the bereaved wear a piece of white cloth over the head, which the ḥazzan removes on the seventh day. On the seventh and twenty-ninth days, and at the expiration of the eleventh and twelfth months, the family visit the grave, and on the return home, selections from the Psalms, Mishnah, Torah, and "Hashkabah" are read, and the "Ḳaddish" is recited. The latter is repeated by the mourners for one year, with some intermissions at the beginning of the twelfth month.

All the Jews of Cochin buried their dead in one plot of ground until twenty-five years ago, when the White Jews, through the influence of the British agent of the Cochin raja's court, were allotted a separate place.

J. J. E.—J.

COCK: The male of the domestic fowl. The original habitat of the domestic fowl is generally supposed to be India, whence it was introduced at an early time into Babylonia and Greece. It is difficult to say when it was brought to Palestine, as the allusions to it in the Bible are still very doubtful. According to rabbinical tradition גבר (Isa. xxii. 17) is a designation for "cock," which was known under this name in various districts of Babylonia as late as the third century C.E. (Lev. R. v.; Midr. Mishle xxx.

19). The Jewish teacher of Eusebius also explained the word thus (see Eusebius' commentary on Isaiah, *loc. cit.*; compare, however, Ket. 28a and Yoma 20b, in both of which passages Abba Arika's opposition to this explanation is declared). Another term which, according to an amora of the fourth century, signifies "cock," is שכוי (Job xxxviii. 36), the statement being added that the cock bore a similar name about this time in Arabia (R. H. 20 a; Lev. R. xxv.).

The assumption of the Midrash (Midr. Mishle xxx. 31) that זרזיר (Prov. xxx. 31) is a designation for "cock" is more plausible than the foregoing explanations, since the Arabic "zarzar" means "cock." In the Talmud and in Midrashic literature, however, the cock is always called by his Babylonian name תרנגול (compare Oppert in "Zeitschrift für Assyriologie," vii. 339), which fact may be taken, perhaps, to indicate that the cock was introduced into Palestine from Babylonia. In this literature the cock is also frequently mentioned as a common domestic fowl, although it is expressly stated that at Jerusalem the breeding of cocks was forbidden during the existence of the Temple because they scratch the ground and pick up objects which are Levitically unclean, and are thus likely to spread uncleanness (B. Ḳ. 82b). The cock and the bat are contrasted as the bird of day and the bird of night. The cock and the bat were both waiting for daylight, when the cock said: "I may wait for the dawn, for light belongs to me; but for what do you need light?" (Sanh. 98b, bottom). The cock is characterized as the most impudent of birds (Beẓah 25b); his lasciviousness is also proverbial (Ber. 22a), yet his kind treatment of the female is set up as a model, inasmuch as he humors the hen to win her favor ('Er. 100b).

The comb is the cock's chief ornament, of which he is very proud, and when it is cut off he loses his spirit and no longer seeks the hen (Shab. 110b, bottom). The cock is also said to be quarrelsome and vicious (Pes. 113b), those from Bet Bukya having an especially bad reputation in this respect, as they suffered no intruders among them (Yeb. 84a). A cock once killed a child by picking at its scalp with its beak ('Eduy. vi. 1; Yer. 'Er. x. 26a). The crowing of the cock, as well as his flight, sometimes causes dishes to break (B. Ḳ. 17a; Ḳid. 24b).

The Cock in Folk-Lore.

The cock, which occupies a prominent place in the mythology of many peoples (compare Gubernatis, "Zoological Mythology," ii. 280–291), was an especially sacred bird among the Persians, where he was the ally of Sraosha in the battle with the powers of darkness. In Talmudic-Midrashic literature there are reminiscences among the pagans of the divine honors paid to the cock, as well as of the influence on the Jews of these ideas. The Mishnah ('Ab. Zarah i. 5) mentions the pagan custom of sacrificing white cocks, the Jews being forbidden for this reason to sell them to the pagans. The idol Nergal (II Kings xvii. 30) was taken by the Rabbis to be a cock (Sanh. 63b), which assumption was based probably on something more than the mere similarity of sound between "tarnegol" (cock) and "Nergal" (compare the cock-shaped Melek Taous of the Devil-worshipers; see Herzog's "Real-Encyklopädie," *s.v.* "Nergal"). The various theories found in Jewish literature on the crowing of the cock at the approach of day are probably traceable to Persian influence (compare Darmesteter's translation of the Zend-Avesta, in "Sacred Books of the East," i. 192, 193; Schorr, "He-Ḥaluẓ," i. 143, iii. 93, vii. 19).

The Greek Baruch Apocalypse says that the rustling of the wings of the phenix, a fabulous bird which accompanies the sun, awakens the cocks, "who then converse in the language peculiar to them"; for when the angels get the sun ready for the day the cock crows (ch. iv., end; compare Slavonic Enoch, xv. 1). As in the Zend-Avesta the cock is said to crow out to men early in the morning: "Arise, O men! recite the Ashem Yad va histen" (Vendidad, Fargard, xviii.), so the Zohar says that in the hour of grace (about midnight), when God visits paradise to confer with the souls of the pious, a fire proceeds from this holy place and touches the wings of the cock, who then breaks out into praise to God, at the same time calling out to men to praise the Lord and do His service (Zohar, Wayiḳra, iii. 22b, 23a). In this connection must be mentioned a precept of the Talmud to the effect that on hearing the cock crow in the morning, the following benediction must be pronounced: "Praised be Thou, O God, Lord of the world, that gavest understanding to the cock to distinguish between day and night" (Ber. 60b). This benediction is traced back to Job xxxviii. 36, where שכוי is derived from שכה ("to see"), and the cock is designated as the one who foresees the day. In the Zend-Avesta the cock is also called "parôdars" (he who foresees [the coming dawn]). Characteristic also is the statement in a late Midrash ("Seder Yeẓirat ha-Walad," in Jellinek's "B. H." i. 155) that the sobs of the dying at the sight of the angel who comes to take the soul are heard by no one except the cock. The favor in which the cock is held by the heavenly beings has perhaps also given rise to the statement that by closely watching the cock's comb one can determine the moment when God lays aside His mercy; this happens at some one moment during the first three hours of day, the color of the comb changing at that moment.

Superstitious speculations in regard to the cock were frequent during the Middle Ages. The cock is still killed as a "kapparah" for a man (see ATONEMENT); and the will of Judah the Pious directs that a cock which upsets a vessel shall be killed immediately, because evil spirits have seized it. The demons ("shadim") are said to have cock's feet (Ber. 6a). Many of these superstitions are still found among ignorant people in various countries. Thus, for instance, the scratching of the cock with his claws is taken to signify that visitors are coming. Compare HEN.

CODES. See LAWS, CODIFICATION OF.

CODICIL. See WILL.

CŒLE-SYRIA: The name, occurring in the Greek apocryphal writings, of a Persian province lying between Egypt and the Euphrates. In old editions it is given as "Celosyria." This name stands for the earlier expression "the country beyond the river" (Ezra iv. 10, R. V.; compare I Esd. ii. 17, 24, 27, R. V., "Cœle-Syria and Phenicia"; *ib.* vi. 29, "tribute of Cœle-Syria and Phenicia"; and *ib.* vii. 1, "the governor of Cœle-Syria and Phenicia"). II Macc. iii. 5, 8 speaks also of a single governor for both Cœle-Syria and Phenicia under Antiochus Epiphanes, so that the old Persian administrative division must have been retained.

The Greek term "Cœle-Syria" originally meant the valley between Lebanon and Anti-Lebanon, the modern Biḳa‘, called in the O. T. (Josh. xi. 17, xii. 7) "the valley of Lebanon." Greek writers extend that name vaguely and inconsistently to "the land from Seleucis [*i.e.*, northern Syria] to Egypt" (Strabo, p. 756), or to central Syria with Palestine except Judea proper (Strabo, p. 750), or with all Palestine (thus Polybius, v. 80, 86; while v. 87, like the apocryphal writings, distinguishes Phenicia from Cœle-Syria).

Josephus also varies in his use of the term, applying ("Ant." xiv. 40) "Cœle-Syria" to the valley, excluding Damascus, but (*ib.* xiii. 13, § 2 [Niese xii. 136]) including Palestine, east of the Jordan (*ib.* xiv. 154), Galilee, and (*ib.* xiv. 79) extending it to the Euphrates (this passage is, however, corrected by Niese). The Romans later used "Syria Cœla" for northern Syria.

COEN: Physician-in-ordinary at the court of Prince Vassile Lupu, hospodar of Moldavia from 1634 to 1654. The dates of his birth and death, and his given name, are unknown. E. Schwarzfeld is of the opinion that Coen was a descendant of Eliezer Cohen of Safed, who had settled in Poland, and one of whose sons, Moses, a rabbi and physician, escaped during the Cossack uprising in 1648 (Carmoly, "Hist. des Médecins Juifs," i. 245. Brussels, 1884). He stood high in favor with the Sultan of Turkey, and when Prince Lupu was in danger of being dethroned, through the intrigues of his enemies, Coen protected him. The sultan entrusted to Coen for transmission to Prince Lupu important documents concerning a secret alliance between Sweden and Russia, the object of which was a joint attack upon Turkey. The government of Venice sought his advice in matters of diplomacy, as appears from two letters of Giovanni Battista Ballarius to the Doge of Venice, dated at Constantinople Feb. 28, 1656, and Jan. 3, 1660. It was probably owing to Coen's influence that enactments in favor of the Jews of Moldavia were issued by Lupa.

S. H. R.

COEN, ACHILLE: 1. Italian soldier; born at Leghorn in 1851. He studied at the military academy of his native town, and was appointed lieutenant in the engineer corps at the age of twenty. Subsequently assigned to the sharpshooters, he was transferred to the staff and attached to the military section of the Geographical Institute at Florence. On his promotion to a captaincy he was appointed adjutant to General Heusch. In 1895, with the rank of major, he was sent, under General Baldissera, to join the army then operating in Africa. A few days before his arrival, however, the Italian commander, Baratieri, had provoked and lost the battle of Adowa. After the campaign Coen, promoted to the rank of lieutenant-colonel, was appointed director of the military section of the Geographical Institute. He has since been transferred to Cesena as commander of the Second Regiment of the Royal Brigade.

Coen is a knight of the Order of the Crown of Italy, and of the Order of Saint Maurice and Saint Lazarus. He has published numerous essays in technical journals and in the "Nuova Antologia," and also reports of work done at the Geographical Institute, notably "Venticinque Anni di Lavoro all'Istituto Geografico."

2. Italian historian; born at Pisa Jan. 5, 1844. At the age of twenty-three he was appointed professor of history at the Lyceum of Leghorn. In 1879 he was called as professor of ancient history to the Accademia Scientifica e Letteraria at Milan, and in 1887, in the same capacity, to the Istituto di Studi Superiori at Florence, taking charge also of the university library of that city. He is a knight of the Order of the Crown of Italy.

His published works include: "L'Abdicazione di Diocleziano" (Leghorn, 1877); "Di Una Leggenda Relativa alla Nascita e alla Gioventù di Costantino Magno" (Rome, 1882); "Manuale di Storia Orientale" (Milan, 1886); "Manuale di Storia Greca" (Milan, 1887); "Vezzio Agorio Pretestato" (Rome, 1888). He also published Aristophanes' "Clouds," with introduction and critical notes (Prato, 1871).

S. I. E.

COEN, BENJAMIN VITALE: Italian rabbi; born at Alessandria della Paglia in the second half of the seventeenth century; died at Reggio nell' Emilia in 1739. Descended from a wealthy and prominent family, Coen was elected rabbi of Casale while still a youth. He soon became known for his ability and erudition, and was chosen rabbi at Reggio nell' Emilia, at that time an important post. Among his disciples were Israel Bassano, his son-in-law, who succeeded him in the rabbinate, and Manasseh Joshua Padova, rabbi of Modena. Abraham Joseph Graziani wrote some verses in his honor.

Coen was the author of the following works: "'Et ha-Zamir" (The Time of Singing), hymns for all the feasts of the year, Venice, 1707; "Alon Bakut" (Oak of Weeping), a commentary on Lamentations, Venice, 1712; "Abot 'Olam" (The Fathers of the Universe), a commentary on the "Sayings of the Fathers," *ib.* 1719; "Gebul Binyamin" (The Border of Benjamin), a collection of sermons, Amsterdam, 1727; "Notes on the Toẓe'ot Ḥayyim," published together with the text; "Gishme Berakah" and "Pitḥe She'arim," responsa on the Shulḥan 'Aruk, still extant in manuscript; a number of scientific letters inserted in the "Iggeret Harmag";

and ritual decisions scattered throughout the "Paḥad Yiẓḥaḳ" and "Shete ha-Leḥem."

G. I. BR.

COEN, GIUSEPPE: Italian painter; born in Ferrara 1811; died in Venice Jan. 26, 1856. He was descended from an old and distinguished family. As a boy he evinced a predilection for music and painting, and studied art without having any particular career in view. Orphaned at an early age, he was forced by circumstances to choose a profession. He followed the style of Canaletto, the Venetian landscape and architectural painter. His picture, "The Façade of the Cathedral in Ferrara," was exhibited in 1840 in Venice, and won for him considerable approbation. In 1841 his native city, Ferrara, awarded him a silver medal in appreciation of his labor for art.

To perfect himself in his art he went to Rome in 1843, and won the friendship of Massimo d'Azeglio, the painter, statesman, and author. Returning to Ferrara, he received many important commissions, one being from the Duke of Brunswick. In 1850 he removed to Venice, and was one of the first to practise artistic photography. His views of Venice were awarded a medal at the Paris Exposition of 1855.

In Ferrara, Coen enjoyed extraordinary popularity, his house being a literary and artistic center. He was one of the first Jews in Ferrara to be elected (1849) to the town council.

S. I. E.

COEN, GRAZIADIO VITA ANANIA: Italian rabbi and scholar; born at Reggio nell' Emilia about 1750; died March 28, 1834. He studied under Sansone Naḥmani and Isaiah Vita Carmi. He established in his native city a school that produced several rabbis, among whom D. J. Maroni deserves special mention. Coen preached not only at Reggio nell' Emilia, but also in the neighboring communities. In 1825 he was called as chief rabbi to Florence, where he founded a Hebrew printing-press.

His works include: "Ḥinnuk la-Na‘ar" (Instruction for the Boy), 2 vols., Reggio, 1804; Venice, 1805; 6th ed., Leghorn, 1880; "Liḳḳuṭe Messektot"; "Sha‘are ha-Talmud" (Doors of the Talmud), Reggio, 1811, a collection of treatises; "Reshit Leḳaḥ" (Beginning of Doctrine), Reggio, 1809, a handbook of elementary instruction in Hebrew and Italian; a Hebrew-Italian dictionary, entitled "Ma‘aneh ha-Lashon" (Answer of the Tongue), *ib.* 1812; a Hebrew grammar, "Diḳduḳ Leshon ha-Ḳodesh," Venice, 1808; "Shebile Emunah" (Ways of Faith), another pedagogical work; "Zemirot Yisrael" (Songs of Israel), Leghorn, 1793; "Ruaḥ Ḥadashah" (The New Spirit), Reggio, 1822; "Saggio di Eloquenza Sacra del Dott. Anania Coen Rabbino"; "Della Poesia Rabbinica," 2 vols., Florence, 1828; "Della Poesia Scritturale," Reggio (n.d.), containing some of his own poems.

COEN, JACOB: Eldest son of Abraham Coen, and receiver-general ("contador mayor") of Count Maurice of Nassau, Stadtholder of the United Provinces of the Netherlands, 1584–1625. Although the Jews of Holland did not possess rights of citizenship, Maurice, rising above the prejudices of his time, and in grateful remembrance of the great services of Abraham Coen, bestowed upon the latter's son the above-mentioned office.

D. S. MAN.

COEN, JAN PIETERSZOON: Governor-general of Java, and founder of the Dutch colonial system; born at Hoorn, Holland, Jan. 8, 1587; died in 1629. He gained his early commercial experience with the firm of Piscatori in Rome, went to India on a commercial exploration in 1607, and made a second voyage with two ships in 1612. He was appointed director-general of the Indian trade in 1613. As governor-general of Java, he destroyed (1619) the native town of Jacatra, and founded Batavia, the capital of the Dutch East Indies. He died childless in 1629, and his large possessions went for the benefit of orphans in his native town of Hoorn, subject to a bequest in favor of members of his family, which seems to have been some time later successfully claimed.

Coen is said to have been of Jewish descent. The biographies, while printing voluminous details of his career as governor-general, are singularly reticent in regard to his parentage. The name or occupation of his father is not found, though one would have expected these facts to be recorded of so eminent a man. Perhaps as a convert he endeavored to conceal them. His portrait in Valentyn's "History of Java" and in Müller's "Golden Age" might well be that of a Jew. Abbing's "History of Hoorn" gives chiefly negative evidence on the subject of Coen's Jewish connection. The question of his extraction must be left undecided.

D. A. R.

COEN, JOSEF DI MICHELE: One of the Jewish boys of Rome baptized under Pope Pius IX.; born 1854. In 1864 he was apprenticed to a shoemaker. Sent by his master to deliver a pair of shoes at the house of a priest, the boy was seized and dragged to the Casa dei Neofiti, where he was detained for baptism. The papal authorities refused to surrender him, in spite of the protests of his father and of the Jewish community.

The affair caused a stir throughout Europe, particularly in France, the French ambassador, Count Sartigues, protesting vehemently in the name of his government. To his remonstrances the papal government replied that the child had himself determined to turn Christian, and that it was not the function of the pope to interfere with such a resolution. The pope, in examining into the case, is said to have asked Coen whether he embraced Christianity of his own free will. The boy replied that he preferred a religion which provided him with fine clothes, good food, and plenty of toys, to his poor family and the shoemaker's shop. This reply convinced the pope of the sincerity of the convert's intentions; and accordingly, on St. Michael's Day, Sept. 29, 1864, the baptism of Coen was celebrated in St. Stanislaus Chapel, Cardinal Caggiano officiating, and Count De Maistre being godfather. The neophyte received the name of Stanislaus Maria Michael Joseph Pius Eugenio.

The sufferings of Coen's family, caused by his capture, were excessive. His eighteen-year-old sister died as a result of the excitement; his mother became insane and was taken to relatives in Leghorn; and his father had to leave Rome in order to escape the persecution of the government. Another Jew was thrown into prison because he said he had seen Coen at the window of the Casa. Moreover, as a result of the affair, a Christian mechanic caused the forcible baptism of an eight-year-old Jewish boy.

It was only on the fall of the papal government in 1870, and after energetic measures had been taken by the Italian government, that Coen was released and restored to his mother in Leghorn, his forcible detention having extended over seven years.

s. A. R.

COEN, MOSES VITA: Banker at Ferrara, Italy, in the eighteenth century. He often transacted business with Pope Clement XIII. and with his successor, Clement XIV. On Feb. 22, 1764, Clement XIII. requested Coen to provide the papal government with as much corn as possible and with 4,000 sacks of Indian wheat, to be shipped either at Ancona or at Civita Vecchia, leaving the price to be settled by him.

Especially intimate were Coen's relations with Pope Clement XIV., whose confidential friend and adviser he became. He consequently shared in the lampoons directed against Clement. During the famine of 1772–73 Coen came to the rescue of the government and furnished it with 5,000 sacks of Indian wheat.

During the French invasion of 1798 Coen was one of the commission of six appointed to sell the property confiscated by the provisional government.

COEN, RAFFAELO DEL FU VITALE: Austrian physician; born at Spalato, Dalmatia, Jan. 19, 1839. He was educated at the gymnasium of his native town and at the University of Vienna, whence he was graduated as doctor of medicine in 1872 whereupon he commenced to practise in the Austrian capital as a physician and as a specialist in impediments in speech. In 1882 he opened a private dispensary and hospital for stammerers.

Coen has written essays for the "Medizinisch-Chirurgische Centralblatt in Wien," "Wiener Medizinische Presse," "Medizinisch-Pädagogische Monatsschrift für die Gesammte Sprachheilkunde," and other medical journals. He is the author of several books, among which are "Pathologie und Therapie der Sprachanomalien," Vienna, 1886; "Die Hörstummheit," *ib.* 1887; "Specielle Therapie des Stammelns," Stuttgart, 1889; "Uebungsbuch für Stotternde," Vienna, 1891.

COEN-CANTARINI. See Cantarini.

COFFEE: A decoction of the berry of the *Coffea Arabica*, supposed to be indigenous to Abyssinia, and introduced into Arabia in the fifteenth century. It soon came into common use throughout Islam, and was thence introduced into European civilization. Among the Jews of Egypt it became so popular as to be known as "the Jewish drink" (A. Isaaci, Resp. i. §§ 2, 3). In London, England, it is generally stated to have been introduced from Constantinople in 1652 by a Greek named Pasqua Rossie, who started the first coffee-house in St. Michael's Alley, Cornhill; but according to Anthony A. Wood ("Diary," p. 19), Jacob, a Jew, sold coffee at Oxford two years before. The coffee-plant was introduced by the Dutch into Java about 1690, Surinam about 1718, and Jamaica in 1728. In the last two places Jews were largely instrumental in the development of the trade, with which they have been connected throughout its history, the largest holders of the berry in 1902 being the firm of Lewisohn Brothers of New York.

Many questions of Jewish law have been raised in regard to the use of coffee. Isaac Luria would not drink coffee prepared by Gentiles, and in this was followed by Ḥayyim Benveniste, who, however, permitted others to drink it. It has been decided that coffee may not be drunk before morning prayers, though water may; it had previously been drunk so early, especially in Egypt, as an antidote to influenza. Coffee is permitted on Passover, and even at the Seder service in addition to the four cups of wine that may be drunk. Jacob Marx of Hanover permitted the use of acorn coffee on the Passover, though the use of chicory was forbidden. If coffee is taken after the grace after meals, no benediction is necessary before tasting it, though some authorities demand one after it has been consumed. The drinking of coffee in coffee-houses on Sabbath was generally prohibited.

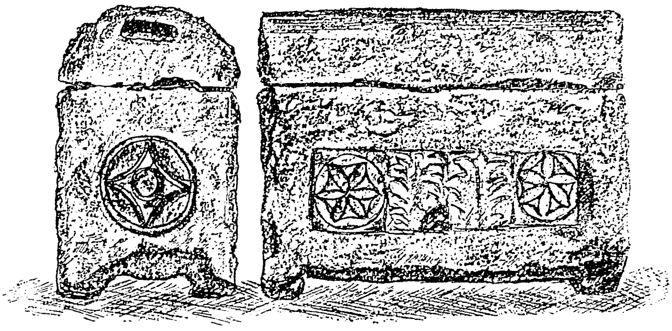
J.

COFFIN: The custom of using coffins is probably borrowed from the Egyptians. It is recorded of Joseph that he was "put in a coffin in Egypt" (Gen. l. 26). Tradition says it was of metal (Soṭah 13a). Both the Ark of the Covenant and the coffin are called, in Hebrew, "aron." The Talmud says that the "aron" (coffin) of Joseph was carried side by side with the "aron" (Ark) containing the Tables of the Law, so as to express the idea that "the one in this observed what is written upon the other" (Soṭah 13a *et seq.*).

From the verse "Adam and his wife hid themselves . . . amongst [literally, "within"] the trees of the garden" is derived the custom of burial in a wooden coffin (Gen. R. xix.).

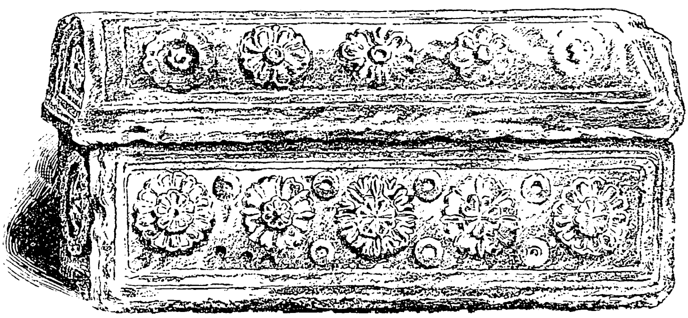
Talmudic Practise.

Rabbi Judah ha-Nasi, in his will, ordered that a hole be made in the bottom of his coffin (Yer. Kil. vi.). Rabbi Jose b. Ḳisma, in his will, requested his disciples to bury his coffin deep in the ground, for fear of desecration, as he said there was not a coffin in Palestine which was not used as a feeding-trough for Persian horses (Sanh. 98a *et seq.*). To prevent such abuse, the Jewish law prohibited any one from deriving plunder from a coffin or burial-clothes. A coffin must not be used for secular purposes. A coffin out of use, if of stone or earthenware, must be broken up; if of wood, it must be burned (Shulḥan 'Aruk, Yoreh De'ah, 363, 5).



Stone Coffin Found in an Ancient Tomb at Lydda by M. Clermont-Ganneau.
(In the Louvre.)

It appears, however, that the coffin was originally used for the purpose of transporting a corpse to a distant place of burial; and whenever the cortège passed, the mourning regulations were observed by the multitude (M. Ḳ. 25a). Bar Ḳarya and R. Lazar (=Eleazar b. Pedath), both Palestinian rabbis, had noticed the approach of funeral parties, from the direction of Babylon, bearing corpses in coffins for burial in the Holy Land. Bar Ḳarya asked, "What have they gained [by living away from, and being buried in, Palestine]?" and quoted from Jeremiah (ii. 7), "Ye entered, ye defiled my land and made mine heritage an abomination." "But," answered R. Lazar, "as soon as a clod of earth of the Holy Land is put on the coffin, there is applicable the passage" Deut. xxxii. 43: וכפר אדמתו עמו [="His land will atone for His people]" (Yer. Kil. end; Ket. 35b; compare Bacher, "Ag. Pal. Amor." ii. 3).



Ornamented Stone Coffin Found in an Ancient Tomb Near Jerusalem.
(In the Louvre.)

Method of Burial.

It was considered an honor for the deceased to be carried from the death-chamber on a litter ("miṭṭah") to the place of burial, and a greater honor, usually reserved for scholars, to be borne on the death-bed itself. In the case of R. Hunah it was necessary to enlarge the exit from the house to make room for the passage of his bed, his removal to a smaller bed not being permitted (M. Ḳ. 25a). Maimonides says that the body should be buried in a wooden coffin ("Yad," Ebel, vi. 4). On the other hand, Naḥmanides, in order that the words of the passage "Thou art dust, and unto dust shalt thou return" may be literally fulfilled, declares that according to the Talmud the coffin is for the skeleton after the flesh is consumed, and that the bottom of the coffin should be removed, as in the case of Rabbi (quoted by Caro in Bet Joseph to Ṭur Yoreh De'ah, 362). In some countries it is customary to bury the dead in hammocks, and, after the flesh is consumed, to deposit the bones in a coffin (Shulḥan 'Aruk, *ib.* 363, 4). In other countries the dead are buried on simple boards, or placed directly in the ground (see Burial), a distinction being made only in case the dead is an Aaronite or of noble parentage. In modern times the use of coffins at every burial is insisted on.

Customs.

Isaac Lampronti, in his Paḥad Yiẓḥaḳ (letter "Mem," p. 229), tells of a decision of 1678, in the case of Bizancia, the wife of Judah Ḥayyim of Corfu, who had requested her granddaughter, Semiralda, to place her (Bizancia's) head-dress in her coffin. Semiralda had, however, forgotten to do so; and a cabalist rabbi permitted the opening of the coffin in order to relieve her distress. The opening of the coffin was accompanied by prayers and ceremonial apologies to the dead for being disturbed. The almost universal former custom of putting the dead in a plain, unpainted wooden coffin covered with black cloth has been abandoned in modern times; and distinction is made, much against Jewish tradition, between rich persons and poor by more or less decorated coffins. Sometimes the bottom of the coffin is removed in order to bring the body into contact with the earth, for reasons stated above. In Jerusalem it is customary to carry the body on a litter to Mount Olivet, building in the grave a coffin of uncemented stone slabs, with sides and a top, but with no bottom, and covering the enclosure with earth (see Burial).

Bibliography: Lamprouti, *Paḥad Yiẓḥaḳ*.

K. J. D. E.

COHEN, the name (כהן): The most usual surnames of European Jews. It indicates a family claiming descent from Aaron, the high priest. "Cohen" is the usual transliteration and orthography in English-speaking countries; but "Cowen" and "Cowan" also occur in England, while America has developed the forms "Cohan," "Cohane," "Cohne," "Cohe," "Coon," "Kan," and "Koon." In Germany and Austria the forms "Cohn," "Conn" "Kahn," "Kohn," and others are met with; while it is probable that "Köhne" and "Kohner" also represent the recurring surname, which also occurs as a part of the names "Cohnheim" and "Cohnfeld." The French forms are represented by "Cahn," "Cahen," "Cahun," "Caen," and "Cain," or "Kahn," while Italy uses "Coen," and Holland "Cohen." The curious form "Coffen," in which the "ff" represents the aspirate, occurs in old Spanish records; and "Kahin" is the usual Arabic representation. The most numerous variants occur in Russia, which supplies "Cahan," "Cahana," "Kahan," "Kahana," and "Kahane," "Kagan," "Kogan," "Kogen," "Kohan" (the last two being Aramaic forms), besides the extended forms "Kohnowski" and "Koganowitch." The name also occurs in duplicated forms, only one of which need be mentioned here; namely, "Kohn-Ẓedeḳ." This form is often abbreviated to Kaz, "Katz," (כ״ץ) which is thus a variant of "Cohen."

Though claiming to be descended from a single person, the Cohens of to-day form rather a clan than a family. In Jewish religious life they have certain privileges and responsibilities: these are dealt with under Priest and Priesthood. Not all of those who are, in the religious sense, Kohanim bear the name "Cohen." In a way, the name is not strictly a surname, but an indication of hereditary office.

The number of those who bear the name "Cohen" in its various forms is a considerable proportion of all Jews. Among the English Jews they form about 3 per cent; whereas on the continent of Europe, according to Lippe's "Bibliographisches Lexikon," they are only 2.3 per cent. In the 12,000 names contained in the lists of subscribers to the five chief Jewish charities of New York and Brooklyn, the Cohens, with the variant names, make up about 220, or less than 2 per cent. This relation of the number bearing the name "Cohen" to the total number of Jews in a list may be utilized to ascertain roughly the number in a much greater list. Thus, in the Brooklyn directory for 1900 there were 428 Cohens, which would indicate about 20,000 Jewish names in that directory.

How far this large proportion of Jews can claim a direct descent from Aaron is a matter of dispute. According to Jewish law, a Cohen may not marry a proselyte; accordingly, it would seem impossible that any admixture should occur among the Cohens. But they are allowed to marry the daughters of proselytes; and this would affect the purity of the Cohen descent. On the other hand, it is unlikely that any person would have assumed the name "Cohen" without cause, as several disabilities go with the descent. Thus, Cohens may not approach a dead body; and for this reason persons of that name are not welcomed as ministers in small congregations, and more rarely adopt the medical profession. Isaac ben Sheshet, of the fourteenth century, distinguished between the ancient and modern Cohens, declaring that it was only usage and not law which maintained the rights and responsibilities of the modern Cohens (Responsa, No. 94). Samuel de Medina, of the sixteenth century, agrees with this view, and assumes the impurity of the Cohen descent in discussing the validity of a marriage (Responsa, No. 235). Solomon Luria thinks it impossible for the Cohens to have preserved their purity of descent throughout the wanderings of the Jews. Jacob Emden recommends a Cohen to refund the five shekels given him for the redemption of the first-born, because he can not be sure of his origin and of his claim to the money. It has even been declared that some Cohens must not say the priestly blessing ("Magen Abraham," 201, 4; "Kerethi u-Pelethi," 61, 6).

E. C. J.

COHEN: A Baltimore family, originally from Bavaria, which has occupied an important place in the Jewish community and in municipal life since the early years of the nineteenth century. Its first representative in America was Jacob I. Cohen, who came from Oberdorf, near Nördlingen, Bavaria, in 1773, and settled in Lancaster, Pa. Thence he removed to Charleston, S. C., and, after serving in the Revolutionary war, to Richmond, Va. Here he was joined, in 1787, by his brother, Israel I. Cohen, whose wife and seven children—the oldest son being eighteen years of age—went to Baltimore in 1808. The children were Jacob I. Cohen, Jr., Philip I. Cohen, Mendes I. Cohen, Benjamin I. Cohen, David I. Cohen, Joshua I. Cohen, and Miriam I. Cohen.

The older sons soon participated in public life. In 1812 the name of **Philip**, and in 1822 that of Jacob, Jr., appear in the list of members of the exclusive organization, The Ancient and Honorable Mechanical Company of Baltimore. In the War of 1812–14 Philip and Mendes were members of Captain Nicholson's Company of Fencibles, and served in the defense of Fort McHenry during its bombardment. At his death, in 1852, Philip was postmaster of Norfolk, Va.

With the exception of Philip, all the brothers remained in Baltimore. The oldest, **Jacob, Jr.** (1789–1869), was the founder of the banking house of J. I. Cohen, Jr., & Brothers, and was identified with the struggle for political rights of the Jews in Maryland (1818–26). This struggle terminating favorably to his coreligionists, Jacob was immediately elected (Oct., 1826) as the representative of the sixth ward in the first branch of the city council. He was repeatedly elected to this body; and for several successive years he acted as its president.

For the first nine years (1830–38) of its existence he served the board of public school commissioners as secretary and secretary-treasurer. Jacob was also one of the projectors of the Philadelphia, Wilmington, and Baltimore Railroad, and for a long time its vice-president, remaining a director until his death. He was also a director of the Baltimore and Ohio Railroad, and for twenty years president of the Baltimore Fire Insurance Company, besides being prominent in many public-spirited enterprises.

The third brother, Col. **Mendes** (1796–1879), after his retirement from the firm in 1829, traveled extensively in Europe and the East, and brought back with him the objects that form the Cohen collection of Egyptian antiquities in the Johns Hopkins University. He served a term in the Maryland House of Delegates (1847–48), was vice-president of the Hebrew Benevolent Society for over twenty years, and was prominently identified with the establishment of a Jewish hospital in Baltimore.

The sixth brother, **Joshua** (1801–70), was a physician, and one of the earliest aurists—perhaps the first—in the United States. He occupied the position of professor of geology and mineralogy in the academic department of the University of Maryland, was president (1857–58) of the Medical and Chirurgical Faculty of Maryland, and a member of the American Philosophical Society. Together with a friend, he established an eye and ear institute in Baltimore. He has left one publication, "Post-Mortem Appearances in a Case of Deafness." His library, interesting to Biblical students, is preserved at the family residence.

A son of the fifth brother, David I., is **Mendes** Cohen (b. 1831), a distinguished civil engineer, now (1902) living in Baltimore. His career began in the locomotive works of Ross Winans. From 1851 to 1855 he was one of the engineering corps of the Baltimore and Ohio Railroad. From 1855 to 1875 he served the following companies either as assistant superintendent, superintendent, comptroller, or president: the Hudson River Railroad, the Ohio and Mississippi Railroad, the Philadelphia and Reading Railroad, the Lehigh Coal and Navigation Company, and the Pittsburg and Connellsville Railroad. During 1892–93 Mendes was president of the American Society of Civil Engineers, and in 1894 President Cleveland appointed him a member of the board to report upon a route for the Chesapeake and Delaware Ship Canal. Since 1884 he has been corresponding secretary to the Maryland Historical Society; since 1892, a member of the Municipal Art Commission of Baltimore; since 1893, a member of the Sewerage Commission of Baltimore; and since 1897, one of the vice-presidents of the American Jewish Historical Society.

A. H. S.

COHEN, ABNER: The pioneer of Krugersdorp, Transvaal Colony; born about 1860; emigrated to South Africa in 1881; worked his way north, and fell in with the Boers, learning their language and trading with them. On his way to Johannesburg in 1887, he pitched his tent on a great heap of stones seventeen miles to the west of the town, which became the site of the town of Krugersdorp. He was thus the first English settler in the town, and has done much toward its development. Cohen has also taken a share in the opening up of Bulawayo and Rhodesia.

Though taking no part in the conspiracy against the Boer government in 1895, he was intimate with members of the Reform Committee, and owing to some indiscreet remarks was for some time imprisoned.

As president of the Krugersdorp congregation, Cohen obtained from President Kruger two valuable freehold sites for the Jewish community.

COHEN, ABRAHAM. See Abraham ben Moses Cohen.

COHEN, ABRAHAM: Assistant rabbi in Tunis; died 1840 at Safed, whither he had made a pilgrimage in his old age. He was a grandson of one of the earliest rabbis in Tunis. His book, "Abraham Yagel" (Abraham Will Rejoice), a work loosely arranged both as to form and contents, was published at Leghorn in 1843. It consists of commentaries on various treatises of the Talmud, together with notes on parts of the Bible, and on Maimonides and other legal codes.

COHEN, ALFRED J. (better known under the nom de plume of **Alan Dale**): American dramatic critic; born May 14, 1861, at Birmingham, England, where he attended King Edward's School. Then followed three years' study of dramatic art in Paris, after which (1887) Dale went to New York and began his journalistic career on the "Evening World." The independence, brightness, and acerbity of his criticisms soon attracted attention, and made him the most feared dramatic critic in the American metropolis. In 1895 he joined the "Journal," and increased the scope of his work by a broader and more liberal view of things theatrical—a change brought about by experience.

Dale is the author of several novels: "Jonathan's Home," London, 1885; "A Marriage Below Zero," New York, 1889; "An Eerie He and She," *ib.* 1889; "An Old Maid Kindled," *ib.* 1890; "Miss Innocence," *ib.* 1891; "Conscience on Ice," Chicago, 1892; "My Footlight Husband," New York, 1893; "A Moral Busybody," *ib.* 1894; "His Own Image," *ib.* 1899; and "A Girl Who Wrote," *ib.* 1902. He also wrote "Familiar Chats with Queens of the Stage," *ib.* 1890.

COHEN, ANNE-JEAN-PHILIPPE-LOUIS, DE VINKENHOEF: French litterateur; born at Amersfort, in the Netherlands, Oct. 17, 1781; died in Paris April 6, 1848. Beginning as a journalist, he contributed to the "Etoile." He went to

Paris in 1809, and was appointed censor for foreign languages in 1811, and librarian of the Bibliothèque Ste. Geneviève in 1824. He was the compiler of several catalogues, and also contributed to various papers, including "L'Ami du Roi," "Les Annales de la Littérature et des Arts," and translated works by French, Swedish, English, Russian, and Italian authors, as "La Symbolique Populaire," by Buchmann; "Histoire des Institutions d'Education Ecclésiastique," by Theiner; "Scènes Norvégiennes," by Bremer; and "Histoire de la Conquête de Grenade," by Washington Irving, 1829. He also contributed the "Théâtre Hollandais" to the "Collection des Théâtres Etrangers."

In addition Cohen published a number of works, among which were: "La France telle que M. de Kératry l'a Rêvée," Paris, 1821; "Herminie de Civray," 4 vols., 1823; "Histoire de Pierre Terrail, Dit le Chevalier Bayard," 1821 and 1825; "Jacqueline de Bavière, Dauphine de France," 4 vols., 1821; "Précis Historique sur Pie VII.," 1823; "La Noblesse de France, Histoire, Mœurs, et Institutions," 1845; "Réflexions Historiques et Philosophiques sur les Révolutions," 1846.

COHEN, ARISTIDE FÉLIX: French author; born at Marseilles Dec. 31, 1831; died in Paris Feb. 17, 1896; brother of the composer Jules Cohen. He was made auditor of the Conseil d'Etat on May 28, 1855, and held this position until 1865. His works include: "Etudes sur les Impôts et sur les Budgets des Principaux Etats de l'Europe," 1865; "La Flamboyante," a comedy in three acts, written in collaboration with Ferrier and Valabrègue, 1884; "Le Club," 1887; "Frappant!" a story in verse after the Provençal poet Bénédit, 1887; "La Revanche du Mari," a vaudeville, 1890; "Marion," a comedy, 1892; and "Le Duc Jean," 1893.

S. J. W.

COHEN, ARTHUR: English barrister and king's counsel; born in London Nov. 18, 1830. After three years' study at the gymnasium in Frankfort-on-the-Main, he entered as a student at University College, London. Thence he proceeded to Cambridge at a time when it was almost impossible for a Jew to gain admission into the colleges. At length he was received into Magdalen College. In 1852 he was elected president of the Cambridge Union Debating Society. At Cambridge Cohen had a successful career, coming out fifth wrangler in the mathematical tripos; but he was prevented from taking his degree till after the repeal of the Test Act in 1871.

Cohen then read law; and five years after he had been called to the bar, he established for himself a reputation in shipping and insurance cases. Among several important appointments was his selection to represent the interests of England in the famous arbitration case connected with the "Alabama" at Geneva in 1872. Returning to England after the completion of the case, Cohen in 1874 unsuccessfully contested Lewes in the Liberal interest. But in 1880 he was elected for the Southwark division, and shortly afterward was offered a judgeship, which, however, he declined, though later he became a judge of the Cinque Ports. He has been for many years standing counsel for his university. He has often represented foreign governments in disputes before the English law courts, as, for example, the Japanese government in an important case against the Peninsular and Oriental Steam Navigation Company.

Cohen has held various important positions in the London Jewish community. For many years he was president of the Board of Deputies, succeeding his uncle, Sir Moses Montefiore; but he resigned the position in 1894. He has been a vice-president of Jews' College, and for many years president of the borough Jewish schools.

J. G. L.

COHEN, BENJAMIN LOUIS: English politician and communal worker; member of Parliament for East Islington since 1892; born in London in 1844; son of Louis Cohen, founder of the firm of Louis Cohen & Sons, which he joined on reaching manhood. Cohen was educated privately, and on reaching maturity began a philanthropic career, both Jewish and general, especially interesting himself in technical education. He is a governor of St. Bartholomew's, Bridewell, and Bethlehem hospitals; life member and former vice-president of the Council of the United Synagogue; was president of the Jewish Board of Guardians from 1887 until June, 1900, and during his presidency arranged the transfer of the institution from its old quarters in Devonshire street to Middlesex street. Cohen has also been a member of the Jewish Board of Deputies, one of the presidents of the Hand-in-Hand and Widows' Home, the London Orphan Asylum, and vice-president of the Orphan Working School.

In 1888 Cohen was elected as a "Moderate" to the London County Council for the city, and in 1892 entered Parliament. Besides discharging these multifarious duties, Cohen was one of the original members of the Russo-Jewish committee, and acted as its treasurer till 1887.

COHEN, BENOIT: Philanthropist; born 1798 in Amsterdam; died in Paris July 15, 1856. He went to Paris as a young man, and entered upon a successful business career, devoting a great deal of his time and energy to the affairs of the community. He was president of the Board of Jewish Charities of Paris, honorary president of the Rothschild Hospital in the Rue Picpus, and he addressed himself in behalf of the community, often with success, directly to King Louis Philippe and to the Duke of Orleans. Cohen was also a member of the Jewish consistory, and the founder, as well as the most active worker, of the Société des Amis du Travail, which had for its object the assistance of children toward an honest career as mechanics or artisans.

COHEN, DAVID DE LARA. See LARA, DAVID COHEN DE.

COHEN, EDWARD: Australian statesman; born in London 1822; died March, 1877. He received his early education in Australia, and entered into business as a partner in his father's firm. Shortly after his arrival in Victoria in 1846, he purchased an auctioneer's business at Melbourne, in which he remained till 1868, and which became one of the leading concerns in the city.

Cohen soon became connected with the charitable institutions of the colony. He was for twenty years treasurer of the Melbourne Hospital, and for seven years president of the Melbourne Hebrew congregation. He was an alderman of the city, and in 1872 served as mayor of Melbourne. His activity in the council soon brought about a financial inquiry which led to drastic reforms in the arrangement of the city accounts.

In 1861 Cohen was elected member of Parliament for East Melbourne, which constituency he represented for many years. A free-lance in politics, his arguments in debate carried weight, and his large mercantile experience lent them additional force. He was a director of the Hudson's Bay Railway Company and of the Colonial Bank, and was an active initiator of colonial industries. Cohen was at one time a member of the Victorian ministry, in which he filled the office of commissioner of customs.

J. G. L.

COHEN, ELIAS (better known as **Elias Pasha**): Turkish physician; born in 1844. He belongs to a family many members of which have been distinguished in medicine. His early studies were completed at the Jewish communal school founded at Constantinople by the Camondo family. He entered the imperial school of medicine in 1861, graduating six years later as doctor of medicine, and proceeding in 1868 to western Europe to continue his professional studies. He resided at Berlin until 1871, acting while there as assistant to Professor Von Graefe, and attending the clinics of Virchow, Traube, and others. On the outbreak of the Franco-Prussian war he continued his studies in Vienna.

Cohen returned to Constantinople in 1873, and was appointed professor at the military school at Haïdar-Pasha. Soon after he was sent to Monastir, the headquarters of the third army corps, as oculist and chief surgeon. On being recalled to Constantinople, he was attached to the central naval hospital, and given the rank of major in the imperial service. His vast knowledge and high reputation in the capital gave rise to jealousies in influential circles, and he was obliged to resign.

It was after Cohen had left the service that he was summoned to attend one of the imperial princesses. The rapid success of his treatment attracted the attention of the sultan, who appointed him court physician with the rank of lieutenant-colonel. Two years later he was promoted to the rank of general, being the first Turkish Jew to occupy this high position. It was then that the sultan appointed the new pasha as his private physician. In 1888 he was appointed to the faculty of medicine at Constantinople as professor of dermatology, and became, in 1894, member of the Superior Sanitary Commission, then created.

Elias Pasha is decorated with the grand ribbons of Medjidie and of the Osmanie, the Imtiaz Liakat medals, the Turco-Grecian war medal, etc.

Elias Pasha has always taken the liveliest interest in the welfare of his coreligionists, and has given on several occasions signal proofs of his solicitude. In 1885, owing to an alleged ritual murder, the Greek and Armenian population of Kadikeuy, a thickly populated suburb of Constantinople, threatened the Jews with wholesale massacre. Several Jews, indeed, fell victims to the fury of the fanatics; and the movement was assuming grave proportions, when Elias Pasha, with the authority of the sultan, intervened on behalf of his brethren. Rigorous measures were adopted to repress the émeute, and the guilty persons were sentenced to severe punishment.

COHEN, ELLEN GERTRUDE: English painter; studied at the Slade and Royal Academy schools, London, and in Paris under Constant and Laurens; first exhibited at the Academy in 1891, her work being a portrait medallion of Dr. B. W. Richardson. In Paris she exhibited at the Salon (Champs Elysées) from 1894. The pictures by her, shown at the Royal Academy, were "Tired Out," in 1892; "Dibbling for Chub," in 1897; and "Qualifying for the Coach Club," in 1899. She is also a constant contributor to the exhibitions held by the Royal Institute of Painters in Water and Oil Colors.

As an artist in black and white Miss Cohen has contributed to many magazines and papers, including the "Pall Mall," "Queen," and "Pictorial World." Her Parisian experiences, written as well as sketched by her, appeared in "The Strand Magazine" and "The Studio."

COHEN, EMIL WILHELM: German mineralogist; born at Aakjaer, near Horsens, Jutland, Oct. 12, 1842. He studied at the universities of Heidelberg and Berlin, and from 1867 to 1869 was assistant at the mineralogical institute of the former seat of learning. In 1871 he was appointed privatdocent, but resigned the position early the next year, when he went to South Africa on a tour of geological and mineralogical research. Cohen visited the Vaal River diamond-diggings and the newly discovered mines in that part of Griqualand West now known as Kimberley. Thence he went north to the Lydenburg district, emerging eventually at Delagoa Bay. This trip consumed a year; and on his return to Germany he published "Bemerkungen zur Routenkarte von Lydenburg nach den Goldfeldern und nach Delagoa Bai" (1875). In 1878 Cohen was appointed assistant professor of petrography at Strasburg and a member of the geological commission of Alsace-Lorraine. Seven years later he became professor at Greifswald.

Cohen is the author of "Die zur Dyas Gehörigen Gesteine des Südlichen Odenwaldes," 1871; "Geognostische Beschreibung der Umgegend von Heidelberg," 1874–81; "Mikrophotographien," 1880–1884; "Zusammenstellung Petrographischer Untersuchungsmethoden," 3d ed., 1896; "Structur und Zusammensetzung der Meteoreisen," 1886–87; "Meteoreisenkunde," I., 1894. Cohen published in addition over one hundred essays in various scientific magazines of Germany and other countries.

COHEN, FRANCIS. See Palgrave, Francis.

COHEN, FRANCIS LYON: English rabbi, author, and expert on Hebrew music; born at Aldershot Nov. 14, 1862, and educated at Jews' College and University College, London. Cohen became minister of the congregation in South Hackney (1883–1885), then of that in Dublin (1885–86), and since 1886 has officiated at the Borough New Synagogue, London. In 1886 he was appointed tutor in Jews' College; in 1892 he became acting chaplain to the Jews in the British army; and in 1896 staff chaplain to the Jewish Lads' Brigade, the formation of which he was the first to advocate. He has also acted as editor to the choir committee of the United Synagogue. Cohen has organized military services on Ḥanukkah at his own and other synagogues, and altogether has done much to promote the patriotic and military ardor of English Israelites. He is the author of "The Handbook of Synagogue Music," 1889, and, with D. M. Davis, of "The Voice of Prayer and Praise," 1899. In addition, he has written numerous articles on Jewish music, among which have been the following: "Synagogue Music; Its History and Character," in "The Jewish Chronicle," 1883; "Synagogue Plain-Song," in "The Organist and Choirmaster," 1897; "La Revue de Chant Grégorien," Marseilles, 1899; and "Song in the Synagogue," in "The Musical Times," London, 1899.

COHEN, HALIFA: Tunisian rabbi residing (1902) at Djerba. He is the author of two Hebrew works: "Sifte Renanot" (Joyful Lips), a commentary on the Psalms, Jerusalem, 1890; and "Ḳunteris ha-Semikut" (notes on divers subjects).

Bibliography: Cazès, *Notes Bibliographiques*.

S. M. Fr.

COHEN, ḤAYYIM: Tunisian rabbi; lived in the second half of the nineteenth century, on the island of Djerba, near Tunis. He is the author of "Na'awah Ḳodesh" (Becoming Is Holiness), a commentary on the Song of Songs, Leghorn, 1872; "Mille Meḥayye" (The Vivifying Words), a commentary on the "Hosha'anot" of the Feast of Sukkot; "Miẓwot ha-Melek" (The Commandments of the King), a commentary on the "Azharot" of Ibn Gabirol; "Allon Bakut" (Oak of Weeping), a commentary on the elegies for the Ninth of Ab; "Moẓa' Sefateka" (The Outcome of Thy Lips), a commentary on the prayers (seliḥot) for the month of Elul; "Miḳra' Ḳodesh" (Holy Convocation), a commentary on the Song of Songs; "Zokrenu le Ḥayyim" (Remember Us for Life), a commentary on the Haggadah of the first nights of the Passover; and "Leb Shome'a" (Understanding Heart), elementary discussions of various subjects.

Bibliography; Cazès, *Notes Bibliographiques*.

S. M. Fr.

COHEN, HENRI: French composer and numismatist; born at Amsterdam 1808; died at Bry-sur-Marne May 17, 1880. Cohen's parents went to France in 1811, and provided excellent musical instruction for their son. He studied harmony with Reicha, and singing with Lois and Pellegrini. In 1832 and 1838 he was at Rome, and there produced "L'Impegnatrice" and "Aviso ai Maritati." In 1839 he established himself at Paris, devoting his efforts chiefly to teaching, and singing with success at various concerts.

Cohen was appointed director of the Conservatoire at Lille; but after some difficulties with the administration he returned to Paris, and accepted a position as director of the Cabinet des Médailles at the Bibliothèque Nationale. He subsequently published some works on numismatics and bibliography.

His principal musical compositions are: "Marguerite et Faust," a lyric poem, Paris, 1847; "Le Moine," lyric poem, London, 1851; compositions for the piano, fugues, nocturnes, romances, and melodies; a practical treatise on harmony, and eighteen progressive solfeggios for three and four voices, commended by Fétis.

Bibliography: *Nouveau Larousse Illustré*, s.v., Paris, 1900.

S. A. A. G.

COHEN, HENRY: American rabbi; born in London April 7, 1863. He was educated in London, and when only eighteen traveled in Africa as interpreter for a French legation. He was severely wounded during the Zulu war, while assisting in the repulse of an attack by savages. Proceeding to Jamaica, British West Indies, he became rabbi of Kingston (1884–85), and then of Woodville, Miss., in the United States (1885–88). In 1888 he succeeded the Rev. Joseph Silverman as rabbi of Congregation B'nai Israel, Galveston, Texas, which position he still occupies (1902).

He is librarian of the Texas Historical Society and a member of the executive council of the American Jewish Historical Society, to both of which he has made historical contributions. He has made most careful researches into the history of the Jews in Texas. Cohen has published numerous compilations, translations, reviews, poems, lectures, sermons, and pamphlets. In 1894 he issued his "Talmudic Sayings" and "Prayer in Bible and Talmud," the latter from the German of Nahida Remy.

A. L. N. L.

COHEN, HENRY EMANUEL: Judge of the supreme court of New South Wales; born at Port

Macquarie Dec., 1840. After receiving an ordinary education he served as clerk in 1856; then entered business at Bathurst, but went to London in 1868, where he commenced the study of law, and was admitted to the bar in 1871. Returning to New South Wales, he distinguished himself in the practise of the law, and was on several occasions employed as crown prosecutor. At the general election of 1874 he was returned for West Maitland, and reelected in 1877. Following close upon the general election, he received, on the formation of the Farnell government, the appointment of colonial treasurer. With the coming into power of the Stuart administration, he was called to fill the office of minister of justice; but on the retirement of that government and the dissolution of Parliament in 1885, he retired from politics and devoted himself entirely to the practise of his profession. Cohen was appointed judge of the supreme court in 1896, being the first Jew in New South Wales thus honored (with the exception of Sir Julian Solomon, who resigned the position within a few days of his appointment), and the only Jew holding such office throughout the British dominions. Cohen has for years closely identified himself with Jewish religious and charitable institutions.

J. G. L.

COHEN, HERMANN: German philosopher; born in Coswig, Anhalt, Germany, July 4, 1842. He early began to study philosophy, and soon became known as a profound student of Kant. He was educated at the gymnasium at Dessau, at the Jewish theological seminary at Breslau, and at the universities of Breslau, Berlin, and Halle. In 1873 he became privat-docent in the philosophical faculty of Marburg University, the thesis with which he obtained the "venia legendi" being "Die Systematischen Begriffe in Kant's Vorkritischen Schriften nach Ihrem Verhältniss zum Kritischen Idealismus." In 1875 he was appointed assistant professor, and in the following year professor. He was one of the founders of the Gesellschaft zur Förderung der Wissenschaft des Judenthums, which held its first meeting in Berlin in Nov., 1902.

Cohen is generally acknowledged to be one of the ablest representatives and exponents of the neo-Kantian school. The more important of his works are: "Die Platonische Ideenlehre Psychologisch Entwickelt," in "Zeitschrift für Völkerpsychologie," 1866, iv.; "Mythologische Vorstellungen von Gott und Seele," *ib.* 1869; "Die Dichterische Phantasie und der Mechanismus des Bewusstseins," *ib.*; "Zur Controverse Zwischen Trendelenburg und Kuno Fischer," *ib.* 1871; "Kant's Theorie der Erfahrung," Berlin, 1871; 2d ed., 1885; "Platon's Ideenlehre und die Mathematik," Marburg, 1878; "Kant's Begründung der Ethik," Berlin, 1877; "Das Prinzip der Infinitesimalmethode und Seine Geschichte: ein Kapitel zur Grundlegung der Erkenntnisskritik," Berlin, 1883; "Von Kant's Einfluss auf die Deutsche Kultur," Berlin, 1883; "Kant's Begründung der Aesthetik," Berlin, 1889; "Zur Orientirung in den Losen Blättern aus Kant's Nachlass," in "Philosophische Monatshefte," 1890, xx.; and "Leopold Schmidt," in "Neue Jahrbücher für Philologie und Pädagogik," 1896, cliv.

Cohen edited and published also the last philosophical essays ("Logische Studien," Leipsic, 1894) of F. A. Lange, and his "Geschichte des Materialismus," with a long introduction and critical supplement (2d enlarged edition based on the 7th edition of the original, 1902, I.). His writings relating more especially to Judaism include several pamphlets, among them "Die Kulturgeschichtliche Bedeutung des Sabbat," 1881; "Ein Bekenntniss in der Judenfrage," Berlin, 1880; as well as the following articles: "Das Problem der Jüdischen Sittenlehre," in the "Monatsschrift," xliii. (1899), pp. 385–400, 433–449; "Liebe und Gerechtigkeit in den Begriffen Gott und Mensch," in "Jahrbuch für Jüdische Geschichte und Litteratur," III. (1900), pp. 75–132; "Autonomie und Freiheit," in the "Gedenkbuch für David Kaufmann," 1900. His essay "Die Nächstenliebe im Talmud" was written at the request of the Marburg Königliches Landgericht (3d ed., Marburg, 1888). His latest publication is "Logik der Reinen Erkenntniss," comprising the first part of his "System der Philosophie," ix. 520, Berlin, 1902.

S. B. B.

COHEN, ISAAC: English theatrical manager; born about 1835. He is one of the oldest of the London managers, having, first on the Surrey side, and for 34 years in the East End of London, directed theaters for a period altogether of 44 years. His first theatrical engagement was at the Victoria, South London, and he was subsequently engaged at Astley's. He became call-boy and afterward assistant manager, and in 1862 undertook the management of the East London Theater. Thence in 1872 he went to the Pavilion Theater, of which he is still (1902) manager.

J. G. L.

COHEN, JACOB RAPHAEL: American ḥazzan; believed to have been born in the Barbary States; died in Philadelphia, Pa., Sept., 1811. Cohen lived in London, England, during the earlier years of his life. He is known to have been in Quebec, and also in New Orleans, in 1777. He was the minister of the Spanish and Portuguese synagogue, Shearith Israel, of Montreal, Canada, from 1778 to 1782. In the latter year Cohen was elected minister of the Sephardic synagogue of New York. He lived there until 1784, when he accepted the appointment of ḥazzan of the Spanish and Portuguese congregation of Philadelphia, Pa.

Cohen married Rebekah Luria, of a family which had lost more than one of its members through the Spanish Inquisition. He left descendants in Philadelphia. After Cohen's death his son, **Abraham Hyman Cohen,** acted as reader for a time.

I. de Sola, *History of the Spanish and Portuguese Synagogue, Montreal*, in Borthwick's *History and Biographical Gazetteer of Montreal*, 1892; *idem*, in *The Star*, Montreal, Dec. 30, 1893; Morais, *The Jews of Philadelphia*, Philadelphia, 1894.

A. C. I. de S.

COHEN, JACOB DA SILVA SOLIS: American laryngologist; born in New York city Feb. 28, 1838. He was educated at the Central High School of Philadelphia, the Jefferson Medical College, and the University of Pennsylvania, receiving from the last named in 1860 the degree of doctor of medicine. In the same year he was appointed one of the resident physicians of the Philadelphia Hospital. At the outbreak of the Civil war he joined the United States army as a private. He was soon appointed assistant surgeon of the Twenty-Sixth Regiment Pennsylvania Volunteers. After having served with his regiment in Hooker's brigade, he resigned from the army to become acting assistant surgeon in the United States navy, which position he held from 1861 to 1864, serving on the U. S. steamers "Florida" and "Stettin," and the U. S. ship "Vermont."

In 1864 he rejoined the army as visiting surgeon to two military hospitals in Philadelphia. At the end of the war he went to New York, and afterward to Philadelphia, where he established himself as a physician (1866), paying special attention to the diseases of the throat and lungs. He is at present (1902) one of the leading laryngologists.

In 1867 Cohen was appointed lecturer on electrotherapeutics at the Jefferson Medical College, Philadelphia, with which institution he was connected till 1883, when he became honorary professor of laryngology. In the same year he was elected professor in the Philadelphia Polyclinic. He had also been attached, since 1873, to the staffs of the German Hospital, the Home for Consumptives, the Northern Dispensary, and the Jewish Hospital in that city.

Cohen is a prolific writer, and has contributed many monographs to the medical journals. He was for a number of years one of the editors of the "Archives of Laryngology," and is at present in charge of the laryngological department of the "American Journal of the Medical Sciences." He has written "Diseases and Injuries," in the "International Encyclopedia of Surgery," New York, 1884 and 1886; and "The Diseases of the Mouth, Tongue, Pharynx, and Œsophagus," in the "American System of the Practice of Medicine," Philadelphia, 1885. He is also the author of "Inhalation in the Treatment of Disease: Its Therapeutics and Practice," Philadelphia, 1867, 2d ed. 1876; "Diseases of the Throat and Nasal Passages," New York, 1872, 5th ed. 1879; "Croup in Its Relation to Tracheotomy," Philadelphia, 1874 (translated into Spanish, Seville, 1887); "The Throat and Voice," Philadelphia, 1874, and continuously reprinted to date.

A. F. T. H.

COHEN, JOSEPH: French journalist; born at Marseilles Nov. 1, 1817; died in Paris 1899. After finishing his studies at Aix, he was admitted to the bar there in 1836. He founded the "Mémorial d'Aix," of which he was the editor until 1843. At this time he, with Jacques Isaac Altaras, was interested in the Jews of Algeria, publishing some articles on them in the "Archives Israélites." He thereby gained their friendship, and they elected him president of the newly founded Jewish consistory of Algiers. He assisted them in reorganizing their mode of worship, and later (1868) they sent him to Paris as delegate to the central consistory of the Jews of France

On returning to France in 1850, he resumed his journalistic work, writing on politics as well as on matters pertaining to Judaism. From 1860 to 1862 he was one of the editors of the first French Jewish weekly, "La Vérité Israélite," in which he published his famous work, "Les Déicides," an investigation into the life of Jesus, in which he attacks the originality of the moral teaching of the Gospels, and defends the Pharisees. The work appeared in book form in 1864 (a second edition in 1866), and was translated into English in 1874. Cohen subsequently published a supplementary work, "Les Pharisiens," 2 vols., 1877.

His reputation suffered somewhat in consequence of unfortunate financial transactions; but after some years of silence he reengaged in political journalism, and was editor of "La Liberté" to the close of his life.

S. J. W.

COHEN, JOSIAH: American lawyer and judge; born at Plymouth, England, Nov. 29, 1841, of a family long settled in Cornwall. He is a well-known lawyer and public man in the western part of the state of Pennsylvania, having been chairman of the Allegheny county Republican executive committee, and, in 1884, one of the members of the presidential election board for Pennsylvania. In 1901 he was appointed judge of the orphans' court of Allegheny county.

Cohen has been affiliated with most of the local and national Jewish organizations, being a member of the executive committee of the Union of American Hebrew Congregations, and president of District Lodge No. 3, I. O. B. B., and of its court of appeals. He is also a life-member of the board of trustees of the Carnegie Institute of Pittsburg.

Bibliography: Markens, *The Hebrews in America*, p. 205.

A.

COHEN, JUDAH BEN ISAAC BEN MOSES: Provençal philosopher of the middle of the fourteenth century. He was a disciple of Samuel of Marseilles, and a relative of Shelemiah of Lunel, at whose request he composed a commentary on Averroes' middle commentary on the "Organon." In his treatise Cohen often corrects Averroes, and quotes Levi ben Gerson, whom he defends against the attacks of his (Cohen's) master, Samuel of Marseilles. A portion of this commentary, comprising the "Isagoge" and the "Categories," is still extant in manuscript (Christ Church, Oxford, No. 201).

G. I. Br.

COHEN, JULES EMILE DAVID: French composer; born at Marseilles Nov. 2, 1830; died in Paris Jan., 1901; studied at the Paris Conservatoire, under Zimmerman, Marmontel, Benoist, and Halévy, from 1847 to 1854, gaining first prizes in pianoforte, organ, harmony, counterpoint, and fugue. In 1870 he was appointed professor in charge of the choral class of that institution, and in 1877 chorus master at the Grand Opera, Paris.

Cohen's compositions are very numerous, and include: thirty songs without words for the pianoforte; six "études expressives" and twelve preludes for the harmonium; ballads, chamber-music, and orchestral suites. The music composed by him for his sister's wedding at the Jewish Temple, Rue de Notre Dame de Nazareth, Paris, and a mass for men's voices, have often been performed.

For the theater Cohen has written the following operas and comic operas: "Vive l'Empereur" and "L'Annexion," 1860; "Maître Claude," 1861; "José Maria," 1866; "Les Bluets," 1867; "Déa," 1870; and on the occasion of the reproduction of "Athalie" and "Esther" at the Comédie Française he composed new music for the choruses.

COHEN, J. I. DE LISSA: Mauritius journalist; died May 31, 1879, at Curepipe. He was connected for nearly twenty years with journalism, and was editor and founder of the "Mercantile Record and Commercial Gazette" of Mauritius. He exerted himself greatly to advance the interests of the colony of Mauritius.

Bibliography: *Jewish Chronicle*, July 25, 1879.

J. G. L.

COHEN, KATHERINE M.: American sculptor and painter; born in Philadelphia, Pa., March 18, 1859. She early evinced a taste for art, especially for modeling, and pursued her studies in the art schools of Philadelphia and New York, among her instructors being J. Liberty Tadd, John J. Boyle, and Augustus St. Gaudens. In 1887 she went abroad, and after four years' travel studied in Paris under Mercié. She has produced many works, those of special Jewish interest being the group "Rabbi Ben Ezra" and the heroic figure "L'Israélite," which latter was exhibited at the Paris Salon in 1896. Among her portrait busts are those of Mayer Sulzberger and of Lucien Moss.

A.

COHEN, LÉONCE: French musician; born at Paris Feb. 12, 1829; died 1884. He studied at the Conservatory of Paris under Leborne. In 1851 he received the "Prix de Rome," and became soon afterward one of the violinists at the Théâtre Italien at Paris. Cohen wrote some operettas, and a work entitled "Ecole du Musicien."

Bibliography: Riemann, *Musik-Lexikon*, s.v., Leipsic, 1900.

S. F. T. H.

COHEN, LEVI A.: Journalist and champion of the Jews of Tangier; born at Mogador in 1844; died at Tangier Nov. 9, 1888. He went to England at an early age, but subsequently settled at Tangier, where he remained for the rest of his life.

To the Jews of Morocco Cohen stood in the character of a protector. One of the few independent men among the Moorish Jews, he was unsparing in his denunciation of any infringement of their rights; and in order to make his work more effective he founded a journal edited in French, the "Réveil du Maroc." In the capacity of editor, as the accredited representative of the board of delegates of the American Hebrew congregations, and as correspondent of the Anglo-Jewish Association, he exercised considerable influence. On several occasions Cohen undertook perilous missions into the interior of the country, and to the court of the sultan, in order to be of more effectual service to his coreligionists. The poor Arabs, too, found in him a sympathetic advocate of their cause.

COHEN, LEVI ALI: Dutch physician and medical author; born Oct. 6, 1817, at Meppel, province of Drenthe, Holland; died Nov. 22, 1889, at Groningen. He received his education at the Latin school of his native town and the university at Groningen, from which he graduated in 1840 as medical doctor. Establishing himself as general practitioner in Groningen in the same year, he became (1858) chief of the bureau of provincial statistics. In 1865 he gave up his practise to become chief of the board of health ("Inspecteur voor het Geneeskundig Staatstoezicht") of the provinces of Overyssel and Drenthe, and later of the provinces of Friesland and Groningen. During this time he was one of the reorganizers of the new medical laws for the Netherlands. King William III. appointed him in 1876 delegate to the hygiene and sanitation congress which met at Brussels. For fifty years he was a member of the congregational committee of Groningen, one year its president, and for twenty years a member of the committee on Jewish affairs in Holland. He also took great interest in the charity societies. From 1844 till 1877 he was editor of the following periodicals: "Mededeelengen uit het Gebied van Natuur, Wetenschap, en Kunst," "Nieuw Praktisch Tijdschrift van de Geneeskunde in Al Haar Omvang," "Het Repertorium," "Nieuw Statistisch Geneeskundig Jaarboekje," and (with other medical men) "Het Nederlandsch Tijdschrift voor Geneeskunde." He was also a contributor to the "Weekblad van het Ned. Tijdschrift voor Geneeskunde."

Cohen has written many essays and books, among which are: "Bewerking van Choulant-Richter's Ziektekunde and Geneeskunde," 1858–60; "Het Wezen en de Rationele Behanding van den Zooganaamden Diabetes Mellitus," Groningen, 1845; "Bewerking van Isensées Oude- en Middel-Geschiedenis der Geneeskunde," 1847; and "Handboek der Openbare Gezondheidsregeling en der Geneeskundige Politie," Groningen, 1869–72. Mention should also be made of one of his works on Biblical subjects, viz.: "De Dichter van het Boek Job als Dierkundige Beschouwd," 1843. All these works were published in Groningen.

COHEN, LEVY BARENT: English financier and communal worker; born at Amsterdam 1740; died in England 1808; son of Barent Cohen, a wealthy merchant of Amsterdam. He removed to England with his brother, and by 1778 had developed a large business in London. He was naturalized in 1798, and became known eventually as one of the leading merchants of the city.

As a communal worker he labored with much public spirit in Jewish affairs; was one of the founders and the first president of the Bread, Meat, and Coal Charity, and of the Jews' Hospital; and filled successively all the synagogal offices of the Duke's Place congregation.

Cohen was twice married; and his chief claim to remembrance lies in having been the founder of the Cohen family in England. Through the distinguished marriages which his children contracted, nearly all the leading Jewish families in England are connected with him. His daughter Hannah became the wife of Nathan Mayer Rothschild, the founder of the firm in New Court; the second daughter, Judith, married Sir Moses Montefiore; the third daughter, Jessie, married Myer Davidson; and by the alliances of his other children further marriages were made with the families of Goldsmid, Samuel, and Lucas.

BIBLIOGRAPHY: *The Leisure Hour*, Aug. 1886; L. Wolf, *Diary of Lady Montefiore*, 1902, reprinted from *Jew. Chron.* June 13, 1902; *Cat. Anglo-Jew. Hist. Exh.* 1888, p. 69.

J. G. L.

COHEN, LIONEL LOUIS: English financier, politician, and communal worker; born in London 1832; died there June 26, 1887; son of Louis COHEN, founder of the house of Louis Cohen & Sons, foreign bankers and members of the Stock Exchange; of this firm Lionel Louis Cohen became the head in 1882, after having been elected a trustee (1870) and later manager of the Stock Exchange. He retired in 1885 on being elected member of Parliament.

Cohen's financial ability was shown by his services in connection with the Turkish debt, which earned for him a nomination to the order of the Medjidie. A prominent worker in the Conservative cause at a time when the great bulk of Jews were unquestioning adherents of the Liberal party, he caused considerable sensation in 1874 by appealing to Jews to exercise their independent judgment in political affairs. In 1885 he was returned to the House of Commons by the borough of North Paddington, and during his short tenure of his position he served with distinction on the royal commissions on the depression in trade, on gold and silver, and on endowed schools.

Cohen from his early years devoted much time to the service of the community. On entering public life he found the three city synagogues and various societies administering charitable relief in a chaotic and unscientific manner, and took a notable part in the efforts made to remedy the evil. In 1859, when the synagogue vestries agreed, on the motion of Ephraim Alex, overseer of the poor, to delegate their powers to a specially constituted board of guardians, Cohen became its honorary secretary.

His "Scheme for the Better Management of All the Jewish Poor," elaborated in 1860, practically formed the constitution of the board of guardians for the relief of the Jewish poor, the chief charitable institution of the Anglo-Jewish community. In 1878 he was elected president of the board, and filled that office till his death. He gave in all 28 years of unremitting service to the institution, which under his inspiration earned recognition as a great and model charity within and beyond the community.

Cohen also took the leading share in the movement which, after many years of labor, culminated in the federation by Act of Parliament in 1870 of the Great, the Hambro', and the New synagogues under the title of "The United Synagogue." He presided over the first meeting of its council, of which he was elected a vice-president, and was the ruling spirit and master mind of the organization, which during his lifetime grew into a corporation of eleven metropolitan congregations and the most influential body of its kind in the British empire.

In 1881 he initiated the movement in favor of the persecuted Russian Jews, and raised the first fund in England for their relief.

Cohen wrote a pamphlet on Indian railways, was a frequent contributor to the Jewish journals, and wrote the masterly series of reports of the board of guardians during his tenure of office as honorary secretary of that institution. The series of statistical tables started by him in these reports has ever since formed a model for similar compilations.

J. M. A. GR.

COHEN, LOUIS LOUIS: English communal worker; born in London Sept., 1799; died there March 15, 1882. For two generations Cohen was a commanding figure in the Anglo-Jewish community, and took a prominent share in the management of its affairs. In 1837 he was elected warden of the Great Synagogue, which position he filled for many years. On his retirement he became a life-member of the vestry, and subsequently of the council of the United Synagogue. He also served for many years as a member of the committee (Seven Elders). He was a colleague and active supporter of Sir Moses Montefiore in most of his undertakings. On the board of deputies, of which he was a member, Cohen exercised great influence, and was the main author of its existing constitution. He supported most of the leading London charities, and was for several years vice-president of the Jews' Free School, president of the board of sheḥiṭah, treasurer of the Initiation Society, and trustee of the bet ha-midrash. In religious matters Cohen was a rigid Conservative, and felt intensely on questions affecting traditional Judaism.

He became a member of the Stock Exchange in 1819, and served on committees for fifteen years. The firm of Louis Cohen & Co. was founded by him. Cohen had a special liking for the science of botany, and was a fellow of the Royal Botanical Society.

COHEN, LOUIS S.: Lord mayor of Liverpool in 1899; born at Sydney, New South Wales, in 1846; son of Samuel Cohen, who represented Morpeth in the Parliament of New South Wales. He was educated in London, at Edmonton House (H. N. Solomon's school) and University College, and went to Liverpool in 1864, where he became connected with the firm of Lewis, subsequently becoming its head.

It was not till 1895 that Cohen began to take a prominent part in public affairs. In that year he was elected member of the city council for the Breckfield ward (Everton). He now (1901) holds several public positions, and has made himself thoroughly acquainted with all the details of municipal government. He is chairman of the Estates Committee and member of the Hospital Sunday Committee. In 1897 he was elected chairman of a subcommittee of the Unsanitary Property Committee. In 1899 Cohen was unanimously chosen lord mayor of Liverpool.

COHEN, MICHEL: Dutch soldier; born Nov. 27, 1877, in Goes, province of Zeeland, Holland. After a common-school education at his native place, he enlisted in April, 1894, in the Second Regiment of Hussars. Two years later, May, 1896, he resigned, and then enlisted in the Dutch-Indian army for a term of six years, embarking for the Dutch East Indian colonies on June 27 of the same year.

Upon arrival at Sumatra Cohen was appointed to a cavalry regiment. He distinguished himself at the attack on the Achin (Atjeh) camp at Batoe Menek, Sept. 8, 1897, conveying information and messages under fire of the enemy, for which he received honorable mention in a royal decree. Promoted to corporal, in 1900 he was made a knight of the Military William Order of the fourth class for bravery at the storming of Tjot Kala (Achin), Nov. 14, 1899. Under a very heavy fire and a hail of missiles, Cohen rescued a wounded European sergeant-major who had fallen from his horse. Placing him on his own horse and running alongside, he brought the officer safely back to the division.

COHEN, MOSES: Bulgarian journalist; born at Shumla, Bulgaria, in 1864. He published in French "Petite Histoire des Israélites," Philippopolis, 1897, a text-book containing a résumé, chapter for chapter, of Theodore Reinach's "Histoire des Israélites." In 1899 Cohen founded at Philippopolis the journal "Tcheweschki-Prava," as an organ of the Bulgarian Jews. This was the first Jewish periodical in the Bulgarian language founded in the principality; and it waged an active warfare against anti-Semitism. After an existence of six months it was suppressed by the Bulgarian government.

COHEN, MOSES BEN ELIEZER: Moralist; lived in Germany, probably at Coblenz, in the second half of the fourteenth century. He was the author of an ethical work entitled "Sefer Ḥasidim" (Book of the Pious), written in 1473 and published by Schriftsetzer, Warsaw, 1866. This book, known also under the title "Sefer ha-Maskil" (Book of the Wise), gives a brief description of Jewish piety as understood at that time, and contains some valuable contributions to the history of Jewish culture. The author often quotes the "Ḥayye 'Olam" of Isaac Ḥasid and the works of Judah ha-Ḥasid.

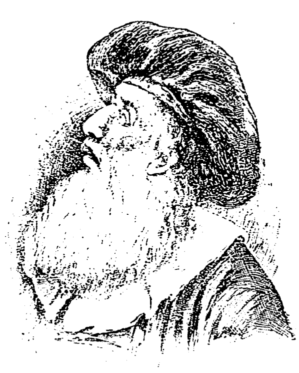
H. R. P. Wi.

COHEN, NAPHTALI: Russo-German rabbi and cabalist; born in 1649 at Ostrowo in the Ukraine; died at Constantinople Dec. 20, 1718. He belonged to a family of rabbis in Ostrowo, whither his father, Isaac Cohen, had fled during the Cossack war. In 1663 Cohen fell into the hands of the Tatars, who kept him in servitude for several years. Escaping, he returned to Ostrowo, and was chosen to succeed his father as rabbi. In 1690 he was called to Posen, where he officiated as chief rabbi till 1704. There he devoted himself to the Cabala, and collected a large library of cabalistic literature.



Naphtali Cohen.

In 1704 he was called to Frankfort-on-the-Main. On the occasion of a fire which, breaking out in his house on Jan. 14, 1711, spread to and consumed the entire Jewish quarter, it was charged that, relying on the efficacy of his cabalistic charms, he had prevented the extinction of the fire by the ordinary means. He was arrested and thrown into prison, and regained his liberty only upon renouncing his office. He then went to Prague, where many members of his family lived. There another misfortune, which embittered his life more than the loss of his wealth and position, befell him. The Shabbethaian cabalist Nehemiah Ḥayyun appeared in Prague, declaring himself a preacher or an emissary from Palestine, and by his duplicity gained the confidence of the credulous Cohen. Being a believer in practical Cabala, Cohen found no fault with Ḥayyun, even when the latter began to sell amulets. It is not astonishing, therefore, that when Ḥayyun asked for an approbation for his mystical work "Mehemnuta de Kula," Cohen, to whom he had prudently submitted only the main text, but not the commentaries which accompanied it, and in which the author openly professed the doctrine of the Trinity, readily granted it, and gave him a glowing recommendation. Provided with this and with other recommendations secured in the same way, Ḥayyun traveled throughout Moravia and Silesia, propagating everywhere his Shabbethaian teachings.

Cohen soon discovered his mistake, and endeavored, but without success, to recover his approbation, although he did not as yet realize the full import of the book. It was in 1713, while Cohen was staying at Breslau (where he acted as a rabbi until 1716), that Ḥakam Ẓebi Ashkenazi of Amsterdam informed him of its tenets. Cohen thereupon acted rigorously. He launched a ban against the author and his book, and became one of the most zealous supporters of Ḥakam Ẓebi in his campaign against Ḥayyun.

In 1715 Cohen went to see August II., King of Poland, to secure reinstatement in his former rabbinate of Posen, at that time vacant; but failed because of the opposition of the leaders of the community. He then returned to the Ukraine, and in 1718 started for the Holy Land, but died on the way at Constantinople.

Cohen was the author of the following works: "Birkat Adonai" (Blessing of the Lord), a commentary on Berakot, with an introduction on the corelation of the Mishnaic tractates, having the subtitle "Semikut Ḥakamim" (Connection of the Wise), Frankfort-on-the-Main, 1702 (Cohen was so proud of this work that he ordered it to be buried with him); "Meshek ha-Zera'" (Sowing of the Seed), commentary on the Mishnaic order Zeraim (not published); "Pi Yesharim" (Mouth of the Righteous), a cabalistic introduction to Genesis, Frankfort-on-the-Main, 1702; "Sefer Bet Raḥel" (Book of the House of Rachel), quoted in his will, probably identical with "Tefillat Bet Raḥel" (Prayer of the House of Rachel), published at Amsterdam in 1741.

Cohen also edited a number of prayer-books, including "Seliḥot" (Penitential Prayers), with a commentary, Frankfort-on-the-Main, 1702; prayers for the Society for Burial, *ib.* n.d.; a prayer for the staying of the plague, Prague, 1713; and an ode on a Sefer Torah donated by Baruch Austerlitz. He also wrote an epistle directed against Nehemiah Ḥayyun. Cohen's ethical will, "Ẓawwa'ah," is replete with lofty moral instructions (Berlin, 1729).

COHEN, SAUL: African rabbi; born in Djerba, North Africa, in 1772; died there April, 1848. Although blind and very poor, he was the author of the following publications: "Netib Miẓwoteka" (The Path of Thy Commandments), a work containing commentaries on the Book of Ruth and on the "Azharot" of Isaac b. Reuben and Solomon ibn Gabirol, as well as a number of prayers and religious poems for the Feast of Weeks, etc. (Leghorn, 1841); "Sifte Renanot" (Praising Lips), a commentary on the prayers for the Days of Penitence, according to the rite of Tripoli (*ib.* 1837); "Leḥem ha-Bikkurim" (Bread of the First-Fruits), a grammatical work, afterward prepared for publication by David Cohen, a grandson of the author (*ib.* 1870). His teacher, Ẓemaḥ Cohen, was a dayyan and the author of "Ṭure Zahab" (Plates of Gold), a commentary on the Song of Songs, written in 1786, and published by his grandson, Ḥayyim Cohen, in the work entitled "Na'awah Ḳodesh" (see Ps. xciii. 5), Leghorn, 1872.

COHEN, SHALOM BEN JACOB: Polish Hebraist; born at Meseritz (Mezhiryechye), Poland, Dec. 23, 1772; died at Hamburg Feb. 20, 1845. Prompted by a love for learning which he could not satisfy in Poland, he went to Berlin when only seventeen. There he became friendly with the poet Wessely, who inspired him with a great passion for Hebrew poetry, which he cultivated until his death. The publication of the Hebrew literary review "Meassef" having been interrupted, Cohen undertook its continuation, and enriched it for two years with his own contributions.

In 1813 Cohen spent a short time in London, in the endeavor to found there a Hebrew school. Having failed, he returned to Germany and settled in Hamburg, where his friend Wessely resided. In 1820 Cohen was called to Vienna by the printer Anton Schmid, who was opening a Hebrew printing-office, and wanted Cohen to furnish Hebrew material. Cohen then commenced the literary review "Bikkure ha-'Ittim," which counted among its collaborators the most renowned scholars of that time.

Cohen was also the author of the following works: "Mishle Agur" (Fables of Agur), a collection of fables and moral sentences in verse, with a German translation, Berlin, 1803; "Tif'eret Yisrael" (Splendor of Israel), hymns for the centennial of the society Biḳḳur Ḥolim at Berlin, *ib.* 1803; "Maṭṭa'e Ḳedem 'al Admat Ẓafon" (Oriental Plants in Northern Soil), a collection of New-Hebrew poems, with a German translation, Frankfort-on-the-Main, 1807; "Sefer Yirmeyah," a German translation of Jeremiah, with a commentary, Fürth, 1810; "'Amal we-Tirzah," an allegorical drama in three acts, adapted from "La-Yesharim Tehillah" of Moses Ḥayyim Luzzatto, Rödelheim, 1812; "Masa Baṭawi" (Burden of Batavia), ode in praise of Holland, with a Dutch translation by H. Somerhausen, Amsterdam, 1814; "Shorshe Emunah" (Foundations of Faith), a Hebrew catechism, with an English translation by Joshua van Oven, London, 1815; "Ketab Yosher" (Correct Writing), an aid to letter-writing in Hebrew and German, Vienna, 1820; "Ner Dawid" (Light of David), an epic poem treating of the history of David, and divided into four parts, Vienna, 1834; "Kore ha-Dorot" (He Who Calls the Generations), a history of the Jews from Maccabean times to the present, with an introduction by S. L. Rapoport, Wilna, 1837; "'Aṭeret Tif'eret Sebah"

(The Hoary Head is a Crown of Glory), poems in honor of J. Isler, Hamburg, 1843.

COHEN, SOLOMON DA SILVA SOLIS: American physician; born at Philadelphia, Pa., Sept., 1857. Educated in the public schools, he graduated from the Central High School in 1872. From 1880 he studied medicine under his brother, Dr. J. da Silva Solis Cohen, and at Jefferson Medical College, from which institution he received the degree of M.D. in 1883. Since that time he has been engaged in active hospital and private practise in Philadelphia, where he still resides (1902).

Cohen was demonstrator of pathology and microscopy at the Philadelphia Polyclinic from 1883 to 1885. In 1887 he became lecturer on special therapeutics at his alma mater, and in the same year professor of clinical medicine and therapeutics at the Philadelphia Polyclinic and the College for Graduates in Medicine, a position which he held for fifteen years. In 1889 he became clinical lecturer on medicine at the Jefferson Medical College, and in the same year physician to the Philadelphia Hospital. He is also physician to the Jewish Hospital, and physician to the Rush Hospital for Consumptives. In 1890-92 he gave, by invitation, special courses of lectures on therapeutics in the medical department of Dartmouth College, Hanover, N. H., and was appointed senior assistant professor of clinical medicine in Jefferson Medical College and physician to Jefferson College Hospital in 1902.

Cohen has been president of the Young Men's Hebrew Association of Philadelphia; was one of the founders of the Jewish Publication Society of America, and a member of its publication committee. He was also one of the founders and a member of the first board of editors of "The American Hebrew"; and a founder and trustee of the Jewish Theological Seminary Association; he is a member of the board of trustees of Gratz College, Philadelphia. He has been president of the Philadelphia County Medical Society (1898-99), and is recorder of the Association of American Physicians.

He was editor of the "Philadelphia Polyclinic" from 1894 to 1899; has been on the editorial staff of "The Medical News," "The American Journal of the Medical Sciences," and "The Universal Annual of the Medical Sciences;" and is one of the editors of "American Medicine." He is author of "Therapeutics of Tuberculosis," Philadelphia, 1890, and joint author (with A. A. Eshner) of "Essentials of Diagnosis," Philadelphia, 1892, 2d ed. 1900. He has also edited "System of Physiologic Therapeutics," 11 vols., *ib.* 1901-1902.

Besides contributing to the medical journals and encyclopedias and to the Jewish journals, Cohen has written poems and belletristic essays for the leading magazines.

COHEN, URI (PHOEBUS, FEIVUS) BEN ELIEZER LIEBERMANN: French Talmudist; died May, 1806, at an advanced age in his native city, Metz. His father was a member of the rabbinical college in that city. Phoebus also became a rabbi, and conducted a Talmudic academy there. At first he was assistant rabbi under Aryeh Löb b. Asher Günzburg. On the death of Günzburg in 1785, Cohen was appointed assistant, and in 1793 chief rabbi. Although an adherent of the old school, he joyfully hailed the success of the French Revolution in 1792, and encouraged the members of his community to participate actively in the movement. He wrote "Halakah Berurah" (Clear Law), casuistic essays on halakic and haggadic passages in the Talmud, as well as homilies, published at Metz, 1793, by his son, David Cohen, rabbi at Verdun.

L. G. I. Ber.

COHEN-CARLOS, DAVID: A writer resident in Hamburg in the seventeenth century. In 1631 he either translated the Song of Songs into Spanish or transliterated a Ladino translation of it (written in Hebrew letters) into Latin characters. The work is entitled "Cantares de Selomoh Traduzido de Lengua Caldayca en Espagnol," Hamburg, 1631.

Bibliography: Kayserling, *Biblioteca Esp.-Port.-Jud.* p. 38.

G. M. K.

COHEN-LIPSCHÜTZ, EPHRAIM: Italian rabbi and author of the second half of the seventeenth century. He was one of the rabbis at Modena, and was known as a keen Talmudical scholar. His responsa on Talmudical subjects are found in "Paḥad Yiẓḥaḳ," by Isaac Lampronti; in "Dibre Joseph," by Joseph Ergas, relating to the law of ransom; and in "Shemesh Ẓedaḳah," by Samson Morpurgo. According to Nepi, he was the teacher of R. Ishmael Cohen, author of "Zera' Emet," and Samson Ḥayyim Naḥamani, author of "Toledot Shimshon."

L. G. N. T. L.

COHEN-TANUGI, JUDAH B. ABRAHAM (called Hadria): Rabbi and writer; died at Tunis about 1835, at an advanced age. He is the author of two Hebrew works, both of which contain notes on the Talmud: "Ereẓ Yehudah" (Land of Judah), Leghorn, 1797; and "Admat Yehudah (Soil of Judah)," *ib.* 1828.

Bibliography: D. Cazès, *Notes Bibliographiques*.

S. M. Fr.

COHEN-YIẒḤAKI, ABRAHAM: Tunisian rabbi and writer; born at Tunis; died there in 1864. He is the author of the following Hebrew works, printed at Leghorn by a pious and generous Judæo-Tunisian family, the Shamamas: "Mishmerot Kehunnah," containing novellæ on the Talmud, 1862; "Shulḥano shel Abraham" (Abraham's Table), a commentary on the Shulḥan 'Aruk, 1865; "Miẓwot Kehunnah," a collection of rabbinical consultations, 1865; "Kaf ha-Kohen," cabalistic interpretations of every chapter of the Bible; "Ḥasde Kehunnah," a collection of funeral sermons, 1865; "'Ene Kohen," a study of the laws concerning the slaughtering of animals and birds for food, 1865.

Bibliography: D. Cazès, *Notes Bibliographiques*.

L. G. M. Fr.

COHN, ADOLPHE: American philologist; born at Paris May 29, 1851. He was graduated "bachelier ès lettres" from the University of Paris in 1868, and studied law, historical criticism, and philology at various institutions of higher learning in Paris, receiving the degrees of LL.B. in 1873, and "archiviste paléographe" (A.M.) in 1874. At the commencement of the Franco-Prussian war in 1870, he enlisted and served in the French army throughout the struggle.

Cohn went to New York May 13, 1875, and from 1876 to 1884 was the American correspondent of "La République Française," edited by Gambetta, whom he had known in France, and whose political views he had adopted. In March, 1882, Cohn was appointed tutor in French at Columbia College, and soon afterward made an instructor. By a popular vote of the French residents of New York he was chosen to deliver the funeral oration on Gambetta in 1883 at Tammany Hall, and in 1885 was called from Cambridge, Mass., for a similar purpose, upon the death of Victor Hugo.

In 1884 Cohn was made instructor in French at Harvard University. From 1885 to 1891 he was assistant professor of French at the same institution, and during this time wrote much in French and English, especially for the "Atlantic Monthly." He became American correspondent of "Le Temps" in 1884, and continued to act as such until 1895. While at Harvard he was temporary head of the French department in Wellesley College, and in 1888 and 1889 conducted a summer school of languages at Oswego, N. Y.

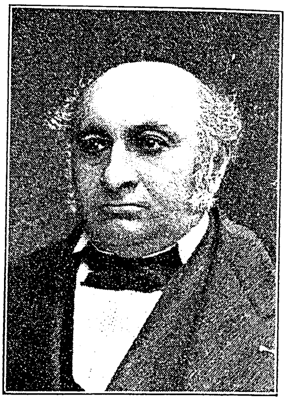
In 1891 Cohn was appointed professor of the romance languages and literatures at Columbia University, which position he has since occupied. He was president of the New York committee of L'Alliance Française from 1888 to 1902, and is now its honorary president. In 1897 he was made a knight of the Crown of Italy, and in 1900 a knight of the Legion of Honor of France. He has edited many French classics for educational purposes.

Bibliography: *Who's Who in America*, 1901-1902, p. 224.

A. A. M. F.

COHN, ALBERT: French philanthropist and scholar; born in Presburg, Hungary, Sept. 14, 1814; died at Paris March 15, 1877. He belonged to an Alsatian family which had settled in Hungary during the eighteenth century. From 1824 to 1836 he lived in Vienna, studying first in the gymnasium and afterward at the university, and receiving in 1834 the degree of doctor of philosophy. He was then chiefly interested in Oriental languages, and, through the influence of Professor Wenrich, was engaged as teacher of Hebrew in the Protestant seminary. He was introduced at the same time to the Orientalist, Baron von Hammer-Purgstall, who employed him as one of his secretaries.

Baron von Hammer-Purgstall was instrumental in forming Cohn's decision to leave Vienna, where at that time there was no hope of preferment for a Jew, and to settle in Paris, which he did in 1836. Then began his lifelong connection with the Rothschild family. Three of the children of Baron James de Rothschild received successively from him their instruction in Hebrew and in Jewish history; and in 1839, after a year spent with his pupils in the Holy Land and in Austria, he was placed by the baron and baroness in charge of their extensive charities, a position which he held for the remainder of his life.



Albert Cohn.

Almoner of the Rothschild Family.

Cohn did much for the charity commission of the Paris community, of which he was successively treasurer and president, making it a model for similar institutions throughout Europe.

In Algeria.

His next field of activity was among the Jews of Algeria, who suffered much through the prejudice of the French conquerors, including those in command. In 1845, and again in 1847, he visited the country, often traveling through districts where war was raging, and where the life of a European was insecure. His reports, presented by him personally to King Louis Philippe and to his son, the Duke d'Aumale, led to an organization of the Jewish communities of Algeria which was destined to bring about their gradual assimilation with the Jewish communities of France.

Cohn was again in Algeria in 1860, after visiting Morocco, where matters pertaining to the Jews, which required his attention, arose from the Spanish expedition of that year. Owing to his influence with the celebrated Don Juan Prim and others, these matters were solved in a manner that was favorable to the Jewish population.

His activity in the East was equally important. He visited Jerusalem no less than five times between 1854 and 1869. His first voyage was undertaken at the request of the Consistoire Central des Israélites de France, which had been requested by Jews in every part of Europe to investigate the

In the East.

condition of their coreligionists of the Ottoman empire, and to secure, through the influence of the great European powers, some alleviation of their condition. His first visit to Jerusalem (1854) was the first visible sign to the Jews of the Holy Land that an interest in their condition was being taken by their brothers of France, Italy, England, and Germany. Sums of money had already been sent by Sir Moses Montefiore; but Cohn was the first to see how matters really stood, and to apply the needed remedies. He was greatly helped in the performance of his task by his exceptional linguistic gifts and his deep knowledge of the idioms of the East. On this preliminary trip to the East, in the course of which he first passed through Vienna, he delivered addresses in German, Italian, Hebrew, and Arabic.

Interview with the Sultan.

The result of Cohn's observations in Alexandria, Smyrna, Jaffa, and Jerusalem was the establishment in those places of Jewish hospitals and schools, as well as institutions for the assistance of young mothers, these organizations being supported mostly by the Rothschild family, but also by other benefactors. But Cohn's chief service to the Jewish race was performed at Constantinople on his return journey from Jerusalem. He was received in private audience by Sultan 'Abd al-Majid, from whom he asked and received a promise that no improvements should be introduced in the legal conditions of the Christian subjects of Turkey which would not also apply to the Jews. Since that time Jews and Christians have enjoyed equal privileges throughout the whole of the Ottoman empire.

Cohn's energies were not, however, exhausted by the labors of charity. For years he delivered lectures on Jewish history before popular audiences; and he taught without remuneration in the Séminaire Israélite from the time of its transfer from Metz to Paris until a few months before his death. His large collection of philological works and rabbinical literature now forms a part of the library of that institution.

His coreligionists rewarded him with a seat in the Consistoire Central des Israélites de France; and the French government bestowed upon him the Cross of the Legion of Honor. He also received the Grande Médaille of the Société Française pour l'Encouragement au Bien.

S.

COHN, BERNARD: German physician; born March 30, 1827, at Breslau; died there June 16, 1864. He was educated at the gymnasium and at the university of his native town, and was graduated as doctor of medicine Aug. 20, 1855. Establishing himself as a physician in Breslau in that year, he became assistant at the University Hospital under Frerichs from 1854 to 1861, and privat-docent at the university in 1856. In 1861 he was appointed chief physician at the Allerheiligen Hospital.

Cohen was the author of "Klinik der Embolischen Gefässkrankheiten," Breslau, 1862, which received a Montyon prize from the Académie des Sciences, Paris.

Bibliography: Pagel, *Biographisches Lexikon*, s.v., Vienna, 1901.

COHN, EMIL: German physicist; born at Neu-Strelitz Sept. 28, 1854; studied at the University of Strasburg, whence he was graduated as Ph.D. in 1878. From 1881 to 1884 he was assistant in the Physical Institute of the university, and in the latter year was admitted as privat-docent (Feb. 5) and assistant professor (Sept. 27). Cohn is the author of "Elektrische Ströme," Leipsic, 1897, and "Das Elektromagnetische Feld," Leipsic, 1900.

Bibliography: Poggendorff, *Biographisch-Literarisches Handwörterbuch*, iii., iv.

s. E. Ms.

COHN, FALK: German rabbi; born at Dessau Sept. 18, 1833; died at Bonn March 6, 1901. The son of a rabbi and teacher at the Herzogliche Franzschule at Dessau, he began the study of the Talmud in his early youth. After his matriculation he studied philology and philosophy at Berlin, where he also continued his Talmudic studies. In 1860 he received the degree of Ph.D. from the University of Leipsic, his thesis being "Philosophisch-kritische Abhandlung über den Schlussvers des Zweiten Buchs der Psalmen."

After officiating for five years as preacher and religious teacher at Waren, Mecklenburg, he went in 1867 to Bielitz, Austrian Silesia, as director of the Jewish communal school there. Five years later he became preacher at Oels, where he officiated until 1882. In that year he was appointed rabbi at Bonn, where he remained until his death.

Cohn contributed several essays to periodicals; and many of his sermons have been printed. His chief works are "Jüdische Religionsschulen Neben Höheren Lehranstalten," Breslau, 1878; "Zur Frage über die Arbeitsüberbürdung der Schüler und Schülerinnen Höherer Lehranstalten," 1881; "Die Disciplin in den Jüdischen Religionsschulen," Oels, 1881.

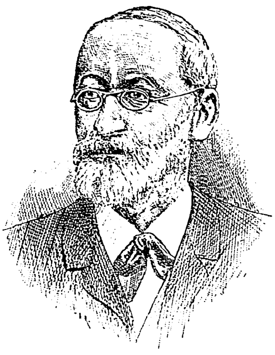
COHN, FERDINAND JULIUS: German botanist and zoologist; born in Breslau Jan. 24, 1828; died there June 25, 1898; eldest son of Isaac Cohn, an oil manufacturer, who for some time held the post of Austro-Hungarian consul, and brother of Oscar Cohn, a popular humorist and playwright whose pen-name was "Oscar Justinus," and of Max Conrad Cohn, a distinguished jurist.

Cohn studied at the gymnasium and University of Breslau, and obtained his Ph.D. degree in 1847 at Berlin. His dissertation was a study of the physiology of seeds. In it he advocated the establishment of botanical gardens for the study of the physiology of plants—a wish that he was destined to see realized largely through his own efforts. He returned to Breslau in 1848, and remained there till his death. On a dissertation, "De Cuticula," he was admitted as privat-docent in Oct., 1850; but, being a Jew, a year elapsed before he was allowed to take the oath and to teach. He received the title of professor in 1857, and two years later (1859) was appointed assistant professor. In 1872 he became professor, and was called to fill the chair vacant through the death of his old teacher, friend, and collaborator, Goeppert.



Ferdinand Julius Cohn.

In 1888, upon the opening of the Botanical Institute, which was built mainly through his untiring endeavors, he received the title of "Geheimer Regierungsrath." On the occasion of his seventieth birthday he was presented with the honorary freedom of the city of Breslau.

Cohn's work gained universal appreciation during his lifetime. He was elected a member of the following institutions and societies: Leopold - Carolinische Akademie, Royal Academy of Sciences of Berlin, Societé de Biologie de France, the Royal Microscopic Society of Great Britain, the Natural History Society of Boston, U. S. A., etc. Cohn was buried in the row of honor in the Jewish cemetery of Breslau. Though not an observing Jew, he and his wife belonged to several Jewish societies.

Cohn was a prolific writer; leaving behind him over 150 papers, essays, and books, of which the following may be mentioned: "Zur Naturgeschichte des Protococcus Pluvialis," Bonn, 1851; "Die Menschheit und die Pflanzenwelt," Breslau, 1851; "Der Haushalt der Pflanzen," Leipsic, 1854; "Untersuchungen über die Entwicklungsgeschichte der Mikroskopischen Algen und Pilze," Bonn, 1854; "Neue Untersuchungen über Bakterien," *ib.* 1872-75; "Die Pflanze," Leipsic, 1882. Cohn was also the founder and (from 1875 to his death) the editor of the "Beiträge zur Biologie der Pflanzen."

s. M. Ha.

COHN, GEORG LUDWIG: German jurist; born Sept. 19, 1845, at Breslau, Germany. He was honorary professor in German civil and commercial law at the Heidelberg University (1888). He collaborated with other scholars in compiling Endemann's "Handbuch des Handels - See - und - Wechselrechts" (1881-85), and founded the "Zeitschrift für Vergleichende Rechtswissenschaft," of which he has been editor since 1877. At present Cohn holds a professorship at the University of Zurich; lecturing on German civil and commercial law and the law of exchange and on the history of German and Swiss law.

Cohn has published "Quid Intersit Inter Civitatem Confœderatam et Confœderationem Civitatum ex Constitutionibus Germaniæ, Helvetiæ, Americæ Septentrionalis Exponitur," a prize essay, Greifswald, 1868; "Die Justizverweigerung im Altdeutschen Rechte," Carlsruhe, 1876; "Beiträge zum Einheitlichen Wechselrecht," in "Festgabe für Bluntschli," Heidelberg, 1880; "Zur Gesch. der Checks," in "Zeit. für Vergleichende Rechtswissenschaft," 1878, 1879; "Zur Lehre vom Check," *ib.* 1878, 1880; "Ueber International Gleiches Recht," in "Wiener Juristische Blätter" (has been translated into Italian by Vita Levi in vol. ii. of "Rassegna di Diritto Commerciale Italiano e Straniero"); "Der Entwurf eines Deutschen Checkgesetzes," in Hildebrand's "Jahrbuch für Nationalökonomie," 1879; "Der Entwurf einer Wechselordnung für das Russische Reich und die Neueren Wechselgesetze Belgiens, Italiens, Ungarns, Grossbritanniens, Skandinaviens, und der Schweiz," in "Zeitschr. für Vergleichende Rechtswissenschaft," 1883, iv. 1, 226; "Der Internationale Kongress für das Sogenannte Industrielle Eigenthum zu Paris," *ib.* 1880, ii. 105-130; "Das Neue Deutsche Recht in Sprüchen," 1896; 2d ed. 1899; and "Gemeindeschaft und Hausgenossenschaft," 1898.

Bibliography: Gubernatis, *Dict. International des Ecrivains du Jour*, i., Florence, 1888.

s. B. B.

COHN, GUSTAV: German economist; born Sept. 12, 1840, at Marienwerder, West Prussia. He studied at the universities of Berlin and Jena. During 1867 and 1868 he was the holder of a fellowship at the Royal Statistical Bureau of Berlin, and in 1869 became privat-docent at the University of Heidelberg, but in the same year accepted an invitation from the Polytechnikum at Riga. Cohn paid a visit to England in 1873, and the fruits of his observation and research were embodied in the masterly production "Untersuchungen über die Englische Eisenbahnpolitik," 2 vols., Leipsic, 1874-75. In 1875 he was invited to fill the chair of economics at the Eidgenössisches Polytechnikum at Zurich, which he held until 1884, when he became professor in the University of Göttingen, where he has since remained.

While at Zurich he prepared for publication his "Volkswirtschaftliche Aufsätze" (Stuttgart, 1882), and contributed to the "Göttingische Gelehrte Anzeigen" (1880, i. 97-135) an exhaustive critical review of the first volume of Wagner's "Allgemeine Volkswirtschaftlehre." The names of Wagner and Cohn have often been coupled, not only because both were classed among the Katheder-Socialisten, but also because they have much in common in their attitude toward the various so-called schools of economic science. In continuation of his study of the English railroad policy, and as the third volume of his earlier work on that subject, appeared his "Die Englische Eisenbahnpolitik der Letzten Zehn Jahre," Leipsic, 1883.

After his establishment at Göttingen a period of ardent literary activity set in. The first volume of the greatest work which he has yet produced, his "System der Nationalökonomie," was published in 1885, the very next year after his arrival. It is significant of the importance and character of this work that two such great leaders of the respective opposing "schools" as Wagner and Schmoller should unite in praising it.

In 1886 he contributed to the "Jahrbuch für Nationalökonomie" (vol. xiii., No. 6), "Zur Fabrikgesetzgebung," a review of government reports on factory legislation in Switzerland and Saxony, and to the "Jahrbuch für Gesetzgebung" (x. 3), "Erörterungen über die Fiskalische Behandlung der Verkehrsanstalten." In that year, too, appeared his "Nationalökonomische Studien," Stuttgart, 1886.

The year 1889 witnessed the publication of the second volume of his "System der Nationalökonomie," and his "Finanzwissenschaft."

Cohn was elected a regular member of the Gesellschaft der Wissenschaften at Göttingen in 1894; and in 1896 the Prussian Order of the Red Eagle of the fourth class was conferred upon him. After an interval of nearly ten years he completed the third volume of the "System der Nationalökonomie," which was also issued under the title "Nationalökonomie des Handels- und Verkehrswesens: Ein Lesebuch für Studierende," Stuttgart, 1898. To the "Jahrbuch für Nationalökonomie" (vi., Jan., 1901) he contributed "Ueber die Vereinigung der Staatswissenschaften mit den Juristenfacultäten."

(vol. xii., new series), No. 3.

S. M. Co.

COHN, HERMANN L.: German ophthalmologist; born at Breslau June 4, 1838. After graduating from the gymnasium of his native town he studied chemistry and physics at the University of Heidelberg under Bunsen, Kirchhoff, and Helmholtz, and at the University of Breslau, receiving the degree of doctor of philosophy in 1860. In the same year he commenced the study of medicine at the University of Breslau, obtaining his M.D. degree from the University of Berlin in 1863.

From 1863 to 1866 Cohn was assistant to Förster, settling in Breslau in the latter year as an ophthalmologist. In 1868 he was admitted to the university as privat-docent with the inaugural essay "Ueber Xerosis Conjunctivæ," and was elected assistant professor in 1874. In 1883 he received the state's gold medal in hygiene.

Cohn noticed that many pupils in the schools of Germany were obliged to wear glasses at an early age. As an oculist he became interested in the matter, and tracing the source of the evil back to the schools, gave special attention to their hygienic conditions in relation to ophthalmology. Most of Cohn's writings treat of this branch of medicine, in which he has achieved great results. The following list of works affords an insight into his labors: "Untersuchungen der Augen von 10,060 Schulkindern Nebst Vorschlägen zur Verbesserung der den Augen Nachteiligen Schuleinrichtungen," Leipsic, 1867; "Schussverletzungen des Auges," Erlangen, 1872; "Die Schulhäuser und Schultische auf der Wiener Weltausstellung," Breslau, 1873; "Die Schul Hygiene auf der Pariser Weltaustellung," *ib.* 1879; "Studien über Angeborene Farbenblindheit," *ib.* 1879; "Die Hygiene des Auges in den Schulen," Vienna, 1883 (translated into English by Turnbull, London, 1886, and into Russian by Medem, Pultawa, 1887); "Ueber den Einfluss Hygienischer Massregeln der Schulmyopie," Breslau, 1890; "Lehrbuch der Hygiene des Auges," Vienna, 1892 (his greatest work); "Dreissig Jahre Augenärztlicher und Akademischer Lehrthätigkeit," Breslau, 1897; "Sehleistungen von 50,000 Breslauer Schulkindern," *ib.* 1899; "Wie Müssen Bücher und Zeitungen Gedrückt Worden?" *ib.* 1902.

Cohn has been a very prolific writer, and has contributed nearly 250 essays on ophthalmology and hygiene to medical and other journals.

COHN, LASSAR (known also as **Lassar-Cohn**): German chemist; born at Hamburg Sept. 6, 1858. After attending the gymnasium at Königsberg, he studied chemistry at different universities, taking his doctor's degree in 1880. He worked for a number of years in various chemical establishments; delivered public lectures in Munich; became privat-docent at Königsberg in 1888; and was appointed professor in 1894.

His works, published under the name "Lassar-Cohn," include: "Arbeitsmethoden für Organisch-chemische Laboratorien," 3d ed., 1902; "Moderne Chemie," twelve lectures to physicians, 1891; "Die Chemie im Täglichen Leben," 5th ed., 1903 (also translated into many European languages, and into Hebrew); "Einführung in die Chemie in Leichtfasslicher Form," 2d ed., 1903; "Praxis der Harnanalyse," 2d ed., 1898; "Die Säuren der Rinder- und Menschengalle," 1898; "Die Chemische Industrie," being vol. vii. of "Das Buch der Erfindungen, Gewerbe, und Industrien"; and a revised edition of Stöckhardt's "Schule der Chemie." He has also contributed to the "Berichte der Deutschen Chemischen Gesellschaft," "Annalen der Chemie," and the "Zeitschrift für Physiologische Chemie." S.

COHN, LÉON: French statesman; born in Paris March 11, 1849; second son of Albert Cohn. His early training was received at the Lycée Bonaparte in Paris. In 1866 he took the degree of "bachelier ès lettres," and three years later that of "licencié en droit." Though admitted to the bar, he soon abandoned the legal profession for a political career. In 1870 he was chosen as private secretary by Jules Simon, then minister of public instruction. On Jules Simon's retirement from public life Cohn became the editor of the "Correspondance Républicaine."

In 1876, when the cabinet of Jules Simon was reconstructed, Cohn returned to office as his "chef de cabinet," a position which he held until the dismissal of the Republican ministry by President MacMahon, May 16, 1877.

On the return of the Republicans to power, in Dec., 1877, Cohn was appointed prefect of the department of Loire-et-Cher, and afterward occupied a similar position in the departments of Somme, Haute-Garonne, and Loire. In 1896 he became paymaster-general of the department of Ardennes, from which he was transferred a few years later to the department of Eure. S.

COHN, LEOPOLD: German author and philologist; born Jan. 14, 1856, at Zempelburg, province of West Prussia. He received his education at the gymnasium at Culm, West Prussia, and at the University of Breslau, whence he was graduated as doctor of philosophy in 1878. In 1884 he became privat-docent at the Breslau University, in 1889 was appointed librarian, and in 1897 received the title of professor.

On Greek literature Cohn has written: "De Aristophane Byzantio et Suetonio Tranquillo Eustathi Auctoribus," Leipsic, 1881; "Untersuchungen über die Quellen der Plato-Scholien," Leipsic, 1884; "De Heraclide Milesio Grammatico," Berlin, 1884; "Zu den Paroemiographen," Breslau, 1887; and "Zur Handschriftlichen Ueberlieferung, Kritik und Quellenkunde der Paroemiographen," Leipsic, 1892.

To Jewish literature he has contributed the following: "Philonis Alexandrini Libellus de Opificio Mundi," Breslau, 1889; "Philonis Alexandrini Opera quæ Supersunt" (with Paul Wendland), vol. i., Berlin, 1896; vol. ii., *ib.* 1897; vol. iii., *ib.* 1898; vol. iv., *ib.* 1902.

He has contributed to the "Jewish Quarterly Review" (Oct., 1892) "The Latest Researches on Philo of Alexandria," and (*ib.* 1898) "An Apocryphal Work Ascribed to Philo of Alexandria"; to the "Neue Jahrbücher für Classisches Altertum" (1898, pp. 514–540) "Philo von Alexandria"; and to "Philologus" (1899, Supplement vii., pp. 387–436) "Einteilung und Chronologie der Schriften Philos." Cohn is the author of the essay on "Griechische Lexikographie," in "Handbuch der Klassischen Altertumswissenschaft," 3d ed., ii., part i., Munich, 1900. He has also contributed articles on Greek grammarians to Pauly-Wissowa's "Real-Encyclopädie der Classischen Altertumswissenschaft."

S. F. T. H.

COHN, LUDWIG ADOLF: German historian; born in Breslau May 22, 1834; died in Göttingen Jan. 13, 1871. He belonged to a prominent family of merchants. Physically deformed as the result of an illness in childhood, he was taught by his mother till he was over eight years of age, when he went to the Magdalen Gymnasium. He entered Breslau University in 1851, and Berlin University in 1853. About this time he was stricken with a serious illness. During his slow recovery at Breslau he attended lectures by Mommsen and Junckmann, and he took his degree at the university of that city in 1856. Cohn embraced Christianity, and in 1857 became a privat-docent at Göttingen University, where he taught till his death.

His principal works, which are characterized by wide reading, keenness of criticism, and fairness of spirit, are: "Die Pegauer Annalen aus dem 12. und 13. Jahrhundert," Altenburg, 1858; "Der 30jährige Krieg," Halle, 1861; "Ein Deutscher Kaufmann aus dem 16. Jahrhundert," Göttingen, 1862; "Stammtafeln zur Geschichte der Deutschen Staaten und der Niederlande," 1864-65 (his principal work); "Geschichte Kaiser Heinrich II.," Halle, 1867; besides which he contributed many historical articles to periodicals.

COHN, MARTIN. See MELS, A.

COHN (KOHN), MESHULLAM SOLOMON: German rabbi; born about 1739; died at Fürth Dec. 17, 1819. After having spent a few years in the yeshibot of Posen and Zülz, Cohn went to the yeshibah of Jonathan Eybeschütz in Altona, from whom he received his rabbinical diploma. His first rabbinate was in Rawitsch, where he opened a small Talmudical college. He was then rabbi successively in Krotoschin, Zülz, Kempten, and Fürth, following at the last-named place R. Hirsch Janow on the death of the latter in 1785.

In 1800 Cohn was one of the signers of an act of accusation against the Frankists of Offenbach (see "Monatsschrift," xxvi. 239); and in 1811 he put under the ban the rabbi of Cassel, Löw Berlin, because the latter permitted the eating of "Hülsenfrüchte" (podded vegetables, etc.) on the Passover (compare "Monatsschrift," xxii. 192).

Of Cohn's works may be mentioned: "Sefer Bigde Kehunnah" (Garments of Priesthood), responsa, Fürth, 1807, the second part of which contains novellæ to Baba Meẓi'a and Giṭṭin; "Sefer Mish'an ha-Ḥayyim" (Prop of the Waters; see Isa. iii.), haggadic treatises, *ib.* 1811; "Naḥlat Abot" (Portion of the Fathers), homilies, *ib.* A special edition of the sermon preached by Cohn on his completing the study of the treatise Giṭṭin, was published at Fürth in 1791; and is now one of the rarities of the Frankfort Stadtbibliothek (Auct. Hebr. No. 2297).

Cohn's son Solomon was rabbi in Schnaittach, Mergentheim (1801-11), and in Zülz, where he died April 1, 1824.

S. L. L.

COHN, MORITZ (pseudonym, **Conimor**): Austrian writer; born at Kreuzburg, Silesia, Jan. 8, 1844. Educated at the high school of Brieg, he began life as a clerk in a merchant's office, devoting his spare time to writing. After some of his plays had met with success, he abandoned commerce and settled down at Vienna (1875) as an author, and has written the following: "Der Improvisator," drama, 1874; "Vor der Ehe," drama, 1876; "Ein Ritt Durch Wien," a satirical poem, 1876; "Eine Visitenkarte," drama, 1877; "Der Goldene Reif," drama, 1878; "In Eigener Falle," drama, 1881; "Im Lichte der Wahrheit," drama, 1882; "Wie Gefällt Ihnen Meine Frau," a novel, 1886; "Der Beste Gegner," drama, 1892. Cohn is a prolific contributor to the press.

BIBLIOGRAPHY: *Das Geistige Wien*, i. 72.

COHN, OSKAR JUSTINUS (also known as **Oskar Justinus**): German writer; born at Breslau Feb. 21, 1839; died at Bad Nauheim Aug. 6, 1893. Educated for a mercantile career, he succeeded his father as head of the Breslau firm founded by the elder Cohn. He was not successful as a merchant, and went into bankruptcy in 1880. Like his father and brothers, he had scientific and literary inclinations. Taking up his residence in Berlin, he turned his attention to literature. In 1861 his first dramatic effort, "Der Vereins-Held," was produced in Breslau. Cohn wrote the following comedies: "Die Getreidespekulanten," 1876; "Eine Episode aus den Pickwickiern," 1876; "Zu Spät," 1877; "Oel und Petroleum," 1877; "Der Letzte Termin," 1877; "Die Gründung aus Liebe," "Unser Ziegeuner," and "Eine Stille Familie," 1878; "Das Vierte R!," 1879; "Drei Trotzköpfe," 1880; "Gesellschaftliche Pflichten" (with H. Wilken), 1881; "Apfelröschen," 1883; "Penelope" and "Kommerzienrat Königsberger," 1883; "Ein Photographicalbum," 1885; "Kyritz-Pyritz" (with H. Wilken) and "Griechisches Feuer," 1887; "Die Liebesprobe" and "Humoristisches Kleeblatt," 1888; "In der Kinderstube," 1889. He also wrote "Der Bauherr," a tragedy, 1877, and the following novels: "Amor auf Reisen," 1888; "Berliner Humor, Auf Rollendem Rade," 1889; "In der Zehnmillionen Stadt," 1890; "Italienischer Salat," 1892; "Ein Proletarierkind," 1893; "Häuslicher Bilderbogen" (published after his death), 1894.

COHN, RUDOLF: German physiologist; born at Schneidemühl, Posen, Germany, April 23, 1862. He received his education at the Kneiphöf'sche Gymnasium and at the University of Königsberg, graduating as doctor of medicine in 1886. In the same year he became assistant at the laboratory of medical chemistry and pharmacology at Königsberg. In 1892 he was admitted to the medical faculty of his alma mater as privat-docent, and in 1898 received the title of professor.

Cohn has published several essays on chemical physiology in "Zeitschrift für Physiologische Chemie," "Archiv für Experimentelle Pathologie," and "Berichte der Berliner Chemischen Gesellschaft." Since 1893 he has been the editor of the chemical department of Hermann's "Jahresberichte für Physiologie."

s. F. T. H.

COHN, SAMUEL: German political economist; born at Bromberg 1862; died in Berlin July 30, 1900. He attended the Joachimsthal-Gymnasium, and studied philology and history at Berlin University, where he took the degree of Ph.D. After graduating he turned his attention to economics. His introduction to journalism took place when he joined the staff of the Oldenburg "Korrespondenz," and from about 1889 he contributed frequently to Berlin newspapers and periodicals. For a number of years he acted as secretary to Friedrich Goldschmidt in his economic researches and studies. Toward the close of his life Cohn was editor of the "Oekonomist." His work, "Die Finanzen des Deutschen Reiches seit Seiner Begründung" (Berlin, 1899), is the result of a number of years of labor, and is marked by the clear arrangement and the abundance of its material.

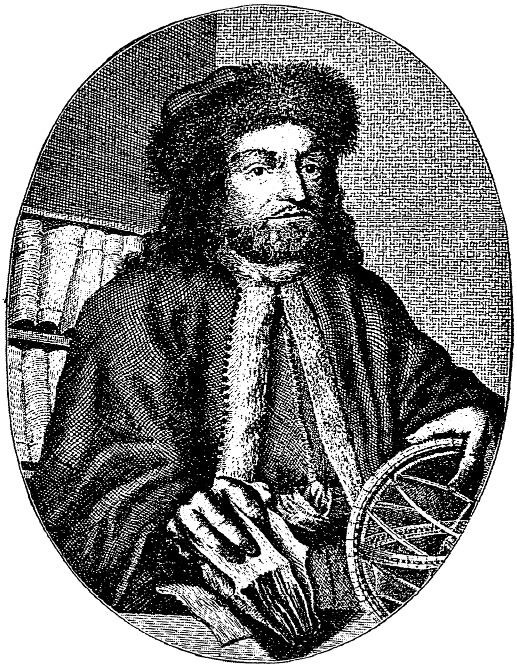
COHN, SOLOMON: German rabbi; born at Zülz, Prussian Silesia, March 24, 1822; died in Breslau Sept. 22, 1902. He was a grandson of Rabbi Meshullam Solomon Cohn of Fürth. Solomon Cohn attended the yeshibah at Presburg for a short time, and then the gymnasium and university at Breslau. At the latter institution he studied Oriental languages and philosophy, and received the degree of Ph.D.

In 1847 Cohn was called as rabbi to Oppeln, then to Maestricht, Schwerin, and in 1876 to Berlin; he retired in 1894 to Breslau. Cohn married the eldest daughter of the chief rabbi Ettlinger of Altona, who often mentions him in his responsa, "Binyan Zion." From 1878 to 1894 he lectured on homiletics at the Orthodox rabbinical seminary of Berlin.

Bibliography: Löwenstein, *Blätter für Jüd. Gesch. und Literatur*, 1902, p. 46.

s. A. F.

COHN, TOBIAS: Polish physician; born at Metz, Germany, 1652; died at Jerusalem 1729. His grandfather was the physician Eleazar Kohn, who emigrated from Palestine to Poland, and settled in Kamenetz-Podolsk, where he practised medicine until his death. His father was the Polish physician Moses Kohn of Narol, in the district of Bielsk, who moved to Metz in 1648 to escape persecution during the Cossack revolution. Tobias and his elder brother returned to Poland after the death of their father in 1673. He received his education at Cracow and the universities of Frankfort-on-the-Oder (at the expense of the great elector of Brandenburg) and Padua, graduating from the latter as doctor of medicine. He practised for some time in Poland, and removed later to Adrianople, where he became physician to five successive sultans—Mohammed IV., Sulaiman II., Aḥmad II., Mustapha II., and Aḥmad III., moving with the court to Constantinople. In 1724 he went to Jerusalem, where he lived until his death.

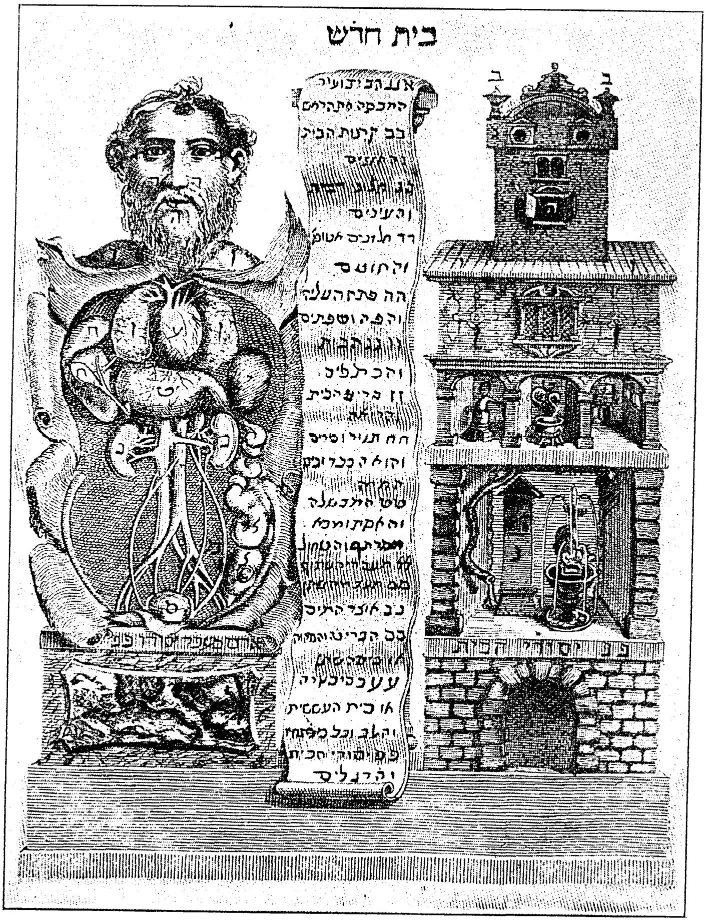


Tobias Cohn.
(From the frontispiece of his "Ma'aseh Tobiyyah," 1707.)

Cohn was familiar with nine languages—Hebrew, German, Italian, French, Spanish, Turkish, Latin, Greek, and Arabic. This great linguistic knowledge made it possible for him to write his "Ma'aseh Tobiyyah" (Work of Tobias), published in Venice in 1707, and reprinted there in 1715, 1728, 1769, and 1850. The work is encyclopedic, and is divided into eight parts: (1) theology; (2) astronomy; (3) medicine; (4) hygiene; (5) syphilitic maladies; (6) botany; (7) cosmography; and (8) an essay on the four elements.

The most important is the third part, which contains an illustration showing a human body and a house side by side and comparing the members of the former to the parts of the latter (see illustration).

In part 2 are found an astrolabe (see Jew. Encyc. ii. 244) and illustrations of astronomical and mathematical instruments. Inserted between parts 6 and 7 is a Turkish-Latin-Spanish dictionary; and prefixed to the work is a poem by Solomon Conegliano.



The House of the Body.
An allegorical design comparing the organs of the body to the divisions of a house.
(From Tobias Cohn, "Ma'aseh Tobiyyah," 1707.)

Cohn's medical knowledge and experiences seem to have been of considerable importance. He gave, from his own observations, the first description of the "plica polonica," as well as many local symptoms and newly discovered medicinal herbs. He also published in three languages a list of remedies.

He criticized the anti-Jewish professors of Frankfort-on-the-Oder as well as his coreligionists who were devoted to Cabala and committed to a blind belief in miracles.

Bibliography: Hirsch, *Biog. Lex.* s.v.; *Rev. Et. Juives*, xvii. 293; xxi. 140, 318; M. Bersohn, *Tobiasz Kohn*, Warsaw, 1872.

H. R. F. T. H.

COHN, TOBIAS: German rabbi and writer; born at Hammerstein, West Prussia, Feb. 2, 1826. After graduating from the normal school, he conducted the Jewish elementary school of his native city until 1846. He then continued his studies at Berlin, where he received his doctor's degree in 1857. During this time he was living in the house of Sarah Levy (née Itzig), then the gathering-place for the Jewish and Christian celebrities of Berlin. From 1857 to 1896 he officiated as preacher and rabbi of the community of Potsdam. With his wife, the daughter of Ludwig Philippson, he then took up his residence in Berlin.

Cohn is an honorary member of the Literarische Gesellschaft, a society composed of the intellectual leaders of Potsdam, and has been decorated with the Order of the Red Eagle. His larger works include: "Der Talmud" (1866); "Die Mosesgruppe von Rauch"; "Die Humanitätsperiode"; "Die Aufklärungsperiode"; "Die Araber im Chalifat"; "Israels Gemeinschaftsleben mit den Vorchristlichen Völkern" (1893). He also contributed many scientific essays to the "Allgemeine Zeitung des Judenthums," Geiger's "Jüdische Zeitschrift für Wissenschaft und Leben" (iv.), "Jahrbuch für die Geschichte der Juden und des Judenthums" (iv.), "Aus Alten Zeiten und Landen," "Im Deutschen Reich," etc.

S. P. R.

COHN, TOBY: German physician and medical author; born at Breslau Dec. 26, 1866. Cohn was educated at the Elisabeth gymnasium of his native city and at the universities of Breslau and Freiburg. From Sept., 1891, to Jan., 1893, he was an assistant at Wernicke's university clinic for neuropathy, and has since been assistant to Mendel at Berlin. Cohn is the author of "Klinischer Beitrag zur Kenntniss des Wasserverlaufs im Verlängerten Mark," 1894; "Infantile Hemiplegie mit Intentionstremor," 1895; "Posthemiplegische Bewegungsstörung," 1896; "Zur Symptomatologie der Gesichtslähmung," 1897; "Facialistik als Beschäftigungsneurose," 1897; "Die Mechanische Behandlung der Beschäftigungsneurosen," 1898; and "Leitfaden der Electrodiagnostik und Electrotherapie für Praktiker und Studirende," 1899.

COHNFELD, ADALBERT DOROTHEUS SOLOMON: German author; born in Pyritz, Pomerania, Aug. 3, 1809; died in Berlin Jan. 20, 1868. He lived in Breslau during the earlier part of his life, and became a physician, but was best known as the editor of the "Norddeutsche Zeitschrift für das Theater" and of the "Erinnerungsblätter." He published: "Phantasmagorien," Berlin and Züllichau, 1837, and "Die Hospitalitäten," Berlin, 1838, both novels; "Ausführliche Gesch. des Preussischen Staates," 2 vols., *ib.* 1840; "Ausführliche Lebens- und Regierungsgesch. Friedrich Wilhelm III." *ib.* 1840–41; "Die Rückkehr des Landwehrmanns," a comedy.

Bibliography: Fürst, *Bibliotheca Judaica*, i. 183.

S. N. D.

COHNHEIM, JULIUS: German pathologist; born at Demmin, Pomerania, July 20, 1839; died in Leipsic Aug. 15, 1884. He studied at the universities of Würzburg, Marburg, Greifswald, and Berlin, receiving his doctor's degree at Berlin in 1861. After taking a postgraduate course in Prague, he returned to Berlin in 1862, where he practised until 1864, when he took service as surgeon in the war against Denmark. In the fall of the same year he became assistant at the pathological institute of Berlin University under Virchow, remaining there until 1868. During this time he published several articles relating to physiological chemistry and histology, but finally turned his especial attention to pathological anatomy. In 1867 there appeared in Virchow's "Archiv für Pathologische Anatomie und Physiologie und für Klinische Medizin" (xli.) Cohnheim's essay, "Ueber Entzündung und Eiterung," which made his reputation as a pathologist. In it he proved that the emigration of the white blood-corpuscles is the origin of pus, a statement which produced a great revolution in pathology. In 1868 Cohnheim was appointed professor of pathological anatomy and general pathology in the University of Kiel; and four years later (1872) he went to the University of Breslau to fill a similar position. His work there was interrupted in the winter of 1873–74 by illness. In 1876 he accepted an invitation to become professor of pathology in the University of Leipsic, which chair he occupied until his death.

Cohnheim was the first to use the now universal method of freezing fresh pathological objects for examination; he also first demonstrated nerve-termination in "Cohnheim's areas" (polygonal areas indicating the cut ends of muscle-columns, seen in the cross-sections of striated muscle-fiber); he was the pioneer in the theory of inflammation, which is now universally accepted; and his researches in the field of pathological circulation and the causes of embolism marked a new departure in the methods of medical treatment.

Aside from his literary and experimental activity, Cohnheim was both popular and successful as a teacher.

Among his many works may be mentioned: "Ueber die Entzündung Seröser Häute," in Virchow's "Archiv für Pathologische Anatomie und Physiologie und für Klinische Medizin," xxvii.; "Zur Kenntniss der Zuckerbildenden Fermente," *ib.* xxviii.; "Ein Fall von Abscessen in Amyloid Entarteten Organen," *ib.* xxxiii.; "Ueber die Endigung der Muskelnerven," *ib.* xxxiv., and in the "Centralblatt der Medizinischen Wissenschaften," 1863; "Ueber den Feineren Bau der Quergestreiften Muskelfasern," *ib.* xxxiv. (demonstration of the "Cohnheimsche Muskelfelder" by freezing fresh muscles); "Zur Pathologischen Anatomie der Trichinen-Krankheiten," *ib.* xxxvi.; "Ueber die Endigung der Sensiblen Nerven in der Hornhaut," *ib.* xxxviii. (demonstration of the termination of the nerves in the cornea through treatment with chlorid of gold); "Ueber Entzündung und Eiterung," *ib.* xli. (mentioned above); "Ueber Venöse Stauung," *ib.* xli.; with Bernhard Fränkel, "Experimentelle Untersuchungen über die Uebertragbarkeit der Tuberkulose auf Thiere," *ib.* xlv.; "Untersuchungen über die Embolischen Processe," Berlin, 1872; "Neue Untersuchungen über die Entzündung," *ib.* 1873; "Vorlesungen über Allgemeine Pathologie," *ib.* 1877–80, 2d ed. 1882; "Die Tuberkulose vom Standpunkt der Infectionslehre," Leipsic, 2d ed., 1881. His collected works ("Gesammelte Abhandlungen," Berlin, 1885) were edited by E. Wagner, with a biography by Kühne.

Bibliography: Ponfick, *Gedächtnisrede auf Cohnheim*, Breslau, 1884; Hirsch, *Biographisches Lexicon*, s.v., Vienna, 1885; Pagel, *Biographisches Lexikon*, s.v., Vienna, 1901.

COHNHEIM, PAUL: German physician; born at Labes, in Pomerania, Dec. 2, 1867. He was educated at the gymnasium at Stettin and the universities of Berlin, Freiburg in Baden, Tübingen, and Würzburg, being graduated from the last-named as doctor of medicine in 1891. He settled in Berlin as a physician the same year, and till 1899 was assistant physician at the Boas private hospital. Since 1899 he has continued in practise as a physician, treating mainly diseases of the digestive organs.

Cohnheim is the editor of the yearly literary reports in "Archiv für Verdauungs-Krankheiten."

S. F. T. H.

COHNSTEIN, ISIDOR: German gynecologist; born at Gnesen, province of Posen, Prussia, Aug. 1, 1841; died at Charlottenburg, near Berlin, July 25, 1894. He received his education at the gymnasium of his native town and at the universities of Berlin, Prague, and Heidelberg, being graduated as doctor of medicine in 1864. In 1866 he engaged in practise as a physician in Berlin, where he was admitted to the university as privat-docent in 1868. Three years later he gave up general practise, and became a specialist in gynecology. Resigning his position in the university, he in 1877 removed to Heidelberg, where he established himself as a gynecologist.

Cohnstein has written several essays and books, especially on gynecology. Among these the following may be mentioned: "Ueber den Muskeltonus" (awarded a prize by the Brussels Academy); "Ueber Alte Erstgebärende"; "Ueber ein Neues Perforationsverfahren"; "Ueber Vaginitis Exfoliativa"; "Lehrbuch der Geburtshilfe"; "Grundriss der Gynäkologie."

Bibliography: Pagel, *Biographisches Lexikon*, s.v., Vienna, 1901.

COIMBRA: City of Portugal, capital of the province of Beira, in which there was formerly a "Juderia," or Jewish quarter, now called "Corpo de Deus." In April, 1395, the prior of the church in Coimbra and several of the clergy broke into the Jewry in order to obtain eggs (for Easter) from the Jews. The local rabbi, Solomon Catalan, the elder Isaac Passacom, and other Jews intimated to the priests that they had no right to demand eggs of the Jews, who were living in the street set apart for them. Upon this the clericals resorted to force, and broke into the house of a Jew named Jacob Alfayate. The Jews resisted and drove the importunate clericals out of the ghetto. The king protected them from further annoyances at the hands of the clergy.

Coimbra, the seat of the only Portuguese university, at which many Maranos studied, had a tribunal of the Inquisition, which, during several centuries, instituted numerous autos da fé and sentenced many secret Jews to life imprisonment or to be burned alive. Coimbra was the birthplace of Moses ibn Danon, who in 1510 wrote a Talmudic work at Fez.

COINS, COINAGE. See Numismatics.

COLCHESTER: County town of Essex, England. Jews are first mentioned as living in Colchester in 1185, and it is probable that they were involved in the massacre of 1190. The community was evidently of some importance, as it was ninth in the amount of its contribution toward the ransom of Richard I. in 1194. The community had in 1220 a special bailiff, probably for the purpose of collecting the taxes imposed upon it. In 1220 this officer was one Benedict. An agreement dated 1258, relative to the Colchester Jewry in Stockwell street, was transcribed by W. Bedwell in Roman letters, from which it was retransliterated into Hebrew by Neubauer ("Rev. Et. Juives," v. 247). In 1267 a curious incident occurred when several Jews and Christians were involved in an infringement of the forest laws. They had started and chased a doe in the woods in the neighborhood of Colchester. They were severely fined, the Jews more heavily than the others. One of the Jewish offenders escaped to Lincoln, but returned ten years later, when a portrait of him was drawn upon the Forest Roll by the scribe who had described his offense (see Aaron, Son of the Devil). The king claimed sole jurisdiction over the Jewry of Colchester, and when he granted the castle to Guy of Rochfort, he reserved the right to enter the town and hundred of Colchester to search for Jews' debts. When the Jews were expelled in 1290, nine houses and a "schola" of the Jewry escheated to the king, from which it may be assumed that the community of Colchester stood about seventh in order of importance at that time.

J.

COLENSO, JOHN WILLIAM: Bishop of Natal and English Biblical critic; born at St. Austell, Cornwall, Jan. 24, 1814; died Jan. 20, 1883. He was educated at St. John's College, Cambridge. After obtaining his degree Colenso passed some time as a teacher at Harrow, where he produced his well-known school-books on arithmetic and algebra. He became Bishop of Natal in 1853. For the purposes of his mission to the Zulus he mastered their language. He wrote and published a Zulu grammar, and translated into that language the books of Genesis, Exodus, and Samuel.

During the course of his translation he was much troubled by inquiries from the intelligent Zulus whom he used as interpreters as to the discrepancies in the different narratives contained in Genesis and Exodus. This led him to write his "Pentateuch and Book of Joshua Critically Examined," of which the first part appeared in 1862, and created great excitement in the theological world. Colenso drew attention to the arithmetical difficulties attached to the acceptance of the Biblical estimate of the number of fighting men (600,000) who left Egypt at the time of the Exodus, since this number assumes a population of over two millions. Colenso's early studies enabled him to realize the difficulties of commissariat involved in the movement of such large numbers. He was ultimately led to deny the Mosaic authorship of the Pentateuch, and to declare that Jeremiah was the author of the Book of Deuteronomy. He was deposed by the Bishop of Cape Town for heresy in 1863, but the act of deposition was not confirmed by the Privy Council, and Colenso remained Bishop of Natal to his death.

His work, the later parts of which show considerable advance on the somewhat crude views expressed in the earlier portions, was concluded by the publication of part seven in 1879. He was for a long time the solitary English representative of the higher criticism, and was thereby exposed to much obloquy. The well-known "Speaker's Commentary" was projected mainly in order to combat his views. These created great interest in Jewish quarters, and were answered by Dr. H. Adler and Dr. A. Benisch.

Bibliography: *Dictionary of National Biography*, s.v.

J.

COLLAR: **1.** A rendering in Judges viii. 26 of the Hebrew word נטיפות. In the other passage (Isa. iii. 19) in which it occurs it is translated "chains." In both cases the word is used in the enumeration of ornaments: in Isaiah of the Jewish women, and in Judges of the Midianite kings. The root (נטף)

means "to drop," and the word may therefore mean "drops," "pendants from the ears," etc. Targum to Judges renders it by כלילא, which Jastrow, *s.v.*, translates "wreaths," "crowns." Rashi, as is his wont, agrees with the Targum; understanding by it, however, pendants falling upon the breast, as a string of pearls (see Rashi on Isa. iii. 19, where he interchanges עינקיא and כלילא). Ḳimḥi, starting from the root "drop," finds in "naṭifah" the idea "dropper," which he interprets to mean a bottle in which perfume was carried, and from which it was dropped as occasion required. Gersonides agrees with Ḳimḥi.

2. A rendering, in Job xxx. 18, of the Hebrew word פה (כפי) where, however, the translation is scarcely warranted. The reference is merely to an opening for the head in a garment, and does not imply the elaborate idea conveyed by the word "collar" (Ex. xxviii. 32). The same word is found in Ps. cxxxiii. 2, where it indicates the top edge of the garment.

COLLEGES, RABBINICAL. See SEMINARIES, RABBINICAL.

COLLINS, CHARLOTTE (Lottie): Anglo-American actress; born in London, England, about 1865. She began her stage career at the age of five, when she made her début as a rope-dancer. Having lost both her parents while still a child, she joined her sisters, Marie and Lizzie Collins, singing and dancing with them at various music-halls. In 1890 she became famous for the song entitled "Ta-ra-ra-boom-de-ay," which she introduced at the Tivoli Music Hall in London. This song had enormous success. It was originally a boating-chant, used by sailors on the lower Mississippi. In 1892 she was engaged by Charles Frohman to sing in America.

J. V. E.

COLMAR (German, **Kolmar**): Chief town of Upper Alsace, Germany, on the Lauch and the Fecht. At the beginning of the thirteenth century Colmar had a large community of Jews, who enjoyed the favor of the municipal authorities. They occupied a special quarter, where they had a synagogue. The building was destroyed by fire in 1279.

In 1285 the emperor Rudolph I. besieged Colmar, for which the Jews were held responsible by its citizens, who declared they had induced Rudolph to attack the city; the Jews were accordingly expelled. That this charge was groundless can be seen from Rudolph's subsequent treatment of them. Meïr of Rothenburg, rabbi of Colmar, passing through Rudolph's camp, was held for a ransom of 1,500 marks. He, however, forbade his flock to pay such a heavy sum, and spent the remainder of his life in prison.

The period of banishment must have been brief, for several years later, when Adolph of Nassau, Rudolph's successor, besieged Colmar, Jews were among the defenders of the city. In 1292 the Jews of Colmar were accused of a ritual murder, and a riot ensued, in which many Jews lost their lives.

Persecutions.

More fortunate than many other Alsatian communities, Colmar escaped the persecutions of the hordes of Armleder, who, on hearing of the approach of the army of Louis of Bavaria, raised the siege. But this relief was dearly paid for. Louis of Bavaria handed over the Jews of Colmar, with their possessions, to the city for the sum of 200 marks. The year 1348 was fatal to the community of Colmar, as to all Alsatian communities. The accusation of having caused the Black Death found credence with the anti-Jewish council of Colmar. In fact, on Dec. 29, 1348, the city council announced to their fellows of Strasburg that one Hegman had, under torture, accused Jacob, the cantor of the synagogue of Strasburg, of having sent him the poison which he had put into the wells of Colmar. Thereupon the Jews, without being permitted a hearing, were burned outside the gates of the city. The place where the auto da fé occurred is still known as the "Judenloch" (Hole of the Jews). In the following year, Charles IV. of Germany absolved the inhabitants of Colmar from all responsibility for the burning of his "servi cameræ."

Jews were again admitted to Colmar, at the request of King Wenceslaus, about 1375. Nevertheless, when the latter took the part of the nobles in their quarrels with the Alsatian towns, the Jews of Colmar helped to defend the city, and refused to pay taxes for three years (1385-88). They were, therefore, together with their Christian fellow citizens, put under the ban of the empire. Later an arrangement was made between the city and the emperor, relinquishing to the former the Jewish taxes for a period of ten years; whereupon the ban was removed. Wenceslaus, however, did not forget their recalcitrance, and in 1392 annulled all the claims of the Jews against their Christian debtors.

During the reign of Robert of Bavaria the condition of the community improved. On Sept. 28, 1401, he granted the Jews of Colmar a renewal of their old privileges. But the hostility of the council of Colmar continued to manifest itself in many ways; and in 1437 the council secured from King Sigismund an edict prohibiting the citizens of Colmar from renting or selling houses to Jews without special permission from the mayor. In 1468, the council made changes in the statutes affecting Jews, and added the following clauses:

> "In addition to the yearly taxes, the Jews shall contribute to the tax for the maintenance of the fortress, and give New-Year gifts to the mayor. In case of war they shall pay supplementary taxes. They shall remain in their houses during Holy Week, Easter and the feasts of Corpus Christi and Assumption. Only unmarried children may reside with their parents, and no Jew shall harbor without special permission any foreign coreligionist. Foreign Jews shall pay, on entering the city, a 'blappert' at the gate, and a pfennig to the gatekeeper. If they wish to pass a night in the city, they shall pay one shilling. The city protects the Jews only from persons amenable to its tribunal."

At the end of 1476 the community suffered greatly at the hands of the Swiss Confederates, who, on their way to France, plundered the Jews and committed many acts of violence. Moreover, the council, fearing that the Christian inhabitants would get into trouble with the Confederates on account of the Jews, prohibited the latter from entering the

Their Banishment of 1512.

city. Thus in 1478 only two Jewish families were tolerated there. At length the council requested from Maximilian I., in Dec. 1507, permission to banish the Jews from Colmar, which request was granted in 1510 (Jan. 22). In vain the community exerted every effort to secure the repeal of the decree of banishment. All that it obtained, through the help of Josel of Rosheim, the leader of the Alsatian Jews, was the postponement of enforcement until St. George's Day, 1512. Thenceforth all Jews who came to Colmar for purposes of trade were compelled to pay a toll and to wear the yellow badge. The synagogue and the Jewish cemetery of Colmar were presented by Maximilian to his secretary, Jean Spiegel of Schlettstadt. The cemetery, however, was also used by the Jews in the seigniory of Ribeaupierre. The council was therefore constrained to take over both the cemetery and the buildings formerly belonging to the Jews, paying an indemnity to both Jean Spiegel and William of Ribeaupierre.

The council was not yet satisfied. The banished Jews settled in the neighboring villages, and came daily to Colmar to transact business with its citizens. The council therefore passed a law prohibiting Jews from depositing their merchandise with Christians. On Feb. 2, 1534, the council passed another law forbidding the inhabitants, under penalty of loss of citizenship, to harbor Jews. These laws remaining without effect, the council solicited and obtained from Charles V. (April 25, 1541) permission to forbid them from entering Colmar. Through the intervention again of Josel of Rosheim the imperial chancelry, a month later (May 24, 1541), renewed all the privileges previously enjoyed by the Jews of Colmar. These contradictory enactments became the occasion of litigation between the city and the Jews, lasting eight years, the Jews being ultimately defeated.

Recent History.

Until 1691 no Jew set foot into Colmar. A community, however, began to form in 1789; and its history, from that time on, differs little from that of other communities in France and Germany. With the introduction of the system of consistories (1808) Colmar became the seat of one, with twenty-five dependent communities. At present (1903) Isidore Weill is grand rabbi of the consistory. The district of Colmar includes about 11,000 Jews. There are several benevolent societies, the most noteworthy of which are the Société de Patronage des Jeunes Israélites and the Société des Dames. See Alsace.

COLOGNA, ABRAHAM. See Abraham de Cologna.

COLOGNE (German, **Köln** or **Cöln**; Latin, **Colonia Agrippina**): Chief city of Rhenish Prussia. There are indications that a Jewish community existed here long before Christianity had become dominant. The first official document, however, concerning the Jews of Cologne dates from the time of Constantine, who issued a decree (Dec. 11, 321) abolishing their privilege of exemption from onerous municipal offices ("Codex Theodosianus," iii. 16, 8). His successors, especially Theodosius II., did not content themselves with the withdrawal of old privileges, but curtailed the civic rights of the Jews. Happily for the Jews of Cologne, it fell, in 462, into the hands of the Franks; and a long period of freedom and prosperity for the Jews of that city followed, though many attempts were made by the fanatical clergy to disturb the harmony and interrupt the friendship existing between the Jews and the Christians.

First Beginnings.

In 881 the Jewish community of Cologne ceased to exist, the city having been reduced to ashes by the Norman invaders. It was, however, soon rebuilt, and under the wise rule of the archbishops, which made the city a great industrial and commercial center, a prosperous and numerous Jewish community came into existence during the tenth century, accumulating material wealth and learning in an eminent degree. As in the old city, the Jews occupied a special quarter, situated between the city hall and the Church of St. Laurentius, although they were allowed to reside wherever they chose. They had a synagogue and a Talmudical school, the origin of which is ascribed to Amram of Mayence.

In 1010 a new and richly decorated synagogue was erected, and about the same time a hospital (הקדש) was built by a philanthropist named Eliakim ben Mordecai. The community was administered by a chief rabbi, officially called "episcopus Judæorum," who was elected annually. He was assisted by a council of twelve dayyanim, whose decisions had legal force. Disputes between Christians and Jews had to be decided by the Jewish council; and in grave criminal cases, in which the Jewish council was incompetent to decide, a Jew could be convicted only on evidence corroborated by a Jewish witness.

The Jews were engaged in all branches of commerce, trading especially in wool, leather, fur, and jewelry. They were also allowed to hold public offices; and many a Jew was entrusted by his Christian fellow citizens with the direction of public affairs. Thus, in the middle of the eleventh century, a Jew named Egeberth exercised the functions of burgomaster of the parish of St. Laurentius.

The First Crusade.

This golden period in the life of the Jews of Cologne was terminated by the Crusades. On May 29, 1096, the Jews of Cologne were informed of the approach of the Crusaders. Being well aware that they could expect no mercy from the pilgrims, who delighted in the spilling of Jewish blood, they sought refuge in the houses of their Christian fellow citizens, who, touched with pity, did all they could to shield them. The following day the Crusaders, on entering the city, had to content themselves with pillaging the Jewish quarter, and tearing up and defiling the scrolls of the Law. Only two Jews, Mar Isaac and Rebekah, fell victims to their rage. Both had refused to escape, and willingly accepted martyrdom. Mar Isaac was dragged to a church, and, spitting on the crucifix held up before him, was there killed.

Meanwhile the situation of the refugees became untenable, and detection was feared at every moment. The archbishop, Hermann III., who himself sheltered many Jews in his palace, decided to send them secretly away, to be housed in the neighboring towns and villages of his diocese. For three weeks the unfortunate Jews remained safely in their new hiding-places, but were finally discovered, and shared the fate of their brethren in other towns. Many ended their lives in lakes and bogs, following the example of a pious man named Samuel ben Yehiel. Standing in the water, and pronouncing a blessing, he killed his son; and his assembled coreligionists, while intoning the "Shema'" ("Hear, O Israel!") threw themselves into the Rhine. Various "Memorbücher" preserve the names of a great number of these martyrs, among whom were several proselytes; and a prayer of commemoration is recited every year at Cologne on the Sabbath preceding Pentecost.

The Second Crusade.

As soon as the horrors of the Crusade had ceased the community was reestablished by the remaining old settlers who had escaped massacre, and it was augmented by newcomers, who anticipated greater security at Cologne, as the Christian citizens of the city had shown themselves compassionate toward the Jews. Scarcely had fifty years passed in relative tranquillity when a new calamity overtook the community. The monk Rudolph arrived at Cologne (Aug. 1, 1146); and his anti-Jewish speeches soon bore fruit. Meanwhile pilgrims for the Second Crusade commenced to gather; and a renewal of the scenes of 1096 was to be apprehended. In their distress the Jews addressed themselves to Archbishop Arnold, who gave them the castle of Walkenburg and permission to defend themselves with arms. As long as they remained in this place of refuge they were safe; but as soon as they ventured forth the pilgrims, who lay in ambush, dragged them away to be baptized, torturing and killing those that resisted. In commemoration of their sufferings during the Second Crusade, the community of Cologne made the twenty-third of Nisan a fast-day.

After the departure of Rudolph the Jews of Cologne reoccupied their dwellings, and those who had under compulsion nominally embraced Christianity resumed their status and places as Jews. But other disastrous effects of the Crusades soon followed. Besides the great loss of life sustained by many communities, the traffic between Europe and the East, hitherto almost wholly controlled by Jewish merchants, passed rapidly into the hands of Christian competitors, and Jews were soon forbidden to engage in any commercial pursuit. Nor were they able to practise handicrafts, owing to the development of the gilds, which excluded Jews from membership. The only means of livelihood left to them, that of money-lending, entailed the ill will of the inhabitants. Thus the characteristic features of the history of the Jews of Cologne from the Second Crusade to their banishment were, as everywhere else, perpetual renewals of privileges—dearly paid for and almost immediately revoked—and periodical outbursts of persecution on the part of the populace.

Under Archbishop Reinald (1157–67) the Jews of Cologne were regarded as "servi cameræ," under the protection of the emperor; and the so-called protection, as it was elsewhere, was here an excuse for extortion. At the beginning of the twelfth century the archbishops of Cologne acquired temporal power over the diocese; and the protection of the Jews—in other words, the levying of taxes—was transferred by the emperor to the prelates. The Jews had now to pay, on the Feast of St. Martin, 10 marks and 6 pounds of pepper. But the archbishops understood how to extract additional taxes. Thus, the false accusation that a rich Jewish merchant and a rabbi, called Abrahams, had tendered to a saleswoman base coin in payment for their purchases, compelled the community, in order to save their lives, to pay to Archbishop Philip von Heinsberg 180 marks. Philip, however, carried extortion so far that he was subsequently called to account by the emperor Frederick Barbarossa.

Bishop Engelbert.

An exception to the general conduct of the archbishops of the thirteenth century was that of Engelbert von Berg (1216–22). As provost of the Dom he had shown his kindly feeling toward the Jews by presenting them in 1212 with five acres of land for the enlargement of their cemetery. Under his rule the Jews were really protected, and this without the payment of special taxes. A noble who had robbed and killed a Jew was condemned to death by Engelbert. During the struggles between the municipality of Cologne and Archbishop Conrad von Hochstaden (1232–61), the Jews distinguished themselves by their courage in defending the city against the archiepiscopal troops. The municipality showed its gratitude by including them in the treaty of peace of March, 1252. A month later (April 27) Conrad granted the Jews a special privilege for two years.

Thirteenth Century.

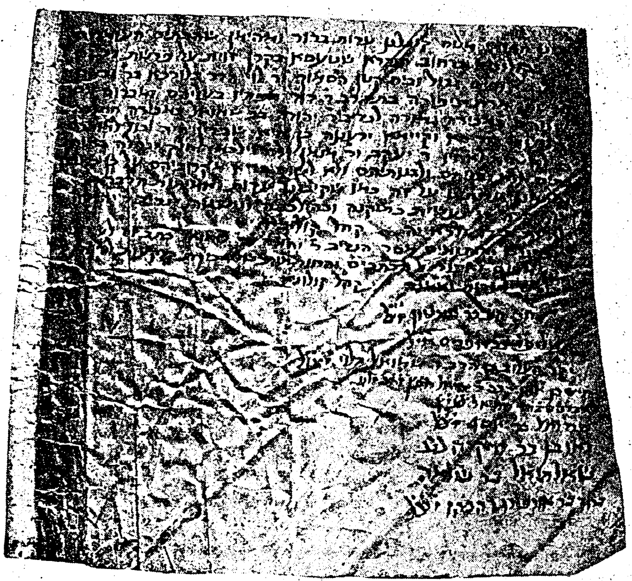
Meanwhile the state of the Jews in Germany generally grew worse from year to year; and the community of Cologne was largely increased by refugees from neighboring towns. The consequence was renewed trouble and violence. Thus in 1266 (June 15), on a charge of having furnished arms to the invading Mongols and Tatars, the community had to mourn twelve additional martyrs, including Rabbi Isaac ben Simson. Whenever possible, the archbishops, for whom the Jews were an inexhaustible source of revenue, quelled the popular outbreaks, and the Jews were safer at Cologne than elsewhere in Germany. In the same year a new privilege was granted, modeled on that of 1252, but with several additional clauses, and with the following stipulations: that no execution should take place in or near the Jews' cemetery; that a foreign Jew might be buried therein; that Jews, whencesoever they might come, should not pay, in the territory of the archbishop, higher taxes than Christians; the archbishop should not tolerate in the city of Cologne any Cauwercini or Christian usurers.

These clauses were engraved on stone tablets in the wall of the treasury of the Dom.

Archbishop Wicbold (1297–1304) renewed the privilege in 1302 for the sum of 1,200 marks and a yearly payment of 60 marks, in addition to an existing payment of 1,600 shillings to the municipality.

The Black Death.

In 1349 the sweeping accusation that the Jews had caused the Black Death by poisoning the wells and the rivers, stirred the ever-ready populace to violence. The municipality, be it said to its honor, did all in its power to prevent the impending catastrophe, assuring the inhabitants that the plague was a punishment from God. It even encouraged the municipality of Strasburg, in a letter addressed to the burgomaster of that city, to stand by the Jews. But all these exhortations were of no avail: the executioners would not let slip their prey. Seeing that escape was hopeless, the elders of the community, in a council held on the eve of St. Bartholomew's Day, decided that, in case of an attack, instead of being dragged to church for compulsory baptism, they would set fire to their houses and die with their wives and children in the flames. They had not long to wait. On St. Bartholomew's Day (Aug. 24, 1349) the Jewish quarter was attacked; fire broke out simultaneously in different parts of it, and the whole community perished. It remained only for the authorities to dispose of the spoils; an agreement was made, in 1350, between the archbishop and the municipality by which the former secured the possessions of the victims.



Hebrew Deed of Conveyance by Cologne Jews.

(From the "Judenschreinbuch" of the thirteenth century.)

For more than twenty years there were no Jews in Cologne. The first new settlers were one Schaaf and his son-in-law, who had to pay 1,000 gulden for admission to the city. It was agreed that each family admitted should pay 100 gulden for protection. Fourteen families settled in the year 1372, paying together 2,000 gulden for admission and 1,150 gulden annually for protection. In 1372 Archbishop Frederick III., in return for a yearly payment of 70 marks, granted privileges similar to those of his predecessors. The old cemetery near Severinsgate was restored to the community; and on St. Thomas' Day, in the following year, the municipality issued a letter of protection, in which it acknowledged the benefits derived from the Jews.

Expulsion Through the Dominicans in 1426.

About this time the Jews began to acquire houses in the Judengasse, Botengasse, and Burgerstrasse. A part of their old synagogue was restored to them; and in 1372 they acquired the remainder. But this relatively happy state of affairs did not last. The increasing influence of the Dominicans, who had established their headquarters at Cologne—a center of the Hussite movement—showed itself in the enactment, in 1404, of laws prescribing special garments for Jews. On the other hand, the municipality, weary of the struggle against the archbishops, who illegally arrested Jews whenever they needed money, eagerly embraced the opportunity to remove the cause of the discord, and therefore refused, in 1426, to renew the Jewish privileges. The Jews had to leave the city, and thenceforth were not allowed even to pass a night in Cologne. Their synagogue was converted into a chapel, which still exists under the name of "Rathscapelle."

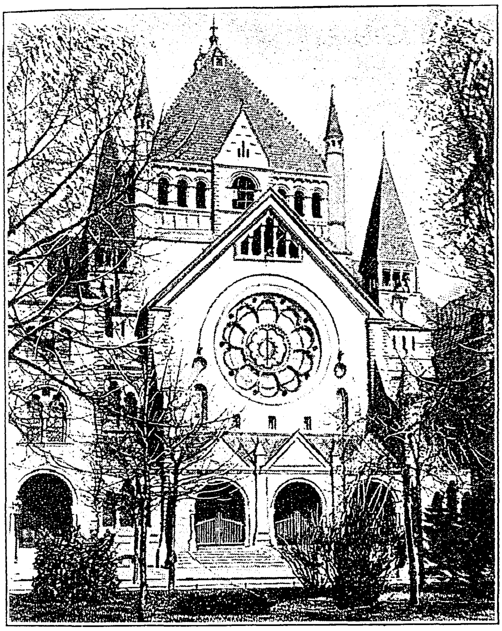
Though Cologne had ceased to be a home for Jews, it remained during the fifteenth and sixteenth centuries the center of an anti-Jewish movement. Thence arose the crusades against Jewish books; and baptized Jews like Victor of Carben and John Pfefferkorn found it a fertile field for their anti-Jewish propaganda. Reuchlin encountered there his bitterest enemies, the Dominicans, who converted the inhabitants of the once liberal city into a bigoted mob. Even after the Protestant reform movement had triumphed, Cologne remained the citadel of the reactionary spirit. Jews of neighboring towns had the greatest difficulty in obtaining permission to stay in the city even for twenty-four hours. Not until 1798, when Cologne became a part of the French republic, were its gates opened to Jews.

In 1798 Joseph Isaac Stern of Mühlheim and his family, availing themselves of the declaration of the new government that each one was responsible to his own conscience for his religious belief, settled in Cologne as French citizens. Four years later seventeen other families, including that of Solomon

Re-admission.

Oppenheim, selected Cologne for their abode. A community was then formed and the statutes were drafted; but it increased very slowly, especially when Cologne in 1815 was annexed to Prussia. At that time there were only thirty families; and this number increased but little in the following twenty years.

In 1820 the government charged the leaders of the community, Solomon Oppenheim and Solomon Marcus Cohen, with the supervision of the Jewish primary school, in which Joshua Schloss, Elkan Levi, Joseph Gottschalk, and Marcus Mannheimer were successively the teachers. The school was then attended by thirty pupils. In 1843 the community consisted of forty-six families, and was included in the rabbinate of Bonn, to which it contributed a yearly payment of 130 to 140 thalers. It took the leadership in the struggle for Jewish emancipation in Germany. In 1847 it summoned the Rhenish communities to a general assembly; and its leader, the municipal councilor Abraham Oppenheim, was sent to Berlin in order to prevent the passage of several impending anti-Jewish laws.



Synagogue at Cologne.
(After a photograph.)

With the emancipation of the Jews in Germany the community increased, and in 1854 Dr. Israel Schwarz was nominated rabbi. In 1867 a beautiful synagogue, erected in the Glockengasse at the expense of Abraham von Oppenheim, was consecrated. In 1876 the seminary for teachers, founded at Düsseldorf in 1867, was transferred to Cologne and placed under the direction of Dr. Plato, rabbi of the Orthodox congregation 'Adat Yeshurun, until his death in 1902; a new synagogue was dedicated in 1899, in the presence of representatives of both the state and the municipality. The liberal congregation has two rabbis, Dr. S. Frank, who, in 1876, succeeded Rabbi Israel Schwarz, and the recently nominated Dr. Ludwig Rosenthal.

Institutions and Societies.

At present (1902) the community numbers about 10,000 Jews. They are engaged in all branches of commerce and industry, and many of them follow the liberal professions. The community maintains numerous benevolent societies, of which the most important are: an asylum for sick and old; Der Philanthropist, an institution for the promotion of arts and handicrafts; Quelle des Heiles, for the relief of needy tradesmen; Gemilut Ḥasadim, for lending without interest; Semikut Dallim, founded in 1849; Kotnot Or, for furnishing clothing to children of the poor; Armenverein, for the relief of the poor; Frauenverein, founded in 1820; and Waisenstiftung, founded in 1878.

Among the recently erected institutions are: B'nai B'rith Rheinlandloge; an institute for training Jewish female nurses; a society for the study of Jewish history and literature; a children's settlement; and Das Jüdische Lehrlingsheim, a home for Jewish apprentices. The Central-Komitee der Zionist-Vereinigung für Deutschland has its seat in Cologne.

Distinguished Cologne Jews.

In the Middle Ages, Cologne was a center of Jewish learning, and the "wise of Cologne" are frequently mentioned in rabbinical literature. A characteristic of the Talmudical authorities of that city was their liberality. Many a liturgical poem which still has a place in the Ashkenazic ritual was composed by poets of Cologne. The names of many rabbis and scholars have been preserved: the legendary Amram, traditional founder of the Talmudic school in the tenth century; R. Jacob ben Yaḳḳar, disciple of Gerson Meor ha-Golah (1050); the liturgist Eliakim ben Joseph; Eliezer ben Nathan (1070–1152), the chronicler of the First Crusade; the poet Eliezer ben Simson, who, together with the last named, took part in the famous assembly of French and German rabbis about the middle of the twelfth century; the Tosafist Samuel ben Natronai and his son Mordecai; the liturgist Joel ben Isaac ha-Levi (d. 1200); Uri ben Eliakim (middle of the twelfth century); R. Eliakim ben Judah; Ephraim ben Jacob of Bonn (b. 1132), the chronicler of the Second Crusade. The last lost at Cologne, in 1171, his son Eliakim, a promising youth, who was murdered in the street. His tombstone is still to be seen in the cemetery of Cologne.

Among the rabbis and scholars of the thirteenth century were: Eliezer ben Joel ha-Levi; Uri ben Joel ha-Levi; Jehiel ben Uri, father of R. Asher; Isaac ben Simson (martyred in 1266); Isaac ben Abraham, brother of the Tosafist Simson ben Abraham of Sens (martyred in 1266 at Sinzig); R. Isaiah ben Nehemiah (also martyred in 1266 at Sinzig); the liturgist Eliezer ben Ḥayyim; Ḥayyim ben Jehiel (d. 1314) and Asher ben Jehiel (b. *c.* 1250; d. 1327); Yaḳḳar ben Samuel ha-Levi; Reuben ben Hezekiah of Boppard; Abraham ben Samuel; Judah ben Meïr; Samuel ben Joseph; Ḥayyim ben Shaltiel; Nathan ben Joel ha-Levi; Jacob Azriel ben Asher ha-Levi; Meïr ben Moses; Eliezer ben Judah ha-Kohen, most of whom are known as commentators on the Bible.

The rabbis and scholars of the fourteenth century include: Samuel ben Menahem, Talmudist and liturgist; Jedidiah ben Israel, disciple of Meïr of Rothenburg; and Mordecai ben Samuel. These three are called in the municipal sources "Gottschalk," "Moyter," and "Süsskind." The rabbi who officiated at the time of the banishment was Jekuthiel ben Moses Möln ha-Levi (Pruno Süsskind).

COLOMBIA. See United States of Colombia.

COLON. See Panama.

COLON, JOSEPH B. SOLOMON: The foremost Talmudist of Italy in the second half of the fifteenth century; born probably at Chambéry, Savoy, about 1420; died at Padua 1480. Colon (whose name is probably identical with the French "colombe," dove) belonged to the scholarly family of the Trabots, who emigrated from France to Italy in the fifteenth century. The teachers of the boy were his father—himself an eminent Talmudist—and a certain Mordecai b. Nathan. Colon left his home at an early age—not, however, as Grätz says ("Gesch." 3d ed., viii. 253), in consequence of the expulsion of the Jews from Savoy, which took place in 1471. For a time he led a wandering life, and was forced to gain his living by teaching children.

About 1469 he officiated as rabbi in Pieve de Sacco, in Venetian territory, whence he went to Mestre, near Venice. There he became acquainted with a pupil of Israel Isserlein, and was influenced by him in favor of the German Talmudists. Subsequently Colon was rabbi at Bologna and Mantua, and he became involved in a quarrel with Messer Leon, both being banished by the authorities. Thereupon he was made a rabbi at Pavia, and there he became the center of Talmudic learning in Italy. At the same time Colon's decisions in civil as well as religious questions were sought from far and wide—from German cities, such as Ulm and Nuremberg, as well as from Constantinople. He wrote a commentary on the Pentateuch, and novellæ on the Talmud and on the legal codex (סמ"ג) of Moses of Coucy; but the responsa, collected after his death by his son-in-law Gershon and by one of his pupils, Ḥayya Meïr b. David, are all that have been printed of Colon's works (ed. princeps, Venice, 1519; several later editions).

His Responsa.

Colon's responsa, which are among the classical productions in this field of rabbinical literature, exercised a great influence on the development of rabbinical law. One of the most important was his responsum No. 1, in which he decided that no one could be forced to take a case to an outside court when there was a court in the place where the defendant (נתבע) was living; for it often happened that rich people took their cases to foreign rabbis in order to make the poor surrender. His responsum No. 4, addressed to the congregation of Regensburg, is also highly important. A number of Jews of that community having been falsely accused, and a sum of money having to be raised for their ransom, the surrounding places and neighboring communities refused to contribute, at least in so far as it was a question of paying a fixed tax instead of making voluntary contributions. Colon decided that the communities in question could not refuse to pay their share, since the same false accusation (בלבול) might be made against them also, and if the accused in this case were proved innocent and ransomed, they would then be safe from danger.

In his responsa Colon endeavored not only to decide the case in hand, but to establish general principles according to which similar or related cases might be decided. In addition to an astonishing range of reading in the entire rabbinical literature, Colon displays a critical insight into the treatment of the Talmud that is remarkable for his time. This is all the more noteworthy since he was entirely under the influence of the German Talmudists, which preponderated in northern Italy. Colon's great self-confidence is remarkable; he paid little attention to Jacob ben Asher's "Ṭurim," even then considered the most authoritative law codices; and he cared as little for mere custom (Responsa, No. 161, end). He had, besides, an inflexible regard for right and justice, and never stopped to consider persons. This becomes especially evident in the sharp yet duly respectful manner in which he reproved Israel Bruna, the foremost Talmudist of Germany of his time, when the latter presumed to act as judge in a certain dispute, though he was himself one of the contending parties.

His Dispute with Capsali.

It was natural that a man of Colon's stamp should sometimes be carried too far in his zeal for truth and justice; and this happened in his dispute with Capsali, the ḥakam-bashi of Turkey. Having been falsely informed by an emissary ("meshullaḥ") in behalf of the people of Jerusalem that Capsali was very lax in divorce decisions, that he had declared that the betrothed (ארוסה) of a man who had become converted to Christianity should be considered as single, and that he had declared an engagement (קדושין) void because it had not been entered into according to the laws of the community, Colon, in order to establish the sanctity and inviolability of marriage beyond the power of any individual rabbi, wrote three letters (Resp. Nos. 83, 84, 85) to the president and leaders of the community of Constantinople, threatening to place Capsali under the ban if he did not recall his decisions and do public penance; and at the same time making it understood that in no case would Capsali ever again be allowed to fill the office of rabbi (Resp. No. 83). This decree of an Italian rabbi pronounced against a Turkish colleague was an unprecedented attack on the rights of the community, and provoked the righteous indignation of the Constantinople community—all the more as it proved to rest upon a groundless and vulgar calumny. Capsali, conscious of having been maligned, did not mince matters in answering Colon's letters; and a bitter discussion arose between the two men, in which the leading rabbis of Germany, Italy, and the Orient took part. It is characteristic of Colon that as soon as he became convinced that he had been the victim of an intrigue, and so had done injustice to the ḥakam bashi, he did not hesitate to make amends. On his death-bed he commissioned his son Perez to go to Constantinople and ask, in his father's name, the forgiveness of Capsali.

COLONIAL JEWISH MONTHLY. See Periodicals.

COLONNE, JULES EDOUARD: French musician; born at Bordeaux July 23, 1838. He studied at the Paris Conservatory, where he was awarded the first prize for harmony and for the violin. He gave up a position as first violinist at the Grand Opera in order to found the Association Artistique des Concerts du Châtelet in 1874. By these concerts Colonne popularized the works of Berlioz, whose "L'Enfance du Christ," "Les Troyens," and especially "La Damnation de Faust," the one hundredth performance of which was given in 1898, were frequently rendered. He also gave prominence to the works of the younger French composers, such as Massenet, Dubois, Lalo, Vincent d'Yndy, as well as to the masterpieces of foreign composers.

The Association Artistique des Concerts du Châtelet, well known at Paris under the name of "Concerts Colonne," won signal success. Colonne was appointed leader of the official concerts of the Exposition of 1878. In 1891 he was appointed leader of the orchestra at the Opéra, his initial performance being in "Lohengrin." At the Exposition of 1900 he conducted the concerts in "Old Paris." Colonne has given many successful concerts in foreign countries, and has also introduced to France, through the medium of his association, the most prominent of contemporary German conductors, like Siegfried Wagner, Mottl, etc. Colonne is an officer of the Legion of Honor.

s. M. Bl.

COLOPHON: An inscription or device placed at the end of books, generally with the intention of showing the title, the writer's or the printer's name, the date, and the place of printing. Originally the certificate of the illuminator, it was used by the early printers to attest that the work had been done by a reputable man and in a reputable manner. Early prints attempted only to reproduce faithfully the manuscripts. As these at times had neither title-page nor colophon, some of the earliest prints are wanting in both. This is true of such early Hebrew prints as the *editio princeps* of Maimonides' "Mishneh Torah" and Jacob b. Asher's "Ṭurim" (Soncino, *c.* 1490). In the "Diḳduḳ" of Elijah Levita (Isny, 1542) a poem takes the place of the usual colophon. In other works the colophon is extremely short, containing simply the word תם ("It is ended"); or אמן אמן סלה ועד, as in Naḥmanides' "Perush ha-Torah" (before 1480); or תם ונשלם תלע (= תהלה לאלהי עולם) ("Finished and ended! Praise be to the Lord of the world!"), as at the end of the *editio princeps* of the Hebrew version of Avicenna's "Canon" (Naples, 1491).

Substitutes for, or Supplements to, Title-Page.

In the course of time colophons grew in length, practically taking the place of the modern title-page. But even when the Hebrew title-page grew in size and completeness the colophon was still used, and either duplicated or supplemented the information given in the title-page. The colophons were used to extol the merits of the book as well as the excellence of its typography. Characteristic of the Hebrew colophons is the religious character imparted to them by an expression of thanks to God that the work had been happily completed, or a prayer that those who had assisted might be spared to do similar work for many years to come. The hope of the restoration of Palestine, and of the rebuilding of the Temple, often finds expression also. In the Soncino (1485) edition of the "'Iḳḳarim" Isaiah ii. 3 is curiously changed into "From Zion goes forth the Law, and the word of the Lord from Soncino," eulogistic of the printer's profession. These colophons, which often mention the "printer" (מדפיס or מחוקק), the "superintendent of the printing-office" (נצב על הדפוס), the "typesetter" (מצרף, מסדר, פועל, or מסדר ומפזר), give us valuable information which can not otherwise be obtained. The colophon to Ḳimḥi's commentary on the Psalms (1477) states that 300 copies of the book were printed. The word דפוס is first used for "print" in the colophon of the Ferrara (1477) edition of Gersonides on Job. Steinschneider states that the oldest book containing such a notice is the "Leshon Limmudim" (Constantinople, 1542); but the Constantinople Alfasi (1509) contains one also.

Additions to Colophons.

The Constantinople prints are noted for their long colophons. Those in the early Venice prints are shorter, probably because most of the printers were Christians. Many of the early Italian prints, however, do contain lengthy colophons. Thus the "Maḥzor" of Castel-Maggiore (1486) contains, after the usual ending, "Ended and finished. Praise be to the Lord of the world," a very long account of the book itself, stating where the printing was commenced and where it was finished, with verses interspersed. This is followed by an invocation. The "Seder Tefillot" (Mantua, 1558) has a long colophon giving the date and place, and the name of the ruler ("Our Lord, Duke William Gonzago") of the country in which the city was situated, the names of all those who took part in the work, and ends with "For the sake of His mercy may He make us worthy to produce very many books and to exalt the Law. Amen." The date was often given in a Chronogram. The first edition of the "Yosippon" contains a long colophon, in which the editor, Abraham Conti, gives an account of himself; this is followed by the real epilogue of the work, and this in turn by a distich giving his name and the date, the initial letters of the last line being the numerical equivalent of the printer's name. Where a work was printed in several volumes, each volume is apt to have a colophon of its own. Thus in the Bologna "Maḥzor" (1540) the colophon at the end of the first volume is in verse, commencing "Finished is the first part; Praise be to the Lord of the world"; it is then followed by the wish that the printer may be enabled to commence the second volume. Volume two contains the main colophon, with the date and an expression of thanks to God that the printer has been able to finish the work.

At times the printer uses the colophon to implore the pardon of the reader for any mistakes which may have crept into the text, as in the Bologna (1538) edition of the "Sefer ha-Ḥasidim," or in the colophon attached by Meïr b. Jacob Parenẓ to "Kaftor wa-Feraḥ" (Venice, 1546). The value of the Hebrew colophon is enhanced at times by the addition of historical notes. The Fano (1506) edition of the "Cuzari" contains an account of the Yaḥya family of Lisbon. Simon Ashenburg's "Debeḳ Ṭob" (Venice, 1588) has in the colophon a long note by the corrector, in which an account is given of the author's journey to Jerusalem. In Elijah b. Ḥayyim's "Imre Shefer" (Frankfort, 1713) Judah Löb b. Joseph tells us that he did not put his name on the title-page because he was daily waiting to receive a privilege from the emperor to print the Talmud. The Constantinople (1562) edition of the "Emunot" contains a long note by the editor, Solomon Ya'beẓ, about the author, and the translation of his work from the Arabic.

Historical Notes in Colophons.

Colophons were also at times used to call special attention to some one person who had assisted in the work. Thus, the Amsterdam edition (1711) of the "Seder 'Olam" contains, after a very simple formula, and on a separate page, a eulogistic notice of R. Hirsch of Szebrszescyn for the assistance which he had given to the printers.

Colophon and Printer's Mark on the Last Page of "Tefillot Vulgar" (Mantua, 1561).

(In the Columbia University Library, New York.)

Hebrew colophons were occasionally written in meter, as were those in some of the early Latin prints of Franz Rinner, the Speyers of Venice, and Ulric Hahn of Rome. Usually the verses are merely complimentary to the author. These colophons at times attain a surprising length. In the Rimini edition (1525) of Rashi's Pentateuch commentary, Moses Soncino takes one whole page to explain how he came to reprint the work. Solomon Alḳabiẓ's "Shoresh Yishai" (Constantinople, 1561) contains on a separate page a series of verses by Samuel Shullam in praise of the commentary. Some of these additions to the colophon are headed by a title, as חתימת המדפים ("Last word of the printer"), attached to the Amsterdam (1765) edition of Jos. b. David's "Mebin Ḥidot." In the Amsterdam (1651) edition of Manasseh b. Israel's "Nishmat Ḥayyim," after the real colophon containing the date of printing and the printer's name, Jacob Sasportas has added five pages of corrections and a long account of how he came in contact with Manasseh, and headed by the title התנצלות המגיה ("Apology of the corrector"). A remarkable exaggeration of the colophon may be seen in the Karaite Pentateuch (Constantinople, 1833), which contains not only notes on the correctors and poems in honor of the work, but also an account of the men who contributed money to make the printing possible. Such notes are not unusual in Karaite books.

Compound Colophons.

At times several colophons are to be found; for instance, in Menahem Ẓiyyuni's cabalistic commentary to the Pentateuch (Cremona, 1560). The principal colophon, giving the date and place, is found on page 104. This is followed by two and a half pages of verse, and these in turn by a short colophon בנ"קך וא"עי (compare Isa. xl. 29). Dei Rossi's "Me'or 'Enayim" (Mantua, 1574) contains on page 184 the words תם . ברוך ה' לעולם . אמן אמן, "Stampato in Mantova con licenza dei superiori"; then follow several pages of additions, with a colophon; an index, with the note "Et questo con la detta licenza"; and a השגה (critique), followed by the words "Con la detta licenza."

COLOPHON OF ABRAHAM CONAT ON THE LAST PAGE OF LEVI BEN GERSON'S COMMENTARY ON THE BIBLE (MANTUA, BEFORE 1480).

(In the Columbia University Library, New York.)

Colophons are almost invariably in Hebrew, though occasionally, especially in Italy, some Latin or Italian words are added; thus in the Venice edition (1582) of "Shalshelet ha-Ḳabbalah," after the words "It is finished," are found the words "In Venetia apresso Gio. de Garra. Con licentia de Superiori." Eliezer Ashkenazi's "Yosef Leḳaḥ" (Cremona, 1576) has the addition "In Cremona. Appresso Christoforo Draconi 1576. Con licenza de Superiori." The Venice (1625) edition of the "Sefer ha-Yashar" has as colophon an Italian permit, given by the ecclesiastical authorities, dated 1615, and countersigned by Georgio Domini (1625), secretary of the "Magistr. Ecclest. contra la Biastema." Such colophons are somewhat rare.

Copyright.

Still more rare was the custom of adding, after the expression "Finished and ended," a warning against any editor reprinting the book within a specified time. Thus in the "Sefer ha-Miḳḳaḥ u-Mimkar" of Hai Gaon, edited by Moses Mintz (Venice, 1602), such a prohibition, covering a period of ten years, is printed in the colophon. To this the editor adds a note in regard to the translation of the work from the Arabic, and a long colophon giving the dates of the commencement and the conclusion of the work, to which is attached the Aramaic formula בריך רחמנא דסייען מריש ועד כען ("Blessed be the Merciful One, who has helped us from the beginning to the end"). A similar copyright privilege is found in the colophon to Ibn Baruk's commentary to Ecclesiastes (Venice, 1598); though where such copyrights are published they were generally found following the title-page, and were known technically as "haskamot" (see Approbation).

Side by side with these long colophons shorter ones were in use. In the Augsburg edition of the "Arba' Ṭurim" (1540) we have simply the names of the three publishers, Ḥayyim bar David, Joseph bar Yaḳar, and Isaac bar Ḥayyim, in large letters. These names, however, are preceded by a long poem by Joseph bar Yaḳar, addressed to Jacob b. Baruch. Such small colophons became more general as the title-page was enlarged. They usually read: תם ונשלם . שבח לאלהים בורא עלום, "Finished and complete. Praise be to the Lord, Creator of the World" (very often abbreviated to תושלבע), and were followed by the names of the printers; or ברוך השם דסייען עד כען, as in Heidenheim's "Mishpeṭe ha-Ṭe'amim" (Rödelheim, 1808). Such abbreviated formulas appear quite early. Albo's "Iḳḳarim" (Soncino, 1485) has the letters תלו"לה; it is signed by המחוקק השונצינו. The benediction is sometimes omitted in the short colophon, the date being retained. Abraham Bibago's "Derek Emunah" (Constantinople, 1521) has simply תם ונשלם . נשלם זה הספר להדפים בחשון שנת ר"פ"ב. The colophon was still further shortened into either the simple תם (or its Aramaic equivalent סליק; or סליק הספר), or חזק ונתחזק (compare II Sam. x. 12); or both combined, as in the "Pisḳe Ḥallah" of Rashba' (Constantinople, 1516).

In Hebrew books the colophon was usually printed in the same type as that used in the body of the work, or even in smaller rabbinical type. Only occasionally were larger characters used, to bring prominently before the reader the names of the printers; *e.g.*, in the Augsburg "Ṭurim" mentioned above, and in Abraham Ẓahalon's "Yesha' Elohim" (Venice, 1595), which bears in large letters, covering an entire page, the abbreviations תושלבע בנלך לקי ואעי (= Isa. xl. 29 + Gen. xlix. 18).

Typography.

Occasionally the printer's mark was added after the colophon, though already given on the title-page. Such marks are found at the end of the "Arba' Ṭurim" (Ixar, 1485), of Baḥya's "Kad ha-Ḳemaḥ" (Constantinople, 1515), of the Constantinople edition (1514) of "Pirḳe R. Eliezer," and of Cresca's "Or Adonai" (Ferrara, 1556), printed by Abraham Usque.

The eccentric arrangement of the type, in the form of funnel, diamond, wine-cup, wedge, or pyramid, as found in early Latin prints, is only occasionally met with in Hebrew books. The most common form is that of the inverted cone, where the lines taper either to a very short line or to a single word. This custom is found in many Hebrew manuscripts; it being an old idea that nothing should be left blank upon the last page of a copy of the Torah ("Soferim," ed. Müller, p. 20). For colophons in manuscripts see Manuscripts.

Bibliography: Steinschneider and Cassel, *Jüdische Typographie*, in Ersch and Gruber, *Encyc.* pp. 26 *et seq.*.; Zunz, *Z. G.* pp. 214 *et seq.*; a number of early colophons are reproduced in Berliner's *Ueber dem Einfluss des Ersten Hebr. Buchdrucks*, Frankfort, 1896, and in his *Aus Meiner Bibliothek*, ib. 1898; compare De Vinne, *Title-Pages as Seen by a Printer*, pp. 1-14, New York, 1901.

J. G.

COLOR: It is noteworthy that Biblical Hebrew contains no term to express that property of light known as color. When a Hebrew writer wishes to compare an object with another in respect to color, he employs the word עין ("eye") or מראה ("appearance"). The former term is thus used in speaking of the appearance of the plague (Lev. xiii. 55), of bdellium (Num. xi. 7), of wine (Prov. xxiii. 31), of amber (Ezek. i. 4, 27; viii. 2), of burnished or polished brass (*ib.* i. 7; Dan. x. 6), of beryl (Ezek. i. 16, x. 9), and of crystal (*ib.* i. 22). The latter term is used of brass (*ib.* xl. 3).

In rabbinical literature are found the Aramaic "ḥazuta" (appearance, Ḥul. 47b), "guf" (body, Men. 44a), "ḳeren" (ray, Niddah ii. 6), "or" (light, Num. R. ii. 7; compare Luria, note 10 *ad loc.*), "ẓeba'" (dye, paint, *ib.* = the Aramaic "ẓib'a") (Shab. 75a), the Persian loan-word "gawwan" ('Er. 53b = Aramaic "gawna"; compare Targ. Yer. to Lev. xv. 19: "color of saffron"), and כרום, אכרום, the Greek *χρῶμα* (compare Krauss, "Lehnwörter," ii., *s.v.*; see, however, Jastrow, "Dict." *s.v.*).

Intensity of color is expressed by the terms "'amoḳ" (deep, Tosef., Niddah, iii. 11), "'az" (strong, Neg. i. 1), "'ad me'od" (to a high degree, Num. R. ii. 7), or syntactically by such expressions as "adamdam she-ba'adummim" (deep red, Neg. xi. 4), "yeraḳraḳ sheba-yeroḳim" (deep green, *ib.*).

Intensity of Color.

Faintness or paleness of color is expressed by "kehah" (dim, faint, Lev. xiii. 39; Neg. ii. 2) or by "deheh" (Neg. i. 2). The same idea is expressed by reduplication, as "adamdam" (reddish), "yeraḳraḳ" (greenish, Lev. xiii. 49), and "sheḥarḥar" (blackish, swarthy, Cant. i. 6). Dark colors are expressed by "mashḥir" (Niddah 19a) or "maḳdir" (Yer. Niddah ii. 50b); bright, vivid, is "meẓaḥẓeaḥ" (*ib.*); dingy, dirty, is "ka'ur" (ugly, B. Ḳ. ix. 4), "meko'ar," "meko'ar," the same (Baraita Niddah; Horowitz, "Uralte Tosephtas," V. ii., § 1); and clear (of liquids), "ẓalul" = Aramaic "ẓil" (Num. R. ii. 7; Ḥul. 55b).

There are but few real color-terms found in Biblical or traditional literature. Only white, and two of the elementary colors, red and green, are distinguished by name; while for blue and yellow distinct terms are entirely wanting. The other elementary colors are expressed by words denoting degrees of lightness and darkness; while non-elementary colors are indicated by the names of the objects from which they are derived. Moreover, one and the same word is used to denote not only several shades of one color, but even what are now known as different colors; the context, or the object to which the color was applied, affording the clue as to the particular color intended.

Scarcity of Color-Names.

The scarcity of color-names found in the Bible and other ancient literatures has been differently accounted for by various scholars. All that can with certainty be said of the ancients in this respect is that their color vocabulary was undeveloped.

To the psychological reasons for such an undeveloped state among all nations of antiquity (compare Wundt, "Völkerpsychologie: Die Sprache," ii. 513, 514) was added, in the case of the Israelites, the religious prohibition of idolatry at a period of history when painting, like other arts, was largely, if not altogether, in the service of idolatry. Needlework in colors, as well as dyed stuffs, was indeed known in Israel in very early times (compare Dyeing; Embroidery), but the coloring was in all probability of a simple kind.

In the determination of the various color-terms, notwithstanding the aid which the context and etymology offer, it is at times impossible to arrive at very definite conclusions. In the following lists the Biblical data are given under *a*; the data from traditional literature, inclusive of the Targumim, under *b*.

(*a*) "Zak" (literally, "clear," "pure") is applied in the Bible to the whiteness of the complexion (Lam. iv. 7); "ẓahob" (glistening like gold), to the golden tint of hair (Lev. xiii. 30, 32, 36); the hof'al participle "muẓhab," to brass (Ezra viii. 27); "ẓaḥ" (glowing, glistening), to the glow of a healthy complexion (Cant. v. 10); similarly, with the additional idea of whiteness, in Lam. iv. 7; to the clearness of a dry, hot atmosphere (Isa. xviii. 4); and to a dry, hot wind (Jer. iv. 11); "ẓaḥor" (light reddish; A. V. "white"), to the color of the ass (Judges v. 10).

Degrees of Lightness.

(*b*) "Bahaḳ" (be glistening white) is used in the later Hebrew to denote the color of the human skin in a diseased condition (Bek. 45b; compare Lev. xiii. 39); "hibhiḳ" (to glisten), is used of jewels (Gen. R. xxxi. 11); *idem* (be bright), of the countenance (Pesiḳ. R. xiv. [ed. Friedmann, p. 62b]); "hiẓhib" (become golden-hued), of a dove's plumage (Ḥul. 22b); "hiẓhib" (to become glistening), of the metallic color of the dove's plumage (Ḥul. *ib.*), an earlier stage of coloration of plumage than the preceding hizhib; "ẓihub," of the getting of such color (*ib.*); "hiẓhil" (become bright), of the countenance (Gen. R. xcvii. 1); "hiẓhir" (make bright), of the skin (Lev. R. v. 3).

Aramaic: "barir" (pure) = "zak" (Targ. to Lam. iv. 7); "ẓehal" = Hebr. "hiẓhil" (Pesiḳ. R. *l.c.*); "ẓehir" (bright) and "ẓihara" (brightness), used of the surface of peeled grain, and of a clear, translucent liquid (Beẓah 14b; Ḳid. 48b); "faẓiaḥ" (clear) = Hebr. "ẓaḥ" (Targ. to Isa. xviii. 4), and (speckled) = Hebr. "bared" (Targ. to Zech. vi. 3).

(*a*) The usual term in the Bible to express the idea of darkness is "shaḥor" (black). It is used of the dark hair in a leprous scall (Lev. xiii. 31, 37), of a sunburnt skin (Job xxx. 30; Cant. i. 5) and of dark horses (Zech. vi. 2). The diminutive form "sheḥarḥor" is applied to swarthy complexion (Cant. i. 6). When it is desired to express a particular shade of dark, another substantive is added for a closer definition, as "oven-black" (Lam. v. 10), and "raven-black," of hair (Cant. v. 11). "Ḥum" (literally, "hot," then "dark," "brown") is used of the wool of sheep (Gen. xxx. 32 and *passim*). "Ḳadar," meaning primarily "to overpower," then "to be sad, gloomy, dirty, or dark" (compare the explanation of "shaḥuf," below), is applied to the turbid state of water (Job vi. 16), to a sad countenance (Jer. viii. 21), to mourning garments, to the gates of a mourning city (Jer. xiv. 2), and to the sky (*ib.* iv. 28). The hif'il of the same verb is used in a causative sense; *e.g.*, "make dark" the heavens (Ezek. xxxii. 7, 8), "cause sadness" (*ib.* xxxi. 15). The hitpa'el of this verb means "to become dark" with clouds of the sky (I Kings xviii. 45). The noun "ḳadrut" signifies "blackness." (Isa. l. 3); and the adverb "ḳedorannit," "wrapped in mourning" (Mal. iii. 14).

Degrees of Darkness.

"Ḥashak" (to be dark), a word generally employed to signify the darkness of approaching night (Isa. v. 30; Job xviii. 6), is also used of the eyes becoming dim (Lam. v. 17) or blind (Ps. lxix. 24), and of a black complexion (Lam. iv. 8). Hence the terms "ḥoshek" (darkness), "ḥaklili" (Gen. xlix. 12), and "ḥaklilut" (Prov. xxiii. 29) refer to the darkly lustrous or inflamed appearance of the eyes. The second, as used in Gen. xlix. 12, refers to the sparkling luster of dark-red wine, comparing the beauty of Judah's eyes therewith; the third (Prov. xxiii. 29) is descriptive of the inflamed eyes due to protracted night sessions over the wine-cup at the wine-shops (see Jastrow, "Proc. Soc. of Biblical Exegesis," xi. 128). "Kimrir" (Job iii. 5), originally "casting down," "oppression," seems to mean "blackness" (compare "shaḥuf," below).

(*b*) In the later Hebrew "shaḥor" is frequently more nearly defined as "ink-black" (Niddah ii. 7), or "black as the sediment of ink" (*ib.*), like black wax, pitch, grapes, olives (*ib.*), "mouse-gray" (Pes. 10b), or as black as a negro (Suk. iii. 6). In Num. R. ii. 7, the term "shaḥor" is applied to "bareḳet," probably taken here as sardonyx, and described as consisting of one-third white, one-third black, and one-third red; to "sappir," black like stibium (*i.e.*, metallic grayish-blue [?]; to "leshem" and to "shebo," probably gray amethyst, said to be mixed black and white. The "shoham"—here the deep sea-green beryl—is said to be "shaḥor 'ad meod" (very dark). Hence, "shaḥrurit" = the Aramaic "shaḥrurita" (blackness, darkness, Ta'anit 23b; B. Ḳ. 20b; B. M. 117b) and the by-form "sheḥarḥarut" (Cant. R. i. 6). "Sheḥamtit" (brownish), of the color of grain (B. B. v. 6), is sometimes contracted to "shamtit" (Yer. Ma'as. Sh. iv. 54d).

Aramaic: "sheḥum," "sheḥim," literally "warm," "hot," = the Hebrew "ḥum" (brown, Targ. O. to Gen. xxx. 32).

"Shaḥuf" or "ṭaḥuf" (gray, dark), a term which is used of sheep's wool (Ḥul. xi. 2, 136b), goes back to "saḥaf" (cast down). The variation in the first consonant points to a differentiation of an original "thakhaf." (On the development of meaning from the idea of overpowering, casting down, oppressing, to that of darkness, compare "ḳadar," above, and Levias, "Babyl. Aram. Gram." p. 210, note 6). "Piḥem (to blacken, soil), denominative of "peḥam" (coal, is used of soot, the sun, and other things. The passive of this may be used in the pu'al and nitpa'el (compare Jastrow, "Dict." *s.v.*). The verb "shetak" is used to designate "rust-colored" or "bronze" (Ta'an. 8a).

Aramaic: "ukkam," originally signifies "oppressed," then "black" (compare Levias, *l.c.*); "leḥush," literally "glowing," then "brown" (Targ. Yer. to Gen. xxx. 32, 33, 35); "ḥalid" (rust-colored [?]); compare Targ. Job xi. 17 Ms.; Jastrow, "Dict." *s.v.*). "Ḳewaḥ" or "ḳaḥaḥ" (deep black) is applied to horses (Targ. to Zech. i. 8).

Degrees of White.

(*a*) White is usually expressed in the Bible by the word "laban," which is used of the color of goats (Gen. xxx. 35, 37), of teeth (*ib.* xlix. 12), of manna (Ex. xvi. 31), of leprous hair (Lev. xiii.), of garments (Eccl. ix. 8), and of horses (Zech. i. 8; vi. 3, 6). Shades of white are: milk-white (Gen. xlix. 12), coriander-seed-white (Ex. xvi. 31), snow-white (Num. xii. 10; II Kings v. 27; Ps. lxviii. 15 [A. V. 14]; Isa. i. 18), and dull white (Lev. xiii. 39). Hence the noun "loben" (whiteness, Ecclus. [Sirach] xliii. 18). The moon, on account of its pale light, is called "lebanah."

The Aramaic terms corresponding to "laban" are "ḥawar," used of the face becoming pale with shame (Isa. xxix. 22), and "ḥiwwar" (white), applied to a snow-white garment (Dan. vii. 9).

(*b*) The white color may be as white as snow, as the calcimining in the Temple, as wool, as the cuticle of the egg (Neg. i., referring to the color of leprous spots), as pearl (Yoma 75a), or as the wood below the bark (Ḥul. 47b). The color of the stone "yahalom," probably milky opal, is white (Num. R. ii. 7). "Libbun" (whitening) is used of wool (B. Ḳ. 93b). "Libben" means "to bleach cloth" (Yer. Ber. ix. 1, 13c), "to glaze tiles" (Beẓah iv. 7), "to heat to a white heat iron instruments" ('Ab. Zarah v. 12). "Hilbin" signifies "to grow white," used of hair (Neg. i. 6); "to whiten the wing of a raven" (Cant. R. v. 11); "to cause paleness of face through shame" (Ab. iii. 11). Hence, "labnunit" (whiteness, Neg. iv. 4), and the by-form "labnut" (Lev. R. xiv.). The verb "kasaf," in various forms, is used to indicate paleness of countenance caused by shame or fright (compare Jastrow, "Dict." *s.v.*). The word is perhaps connected with "kesef" (silver). Notice also "lawḳan," "labḳan" = the Greek λευκόν (albino, or white-spotted in the face, Ber. 58b). To express the idea of the hair becoming grayish-white through old age, the root "sib" is used (I Sam. xii. 2; Job xv. 10), whence the derivative "sebah," meaning "gray hair" (Gen. xlii. 38; xliv. 29, 31; Deut. xxxii. 25; Hos. vii. 9; Prov. xx. 29), or the "hoary hair" of old age (Isa. xlvi. 4).

In Aramaic the roots "ḥawar," "kesaf," and "sib" are used in the same senses as in Hebrew; add to which "ḳiṭman" (ash-gray, Targ. to Zech. vi. 3, 7).

Red.

(*a*) Red is expressed by "adom," a term probably connected with "dam" (blood). It is applied to blood (II Kings iii. 22), to blood-stained apparel (Isa. lxiii. 3), to a heifer (Num. xix. 2), to a horse (Zech. i. 8), and to brownish yellow lentils (Gen. xxv. 30). The adjective "admoni" describes a reddish-brown complexion (Gen. xxv. 25; I Sam. xvi. 12). Verbal forms are used of becoming as red as crimson (Isa. i. 18), of skins dyed red (Ex. xxv. 5), and of a blood-besmeared shield (Nahum ii. 4 [A. V. 3]). The diminutive form of the adjective "adamdam" expresses "reddish," applied to the color of the leprous spot (Lev. xiii. 19, 24) or a sore (*ib.* xiii. 42).

Other terms occasionally occur which denote some shade of red, as "saroḳ" (reddish-brown, sorrel), applied to horses (Zech. i. 8); and "ḥamuẓ," some shade of red not more closely defined (Isa. lxiii. 3). "Amoẓ" (Zech. vi. 7), translated by the Targum "ash-gray," stands, in the opinion of modern scholars, for "hameẓ" (red; compare Gesenius-Buhl, "Hebräisches und Chaldäisches Handwörterbuch," *s.v.*). Some trace the root "ḥamar" (to be red) in Ps. lxxv. 9 and Job xvi. 16.

(*b*) Redness is applied in Talmudic literature to the scarlet lily (Cant. R. vii. 3), to collyrium (Lam. R. iv. 15), to wine (Num. R. ii. 7), to the ruby (*ib.*), and in the hif'il form is used also of "putting to the blush" (Num. R. iv. 20). Deep red is "adamdam she-ba'adummim" (Neg. xi. 4). Hence are formed the nouns "odem" (Niddah 32b), "admut" (Num. R. ii. 7, where אדמתו, ed. Wilna, is to be corrected to אדמותו), and "admumit" (redness, Ḥul. 87b). Compare also "giḥor" (red of complexion, Ber. 58b; Bek. vii. 6, 45b).

The usual term for red in Aramaic is "summaḳa" (reddish) or "simmuḳa" (compare Jastrow, "Dict." *s.v.*). Occasionally are found "giḥora," and "giḥya," "gihya" (Bek. 45b). The latter properly means "flame-colored."

Green, Blue, and Yellow.

(*a*) The term "yaraḳ," originally "pale," is used to describe those uncertain colors which waver between green, yellow, and blue. It is applied to the color of vegetation (Job xxxix. 8; II Kings xix. 26; Isa. xxxvii. 27), the fading color of decaying vegetation (Deut. xxviii. 22; Amos iv. 9; Hag. ii. 17), or of a panic-stricken countenance (Jer. xxx. 6). "Yeraḳraḳ" (greenish or yellowish) is used of the appearance of plague-spots (Lev. xiii. 49, xiv.

37) and of gold (Ps. lxviii. 13). The term "ḥaraẓ," applied to gold, probably means "yellow."

(*b*) The same root ירק is used in later Hebrew and Aramaic for green, yellow, and blue (compare Yoreh De'ah, 188, 1). Green is given as the color of leek (Ber. i. 2; Suk. iii. 6), and of myrtle (Meg. 13a). Yellow is the color of crocus (Niddah ii. 6; Ḥul. 47b), of cuscuta (Ḥul. *l.c.*), and of the yolk of an egg (*ib.*). The color of the "tarshish" (probably chrysolite or olivin) is like that of clear olive-oil (Num. R. ii. 7). Hence, "moriḳa" (crocus) and "yeraḳon" (jaundice). The verb "horiḳ" (Gen. R. xiii.; Ber. 44b) is used to denote "making pallid," "pale," especially the pale yellowish color of a frightened countenance (Soṭah iii. 4). The same idea is conveyed by the verb "kirkem," a denominative of the noun "karkom" (crocus). Compare, further, "moriḳa" (saffron-colored), from מרק, a by-form of ירק (Levias, "Am. Jour. Semitic Lang." xvi. 250); "ḥardali" (mustard-colored), used of the color of wine (Shab. 63a), "ḳela'illan," an adaptation of κελαῖνον (sea-green, blue; compare Krauss, *l.c.* s.v.).

Variegated Surfaces: (*a*) A party-colored appearance of one kind or another is denoted by the following terms: "barod" (grizzled, used of goats, Gen. xxxi. 10, 12; and piebald, of horses, Zech. vi. 3, 6); "ṭalu" (literally, "patched," hence "besprinkled," "flecked"), used of goats (Gen. xxx. 32 *et seq.*) and of dyed stuffs of many colors (Ezek. xvi. 16); "naḳod" (literally, "dotted," hence "speckled," having light spots on a dark skin), used of goats (Gen. xxx. 32; xxxi. 8, 10, 12); "'aḳod" (ring-streaked; literally, "tied"), referring to light stripes on a dark skin (Gen. xxx. 35, 39; xxxi. 8, 10, 12), the stripes resembling ropes.

(*b*) From "namer" (leopard) the verb "nimmer" is derived, having the meaning of giving a checkered or striped appearance to something, and is used of the appearance of a field in which the fruits have been gathered in some places and left standing in others (Peah iii. 2), or of a checkered web (B. Ḳ. 119b), or of writing, in which a number of words are stricken out (Giṭ. 54b). "Patuk" (mixed) is applied to the color of plague-spots, and is described as looking like wine mixed with snow, or wine mixed with water, or milk before being mixed (Neg. i. 2).

In Aramaic the following terms are used: "nemor" (speckled; compare "nimmer," above); "regol" (ring-streaked; literally, "having some spots on the feet"); "rekoa'" (literally, "patched"), the same as the Biblical "ṭalu" (compare above); "ḳeruaḥ" (literally, "bald"; having light-colored spots on a dark skin); and "ḥuṭrana" (striped like a staff), used of swine (Shab. 110b).

Pigments: (*a*) Of pigments known and used in Biblical times, four are mentioned. Three were derived from animals and one from a metal. Scarlet or crimson was obtained from an insect (coccus), which gave its name to a species of oak (*Ilex coccifera*). By infusing the insect in boiling water a beautiful red dye was produced, superior in effect and durability to cochineal. To designate this color the word "tola'" (worm) is used (Isa. i. 18; Lam. iv. 5). More often, however, the form "tola'at" is found preceded or followed by "shani," a word supposed to mean "to glitter." In this form it is mentioned as a costly possession (Ex. xxxv. 23), and as being, therefore, suitable for an offering (Ex. xxv. 4, xxxv. 6; Lev. xiv.; Num. xix. 6), for the Tabernacle hangings (Ex. xxvi. 36, xxvii. 16, xxxvi. 37, xxxviii. 18), for the ephod (Ex. xxviii. 56, xxxix. 28), etc. A thread of this color was commonly used in early times as a sign to aid recognition (Gen. xxxviii. 28, 30; Josh. ii. 21). In these passages, as well as in II Sam. i. 24 and Cant. iv. 3, "shani" alone is used. The plural "shanim" (scarlet stuffs) occurs in Prov. xxxi. 21 and Isa. i. 18. In later times the Persian loan-word "karmil" came into use (II Chron. ii. 6, 13; iii. 14). The verbal form "metulla'im" (clothed in scarlet) occurs in Nahum ii. 4. A similar shade of color was derived from "shashar" (minium, red oxid of lead), used for painting ceilings (Jer. xxii. 14) and images (Ezek. xxiii. 14).

Scarlet.

(*b*) The Targumim and Mishnah use for scarlet the expression "zehorit," on the etymology of which compare Jensen, in Brockelmann, "Lexicon Syriacum," 93b. The Aramaic has also the adjective "tol'ana," or "tolana" ('Ab. Zarah 28b). In later times crimson was also obtained from "puah" (madder; see Rieger, "Versuch einer Technologie und Terminologie der Handwerke in der Mischnah," i. 23, note 38). From seaweeds were obtained a cosmetic rouge, "piḳas" (fucus; Rieger, *ib.*), and the mineral pigment "siḳra" (according to Löw, "Graphische Requisiten," etc., i. 165, vermilion; according to Rieger, *l.c.* p. 24, note 43, minium). A kind of scarlet was "sasgona," or "sasgewana," etymology unknown (Targ. to Cant. vii. 2).

Purples.

(*a*) The purple dyes were obtained from the "ḥallazon," a species of shell-fish called *Murex brandaris* and *Murex trunculis*, on which see Rieger (*l.c.* p. 21). It yielded purple-red (Hebrew "argaman" = Aramaic "argewan") and purple-blue or violet (Hebrew "tekelet" = Aramaic "tikla"). Both colors figure largely in the decoration of the Tabernacle and the priestly robes. In Jer. x. 9 both are mentioned as contributing to the splendor of heathen worship. In Judges viii. 26 the Midianitish chiefs are said to have worn robes of purple-red. Ezekiel (xxiii. 6) relates how the robes of purple-blue worn by the Assyrians impressed the women of Israel; and he knows also of purple-red and purple-blue from Elishah (*ib.* xxvii. 7). In Ecclus. (Sirach) xlv. 10 both dyes are mentioned as occupying a prominent place in the raiment of Moses; and ribbons of purple-blue are said to form part of the adornment of wisdom (*ib.* vi. 30). On the defeat of Gorgias, dyed stuffs of both colors were among the spoil taken by Judas Maccabeus (I Macc. iv. 23). Purple robes of office were common. Judas was struck by the fact that the Romans, notwithstanding their power and riches, were not clothed in purple (*ib.* viii. 14). When, however, Alexander appointed Jonathan high priest he sent him a purple-red robe (*ib.* x. 20); so likewise did Antiochus when he confirmed him in the office (*ib.* xi. 58). On the other hand, when the treachery of Andronicus was discovered he was at once deprived of the purple robe (II Macc. iv. 38).

(*b*) In Talmudic times purple-red was obtained also from "lakka" (lac-dye; compare Rieger, *l.c.*

i. 22). The Greek loan-word "porpira" (*πορφύρα*, "purple stuff") is very common in traditional literature (compare Krauss, *l.c.* ii., *s.v.*).

Other pigments known in Mishnaic times were "isaṭis" = *ἰσάτις* ("woad," *Isatis tinctoria*), "koẓah" (madder or safflower); "ḳelife eguzim" (the fresh shells of the walnut); "ḳelife rimmonim" (pomegranate peel); "rikpah," a kind of onion-plant; and "ḥeret" (vitriol). With the latter a black color was obtained (Rieger, *l.c.* i. 23, 24).

Symbolism of Colors: (*a*) It has been generally assumed that at times colors are used in the Bible symbolically, either in the ritual, as in the construction of the Tabernacle and in the priestly raiments; or apocalyptically, as in the visions of Zechariah and of Daniel; or, as a literary device, in poetical diction. Philo ("De Vita Mosis," iii. 6) and Josephus ("Ant." iii. 7, § 7) attempted to explain the ritual symbolism of colors, but without convincing force (see, also, Baehr, "Symbolik des Mosaischen Kultus," Heidelberg, 1874). The apocalyptic symbolism is admitted more generally; yet it fails when tested in detail. Literary symbolism, however, based on a psychological connection between the various color-sensations and moods of feeling, is found among most nations. Yet the relations between a given color and the symbolized objects or moods are not fixed; and they leave room for difference of explanation.

Black or dark color points to mourning or affliction (II Sam. xix. 24; Zech. vi. 6, 8); such was probably also the color of sackcloth used in mourning. On the other hand, white suggests purity (Isa. i. 18; Ps. li. 9) and joy (Mishnah Mid. v. 4). Scarlet or red is symbolical of bloodshed, of sin in general (Isa. i. 15, 18; lxiii. 1), and, in the opinion of some commentators, of vigorous life (Lev. xiv.; Num. xix.). Purple-red denotes royalty and royal splendor (Judges viii. 26; Esth. viii. 15; Dan. v. 7). Purple-blue, used for fringes in the garment of every Israelite (Num. xv. 38), is thought, on the one hand, to symbolize the high dignity of every member of the people of the covenant (compare Ex. xix. 6); and, on the other, to suggest the God of heaven (Gen. xxiv. 7; Ps. xi. 4), because of the same color as the sky.

(*b*) Color-symbolism plays a great part in the Cabala, where to each Sefirah are attributed one or more colors; and one who wishes to energize the influence of a certain Sefirah has to contemplate, or clothe himself in, the particular color attributed to that Sefirah. White signifies peace, mercy, and pity; black, latency of qualities; red, bloodshed, cruelty, and justice; azure, attributed to the Sefirah of wisdom, is said to denote the first step from black (latency) to the development of color—that is, active energy in general; saffron-color or yolk-yellow is considered a combination of red and white; green is said to be a combination of red, white, and azure; purple-red, a compound of all colors; golden yellow symbolizes cheering, justice, etc.

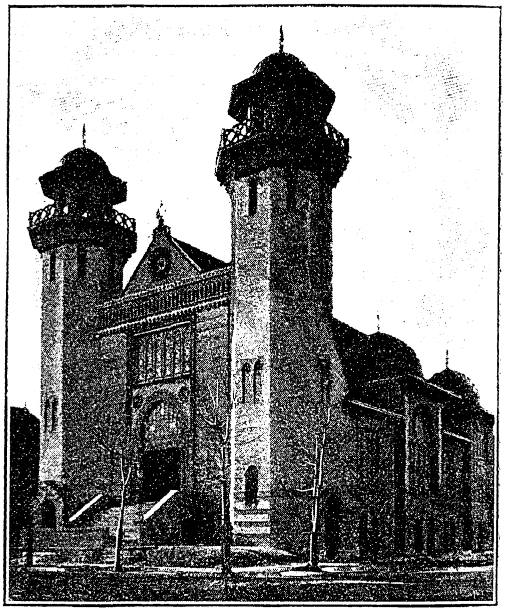
E. G. H. C. L.

COLORADO: One of the United States of North America; bounded on the north by Wyoming and Nebraska; east by Nebraska and Kansas; south by Oklahoma and New Mexico; and west by Utah. It was admitted into the Union in 1876. The excitement consequent on the discovery of gold at Pike's Peak in 1858, following the panic of 1857, which clogged the wheels of industry in the Eastern States, brought the first settlers to Colorado. There were no railroads; and the pioneers crossed the plains and mountains in wagons drawn by oxen or horses. Among the Jews who survived the hardships of the long journey, the perils from wild animals, and the attacks of savage Indians, were Isidor Deitsch, Leopold Mayer, A. Jacobs, A. Goldsmith, F. Z. Salomon, D. Kline, and others.

Denver, the capital of Colorado and the most important city of the Rocky Mountain region, was settled in 1858-59, and gradually became the center of Colorado Jewish life. In 1861 the United States government deeded to Denver a plot of ground ted for burial purposes; of this the Jews were allotten acres. A Cemetery Association was the first Jewish organization. In 1873 the Jews of Denver organized for worship, and in 1874 built Temple Emanuel, a small synagogue at 19th and Curtis streets. The members were for the most part energetic merchants of German birth. By 1882 Congregation Emanuel had outgrown the little synagogue, and a larger one was constructed at 24th and Curtis streets. This building was destroyed by fire Nov. 5, 1897, and a beautiful structure on 16th avenue and Pearl street was erected, and dedicated Jan. 29, 1899. Rabbis Block, Elkan, Schreiber, J. Mendes de Solla, and William S. Friedman have successively occupied the pulpit. A Ladies' Auxiliary, a Jewish Relief Society, mainly for indigent consumptives, and a



Temple Emanuel, Denver, Col.
(From a photograph.)

burial society, Ḥesed Shel Emeth, have also been established; and four Orthodox congregations are in existence. Denver also has lodges of the orders B'nai B'rith, Kesher Shel Barzel, Sons of Benjamin, and B'rith Abraham.

National Jewish Hospital for Consumptives.

The most important philanthropic institution in Denver is the National Jewish Hospital for Consumptives, founded by Rabbi William S. Friedman Sept. 10, 1890. This hospital became an imperative necessity by reason of the hundreds of penniless Jewish victims of tuberculosis who came to Colorado. In 1898 Denver Lodge of the Independent Order of B'nai B'rith appointed Alfred Muller chairman of a committee to urge the district Grand Lodge No. 2 of the order to espouse the cause of the consumptives by taking charge of this institution; and through his tireless energy, together with that of Rabbi W. S. Friedman, the National Jewish Hospital for Consumptives was dedicated Dec. 10, 1899.

The Constitution Grand Lodge of the order, at a meeting held in Chicago April 28, 1900, decided to tax all its members twenty-five cents yearly for the support of the hospital, and to make of it an independent corporation governed by thirty-five trustees, seven of whom should be elected by the Independent Order of B'nai B'rith—one from each district—the remainder to be chosen by the contributors. The trustees immediately added several buildings.

In 1902 M. Guggenheim's Sons donated $30,000 for a "Guggenheim Pavilion." The National Jewish Hospital for Consumptives has accommodation for ninety patients. None but indigent consumptives in the curable stages of the disease are admitted; and these come from all parts of the United States.

Denver has about 4,000 Jews, most of whom are merchants. There are, however, miners, smelter-owners, day-laborers, and many lawyers and physicians. Twelve Jewish students attend the State University at Boulder, which has a chair of Hebrew occupied by Rabbi William S. Friedman.

Colorado Springs formed a Benevolent Association Oct., 1898, and a B'nai B'rith lodge in Oct., 1901. A congregation is now being organized. Colorado Springs is a health resort, and contains 250 Jews.

Cripple Creek and the adjoining town of **Victor** have 150 Jews. There is no congregation in the district; but services are held on the holy days. The two towns have a B'nai B'rith lodge. Cripple Creek and Victor are the chief gold-mining sections in America.

Leadville in 1864 established Congregation Israel, which has 25 members. The Orthodox congregation, Keneseth Israel, has a smaller following. There are also a Jewish cemetery and a relief society. The Jewish population is 175. Leadville is a noted silver-mining camp.

Pueblo, the second city of the state, founded Congregation Emanuel, Oct. 3, 1899, with 50 members; it has a temple, and Rabbi Harry Weiss is in charge. The other Jewish organizations of Pueblo are: Ladies' Temple Association, Auxiliary Society, Jewish Woman's Council, and B'nai B'rith lodge. The Jewish population is 500. Pueblo is a growing manufacturing town.

Trinidad founded Congregation Aaron in 1883, and has a temple, with a membership of 35. L. Freudenthal, the rabbi, has officiated since 1888. The Jews number 150, and have an Auxiliary Society, a Hebrew Ladies' Aid Society, and a B'nai B'rith lodge.

There are also several hundred Jews scattered throughout the smaller towns of the state. Altogether Colorado numbers about 5,800 Jews.

A. W. S. F.

COLORNI (COLORNO), ABRAHAM: Italian engineer; born at Mantua about 1530. His great skill in his profession caused him to be much sought after, and in 1578 he held the position of engineer at the court of Alfonso d'Este, Duke of Ferrara, who, in 1588 sent him to Prague. Soon after Colorni, with his son Simon, went to Mantua, looking after Alfonso's private affairs; and then returned to the court of Alfonso d'Este, who, at the request of the duke Frederick, sent him to his court at Württemberg in 1597.

Colorni was famous not only as an engineer and mechanician, but also as one of the greatest mathematicians and archeologists of his age, and above all as a man of charming manners and many accomplishments, including dueling, his skill in which he once had occasion to exercise against a slanderer. Tommaso Garzoni, in his work "La Piazza Universale," dedicates a sonnet to Colorni, and in a subsequent letter speaks in very high terms of him. He enumerates his achievements in the field of mechanics and his inventions, and expresses the wish that the man who possesses such high qualities should also become a Christian. Among Colorni's inventions was a kind of ten-chambered revolver, of which, it is said, he made 2,000 at the request of Alfonso.

Colorni was the author of the following works: "Entimetria," rules for the measurement of straight lines (mentioned by Garzoni); "Tavole," mathematical tables (also mentioned by Garzoni); "Clavicula Solomonis," translated into Italian, at the request of the Duke of Mantua, from the Hebrew work on magic, "Mafteaḥ Shelomoh" (Mantua, 1580 ?). This translation served as a model for the French version (still extant in several manuscripts) entitled "La Clavicule du Très Savant Solomon, dans Laquelle les Secrets des Secrets Sont Ouverts et Découverts." It was probably against this work that Colorni, according to Garzoni, wrote a book in which he derided physiognomy and chiromancy. Colorni was also the author of a treatise upon the art of writing in cipher, entitled "Scotographia o Vere Scienza di Scrivere Oscuro Facilissima et Securissima per Qualsi Voglia Lingua" (Prague, 1593), and dedicated to Rodolph II.

J. I. Br.

COLORNI, MALACHI: Italian author; lived at Modena in the eighteenth century. He wrote a guide to letter-writing, "Megillat Sefer," still extant in manuscript, containing thirty-one letters (Steinschneider, "Cat. Bodl." No. 1379). He also copied a large work of the same nature, the "Sofer Mahir" by Ishmael Ḥazaḳ of the seventeenth century (Steinschneider, *ib.*). These letters contain valuable notices of the lives of famous contemporaries, as well as of events of the Italian-Jewish world of that time.

L. G. I. Ber.

COLUMBUS, CHRISTOPHER, AND THE JEWS: According to his own statement, Columbus had constant intercourse with Jews and Moors, with priests and laymen. He had personal relations with the mathematician Joseph Vecinho, physician-in-ordinary to King João II. of Portugal, and with other learned Jews of Lisbon. Vecinho presented him with his Latin translation of the astronomical tables of Abraham Zacuto, the famous mathematician, which Columbus always carried with him on his voyages of discovery and found most serviceable. He ascribed it principally to this "Jew" Vecinho, whom he mentions twice in his note-books, that the king of Portugal refused to consider his plans of discovery. At Salamanca Columbus became personally acquainted with Zacuto, whose scientific works he praised highly. At Malaga he met the Spanish farmer-in-chief of taxes, Abraham Senior, and also Isaac Abravanel, who was the first one to assist him financially in his undertakings. It is not known whether he had business relations with the Jews during his stay at Lisbon, or whether he borrowed or received aid from them in his financial difficulties there. In his testament he bequeathed half a silver mark to a Jew living by the gate of the Jews' street in Lisbon, or to the one whom a priest might designate ("a un Judio que moraba a la puerta de la Juderia en Lisboa o à quien mandare un sacerdote el valor de medio marco de plata"). See also America. The Discovery of.

COMMANDMENT: The rendering in the English Bible versions of the Hebrew מצוה, which, in its technical sense, is used in the Bible of a commandment given either by God or by man (I Kings ii. 43). According to the critical schools, it is a word of comparatively late coinage, as it does not occur in documents earlier than D and JE. In the singular it sometimes denotes the "code of law" (II Chron. viii. 13; Ezra x. 3; Ps. xix. 9), or even "Deuteronomy" alone (Deut. vi. 25, viii. 1); and as such is parallel to "Torah" (Ex. xxiv. 12). In the plural it designates specific commands contained in the code, which are as a rule expressed in sentences beginning with "Ye shall" or "Ye shall not," and is sometimes combined with "ḥuḳḳim," "ḥuḳḳot" (statutes), "mishpaṭim" (ordinances), and even "'edut" (testimonies). E. G. H.

In rabbinic terminology "miẓwah" is the general term for a divinely instituted rule of conduct. As such, the divine commandments are divided into (1) mandatory laws known as מצות עשה, and (2) those of a prohibitory character, the מצות לא תעשה. This terminology rests on the theological construction that God's will is the source of and authority for every moral and religious duty.

In due logical development of this theology, the Rabbis came to assume that the Law comprised 613 commandments (see Commandments, The 613), of which 611 are said to have been given through Moses (Deut. xxxiii. 4, תורה being numerically equal to 611); the first two commandments of the Decalogue were given by the mouth of God Himself (R. Joshua b. Levi, in Pes. R. xxii.; compare Mak. 24b–25a; Hor. 8a; Pirḳe R. El. xli.). According to R. Ismael only the principal commandments were given on Mount Sinai, the special commandments having been given in the Tent of Meeting. According to R. Akiba they were all given on Mount Sinai, repeated in the Tent of Meeting, and declared a third time by Moses before his death (Soṭah 37b; compare Mek., Mishpaṭim, xx. to Ex. xxiii. 19, and Sifre, Debarim, 104). All divine commandments, however, were given on Mount Sinai, and no prophet could add any new one (Sifra to Lev. xxvii. 34; Yoma 80a). Many of these laws concern only special classes of people, such as kings or priesthood, Levites or Nazarites, or are conditioned by local or temporary circumstances of the Jewish nation, as, for instance, the agricultural, sacrificial, and Levitical laws.

The Biblical commandments are called in the Talmud "miẓwot de oraita"; commandments of the Law in contradistinction to the rabbinical commandments, "miẓwot de rabbanan." Among the latter are: (1) the benediction, or thanksgiving for each enjoyment; (2) ablution of the hands before eating; (3) lighting of the Sabbath lamp; (4) the 'Erub, on preparation for Sabbath transfer; (5) the Hallel liturgy on holy days; (6) the Ḥanukkah lights; and (7) the reading of the Esther scroll on Purim. These seven rabbinical commandments are treated like Biblical commandments in so far as, previous to the fulfilment of each, this Benediction is recited: "Blessed be the Lord who has commanded us . . . ," the divine command being implied in the general law (Deut. xvii. 11, xxxii. 7; Shab. 23a). Many of the Biblical laws are derived from the Law only by rabbinical interpretation, as, the reading of the Shema' (Deut. vi. 4–7), the binding of the tefillin and the fixing of the mezuzah (*ib.* 8–9), and the saying of grace after meals (*ib.* viii. 10). "While reciting the Shema' every morning the Israelite takes upon himself the yoke of the kingdom of heaven; while reciting the chapter 'We-hayah im shamoa'' [Deut. xi. 13–22] he takes upon himself the yoke of the divine commandments" (Ber. ii. 1). "In fulfilling a divine commandment one must do it with the intention of thus fulfilling God's will" (Ber. 13a, b; Naz. 23a, b). A hundred miẓwot ought to be fulfilled by the Israelite each day (see Benediction), and seven ought to surround him constantly like guardian spirits (R. Meïr, in Yer. Ber., end; Tosef., Ber., end). "Also, the commonest Israelite is as full of merit by fulfilment of divine commandments as the pomegranate is of seed" (Cant. R. iv. 3). The fulfilment of a divine commandment is a merit ("mizwah"); the neglect, a transgression ("'aberah"). These are weighed against each other in the balance on the day of judgment to decide whether a man belongs to the righteous or to the wicked to be accordingly rewarded or punished ('Ab. Zarah 2a, 3a; Ḳid. 39b).

The sons of Noah were also considered to be under the obligation to obey the will of God as revealed in direct specific orders or miẓwot promulgated for them. These are variously enumerated as five, six, and ten. In Tos. 'Ab. Zarah viii. 4 seven Noachian commandments are enumerated: (1) to establish courts of justice, (2) to abstain from idolatry, (3) from blasphemy, (4) from incest, (5) from murder, (6) from robbery, (7) from eating flesh cut from living animals. In Gen. R. xvi.–xxiv. (compare *ib.* xxiv.; Lev. R. xiii.), only six are mentioned as having been given to the first man. In Sanh. 56a, 57a, seven Noachian commandments are spoken of, and derived partly as Adamitic, from Gen. ii. 16, and partly from Gen. ix. 4 *et seq.* To these some tannaim add three: the prohibition of blood from living animals, of castration, and of witchcraft. In Ḥal. 92a thirty commandments are mentioned as having been accepted, but not observed, by the sons of Noah (compare Gen. R. xcviii.; Midr. Teh. Ps. ii. 5; Yer. 'Ab. Zarah ii. 40c). In the Book of Jubilees (vii. 21) only the three capital sins are specified (see NOACHIAN LAWS).

"Miẓwah," in the parlance of the Rabbis, came to express any act of human kindness, such as the burial of the body of an unknown person ("met miẓwah"; compare Bernays, "Gesammelte Schriften," 1885, i. 278 *et seq.*, on the Buzygian laws mentioned by Philo in connection with these "commandments" of humanity; Sifre, Naso, 26; Naz. 47b). A miẓwah which can be fulfilled only by the transgression of another law is considered unlawful ("miẓwah ha-bo'ah ba'aberah, 'aberah"; Suk. 30a; Yer. Shab. xiii. 14a). The proselyte on being initiated into Judaism must be familiarized with commandments both of great and of small import (Yeb. 47b). This rule seems to be directed against the older practise followed by the Christian Church (see DIDACHE). The fulfilment of a commandment is a protection against evil powers (Ber. 31a; Pes. 8a; Soṭah 21a; Ḳid. i. 10), and becomes a guardian angel pleading for reward in the future life (Soṭah 3b).

According to the teachings of Judaism, all moral laws are virtually and in their ultimate analysis divine commandments. Obedience to the Divine Will is the first requisite of the moral life (see DUTY). This is the meaning of the Biblical account of Adam's offense. The first commandment was intended to test his obedience and thus to awaken his moral consciousness (see SIN; ORIGINAL SIN, DOGMA OF). In the Pentateuch the Ten Commandments are not designated as "Miẓwot," but are called the "Ten Words" (עשרת הדברים). In Jewish literature they are spoken of as the עשרת הדברות (see DECALOGUE).

COMMANDMENTS, THE 613: That the law of Moses contains 613 commandments is stated by R. Simlai, a Palestinian haggadist, who says (Mak. 23b): "Six hundred and thirteen commandments were revealed to Moses; 365 being prohibitions equal in number to the days of the year, and 248 being mandates corresponding in number to the bones of the human body." The number 613 is found as early as tannaitic times—*e.g.*, in a saying of Simon ben Eleazar (Mek., Yitro, Baḥodesh, 5) and one of Simon ben Azzai (Sifre, Deut. § 76, Friedman's ed., p. 90b)—and is apparently based upon ancient tradition (see Tan., Ki Teẓe, ed. Buber, 2; Ex. R. xxxii.; Num. R. xiii., xviii.; Yeb. 47b; Shab. 87a; Ned. 25a; Shebu. 29a; comp. Bacher, "Ag. Tan." i. 413, ii. 436). The authenticity of the statements attributed to R. Simlai, however, has been questioned by authorities such as Naḥmanides and Abraham ibn Ezra (see M. Bloch, in "Rev. Et. Juives," i. 197, 210; v. 27 *et seq.*; Weiss, "Dor," p. 74, note 50). The first to undertake the task of identifying the commandments was Simeon Kahira, in his "Halakot Gedolot." He begins with the prohibitions, which he classes in the order of the gravity of the punishments incurred by their transgression, while in regard to the mandates he follows the order of the parashiyyot, beginning with the Decalogue.

Kahira was followed by Saadia, Gabirol, and many others, who enumerated the 613 commandments in liturgical poems (see AZHAROT). In order to make up the number 613, Kahira and the poets just mentioned were compelled to incorporate many rabbinical laws. This method was criticized by Maimonides, who published a work entitled "Sefer ha-Miẓwot," laying down fourteen guiding principles for the identification of the commandments, which he enumerates accordingly. Some of these principles were attacked by Naḥmanides and others, who showed that Maimonides himself had not always been consistent. New identifications were therefore proposed by Moses ben Jacob of Coucy, author of the "Sefer Miẓwot ha-Gadol" (SeMaG), and Isaac ben Joseph of Corbeil, author of the "Sefer Miẓwot ha-Ḳaton" (SeMaḲ). The following is a list of the 613 commandments of Maimonides:

MANDATORY COMMANDMENTS.

1. To know that the Lord God exists. Ex. xx. 2.
2. To acknowledge His unity. Deut. vi. 4.
3–4. To love and fear Him. Deut. vi. 5, 13.
5. To pray to Him. Ex. xxiii. 25.
6. To cleave to Him. Deut. x. 20.
7. To swear by His name. Deut. vi. 13, x. 20.
8. To resemble Him in His ways. Deut. xxviii. 9.
9. To sanctify His name. Lev. xxii. 32.
10. To read the Shema' each morning and evening. Deut. vi. 7.
11. To learn and to teach others the Law. Deut. vi. 7.
12–13. To bind tefillin on the forehead and arm. Deut. vi. 8.
14. To make ẓiẓit. Num. xv. 38.
15. To fix a MEZUZAH. Deut. vi. 9.
16. To assemble the people to hear the Law every seventh year. Deut. xxxi. 12.
17. To write a copy of the Law for oneself. Deut. xxxi. 19.
18. That the king write a special copy of the Law for himself. Deut. xvii. 18.
19. To bless God after eating. Deut. viii. 10.
20. To build the Temple. Ex. xxv. 8.
21. To reverence the sanctuary. Lev. xix. 30.
22. To watch the sanctuary perpetually. Num. xviii. 2.
23. That Levites shall serve in the sanctuary. Num. xviii. 23.

24. That at services the priests wash their hands and feet. Ex. xxx. 19.
25. That the priests kindle the lights in the sanctuary. Ex. xxx. 19.
26. That the priests bless Israel. Num. vi. 23.
27. To set showbread and incense before the Lord on Sabbath. Ex. xxv. 30.
28. To burn incense twice each day. Ex. xxx. 7.
29. To keep fire continually upon the altar. Lev. vi. 13.
30. To remove the ashes daily from the altar. Lev. vi. 10.
31. To put the impure out of the holy place. Num. v. 2.
32. That the Aaronites have the place of honor. Lev. xxi. 8.
33. To clothe the Aaronites with priestly garments. Ex. xxviii. 2.
34. That the Kehathites carry the Ark upon their shoulders. Num. vii. 9.
35. To anoint high priests and kings with oil. Ex. xxx. 31.
36. That the priests officiate by turns. Deut. xviii. 6, 8.
37. That the priests pay due honors to the dead. Lev. xxi. 3.
38. That the high priest take a virgin to wife. Lev. xxi. 13.
39. To sacrifice twice a day. Num. xxviii. 3.
40. That the chief priest offer an oblation daily. Lev. vi. 20.
41–3. To offer an additional oblation every Sabbath, on the first of every month, and on the Feast of Passover. Num. xxviii. 9, xxviii. 11; Lev. xxiii. 36.
44. To offer a sheaf of the first barley on the second day of Passover. Lev. xxiii. 10.
45. To add an oblation on the day of the Feast of Shebuʿot. Num. xxviii. 26.
46. To offer two loaves of bread on Shebuʿot. Lev. xxiii. 17.
47. To add an offering on the first of Tishri. Num. xxix. 1.
48. To add an offering on the Day of Atonement. Num. xxix. 7.
49. To observe the service on the Day of Atonement. Lev. xvi. 3.
50. To add an offering on the Feast of Sukkot. Num. xxix. 13.
51. To offer a special sacrifice on the eighth day of Sukkot. Num. xxix. 35.
52. To keep the festival at the three seasons of the year. Ex. xxiii. 14.
53. That every male appear at the feast. Deut. xvi. 16.
54. To rejoice at the feasts. Deut. xvi. 14.
55–6. To slay the paschal lamb and eat the flesh roasted, on the fifteenth night of Nisan. Ex. xii. 6, xii. 8.
57–8. To observe the second Passover and eat the paschal lamb with maẓẓah and maror. Num. ix. 11, 13; ix. 11.
59. To blow the trumpets over the sacrifices, and in time of tribulation. Num. x. 10.
60. That cattle, when sacrificed, be eight days old or more. Lev. xxii. 27.
61. That all cattle sacrificed be perfect. Lev. xxii. 21.
62. That all offerings be salted. Lev. ii. 13.
63. To bring a burnt offering. Lev. i. 3.
64–7. To bring a sacrifice for sin, for trespass, a peace-offering, and a meat-offering. Lev. ii. 1, vi. 25, vii. 1, 11.
68. That the Sanhedrin bring a sin-offering if they have erred in doctrine. Lev. iv. 13.
69. That one who has by error transgressed a Karet prohibition bring a sin-offering. Lev. iv. 27, v. 1.
70. That one in doubt whether he has transgressed a prohibition bring a sin-offering. Lev. v. 17, 18.
71. That a trespass-offering be brought for having sworn falsely and the like. Lev. v. 15, 21; xix. 20.
72. To offer a sacrifice according to one's means. Lev. v. 7, 11.
73. That confession of sins be made before the Lord. Num. v. 7.
74–5. That a man or woman having an issue offer a sacrifice. Lev. xv. 13, 28.
76. That a leper after being cleansed bring an offering. Lev. xiv. 10.
77. That a woman offer a sacrifice after childbirth. Lev. xii. 6.
78. To tithe the cattle. Lev. xxvii. 32.
79. To sacrifice the first-born of clean cattle. Deut. xv. 19.
80. To redeem the first-born of man. Num. xviii. 15.
81–2. To redeem the firstling of an ass, and to break its neck if the animal be not redeemed. Ex. xiii. 13.
83. To bring all offerings to Jerusalem. Deut. xii. 5, 6.
84. To offer all sacrifices in the Temple. Deut. xii. 14.
85. To bring to the Temple also the offerings from beyond the land of Israel. Deut. xii. 26.
86. To redeem holy animals that have blemishes. Deut. xii. 15.
87. That a beast exchanged for an offering is holy. Lev. xxvii. 10.
88. That the remainder of the meat-offerings be eaten. Lev. vi. 16.
89. That the flesh of sin- and trespass-offerings be eaten. Ex. xxix. 33.
90–1. To burn consecrated flesh that has become unclean; also the remainder of the consecrated flesh not eaten. Lev. vii. 17, 19.
92–3. That the Nazarite suffer his hair to grow during his separation, and shave it at the close of his Nazariteship. Num. vi. 5, 9.
94. That a man keep his vow. Deut. xxiii. 23.
95. That the judge act according to the Law in annulling vows. Num. xxx. 3.
96. That all who touch a carcass are unclean. Lev. xi. 34.
97. That eight species of animals contaminate. Lev. xi. 39.
98. That food is contaminated by contact with unclean things. Lev. xi. 34.
99. That a menstruous woman contaminates. Lev. xv. 19.
100. That a lying-in woman is unclean. Lev. xii. 2.
101. That a leper is unclean and contaminates others. Lev. xiii. 3.
102–3. That a leprous garment and a leprous house contaminate. Lev. xiii. 47, xiv. 35.
104–6. That a man or woman having a running issue contaminates, as does the seed of copulation. Lev. xv. 2, 16, 28.
107. That a corpse contaminates. Num. xix. 14.
108. That the water of separation contaminates the clean, cleansing only the unclean from the pollution of the dead. Num. xix. 26.
109. To cleanse from uncleanness by washing in running water. Lev. xv. 16.
110–12. That leprosy be cleansed with cedar-wood, etc.; that the leper shave all his hair, rend his raiment, and bare his head. Lev. xiii. 45; xiv. 2, 9.
113. To burn a red heifer and preserve its ashes. Num. xix. 9.
114. To pay the equivalent of a "singular" vow. Lev. xxvii. 2.
115–7. That one who vows an unclean beast, or his house, or his field, shall pay the appointed sum, or as the priest shall direct. Lev. xxvii. 11, 14, 16.
118. That he shall make restitution who trespasses through ignorance in things holy. Lev. v. 16.
119. That plantations in their fourth year shall be holy. Lev. xix. 24.
120–4. To leave to the poor the corners of the field unreaped, the gleanings of the harvest, the forgotten sheaf, the gleanings in the vineyard, and the residue of the grapes. Lev. xix. 9, 10; Deut. xxiv. 19.
125. To bring the first-fruits into the sanctuary. Ex. xxiii. 19.
126. To give the great heave-offering to the priest. Deut. xviii. 4.
127. To separate the tithe of corn for the Levites. Num. xviii. 24; Lev. xxvii. 30.
128. To separate a second tithe and eat it in Jerusalem. Deut. xiv. 22.
129. That the Levites shall give a tithe of the tithe to the priest. Num. xviii. 26.
130. To separate the tithe for the poor in the third and sixth years instead of in the second. Deut. xiv. 28.
131–2. To recite the chapter on the tithe and read it over the first-fruit. Deut. xxvi. 5, 13.
133. To separate for the priest a cake of the first of the dough. Num. xv. 20.
134–5. To let the field rest fallow every seventh year, and to cease from tilling the ground. Ex. xxiii. 11, xxxiv. 21.
136–8. To hallow the year of jubilee by resting, to sound the trumpet in the year of jubilee, and to grant a redemption for the land in that year. Lev. xxv. 9, 10, 24.
139. To allow a house sold in a walled city to be redeemed within the year. Lev. xxv. 29.
140. To number the years of jubilee yearly and septennially. Lev. xxv. 8.
141. To release all debts in the seventh year. Deut. xv. 2.
142. To exact the debt of a foreigner. Deut. xv. 3.
143. To give to the priest his share of the cattle sacrifices. Deut. xviii. 3.
144. To give the first of the fleece to the priest. Deut. xviii. 4.
145. To discriminate between what belongs to the Lord and what to the priest. Lev. xxvii. 21, 28.
146. To perform the right mode of slaughtering beasts. Deut. xii. 23.
147. To cover the blood of wild beast and bird. Lev. xvii. 13.
148. To set free the parent bird when taking a nest. Deut. xxii. 7.
149–52. To search diligently for the marks in clean beasts, fowl, locusts, and fish. Lev. xi. 2; Deut. xiv. 11; Lev. xi. 9.
153. That the Sanhedrin sanctify the new moon and reckon the years and months. Ex. xii. 2.

151-5. To rest on and hallow the Sabbath. Ex. xx. 8 and xxiii. 12.

156. To remove the leaven. Ex. xii. 15.

157-8. To relate the story of the Exodus and to eat unleavened bread on Passover night. Ex. xii. 18, xiii. 8.

159-60. To rest on the first and seventh days of Passover. Ex. xii. 16.

161. To reckon forty-nine days from the time of the cutting of the first sheaf. Lev. xxiii. 15.

162-3. To rest on Shebu‘ot and on the first day of Tishri. Lev. xxiii. 24.

164-5. To fast and rest on the Day of Atonement. Lev. xvi. 29, xxiii. 32.

166-7. To rest on the first and eighth days of Sukkot. Lev. xxiii. 35, 36.

168. To dwell in booths seven days. Lev. xxiii. 42.

169. To take the four kinds of branches of trees. Lev. xxiii. 40.

170. To hear the sound of the trumpet on the first of Tishri. Num. xxix. 1.

171. To give half a shekel each year as ransom. Ex. xxx. 13.

172. To obey the prophet of each generation if he neither adds nor takes away from the statutes. Deut. xviii. 15.

173. To appoint a king. Deut. xviii. 15.

174. To obey the authority of the Sanhedrin. Deut. xvii. 11.

175. To yield to the majority in case of division. Ex. xxiii. 2.

176. To appoint judges in every town. Deut. xvi. 18.

177. To administer judgment impartially. Lev. xix. 15.

178. That whoever possesses evidence shall testify in court. Lev. v. 1.

179. To examine witnesses diligently. Deut. xiii. 14.

180. To do unto false witnesses as they themselves designed to do unto others. Deut. xix. 19.

181. To decapitate the heifer as commanded. Deut. xxi. 4.

182. To establish six cities of refuge. Deut. xix. 3.

183. To give cities to the Levites for habitations. Num. xxxv. 2.

184. To make battlements on the housetops. Deut. xxii. 8.

185-6. To destroy idolaters and to burn their city. Deut. xii. 2, xiii. 16.

187. To destroy the seven Canaanite nations. Deut. xx. 17.

188-9. To blot out the remembrance of Amalek. Deut. xxv. 17, 19.

190. To observe a certain procedure in voluntary battle. Deut. xx. 10.

191. To anoint the priest for war. Deut. xx. 2.

192-3. To keep the camp pure and in a sanitary condition. Deut. xxiii. 12, 13.

194. To restore plunder. Lev. vi. 4.

195. To give alms. Deut. xv. 8, 11.

196. To give liberal gifts to a freed Hebrew servant. Deut. xv. 14.

197. To lend to the poor. Deut. xv. 8.

198. To lend on usury to idolaters. Deut. xxiii. 21.

199. To restore a pledge to its owner. Deut. xxiv. 13.

200-1. To pay a hireling his hire when due, and to permit him to eat during work. Deut. xxiv. 15, 24, 25.

202-3. To help a neighbor's beast. Ex. xxiii. 5; and Deut. xxii. 4.

204. To restore lost property. Deut. xx. 1.

205. To rebuke the sinner. Lev. xix. 17.

206. To love the children of the covenant. Lev. xix. 18.

207. To love the stranger. Deut. x. 19.

208. To have just balances and weights. Lev. xix. 36.

209. To honor the wise. Lev. xix. 32.

210. To honor parents. Ex. xx. 12.

211. To fear parents. Lev. xix. 3.

212. To perpetuate the human species by marriage. Gen. i. 28.

213. To lead a pure married life. Deut. xxiv. 5.

214. That the bridegroom rejoice for a year with his wife. Deut. xxiv. 1.

215. To circumcise the males. Gen. xvii. 10; Lev. xii. 3.

216-7. To marry the wife of a deceased brother, and give Ḥalizah in case of declining to do so. Deut. xxv. 5, 9.

218-9. That the violator of a virgin shall marry her, and he may not put her away all his days. Deut. xxii. 29.

220. That the seducer pay a penalty. Ex. xxii. 16.

221. That beautiful female captives must not be sold, etc. Deut. xxi. 11.

222. To divorce by a written contract. Deut. xxiv. 1.

223. That the suspected adulteress be subjected to trial of jealousy. Num. v. 30.

224. To beat the wicked. Deut. xxv. 2.

225. To exile the homicide through ignorance. Num. xxxv. 25.

226-30. That executions be effected by means of the sword, strangling, fire, stoning, and hanging. Ex. xxi. 20; Lev. xx. 14; Deut. xxi. 22, xxii. 24.

231. To bury on the same day one put to death. Deut. xxi. 23.

232. To deal with a Hebrew servant according to the Law. Ex. xxi. 2.

233-4. To redeem a betrothed Hebrew maid servant. Ex. xxi. 8.

235. To make the non-Hebrew slave serve for ever. Lev. xxv. 46.

236. That he who wounds another pay a fine. Ex. xxi. 18.

237-8. To judge of injuries to a beast by a pitfall. Ex. xxi. 33.

239. To punish the thief with death or to compel him to make restitution. Ex. xxi. 16, xxii. 1.

240-2. To give judgment in cases of trespass by cattle, of injuries by fire, or of robbery of money or goods left in charge of an unpaid keeper. Ex. xxii. 5-7.

243-4. To judge as to the injuries caused by the hireling or by the borrower. Ex. xxii. 10, 14.

245-6. To judge in disputes between buyer and seller or between plaintiff and defendant. Lev. xxv. 14; Ex. xxii. 9.

247. To rescue the persecuted, even at the cost of the life of the oppressor. Deut. xxv. 12.

248. To judge in disputes concerning inheritances. Num. xxvii. 8.

Prohibitive Commandments.

1. Belief in the existence of any but the one God. Ex. xx. 3.

2-4. The making of images. Ex. xx. 3, 4; xxxiv. 17.

5-6. The worship of stars and planets. Ex. xx 5.

7. The sacrifice of children to Moloch. Lev. xviii. 21.

8-9. Necromancy and familiar spirits. Lev. xix. 31.

10. Showing regard for the service of the stars and planets. Lev. xix. 4.

11. The erection of pillars. Lev. xxvi. 1.

12. The erection of pillars of stone. Lev. xxvi. 1.

13. Planting of trees in the sanctuary. Deut. xvi. 21.

14-16. Swearing by idols, or leading any Israelite toward idolatry. Ex. xxiii. 13; Deut. xiii. 11.

17-19. To show mercy to the seducer. Deut. xiii. 8.

20-21. Defense or concealment of the seducer by the seduced. Deut. xiii. 8.

22. The use of ornaments of idols. Deut. vii. 25.

23-4. To rebuild a city destroyed on account of its idolatry or to use its wealth. Deut. xiii. 16, 17.

25. The use of things belonging to idols or idolaters, or of the provisions and libations offered to idols. Deut. vii. 26.

26. Prophesying in the name of idols. Deut. xviii. 20.

27. False prophecies. Deut. xviii. 20.

28. Listening to prophecies in the name of idols. Deut. xiii. 3.

29. Fear of a false prophet or hindering any one from killing him. Deut. xviii. 22.

30. Walking in the manner of the idolaters, and practising their rites. Lev. xx. 23.

31-8. Enchantment, augury, and consultation of familiar spirits, etc. Lev. xix. 26; Deut. xviii. 10, 11.

39-40. The use of male attire by women, and vice versa. Deut. xxii. 5.

41. Tattooing the body after the manner of idolaters. Lev. xix. 28.

42. The use of garments made of both linen and wool. "Sha‘aṭnez," Deut. xxii. 11.

43-4. Rounding "the corners of the head" or of the beard. Lev. xix. 27.

45. Lacerating oneself for the dead. Deut. xiv. 1.

46. To return to Egypt to dwell permanently there. Deut. xvii. 16.

47. Indulgence in impure thoughts and sights. Num. xv. 39.

48-9. Covenanting with, and preservation of, the seven nations. Ex. xxiii. 32.

50-2. To show mercy to or to intermarry with idolaters or to allow them to dwell in the land. Ex. xxiii. 33; and Deut. vii. 2, 3.

53. The marriage of a daughter of Israel with an Ammonite or Moabite. Deut. xxiii. 3.

54-5. To refuse admission to the congregation to a descendant of Esau or to an Egyptian after the third generation. Deut. xxiii. 7.

56. To offer peace to the Ammonites and Moabites in time of war. Deut. xxiii. 6.

57. The destruction of fruit-trees in time of war. Deut. xx. 19.

58. Fear of the enemy by warriors. Deut. iii. 22, vii. 21, xx. 3.

59. To forget the evil wrought by Amalek. Deut. xxv. 19.

60. Blasphemy of the Holy Name. Ex. xxii. 28.

61. To violate an oath, however rash. Lev. xix. 12.

62. Taking the name of the Lord in vain. Ex. xx. 7.

63. Profaning the name of the Holy One. Lev. xxii. 32.

64. To tempt the Lord. Deut. vi. 16.

65. Destruction of the sanctuary, synagogues, or schools, and erasure of the Holy Name and Holy Writings. Deut. xii. 2, 4.

66. To suffer the body of one hanged to remain on the tree. Deut. xxi. 23.

67. To cease watching the sanctuary. Num. xviii. 5.

68–71. The entrance of the priests into the sanctuary at certain times; priests with a blemish may not go beyond the altar nor serve in the sanctuary. Lev. xvi. 2, 23; xxi. 17, 21.

72. The ministry of Levites in the service of priests, and vice versa. Num. xviii. 3.

73. The entrance of intoxicated persons into the sanctuary, and the teaching of the Law by the same. Lev. x. 9.

74–6. Service in the sanctuary by strangers or by unclean priests, etc. Lev. xxii. 2; Num. xviii. 4.

77–8. Entrance into the court or the camp of the Levites by unclean priests. Num. v. 3; Deut. xxiii. 10.

79. The erection of an altar of hewn stone. Ex. xx. 25.

80. Ascension by steps to the altar. Ex. xx. 26.

81. To burn incense, or to offer it on the golden altar. Ex. xxx. 9.

82. To extinguish the fire on the altar. Lev. vi. 13.

83–5. Misuse of the holy oil, the anointing oil, or the holy incense. Ex. xxx. 32, 37.

86. Removal of the staves from the ark. Ex. xxv. 15.

87–8. To loosen the breastplate from the ephod or to tear the upper garment. Ex. xxviii. 32.

89–90. The killing and offering of sacrifices without the Temple. Deut. xii. 13; Lev. xvii. 3, 4.

91–5. The sanctification and use of blemished things for sacrifice. Lev. xxii. 22, 24; Deut. xvii. 1.

96. The offering of blemished animals from Gentiles. Lev. xxii. 25.

97. The offering of imperfect animals in sacrifice. Lev. xxii. 21.

98–100. To offer in sacrifice leaven or honey, an unsalted oblation, the hire of a harlot, or the price of a dog. Lev. ii. 11, 13; Deut. xxiii. 18.

101. To kill an animal and its young on the same day. Lev. xxii. 28.

102–5. The use of olive-oil or frankincense in the sin-offering or the jealousy-offering. Lev. v. 11; Num. v. 15.

106–7. To exchange sacrifices. Lev. xvii. 26, xxvii. 10.

108. The redemption of the first-born of clean cattle. Num. xviii. 17.

109. The sale of the tithe of the herd. Lev. xxvii. 33.

110–11. The sale or redemption of a dedicated field. Lev. xxvii. 28.

112. The division of the head of the bird in a sin-offering. Lev. v. 3.

113–4. Working with or shearing the first-born. Deut. xv. 19.

115–7. To kill the paschal lamb while there is leaven, or leave its fat or any part of its flesh over night. Ex. xii. 10, xxiii. 18.

118. To leave any of the festal offering until the third day. Deut. xvi. 4.

119. To leave part of the second Passover lamb until the morning. Num. ix. 12.

120. The preservation of any part of the thank-offering until the morning. Ex. xii. 10.

121–2. To break a bone of the paschal lamb or of the second Passover lamb. Ex. xii. 46; Num. ix. 12.

123. To carry of the flesh of Passover out of the house. Ex. xii. 46.

124. To allow the remnants of the meat-offering to become leavened. Lev. vi. 17.

125–8. To eat the paschal lamb raw or sodden, or to allow it to be eaten by a foreigner, by one uncircumcised, or by an apostate Israelite. Ex. xii. 9, 43, 45, 48.

129–32. An unclean person may not eat of holy things, nor of holy things polluted; nor of that which is left of sacrifices; nor of sacrifices which are polluted. Lev. vii. 18, 19, 20; xix. 8.

133–6. A stranger may not eat of the heave-offering, nor a sojourner with the priest, nor an hired servant, nor an uncircumcised person, nor an unclean priest. Lev. xxii. 4, 10.

137. A priest's daughter married to a stranger may not eat of the holy things. Lev. xxii. 12.

138–40. To eat the meat-offering of the priest, or the flesh of the sin-offering, or holy things which have been defiled. Lev. vi. 23, 30; Deut. xiv. 3.

141–4. To eat the second tithe of corn, or of the vintage, or of the oil, or the pure firstling without Jerusalem. Deut. xii. 17.

145–7. The consumption by the priest outside the courts of the sin- or trespass-offering, of the flesh of the burnt offering, or of lighter sacrifices before the blood has been sprinkled. Deut. xii. 17.

148. A stranger may not eat of the flesh of the most holy things. Ex. xxix. 33.

149. The priest may not eat of the first-fruits before they are brought into the court. Deut. xii. 17.

150–1. To eat the second tithe in mourning or in impurity, even in Jerusalem, until it be redeemed. Deut. xxvi. 14.

152. Use of the money of the second tithe except for eating or drinking. Deut. xxvi. 14.

153. Eating the corn before the heave-offerings and tithes have been separated. Lev. xxii. 15.

154. Changing the order regarding the wave-offering, the first-fruits, and the first and second tithes. Ex. xxii. 29.

155. The delay of vows and free-will offerings. Deut. xxiii. 21.

156. Attendance at the feast without an offering. Ex. xxiii. 15.

157. The violation of vows. Num. xxx. 2.

158–60. The marriage of a priest with a harlot, a "profane" woman ("ḥalalah"), or a divorcee. Lev. xxi. 7.

161–2. The marriage of a high priest with a widow, nor may he take her as his concubine. Lev. xxi. 14.

163–4. Priests may not enter the sanctuary with uncovered head or with torn garments. Lev. x. 6.

165. Priests may not leave the court during service. Lev. x. 7.

166–8. The pollution of priests and of the high priest. Lev. xxi. 1, 11.

169–70. The participation of the tribe of Levi in the holy land and in the spoils. Deut. xviii. 1.

171. To make oneself bald for the dead. Deut. xiv. 1.

172–9. The eating of unclean cattle, unclean fish, unclean fowl, creeping things that fly, things that creep upon the earth, or reptiles ("remesh"), etc. Lev. xi. 4, 13, 42–44; Deut. xiv. 19.

180–2. The eating of beasts in a dying condition, or torn animals ("ṭerefah"), or a member of a living animal. Ex. xxii. 31; Deut. xii. 21, 23.

183–5. The eating of the sinew which shrank, of blood, or of fat. Gen. xxxii. 32; Lev. vii. 23, 26.

186–7. The boiling of flesh in milk and the eating of flesh with milk. Ex. xxiii. 19, xxxiv. 26; Deut. xiv. 21.

188. The eating of the flesh of an ox that has been stoned. Ex. xxi. 28.

189–91. The eating of bread made of the new corn, or roasted grain, or green ears of the new corn, before the Passover offering has been brought. Lev. xxiii. 14.

192. The use of the fruit of a young tree before the fourth year. Lev. xix. 23.

193. The eating of mixed seeds of the vineyard. Deut. xxii. 9.

194. The use of libations to idols. Deut. xxxii. 38.

195. Gluttony and drunkenness. Deut. xxi. 20; Lev. xix. 26.

196. Eating on the Day of Atonement. Lev. xxiii. 29.

197–9. The eating of anything leavened on Passover, or of leavened bread after the middle of the fourteenth day. Ex. xii. 20; Deut. xiii. 3, xvi. 3.

200–1. The exposure of leaven and leavened bread. Ex. xiii. 7, 19.

202–6. A Nazarite may not drink wine or any liquor made from grapes, nor may he eat grapes or any part thereof. Num. vi. 3–5.

207–9. A Nazarite may not pollute himself for the dead, nor enter into the tent of the dead, nor shall he shave his hair. Num. vi. 5–7.

210–4. To reap the whole of the field, to gather the fallen ears of corn in harvest, to cut off all the clusters of the vineyard, to gather every grape of the vineyard, or to return to take a forgotten handful. Lev. xix. 9–10; Deut. xxiv. 19, 20.

215–6. The sowing of different kinds of seed together, or of corn and herbs in a vineyard. Lev. xix. 19; Deut. xxii. 9.

217. The gendering of cattle with those of diverse species. Lev. xix. 19.

218. The use of two different kinds of cattle together. Deut. xxii. 10.

219. The prevention of an animal working in the field from eating. Deut. xxv. 4.

220–3. To till the ground, to prune trees, to reap spontaneously grown corn, or to gather the fruit of trees, in the seventh year. Lev. xxv. 4–5.

224-6. To till the earth, to prune trees, to reap what grows spontaneously, or to gather fruit, in the jubilee year. Lev. xxv. 11.

227. The permanent sale of a field in the land of Israel. Lev. xxv. 23.

228. To change the suburbs of the Levites or their fields. Lev. xxv. 34.

229. To leave the Levite without support. Deut. xii. 19.

230. To demand the amount of a debt after the lapse of the seventh year. Deut. xv. 2.

231. To refuse to lend to the poor on account of the release year. Deut. xv. 9.

232. To refuse to lend to the poor the things which he requires. Deut. xv. 7.

233. Sending a Hebrew slave away empty-handed. Deut. xv. 13.

234. Exaction with regard to loans to the poor. Ex. xxii. 25.

235-6. Loans to or by an Israelite upon usury. Lev. xxv. 37.

237. Usury, or participation therein either as surety, witness, or writer of contracts. Ex. xxii. 25; Deut. xxiii. 19.

238. Delay in the payment of wages. Lev. xix. 13.

239-42. The exaction of a pledge from a debtor by violence; the retention of a pledge from the poor when he requires it; the receipt of a pledge from a widow, and the exaction of a pledge when it is such that one obtains by it a living. Deut. xxiv. 6, 10, 17.

243. To kidnap a man of Israel. Ex. xx. 15.

244. To steal. Lev. xix. 11.

245. To rob by violence. Lev. xix. 13.

246. To remove the landmark. Deut. xix. 14.

247. To defraud. Lev. xix. 13.

248. To defraud one's neighbor. Lev. xix. 11.

249. To swear falsely with regard to a neighbor's property. Lev. xix. 11.

250. To injure any one in bargaining. Lev. xxv. 14.

251-3. To oppress or injure any one. Ex. xxii. 21; Lev. xxv. 17.

254-5. To deliver a fugitive slave to his master, or to vex him. Deut. xxiii. 15, 16.

256. To afflict the widow and orphan. Ex. xxii. 22.

257-9. To use a Hebrew servant as a slave, to sell him as a bondman, or to treat him cruelly. Lev. xxv. 39, 42-43.

260. To permit a heathen to treat a Hebrew servant cruelly. Lev. xxv. 53.

261. To sell a Hebrew maid servant. Ex. xxi. 8.

262. To withhold from a betrothed Hebrew slave food, raiment, or conjugal rights. Ex. xxi. 10.

263. To sell as a slave a beautiful captive. Deut. xxi. 14.

264. To humble a beautiful woman. Deut. xxi. 14.

265. To covet a man's wife. Ex. xx. 17.

266. Covetousness. Deut. v. 21.

267-8. A hireling may not cut down standing corn during his labor, nor take more fruit than he can eat. Deut. xxiii. 24.

269. To hide when a thing lost is to be returned to the owner. Deut. xxii. 3.

270. To refrain from helping an animal fallen under its burden. Deut. xxii. 4.

271-2. Fraud in weights and measures. Lev. xix. 35; Deut. xxv. 13, 14.

273. Unrighteousness in judgment. Lev. xix. 35.

274. The acceptance of bribes. Ex. xxiii. 8.

275-6. Partiality or fear in a judge. Lev. xix. 15; Deut. i. 17.

277. To pity the poor in judgment. Ex. xxiii. 3.

278. To pervert the judgment of a sinner. Ex. xxiii. 6.

279. To spare the offender in matters of fines. Deut. xix. 13.

280. To pervert the judgment of strangers or orphans. Deut. xxiv. 17.

281. To hear one litigant except in the presence of the other. Ex. xxiii. 1.

282. To decide by a majority of one in capital cases. Ex. xxiii. 2.

283. Having first pleaded for a man in a capital case, one may not afterward plead against him. Ex. xxiii. 2.

284. The appointment as judge of one who is not learned in the Law. Deut. i. 17.

285. False witness. Ex. xx. 16.

286. The acceptance of testimony from a wicked person. Ex. xxiii. 1.

287. The testimony of relatives. Deut. xxiv. 16.

288. To pronounce judgment upon the testimony of only one witness. Deut. xix. 15.

289. To kill the innocent. Ex. xx. 13.

290. To convict on circumstantial evidence only. Ex. xxiii. 7.

291. To condemn to death on the evidence of only one witness. Num. xxxv. 30.

292. To execute before conviction one charged with a crime. Num. xxxv. 12.

293 To pity or spare the persecutor. Deut. xxv. 12.

294. To punish the victim in a case of rape. Deut. xxii. 26.

295-6. The acceptance of ransom for a murderer or for a manslayer. Num. xxxv. 31, 32.

297. The toleration of bloodshed. Lev. xix. 16.

298-9. To leave a stumbling-block in the way, or to cause the simple to stumble on the road. Deut. xxii. 8; Lev. xix. 14.

300. To exceed the number of stripes assigned to the guilty. Deut. xxv. 3.

301. Calumny. Lev. xix. 16.

302. To bear hatred in one's heart. Lev. xix. 17.

303. To cause the face of an Israelite to blush. Lev. xix. 17.

304-5. To bear a grudge. Lev. xix. 18.

306. To take the dam with the young. Deut. xxii. 6.

307-8. To shave the hair of the scall, or to pluck out the marks of leprosy. Lev. xiii. 33; Deut. xxiv. 8.

309. To plow or sow in a valley in which a slain body has been found. Deut. xxi. 4.

310. To suffer a witch to live. Ex. xxii. 18.

311. To force a bridegroom to perform military service. Deut. xxiv. 5.

312. Rebellion against the Sanhedrin. Deut. xvii. 11.

313-4. To add to or detract from the precepts of the Law. Deut. xii. 32.

315-6. To curse the judges, a prince, or a ruler. Ex. xxii. 28.

317. To curse any Israelite. Lev. xix. 14.

318-9. To curse or smite father or mother. Ex. xxi. 15, 17.

320-1. To work or to go beyond the city limits on the Sabbath. Ex. xx. 10.

322. To punish on the Sabbath. Ex. xxxv. 3.

323-9. To work on the first or the seventh day of Passover, or on the Feast of Shebu'ot, or on the first day of the seventh month, or on the Day of Atonement, or on the first or the eighth day of the Feast of Tabernacles. Ex. xii. 16; Lev. xxiii. 7, 16, 20, 25, 28, 35, 36.

330-45. The various marriages constituting incest. Lev. xviii. 7-18.

346. To have intercourse with a menstruous woman. Lev. xviii. 19.

347-53. Adultery, sodomy, etc. Lev. xviii. 7, 14, 20, 22, 23.

354. The marriage of a bastard with a daughter of Israel. Deut. xxiii. 2.

355. Harlotry. Deut. xxiii. 17.

356. The remarriage of a divorcee with her first husband. Deut. xxiv. 4.

357. The marriage of a widow with any one but the brother of her deceased husband. Deut. xxv. 5.

358. Divorcing of a victim of rape by the offender. Deut. xxii. 29.

359. Divorcing of a wife upon whom an evil name has been brought. Deut. xxii. 9.

360. The marriage of a eunuch with a daughter of Israel. Deut. xxiii. 1.

361. The castration of any male whatsoever. Lev. xxii. 24.

362. The election of a stranger as king over Israel. Deut. xvii. 15.

363-5. The possession by a king of an excessive number of horses and wives, or of an unduly large quantity of silver and gold. Deut. xvii. 16, 17.

Of the mandates Naḥmanides rejected Nos. 5, 7, 63, 64, 65, 66, 67, 85, 89, 95-108 (inclusive), 149, 150, 151, 198, 227, 228, 237, and 299, substituting for them the following:

5. To eat the first-born of cattle and the second tithe in Jerusalem. Deut. xiv. 23.

7. To eat the wave-offering only when it is without blemish. Deut. xv. 22.

63. To eat the fruit of the seventh year, and not to trade with it. Lev. xxv. 6.

64. To possess the land of Israel. Num. xxxiii. 53.

65. To leave open one side in besieging a town. Num. xxxi. 7 (see Sifre *ad loc.*).

66. To remember what God did to Miriam. Deut. xxiv. 9.

67. To be perfect with the Lord. Deut. xviii. 13.

85. To select the wave-offering from the best. Num. xviii. 29.

89. To bring an offering of cattle only. Lev. i. 1.

95. To offer all the sacrifices between the two oblations. Lev. vi. 5.

96. To eat the paschal lamb in the night only. Ex. xii. 8.

97. That the avenger of blood pursue the murderer. Num. xxxv. 19.
98. To avoid the garments of the leprous. Lev. xiii. 51.
99. To recite the blessing over the Torah before reading it. Deut. xxxii. 3.
100. To sustain the sojourning stranger. Lev. xxv. 49.
101. To return usury taken from an Israelite. Lev. xxv. 35.
102. To renounce profit from the Nazarite's hair. Num. vi. 5.
103. To make an ark and a mercy-seat. Ex. xxv. 15.
104. To keep an oath or vow. Deut. xxiii. 24.
105. To reckon months and years. Deut. xvi. 1.
106. To bring an offering morning and evening. Num. xxviii. 4.
107. To offer incense morning and evening. Ex. xxx. 7, 8.
108. To read the Shema' morning and evening. Deut. vi. 17.
149. To recognize unconditionally the first-born son. Deut. xxi. 17.
150. To liberate the slave whose tooth or eye has been knocked out by his master. Ex. xxi. 27.
151. To execute him who has incurred capital punishment. Deut. xvii. 7.
198, 227, 228. That the priest shall serve in the sanctuary all the sacrifices; to separate the wave-offering, a cake of the dough, and give it to the priest. Num. xviii. 7; Deut. xviii. 7; Num. xv. 21.
237. To separate the first tithe and give it to the Levite, and give the poor's tithe to the poor. Num. xviii. 24.
299. To consult the Urim and the Thummim for the king. Num. xxvii. 21.

Of the prohibitions Naḥmanides rejects Nos. 2, 3, 5, 14, 28, 58, 69, 70, 92, 93, 94, 95, 143, 150, 152, 177, 178, 179, 190, 191, 199, 201, 294, 307, 319, 321, 353, substituting for them the following:

2-3. Forgetfulness of the law of God and of the sojourn on Mount Sinai. Deut. iv. 9, viii. 11.
5. Alteration of the order of the vessels in the Temple. Ex. xxiii. 13 (see Mekilta *ad loc.*).
14, 28. The offering of sacrifices with the intention of eating them in other than the prescribed time and place, and the eating of sacrifices so offered. Lev. vii. 18; Deut. xvii. 1.
58. Eating the bird slain for the cleansing from leprosy. Lev. xiv. 14.
69. Selection of the heave-offering by the Levites. Num. xviii. 32.
70. The acceptance of shekels from heathens. Lev. xxii. 25.
92. The condemnation on the testimony of only one witness. Deut. xvii. 6.
93. Allowing the faint-hearted to go to war. Deut. xx. 8.
94. To cause the Shekinah to depart from the camp by reason of any impurity. Deut. xxiii. 15.
95. Depriving the first-born of his birthright. Deut. xxi. 16.
143. Clemency to a murderer. Deut. xix. 21.
150. Marriage of the deceased brother's wife after "ḥalizah." Deut. xxv. 9.
152. Cohabitation with a wife who has committed adultery. Deut. xxiv. 4.
177. Regretting the poing of charity and the freeing of a Hebrew slave in the seventh year. Deut. xv. 10, 18.
178. Robbery of vessels of the sanctuary. Num. iv. 20.
179. The Levite may not carry the holy vessels after the fiftieth year. Num. viii. 25.
190. The divorced wife when married to another may not be taken back. Deut. xxiv. 4.
191. Disputing the priesthood. Num. xvii. 5.
199. Deriving profit from the beheaded heifer. Num. xxxv. 34.
201. To marry a daughter to one who is forbidden to her. Lev. xix. 9.
294. Profanation of the Holy Land.
307. Leaving the sanctuary during the service.

Two prohibitions are contained in each of the following verses, by which the number of the remaining rejected prohibitions is made up: Lev. xxiii. 4; Lev. ii. 11; Deut. xxiii. 19; Ex. xii. 9; Ex. xxii. 21; Ex. xxviii. 7; Deut. xxiv. 5; Deut. xxi. 18; Deut. ii. 9.

Moses of Coucy rejects Maimonides' mandates Nos. 142, 193, 198, substituting the following:

142. To justify the decision of the Lord. Deut. viii. 5.
193. To reckon the solstices and constellations. Deut. iv. 6.
198. To keep far from a false matter. Ex. xxiii. 7.

Of the prohibitions he rejects Nos. 14, 26, 67, 70, 78, 95, 140, 150, 152, 165, 177, 178, 199, 266, 278, 283, 291, substituting the following:

14. Abandonment of the Torah. Deut. iv. 9.
26. The kissing of idols. Ex. xxiii. 24.
67. The making of idols. Lev. xxvi. 1.
70. Pride. Deut. viii. 14.
78. Prostitution of a daughter of Israel. Lev. xix. 29.
95. Cursing oneself. Deut. iv.
140. A priest may not make himself unclean for the dead. Lev. xxi. 1.

There are two prohibitions in each of the following verses, by which the number of the remaining rejected prohibitions is made up: Ex. xii. 9; Lev. ii. 11; Deut. xxiii. 1, 13, 18; xxiv. 6.

Joseph of Corbeil has the following mandates not found in the lists of Maimonides, Naḥmanides, and Moses of Coucy:

To gaze upon the fringes. Num. xv. 39.
To show kindness toward the needy, both in feeling and in deed; to bury the dead; and to show forbearance. Ex. xviii. 20.
To practise modesty in privacy. Deut. xxiii. 15.
To remember the Exodus from Egypt. Deut. xvi. 3.
To love admonition. Deut. x. 16.
To teach. Lev. x. 11.
To cleanse soiled vessels with boiled water and to immerse vessels. Num. xxxi. 23.
To give to the stranger meat forbidden to Israelites. Deut. xiv. 21.
To sanctify the first-born of clean cattle. Deut. xv. 19.
That men shall live with their wives, but keep from them at certain times. Deut. xxiv. 5; Lev. xv. 31.
To blot out the names of idols, to break down their pillars, and hew down the "asherim." Deut. vii. 5, xii. 3.
To burn the asherah, demolish the places of idolatrous worship, break down the altars, and destroy the vessels used for idolatry. Deut. xii. 3; Num. xxx. 52; Deut. vii. 5; xii. 2, 3.

The prohibitions not included by the other compilers, but found in the Semaḳ, are:

Intolerance of admonition. Deut. x. 16.
Self-righteousness. Deut. ix. 4.
Delay in attending to the natural needs. Deut. xxiii. 15.
Sodomy. Ex. xx. 14.

COMMENTARIES ON THE BIBLE. See BIBLE EXEGESIS.

COMMENTARIES ON THE TALMUD. See TALMUD, COMMENTARIES TO THE.

COMMERCE: Sale or exchange of goods, generally on a large scale. During the Biblical period the Hebrews in Palestine had what is known as a natural self-sufficing economy (Benzinger, "Arch." p. 213)—that is, each household grew or made all the food, tools, and clothing it needed. A few articles of luxury or necessity, such as gold, silver, iron, and salt, which could not be found on the Israelitish farms, were supplied by merchants, who carried them round the country, and for that reason were known as "soḥer" (from a root meaning "to wander"). These merchants were almost exclusively Canaanites, probably Philistines. Hence, when the goodwife sells her wool (Prov. xxxi. 24) she disposes of it to the Canaanites (A. V. "merchants"). The Israelite tribes were mainly settled on the uplands of Palestine, and therefore were not touched by the streams of commerce which flowed by the two great caravan routes along the coast, through Tyre, Acco, and Gaza, to Egypt, and from South Arabia, through Petra on the east side of the Jordan, to Damascus (Herzfeld, "Handelsgeschichte der Juden," pp. 22, 23).

Solomon's Foreign Commerce.

The chief references to commerce in the Old Testament are, accordingly, to that of other than Israelitish peoples—to Ishmaelites (Gen. xxxvii. 25) and Phenicians (Isa. xxiii.; Ezek. xxvii. 27). It is only with the reign of Solomon that any signs are given of extensive external trade on the part of the Israelites. Solomon was himself a large exporter of wheat and oil, which he paid to Hiram, King of Tyre, for timber and the use of skilled workmen (I Kings v. 25 [Hebr.]; I Kings vii.). He doubtless obtained horses and chariots from Egypt (I Kings x. 28, 29) by similar payments. It is even recorded of Solomon that he sent ships of Tharshish every three years from Ezion-geber to Ophir, whence the fleet brought back gold, silver, iron, apes, and peacocks (I Kings x. 22). Solomon's example evidently led to a general development of trading (I Kings x. 15), but it was not followed up by his successors. Jehoshaphat tried in vain to revive the voyages to Ophir (I Kings xxii. 48), and the Prophets when speaking of merchants identify them with Canaanites or Philistines (Hosea xii. 7; Isaiah xxiii. 11; Zeph. i. 11; compare Job xli. 6). It has been assumed from the songs of Deborah, Jacob, and Moses (Judges v. 17; Gen. xlix. 13; Deut. xxxiii. 18, 19) that the tribes of Dan, Zebulun, and Issachar were connected with the Mediterranean trade; but there is very little evidence of this, and the ships used were known by a foreign name as "ships of Tharshish."

There seem to have been some attempts to encourage foreign trade in the northern kingdom, as Ahab is reported to have obtained from Ben-hadad the right to have "ḥuẓot" in Damascus (I Kings xx. 34); in other words, the Israelites were allowed a special street or bazaar in the market of Damascus. A somewhat similar activity on the part of Judah is indicated in Isaiah ii. 6 (Hebr.), where the "contracts made with the sons of aliens" refer, according to Cheyne, to the renewed commercial activity of the reigns of Uzziah and Jotham (II Kings xiv. 22, xvi. 6). The treasures of the kings must have been obtained indirectly from commerce; the tribute of Hezekiah to Sennacherib, which, according to the Taylor cylinder, amounted to 30 talents of gold and 800 of silver, besides precious stones, must have been secured in this way. The luxurious feminine apparel indicated in Isaiah iii. 18-24 must also have been obtained by commerce. Notwithstanding this, the merchant's profession was despised (Hosea xii. 7; compare Ecclus. [Sirach] xxvi. 29, xxvii. 2). The few laws relating to business in the Pentateuch and dealing with weights (Lev. xix. 35, 36), loans to the poor (*ib.* xxv. 36, 37), usury (Deut. xxiii. 20), debts in the Sabbatical year (Deut. xv. 2), and slave-trading (Lev. xxv. 44, 45), show that very little business was done. The fact that even tribute was paid in kind (I Sam. xvi. 20, xvii. 18) proves that not much attention was paid to commerce, as is also proved by the fact that no coined money was made till the time of the Maccabees (see MONEY).

Exports and Imports.

The highlands of Palestine in Bible times do not seem to have supplied very much material for foreign commerce. Honey, balsam, wheat, and oil were forwarded to Phenicia (I Kings v. 11; Ezra iii. 7; Ezek. xxvii. 17), while spices, balm, myrrh, honey, pistachio nuts, almonds, and oil were forwarded to Egypt (Gen. xxxvii. 25; Hosea xii. 1). In return timber was sent from Phenicia (I Kings v. 11); corn, horses, and chariots from Egypt (Gen. xli. 57; I Kings x. 29); gold, silver, spices, precious stones, ivory, apes, peacocks, armor, and mules from Arabia, OPHIR, and other Eastern countries. Wool and sheep were sent as tribute from Moab (II Kings iii. 4). Within Palestine itself salt was sent from the Dead Sea, cattle and wool from the pastures beyond the Jordan, corn chiefly from the plain of Esdraelon. These were sent up to the markets, one of which seems to have been at Jerusalem, at a place called "Maktesh" (Zeph. i. 11); later on there was a market even in the Temple precincts (John ii. 14).

Merchants carried wares to their customers or to the markets (Neh. xiii. 16) by caravans of camels, asses, mules, or oxen (Gen. xxiv. 10, xlii. 26, xliii. 18; I Kings v. 7; I Chron. xii. 40); sometimes merchandise was carried by slaves (II Kings v. 28).

After the Exile.

After the return from the Exile the small and impoverished Jewish community had little business to transact except at Jerusalem, and even there it was conducted mainly by Phenicians (Neh. iii. 31, 32; xiii. 15-20). When Jonah sailed for Tarshish he had to embark in a Gentile vessel, showing that little maritime trade was undertaken by the Jews. With the spread of Hellenism in the East, however, there were Greek mercantile settlements in Ptolemais, with connections with the coast of Palestine along the Gaza, Ashkelon, and Dor route (Schürer, "Geschichte," ii. 15); and by the time of Hyrcanus I. Athenian merchants came regularly to Judea (Josephus, "Ant." xiv. 8, § 5; "Corp. Insc. Att." ii., No. 470). It was with the intention of developing the foreign trade of Judea that Simon Maccabeus took Joppa (I Macc. xiv. 5), and similarly Herod built Cæsarea for a port (Josephus, *l.c.* xv. 9, § 6).

Markets.

By Maccabean times, indeed, it seems to have become a custom for the villagers to carry their products into towns once a month (I Macc. i. 58). Later on this became extended to twice a week, Mondays and Thursdays being traditionally set aside as market days; and the custom of having special services in synagogues on these days can be traced back to this period. Jerusalem became the commercial center of the whole country, and mention is made there of markets for horses and wool ('Er. x. 9), for ironware, clothing, lumber (Josephus, "B. J." ii. 19, § 4; v. 8, § 1), and for fruit (Beẓah v. 8). Besides these, there were markets at Hebron, Emmaus, Lydda, Antipatris, Haishub, Patris, Beth Hino, Sepphoris, Tiberias, Scythopolis, and Botna, the last three being especially devoted to cereals, which were exported through Kesib to Tyre (Yer. Dem. i. 3), and from Arab in Galilee to Sepphoris (Yer. Ta'an. iv. 1); olives were sent to Italy (Shab. 26a; Josephus, *l.c.* ii. 22, § 2), and olive-oil was sent to Syria and Egypt (Pliny, "Historia Naturalis," xii. 54). The main ports engaged in these exports were Ashkelon, Joppa, Gaza, Ptolemais, Rephia, Yabne, Cæsarea, Dor, and Haifa.

Trade with Egypt.

Some outside trade in silk passed through Palestine into Tyre (Yer. B. Ḳ. iv. 2, vi. 7). Most of the more luxurious products were imported. As against 87 different materials produced in Palestine itself, Herzfeld enumerates 133 brought from almost all the known lands of antiquity: camels from Arabia (Ket. 67a); asses from Libya (Shab. 51b); byssus from Pelusium and India, to form the dress worn by the high priest on the Day of Atonement (Yoma iii. 7); linen and "ḥimuẓa" from Rome (Yer. 'Ab. Zarah ii. 10; M. Ḳ. 23a); a garment called a "gomed" from Arabia (Kel. xxix. 9), as well as pottery (Kel. v. 10; Men. v. 9) from the same place; spoons from Sidon and wines from Ammon and Media (Sanh. 106a; Pes. ii. 1). Beans and linseed came from Egypt (Ma'as. v. 8); damsons from Damascus (Ber. 39a; B. Ḳ. 116b); palms, dates, and carpets from Babylon; timber, wine, and purple from Phenicia; wine, oil, and lumber from Syria. Specially important was the trade with Egypt, which probably took some of the cereals from Palestine in exchange for beans and writing-material. Philo speaks of several Jewish shippers and wholesale merchants in Alexandria ("In Flaccum," § 8). Many Egyptian Jews attained considerable wealth by this means. Arion is said to have lent Joseph the "publican" no less a sum than 3,000 talents (Josephus, "Ant." xii. 4, § 7), and the alabarch Alexander lent 200,000 drachmas to Agrippa (*ib.* xviii. 6, § 3).

Salted fish was a specially favored article of commerce, as may be seen from the fact that Jerusalem had a fish-gate (Neh. iii. 3); it was brought from Egypt (Maksh. vi. 3) and Spain (Shab. xxii. 2) probably to Acco, whence the proverb "to send fish to Acco," corresponding to the English "to carry coals to Newcastle." Lake Tiberias was also the center of a great fishing industry. Josephus enumerates no less than 230 boats sailing upon it at one time ("B. J." ii. 21, § 8). Several kinds of traders are mentioned—cloth-dealers, horse-dealers, and cattle-dealers (Kil. ix. 5; M. Ḳ. ii. 5; B. M. 51b; 'Ab. Zarah i. 6; Sheḳ. vii. 2). These carried their accounts in books ("pinkes," from the Greek πινάξ) made of two boards joined together with a hinge, and covered with wax on which marks could be made. Markets were held every Friday (Sifra 140b), and at Gaza, Acco, and Botna there were great fairs where slaves and horses were sold (Yer. 'Ab. Zarah i. 4). Goods were sold by contract (Shab. 120b) and paid for by bills which themselves were sold for cash before maturing (B. M. iv. 9). Merchants of different towns communicated by post (Shab. x. 4, 19a), and there even seems to have been a kind of parcel-post (R. H. 9b). Prices seemed to be fixed by local authorities (B. M. v. 7), and any speculation in necessaries, such as corn, wine, or oil, was deprecated (B. B. 90b).

Prices.

Notwithstanding this evidence of considerable commercial activity, it can not be said that the Jews in early post-Biblical times were at all inclined to commerce. Josephus, indeed, says: "We do not dwell in a land by the sea, and do not therefore indulge in commerce either by sea or otherwise" ("Contra Apion," i. 12). Several of the chief sages of the Talmud, however, were traders. Eleasar ben Azaria dealt in wine and oil (B. B. 91a). Notwithstanding this, many sayings in the Talmud show that little importance was attached to commerce as a means of livelihood; *e. g.*, "have little business" (Abot iv. 14); or, "the less trading the more Torah" (*ib.* vi. 6). It was recommended to lay out one's money in three parts: one-third to be invested in land; one-third in goods; one-third to be kept on hand (B. M. 42a). It may be of interest to conclude this account of trading among the Jews of Biblical and Talmudic times by the details given by Herzfeld relating to the prices of objects mentioned in these two sources, arranging the objects in the usual order: grain, cattle, fowl, fruit, wines, dress, slaves, beasts of burden, chariots, fields, vineyards, and houses, finishing with wages and fees. See accompanying table.

Hitherto there had been no signs of any special predilection or capacity for commerce shown by Jews, but they had developed special aptitudes in that direction by the early geonic period, when they are everywhere mentioned as merchants. As soon as the Teutonic nations had settled down after the great migrations of the fifth century, Jews are found mentioned together with Syrians as merchants at Narbonne and Marseilles (Gregory, "Epistles," vii. 24, 45). The Frankish kings bought goods from them (Gregory of Tours, "Hist. Gall." iv. 12-35, vi. 5, vii. 23), and they occur as traders at Naples (Procopius, "De Bello Gallico"), Palermo (Gregory, "Epistles," ix. 55), and Genoa (Cassidorus, "Epistles," No. 33). They even chartered ships: Gregory of Tours ("De Gloria Martyrum," p. 97) mentions a Jew who owned a vessel sailing between Nice and Marseilles. It is recorded of Charles the Great that, after watching a ship nearing Narbonne, he decided that it was not a Jewish, but a Norman, vessel (Pertz, "Monumenta," ii. 737). The Visigoth king Egica, indeed, forbade them to engage in maritime commerce ("Leg. Visig." xii. 2, 18). They were particularly active in the slave trade (Agobard, "Opera," ed. Baluze, pp. 62-65), and Gregory the Great protested against their activity in this direction in North Gaul ("Epistles," ix. 36). It has been conjectured that through their means England was brought within the pale of Christendom (Jacobs, "Jews of Angevin England," pp. 3, 4). See SLAVE TRADE.

The cause of this sudden commercial activity and predilection for trading is probably to be found in the rise of Islam and its control of the lands whence came most of the luxuries demanded in Europe. Christians could not trade in Mohammedan countries, nor Moslems in Christendom, consequently an opening was left for Jews, who were tolerated in both spheres as commercial intermediaries (Cunningham, "Western Civilization," ii. 49, Cambridge, 1901). Within two centuries after the foundation of Islam the Jews appear to have almost monopolized the

trade between Europe and Asia. There is a remarkable passage in the "Book of Ways," written about 817 by Ibn Khordadhbeh (ed. De Goeje, in "Bibl. Geogr. Arab." vi. 114), giving the routes adopted by these Jewish merchants.

ROUTES OF THE JEWISH MERCHANTS CALLED RADANITES.

"These merchants speak Persian, Roman [Greek], Arabic, the language of the Franks, Spanish, and Slav. They journey from west to east, from east to west, partly on land, partly by sea. They transport from the West eunuchs, female slaves, boys, silk, castor, marten and other furs, and swords. They take ship in the land of the Franks, on the Western Sea, and steer for Farama [Pelusium]. There they load their goods on the backs of camels and go by land to Kolzum [Suez] in five days' journey over a distance of twenty-five farsakhs [parasangs]. They embark in the East Sea [Red Sea], and sail from Kolzum to El-Tar [port of Medina] and Jeddah [port of Mecca]; then they go to Sind, India, and China. On their return they carry back musk, aloes, camphor, cinnamon, and other products of the Eastern countries to Kolzum, and bring them to Farama, where they again embark on the Western Sea. Some make sail for Constantinople to sell their goods to the Romans; others go to the palace of the king of the Franks to place their goods.

"Sometimes these Jew merchants, when embarking in the land of the Franks in the Western Sea, make for Antioch [at the mouth of the Orontes]; thence they go by land to Al-Jabia [?], Al-Hanaya [on the bank of the Euphrates], where they arrive after three days' march. There they embark on the Euphrates for Bagdad, and then sail down the Tigris to Al-Obolla. From Al-Obolla they sail for Oman, Sind, Hind, and China.

"These different journeys can also be made by land. The merchants that start from Spain or France go to Sous Al-Akça [Morocco], and then to Tangiers, whence they march to Kairowan and the capital of Egypt. Thence they go to Ar-Ramla, visit Damascus, Al-Koufa, Bagdad, and Bassora, cross Ahwaz, Persia, Kirman, Sind, Hind, and arrive at China. Sometimes they likewise take the route behind Rome, and, passing through the country of the Slavs, arrive at Khamlij, the capital of the Chazars. They embark on the Jorjan Sea, arrive at Balkh, betake themselves from there across the Oxus, and continue their journey toward Yourt, Toghozghor, and from there to China."

The name "Radanites" is a puzzle, but probably refers to the commercial metropolis of Persia—Rai (Rhaga), near Teheran, which was the commercial center for Armenia, Chorasan, and Chazaria (Ritter, "Asien," vi. 1, 595). The influence of the Radanites probably accounts for the adoption by the court of Chazaria of the Jewish religion (see CHAZARS), and it is also probable that the mission of a Jewish envoy from Charles the Great to Harun al-Rashid is connected with this extensive commerce. The Jews also appear to have taken wares from Byzantium to Prague, and to have exchanged them for corn, tin, lead, and slaves, from the Russians and Slavs who met them there (Ibrahim ibn Ya'ḳub, quoted by G. Jacob, "Handelsartikel der Araber," p. 9, Berlin, 1891). The large number of Arabic coins found throughout northeastern Europe (as many as twenty thousand in Sweden alone) shows the great extent of this Baltic trade with Chazaria, mainly conducted by Jews.

The spice trade appears to have been practically monopolized by Jews (Gregory of Tours, iv. 12, 35; vi. 5); and this was of consequence because of the demand for condiments to flavor the salted meats and fish on which medieval Europe lived during winter. An indication of the extent of their Lyons trade is found in the complaint of Agobard that, to suit their convenience, the market-day had been changed from Saturday to another day in the week ("De Insolentia," p. 64); indeed, so important had their commercial position in medieval Europe become by the tenth century that a usual formula in charters and like documents was "Jews and other merchants" (Stobbe, "Juden in Deutschland," pp. 103, 199, 200, 231). The emperor Henry IV. gave them permission to sell wine, pigments, and drugs (*ib.* p. 231). In the tenth century the commercial rivals of the Jews began to take measures to restrain their activity. The Venetians, for example, forbade ships' captains to take Jewish passengers on their voyages to the Levant (Depping, "Histoire du Commerce," ii. 22). Similarly as late as 1341 no Jew was allowed to pass from Aix to Alexandria, and only four each year for the Levant.

But the first systematic repression of Jewish com-

Influence of Crusades.

mercial activity began in the twelfth and thirteenth centuries during the Crusades. All trade in the towns began to be monopolized by the merchants' gilds, from which Jews were excluded. In England, for example, there is only one known instance of a Jew in a merchant gild (Kitchin, "Winchester," p. 108); so the only way in which Jews could obtain possession of merchandise was not by direct purchase, but as pledges for money lent. In this way, for example, Aaron of Lincoln came into possession of large quantities of corn at the time of his death (see "Trans. Jew. Hist. Soc. Eng." iii. 164, 165); and a large amount of corn was included in the property which escheated to the king on the expulsion of the Jews from Hereford (*ib.* i. p. 144–158). Heliot of Vesoul and his company similarly came into possession of stuffs and vestments which they transported by horses and carriages to various customers. They also sold wheat, soap, paper, wax, fur, leather, harnesses, kitchen utensils, spoons, forks, girdles, etc., besides horses and cattle (I. Loeb, in "Rev. Et. Juives," ix. 39); but these sales, which took place in the presence of the provost, and, probably, were mostly sales of pledges, can not be regarded as the ordinary sales of commerce, in which the buyer competes in open market and afterward sells at his own time, and without intervention of officials. Whatever the commercial activity of the Jews in the Middle Ages and after the Crusades, it was incidental to their Money-Lending, Trade of, and Pawnbrokers. W. Roscher traces to their activity in this regard the introduction into commercial law of three important innovations which indirectly affected commerce: (1) the making of loans on interest; (2) the retention of goods bought bona fide, which has been applied in later commercial law to bonds and other securities to bearer; (3) the introduction, or, at least, the extensive use, of bills of exchange ("Ansichten der Volkswirtschaft," ii. 231, Leipsic, 1878). It is still, however, a doubtful point whether bills of exchange were not introduced quite independently of the Jews (see Exchange, Bills of).

Instances of Medieval Commerce.

Though, as a rule, Jewish commercial activity was from the twelfth century almost up to the nineteenth generally restricted to usury and petty trading, there are occasional instances of commercial dealings on a large scale, chiefly at the great seaports. Thus at Marseilles, between 1260 and 1299, a Jewish merchant named Mandrul, and others, traded in spices, cotton, and medicines, like sulfur and tartar, from Egypt, the Barbary States, the Balearic Islands, and Pisa, the chief trade being with Valencia, Acco, and Bougiah ("Rev. Et. Juives," xvi. 23). By this time Jews had lost their monopoly of the slave trade; only two cases of slave-dealing occurred at Marseilles at that period among Jews as against seven among Christians. Similarly, in 1248 there were twenty-nine money-changers among the Christians of Marseilles, but not a single Jew. Jews appear also to have been interested in the export of corn and wine from Vienna to Salzburg (Pertz, "Monumenta," ix. 706), and the Jews of Laibach in 1368 are reported to have become rich through trade with Venetians, Hungarians, and Croats (Scherer, "Rechtsverhältnisse," p. 519). It was indeed found necessary at times to prevent their competition with Christian merchants; thus the Jews of Linz in 1396 were forbidden to deal as merchants with the citizens of that town (Kurz, "Handel Oesterreichs," p. 89). In Spain the practise varied: in Castile, Henry IV. allowed the Jews to trade with Christians (Amador de los Rios, "Historia," iii. 134, 135), and there is evidence of a considerable wool trade between Navarre and England, conducted by Jews (Jacobs, "Spanish Sources," Nos. 1563, 1573, 1639, 1647), besides notices of dealers in cloth, fur, leather, silk, spices, timber, horses, mules, and wine (*ib.* p. xxxvii.); yet the Jews of Navarre were not allowed to sell anything without license from the king (*ib.* Nos. 1458, 1459). On the whole, fewer restrictions seem to have been placed upon the Jews in Spain than elsewhere; the silk industry was entirely in their hands (Grätz, "Geschichte," v. 396). This led to a remarkable extension of Jewish commercial activity when, in the fifteenth century, there spread throughout the world a class of persons which maintained intimate connections with Spain and Portugal at a time when those countries were receiving masses of the precious metals, which raised prices throughout Europe and gave abnormal profits to merchants, amounting, it is said, to between 300 and 400 per cent (Beer, "Geschichte des Welthandels," ii. 147).

Marano Trade.

The commerce of the Maranos served an important function in the development of trade between Europe, America, and the Levant. Manasseh ben Israel, in his "Declaration" to the English Parliament, gives an interesting account of the wide extent of Jewish trade due to their family connections and common language (ed. Wolf, pp. 2, 3). The precious metals mined in America were transported to Spain and Portugal, and thence, in exchange for Oriental goods, were passed on to Antwerp, which thereby became the financial center of Europe. Jewish Marano families were especially active in all these countries. The Caceres family had members in Hamburg, England, Austria, the West Indies, Barbados, and Surinam in the middle of the seventeenth century. Similarly extended connections are found with the Conegliano and Alhadib families. The Mendez family was connected at first with Antwerp, then with Constantinople, while a branch, the Gradis family, settled at Bordeaux, dominated French colonial trade. Benjamin Gradis sent out wine, alcohol, meal, and pickled meats to Cayenne, Martinique, and San Domingo, getting sugar and indigo in return. The Maranos were especially active in the American interstate trade. From Curaçao Joshua Mordecai Henriquez shipped to New Netherland in 1568 Venetian pearls and pendants, thimbles, scissors, knives, and bells. The Jewish trade from Jamaica became so extensive that the English traders of that island petitioned against Jews being allowed to trade from it unless they became endenizened. By 1753 the greater part of the British trade with the Spanish West Indies was in the hands of the Jews, especially the trade of Jamaica with the Spanish main ("Consideration on the Act of 1753," p. 40). Aaron Lopez of Newport had no less than thirty ships engaged in this trade (see M. J. Kohler, in "Pub. Am. Jew. Hist. Soc." x. 62). This trade was naturally fostered by the Jews of New York, who were not allowed to engage in retail trade from 1683 (*ib.* v.). From Marseilles an extensive trade with the Levant was maintained by Spanish Jews. In the ten years 1670–79 the firm of Joseph Vaez Villarreal & Company insured ships to the amount of 866,400 livres ("Rev. Et. Juives," xi. 142). In 1693 merchants of Marseilles petitioned the intendant of Provence not to allow French subjects to lend their names to Jews bringing silk from the Levant, especially from Smyrna (*ib.* xii. 270). The Gorneyim of Algiers practically monopolized the trade between that port and Leghorn in the seventeenth century. (Grünwald, "Juden als Seefahrer," 1902, p. 48).

Central Europe.

Meanwhile in Central Europe a special Jewish commerce was being developed in connection with the great fairs, especially during the Thirty Years' war. They purchased the soldiers' loot and thus acquired capital. The position of Jews as pawnbrokers led naturally to pedling. These pedlers often developed into traveling traders, purchasing the products of the villages, especially furs and leather, which they sold at the Fairs, especially at the great fair at Leipsic, which, after the close of the Thirty Years' war, became a clearing-house for the wares of North Germany. During the last quarter of the seventeenth century, 15,620 Jews, with 2,362 dependents, visited the three annual fairs at Leipsic, making an average of nearly 240 Jews at each fair. These came from all quarters of Europe; not less than 321 places are mentioned by M. Freudenthal ("Die Jüdischen Besucher der Leipziger Messen," Frankfort, 1902). Chief among these were Prague, Hamburg, Halberstadt, Berlin, Dessau, Frankfort, and, beyond Germany, Amsterdam and Venice. As early as 1590 Jews used to import fur, leather, lumber, and grain from Moscow to Gnesen. The memoirs of Glückl von Hameln show that these visits to the fairs were of social as well as of commercial importance. The Frankfort fair became the center of the Hebrew book trade in the seventeenth century ("Rev. Et. Juives," viii. 75). By this means new connections were made with different parts of Europe by the rising Jewish merchants, and the international trade of the continent became concentrated for a time in their hands. The fur trade in particular was monopolized by Jews, owing to their wide connections, ranging from Novgorod to Nantes ("Rev. Et. Juives," xxxiii. 97). Similarly the Jews of Avignon, in the seventeenth century, used to travel as far as Nîmes and Montpellier (*ib.* xxxiv. 280), where they sold mules on credit, and thus took the business out of the hands of the Christian merchants of Languedoc. In 1738 the latter obtained a decree from the intendant of Provence prohibiting the sale of mules by Jews, though this decree was afterward withdrawn. In like manner German and Polish Jews, toward the end of the eighteenth century, settled in the chief English ports of the south and west as small pawnbrokers and shopkeepers, sending out agents from Monday to Friday to the neighboring villages (L. Wolf, "Family of Yates and Samuel," p. 2, London, 1901).

Restrictions on Jewish Trade.

The amount of trade conducted by the Jews depended in a large measure on the municipal or other authorities. In 1603 Henry IV. granted to Jews of Metz the right to trade, which was confirmed by Louis XIV. in 1657 (Jost, "Geschichte," ix. 31). So, too, the Jews of Leghorn were permitted to trade from 1668 (Bedarride, "Les Juifs," p. 364); on the other hand, the Jews of Rome and Ancona were only permitted to deal in second-hand clothing (Vogelstein and Rieger, ii. 198). As a rule, however, the right to trade was one of the municipal rights, and these were not granted the Jews till well on toward the middle of the nineteenth century. They were therefore generally confined to pawnbroking, pedling, and second-hand clothing, in which for a considerable time they had a monopoly. With the spread of colonization Jewish merchants found new spheres, especially in the Anglo-Saxon world, where there was little opposition to them. The firms of Montefiore in Australia, of Mosenthal and of Bergtheil in South Africa, were among the pioneers of those colonies, and a large proportion of the English colonial shipping trade was for a considerable time in the hands of Jews. On the continent of Europe Jews performed a special function in mediating between the domestic industries of the villages and the markets and manufactories of the chief towns. Thus in Vienna the woolen manufacturers obtained their raw material from Jewish traders who traveled round to Iglau, Reichenberg, and Brünn. Before the emancipation many expedients had to be resorted to before this centralization of the wool industry could be effected. Thus the firm of Tuchowsky used to have a Christian agent at Vienna to represent its interests. When he died one of the firm had to submit to baptism in order to reside in Vienna (S. Mayer, in Bloch's "Wochenschrift," Nov. 14, 1902).

Numbers Engaged in Commerce.

Owing to a variety of circumstances the number of Jews applying themselves to commerce is heavily in excess of their proportion to the general population. Thus in Prussia in 1861 among adult workers 58 per cent of Jews were engaged in commerce as against 6 per cent of the rest of the population (Legoyt, "Immunités," p. 34), while in Italy the proportion was as 55 to 5. These figures are somewhat misleading, as most Jews live in cities; but, after allowing for this factor, a large discrepancy still remains. At Berlin, *e.g.*, in 1871 61.4 per cent of Jews were in commerce against 15.4 of the rest of the population (H. Schwabe, "Berlin in 1871," p. 100); in Vienna, 33.1 per cent against 11.5 per cent (Jeitteles, "Israeliten zu Wien"). Altogether it may be said that thrice as many Jews adopt commercial pursuits. The particular branch of commerce in which Jews appear to excel is mainly the "commerce of intangibles"—that is, dealing with money per se—and they excel as factors and shippers (see Banking; Finance). The clothing trades seem to be largely in the hands of Jews, both as regards manufacture and the wholesale and retail trade. This may have developed out of the restriction to the sale of second-hand clothing, but is probably due more to the economic pressure brought to bear in the Russian ghettos. The trade in furs and feathers is also largely in Jewish hands as a relic of the old peregrinations of the Jewish pedlers in East Europe, and can be traced back to the time of the Chazars. The fancy-goods trade is almost invariably a trade in imports, and here the cosmopolitan connections of the Jews have helped them to achieve conspicuous success. In England the fruit trade is wholly in the hands of Jews, because fruit can be sold on Sunday, and therefore the keeping of the Sabbath is not an obstacle to Jewish fruit-traders. In the United States the most striking characteristic of Jewish commerce is found in the large number of department stores held by Jewish firms.

G. J.

——**In Russia:** Under the Polish régime—that is, up to the end of the eighteenth century—commerce was almost the only occupation followed by the Jews in Russia. Neither the upper nor the lower classes among the non-Jewish native population cared to engage in it; and it consequently became centralized in the hands of the Germans and the Jews. As early as the fourteenth century there was a Jewish bazaar in Wilna. During the Middle Ages the Jews of Poland and of Lithuania were engaged in agricultural and industrial pursuits only in a small degree. After the Polish provinces had been annexed to Russia, and especially in the latter half of the nineteenth century, the Jews were attracted to handicrafts; but owing to certain restrictions placed on these occupations they were compelled, as they are even to-day, to rely chiefly upon commerce and finance.

The closing years of the nineteenth century were marked by a serious decline of Jewish commerce in Russia. Owing to a steady increase in the number of Jewish merchants, especially in the western regions, and to the consequent keenness of competition, commerce could hardly have been lucrative. The chief obstacle to its development was, and still is, the lack of capital, for the poverty of the Jewish population is extreme.

Business Conducted on Credit.

Business is frequently started exclusively upon credit. Consequently, when the manufacturer reduces or withdraws credit, the Jewish merchant is often forced to declare himself insolvent. But the manufacturer is not always the trader's only creditor. Advances secured by chattel mortgage are made by banks, by mutual loan associations, and by private persons. Usually the interest charged is very high, especially to small dealers. The "wocher"—that is, the plan of paying off a debt in weekly instalments—prevails. The profit is mostly absorbed by the interest on the capital borrowed. Therefore, in order to secure an income, it is often necessary to put the capital repeatedly into circulation. By adopting this course the turnover of the Jewish merchants is, other things being equal, greater than that of their Christian competitors; but, notwithstanding their resourcefulness, the Jewish merchants do not realize as large a percentage of profits as do the Christians.

The foregoing applies to Jewish merchants doing business on a moderate scale. The majority of the Jews in the cities and villages within the Pale of Settlement are not able to start business even on credit, and are therefore compelled to trade in small wares. Opening a small store on some street-corner, they stock it with a few rubles' worth of goods, and make a profit of from twenty to thirty copecks a day. Frequently the business equipment consists only of a single stand stocked with provisions. Dealers of this kind are very numerous in the Jewish centers, as in Wilna, Minsk, and Kovno, where the percentage of poor Jews is exceptionally large. Thus, in Wilna their business center consists of a cluster of dark alleys, permeated with a fetid atmosphere, and resigned to rows of dirty, ill-smelling stores and stands. Although the range of prices is astonishingly low, little business is done, and often the dealers in the district outnumber the customers.

Branches of Trade.

The Jewish interest in lumber, in agricultural produce, in the export of grain, flax, butter, eggs, fruit, wines, and tobacco, and in kerosene, is considerable. Before the promulgation of the law making the sale of liquor a government monopoly, the Jews were active in the retail sale of vodka. At present Jewish merchants supply alcohol to the government in considerable quantities. In general, government contracts have been monopolized by the wealthier Jews. In recent years, however, many of the governmental departments have declined the services of Jewish contractors.

The Jews are prominent in the trade in grain. They have established branch offices in the chief centers of the grain-producing regions. In the autumn their agents travel through the grain belt and purchase its produce. Small dealers establish themselves at the railroad stations. They pay up to ninety-five per cent of the value of the grain shipped, deposit the bills of lading in a bank, and then send an order for sale to the agent at the port. When the sale has been consummated and the money from the commission agent received, accounts between seller and purchaser are adjusted. The dealers forward the grain to Black Sea and Baltic ports and to German frontier-towns like Danzig, Königsberg, etc. The number of Jews engaged in the grain-trade is considerable, and embraces buyers, commission agents, bankers, brokers, etc. To the poverty of the crops recently harvested in South Russia may be attributed the present (1902) deplorable condition of the Jews in that region.

A considerable portion of the Jewish population is engaged in the lumber trade. The Jews buy the standing timber from the landowners, especially in western Russia, and manufacture from it articles of various kinds for the home and foreign markets.

The part taken by the Jews in fairs, which are a distinguishing feature of trading life in Russia, also

Fairs.

deserves notice. Whenever a fair is held they supply the peasants who visit the fair with all kinds of household necessities, such as iron, salt, kerosene, sugar, and dry-goods, in exchange for their farm products. To the development of railroads in recent years may be attributed the decline of this method of trading. Another obstacle calculated to shut out the Jews from this class of trade is the law prohibiting them from living in small towns and villages. Practically no recent statistical data on Russian-Jewish commerce are available.

Anti-Jewish Restrictions.

There are still some legal restrictions on Jewish commerce in force even within the Pale of Settlement. A typical example is the prohibition against dealing in objects held sacred by Christians, such as holy images and the like. Prior to the government monopoly of the sale of liquors, the Jews, while permitted to engage in that business, were hampered by various restrictions. Thus, they were forbidden to sell beyond the Pale; and within the Pale the sale was allowed only in houses owned by the sellers.

The chief obstacle which embarrasses Jews engaged in commerce in Russia is their exclusion from the interior governments of the country. Those enrolled in the mercantile gilds are allowed to go there only for the purchase of commodities: members of the first gild are allowed to stay six months; those of the second gild, only two months. At certain fairs temporary sojourn only is permitted. Artisans domiciled in the interior governments may deal in their own manufactures. If a Jew be found trading in prohibited articles, these articles are confiscated, and the transgressor is sent to the Pale of Settlement. A five years' enrolment with the merchants of the first gild in governments within the Pale confers the privilege of enrolment in the first gild in the interior governments. In consequence of this measure many of the wealthier Jews enroll as merchants, although not actually engaged in any business, to obtain the right of residing wherever they please. Those engaged in the liberal professions, physicians, druggists, etc., enjoy the privilege of settling wherever they may choose, though their right of engaging in business outside the Pale has often been contested by the administration. The senate, however, has invariably decided in their favor. For statistics regarding Jewish commerce in Russia, see Russia.

H. R. F. J.

COMMERCIAL LAW: According to Jewish law persons legally capable of entering into any form of contract are legally capable of making commercial contracts also; but it must not be forgotten that girls reach majority at twelve and boys at thirteen. Three kinds of incapables are barred out: the deaf-mute, the unsound in mind, and the minor. Bondmen are excluded because their possessions as well as their earnings belong to their masters. Married women have not full legal capacity, for they lack the control of their property, and their earnings belong to their husbands. But the authorities recognize the wife that "trades [buys and sells] within the house" with the permission of her husband (Shulḥan 'Aruk, Ḥoshen Mishpaṭ 62, 1); in fact, a woman may marry with the agreement that the husband shall have no interest in her property or its income (Ket. ix. 1). Yet the great majority of those women who have carried on trade and industry in Israel, often on a large scale and with marked success, have done so simply in the names and as the agents of their husbands.

Partnership.

There is an Assyrian word used in the Talmud for "partners" (שותפין), but in the Mishnah it is applied mainly to joint owners of land. In the Codes it is used both in this sense and in that of "partners" (Maimonides, "Yad," Sheluḥin, *passim*). It will be seen under Partnership that its formation is clogged by many doubts and formalities. Of joint-stock companies or trading corporations the Talmud and the Codes show little trace; there were, indeed, societies in Palestine holding their property in common and working for the common profit—the Essenes, for instance—but neither the inclinations nor the purposes of these societies were in any way commercial, and seldom, if ever, did they go to law. Old trading companies may, perhaps, be recognized in the mutual insurance companies mentioned below, or in the caravan (שיירא) repeatedly spoken of in the Talmud; but nothing is known from that source as to their workings as legal entities.

Maritime Law.

The commonwealth of Israel in its palmiest days troubled itself but very little about ships, and controlled hardly any of the ports on its coast-line. Its maritime trade fell to Phenicians and Philistines. There were, however, in Mishnaic times, Jews who owned trading-vessels; and in the article Alienation and Acquisition the mode of making delivery of a vessel (ספינה) so as to give title to the buyer is discussed.

There is also, in a rather crude form, a law of jettison, or general average. Says a Baraita (B. Ḳ. 116b): "A ship is going along the sea; a squall arises and threatens to sink her, and they lighten her of her burden; then they take account, according to the weight, and not according to the money value; for they should not change from the usages of ship-owners." The reason of this rule is evidently that the owners of goods of small weight in proportion to value have done very little toward overloading the ship. No mention is made of other sacrifices for the common good than actual jettison; and the rule of apportioning the loss by weight rather unjustly relieves the ship-owner from contribution. But other laws on shipping, now generally in force, are not found. Rich Jews in the Middle Ages often owned ships and cargoes; but they of necessity settled disputes about these in the admiralty courts of the sea powers, not before their rabbis; and so no rulings on such disputes in the responsa literature, or in the Jewish Codes, are to be found.

There is but little mention of bills and notes in Jewish law, though it has been shown under Alienation that Abraham ben David was the first to suggest a form of bond with some elements of true negotiability; his idea, however, was not developed by later authorities. In questions of contracts with carriers and contracts of affreightment—that is, for carriage by water—the Talmud knows no special liability of the carrier; he is, like the shepherd, simply a hired keeper (see Bailments). On that sort of affreightment known as a "charter party," where a single freighter hires the ship for the voyage, the Talmud (B. M. 79a, b) gives some points which Maimonides repeats in "Yad," Sekirut, vi. 4, but with a lack of clearness which indicates that the subject treated did not come up in actual practise.

Marine Insurance.

A Baraita, probably of the second century (B. Ḳ. 116b), contains the principles of marine insurance: "And ship-owners have the right to contract that whosesoever vessel is lost, they will get him another; but if it be lost through his fault [כוסיא (variant בוסיא; see Rabbinowicz, "Diḳduḳe Soferim" *ad loc.*)] they do not replace it; if not through his fault, they replace it; and if he has lost his vessel while deviating from proper course, they do not replace it." This is the earliest known passage on insurance. The Justinian Code is silent; and when the Roman republic or empire, as Livy and Suetonius say, agreed to indemnify shippers against loss in case of war or famine, it was not insurance, for there was neither premium nor mutuality.

Another Baraita (B. Ḳ. 116b) approves mutual insurance among ass-drivers (חמרים), with this addition: "If he says, 'Give me [the money] and I will watch,' they do not listen to him"; for, as the Gemara explains, one of the considerations of the insurance is that every driver shall stay with the caravan and help to defend it. Note the phrases: "ship-owners have the right," "ass-drivers have the right," to insure. Generally, contracts depending on uncertain future conditions were not favored in Jewish law. Of life or fire insurance the Talmud knows nothing; nor is it cognizant of bottomry and respondentia bonds.

In the Jewish law contracts for hiring service are treated more from the moral than from the commercial standpoint. The subject of apprentices is also unknown to Jewish law, doubtless for the reason that boys are of age at thirteen and may dispose of their own services.

Of commercial remedies only the lien of the party in possession for work done and for advances is recognized in the Talmud, and this incidentally in the discussions on the liability for faulty work of mechanics entrusted with goods (B. Ḳ. 98-102); but there is none of the complication of the subject which has been introduced into modern law.

For the discussion of other points of commercial law see Acceptance; Agency, Law of; Alienation and Acquisition; Bailments; Broker; Contracts in Law; Debtor and Creditor; Overreaching; Partnership.

COMMISSION. See Brokers.

COMMUNITY, ORGANIZATION OF.—

Ancient and Medieval: At the beginning of the common era there were Jewish communities at Alexandria, Rome, Salamis, Corinth, Athens, Delos, etc.; at Antioch (in Pisidia), Iconium, Smyrna, Ephesus, and other well-known cities on the Mediterranean and in Asia Minor. In Palestine, which even as a Roman province retained its essentially Jewish character, the whole country formed one community, with its center at Jerusalem, where the highest religious, judicial, and executive authorities were located.

After the destruction of Jerusalem by the Romans, the national life of the Jews was replaced by the communal life, on which the Roman form of government was impressed. But while the Romans reserved for themselves the government of the province, they did not interfere with the internal affairs of the communities. The Jews still had a center in the person of the patriarch ("nasi"), who had the disposal of communal offices, and the right to levy a tax (Aurum Coronarium), which right, on the cessation of the patriarchate, was transferred to the emperor. At an early date the Babylonian communities separated from those of Palestine, and had their own head, called "resh galuta" (exilarch), whose authority was greater than that of the patriarch.

The communities, whether found in כפרים ("villages"), עירות ("cities"), or כרכים ("walled towns"), were composed of בני העיר ("full citizens"—residents of more than twelve months' standing), יושבי העיר ("half citizens"—residents of from thirty days' to twelve months' standing), and "transients"—those who remained less than twenty days in the place. At the head of the community was a governing board (פרנסים, טובי העיר) consisting of at least three members, but usually of seven, and, in later times, of twelve. If brothers happened to be on the board, they had one vote only between them. All communal offices, even that of physician, were filled by appointment from the "court" with the concurrence of the community. The governing board, even where it had absolute authority, was expected to observe the wishes of the community. Membership in the board, as well as other communal offices, was sometimes hereditary.

The Governing Body.

The governing board conducted all the affairs of the community, giving special attention to the distribution of funds for alms; it apportioned communal and municipal taxes according to fixed rules, and decided on the acquisition and sale of communal property. It supervised the entire social and commercial life of the community, fixed weights and measures, the price of food, and the rate of wages; it issued police regulations, and could even interfere in the private affairs of the individual; and, in the interest of the community, could annul rules long sanctioned by usage and precedent. The board was responsible for the safety and the social and intellectual welfare of the community.

The Jews of ancient Rome were governed by a "gerusiarch," that is, a president of the communal council ("gerusia"); an archon (מנהיג or פרנס);

an Archisynagogue (ראש הכנסת); etc. (Berliner, "Magazin," i. 66; for the later communal government at Rome see Berliner, *ib.* ii. 31). In Sicily the following expressions were current: "dienchelele" (chief district rabbi); "manigliori" (from מנעל = "keeper of the keys of the synagogue"); "presbyter" (ḥazzan and shoḥeṭ); "sacristano" (גבאי); "celebrare missam" (literally, "to celebrate mass"), to conduct services, etc. (Güdemann, "Geschichte des Erziehungswesens," ii. 71, 281). At Cologne the president of the community was called "Judenbischof" (Jewish bishop), and was assisted by a chapter. At Speyer the archisynagogue, appointed by the Catholic bishop, was at the head of the community.

The Bet Din.

The governing board was subject to the "dayyan" (judge, also called "ḥakam," or "zaḳen"), who was ordained by the nasi or exilarch, and was the final authority on ritual, civil, and political questions. He decided unaided in money matters (without being obliged to make restitution in case of an error of judgment), where otherwise three lay judges were required. Criminal cases were decided only by three scholars of standing (בית דין), who were usually elected for life to insure impartiality and respect. They did not, in general, draw a salary, but when their entire time was devoted to the affairs of the community, they might receive means sufficient for a bare subsistence. They had supervision over all religious and political affairs. Those who had been ordained at Babylon were called "rabbonim"; those ordained in Palestine were called "rabbis." The title of "ḥaber" (associate) was bestowed upon a person who had rendered special services to the community. He was considered in many cases as arbitrator. A community consisting of more than ten members was a synagogal community, and was obliged to secure a synagogue, the judicial and outer affairs of which were in the hands of a committee elected from the members of the governing board. It was not permissible to sell or exchange the synagogue, except in cases of extreme necessity, nor could the old synagogue be pulled down before the new one was built. Affairs pertaining to the ritual and liturgy were in the hands of the archisynagogue. (This term when applied to a woman, as in old Roman inscriptions, meant, no doubt, merely the president of a woman's philanthropic society, like the "parnesessa" at Rome in the sixteenth century.) The archisynagogue was especially honored, his office being for life and sometimes hereditary. In the Diaspora there were honorary titles, such as "fathers," or "mothers, of the synagogue"; thus, the title of "mater synagogæ" or "pateressa" was conferred upon Dona Gracia Mendesia. The "rosh ha-keneset" (archisynagogue) was subordinate to the "ḥazzan ha-keneset," whose orders were authoritative in synagogal and in general matters; he was also executor of the punishments decreed by the court, and performed the functions of the later "shammash," who is otherwise called שליח בית דין ("the messenger of the court") in the Talmud and by the Geonim.

Other Officials.

The שליח צבור ("delegate of the congregation," or "leader in prayer") stood before God as representative of those who did not understand the import of the prayer. He, too, was an unsalaried official. All worthy persons, however, and especially those in straitened circumstances or in trouble, were allowed to lead in prayer on days of fasting and repentance. The lesson from the Torah was read by the קורא ("reader") although any one called upon was to read his own section. The weekly section was translated into the Aramaic vernacular by the מתורגמן ("dragoman"), who was entitled to compensation; and in order to insure the requisite minimum for the service, ten men, called Baṭlanim, received a regular salary to attend.

The school, like the synagogue, was under the supervision of the community, which appointed the teachers (called variously סופר, מלפנא, מלמד תינוקות, מקרי ינוקא). The latter were paid by the parents of the children of school age, but this salary was generally so small that the community contributed an addition as צדקה ("relief"). No one who was unmarried, or under the age of forty, was employed as teacher. An assistant teacher (ריש דוכנא) was paid by the community when the pupils numbered forty or more; a second assistant being added when the number reached fifty. Private teachers were also allowed. A father or guardian was obliged to send his child to school, and he was not allowed to send the child to a neighboring school if there was one in his own community. Most of the communities had their own schoolhouses (בית המדרש), often adjoining the synagogues.

Benevolent Institutions.

The management of the alms fund was an important matter; it was in the hands of a special committee (גבאי צדקה), chosen generally from among the members of the governing board, and hence also called פרנסים. The mere management, which involved no responsibility, was in the hands of one person; the levying of contributions, from which women, orphans, and the poor were exempt, was in the hands of two persons working together, who had the right to fine delinquents. The distribution was in the hands of at least three persons, for they had to decide on the amount of the relief, and any court dealing with money matters had to consist of at least this number. This office, also, was often hereditary, and the antecedents of the incumbent had to be irreproachable. In expending the money the wishes of the givers were to be considered. There were two chief classes of poor-funds: (1) The קופה ("box"), for feeding and clothing the resident poor. Every Friday evening a collection was taken up for them, and they were provided for during the coming week. (2) The תמחוי ("dish"), for the support of transients, for whom collections might be taken up on any day, in such amounts as were necessary. Non-Jews, also, were to be relieved, but those who begged from house to house received only a trifle from the fund. On special occasions, as on Purim, the poor received additional gifts. Money was also distributed in the synagogues for philanthropic purposes. Orphans were cared for by their guardians, or, if there were none, by the local court (בית דין).

The irregular or special communal taxes were

Various Funds.

levied only when occasion demanded, and only upon those directly concerned. This fund was managed by the treasurer (גזבר), who was a member of the governing board. The budget included the expenses (1) of the synagogue and its service, to which the full citizens, including orphans, contributed; (2) of education, such as the building of the schoolhouse and the occasional relief of the teacher, to which all members of more than two months' standing contributed; (3) of the poor-fund, consisting of (*a*) the "ḳuppah" (weekly food distribution), supported by all members of more than one month's standing; (*b*) the "tamḥui" (daily distribution of meals), supported by those of more than three months' residence; (*c*) the clothing fund, maintained by all residents of more than six months' standing; and (*d*) the burial fund, supported by all those of more than nine months' residence; (4) of the public safety, such as for walls, soldiers, etc., to which all full citizens and all landowners, and even orphans, contributed, Talmudic scholars only being excepted; (5) of the water-works, to which only those benefited contributed. The state taxes were apportioned among the communities, which divided them among their members. Only scholars were exempt from the poll-tax, while the tax on real estate was paid entirely by property-owners.

Along these lines developed the life of the community ("ḳahal," pronounced "kohl" in the districts where German-Polish was spoken; compare the term "kohlstibel" = "communal room"). Yet the rabbi (the designation מר [compare מרת, applied to women to-day] was dropped toward the end of the twelfth century, being later replaced by רבי = "rabbi" [compare Zunz, "Literaturgesch." p. 284; Rahmer's "Jüd. Lit.-Blatt." vii., No. 31; Salfeld, "Martyrologium," xxiv.; on מארי and חכם באבאי at Aden, see Rinman, "Massa'ot Shelomoh," pp. 10, 110]) no longer had the high position enjoyed by the "resh galuta" of Babylon and the "nagid" in Egypt until the fifteenth century. Until the end of the thirteenth century he was independent of the community as an unsalaried official. In England, before the expulsion, there was one "presbyter omnium Judæorum Angliæ.," appointed by the king, generally for life. In Poland during the sixteenth century he was appointed by the king, in whose name he levied taxes and held court. The rabbinate in Bohemia was in a similar position during the same century; but here there was no regular district rabbinate, as in Galicia and Moravia. In Algeria at the beginning of the fifteenth century the appointment of the rabbi was subject to the sanction of the government. In countries bordering on the Rhine he was appointed every three years. Rabbinical synods were held in some places as early as the thirteenth century; at Bologna, after 1416. In Poland they were held annually, and known as the "wa'ad arba' araẓot," COUNCIL OF THE FOUR LANDS.

In order to put an end to unpleasant rivalry for leadership in prayer, a salaried reader was appointed, who frequently discharged other religious functions and received the title חזן (ḥazzan). In his musical functions he was assisted by a "bass" and a "singer," and occasionally by boy choristers. The ḥazzan was usually elected by the unanimous vote of the congregation: it is on record that one refused nomination at the hands of the Archbishop of Cologne.

Communal Taxes.

The taxes which the governments demanded from the communities were often paid with difficulty. In Spain and in England, about 1273, even children of ten had to contribute, and in the latter country the Jews at times paid one-twelfth of the royal revenues. In Anjou the taxes were collected by a "sindicus et procurator universitatis Judæorum." Where the Jews formed one-tenth of the population they often paid one-fourth of the taxes, more than one-half of this sum being frequently paid by the wealthier members of the communities; hence the moneyed aristocracy which arose toward the end of the seventeenth century. The rabbi (also his widow), other professional scholars, all salaried officials, and some physicians, were exempt from taxes; artisans paid only the poll-tax; in Christian countries the ḥazzan paid, but not in Mohammedan. Some communities elected a committee of ten to choose the rabbi, the ḥazzan, and the sexton (שמש). These three received perquisites. In Poland, Russia, and Hungary their salary was raised by collections at weddings; and they received special gifts ("kibbudim") during festivals.

Fines and Imposts.

Wandering beggars were, and still are, a plague to communities, particularly as the latter were responsible for any trespasses of the former. At Metz every one was subject to taxation if a beggar remained eight days. The tax for the Holy Land was confiscated by the Roman emperors as "fiscus," the so-called "golden sacrificial penny" which the Jews had to pay to the emperor when he had extraordinary expenses (Würfel, "Juden in Nürnberg," p. 49; Ulrich, "Juden in der Schweiz," p. 12). Even to-day money is paid into the קופת ארץ ישראל ("the collection-box for Palestine"). In many countries (as in Austria down to modern times) there were also taxes on meat, wine, artificial light, strangers, dowries, luxuries, houses, imports, and exports. In Prague there was a tax even on the writing-material used by school-children; in Rome a tax was levied for the benefit of the circus. In Switzerland the Jews of the village communities paid from 15 to 20 florins to get timber and foliage for their tabernacles (Ulrich, *l.c.* pp. 32, 287).

In Nuremberg (Würfel, *l.c.* p. 32) the municipal council and judges had the right to appoint annually a committee and recorder, who saw that the community lived in peace and amity. In Zurich, in 1335, the Jews were required "to obey the burgomaster and city council. If any Jew injured another the latter was to bring the matter before the said burgomaster and council, and when they had decided according to their 'light,' he was to abide by their decision forever, appealing to no special Jewish law or to any higher court. He who did so was to be adjudged guilty of perjury, and pay two hundred silver marks as penalty" (Ulrich, *l.c.*). The foregoing was construed as applying even to the internal affairs of the synagogue.

In Spain all the communal decisions had to be confirmed by the government. Here, however, as late as 1379, the community could inflict capital punishment; but this measure was taken only against the "malshin" (slanderer), a term which has been adopted into Spanish. An efficacious mode of punishment exercised by the Jewish court, and still employed by the Church, was the Ban ("niddui"), in its more stringent form called "ḥerem."

Minor Officials.

The communal elections took place in the various countries and communities at different times between Passover and the Feast of Tabernacles. The Schulklopfer, generally identical with the שמש, was a curious institution. In Talmudic times, and later in Palestine, the "shofar" was blown at the beginning of the Sabbath. Still later (but as early as Yer. Beẓah 63a), mention is made of מקושה דכנישתא, the "Schulklopfer," or "synagogue-knocker," who, crying "In Schul herein!" knocked at the window with a hammer every morning except on the Ninth of Ab. Usually he tapped three or four times, but in cases of death, twice; on the Sabbath he used his fist instead of the hammer. The שמש also acted as public crier in the synagogue, invited to the festivities, called together the council, acted as bailiff of the court ("shammash bet din") in the absence of a special officer, and arranged for "minyan" (the number [10] of men required to be present at any religious services), to help form which the members of the community could be forced only on New-Year and Atonement days.

Takkanot.

Extraordinary legislation for the community was made public by means of the "taḳḳanah" (enactment), proclaimed and sometimes posted in the synagogue, and written in a book. Such enactments were usually issued for a given time only, generally for five years. In this way was promulgated the decree of monogamy for western European Jews; the decision as to when and what taxes were to be paid, and as to when the "Schulklopfer" should go round. One of the earliest "taḳḳanot" (dating before the ninth century) decreed that the dowry secured to the wife in the "ketubbah" (marriage contract) might be taken from the personal property of the husband after his death. The decrees against pronouncing the name of God, and against making proselytes, are also old. In Sicily begging from house to house was forbidden, under pain of the ban, by the taḳḳanah. By this means the inclusion in letters of the usual formula, "may he live long," was enforced; sermons were announced; the rate of interest was determined; the conditions under which one might move from a community, thereby casting an additional burden on that community, were set forth; and purchasing imported fowls or wine, lending money on stolen property, and building houses which would obstruct the street leading to the synagogue, were prohibited.

A. M. Gr.

Communal Property.

Each community owned all the instruments of communal life. Foremost among these is the synagogue, with its sacred scrolls and other appurtenances; one or several "batte midrashim," or houses of study—in modern times Talmudic libraries; lodges for washing the dead; ritual baths; slaughter-houses; lodging-houses for travelers; places for administering justice and for communal business; a large hall for the solemnization of marriages; a dancing-hall (usually in Germany and France, but not in Spain and the East); bakehouses or ovens, for the annual Passover cakes and the weekly "schalet"; and many cooking and other utensils, which might be used in turn by such members of the community as needed them. Another class of communal property includes funds for carrying on worship and study, and for charities; funds for the use of the general body in dealing with the Gentile government, for the purpose of preventing the oppression of individuals. Where the Jews were confined to a separate quarter, funds to pave and to clean the streets, to build and to repair gates, were sometimes needed. In such cases they were raised by a tax on the householders.

The communal property, both real and personal, may be bought and sold by the "ḳahal" acting through its proper organs. The Codes take this power for granted, but restrain its exercise. Thus, a synagogue may be sold in order to put up a bet ha-midrash, or to buy scrolls of the Law, but not conversely (Megillah, 26b, 27a; Shulḥan 'Aruk, Oraḥ Ḥayyim, 153, 1).

L. G. L. N. D.

——**In Modern Times:** Notwithstanding the emancipation of the Jews from their medieval state of dependence on the government, the authorities in most of the European states still continue to regulate them in one way or another. This is especially the case on the continent of Europe, where most of the states have a ministry of public worship within whose jurisdiction all such matters fall.

France and the Netherlands.

The most important community organization in these states was the system of consistories established by Napoleon I. on March 17, 1808, and still effective as modified by an ordinance which was developed by Martin du Nord and promulgated by King Louis Philippe on March 27, 1844 (see Consistories). The consistorial system exists not only in France, Belgium, Holland, and Luxemburg (see Antwerp, Brussels, Amsterdam, etc.), but also has survived the French régime in Alsace-Lorraine, there being three "Circonscriptions Consistoriales": at Strasburg for Upper Alsace; at Colmar for Lower Alsace; and at Metz for Lorraine.

Germany presents to-day the most varied assortment of communal organizations, due to the different regulative forms adopted by the states which make up the empire. In some this organization is perfect, and is in direct communication with the government—*e.g.*, in Württemberg, Baden, Hesse, and Mecklenburg—in others it is imperfect, and the connection with the state is almost nominal.

In the kingdom of **Württemberg** the laws of April 25, 1828, and of Aug. 3, 1832, made it obligatory upon every Jew to be a member of a congregation. All were to form "Kirchengemeinden" (church communities), electing their own officers and having at their head a rabbi selected by the "Oberkirchenbehörde" (upper ecclesiastical council), such selection to receive the sanction of the government. The chief rabbi, whose seat is in Stuttgart, has the title "Kirchenrath." The congregations are divided into 13 "Rabbinatsbezirke" (rabbinical districts) and 41 "Gemeindebezirken" (community districts). The Oberkirchenbehörde or Kirchenoberbehörde, is made up of a government commissioner, a Jewish theologian, three or more additional members, and an "expeditor." It nominates all ministers and officers, and regulates the affairs of the congregations throughout the kingdom.

Germany.

In the grand duchy of **Baden,** as early as 1809, an organization of the Jewish communities was effected. The synagogues were divided into provincial synagogues, with a "Landesrabbiner" (chief rabbi of the district or province) and elders at their head—all to be approved by the government—and "Ortssynagogen" (local synagogues), dependent upon the provincial ones. At the head of the organization is an "Oberrath" (high consistory) in Carlsruhe, made up of an "Obervorsteher" (rabbi or layman), two "Landesrabbiner," two "Oberrathen," three additional "Oberrathen," and a scribe. The Oberrath was chosen by the grand duke, the Obervorsteher (chief warden) by the ministry, and the rabbis by the Oberrath, subject to confirmation by the government. The "Ortsrabbiner" were to be elected by the "Jüdische Landvorstand," with confirmation by the Oberrath. The decisions of the Rath in important matters is also subject to confirmation by the ministers. On May 4, 1812, a government commissary was added to the Oberrath; and for the provincial synagogues were substituted (March 5, 1827) "Bezirkssynagogen" (district synagogues), a "Landessynode" (national synod) being added. According to the law of June 18, 1892, every Jew is bound to pay a certain church tax regulated according to his general state tax, and for this purpose the individual congregations divide their members into sixty different classes. There are now in Baden both "Bezirksrabbiner" (district rabbi; *e.g.*, at Bruchsal and Freiburg) and "Stadtrabbiner" (city rabbi, as at Carlsruhe, Pforzheim, and Mannheim).

In **Mecklenburg-Schwerin,** according to the statute of May 14, 1839, the Jewish Church was recognized as such by the state, and all congregations were put under an Oberrath made up of two government commissaries (who have, however, no voice in religious matters), the Landesrabbiner, and a Rath of five, to be changed every four years. The Landesrabbiner is elected by the Rath subject to confirmation by the government, which contributes to his salary.

Mecklenburg-Strelitz has an "Ober- und Landesrabbiner" confirmed by the state. The Jewish communities in the grand duchy of **Hesse** were to be divided in 1825 into grand-ducal rabbinates; while **Saxe-Weimar-Eisenach** (which, according to the "Juden Ordnungen" of 1823 and 1833, was to have a Landesrabbiner and to receive a state subvention) has a grand-ducal "Aufsichtsbehörde" for Jewish affairs and a Landesrabbiner. **Saxony** has only individual congregations and no general organization; but since Dec. 30, 1834, these congregations have been placed within the jurisdiction of the ministry of education, and since Jan. 30, 1836, the government contributes toward their expenses. **Oldenburg, Birkenfeld, Saxen-Meinigen** (which, according to the edict of Jan. 21, 1829, was to have a Rath made up of the Landesrabbiner and a deputation from the consistory), **Anhalt,** and **Bruswick** still have a Landesrabbiner whose election is subject to confirmation by the state. The province of **Hesse-Nassau** is divided into Rabbinatsbezirke, each with a Provinzalrabbiner at the head, and with a Landrabbinat in Cassel. The cities of **Frankfort-on-the-Main** and **Homburg** have each a separate Stadtrabbinat. In some districts (*e.g.* Fulda, Hanau, Marburg) the religious affairs of the Jews are in the hands of a "Königliches Vorsteheramt der Israeliten" (royal directoral board of the Jews), in others (*e.g.*, Wiesbaden), of "Regierungs Commisaren" (governmental commissioners). In **Bavaria** the law of June 10, 1813, allowed every fifty families to form a congregation; but no organization was given to the Jews as a body. There are at present Bezirksrabbinate, Distriktsrabbinate, and Stadtrabbinate.

Prussia.

The greatest difficulty in organizing the Jewish communities was experienced in Prussia, due to the various enlargements of the kingdom during the first quarter of the nineteenth century. In 1815 portions of Germany which had been under French rule were added to the kingdom. In these former French provinces the consistorial arrangement had been introduced by the decree of March 17, 1808, and in Westphalia by the royal decree of March 31, 1808. In the province of Posen the law of June 1, 1833, recognized the Jewish congregations as corporations, at the head of which were representatives elected under the auspices of the government. The law of Jan. 14, 1834, gave these corporations further administrative powers. A third set of communities was governed by Frederick the Great's "General-Juden-Reglement" of April 17, 1750, for the kingdom of Prussia, Brandenburg, and part of Pomerania, and by the law of May 21, 1790, for Breslau. In **Lübeck** the heads of the congregations had to be confirmed by the "Landgericht." In religious matters the members of the congregations were placed under "the elders and rabbi," and were watched over by a royal commission. A fourth class comprised Jewish congregations, especially in Silesia, for which no especial regulations had been issued.

According to the "Allgemeine Landrecht" the Jewish communities are considered as "merely tolerated church societies," like the Herrenhuter and Mennonists. The communities have therefore been allowed to develop their own organization as they best seemed fit, only under a general supervision of the state. Each province, or district, has developed a "Verband der Synagogen-Gemeinden" *e.g.* (East Prussia with 45 congregations, West Prussia with 41, Pomerania with 21, in Posen with 26, Bromberg with 27, Breslau and Liegnitz with 36, Saxony with 15, and Westphalia with 44). The Jews in each place are forced to belong to the Jewish congregation, no matter what their religious affiliations may be. Thus the Reform-Gemeinde in Berlin is a part of the Jüdische-Gemeinde of the city. The extreme Orthodox party has found this arrangement burdensome; and in 1873 a law was passed by the Reichstag, largely through the efforts of Lasker, which permitted any one to declare himself "Confessionslos." This enabled the Orthodox Jews to found their own synagogue apart from the general organization, as was done in Berlin by the Synagogen-Gemeinde Adass-Jisroel, in Frankfort by the Israelitische-Religions-Gesellschaft, and in Mayence.

The simple form of city and district organization in Germany, as above described, has not been found sufficient to meet all the demands, and attempts have been made to bring the congregations and communities into closer touch with one another. For this purpose the Deutsch-Israel Gemeindebund was formed in 1869; its council sat at first in Leipsic, and since 1883 has met in Berlin. It is a purely deliberative assembly, so far as its power goes; but it deals with questions which affect the Jews of Germany as a whole. The Central Verein Deutscher Bürger Jüdischen Glaubens" has a similar object in view; while the Deutscher Rabbiner Verband (founded in 1884), the Verein Traditionell-Gesetzestreuer Rabbiner in Deutschland, the Vereinigung der Liberalen Rabbiner Deutschlands (founded in 1898), and the Deutscher Reichsverband Jüdischer Religionslehrer (founded in 1901) deliberate upon questions affecting the purely religious interests of the congregations.

Austria also presents a very varied organization of Jewish communities. Up to the end of the reign of Francis II. (1835) the Vienna Jews were not allowed to use the term "congregation"; they were merely "the Jews of Vienna," at the head of whom were "Vertreter" (delegates); their rabbi was an "inspector of meat," and their preacher a "teacher of religion." The law of March 21, 1890, definitely regulated the Jewish communities, ordering that every Jew must be a member of the congregation of the district in which he resided, and giving the congregation the right to tax its members. The Jewish congregation of Vienna is presided over by the Vorstand der Israelitischen Cultus-Gemeinde with a "Vertreter-Collegium," or board of delegates, consisting of eleven members and various permanent and temporary commissions. Its religious affairs are in the hands of a "Rabbinats-Collegium," with a chief rabbi, a "Rabbinats-Assessor," and various other rabbis. They are responsible for the proper keeping of the registers. The congregation has a number of synagogues, each with its own management. There are also a number of unofficial "Vereinsbethaüser." The Turco-Israelitish congregation (Sephardic) has had since 1737 its own synagogue, with a "Vorstand" and a hakam or rabbi. The rest of Lower Austria has only local congregations, which at times have combined with a Bezirksrabbiner at their head.

Austria.

Maria Theresa tried to introduce a sort of consistorial arrangement of the Jewish communities in **Galicia** by the law of July 16, 1766. This provided for an Oberlandesrabbiner and twelve parnasim, who formed a "Juden-Direction," which had both spiritual and temporal powers. This Direction was dissolved in Nov., 1785, because of the misuse of its powers; and on May 29, 1789, the emperor Joseph issued a new "Judenordnung" dividing the country into districts, each having a rabbi who held office for three years. At present there is no general organization except in the larger cities. Thus Lemberg has a "Cultus-Representanz," at the head of which is a Vorstand, a "Cultusrath," and a rabbinate made up of a Gemeinde-Rabbiner, a Synagoge-Rabbiner and Rabbinats-Assessoren. **Bohemia** formerly had a "Representanz der Landsjudenschaft," with representatives from the various districts of the kingdom. At present no such organization exists. The city of Prague has an Oberrabbiner, at whose side are Gemeinde-Rabbiner and preachers. **Bosnia** and **Herzogovina** have an Oberrath whose seat is at Sarajevo. The Jewish communities of **Moravia** have had an even still more interesting development. At the beginning of the eighteenth century Moravia had its "Landesrabbiner," "Landesältesten," "Landeseinnehmer," and a "Solicitator." The law of 1754 reorganized the Jewish communities and instituted a royal commission in matters relating to the taxation and policing of the Jews. Under Emperor Joseph II. there was a further reorganization. The special Jews' Law was done away with, and there was founded the Mährisch-Jüdischer Landesmassafond, which has been of great help in regulating the financial status of the congregations. In 1798 the number of Jewish congregations was fixed at 52; in 1877 at 55. According to the law of May 20, 1874, the governing board of every congregation must be announced to the police, and the election of a rabbi must be confirmed by the authorities. The law of March 21, 1890, mentioned above, did not do away with the Landrabbinat of Moravia, and it has remained the only one of its kind in the Austro-Hungarian monarchy. It still has a Landesrabbiner. The law of Jan. 1, 1892, fixed the number of Jewish congregations in Moravia at 50.

There is no general Jewish congregation in **Hungary,** and the congregations have perfect freedom in managing their affairs. The Jewish community of Budapest is presided over by a Rabbinats-Collegium and a commission. In Austria, as in Germany, the attempt has been made to form larger and more comprehensive organizations of the Jewish communities. The Israelitische Allianz in Wien was founded (1873) with the intention of subventioning schools, of furthering the study of Jewish history, and of combating anti-Semitism. The Allgemeiner Oesterreichisch-Israelitischer Bund and the Oesterreichisch-Israelitische-Union pursue similar objects.

In Italy, in the former kingdom of Sardinia, the Jews were organized under deputies or syndics, elected by the notables. They were divided into four communes or universities: Piedmont, Monferrato, Allesandria,-Nice, each with a chief rabbi. These universities were subdivided into smaller groups. Piedmont, under French domination, was divided in 1808 into two consistories (Turin and Casale); but in 1815 the old order was reestablished. In what was for-

Italy.

merly the grand duchy of Tuscany, an old corporation statute of Cosmo I. (1569–74) ordered that the Jews should be under forty "governanti," appointed for life by the grand duke, and at the head of whom there was to be a "cancellero." Venice had a head commission of twenty-four notables ("sezioni riunite"). Various other systems prevailed in different parts of the country, which have largely been abolished in united Italy. The leading congregations have a chief rabbi, the others a vice-rabbi or teacher. The affairs of each congregation are in the hands of a commission of from two to four members, recognized by the government.

Denmark.

In Denmark the Jewish communities were organized by the edict of March 14, 1813. Each synagogue was to have a priest (rabbi); the chief rabbi was to reside at Copenhagen. The power of the latter was afterward considerably reduced; the congregations outside Copenhagen were to be perfectly free, each having a "katechete" or teacher, responsible to the government. In **Sweden,** according to the edict of May 27, 1782, the Jews are free to form congregations wherever they wish; but synagogues can be built only with the consent of the king. Every congregation chooses seven electors, and these choose three wardens for three years.

Russia and Rumania.

In Russia every Jew is forced to belong to some religious organization; the government rabbi being held to a strict registration of all births, marriages, and deaths. New congregations can be formed only with the permission of the government. There is no hierarchy: the congregations usually have two rabbis; one the religious head, whom they elect, and a second appointed by the government, who need not necessarily be a theologian. The affairs of the individual congregations are in the hands of the "ḳahal" or board (see Council of Four Lands). For purposes of taxation the government divides the Jews into certain definite classes. The Karaites have their own organization; their head rabbi is called "ḥakam" (see Crimea). In Rumania (Moldau-Wallachia) a peculiar organization existed since the beginning of the eighteenth century. At the head of the Jews in Moldau there was a "hahambasha," nominated by the prince, whose jurisdiction extended also over Wallachia. He was usually a layman, though the post was often confided to a rabbi. At his side was a "vakil-haham-basha." Each community was presided over by one or more provosts and notables, whose election had to be confirmed by the prince upon the recommendation of the haham-basha. The post of haham-basha was abolished in 1832 at the request of the Jews themselves.

Turkey.

In Turkey the Jewish communities have preserved more of a political character than anywhere else. Their head is a state official (who was responsible for the collection of the poll-tax ["kharaj"], up to 1855, when it was abolished), as were the heads of the Greek Orthodox, Armenian Orthodox, and Armenian Reform bodies. According to the "Hatt-i-Humayun" of "Gul-ḥane," 1839, the internal affairs of the Jewish community were placed under the supervision of a board comprised of lay and clerical members; with the exception of legal questions which were to be decided by the regular tribunals. The hakam-bashi and one delegate were to take part in the deliberations of the supreme court of justice. A similar representation was given to the Jews in the vilayets, sanjaks, etc. The hakam-bashi of Constantinople was formerly chosen by the Jews themselves; though the government might annul the choice. They had, also, their purely spiritual head, the "rab-ha-kolel."

In 1860 a supreme tribunal for the Jews was instituted, consisting of four members, and an assembly of notables (Majlis Paḳidim, Majlis Jashmi, Ṭobe ha-'Ir), elected by the most important men of the community. A new constitution was granted to the Jews by Sultan 'Aziz, May 5, 1865, which instituted three different councils: a "Majlis 'Umumi" (national council) of 24 notables, a "Majlis Gashim" (temporal council) of 7 lay members, and a "Majlis Ruḥani" (spiritual council) of 9 rabbis. The communities in the various vilayets and sanjaks are under a ḥakam-bashi of their own, who is supported by an administrative council.

England.

The congregational system has been largely developed in English-speaking countries. In England, before the middle of the eighteenth century, the synagogues were entirely independent of one another. In 1757 the Great and the Hambro synagogues appointed one chief rabbi. In 1868 the three London synagogues and their two branches united into one organization; and in 1870 the United Synagogue was formed with the intention of comprising all the synagogues of the United Kingdom. The chief rabbi of the United Synagogue has the title of "chief rabbi of the united congregations of the British empire." He has at his side a bet din, and the worldly affairs of the United Synagogue are managed by a council consisting of life members and certain officers, of the wardens for the time being of the constituent synagogues, and of a certain number of representatives at council.

The Spanish and Portuguese congregations of London have their own organization, with their own ecclesiastical chief, who is called "haham." In 1840 the West London Synagogue of British Jews was formed as a Reform congregation; it and the daughter congregations in Bradford and Manchester do not form part of the United Synagogue. In 1887 a fourth organization was effected for the purpose of associating together the synagogues in East London. This organization, known as the "Federation of Synagogues," is managed by a board consisting of a president, one elected member from each confederated synagogue, and one representative for every fifty contributing members of each synagogue, and seven elected elders. Steps have recently been taken to form in England an organization to be known as the "Jewish Congregational Union," on lines similar to those followed by the Union of American Hebrew Congregations.

The English Jews have also organized, without respect to congregational affiliations, the Anglo-Jewish Association (1871), the objects of which are the protection of persecuted Jews, and the education of Jewish children in Eastern countries. The London Committee of Deputies of British Jews (founded 1760) watches and takes action with reference to all matters affecting the welfare of British Jews as a religious community. It consists of 65 deputies: 31 elected by 18 metropolitan synagogues; 32 by provincial synagogues; and 2 by colonial congregations.

United States.

Organization on strictly congregational lines has been most completely developed in the United States. Here each congregation is a law unto itself. It may elect its own ministers and arrange its services at will. The Union of American Hebrew Congregations, organized July 1, 1873, in Cincinnati, is merely a deliberative body, and has no power to make its decisions effective in the congregations composing the Union. As the Union represents the congregations belonging to the Reform wing, a similar organization of Orthodox Jewish congregations was formed in New York in 1898. No distinction is made in the status of the various rabbis, a very large number of whom are banded together for mutual help in the Central Conference of American Rabbis (founded 1891). In some of the larger cities—*e.g.*, New York, Chicago, and Philadelphia—local rabbinical associations have been formed. A National Council of Jewish Women was formed in 1893.

No international organization of Jews has been attempted until quite recent times. The Alliance Israélite Universelle of Paris (founded 1860) was intended to be such; but, though it has branches in almost every country, the foundation of similar societies in England, Germany, and Austria shows that it has not attained this end. The International Zionist Organization, with its periodic congresses, has, since 1897, moved in this direction.

COMMUTATION OF SENTENCE. See Judgment.

COMO: City on the Italian lake of the same name. Como never possessed a Jewish community, although a single Jewish family, with employees and servants, lived there for a time and conducted a banking business which was handed down from father to son for four generations. They owed their permission to live in Como to the dukes of Milan—at first to the Viscontis and then to the Sforzas—who granted them protection partly for the sake of their taxes and the benefit to be derived from entering into business relations with them, and partly from dictates of humanity, though the inhabitants of Como and the adjacent districts were extremely hostile to the Jews.

In 1436 Duke Philip ordered the city to admit Giuseppe and his son Abraham, of Mantua, to whom the council of Como had in the previous year refused admission. The city authorities, however, demanded, in addition to the payment by the newcomers of the usual taxes, that they wear the Jews' badge. Abraham's son Mandolino opened a bank at Mandello, Lake of Lecco; and in 1467 his son Benedetto obtained the exclusive right for a period of ten years to conduct a bank in the territory of Como. No more Jews were to be admitted except those from Lugano. Notwithstanding this restriction of competition, however, Benedetto failed in 1472.

The city intended to expel the Jews in 1478; but, on the intervention of the duke, it made a new contract with them for ten years, restricting usury and increasing their taxes. But the inhabitants remained hostile; and Benedetto's widow, named Gentile, was obliged to appeal to the duke to protect her rights. She had been required to sell her house at a sacrifice, because it was too near a convent, and, for a similar reason, to leave a house which she had rented; and she was even prevented from moving into a third dwelling, for which she had already paid. Finally she asked the duke to secure for her "a safe and permanent lodging in a locality not isolated." As the hostility of the inhabitants increased during the excitement following the blood accusation at Trent (1475), the Jews disappeared entirely from Como.

E. C. I. E.

COMPASSION: Sorrow and pity for one in distress, creating a desire to relieve, a feeling ascribed alike to man and God; in Biblical Hebrew, רחם ("riḥam," from "reḥem," the mother, womb), "to pity" or "to show mercy" in view of the sufferer's helplessness, hence also "to forgive" (Hab. iii. 2); חמל, "to forbear" (Ex. ii. 6; I Sam. xv. 3; Jer. xv. 15, xxi. 7); חוס, "to spare" (Deut. vii. 16, xiii. 8; Ezek. vii. 4, xx. 17); חנן and חסד, "to be gracious" and "kind" (Isa. xxii. 23 [if the text is correct]; Prov. xx. 28; Job vi. 14; Num. xiv. 19; Gen. xxx. ii. 10; Isa. lxiii. 7). The Rabbis speak of the "thirteen attributes of compassion," י״ג מדות של רחמים (Ex. xxxiv. 6; Pesiḳ. 57a; R. H. 17a). Later a distinction is made between attributes of compassion and those of love (חסד; see Asher ben David in his commentary on the Thirteen Attributes, where he classifies them under "justice," "love," and "compassion").

The Biblical conception of compassion is the feeling of the parent for the child ("pitieth"; Ps. ciii. 13). Hence the prophet's appeal in confirmation of his trust in God figures the feeling of a mother for her offspring (Isa. xlix. 15), and Pharaoh's daughter, moved by maternal sympathy, has compassion on the weeping babe (Ex. ii. 6).

But this feeling should mark the conduct of man to man (I Sam. xxiii. 21); its possession is a proof that men are among those deserving recognition as "blessed unto Yhwh"; and in Zech. vii. 9 it is included among the postulates of brotherly dealings. Inversely, the lack of compassion marks a people as "cruel" (אכזרי; Jer. vi. 23). The Chaldeans are without compassion in that they slay the young and helpless (II Chron. xxxvi. 17); and Edom is censured for having cast away all "pity" (Amos i. 11).

The poor are especially entitled to compassion (A. V. "pity"; Prov. xix. 17). The repeated injunctions of the Law and the Prophets that the "widow," the "orphan," and the "stranger" shall be protected show how deeply rooted was the feeling of compassion in the hearts of the righteous in Israel. It can not be admitted that the provisions for the extermination of the seven original Palestinian tribes (Deut. vii. 3, 16) indicate the absence of kindly sympathy for aliens. Even if these provisions do not, as the critical school insists, represent merely pious wishes, they are at least entitled to be regarded as war measures, and, as such, were exceptional. They rank with similar provisions to cover the cases of the murderer and the false prophet (Deut. xiii. 8; xix. 13, 21). The very horror with which the conduct of the Chaldees and Edom (see above) was regarded proves the contrary. Even the "enemy" was within the sweep of Jewish compassion. And so was the dumb animal, as the humane provisions of the Pentateuch against cruelty to them demonstrate (see Cruelty to Animals).

Seat of Compassion.

The physiological psychology of the Bible places the seat of the sympathetic emotions in the bowels. But the eyes were credited with the function of indicating them. Hence the frequent use of the expression "the eye has," or "has not," pity. The "length of the breath"—that is, in anger or wrath (ארך אפים)—is another idiomatic expression for compassionate forbearance.

God is full of compassion (Ps. ciii. 11, cxlv. 3); and this compassion is invoked on men (Deut. xiii. 17), and promised to them (Deut. xxx. 3). "His compassions fail not, being new every morning" (Lam. iii. 22). Repeatedly He showed His compassion (II Kings xiii. 23; II Chron. xxxvi. 15). His "mercy [or "compassion"] endureth forever." He loveth the "poor," the "widow," the "orphan," and the "stranger." He is named חנון ורחום ("gracious and full of compassion"; Ex. xxxiv. 6, *passim*). To obtain His "compassion," as the quality that pardons, sinners must first repent and return to Him (II Chron. xxx.). But when they do this, even non-Jews will experience His compassion (Book of Jonah). For God "pitieth" like a father those "that fear him" (Ps. ciii. 13).

These Biblical ideas become the foundation of the ethical and theological teachings of the Rabbis. Israel especially should be distinguished for its compassionate disposition (Yeb. 79a), so that one who is merciful falls under the presumption of being of the seed of Abraham (Beẓ. 32b). One who is not prone to pity and forbearance is cruel (B. Ḳ. 92a), and this though to be compassionate has the tendency to rob life of its savor (Pes. 113b). The thoughtlessly frivolous is like a cruel man, but one who is compassionate experiences the lot of the poor man (B. B. 145b). Compassion shown to fellow man will win compassion from on high (Shab. 151a). Eyes without pity will become blind, and hands that will not spare will be cut off (Ta'an. 21a). Women are recognized as prone to pity (Meg. 14b). In fact, this trait of its women was one of the glories of Jerusalem (B. B. 104b). To praise God meant to become merciful like unto Him (Shab. 133b; Ex. xv.). Strangers certainly came within the scope of the rabbinical ideas of compassion. Their dead were buried with the dead of Israel; their poor were assisted; their sick were visited (Giṭ. 61a, Tos. v. 4, 5). The angels when about to celebrate in song Israel's victory over Egypt were hushed by God with the rebuke: "The works of My hands have been drowned, and you would intone jubilant pæans!" (Meg. 10b).

The peculiar interdiction of the explanation of Pentateuchal laws as manifestations of divine compassion for dumb creatures (Ber. 33b) proves that this explanation was popular (see Cruelty to Animals). But the Rabbis often lay stress on the fact that the Torah takes great care to "spare" (חסה) the property of man (Soṭah 14b; Nega'im xii.).

God is recognized as the "Compassionate" (רחמן; compare the frequent use of "raḥman" in the Koran). He is invoked as the אב הרחמים (Father of Compassion). So close is this association with Him that "Raḥmana" becomes the usual designation for His revealed word. He suffers with His people (Rabbi Meïr: "The Shekinah exclaims with the suffering patient, 'Oh, my head! Oh, my arm!'" Sanh. iv. 46a; but see Levy, *s.v.* קל). He mourns with His people (Lam. R. to i. 1). The relation which God's "compassion" sustains to His "justice" is also a subject of rabbinical inquiry, as it was among the early Christian sects. When the shofar is sounded "God's quality of compassion mounts the throne" (Pesiḳ. 151b, 155a; Lev. R. xxix.; compare also Abraham's prayer [Yer. Ta'an. 65d]). The name "Elohim" designates God's justice (מדת הדין), and the name Yhwh God's compassion (מדת הרחמים; Ex. R. vi.). Even while God is preparing to inflict punishment, God's compassion is bestirring itself (Yer. Ta'an. 65b, bottom; Pesiḳ. 161b; Midr. Teh. to Ps. 86; Pes. 87b). Philo says "God's pity is older than His judgment" ("Quod Deus Sit Immutabilis," 16). The name Yhwh is repeated twice in Ex. xxxiv. 6 to allay the fears of Moses. As before the sin of the golden calf had been committed God dealt with Israel according to His compassion, so even now, after their sinning, will He deal with them in mercy (Pesiḳ. R. 5; Num. R. xii.).

COMPENSATION. See Fees, Legal.

COMPIÉGNE DE WEIL, LUDWIG: Convert to Christianity; lived at Paris, later at Metz, in the second half of the seventeenth century. He was a descendant of the rabbi Jacob Weil of Nuremberg. Having embraced Christianity while still a youth, he studied theology at the Sorbonne, and devoted himself to the interpretation of Maimonides' "Yad ha-Ḥazaḳah," of which he translated into Latin the following halakot: "'Abodat Yom ha-Kippurim," Paris, 1667; "Ḥameẓ u-Maẓẓah," *ib.* 1667; "Ḳiddush ha-Ḥodesh," *ib.* 1669; "Ta'aniyyot," *ib.* 1667; "Sefer ha-'Abodah," comprising all the halakot concerning the service of the Temple, *ib.* 1678; "Sefer ha-Ḳorbanot," with Abravanel's introduction to Leviticus, London, 1683. A separate edition of this introduction appeared under the title "Hakdamat Abravanel el Sefer Wa-Yiḳra," Amsterdam, 1701.

In addition to these works Compiègne translated into Latin Abraham Yagel's catechism, "Leḳaḥ Ṭob," London, 1679.

COMPRAT VIDAL FERUSSOL. See FARRISOL, COMPRAD VIDAL.

COMTINO, MORDECAI BEN ELIEZER: Turkish Talmudist and scientist; lived at Adrianople and Constantinople; died in the latter city between 1485 and 1490. The earliest date attached to any of his writings is 1425. The form of his family name is doubtful. In Hebrew it is usually written כומטינו, as, for instance, in one of his acrostic piyyuṭim, and has been transcribed by modern scholars "Comtino." Some manuscripts, however, give כומטיינו or כומטיאנו; and Mordecai's biographer, J. Gurland, uses the form "Kumatyano," a name which he finds still in use in Turkey (Geiger, in "Wiss. Zeit. Jüd. Theol." iii. 445; *idem*, "Melo-Chofnajim," p. 13). He was the pupil of Enoch Saporta, a distinguished Talmudist, known for his cultivation of the sciences and his tolerance toward the Karaites.

Mordecai was the teacher not only of Elijah Mizraḥi, but also of the Karaites Elijah Bashyaẓi and Caleb Afendopolo. Though an opponent of their teachings, Mordecai was held in honor by the Karaites, two of his piyyuṭim being included in their Siddur (Landshut, "'Ammude ha-'Abodah," p. 200). Most of his works have come down in manuscript, selections from which have been published by Gurland, in his "Ginze," part iii., 1866. The scientific bent of his mind is shown in his commentary to the Pentateuch (MSS. Paris, Nos. 265, 266; St. Petersburg, No. 51), in the preface to which he speaks of his researches in grammar, logic, physics, astronomy, arithmetic, geometry, and metaphysics. This commentary, in which he especially criticized Ibn Ezra, was attacked by Shabbethai ben Malchiel Kohen ("Hassagot," *c.* 1460), which attack Mordecai answered in his "Teshubot Hassagot" (Steinschneider, "Cat. Codicum Hebr. Bibl. Acad. Lugduno-Batavæ," pp. 202–207). He also wrote commentaries to Ibn Ezra's treatises "Yesod Morah" (dedicated to his pupil Joseph Rachizi), "Sefer ha-Shem," and "Sefer ha-Eḥad" (MS. Paris, No. 661; compare Neubauer, "Cat. Bodl. Hebr. MSS." col. 436), and a commentary to Maimonides' "Millot ha-Higgayon," printed in Warsaw, 1865.

Mordecai was a teacher of mathematics, and did much to advance the study of the exact sciences in Turkey. In his commentaries to Ibn Ezra he has often occasion to touch upon such subjects. His chief works in this branch are: a treatise in two parts on arithmetic and geometry, in which he follows partly the Greek and Latin authors, partly the Mohammedan (MSS. Berlin, No. 49; Brit. Mus. 27,107 A; Paris, 1031, 5; St. Petersburg, 343, 344, 345, 346); "Perush Luḥot Paras," a commentary written in 1425 on the astronomical tables of Yezdegerd, tables already treated of by Solomon b. Elijah Sharbiṭ ha-Zahab (MSS. Paris, Nos. 1084, 1085; St. Petersburg, 359); glosses to Euclid (MS. Günzburg, No. 340, 5); an essay upon the construction of the astrolabe, "Tiḳḳun Keli ha-Neḥoshet," as a complement to the Hebrew works on the subject, which he found to be superficial; an essay (1462) upon the construction of the astronomical instrument ("Al-Ẓafiḥah") invented by Al-Zarkala, written at the request of his pupil Menahem (MSS. Munich, No. 36, 13; Paris, 1030, 5; St. Petersburg, 353); an essay upon the construction of an instrument for measuring time (sun-dial), which can be made in two different ways (MS. St. Petersburg, No. 361).

G. I. BER.—G.

CONANIAH: **1.** A Levite who in the reign of Hezekiah had charge of the offerings and tithes brought to the Temple. Associated with him in this work was his brother, Shimei (II Chron. xxxi. 12, 13; A. V. "Cononiah").

2. Leader of the Levites who in the reign of Josiah raised flocks and donated them for the paschal sacrifices of the Levites (II Chron. xxxv. 9).

E. G. H. G. B. L.

CONAT, ABRAHAM BEN SOLOMON: Italian printer, Talmudist, and physician; flourished at Mantua in the second half of the fifteenth century. He obtained the title of "ḥaber" (associate of a rabbi) for his learning, but displayed it chiefly in the choice of works selected by him for printing, which art he and his wife Estellina expressly learned. He embarked upon the business of printing at Mantua in 1476, and became celebrated as one of the earliest printers of Hebrew books in Europe, producing the third to the tenth of Hebrew incunabula as recorded by De Rossi. In 1475 he established a printing-office at Mantua, from which he issued: "Ṭur Oraḥ Ḥayyim," by R. Jacob b. Asher (1476); "Ṭur Yoreh De'ah," by the same author, only one-third of which, however, was printed by him, the rest being executed at Ferrara; "Beḥinat Olam," by Jedaiah Bedersi, in which Conat was assisted by his wife Estellina and Jacob Levi of Tarascon; Levi b. Gerson's (Ralbag's) commentary on the Pentateuch; "Luḥot," astronomical tables giving the length of day at different times of the year, by Mordecai Finzi; "Yosippon," the pseudo-Josephus or Gorionides; "Eldad ha-Dani"; "Nofet Ẓufim," the rhetoric of Messer Leon (Judah).

All these books were printed between 1476 and 1480, when the business was suspended on account of the rivalry of Abraham ben Ḥayyim at Ferrara. Abraham Conat was proud of his work; he used to accompany his name in the colophons by the words "Who writes with many pens without the help of miracles, for the spread of the Torah in Israel." He was especially delighted that four pages could be printed at one time on a large sheet, and that he could produce two thousand pages every day. His type was of such a shape that his editions are often taken for manuscripts.

CONCIO (קונציו), JOSEPH B. GERSHON: Italian author; lived at Asti and Chieri in the beginning of the seventeenth century. He published several Hebrew poems, including: "Ot le-Ṭobah," twenty-two sentences on Talmudic arguments in the order of the Hebrew alphabet, which appeared together with "Shir le-Siman ha-Parashiyyot" and "כ"ב Shirim bi-Leshon Ḥidah Meḥubbarim" (Riddles and Their Solution) (Chieri, 1627); "Dibre Ester," allegorical commentary to Esther, together with "Zeh ha-Shulḥan" (*ib.* 1628); "Ma'agal Ṭob," seventeen sentences of the Talmud (*ib.* 1627–28), in which he was assisted by his son Abraham as printer or editor (Steinschneider, "Cat. Bodl." col. 2866); "Shir Yehudit" (Asti, 1628); "Mar'eh Ḥayyim," halakic matter in verse (Chieri, 1629); "Meḳom Binah," comments on certain passages in Proverbs (*ib.* 1630); "Teḥillat Dabar," a treatise on logic, preserved in a Cod. Almanzi; besides a collection of poems, reviewed by Steinschneider in "Ha-Asif," ii. 225. Concio also wrote in Italian, as two poems, "Cinque Enimmi" (Asti, 1628) and "Canto di Judit" (1628), bear witness.

G. I. E.

CONCORDANCE (Latin, **Concordantiæ**): An alphabetical list of all the words in a book, with references to the passages where each word is found. The appellation indicates the concordance or similarity of all such passages. In Jewish literature the term is applied exclusively to concordances of the Bible and of the Talmud.

—— **Biblical:** The word, in this connection, was first used by Hugo de Sancto Caro (named from Saint-Char, a suburb of Vienne in southern France), who compiled a concordance to the Vulgate about 1244. The revised edition of this work, made by the Franciscan Arlotto di Prato (Arlottus), about 1290, served as a model for the concordance to the Hebrew Bible which Isaac Nathan b. Kalonymus, of Arles in Provence, compiled 1437–45. Isaac Nathan, also known as the author of Biblio-exegetical and religio-philosophical works, was led to undertake this task by discovering, during the polemic discussions forced upon him by Christian scholars, that, in order to refute the arguments drawn by his opponents from the Bible, it was necessary to have an aid that furnished a ready reference to every Biblical passage and a quick survey of all related passages. He called his concordance "Meïr Natib" (Enlightener of the Path); on the title-page of the first edition, however, it is also called "Yaïr Natib" (It Will Light the Path, after Job xli. 24 [A. V. 32]). This work, on which all later Hebrew concordances were based, is the first Jewish work in which the original text of the books of the Bible is divided into chapters, and these and the verses are numbered according to the Vulgate. Isaac Nathan also found it necessary to add to his preface a list of the first words of each chapter. He followed the Vulgate in the sequence of the Biblical passages, keeping the order of the books of the Bible as found therein. Isaac Nathan's concordance was first published by Bomberg at Venice in 1523, this edition being followed by several others (Venice, 1564; Basel, 1556, 1569, 1581). The first Basel edition has a Latin translation of the principal words. An enlarged edition, containing a concordance to the Aramaic parts of the Bible and an index of Biblical proper names, places, etc., was undertaken by Marius de Calasio at Rome 1621. Other editions appeared at Cologne, 1646; London, 1647–49; and Rome, 1657.

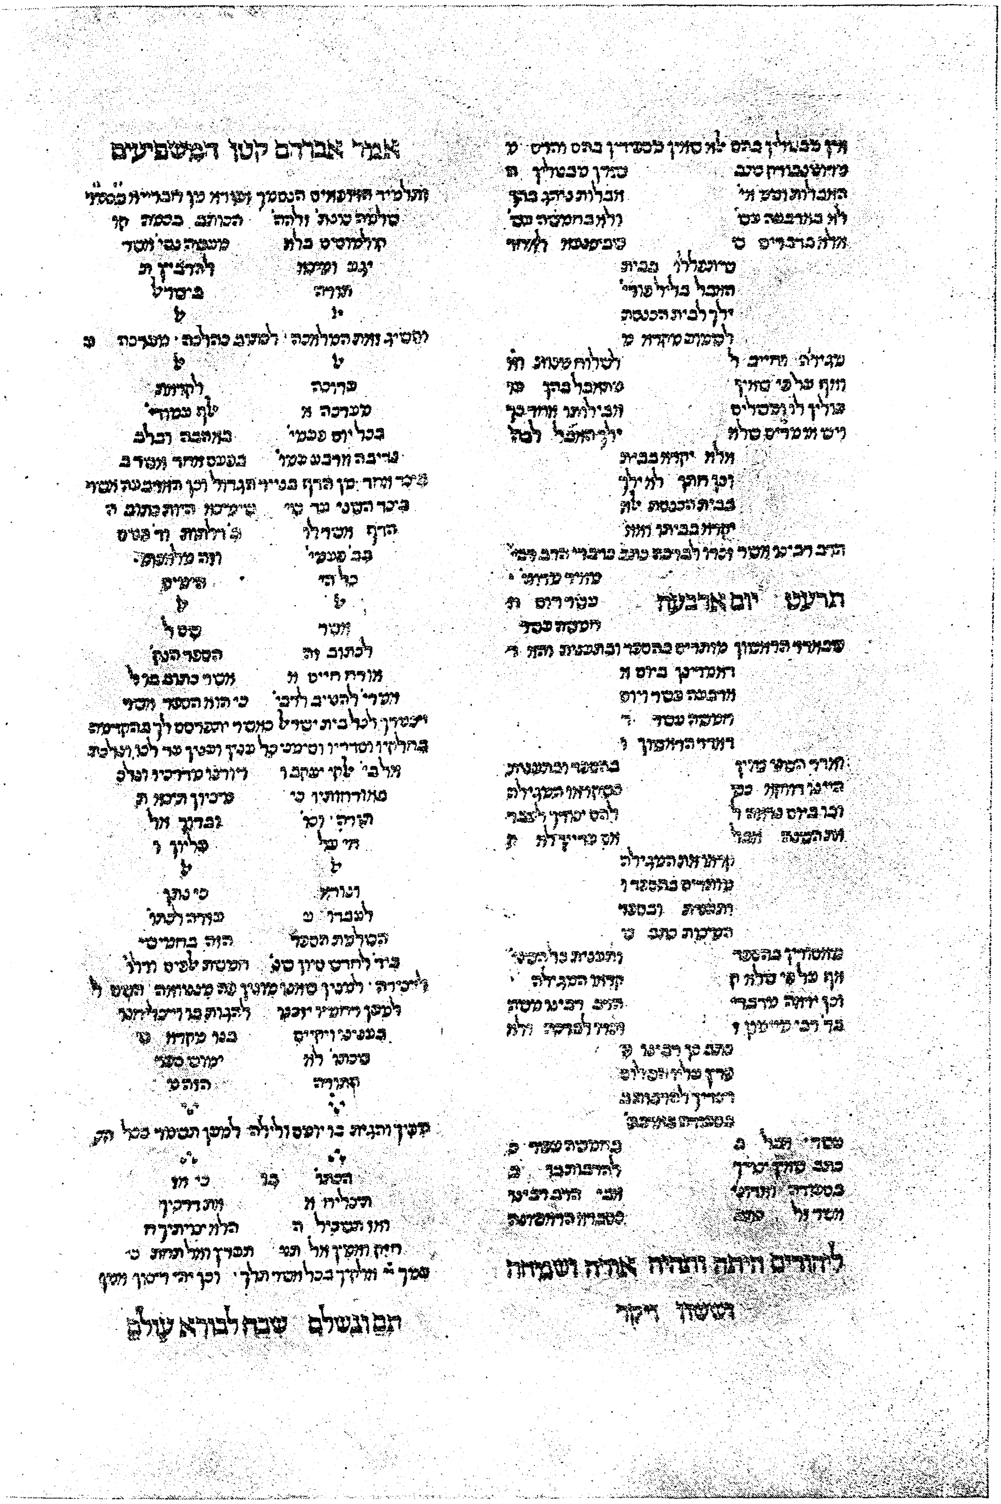
Isaac Nathan's.

Even before Isaac Nathan's work was printed Elijah Levita of Rome began to work out a concordance on a Masoretic basis, which he at first intended to entitle "Sefer Beḳi'ut" (Book of Scholarship), but afterward called "Sefer Zikronot" (Book of Remembrance), indicating thereby its function as an aid to the memory. The manuscript of the first draft—probably by the author himself—finished between 1515 and 1521 and dedicated to Cardinal Ægidius of Viterbo, is now in the Royal Library at Munich (Steinschneider, "Die Hebräischen Handschriften der Königlichen Hof- und Staatsbibliothek in München," No. 74; "Joodsche Letterbode," vii. 174). The manuscript of the second draft, finished at Venice 1536, is in the Bibliothèque Nationale, Paris (Frensdorff, in Frankel's "Monatsschrift," xii. 101). Levita's concordance has not been printed; the beginning only was issued by B. Goldberg (Frankfort-on-the Main, 1875). It has this great advantage over Isaac Nathan's, that the several forms of each word are arranged grammatically and lexically according to a definite scheme; while in Nathan's work only the various meanings of the same root are distinguished, all forms falling under one definition, being not separated, but arranged according to the sequence of the books and the chapters. Levita, moreover, added—and this was his chief purpose—the Masoretic notes belonging to every word; he, therefore, included proper-names and particles wherever they were found with Masoretic comment.

Elijah Levita's.

The usefulness of Levita's concordance is impaired, however, by the fact that he cites every passage only once, and not under every word occurring therein. As he says in his preface, his concordance is intended not only as an aid in polemic discussions with Christians, as Nathan's professed to be, but also to serve other purposes; viz., to be a manual for the grammatical and lexical knowledge of the Hebrew language, a book of reference for Bible quotations, a book for preachers seeking the Bible passages concerning a certain point, an aid toward acquiring a polished Hebrew style, a riming dictionary, and even a reference book for cabalistic speculations ("Z. D. M. G." xliii. 235). With this schedule for his work, Levita almost exhausted the uses to which a Bible concordance can be put: there remains to be added only its utility to the Bible exegete and critic.

Levita's Masoretic concordance, as has been stated, was never published, and therefore could not supplant Isaac Nathan's work as an aid to Biblical study; a thoroughly revised edition of the latter by



COLOPHON ON THE LAST PAGE OF "TUR ORAH HAYYIM," PRINTED BY ABRAHAM CONAT, 1476.

(In the collection of Hon. Mayer Sulzberger.)

Buxtorf's.

the eminent scholar Johann Buxtorf the Elder of Basel became the concordance par excellence. Buxtorf followed Nathan's work closely; he retained the latter's remarks on the meanings of the root placed at the head of every article, but also gave these in Latin, and explained every form of the word in Latin. He materially increased the usefulness of the concordance by separating from one another the derivatives of a root, the nominal and the verbal forms, and by arranging them systematically, as Levita had done. Buxtorf's concordance appeared after his death (Basel, 1632), his son Johann adding to it a concordance of the Aramaic portions of the Bible as well as a long preface. This concordance, which was authoritative for more than two hundred years, was reedited by John Taylor, London, 1754. Extracts from it were made by Christian Ravius, Frankfort-on-the-Oder, 1676, and by Andreas Sennertus, Wittenberg, 1653. A most useful and important addition to it was made by Christian Nolde (Noldius) in his "Concordance of the Particles," Copenhagen, 1679; new ed., Jena, 1734.

Julius Fürst's.

A highly valuable revision of the concordance was undertaken by Julius Fürst. In the Latin preface to his great work (Leipsic, 1840) he described the relation of the latter to Buxtorf's concordance in the following words: "I admit that I have used Buxtorf's concordance as the foundation for my own work; but I may claim that I have not only revised and enlarged Buxtorf's work, but have worked it over to such an extent that I do not hesitate to affix my name to the concordance. I have enriched Buxtorf's work with many additions; adding, for instance, Wolf Heidenheim's manuscript notes contained in his copy of the book, and articles that Buxtorf had omitted, as on the verb היה and the divine name Yhwh. All these additions are in accordance with the advances in philology, and especially in etymology; and in some cases I have followed an entirely new arrangement, founded upon a careful examination of the origin and the form of the words." Fürst added new material, and made some minor changes, especially by substituting Arabic numbers for the quotations instead of the Hebrew letters. The headings of the articles are entirely new, having been transformed into interesting lexicographical articles in which the etymology and meaning of the root are explained by the aid of comparative philology.

Unfortunately, however, Fürst goes too far in applying his theory of the primitive roots of the Semitic languages and of the original relationship of the latter with the Indo-Germanic languages. This theory had been propounded by Fürst's pupil, Franz Delitzsch, in his work "Jesurun" (Grimma, 1838), which was designated as "Prolegomena to Fürst's Concordance of the Old Testament." Fürst's peculiar views on certain Hebrew roots affected unfortunately the arrangement of the concordance, as he often places a word in a connection in which it would not be sought according to the commonly accepted view; as, for instance, דם ("blood") under the root אדם ("man"). The work has a number of interesting appendices, including: an etymologic index to the concordance; an alphabetical list of 2,668 Biblical proper names, with their etymologies, but without reference to the passages; a list of about 600 Phenicio-Punic proper names; an index of Aramaic and Neo-Hebrew words compared in the headings to the articles; an etymological table of Hebrew and Aramaic particles; a systematic view of the noun forms; "Propylæa Masoræ," a view of the most important topics of the Masorah; a synopsis of the history of the Hebrew language, written in Hebrew; and a comparative glossary of Hebrew, Aramaic, Syriac, and Arabic words. In the "Litteraturblatt" of the periodical "Der Orient," edited by Fürst, additions and revisions to the concordance repeatedly appeared in the years following 1840. B. Bär issued a new edition of Buxtorf's concordance—in quarto instead of in folio—making use in part of Fürst's work (Stettin, 1862, *et seq.*). An English version by B. Davidson appeared in London in 1876.

Solomon Mandelkern's.

An entirely new revision of the concordance was undertaken a few years ago by Solomon Mandelkern. He had found, after a thorough examination of the entire material, that "in the concordances of Fürst and Bär about 5,000 omissions and grammatical errors, as well as countless misquotations and wrong references, must be rectified." Mandelkern's new concordance appeared in Leipsic in 1896. To the material of the preceding concordances is added an appendix, containing all proper names, as well as, in a separate division, a list of the most important particles. Mandelkern corrected the errors of the previous concordances and filled in the omissions. He arranged the passages according to the sequence of the Biblical books obtaining in the Hebrew Bible, instead of the sequence of the Vulgate hitherto used. Especially noteworthy is the care that Mandelkern displays in regard to the exact and logical completeness of the Biblical passages used to illustrate each word. The headings of the articles furnish the lexicographical explanations of the roots and their derivatives, while due attention is paid to the latest philological discoveries and textual criticism. Mention must also be made of the practical arrangement of this latest concordance. Mandelkern has issued it in a smaller edition (Leipsic, 1900), which contains all the material of the larger edition, but only a list of the passages where the respective word-forms are found, without any quotation.

That Mandelkern's concordance itself contains numerous errors and omissions has become evident since its appearance, especially from the reviews in Stade's "Zeitschrift" and in the "Monatsschrift." The editor of the latter, M. Braun, mentions in this connection a most complete and careful concordance to the particles, and one to the proper names (preserved in manuscript in Breslau), made by Moritz Piorkowsky, a teacher in Silesia in the first half of the nineteenth century ("Monatsschrift," xlii. 529 *et seq.*). Two other concordances of Biblical proper names may be mentioned: one by Gideon Brecher, Frankfort-on-the-Main, 1876; the other by Schusslovicz, Wilna, 1878.

Among concordances to the Septuagint are: the earlier ones of Conrad Kircher (Frankfort-on-the-Main, 1607) and of Abraham Tromm (Trommius) (Amsterdam, 1718); and the large concordance by E. Hatch and H. A. Redpath (Oxford, 1892–97), which covers also the other Greek Bible translations and the Apocryphal writings, and is compiled with extraordinary care. A supplement to this work (Oxford, 1900) deals with the proper names.

Bibliography: The introductions to the concordances of Buxtorf, Fürst, Mandelkern; Andr. Glauchius, *De Usu Concordantiarum Biblicarum*, Leipsic, 1660. A detailed list of concordances is given at the beginning of Fürst's introduction.

T. W. B.

—— **Talmudical:** In 1899 the library of the "Landesrabbinerschul" of Budapest came into possession of a manuscript in two folio volumes, containing the first half of a concordance to the Babylonian Talmud. The first volume (from א to ו) has 237 pages with 1,890 columns; the second (from ז to י), 169 pages with 1,347 columns. The writing is exceedingly elegant and small (cursive), and shows equal care from beginning to end. Each column contains about 80 lines, so that nearly 260,000 Talmudic passages are recorded. The letter א takes up 648 columns; ב, 504; ג, 241; ד, 260; ה, 228; ו, 9; ז, 184; ח, 507; ט, 166; and י, 491. The Talmudic passages follow in the sequence of the Talmudic treatises, and are arranged according to roots and words, like the Biblical passages in Isaac Nathan's concordance, without regard to their grammatical form. The passage is given in such a way that it always forms a complete sentence clear in meaning. An index of all the articles, with a short explanation of the words, is given at the beginning of each volume. The work has the significant title "Asaf ha-Mazkir" (after II Kings xviii. 18, 37; Isa. xxxvi. 3, 22), meaning a collection of words serving to aid the memory.

The author of the work, Moses Rigotz (Rigócz), or Moses Sande (*i.e.*, Szántó), who lived toward the end of the eighteenth century and at the beginning of the nineteenth in Balassa-Gyarmat, the chief town of the county of Nograd, Hungary, was notary of the Jewish community in the county, and was held in high esteem by the nobility and the authorities. He was a pupil of the Moravian chief rabbi R. Gerson Politz, with whose successor, R. Mordecai Benet, he corresponded in regard to the Talmudic concordance he had undertaken. Other Talmudic authorities also encouraged him to carry out his plan; for instance, R. Wolf Boskowitz; R. Meïr Eisenstadt (a pupil of R. Moses Sofer), rabbi at Balassa-Gyarmat; and R. Moses Minz of Alt-Ofen. Notwithstanding the approbation ("haskamah") of these authorities, neither the author himself nor (after his death) his son succeeded in having the work published; and it seems to have remained unfinished. The two volumes remained in the possession of the author's family, until the last owner, Joseph Weiss, presented them to the above-mentioned library. The work and the author were first noticed by W. Bacher in the Hungarian weekly "A Jövö," Jan. 22, 1897, pp. 6–8 (see extract in Brody's "Zeit. für Hebr. Bibl." 1898, iii. 63).

CONCUBINAGE. See Pillegesh.

CONDITIONS: Qualifications or limitations annexed to an agreement by which it may be continued, altered, or rendered of no effect upon the performance or non-performance of something, or the happening or non-happening of an uncertain event. If the event must happen before the agreement begins to operate, the qualification is called a "condition precedent"; if afterward, a "condition subsequent."

A condition may be attached to any contract or legal act. The various conditions known to Roman and common law may be divided as follows: (1) positive, *i.e.*, the happening of some event which may or may not happen; (2) negative, *i.e.*, the non-happening of such an event; (3) authoritative, *i.e.*, dependent on the power of the party in whose favor the obligation is contracted; (4) dependent on the party binding himself with the obligation; (5) casual, *i.e.*, dependent on an accident, or on the act of persons in no way controlled by either of the parties to the contract; (6) mutual, *i.e.*, dependent on the acts of both parties; (7) mixed, *i.e.*, dependent on the act of one of the parties and a third person. The condition may be either expressed or implied, and it may be lawful or unlawful.

The law of conditions is well developed in the Jewish law-books. All these classes of conditions were known to the Jewish law. Nevertheless the classification of the subject-matter must differ somewhat from that of the other systems of law.

Express conditions are created by the use of one of three formulas: "im" (if); "me'akshaw im" (from now on, if); and "'al menat" (on condition that). The condition "if" differs materially from the other two. The latter are simpler, and not subject to the same rules that must be observed in order to create a valid condition with the form "if." The first consideration refers, therefore, to the condition "if." There are four principal rules to be observed in the creation of a condition with the word "if."

Condition "If."

(1) The condition must be "double" ("tenai kaful"); that is, it must be expressed in a positive as well as a negative form. R. Meïr derived this rule from Num. xxxii. 29, 30: "And Moses said to them, 'If the children of Gad and the children of Reuben will pass with you over Jordan, . . . then ye shall give them the land of Gilead for a possession: but if they will not pass over with you, . . . they shall have possessions among you in the land of Canaan'" (see Mishnah Ḳid. iii. 4). The following example is given by Maimonides ("Yad," Ishut, vi. 3): "If a man says to a woman, 'If thou givest me two hundred zuzim thou art betrothed to me by this denarius [coin], but if thou dost not give them to me thou art not betrothed'; and after having expressed this condition he gives her the denarius, the condition is a valid one, and she is 'betrothed on condition.' If thereafter she gives him the two hundred zuzim she is betrothed absolutely; and if she does not give them to him, she is not betrothed." Some of the later geonim ruled that conditions need not be "doubled" except in cases of conditions annexed to betrothal or divorce, and that in ordinary contracts referring to money matters this form of expressing the condition doubly is unnecessary.

Maimonides dissents from this (Ishut, vi. 14), and his opinion is the adopted law. If the condition is not properly expressed in its double form it is void, and the contract is unaffected by it. Thus, if, in the case above, the man had merely said, "If thou givest me two hundred zuzim thou art betrothed to me by this denarius," and had omitted the clause, "if thou dost not give them to me thou art not betrothed"; and had then given her the coin, the condition would have been void, and she would have been betrothed to him absolutely (Ishut, vi. 5).

(2) The double condition must be so expressed that the positive form precedes the negative. This is shown in the above example. If the man had put the negative form first, thus: "If thou dost not give me the two hundred zuzim thou are not betrothed, but if thou givest them to me thou art betrothed with this denarius," and if he then gave her the coin, she would have been betrothed without condition (Ishut, vi. 1; Giṭ. 75b).

Qualifications.

(3) The condition must precede the act, or the conclusion of the contract. Maimonides illustrates it thus. "If the man says to the woman, 'Thou art betrothed to me by this coin,' and gives her the coin; and then expresses the condition, saying, 'If thou wilt give me two hundred zuzim thou art betrothed; but if not, thou art not betrothed,' the condition is void, because the legal act of betrothal was complete before the condition was expressed" (Ishut, vi. 4). In taking the view that the act itself may not precede the expression of the condition, Maimonides follows the literal meaning of the Mishnah (B. M. vii. 11): "And every condition which is preceded by the act is void." Other authorities go even further, and maintain that the substance of the contract may not even be expressed before the condition is expressed, or else the condition is void (Maggid Mishneh to "Yad," Ishut, vi. 4). Thus the contract and the condition in the following case are well expressed: "If you do this I will give you that; but if you do not do this I will not give you that." But if a party says, "I will give you this if you do that," the condition is void.

(4) The condition must be one possible of fulfilment. If the condition of the contract is that the party shall climb into heaven, or walk through the sea, or swallow a reed a hundred yards long, the condition is void, and the contract is complete without condition (B. M. 94a).

Condition "from now on, if."

The condition created by the words "me'akshaw im" (from now on, if) differs in many important respects from the condition "if." The latter is, in fact, a condition precedent, and the former a quasi condition subsequent. Where the condition is that a certain thing shall be done "if" something else is done, the condition must be fulfilled before the contract to do the thing can be enforced; whereas in a condition subsequent, the contract is immediately effective, but may be ended by the performance or non-performance of the condition at some future time. In the Jewish law this is accomplished by use of the words "from now on, if." The distinction between these two cases is thus expressed by Maimonides (Ishut, vi. 15, 16): "If one betroths a woman 'on condition,' she is betrothed from the moment the condition is fulfilled, and not from the time of the actual ceremony of betrothal. For example, if he says to a woman, 'If I give thee two hundred zuzim during this year thou art betrothed to me by this denarius, and if I do not give them to thee thou art not betrothed,' and gives her the denarius in the month of Nisan, and the two hundred zuzim in the month of Elul, she is betrothed from Elul. Therefore if another betroths her before the condition imposed by the first man is fulfilled, she is betrothed to the second." And this is also the law in cases of divorce and of money matters. The divorce is absolute or the sale or gift perfected at the time when the condition is fulfilled. All this is true only if, in imposing the condition, he did not say "from now on." If, however, he said, "Thou art betrothed unto me by this denarius *from now on* if I give thee two hundred zuzim," and he eventually gives her the two hundred zuzim, she is betrothed from the time of the ceremony of betrothal, even though the condition was not fulfilled until after some time. Therefore if a second man betroths her before the fulfilment of the condition, her betrothal to the latter is void. And this is also the law in cases of divorce and of money matters (Ḳid. 60a; Giṭ. 74a).

Three of the above four rules that must be observed in creating conditions with the word "if" need not be observed when the words "from now on, if" are used. The only one in force in this case is that the condition must not be impossible of fulfilment (Ishut, vi. 17). But the Shulḥan 'Aruk states that there is a difference of opinion on this point among the authorities, some holding that even when the form "from now on, if" is used, all the rules must be observed (Eben ha-'Ezer, 38, 3).

Condition "on condition that."

The form "'al menat" (on condition that) is in all respects similar, in its legal effect, to the form "from now on, if" (Ishut, vi. 17; Giṭ. 74a).

Conditions may be implied from the nature of the contract and from its terms. Thus if a contract is reduced to writing and contains a date, the question as to when it is to go into effect is determined thereby (Ket. 2b). The date in the contract is equivalent to the use of the form "me-'akshaw." If a contract is entered into for a specific reason, as where one sells a piece of ground because he urgently needs the money, and the reason fails, as when the need for the sum of money is no longer pressing, the contract may be rescinded, because it is an implied condition of the contract that it is to be considered null and void if the reason that caused its consummation no longer exists (*ib.* 97a). It is necessary, however, that this reason be clearly stated at the time the contract is made, or otherwise the implied condition is not presumed to exist, for the maxim of the law is that "words which are in the heart are no words" (Ḳid. 49b). This rule applies only to contracts concerning real estate, for in contracts concerning movable property the conditions, if any, must be expressed according to the rules of law governing the making of conditions (gloss to Ḥoshen Mishpaṭ, 207, 3). There are some acts which are subject to conditions, because it is presumed that all men are familiar with them. They need not be expressed in any way; they are absolutely presumptions of law. Thus where a man on his sick-bed transfers his entire estate to another, the law presumes that it was done in contemplation of death. The condition is implied that if he dies it shall be a valid transfer, but if he recovers it shall be void. It is not to be presumed that a man would have given away his entire estate if he expected to recover from his illness (Mishnah B. B. ix. 6; see also Ḥoshen Mishpaṭ, 246, 1; "Yad," Zekiyah, vi. 1).

Unlawful Conditions.

Unlawful conditions are void. Such are conditions that are contrary to the precepts of the law (Mak. 3b). For instance, if a man marries a woman on condition that he shall not live with her as her husband, such a condition is absolutely void. But if he stipulates that he shall not provide her with food and clothing, his condition is a valid one (Eben ha-'Ezer, 38, 5). The distinction between the two cases is based on the fact that the cohabitation of husband and wife is of the very essence of marriage, whereas the questions of food and clothing are financial considerations, in regard to which conditions may be made even though they are opposed to the law, provided they are made as waivers of rights given by the law, and are not stated in such a manner as to imply that the parties do not recognize the law. There can, however, be no diminution of the amount of the Ketubah, or of the husband's rights of inheritance. These are excepted, even though they are mere matters of money (Ishut, xii. 6; see also "Yad," Mekirah, xiii. 3; Ḥoshen Mishpaṭ, 67, 9; 227, 21).

There is another class of exceptions to unlawful conditions. Where the condition is that the party shall do something contrary to law, it is not ipso facto void, because the party need not fulfil it. For example, if the condition is that the party shall eat forbidden food, and the condition is fulfilled, the contract is valid, even though a breach of the dietary law has been occasioned thereby (Ishut, vi. 8). But this fulfilment of such conditions must be in the power of the party alone. If the condition is a mixed one—that is, if it requires the act of the party and a third person—it is void, because it is presumed that the third person will not be a party to a breach of the law (Giṭ. 84a, b; Ishut, vi. 11).

Conditions of Divorce.

Conditions in cases of delivery of bills of divorce present a specially interesting phase of the subject. Where a husband was about to go abroad, or to sea, or with a caravan through the desert, it was customary for him to give his wife a bill of divorce "on condition." The condition annexed was that if he did not return within a certain time, the divorce should be absolute; but that if he did return within such time, the bill of divorce should be null and void (Mishnah Giṭ. vii. 8). The purpose of this proceeding was to prevent the wife from becoming an 'Agunah.

The husband could make his own death the condition upon which the divorce became absolute (*ib.* vii. 3); the happening of this event worked retroactively, and during the interval between the delivery of the Geṭ and the death of the husband the wife was, according to R. Judah, considered a married woman in every respect; but, according to R. Jose, one whose divorce was doubtful (*ib.* vii. 4). This peculiar use of the geṭ "on condition" seems to have arisen out of the desire of the husband to save his wife from the levirate marriage (Ned. 27a, Rashi). According to the Law the death of the husband without issue made his wife ipso facto the bride of his brother, whose duty it was to marry her or release her through the ceremony of "ḥaliẓah" (Deut. xxv. 5–10). The divorced woman was, of course, not subject to this law. So that when the husband gave his wife a bill of divorce on condition that it should become absolute at his death, she remained his wife as long as he lived, but at the moment of his death she was not his widow, but a divorced woman (Mishnah Giṭ. vii. 3).

The general rules of conditions are set forth in detail in the Shulḥan 'Aruk, Eben ha-'Ezer, 38, 2–3; for betrothal on condition, see Eben ha-'Ezer, 38, 39, 40; for divorce on condition, see Eben ha-'Ezer, 143–148. See also Ḥoshen Mishpaṭ, 207; Ishut, vi.; and Asmakta.

CONDOM (קונדו or קונדון): County seat in the department of Gers, France. Jews were found there at the beginning of the fourteenth century. In order to pass through this locality, they were heavily taxed. A Jewess, not enceinte, had to pay eight deniers Tours currency; if enceinte, she had to pay double that amount. In 1320, during the persecutions of the Pastoureaux, all the Jews of Condom were massacred.

CONDUITS. See Aqueducts in Palestine.

CONEGLIANO (also known as **Conian**): A prominent Jewish family of northern Italy. The spelling "Conian," according to Kaufmann, is a misreading of the Hebrew קונייאן. It takes its name from the town of Conegliano, which at one time belonged to the republic of Venice. A branch of the family flourished in Ceneda. Its members were distinguished by their learning. The family seems to have originated in Asti, where the name is first met with in the sixteenth century. The best-known members are:

Israel Conegliano: Italian physician and statesman; born at Padua in the middle of the seventeenth century; died in Constantinople in the second decade of the eighteenth century.

After obtaining his diploma Israel Conegliano practised medicine in Venice for two years, and then went to Constantinople. Despite the state of anarchy which reigned at Constantinople at that time, he won the favor and respect of the sultan, and also of his grand vizier Kara Mustapha. Giovanni Morosini, the ambassador of Venice, and his successor, Giambattista Donato, realizing the influence the young Jewish physician had obtained over the ruling powers, asked their government to attach him to the legation. The matter was, however, left in abeyance until 1681, when Mustapha sent Conegliano to Venice to consult other eminent physicians about the illness of the sultan's son-in-law.

On Oct. 10, 1682, Conegliano was appointed physician extraordinary to the Venetian embassy, with an allowance of one hundred zecchinos (about $475), a quarter more than had ever been previously paid, and a further payment of forty zecchinos for personal expenses. Conegliano arrived at Constantinople in December of 1682.

Shortly after his arrival the relations between Turkey and Venice became strained, because of a massacre of Turks by the Morlaks of Dalmatia, then under the suzerainty of Venice. The Porte demanded 175,000 reals for the sultan, and 25,000 each for Mustapha and Ḥusain Aga. Donato, the ambassador, went back to Venice to conduct the negotiations, and Conegliano was left as the unofficial representative of Venice.

Conegliano, however, was soon deprived of his most powerful protector. Mustapha had been in supreme command of the Turkish forces that had threatened Vienna. Driven off by John Sobieski of Poland, Mustapha was murdered Dec. 25, 1683, by order of Mohammed IV. In the alliance made by Poland with Venice it became the duty of Conegliano to keep his government posted on the movements of the common enemy, Turkey. This he did, though at the imminent risk of his life, sending the reports through his brother Solomon, then a practising physician in Venice. On the death of his first wife in 1687, Conegliano went to Venice in order to superintend the education of his two boys. In 1690 he returned to Constantinople, and soon gained greater influence than before. A change of sultans and the secret aid of France had induced the Turks to renew a warfare, which was stopped only by the approach of winter. Conegliano unearthed a plot to burn the Venetian fleet, just in time to prevent its execution. So active was he in the service of his country that, despite his popularity, his house was attacked, and he was saved only by the prompt and energetic action of the French ambassador, M. de Castagnères.

In 1693, however, France withdrew her protection from Venetian subjects, and Conegliano sought in vain to enlist the good services of Holland. In May of this year five poor Jews were arrested on fictitious charges of espionage. Conegliano was able to procure their release; but he had aroused antagonism, and he was secretly advised by Ali Pasha, the grand vizier, to flee the city. This he refused to do, and a contemplated order to arrest all Venetians and confiscate their property was stayed for two months. He had, during all this period, been an ardent advocate of peace.

In June, 1694, he returned to Venice, leaving his brother Leo and his friend Ḥusain Aga in Constantinople to work for a cessation of hostilities. On arriving in Venice, Conegliano learned that the Senate had, on June 12, 1693, exempted him and his two brothers from wearing the yellow hat, and had made them citizens of the republic. In February, 1696, the Turks under Mustapha II. invaded Hungary, but were crushed at Zenta by Eugene of Savoy. Peace, however, was not declared until 1698. On Aug. 23 of that year Conegliano was appointed an ex officio member of the peace congress, with Ruzzini, the Venetian ambassador to Constantinople, as the active member. The congress met at Carlovitz, near Belgrade, but bickerings and differences led to a deadlock. Matters were approaching an open rupture, when at last the jealousy of Lord William Paget and of Ruzzini abated, and Conegliano was permitted for the first time to use his influence with the Turkish commissioners. His efforts were crowned with success, and on Jan. 26, 1699, the peace protocol was signed.

Conegliano returned to Venice and was further honored by his government by receiving permission to travel at will, without the special license usually required of the Jews. In 1700 Conegliano went again to Constantinople, where he died.

Bibliography: David Kaufmann, *Dr. Israel Conegliano*, 1895.

E. Ms.

Israel Conegliano: Preacher at the Ashkenazic synagogue of Padua; born there at the end of the eighteenth century; died March, 1824. He was the pupil of Azariel Alatino, and the teacher of Joseph Almanzi, who bewailed his death in a special publication, "Me'il Ḳin'ah." Israel wrote a work entitled "Sefer Derashot," still extant in manuscript in Almanzi's collection. M. S. Ghirondi published a poem in his honor in "Bikkure ha-'Ittim," vi. 57.

Bibliography: Ghirondi, *Toledot Gedole Yisrael*, p. 204; Tobias Cohn, *Ma'aseh Ṭobiah*, Introduction; Mortara, *Indice Alfabetico*, p. 16; Fürst, *Bibl. Jud.* i. 186, ii. 201; David Kaufmann, *Dr. Israel Conegliano*, pp. 6 *et seq.*

I. Br.

Joseph ben Israel Conegliano: Physician, and probably son of the preceding; lived at Padua at the end of the eighteenth century. He was the author, in conjunction with his brother Naphtali, of a poem entitled "Zemer le-Se'udat Purim" (Song for the Meal of Purim), published at Mantua.

Judah Conegliano: Talmudist; rabbi in Acqui at the end of the sixteenth century and the beginning of the seventeenth. He was among the rabbis whose interdiction of the bath of Reggio provoked so much discussion. Judah Saltaro, in his work "Miḳweh Yisrael," Venice, 1607, invokes Conegliano's authority on a ritual question.

Naphtali ben Israel Conegliano: Hebraist; brother of Joseph, and joint author with him of the poem "Zemer le-Se'udat Purim."

I. Br.

Solomon Conegliano: Venetian physician; born about 1642; died in 1719. Conegliano was the elder brother of Israel Conegliano, and, like him, served the Venetian republic with great credit. He was educated at Padua, where he attended the university, obtaining the degrees of M.D. and Ph.D. Jan. 22, 1660. He returned to Venice shortly afterward, and soon developed remarkable talent as a teacher of medicine. Young Jews from all parts of Europe sought his house, to attend the preparatory school which he had established there. Tobias Cohn, who, in his encyclopedia entitled "Ma'aseh Ṭobiyyah," represents Solomon as one of the greatest physicians and philosophers of his time, was one of his pupils. A poem by him was prefixed to Cohn's encyclopedia. So eminent were his qualifications, both as teacher and as practitioner, that the government permitted him to exercise the privileges of a citizen of the republic. Conegliano's services to Venice and the honors conferred upon him and on his brother by the republic are given in detail in the biography of Israel Conegliano.

CONEGLIANO, IMMANUEL. See Ponte, Lorenzo Da.

CONEY: A small herbivorous animal (*Hyrax Syriacus* or *Hyrax Daman*) mentioned in the Bible. "Coney" is the traditional rendering of the Hebrew "shafan" (שפן), which occurs four times in the O. T. (Lev. xi. 5; Deut. xiv. 7; Ps. civ. 18; Prov. xxx. 26). In the first two places the "shafan" is classified among the unclean animals, along with the hare, "because he cheweth the cud but parteth not the hoof" (Lev. xi., R. V. 5). In the Book of Proverbs the shefannim are described as one of the "four things which are little upon the earth," but "are exceedingly wise." They "are but a feeble folk, yet make they their houses in the rocks" (Prov. xxx. 24, 26). The rendering "coney" is principally supported by the Jewish interpreters and lexicographers of the Middle Ages. None of the ancient versions, however, lend it support in more than one out of the four passages—for instance, the Septuagint in Psalms, and the Vulgate in Proverbs (see Bochart, "Hierozoicon," pp. 1002–1003). Besides, this interpretation is inadmissible for one if for no other reason: the "coney" is a European animal, unknown to the Israelites; and it does not live in the rocks.

Bochart, who refuted the Jewish opinion, tried to demonstrate that the shafan, which, he says, the Septuagint generally and rightly translates *χοιρογρύλλιος*, and which St. Jerome rightly identifies with the *ἄρκτομυς*, can not be anything else than the jerboa. His arguments are: (1) the authority of the Copto-Arabic lexicon, the "Scala Magna" of Kircher ("Lingua Ægyptiaca Restituta," p. 165); (2) the analogy between the habits of the two animals (*ib.* p. 1016). Since then, however, travelers who have made on the spot a thorough study of the habits of the jerboa have pronounced that identification impossible (see Bruce, "Voyage," v. 145, Paris, 1791). Shaw ("Travels," p. 386) was the first to propose to identify the shafan with an animal called "ghanam Isra'il" (Israel's lamb). This identification found a warm supporter in Bruce (*l.c.* p. 165), who further identifies it with the "ashoko" of the Abyssinians. The Arabs call this animal "wabr" also, which, it may be added by way of confirmation, is the word used by the Arabic versions to render "shafan" in the first two passages, Lev. xi. 5 and Deut. xiv. 7. Finally, Fresnel ("Journal Asiatique," 3d series, v. 514) says that in the Ehkili dialect (Sabean) the wabr is called "thufun," from the root "thafan," Hebr. "shafan."

The shafan, it is said, does not chew the cud. But here, as in many other cases, Scripture speaks according to appearances. Bruce, who studied carefully the habits of this animal, says that it certainly chews the cud (*l.c.* v. 168). "The shafan," says Shaw, "is a harmless creature of the same size and quality with the rabbit, having the like incurvating posture and disposition of the fore teeth. But it is of a browner color, with smaller eyes and a head more pointed. . . . The usual refuge of it is in the holes and clefts of the rocks" (*l.c.* p. 376). Like the ants they live in large numbers, and display considerable wisdom in guarding themselves against surprises from their enemies.

Their habitat extends from Abyssinia into Arabia, Palestine, and Syria. In Abyssinia both Christians and Mohammedans abstain from their flesh; but the Arabs of Arabia Petrea, and also the inhabitants of Mount Lebanon, consider it a great relish. For the place of the coney in the totemistic theories, see Totemism.

E. G. H. H. H.

CONFERENCES, RABBINICAL: Assemblies of rabbis to determine common courses of action or common principles of faith. Rabbinical conferences are a late phenomenon in the history of Judaism, dating, as they do, only from the fourth decade of the nineteenth century. There had been occasional gatherings of Jews during earlier centuries to consider important issues touching the life and religious practise of the people; but the deliberations at these gatherings, or synods, as they are usually called, were not participated in exclusively by the rabbis (see Consistories; Synods, Rabbinical).

Early Conferences.

The changed conditions in the life of the Jews in the early years of the nineteenth century, owing to the emancipation from medieval legislation and the accompanying necessity of reconciling the religious beliefs and practises with the demands of the new era upon which they had entered, were the moving causes for the convening of the first rabbinical conference. There have been five notable conferences: viz., at Brunswick, June 12–19, 1844; at Frankfort-on-the-Main, July 15–28, 1845; at Breslau, July 13–24, 1846; at Philadelphia, Pa., Nov. 3–6, 1869; and at Pittsburg, Pa., Nov. 16–18, 1885. Besides these, mention may be made of the following: the Jewish Ministers' Association, an organization of rabbis stationed in the eastern cities of the United States, which met annually from 1885 to 1890; the Conference of Southern Rabbis of the United States, which existed from April 14, 1885, to Nov. 20, 1887, when it held its final meeting; and the Rabbinical Literary Association, which was organized at Detroit, Mich., July 13, 1880, and existed only two years. After the rabbinical conference at Philadelphia three meetings were held in 1871 at Cleveland, New York, and Cincinnati respectively. The so-called Cleveland conference (Oct. 17–20, 1855) was not strictly a rabbinical conference, since there were also a few lay delegates present. The same was the case at the synods of Leipsic (June 29-July 4, 1869) and Augsburg (July 11–17, 1871). Hence, these three meetings do not come properly within the scope of this article. The same may be said of the so-called French Sanhedrin, that met in 1807 at the call of Napoleon, and all previous synods. In Germany and Hungary, local conferences of rabbis are still held from time to time. The Central Conference of American Rabbis, organized in 1889, meets in annual session.

In point of fact, however, the first purely rabbinical conference took place at Wiesbaden in 1837, in answer to a call issued by Abraham Geiger. In a letter to a colleague, dated May of that year, Geiger had written as follows in reference to the purpose of the proposed meeting: "It is not intended to create a new Judaism, nor yet to assume the authority of a synod: it shall merely give honest men the opportunity to discuss the proper methods of conducting their office, and shall be the beginning of the restoration of the almost vanished spirit of Judaism" ("Wiss. Zeit. Jüd. Theol." iii. 321). This conference was attended by Rabbis Geiger of Wiesbaden, Aub of Bayreuth, Bloch of Buchau, Guttmann of Redwitz, Herxheimer of Bernburg, Kohn of Hohenems, Maier of Stuttgart, Stein of Burgkunstadt, Wagner of Mannheim, Wassermann of Mühringen, and Wechsler of Oldenburg. Friedländer of Brilon, Grünebaum of Landau, and Hess of Eisenach arrived too late. These men discussed various questions, but did not enunciate any important decisions. The mere fact, however, that they had gathered for such discussion was significant. A committee was appointed to prepare a manual for domestic devotion in accordance with the needs of the time. It was resolved to discuss in the pages of Geiger's "Wissenschaftliche Zeitschrift für Jüdische Theologie" the practical questions which were agitating the Jewish communities at that time.

The epoch-making conferences have been the five mentioned by name above; they were respectively attended by most of the prominent Reform rabbis of the time in Germany and America; and their deliberations and decisions form an important chapter in the development of the faith.

Controversies Regarding Reform.

During the opening years of the fifth decade of the nineteenth century the Jewish communities of Germany were stirred by religious agitation as never before; the issue between the traditionalists and the reformers was acute; the bitter opposition of Tiktin, rabbi of Breslau, to the appointment of Geiger, the most prominent reformer in Germany, had induced the officers of the congregation to address the rabbis of Europe for opinions on the subject; and these opinions were published in two volumes entitled "Ueber die Verträglichkeit der Freien Forschung mit dem Rabbineramte." The publication in 1842 of the new prayer-book of the Hamburg Temple (Reform) congregation had called forth from Isaac Bernays, the Orthodox leader, a declaration anathematizing the book and the reformers. These latter, in their defense, published a number of opinions of rabbis who sanctioned the reforms introduced into the prayer-book; these rabbis were, besides the two preachers of the congregation, Salomon and Frankfurter, the following: L. Auerbach, Friedländer, Geiger, Guttmann, Holdheim, Kohn, Maier, Mannheimer, Philippson, and Stein. The volume was entitled "Theologische Gutachten über das Gebetbuch nach dem Gebrauche des Neuen Israelitischen Tempelvereins in Hamburg" (Hamburg, 1842). The action of a society of Jews in Frankfort-on-the-Main in 1843, condemning circumcision, and resolving to abolish the rite in the future so far as their children were concerned, had induced Solomon Trier, the chief of the Orthodox of that city, to address his colleagues for opinions on the absolute requirement of circumcision as an essential of Jewish practise. These opinions, also, were published in a volume entitled "Gutachten über die Beschneidung" (Frankfort, 1814).

The time was ripe for the organization of a society of rabbis at whose meetings all these vexed questions could be discussed, and decisions reached for the guidance of the troubled communities. Ludwig Philippson, editor of the "Allg. Zeit. des Judenthums," recognized this need of the hour, as Geiger had done before him; and he issued a call in the columns of his journal (Jan. 15, 1844, p. 27) for a rabbinical conference. In this call he wrote:

> "Let us speak plainly. The issue is no longer the permissibility or non-permissibility of this or that synagogal institution, of this or that alleviation for civil or social life: the issue before us is concerned with the entire content of our religion, which we must present and strengthen in its purity in order to rescue it from deadening rigidity on the one hand and from benumbing unfaith on the other. Judaism is losing influence day by day, and every layman is asking us, 'What are you doing?' The objects of the conference shall be: (1) to bring the rabbis into closer relations and acquaintanceship; (2) to promote unanimity in the conduct of the rabbinical office; (3) to further the founding of communal institutions; and (4) to deliberate upon all Jewish affairs."

A number of rabbis declared themselves in sympathy with this call, and it resulted in the convening of the Brunswick conference of 1844.

The Brunswick Conference (June 12–19, 1844): This was attended by the following rabbis:

A. Adler of Worms; S. Adler of Alzey; Ben Israel of Coblenz: Bodenheimer of Hildesheim; Adler of Minden; Formstecher of Offenbach; Frankfurter of Hamburg; Geiger of Breslau; Goldman of Kurhessen; Heidenheim of Sondershausen; Herzfeld of Brunswick; Herxheimer of Bernburg; Hess of Weimar; Hirsch of Luxemburg; Hoffmann of Meiningen; Holdheim of Mecklenburg-Schwerin; Jolowicz of Marienwerder; J. Kahn of Treves; Klein of Pomerania; Maier of Stuttgart, who was president of the conference; Philippson of Magdeburg; Salomon of Hamburg; Schott of Randegg; Sobernheim of Bingen.

The purpose of the conference was declared to be "to consider the ways and means for the preservation of Judaism, and the awakening of the religious spirit."

The resolutions passed by the conference were as follows:

> "The oath of a Jew is binding without any further ceremony than the invocation of the name of God. The prayer 'Kol Nidre' is unessential; and the members of the conference were to take steps to abolish it on the following Day of Atonement."

The conference indorsed the responsa of the French Sanhedrin, with the exception of the third, which it changed to read as follows:

> "The marriage of a Jew with a Christian—in fact, the marriage of a Jew with the adherent of any monotheistic religion—is not forbidden if the civil law permits the parents to raise in the Jewish religion the children issuing from such a union."

A commission was appointed to consider a number of important questions and to report at the next conference.

The Frankfort-on-the-Main Conference (July 15–28, 1845): The deliberations were concerned mainly with the reports of the commission appointed at the Brunswick conference. There were present, besides the above-mentioned:

J. Auerbach of Frankfort-on-the-Main; Einhorn of Birkenfeld; Frankel of Dresden; Gosen of Marburg; Güldenstein of Buchau; Jost of Frankfort; Reiss of Alt-Breisach; Stein of Burgkunstadt; Suesskind of Wiesbaden; Treuenfels of Weilburg; Wagner of Mannheim; Wechsler of Oldenburg; Leopold Stein of Frankfort-on-the-Main, who was president of the conference.

The first report discussed was that on the retention of Hebrew in the public services. The conference voted unanimously for the retention of the sacred language. On the question, to what extent, there was a decided difference of opinion. The recommendation of the committee, adopted by a vote of 18 to 12, was that the "Barcku" with its response, the "Shema‘" (first paragraph), the first and last three benedictions of the "Tefillah," and the selection from the Torah should be in Hebrew, and that the remainder of the service should be in the vernacular.

The conference also decided (in the affirmative) the question "Shall the prayers for the return to the land of our forefathers and for the restoration of the Jewish state be eliminated from the ritual?" Closely connected with this was the question as to whether the Messianic idea was to receive prominent and distinct expression in the ritual. This also was decided in the affirmative.

Although the conference voted for the retention of the "Musaf" prayer, yet it was definitely understood that the traditional supplication for the restoration of the sacrifices should be so changed as to be a mere mention of the sacrifices as historical reminiscences.

On the question of the reading from the Torah, the majority voted for the triennial cycle; and the reading of the "Hafṭarah" in the vernacular was favored.

The conference was unanimous in its affirmative vote on the admissibility of the organ into the synagogue. All the members but three agreed that a Jew was permitted to play the organ on the Sabbath, and that by so doing he did not violate the law of Sabbath observance.

The conference considered favorably the suggestion submitted by the Berlin Reform Association for the calling of a synod "in which the lay and the theological elements shall be alike represented."

The conference decided in the affirmative the question whether modern bathing establishments can be used for ritualistic purposes. A committee was appointed to direct the attention of the people to the need of theological seminaries.

Historical Judaism.

It was at this conference that the irreconcilable differences between the traditionalists and the reformers received decisive expression. The discussions had shown that many of the members held radical views on a number of vital points connected with the ritual. Zacharias Frankel, who declared himself to be a champion of positive historical Judaism, desired the conference to issue a statement of definite principles. In this he was opposed particularly by Geiger and Holdheim, and, although a majority of the meeting was in sympathy with Frankel's views, yet the conference supported his two chief opponents in their contention that no definite declaration of principles should be formulated, because such a theoretical document would result only in antagonisms and would not assist in solving the burning questions of the day. Frankel withdrew from the conference, and became the leader of the adherents of so-called "positive historical" Judaism. Frankel issued a call in May, 1846, for a conference of Jewish theologians, to be held in the fall of that year, and to be the organ of the opposition to the Reform conferences; but the meeting did not take place.

The Breslau Conference (July 13–24, 1846): This was attended by:

A. Adler of Worms; S. Adler of Alzey; J. Auerbach of Frankfort-on-the-Main; Ben Israel of Coblenz; Einhorn of Birkenfeld; Formstecher of Offenbach; Geiger of Breslau (who was president of the conference); Goldstein of Waren; Gosen of Marburg; Güldenstein of Buchau; Herxheimer of Bernburg; Herzfeld of Brunswick: Hess of Eisenach; Holdheim of Mecklenburg-Schwerin: J. Kahn of Treves; M. Levy of Breslau; L. Lövy of Münsterberg; Pick of Teplitz; Philippson of Magdeburg; Sobernheim of Bingen; Stein of Frankfort-on-the-Main; Wagner of Mannheim; Wechsler of Oldenburg.

The Sabbath Question.

A number of important declarations were made on vital subjects, such as the Sabbath, the holidays, circumcision, and mourning customs. The conference expressed itself on the Sabbath question to the effect that the restoration of the solemn observance of the Sabbath as a day of rest and sanctification is incumbent not only upon the teacher in Israel, but upon every Israelite. Therefore special care must be taken in these days to insure the solemnity of the public services and to secure the observance of Sabbath in the home. Work which is ordinarily prohibited on the Sabbath is permitted in connection with divine services if necessary for the proper conduct of these services. If a man's livelihood is endangered by the closing of his business on the Sabbath, he may have his business attended to by non-Jews. If contingencies arise threatening the material welfare, any kind of work may be done on the Sabbath to avoid this; for example, in case of fire. Any and all manner of labor is permitted on the Sabbath in cases where human life—whether of Jew or non-Jew—is in danger. The rabbinical prohibitions known as "hedges"—rigorous interpretations of Sabbath laws—are no longer binding. Such institutions as "‘Erube Ḥaẓerot" and "‘Erube Teḥumim," which are mere evasions of the Sabbath laws, although their ostensible purpose is relaxation of the strictness of these laws, are both superfluous and inadmissible. The Jewish soldier must attend to his duties on the Sabbath. As for the Jew who holds a public office, although he is bound to perform the duties connected with his office, yet he should exert himself to restore the solemnity of the day in his home. Brain-work is not included in the categories of labor prohibited on the Sabbath.

The conference made the following pronouncements concerning the holidays: Congregations are justified in abolishing the second day's observance of the holidays with the exception of the second day of Rosh ha-Shanah. If, however, some of the members of a congregation should object to such abolition, these days are to be continued as occasions for public worship, but the prohibition to work on them is no longer binding in any event. The eating of leavened bread is permitted on the twenty-second day of Nisan, the so-called eighth or last day of Passover. It is permitted to blow the shofar on the first day of the New-Year when it happens to fall on the Sabbath. The same is the case with the use of the four fruits on the first day of Succot when that falls on the Sabbath.

The question of circumcision was made the occasion for a number of declarations, of which the most important were these: Every "mohel" should be required to pass an examination, after being instructed by a surgeon, and should prove by his credentials his authority to perform the operation. The so-called "peri'ah" may be performed with a surgical instrument if the assisting surgeon prefers this to the finger-nail, which, as a rule, is used for the purpose. The "meẓiẓah" is to be dispensed with. (See Circumcision.) A physician should treat the child after circumcision. A physician should examine the child before circumcision, and decide whether the operation can be safely performed, or whether on account of sickness or bodily weakness it had best be postponed. If parents have had the misfortune to lose a child, or a child has become a chronic invalid, owing to the operation, and they fear to have other children circumcised, they may postpone the rite until the physician declares that there is absolutely no danger from its performance.

Mourning Customs.

The conference gave expression to some decided views on traditional mourning customs. It declared that such practises as the rending of the garments, allowing the beard to grow for thirty days after the death, sitting on the floor, removing the leather shoes, the prohibitions of washing, bathing, and greeting, have lost all significance in these days; nay, more, are repulsive to the religious feeling, and should be abolished. The mourner should remain at home for three days, counting from the day of burial. The mourner should also, as far as possible, abstain from business on the day of the funeral and for two days after the burial. Many important resolutions were referred to committees, but were not acted upon by the conference.

Each of these conferences aroused intense excitement; protests against the discussions and resolutions of the conferences being issued by opponents, while pamphlets in defense were published by participants. The Brunswick conference called forth a protest from seventy-seven German and Hungarian rabbis: also publications such as "אסוף אסיפה. Protestation Gegen die Rabbinerversammlung von D. Deutsch, Rabbiner in Sohrau, O. S." In defense were issued; "Die Erste Rabbinerversammlung und Ihre Gegner," by Kirchenrath Dr. Maier, and the pamphlet by Holdheim, "Die Erste Rabbinerversammlung und Herr Dr. Frankel." The press of the day, notably the three Jewish publications, "Die Allgemeine Zeitschrift des Judenthums," "Orient," and Frankel's "Zeitschrift für die Interessen des Judenthums," contained articles pro and con. Feeling ran very high, and this was intensified by the Frankfort conference, which had resulted in an open break with Frankel and the conservatives. The bitterness of the feelings engendered is apparent from such an incident as the refusal on the part of Michael Sachs, the famous preacher of the Berlin congregation, to receive one of the rabbis who had attended the Frankfort conference.

A conference of the rabbis of Baden, held in the summer of 1845 after the Frankfort conference, declared for Reform on the historico-traditional basis. The Breslau conference called forth a bitter declaration from some Jews of Frankfort-on-the-Main, condemning the conference for its cowardice in not dealing fearlessly with the Sabbath question. This aroused the participants in the conference, notably Geiger, Philippson, Stein, and Wechsler, who wrote in defense of their action. These were days of "storm and stress" in Judaism. No further conferences were held. The hope of the founders of the rabbinical conference, that it might become the authoritative tribunal for the solution of the vexing problems that were agitating the Jewish congregations, was not realized, owing to the political reaction following the year 1848. In 1868 an unsuccessful attempt was made to convene a rabbinical conference at Cassel.

Outcome of Conferences.

These conferences did not succeed in effecting their object because the differences in Jewry were too pronounced. Had they frankly and outspokenly taken either the Reform or the Orthodox position, they might have received acknowledgment as the authority from the adherents of the cause they espoused. It was impossible to satisfy all parties; the participants in the conferences represented many shades of opinion, from the extreme radicalism of Holdheim to the conservative traditionalism of the sympathizer with Frankel, although their main tendency was toward Reform. The conferences furnished at most a forum where vital questions were discussed, and expression was given to interesting views, but they did not attain an authoritative place. They were at best expressive of the conflicts and disturbances that were agitating Jewish thought in the fifth decade of the nineteenth century.

The Philadelphia Conference (Nov. 3-6, 1869): There were present:

S. Adler of New York; J. Chronik of Chicago; D. Einhorn of New York; B. Felsenthal of Chicago; J. K. Gutheim of New York; S. Hirsch of Philadelphia; K. Kohler of Detroit; L. Mayer of Selma, Ala.; M. Mielziner of New York; S. H. Sonnenschein of St. Louis; M. Schlesinger of Albany, N. Y.; I. M. Wise of Cincinnati.

The following statement of principles was adopted:

"1. The Messianic aim of Israel is not the restoration of the old Jewish state under a descendant of David, involving a second separation from the nations of the earth, but the union of all the children of God in the confession of the unity of God, so as to realize the unity of all rational creatures and their call to moral sanctification.

"2. We look upon the destruction of the second Jewish commonwealth not as a punishment for the sinfulness of Israel, but as a result of the divine purpose revealed to Abraham, which, as has become ever clearer in the course of the world's history, consists in the dispersion of the Jews to all parts of the earth, for the realization of their high-priestly mission, to lead the nations to the true knowledge and worship of God.

"3. The Aaronic priesthood and the Mosaic sacrificial cult were preparatory steps to the real priesthood of the whole people, which began with the dispersion of the Jews, and to the sacrifices of sincere devotion and moral sanctification, which alone are pleasing and acceptable to the Most Holy. These institutions, preparatory to higher religiosity, were consigned to the past, once for all, with the destruction of the Second Temple, and only in this sense—as educational influences in the past—are they to be mentioned in our prayers.

"4. Every distinction between Aaronides and non-Aaronides, as far as religious rites and duties are concerned, is consequently inadmissible, both in the religious cult and in social life.

"5. The selection of Israel as the people of religion, as the bearer of the highest idea of humanity, is still, as ever, to be strongly emphasized, and for this very reason, whenever this is mentioned, it shall be done with full emphasis laid on the world-embracing mission of Israel and the love of God for all His children.

"6. The belief in the bodily resurrection has no religious foundation, and the doctrine of immortality refers to the after-existence of the soul only.

"7. Urgently as the cultivation of the Hebrew language, in which the treasures of divine revelation were given and the immortal remains of a literature that influences all civilized nations are preserved, must be always desired by us in fulfilment of a sacred duty, yet it has become unintelligible to the vast majority of our coreligionists; therefore, as is advisable under existing circumstances, it must give way in prayer to intelligible language, which prayer, if not understood, is a soulless form."

The conference passed a number of resolutions on marriage and divorce, and declared that "the male child of a Jewish mother is, no less than her female child, in accordance with a never-disputed principle of Judaism, to be considered a Jew by descent, even though he be uncircumcised."

The Pittsburg Conference (Nov. 16-18, 1885): There were present at this conference:

I. Aaron of Ft. Wayne, Ind.; J. Bloch of Youngstown, O.; S. Falk of Buffalo, N. Y.; A. Guttmann of Syracuse, N. Y.; E. G. Hirsch of Chicago; A. Hahn of Cleveland, O.; K. Kohler of New York; J. Krauskopf of Kansas City, Mo.; M. Lessler of Wheeling, W. Va.; A. Moses of Louisville, Ky.; M. Machol of Cleveland, O.; L. Mayer of Pittsburg; L. Naumberg of Pittsburg; D. Philipson of Baltimore; S. Sale of Chicago; S. H. Sonnenschein of St. Louis; M. Schlesinger of Albany, N. Y.; S. Weil of Bradford, Pa.; I. M. Wise of Cincinnati.

The following declaration of principles was formulated:

"1. We recognize in every religion an attempt to grasp the Infinite, and in every mode, source, or book of revelation held sacred in any religious system the consciousness of the indwelling of God in man. We hold that Judaism presents the highest conception of the God-idea as taught in our Holy Scriptures and developed and spiritualized by the Jewish teachers, in accordance with the moral and philosophical progress of their respective ages. We maintain that Judaism preserved and defended, midst continual struggles and trials and under enforced isolation, this God-idea as the central religious truth for the human race.

"2. We recognize in the Bible the record of the consecration of the Jewish people to its mission as the priest of the one God, and value it as the most potent instrument of religious and moral instruction. We hold that the modern discoveries of scientific researches in the domain of nature and history are not antagonistic to the doctrines of Judaism, the Bible reflecting the primitive ideas of its own age, and at times clothing its conception of Divine Providence and Justice dealing with man in miraculous narratives.

"3. We recognize in the Mosaic legislation a system of training the Jewish people for its mission during its national life in Palestine, and to-day we accept as binding only its moral laws, and maintain only such ceremonies as elevate and sanctify our lives, but reject all such as are not adapted to the views and habits of modern civilization.

"4. We hold that all such Mosaic and rabbinical laws as regulate diet, priestly purity, and dress originated in ages and under the influence of ideas entirely foreign to our present mental and spiritual state. They fail to impress the modern Jew with a spirit of priestly holiness; their observance in our days is apt rather to obstruct than to further modern spiritual elevation.

"5. We recognize in the modern era of universal culture of heart and intellect the approaching of the realization of Israel's great Messianic hope for the establishment of the kingdom of truth, justice, and peace among all men. We consider ourselves no longer a nation, but a religious community, and therefore expect neither a return to Palestine, nor a sacrificial worship under the sons of Aaron, nor the restoration of any of the laws concerning the Jewish state.

"6. We recognize in Judaism a progressive religion, ever striving to be in accord with the postulates of reason. We are convinced of the utmost necessity of preserving the historical identity with our great past. Christianity and Islam being daughter religions of Judaism, we appreciate their providential mission to aid in the spreading of monotheistic and moral truth. We acknowledge that the spirit of broad humanity of our age is our ally in the fulfilment of our mission, and therefore we extend the hand of fellowship to all who operate with us in the establishment of the reign of truth and righteousness among men.

"7. We reassert the doctrine of Judaism that the soul is immortal, grounding this belief on the divine nature of the human spirit, which forever finds bliss in righteousness and misery in wickedness. We reject, as ideas not rooted in Judaism, the beliefs both in bodily resurrection and in Gehenna and Eden (Hell and Paradise) as abodes for everlasting punishment and reward.

"8. In full accordance with the spirit of Mosaic legislation, which strives to regulate the relation between rich and poor, we deem it our duty to participate in the great task of modern times, to solve, on the basis of justice and righteousness, the problems presented by the contrasts and evils of the present organization of society."

The conference adopted the following resolution on the proselyte question:

"Inasmuch as the so-called Abrahamitic rite is by many, and the most competent, rabbis no longer considered as a *conditio sine qua non* of receiving male Gentiles into the fold of Judaism, and inasmuch as a new legislation on this and kindred subjects is one of the most imperative and practical demands of our Reform movement, be it

"Resolved that a committee of five, one of them to be the president of this conference, be entrusted with framing a full report to be submitted for final action to the next conference."

This conference has been the only one to make a definite statement on the question of Sunday services. Its declaration on the subject was to this effect:

"Whereas we recognize the importance of maintaining the historical Sabbath as a bond with our great past and the symbol of the unity of Judaism the world over; and whereas, on the other hand, it can not be denied that there is a vast number of working men and others who, from some cause or other, are not able to attend the services on the sacred day of rest; be it resolved that there is nothing in the spirit of Judaism or its laws to prevent the introduction of Sunday services in localities where the necessity for such services appears or is felt."

The conference also recommended that each rabbi read only such sections of the Pentateuch as he thinks proper, but with regard, however, to the regulations of the Hebrew calendar.

Central Conference of American Rabbis: The first meeting was held in Detroit, Mich., July 9, 1889, at the initiation of Isaac M. Wise. The meeting for organization was presided over by David Philipson, with Henry Berkowitz as secretary. At a session on the following day a series of resolutions was adopted as the working basis of the conference. One of these fixed the position of the conference in the historical succession of rabbinical deliberative bodies, by declaring that "the proceedings of all the modern rabbinical conferences, from that held in Brunswick in 1844, and including all like assemblages held since, shall be taken as a basis for the work of this conference in an endeavor to maintain in unbroken succession the formulated expression of Jewish life and thought in each era."

Actuated by the spirit of this resolution, the conference elected as honorary president Samuel Adler, the only surviving member of the various German con-

Foundation.

ferences held after the year 1840; and Isaac M. Wise was elected president. The conference has since met in annual session in the following cities: Cleveland, 1890; Baltimore, 1891; New York city, 1892; Chicago, 1893; Atlantic City, 1894; Rochester, N. Y., 1895; Milwaukee, Wis., 1896; Montreal, Canada, 1897; Atlantic City, 1898; Cincinnati, 1899; Buffalo, 1900; Philadelphia, 1901; New Orleans, 1902. All of these meetings were held in the month of July, with the exception of those at Chicago, Cincinnati, and New Orleans. The Chicago conference took place Aug. 23-26, introductory to the Jewish Denominational Congress, held in connection with the World's Parliament of Religions; and, together with the Union of American Hebrew Congregations, it represented Judaism officially at the Parliament. The papers read by the members of the conference, both at the Jewish Denominational Congress and at the general Parliament, were published by the Union in a volume entitled "Judaism at the World's Parliament of Religions" (Cincinnati, 1894). The Cincinnati meeting in 1899 was held in March instead of July, in order to celebrate the eightieth birthday of Isaac M. Wise, founder and president of the conference from its organization. An extra session was held at Washington, D. C., in Dec., 1892. The meeting at New Orleans took place May 6-10, 1902. The proceedings of the various meetings of the conference are given in detail in a series of year-books, containing not only the record of the business transacted and the discussions by the members on religious doctrine and practise, but also of the papers read at the sessions.

Reform Platform.

Although the conference is open to rabbis of any opinion, it is in reality an association of ministers of the Reform school; and while it formulated no declaration of principles, yet its position in all its deliberations and proceedings has been taken firmly on the basis of the Reform movement. This was evident particularly in the discussion of the authority of the Talmud and the rabbinical codes. At the meeting held in Rochester in 1895, the president in his annual address proposed for discussion and decision the question, "What is our relation in all religious matters to our own post-Biblical and patristic literature, including the Talmud, casuists, responses, and commentaries?" The committee to whom the question was referred reported as follows:

> "From the standpoint of Reform Judaism, the whole post-Biblical and patristic literature, including the Talmud, casuists, responses, and commentaries, is, and can be considered as, nothing more nor less than 'religious literature.' As such it is of inestimable value. It is the treasure-house in which the successive ages deposited their conceptions of the great and fundamental principles of Judaism and their contributions to the never-ceasing endeavor to elucidate the same. Consciously or unconsciously, every age has added a wing to this great treasure-house, and the architecture and construction of each wing bear the indelible marks of the peculiar characteristics of the time in which it was erected. Our age is engaged in the same task. We too have to contribute to the enlargement of this treasure-house; but we have to do it in our own way, as the spirit of our time directs, without any slavish imitation of the past.
>
> "To have awakened the consciousness of this historic fact is the great merit of Reform Judaism; and the more this consciousness grows upon our mind, the more the conditions and environments of our modern life force it upon us, the more persistently we have to assert that our relations in all religious matters are in no way authoritatively and finally determined by any portion of our post-Biblical and patristic literature."

Union Prayer-Book.

The notable achievements of the conference are: its preparation and publication of the Union Prayer-Book for Jewish worship; its successful representation of Judaism at the World's Parliament of Religions, as described above; its declaration on the requirements for the admission of proselytes; and, more than all, its uniting in one body the Reform rabbis of the country. The Union Prayer-Book is used at present (1902) by 158 congregations, in all portions of the country, having superseded most of the prayer-books in use heretofore. It attempts to combine the best elements of the traditional service with prayers expressing the aspirations of modern days. In its report to the general meeting, the ritual committee entrusted with the preparation of the work stated thus the principles that had guided it:

> "Imbued with the earnestness of the task that was laid upon us, we endeavored to conform the ritual for these two great holidays to the spirit and principle of the first part of our Union Prayer-Book, to unite the soul-stirring reminiscences of the past with the urgent demands of the present, and to enhance the solemnity of the service by combining the two essential elements, the ancient time-honored formulas with modern prayers and meditations in the vernacular."

The declaration of the conference on the admission of proselytes, adopted at the New York meeting in 1892, is as follows:

> "Resolved that the Central Conference of American Rabbis, assembled this day in this city of New York, considers it lawful and proper for any officiating rabbi, assisted by no less than two associates, and in the name and with the consent of his congregation, to accept into the sacred covenant of Israel, and declare fully affiliated with the congregation לכל דבר שבקדושה, any honorable and intelligent person who desires such affiliation, without any initiatory rite, ceremony, or observance whatever; provided such person be sufficiently acquainted with the faith, doctrine, and religious usages of Israel; that nothing derogatory to such person's moral and mental character is suspected; that it is his or her free will and choice to embrace the cause of Judaism; and that he or she declare verbally, and in a document signed and sealed before such officiating rabbi and his associates, his or her intention and firm resolve—
>
> "1. To worship the One Sole and Eternal God, and none besides Him.
>
> "2. To be conscientiously governed in his or her doings and omissions in life by God's laws, ordained for the child and image of the Father and Maker of all, the sanctified son or daughter of the divine covenant.
>
> "3. To adhere in life and death actively and faithfully to the sacred cause and mission of Israel, as marked out in Holy Writ."

The conference has published, in addition to the eleven year-books and the two volumes of the Union Prayer-Book, a Union Hymnal, and a volume entitled "Sermons by American Rabbis." One-half of the income from the sale of the Union Prayer-Book is placed to the credit of the fund for superannuated ministers; and a number of worthy rabbis, incapacitated from active service by age or physical infirmity, have been assisted by donations from this fund.

At present (1902) the conference has 149 active and four honorary members. Its constitution declares that "all active and retired rabbis of congregations, and professors of rabbinical seminaries, shall be eligible for membership." In March, 1900, it suffered the loss of its founder and president, Isaac M. Wise, in whose honor the meeting at Buffalo in July of that year largely assumed the character of a memorial meeting. At this meeting Joseph Silverman of New York, who had been first vice-president, was elected president of the body.

D. P.

Conventions of the Union of Orthodox Congregations of the United States and Canada: The great influx of Orthodox Jews—that is, of those who follow the rabbinical ordinances of Judaism besides the prescriptions of the Bible—within the last twenty-five years in America has made a union imperative.

The first real attempt to effect a union of Orthodox congregations was made on June 8, 1898, when a convention met in New York, in which fifty congregations were represented. H. Pereira Mendes was elected as president, and as vice-presidents Ph. Klein, Meldola de Sola, and H. W. Schneeberger.

The following principles were agreed to:

"This conference of delegates from Jewish congregations in the United States and the Dominion of Canada is convened to advance the interests of positive Biblical, rabbinical, and historical Judaism.

"We are assembled not as a synod, and therefore we have no legislative authority to amend religious questions, but as a representative body, which by organization and co-operation will endeavor to advance the interests of Judaism in America.

"We favor the convening of a Jewish synod specifically authorized by congregations to meet, to be composed of men who must be certified rabbis, and (*a*) elders in official position (cf. Num. xi. 16); (*b*) men of wisdom and understanding, and known among us (cf. Deut. i. 13); (*c*) able men, God-fearing men, men of truth, hating profit (cf. Ex. xviii. 21).

"We believe in the Divine revelation of the Bible, and we declare that the Prophets in no way discountenanced ceremonial duty, but only condemned the personal life of those who observed ceremonial law, but disregarded the moral. Ceremonial law is not optative; it is obligatory.

"We affirm our adherence to the acknowledged codes of our Rabbis and the thirteen principles of Maimonides.

"We believe that in our dispersion we are to be united with our brethren of alien faith in all that devolves upon men as citizens; but that religiously, in rites, ceremonies, ideals, and doctrines, we are separate, and must remain separate in accordance with the Divine declaration: 'I have separated you from the nations to be Mine' (Lev. xx. 26).

"And further, to prevent misunderstanding concerning Judaism, we reaffirm our belief in the coming of a personal Messiah, and we protest against the admission of proselytes into the fold of Judaism without 'milah' and 'ṭebilah.'

"We protest against intermarriage between Jew and Gentile; we protest against the idea that we are merely a religious sect, and maintain that we are a nation, though temporarily without a national home; and

"Furthermore, that the restoration to Zion is the legitimate aspiration of scattered Israel, in no way conflicting with our loyalty to the land in which we dwell or may dwell at any time.

It was determined that the object of the organization, to be known as the "Jewish Congregational Union of America," should be the promotion of the religious interests of Orthodox Jews. Questions of Orthodoxy in connection with the admission of members should be decided by a sub-committee of five. H. Pereira Mendes was elected permanent president. The objects of local unions were stated to be:

"1. To strengthen congregational life, but not to interfere in congregational autonomy.

"2. To advance the interests of local Judaism by the appointment of committees on congregational membership; civil legislation; Jewish presentations; city religious work (mission, circuit preaching); to devise uniform methods in Hebrew and religious schools; a union to send out rabbis for propaganda under the direction of the executive committee.

The convention held in New York Dec. 30, 1900, under the presidency of H. P. Mendes, represented 104 congregations.

K. H. P. M.

CONFESSION OF SIN (וידוי).—**Biblical Data:** The Scriptures repeatedly prescribe confession of sin as a means to expiation and atonement. "It shall be that when he is guilty of any one of these things, he shall confess that he hath sinned in that thing" (Lev. v. 5). "Aaron shall . . . confess over him [the scapegoat] all the iniquities of the children of Israel, and all their transgressions in all their sins" (*ib.* xvi. 21). "When a man or woman shall commit any sin that men commit . . . they shall confess their sin which they have done" (Num. v. 6, 7).

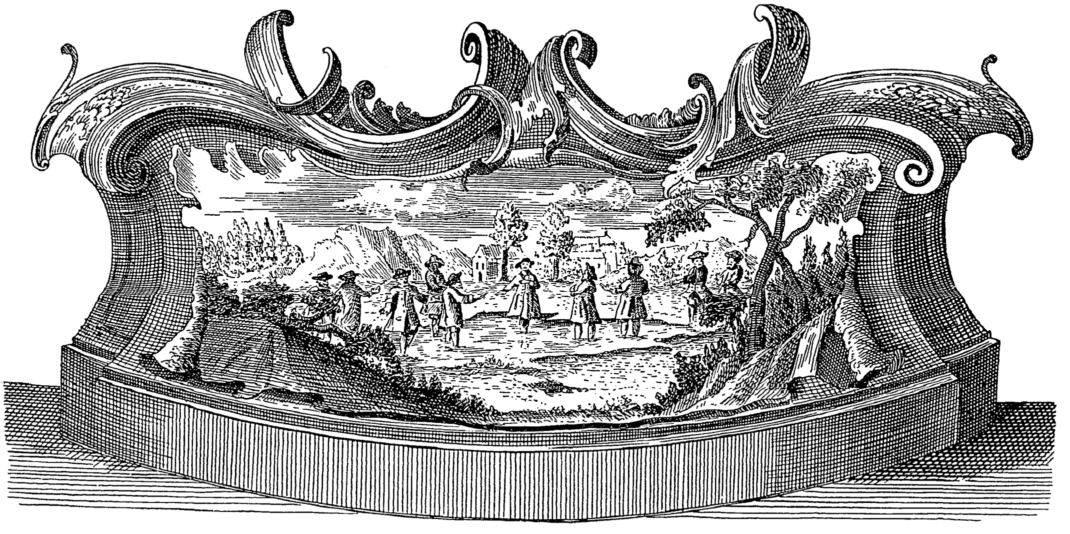
Its Effect.

The effect of confession is remission. Thus the Bible states, "And David said unto Nathan, I have sinned against the Lord. And Nathan said unto David, The Lord also hath put away thy sin; thou shalt not die" (II Sam. xii. 13). Elihu says, "God looketh upon men, and if any say, I have sinned, and perverted that which was right, and it profited me not [or, "I have not been requited"]: He will deliver his soul from going to the pit, and his life shall see the light" (Job xxxiii. 27, 28); and Jeremiah declares, "The Lord said to me . . . go and proclaim these words toward the north, and say, Return, thou backsliding Israel, saith the Lord; and I will not cause mine anger to fall upon you: for I am merciful, saith the Lord, and I will not keep anger for ever. Only acknowledge thine iniquity that thou hast transgressed against the Lord thy God" (Jer. iii. 11–13). Elsewhere the prophet says, "Take with you words, and turn to the Lord: say unto him, Take away all iniquity, and receive us graciously. . . . I will heal their backslidings, I will love them freely" (Hos. xiv. 2 *et seq.*; see ATONEMENT).

Confession may be individual, that of a person repenting backslidings; or it may be national, when the public at large humble themselves before God. As examples of the former may be cited the confession of Cain (Gen. iv. 13), of Jacob (*ib.* xxxii. 9), and of David (II Sam. xxiv. 10; Ps. xli. 4, li. 3, lxix. 5); of the latter, that of the Israelites in the wilderness (Num. xiv. 40); in the dispersion (Lev. xxvi. 40); at Mizpah, when admonished by Samuel (I Sam. vii. 6); and again at Gilgal, after choosing their first king (*ib.* xii. 10). National confessions are sometimes made through national representatives, as by Moses, after the Israelites worshiped the golden calf (Ex.

xxxii. 31), by the high priest on Atonement Day (Lev. xvi. 21), by Ezra (ix. 6, 7, 15), and by Nehemiah (i. 6, 7; ix. 2, 33–35).

——**In Rabbinical Literature:** Here repentance is likened to a door which, if man opens only as much as the eye of a needle, God opens as wide as a gateway (Cant. R. to v. 2), for whoso is willing to cleanse himself is assisted from above (Shab. 104a; Yoma 38b); and confession may be said to be the opening wedge, or the hinge on which repentance turns. Accordingly the Rabbis teach that Samuel, interceding for Israel (I Sam. vii. 5 *et seq.*), addressed to God the following argument in favor of his people's salvation: "Lord of the universe! Dost Thou ever require of man more than that he utter, 'I have sinned'? Now, the Israelites do plead, 'We have sinned' [*ib.* 6]: forgive them" (Midr. Sam. to vii. 6; Yer. Ta'an. ii. 65d). Elsewhere this doctrine is presented in another form (Yalḳ., Ps. c. 1; Pesiḳ. xxv. 159a). Citing the Scriptural verse (Prov. xxviii. 13), "He that covereth his sins shall not prosper; but whoso confesseth and forsaketh them shall have mercy," the Rabbis remark, when a man is charged of crime before a human tribunal, as long as he denies his guilt he has a chance for escape, but when he admits his guilt he receives punishment; not so before God: unless man confesses, he receives punishment, but when he confesses, he receives remission, provided he confesses with the determination to forsake his sins. According to another Midrash, even Balaam knew of the insuperable power of repentance and confession when he said (Num. xxii. 34), "I have sinned." He knew that nothing may avert heavenly visitation except repentance, and that over one who has sinned and then says, "I have sinned," the messenger of retribution has no power (Tan., Balaḳ, 10). Hence, although Solomon declares, "Evil pursueth sinners" (Prov. xiii. 21); and Ezekiel (xviii. 4, 20) says, "The soul that sinneth, it shall die," rabbinical lore (with reference to Ps. xxv. 8 and Amos v. 4) teaches that God Himself says, "Let him repent and he shall be pardoned" (Yer. Mak. ii. 31d; Pesiḳ. xxv. 158b; compare Soṭah 7b; Sanh. 43b).



Jews Confessing Their Sins on the Day Before the Feast of Pentecost.

(From Bodenschatz, "Kirchliche Verfassung," 1748.)

Formula in the Talmud.

No formal confession is prescribed in the Scriptures; time and circumstances suggested the penitent's thoughts or utterances (compare "Yad," Tefillah, i. 1; Kesef Mishneh *ad loc.*). Post-Biblical literature, however, contains some formulas. Of these, that embodying the phrase "I have sinned, transgressed, and rebelled" חטאתי עויתי ופשעתי, seems to be the oldest, having formed part of the high priest's confession in the course of the Temple service on the Day of Atonement (Yoma iii. 8, iv. 2; Tosef., Yoma, ii. 1; Sifra, Aḥare, i. 2). It is based on similar expressions used in Biblical times (I Kings viii. 47; Ps. cvi. 6; Dan. ix. 5), and is considered the principal of all confessions (Sifra, *l.c.*; "Yad," Teshubah, i. 1; compare Pesiḳ. R. 35, 160b). A rabbi of the fourth century recommends the following to be recited on the eve of the Day of Atonement: "I confess all the wrong I have done before Thee. I have indeed stood on the way of evil; but as I have done I shall do no more. May it please Thee, O Lord my God! to forgive all my errors, to remit all my offenses, and to pardon all my transgressions" (Lev. R. iii. 3; compare Yer. Yoma viii. 45c). A formula somewhat older, used by some daily, and by others only on the Day of Atonement, is the following: "My God! Before I was formed I was worthless, and now that I am formed I am as if not formed: I am dust while I live; how much more so shall I be when dead. Behold, I am before Thee as a vessel full of shame and disgrace. May it be Thy will, O Lord my God and God of my fathers! that I shall sin no more, and what I have sinned before Thee blot out in Thy abundant mercy, but not through sufferings and serious diseases" (Ber. 17a; Yoma 87b).

Later Formulas.

The alphabetic confessions אשמנו ("We have incurred guilt"; see Ashamnu) and על חטא שחטאנו לפניך ("For the sin which we have committed before Thee") are first mentioned in the literary productions of geonim of the eighth century, the former by Simon Kahira ("Halakot Gedolot," ed. Berlin, 1888, "Hilkot Yom ha-Kippurim," missing in ed. Warsaw, 1874), the latter by Aḥai of Shabḥa ("She'iltot," clxvii.). The Talmud, however, explicitly says (Yoma 87b), "When one utters the simple expression, 'Verily we have sinned,' he need say no more"; and this is also the opinion of the casuists ("Hal. Gedol." *l.c.*; "Yad," Teshubah, ii. 8; Ṭur Oraḥ Ḥayyim, 607). One nearing death, or even when first taken ill, should be exhorted to make confession (Shab. 32a; Sanh. vi. 2, 43a *et seq.*), as were all those about to be executed for crime (see Atonement; Capital Punishment). If one is unable himself to frame a confession, he is prompted to say, "May my death prove an atonement for all my sins" (Sanh. *l.c.*).

E. C. S. M.

——In Hellenistic Literature and in the Liturgy: Ever since the return from the Exile (see Ezra ix.; Dan. ix. 4–20), confession of sins has formed an integral part of prayer, and verses selected from such passages as the penitential Psalms, xxxii., li., lxxxvi., were used in the liturgy. An example of elaborate confession of sins, composed in the second century B.C., is presented in the Apocrypha under the name of "The Prayer of Manasseh," and in all probability it formed originally a part of a Midrashic addition to II Chron. xxxiii. 19 (as may be learned from Apostolical Constitutions, ii. 22; see Didascalia). A characteristic feature of this confession is the reiteration of certain formulas: "I have sinned, O Lord; I have sinned"; "Forgive me, O Lord, forgive me." Another example of a confession of sin is contained in the prayer of Asenath, xii. (see Jew. Encyc. ii. 173):

> "I take refuge with Thee, Lord, my God, from now; to Thee I cry, O Lord, and before Thee I confess my sins. Spare me, O Lord, spare me! for I have greatly sinned; I have transgressed and done evil. I have spoken harsh words before Thee that should not be spoken. . . . I have sinned before Thee, O Lord; I have sinned, knowingly and unknowingly."

With these words Asenath begins her prayer while repenting of her idolatrous life, thus offering to proselytes an example of due preparation for admission into the Jewish fold. Confession of sins preceded baptism (Mark i. 5; compare Soṭah 12b) and was made the condition of admission into the Christian Church, as may be learned from Didache iv. 14, xiv. 1 (compare James v. 16).

The common formulas for confession of sins in the Christian Church being in the main exactly like those of the Synagogue, the conclusion is to be drawn that they go back to pre-Talmudic times. The words "Forgive, remit, pardon, O God, our offenses, voluntary and involuntary, committed knowingly or in ignorance, by transgression or through omission," in the closing prayer of propitiation in the liturgy of James (Hammond, "Eastern and Western Liturgies," p. 54), as well as the formula still found in the common prayer of the Episcopal Church: "We have left undone those things which we ought to have done; and we have done those things which we ought not to have done," are nearly identical with the closing words of the Atonement-Day confession: "O God of forgiveness, forgive us, pardon us, grant us remission . . . for the violation of mandatory and for the violation of prohibitive precepts, for sins known or unknown to us."

In the time of Rab and Samuel in Babylonia and R. Johanan in Palestine the confessions of sin in the Day of Atonement liturgy was fixed by tradition, as is proved by the fact that these amoraim of the beginning of the third century refer to the liturgical portions containing these confessions as familiar and known by their initial words (Yoma 87b). The quotation of the confession of sins in Pesiḳ. R. (ed. Friedmann, xxxv. 160b; see note) also shows that the whole portion of the "Widdui" was known and familiar to all, and was included in the Talmudical reference in Yoma, אבל אנחנו חטאנו. See Liturgy.

The alphabetical enumeration of sins in Ashamnu and 'Al Ḥeṭ may also be traced to pre-Talmudic times, as the catalogue of sins in Rom. i. 29, with its number of twenty-two, seems to be based upon an alphabetical confession of sins used in Paul's time (see J. Rendel Harris, "The Teaching of the Apostles," Baltimore, 1887, who refers to Shab. 55a: "They that observe the Law from Aleph to Taw").

The confession of sins is recited during bathing in preparation for the Day of Atonement, by the bridegroom before his wedding, and by the sick who prepares for the approaching end. For a still larger catalogue of sins, see "Kiẓẓur Shene Luḥot ha-Berit, Seder Widdui," pp. 126b, 127, Amsterdam, 1683. K.

CONFIRMATION, THE RITE OF: Solemn form of initiation of the Jewish youth into their ancestral faith. The rite is mentioned officially for the first time in an ordinance issued by the Jewish consistory of the kingdom of Westphalia at Cassel in 1810. There it was made the duty of the rabbi "to prepare the young for confirmation, and personally to conduct the ceremony."

Earliest Confirmations.

At first only boys were confirmed, on the Sabbath of their Bar Miẓwah, and the ceremony was performed at the home or in the schoolroom. In Berlin girls were confirmed for the first time in 1817, in Hamburg in 1818. The rite was at first rigidly excluded from the synagogue, because, like every innovation, it met with violent opposition. Gradually, however, it found more favor; classes were confirmed together, and confirmation became a solemn and impressive celebration at the synagogue. In 1822 the first class of boys and girls was confirmed by Dr. Kley at the Hamburg Temple, and in 1831 Rabbi Samuel Egers, one of the most prominent rabbis of his time and a man of unquestioned orthodoxy, began to confirm boys and girls regularly at the synagogue of Brunswick.

While in the beginning some Sabbath, frequently Sabbath Ḥanukkah or Passover, was selected for confirmation, it became more and more customary, following the example of Egers, to perform the ceremony at the synagogue on Shebu'ot, because this festival is peculiarly adapted for the rite. As it celebrated the occasion when the Israelites on Sinai, of their own free will, declared their intention to accept the obligation of God's Law, so those of every new generation should follow the ancient example and declare their willingness to be faithful to the religion transmitted by the Fathers.

Confirmation was introduced in Denmark as early as 1817, in Hamburg 1818, and in Hessen and Saxony in 1835. The Prussian government, which showed itself hostile to the Reform movement, prohibited it as late as 1836, as did Bavaria as late as 1838. It soon made its way, however, into all progressive congregations of Germany. In 1841 it was introduced in France, first in Bordeaux and Marseilles, then in Strasburg and Paris, under the name "initiation religieuse." The first Israelitish synod in 1869 at Leipsic adopted a report by Dr. Herxheimer on religious education, the thirteenth section of which contains an elaborate opinion on confirmation, recommending the same to all Jewish congregations.

In America the annual confirmation of boys and girls was first resolved upon by the congregation of Temple Emanu-El of New York on Oct. 11, 1847; and the first confirmation at that temple took place on Shebu'ot, 1848. A confirmation had been held two years before at the Anshe Chesed Synagogue of New York. The ceremony has since gained so firm a foothold in America that there is now no progressive Jewish congregation in which the annual confirmation on Shebu'ot is not a regular feature of congregational life and one of the most inspiring ceremonies of the whole year.

Objections to the Rite.

Grätz ("Gesch." xi. 374) blames Israel Jacobsohn for having introduced, among many other synagogue reforms, the confirmation of boys and girls, which, he says, "has no root in Judaism." In the opinion of reform Jews confirmation, like the organ and other innovations traceable to non-Jewish associations, lends an impressiveness to the initiation of the young into their ancestral religion which the bar mizwah institution had lost, owing to the unfamiliarity of the children with Hebrew. Besides, there was no provision for a solemn consecration of the Jewish maiden to her religious duties. Confirmation was the first step toward the official recognition of woman as a member of the Synagogue. While many Orthodox leaders object to confirmation on the ground that it has been borrowed from the Protestant Church, where also it is but a recent development and not at all characteristically or typically Christian (see "Confirmation," in Herzog-Hauck, "Real-Encyc."), or because it contradicts the principle that the Israelite is pledged by the covenant of Sinai by his birth (מושבע ועומד מהר סיני Shebu. 22b), there is nothing in the rite which is not thoroughly in harmony with the spirit of Judaism. It does not mean initiation into the faith, or admission into the Jewish community, but is a solemn declaration of the candidates, after having been sufficiently instructed in their duties as Jews, and being imbued with enthusiasm for their religion, to be resolved to live as Jews and Jewesses. For this purpose, after their religious sentiment has been awakened and strengthened, and their minds have been prepared for their becoming faithful members of the Jewish congregation, of society, and of the state, confirmation comes as the solemn graduation from the school of religious and ethical instruction, and is intended to consecrate the young to their duties as Jews. It appeals not only to those confirmed, but to the entire congregation, and thereby becomes for all a renewal of the Sinai covenant. In order to produce this lasting effect it is becoming customary to delay the rite until the sixteenth or seventeenth year.

In Harmony with Judaism.

Essential Features.

With the freedom and self-government universally prevailing in Jewish congregations, it is natural that the confirmation services should differ according to the subjective views and to the tastes of the rabbis. Thus some introduce a formal confession of faith, while others prefer a statement of principles. But the essential features are everywhere about the same, and may be stated as follows: The act is preceded by a public examination in the history, doctrines, and duties of the Jewish religion, held either in connection with the celebration or on some day during the preceding week. The sermon preached at the exercises refers to the importance of the epoch which the young people have reached, and closes with an impressive address to them. Thereupon follows a prayer, either a profession of faith or a statement of principles by members of the class, and in conclusion is invoked the blessing of the candidates by the rabbi. The rite is accompanied by impressive music.

CONFISCATION AND FORFEITURE.—

1. Confiscation: Appropriation of private property to the public use or treasury. Confiscation of the property of peaceable aliens in Palestine who belonged to a nation at war with Israel, is not mentioned in either Biblical or rabbinical literature. Biblical history, on the contrary, records instances where such people as chose to remain in Israel's midst were left unmolested in possession of their estates, paying only the usual tribute to the country (Josh. xvii. 13; Judges i. 28 *et seq.*). Nor is confiscation, in the sense of appropriation to the use of the state as a judicial punishment for the violation of law, known in the history of Israel's first commonwealth. The case of Ahab and Naboth (I Kings xxi.; see Ahab), which some cite in support of the contrary view (Michaelis, "Mosaisches Recht," i. 261; Mayer, "Rechte der Israeliten," i. 218, iii. 132), is not considered as a criterion in rabbinical law. Tradition asserts that Ahab was his victim's cousin, the son of the brother of Naboth's father; and in the absence of nearer agnates, he was Naboth's legal heir (Tosef., Sanh. iv. 6; Sanh. 48b). Such confiscation came into vogue in the early days of the second commonwealth, and was an importation from Persia. In the rescript which Artaxerxes gave to Ezra (Ezra vii. 12–26), and the authenticity of which is proved by E. Meyer ("Die Entstehung des Judenthums," pp. 60 *et seq.*), "confiscation of goods" is decreed as one of the punishments of those who failed to "do the law of . . . God and the law of the king." This decree was adopted by Ezra; and in a proclamation subsequently issued by him he threatened, "Whosoever would not come within three days, according to the counsel of the princes and the elders, all his substance should be forfeited" (Ezra x. 8).

There is, however, a controversy in the Talmud as to the right of confiscation of the property of executed criminals, and the decision is a compromise: "The property of criminals executed by order of the king [for treason] lapses to the king; but the property of those executed by a verdict of a regular court [for other crimes] descends to their legal heirs" (Tosef., *l.c.*; Sanh. *l.c.*; Maimonides, "Yad," Ebel, i. 9; see Capital Punishment). Private property may be seized for the personal needs and conveniences of the king, or for the advancement of public safety; but for all such property the state must remunerate the owner (Sifre, Deut. 161; Sanh. i. 4; B. Ḳ. 60b; "Yad," Melakim, iv. 3 *et seq.*). This royal prerogative was greatly abused by some kings, particularly in fulfilling literally Samuel's prediction (I Sam. viii. 14): "He will take your fields, and your vineyards, and your olive-yards, even the best of them, and give them to his servants" (compare *ib.* xxii. 7; Ezek. xlv. 7, 8; xlvi. 16–18), which probably suggested the comparatively late homiletic remark, "As soon as one is promoted to leadership in Israel he becomes rich" (Yoma 22b; Yalḳ., Sam. 119). Rabbinical law, therefore, restricts this right of confiscation to the actual needs of the king and his court and army (Sifre, Deut. 158 *et seq*, ; Sanh. ii. 4; "Yad," *l.c.*).

2. Forfeiture: A penalty for misconduct, crime, or breach of duty. Pentateuchal and rabbinical laws prescribe specified amounts as forfeitures for certain crimes or misdemeanors (Ex. xxi. 32; B. Ḳ. 43a; Deut. xxii. 19; Ket. 46a; Deut. xxii. 29; Ket. 33a). These will be found detailed under Damage, Fines and Forfeiture, or in the articles treating of the respective causes.

Among the purely rabbinical enactments, one prescribes the forfeiture of rights where, through them, injury may accrue to innocent parties. For example: Where a bond bears a date antecedent to the day of actual execution, its holder forfeits the right of levying on the debtor's property, if otherwise encumbered, even where that encumbrance dates posteriorly to the delivery of the bond (Sheb. x. 5; B. M. 72a; "Yad," Malveh, xxiii. 1; Ḥoshen Mishpaṭ, 43, 7). Also, where the amount denominated in a bond includes usury, and it can not be ascertained how much of that amount is principal, the creditor forfeits the principal as well as the usury (B. M. 72a; Yoreh De'ah, 161, 11; Ḥoshen Mishpaṭ, 52, 1). A forfeiture of ten gold pieces ("zehubim") is also prescribed for depriving a person of the privilege of discharging a religious duty, when that person is fit and willing to discharge the duty himself (B. Ḳ. 91b; "Yad," Ḥobel, vii. 14; Ḥoshen Mishpaṭ, 382, 1).

J. SR. S. M.

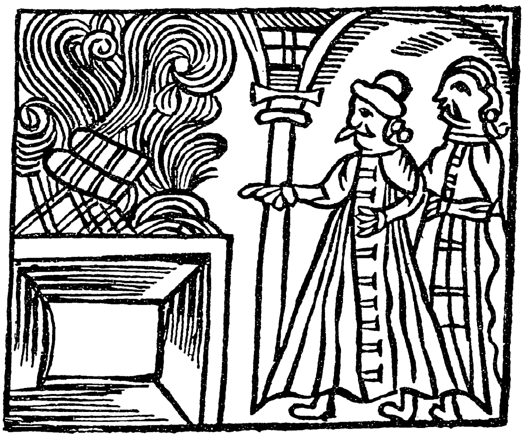
CONFISCATION OF HEBREW BOOKS: The first known decree directed against Hebrew literature is one of the emperor Justinian (553) forbidding the Jews to use "what is called by them 'The Second Edition'" (*Secunda Editio*, *δευτέρωσις*). Apparently this term was used to designate the Midrashic, traditional interpretation of the Scriptures. To what extent the decree was enforced is not known. Entirely unauthorized and without definite purpose was the action of the Crusaders six centuries later, when, in their march through Germany, they confiscated all the Hebrew books they could find in the various cities, and left behind them piles of burning Talmuds and prayer-books to mark their path.

In the thirteenth century France was the center of a series of deliberate attacks directed against Hebrew books. The typical order of procedure in nearly all such movements was as follows: the bringing of charges against the Talmud by a converted Jew; the issuing by the pope of a decree for its confiscation; the carrying out of the decree by the Inquisition; a disputation of the charges, including a defense of the work by the rabbis; finally, the condemnation and public destruction of the Talmud by burning. Very often other books were confiscated along with the Talmud.

Confiscation in France.

In 1232 Jewish scholars in France were divided into two hostile camps, consisting respectively of the followers and opponents of Moses ben Maimon's philosophy. Solomon ben Abraham of Montpellier was at the head of the latter—the Orthodox—party, and looked upon his opponents as heretics. In an evil moment he carried the quarrel outside the Jewish ranks, and invited the Dominican and Franciscan inquisitors, then busied with the enemies of the Catholic Church, to proceed against Jewish heretics also. In Provence his request met with an eager response; the papal cardinal-legate gave the command, and in Montpellier a house-to-house search was made for Maimonidean writings. All such as could be found were brought together, and in Dec., 1233, the first public official burning of Hebrew books took place.

This action on the part of Solomon ben Abraham led to results which he had not expected. The Inquisition did not long restrict its activity to the writings of Maimonides, and the Talmud itself soon became the object of attack. A little more than a month after the affair of Montpellier a public burning of Talmudic and other kindred works was held in Paris, at which 12,000 volumes were destroyed together. In 1239 the baptized Jew Nicholas (Donin) brought the charge against the Talmud that it insulted Christianity, and Pope Gregory IX. sent a general order on the subject to the temporal and ecclesiastical rulers in France, England, Castile, Aragon, and Portugal. He decreed that the Dominicans and Franciscans confiscate all copies of the Talmud, submit them to the heads of the two orders for examination, and, should the charges prove to be true, cause them to be destroyed (May, or June 1239). In Paris the decree met with a ready response from King Louis IX. and the Dominican Henry of Cologne. The Jews were forced, under threat of death, to surrender their books; and a commission was appointed to hear the defense of the rabbis. The Talmud was condemned to the flames; but a stay was secured and a second hearing accorded, in which R. Jehiel of Paris headed the defense. The Talmud was, however, again condemned (1240). Three years later the decree was carried out, under urging from the new pope, Innocent IV. A general confiscation took place throughout France, and on one day fourteen wagon-loads were brought into Paris. Later, six more wagon-loads were added, and all the books were publicly burned on June 17, 1244.



Polish Bishop Throwing Confiscated Hebrew Books into the Flames.

(From Jacob Emden's "Sefer Shimmush," 1762.)

From the Thirteenth to the Sixteenth Century.

Similar confiscations took place in Rome about the same time; again in Paris, four years later, under the cardinal-legate Odo; in Barcelona and Tarragona under Pope Clement IV., the Archbishop of Tarragona, and the apostate Pablo Christiano of Montpellier, King James of Aragon, though he had at one time ordered the confiscation of Naḥmanides' writings, showing himself now somewhat more liberally inclined; in Paris under Philip the Fair, in 1299, and again in 1309, when three wagon-loads of books were burned; in Toulouse, under the inquisitor Bernard Gui, aided by officials of King Louis in 1319. Before this last burning the books were carried through the streets of the city, while royal officers proclaimed publicly that their condemnation was due to the insults to Christianity which they contained. In 1320 the Archbishop of Bourges received orders from Pope John XXII. to confiscate all copies of the Talmud in his city. Finally, in Rome during the Feast of Weeks, 1322, occurred a confiscation and a burning of the Talmud, accompanied by robbery and murder on the part of the mob.

In the fifteenth century three confiscations were ordered: (1) of the Talmud in southern France, by Pope Alexander V., carried out by the inquisitor Pons Feugeyron, 1409; (2) of the Talmud and other "anti-Christian writings like the 'Marmar Jeshu,'" (Toledot Yeshu?) in Spain, by the anti-pope Benedict XIII., 1415 (never carried into effect, owing to the pope's deposition); (3) of all Hebrew books in Portugal, 1497.

One of the most important of anti-Talmud movements occurred in Germany at the opening of the sixteenth century. Two converts, the Dominicans Victor of Carben and Johann Pfefferkorn, brought the customary charges against the Talmud, whereupon King Maximilian in 1509 authorized the confiscation of Hebrew books throughout Germany, and the destruction of such as contained anything contrary to the teachings of the Bible or of Christianity. In Frankfort, Worms, Lorch, Bingen, Laufen, Mayence, and Deutz such confiscations were held: that in Frankfort taking place on Sept. 28, when all books found in the synagogue were seized. A house-to-house search was to have been made on the following day; but the archbishop Uriel of Gemmingen forbade this, and together with several other Christians who showed themselves friends to Jewish literature, succeeded in inducing the emperor to order the return of the books to their owners. Later, this order was revoked; 1,500 books and manuscripts were again seized in Frankfort (April 11, 1510). The question in general was then submitted to the scholars of Germany for decision, and men like Reuchlin gave their answer in favor of the Talmud and kindred works, though naturally against Lipman's anti-Christian writings and the "Toledot Yeshu" (History of the Birth of Jesus of Nazareth)—works condemned by the Jews themselves. The weight of opinion, including that of all the large universities except Heidelberg, was against the Talmud, however; and Reuchlin was charged with heresy. After further vacillation on the part of the authorities, Reuchlin's case was carried to Rome, and finally decided against him; but the Talmud question seems to have been dropped for a while.

Action of the Inquisition.

The question was reopened in Italy in 1553 by Cardinal Caraffa, leader of the Italian Inquisition, and from this time on down to the nineteenth century the attacks on Hebrew books continued almost without interruption. The usual apostate charges preceded the confiscation orders issued by Pope Julius III. in 1553, and were eagerly carried out by the inquisitor-general. In Rome the "familiars," dread servants of the Holy Office, forced their way into synagogues and homes, and returned laden with booty to their superiors. A defense was allowed the rabbis, a formality the uselessness of which history had already made evident. On an appointed day all the copies of the Talmud were carried to the Campo di Fiori, and once again, as the flames arose, Rome rang with mingled shouts of glee and cries of anguish (Sept., 1553). And not Rome alone; for the Inquisition's decree had reached all places where the Catholic Church was supreme. Barcelona obeyed first; then Venice, where the apostate Eleazar ben Raphael wished to include many other books in the condemnation, and a commission finally decided partially in his favor. On a Sabbath the sentence was carried out, and Judah Lerma has narrated that he alone lost 1,500 volumes. Romagna, Urbino, and Pesaro held burnings before the end of the year; and early in 1554 books were burned by hundreds of thousands in Ancona, Ferrara, Mantua, Padua, Candia (an island belonging to Venice), and Ravenna.

In the catalogue of prohibited books ("Index Librorum Prohibitorum") published in 1554 by order of the pope, in Milan and Venice, the "Talmuth" appeared in the list for the first time, and thereafter was prohibited by the indexes published in various parts of the Catholic world, with the modifications, on two occasions, mentioned in the article CENSORSHIP. In 1557 the baptized Jew Andrea del Monte directed another confiscation in Rome, sparing not even the prayer-books; and in the following year the inquisitor-general Cardinal Ghislieri ordered still another. In Milan the Spanish general Gonzalo Fernandez de Cordua, after resisting the Inquisition for some time, finally agreed that the Talmud should be burned, and ordered his Spanish soldiers to aid in the work. Other books were not spared, however, and between 10,000 and 12,000 volumes formed a pyre over which Sextus Sinensis presided in April or May, 1559. Other confiscations took place in Cremona and Lodi (July, 1566); Romagna and Bologna (1567); Vercelli, in Piedmont-Savoy (1592); Avignon and neighborhood (1593); Pavia and Lodi (1597); and Rome (1601). In Cremona and Lodi, however, the books were later returned by order of the Senate of Milan

In the Seventeenth and Eighteenth Centuries.

Meanwhile Prague had become the scene of violent anti-Talmud movements. As early as 1560 a confiscation, including even the prayer-books, had taken place under the Dominicans, but the emperor Ferdinand, when appealed to, had ordered the return of the books. Toward the end of the century the movement was carried on even more energetically by the Jesuits, and on Dec. 7, 1693, the Jesuit Father Wolfgang Preissler, charging that the Talmud and kindred works were dangerous to civil and religious authority, secured permission for a confiscation. A search through the Jewish schoolhouse and the synagogues resulted in the discovery of more than 200 works. The movement then spread to other parts, and after the customary charges against the Talmud, a confiscation took place in Friedeberg (Neumark), but King Frederick I. ordered the return of the books seized.

Fürth, in Bavaria, was the scene of the next confiscation. A certain Mordecai (Marx) ben Moses, who had embraced Christianity, assuming the name "Philip Ernst Christfels," brought charges of blasphemy against Jewish prayer-books (1702). In company with several others he visited some of the Jewish houses in Fürth, and seized eighteen books. Most of these were prayer-books of various editions, but among them were also the Yoreh De'ah and two commentaries to the Earlier Prophets (Abravanel's and the "Leb Aharon"). Christfels made a list of the so-called blasphemous words contained in these works, and this was used at the sittings (March 27–April 4, 1702) of an inquisition appointed by the margrave Georg Friedrich of Brandenburg-Onolzbach to examine into the charges. The head of the commission was Rudolf Martin Meelführer, who took during the trial a position in regard to Hebrew literature very similar to that which Reuchlin had taken; and the commission was discharged without having accomplished anything. A similar result followed in 1712, when the matter was reopened in connection with charges of blasphemy brought against a certain Elkan Fränkel. Meelführer, however, fell into disfavor this time at the court of Georg Friedrich's successor, Wilhelm Friedrich, and was charged with having had a secret understanding with Fränkel in bringing about the discharge of the former commission. About this same time another series of house-to-house searches was instituted in the city of Prague by a permanent Inquisition commission of Dominicans which had been established there. Certain books were found in the homes of forty-two families and were seized (1711). Still another search took place twelve years later under the Jesuit Franz Haselbauer.

During the next thirty years a series of confiscations occurred in Italy. The first took place in Ancona in 1728, though the books seized were afterward returned. In 1731 the Dominican Giovanni Antonio Costanzi directed searches in all the Jewish quarters throughout the Papal States; these searches were repeated in 1738, 1748, and finally in 1753, the last by order of Benedict XIV., who had learned that books were being smuggled into the ghettos in rolls of cloth and by means of other subterfuges. In Rome, on a night in April, after the ghetto gates had been closed, officials entered houses previously marked as suspicious. Outside, at stated distances on the streets, wagons and carts were stationed under escort. As the books were taken from each house they were placed in one of the sacks with which each searching party had been provided, the sack was sealed in the presence of two Christian witnesses, and a tag bearing the owner's name was attached. The books were then conveyed to an appointed official; and in this way thirty-eight carts were filled from the ghetto of Rome alone. Similar confiscations took place in Lugo (Ravenna), Pesaro, Ferrara, Urbino, Ancona, Sinigaglia; and the next year in Avignon, Carpentras, Cavaillon, and Lille.

Trouble arose next in Poland, consequent on the Frankist disturbances in 1757. The charge was made that as a result of Talmudical teachings Jews were accustomed to use the blood of Christian children in their ceremonies. All books except the Bible and the Zohar were confiscated, and about 1,000 copies were thrown into a ditch and burned. The search was then continued, and repeated in Lemberg, but after the leader of the Frankists had been convicted of intrigue and deception the whole movement was allowed to lapse in Poland; and though severe edicts were yet to be issued in Italy (1775 and 1793) the Napoleonic era brought to a general close the history of measures directed against Hebrew books.

CONFLICT OF LAWS: A disagreement between the laws of two states with reference to litigation affecting private rights claimed to be subject to their jurisdiction.

The Mosaic law recognizes no distinction between a native and a foreigner (Ex. xii. 49; Num. xv. 15, 16). In questions of ritual and religious practises the Talmudic principle enjoins obedience to local custom. One who comes from Palestine, where the second day of the holidays is not observed, to a land where it is observed, must follow the custom of the country wherein he has settled. If, however, his intention is to return to his former abode in a short time, he must follow the more rigorous observance of either place (Pes. 50a; Maimonides, "Yad," Shebitot Yomṭob, viii. 20; Shulḥan 'Aruk, Oraḥ Ḥayyim, 468, 3, 4, and 496, 3).

Criminal Cases.

In criminal cases the Jewish law has practically abdicated its authority in favor of the law of the land. Forty years before the destruction of the Second Temple, the Sanhedrin in Jerusalem adjourned; and since then the Jewish courts have had no jurisdiction in cases involving capital punishment ('Ab. Zarah 8b; Sanh. 41a, 52b; "Yad," Sanh. xiv. 11, 13). Nor are cases involving pecuniary penalties adjudicated upon by Jewish courts. Only such cases as occur frequently and involve actual loss to one of the parties may now be judged by Jewish courts; but in matters involving no actual loss, as the double payment for theft, or in matters that are not of frequent occurrence, as when one animal injures another, the rabbis of the present day can exercise no authority (B. Ḳ. 84b; Maimonides, *l.c.* v. 8 *et seq.*; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 1 *et seq.*).

In civil cases the following rules were established by the Rabbis.

1. In suits between two Israelites the law of the place where the contract was made governs, or, if the place is not mentioned in the contract, the law of the place where the case is tried rules (B. M. 83a; Ket. 110b; "Yad," Ishut, xxiii. 12; Ḥoshen Mishpaṭ, 42, 14, 15; Eben ha-'Ezer, 117, 19, Isserles' gloss).

2. In suits between non-Jews the law of the land or the Jewish law—to whichever the parties submit themselves—governs ("Yad," Melakim, x. 12).

3. In matters between a Jew and a non-Jew the suit is decided according to the law of the land or according to the Jewish law, that system being chosen which favors the Jew. In each case, however, the non-Jew should be informed by what system he was judged (B. Ḳ. 113a; Maimonides, *ib.*). If the non-Jew observes the general laws of morality and religion ("ger toshab," Lev. xxv. 35, and elsewhere), the law of the land must govern (Maimonides, *ib.*). A non-Jew who sells a promissory note to a Jew can not afterward absolve the debtor, although the Jewish law permits it; for the law of the land governs. If a Jew sells a promissory note to a non-Jew, it is as if he sold it to a Jew; and the Jewish law holds sway (Ḥoshen Mishpaṭ, lxvi. 25). See Assignment.

4. Documents of purchase and sale, or promissory notes, prepared in non-Jewish courts and signed by non-Jews, are valid. Documents of gift or of the admission of a debt, where actual delivery of money did not accompany the act, are not valid (Giṭ. 10b; "Yad," Malweh, xxvii. 1; Ḥoshen Mishpaṭ, 68, 1).

Civil Cases.

Where there is a decree of the government ordering the record of all negotiations, all documents prepared in non-Jewish courts are valid (Ḥoshen Mishpaṭ, *l.c.*, Isserles' gloss).

5. It is forbidden by Jewish law to litigate a suit between two Israelites before a non-Jewish court, even when both parties desire it (Giṭ. 88b; "Yad," Sanh. xxvi. 7; Ḥoshen Mishpaṭ, xxvi. 1). If one of the parties refuses to appear before a Jewish court, the other must first summon him through the Jewish court; and if he does not heed the summons, permission will be granted to him to sue the defendant before a non-Jewish court (Maimonides *ib.*; Ḥoshen Mishpaṭ, *ib.*).

6. Referring to the Persian law, the amora Samuel said: דינא דמלכותא דינא ("the law of the land is the law," Giṭ. 10b; B. Ḳ. 113a). This dictum is particularly applied to cases between Jews and non-Jews. Although according to the Jewish law three years' uninterrupted possession of real estate ("Ḥazaḳah") establishes one's right to land, in Persia, where forty years of uninterrupted possession was necessary, the same law held good also for the Jews of that land (B. B. 55a; see Rashbam's commentary). This principle has been accepted as valid by all well-regulated governments in cases of taxes or of other regulations made for the welfare of the community ("Yad," Gezelah we-Abedah, v. 11-18; Ḥoshen Mishpaṭ, 369, 6-11). Where, however, the case does not affect the community, and the government derives no special benefit from it—where the law of the land is that the husband does not inherit from his wife—the Jewish law predominates; and the wife's relatives have no claim on her property, if she dies during the life of her husband (Ḥoshen Mishpaṭ, *l.c.*, Isserles' gloss; see "Pitḥe Teshubah" *ad loc.* § 3, and to 248, § 2; "Ḥatham Sofer, Ḥoshen Mishpaṭ," 172). Of course, this could be the case only in those countries where Jewish autonomy is recognized in cases of inheritance. It is not the case in England, America, or western European states, for example.

The tendency of the Talmud and of the later codes is generally toward submission to the law of the land in all civil cases, when such law is humane and the Jews are allowed an equal hearing in the courts with non-Jews. The fact that now the Jewish court has almost entirely lost its power, and the Rabbis, even those of the most Orthodox wing, raise no objection against those who resort to non-Jewish courts, upon whom Maimonides and his followers have pronounced the ban of excommunication (see Midr. Tan., Mishpaṭim, 10; "Yad," Sanh. xxvi. 7), proves that this is the tendency in the progress of the Jewish law. In civil cases, therefore, the law of the land, even when in conflict with the Jewish law, is now tacitly recognized by all as binding.

The question was frequently raised whether marriage and divorce are religious acts, and must, therefore, be in accordance with Jewish law and custom; or whether they may also be included under civil laws generally and be governed by the laws of the state; or whether they are partly religious and partly civil in their character. This question was discussed in periodicals and in books and at the different conferences of rabbis held during the nineteenth century; but no uniform law has as yet been established in regard to it.

Marriage Laws.

The Assembly of Notables, convened by Napoleon I. in 1806 in Paris, among other matters brought before it, had to answer the question as to the relation between the civil and the Jewish law in matters pertaining to marriage and divorce. The following resolutions were adopted, and were later (1807) confirmed by the Sanhedrin, two-thirds of which consisted of rabbis and one-third of laymen: "That intermarriages between Jews and Christians were to be considered binding, and, although they were not attended by any religious forms, yet no religious interdict could be passed upon them; . . . that divorce by the Jewish law was effective only when preceded by that of the civil authorities; that marriage likewise must be considered a civil contract first" (Graetz, "Hist. of the Jews," American ed., v. 497).

The rabbinical conference held in Brunswick, Germany, in 1844, resolved "that the intermarriage of Jews and Christians, and, in general, the intermarriage of Jews with adherents of any of the monotheistic religions, is not forbidden, provided that the parents are permitted by the law of the state to bring up in the Jewish faith the offspring of such marriage." This resolution entirely abandons the Talmudic standpoint; and when it was brought up for ratification before the second rabbinical convention at Augsburg, even Aub and Geiger, the most pronounced advocates of Reform present at that convention, agreed to have it tabled.

The second Israelitish synod, held at Augsburg in 1871, passed the following resolution concerning civil marriages: "Civil marriage has, according to the view of Judaism, perfect validity or sanction; provided that the Mosaic law of prohibited degrees (*e.g.*, marriage between aunt and nephew) is not violated. The religious solemnization, however, is required as a consecration befitting the dignity of marriage."

The question of the dissolution of marriage by the death of the husband, which has been dealt with so minutely by the Rabbis (see 'Agunah), especially where evidence was necessary to establish the identity of the deceased, has also been acted upon by modern conferences. The rabbinical conference held at Philadelphia in 1869 and the Augsburg synod of 1871 passed resolutions to the effect that "the final decision of the courts concerning the identity of a dead person, and a judicial decision declaring a lost person to be dead, have also sanction for ritual cases."

Divorce Laws.

In cases of divorce the question assumes a still more serious aspect; and the discussions for the last century on this subject have grown very bitter. Although the Jewish authorities readily submitted to the non-Jewish courts questions affecting civil rights and contracts, they refused to recognize their authority in matters of divorce (Giṭ. 88b). In the seventh century of the common era, when Jewish women sought to obtain bills of divorce from their husbands in the Mohammedan courts, the geonim Hunai and Mar-Raba introduced many reforms into the Jewish laws of divorce so as to prevent such action on the part of the Jews by making these appeals unnecessary (Graetz, *l.c.* iii. 92).

In more modern times, when the autonomy of the Jewish courts was entirely abolished in most of the European countries, the question assumed greater importance, and was discussed more minutely by rabbis. In most civilized countries—even where the rabbis have the right to perform marriage ceremonies, and the state would recognize their act as valid—they have no authority to enforce a dissolution of marriage when it is required by Jewish law, or to conduct the ceremony of a ritual Geṭ or Bill of Divorce, so long as the marriage has not been duly dissolved by the competent courts of the country. The tendency, therefore, of the modern Reform rabbis is to look upon divorce as a civil act, and thus to submit entirely to the laws of the country; the ritual geṭ is thus considered superfluous. While the German rabbis, in their various conventions, did not pass any definite resolutions concerning this matter, the American rabbis in the Philadelphia conference of 1869 passed the following resolution:

> "The dissolution of marriage is, on Mosaic and rabbinical grounds, a civil act only, which never received religious consecration. It is to be recognized, therefore, as an act emanating altogether from the judicial authorities of the state. The so-called ritual geṭ is in all cases declared null and void. The dissolution of marriage, pronounced by a civil court, is also fully valid in the eyes of Judaism, if it can be ascertained from the judicial documents that both parties consented to the divorce. Where, however, the court issues a decree against one or the other party, by constraint, Judaism recognizes the validity of the divorce only when the cause assigned is sufficient in conformity with the spirit of the Jewish religion. It is recommended, however, that the officiating rabbi, in rendering a decision, obtain the concurrence of competent colleagues."

By this resolution the Jewish law of divorce is entirely abrogated, and the law of the land takes precedence.

The great majority of Jews, however, have not accepted these regulations, and still cling to the enactments of the Shulḥan 'Aruk. In cases of marriage and divorce, they still endeavor to maintain the autonomy of the Jewish law; and no conservative rabbi will sanction the second marriage of a woman who has obtained her divorce through a non-Jewish court, unless she has also obtained a ritual geṭ. In order not to come into conflict with the civil authorities of the state, many rabbis are careful not to grant a geṭ unless the courts of the land have previously sanctioned a dissolution of the marriage.

CONFLICT OF OPINION (Hebrew, **Maḥloḳet**; Aramaic, **Pelugta**): Rarely did an opinion expressed by one of the rabbis of the Talmud pass unchallenged. In questions involving logical reasoning, or the interpretation of some Biblical passage, or an opinion of an earlier authority, there were conflicts of opinion among the teachers of the Talmud. The conflicting opinions were usually represented by different schools; for example, those of Shammai and Hillel, Rab and Samuel, Abaye and Raba. In fact, most of the rabbis of the Talmud, from the earliest tannaim to the latest amoraim, can be grouped into antagonistic couples, one in opposition to the other.

Just as a tanna could not express an opinion which was in conflict with a Biblical passage, so an amora could not contradict a Mishnah or a generally accepted Baraita, unless he was able to produce another Mishnah or Baraita to support his view. Nor could an amora express an opinion which was in conflict with an accepted decision or principle expressed by an earlier leading amora (Beẓah 9a, and Rashi *ad loc.*). Otherwise, every rabbi had a right to his opinion, even though it conflicted with the opinion of the greatest of his contemporaries (B. Ḳ. 43b).

Rules of Decision.

Scattered throughout the Talmud there are various rules by which the Rabbis were guided in deciding cases of conflicting opinions. When the opinion of an individual conflicted with that of the majority, the opinion of the majority prevailed (Ber. 9a *et al.*). If one Mishnah records a conflict of opinion between two tannaim, and a subsequent Mishnah in the same book records the opinion of only one without mentioning any name (Setam), the opinion expressed in the latter Mishnah is to be followed (Yeb. 42b). In laws concerning mourning, the more lenient opinion is usually observed (M. Ḳ. 18a). With a few exceptions, an opinion expressed by the school of Hillel prevails against an opinion by the school of Shammai ('Er. 13b). Because Eliezer ben Hyrcanus was under the ban (B. M. 59b; Shab. 130b), decisions were not, except in a few instances, rendered in accordance with his opinions. Decisions are always in accordance with the opinions of Simeon ben Gamaliel, except in three cases (Giṭ. 38a), and of Rabbi (Judah the Patriarch), when in conflict with any other tanna. In questions involving logical reasoning, the decision is never rendered in accordance with the opinion of R. Meïr when in conflict with the opinions of his colleagues, because his reasoning was too subtle ('Er. 13b; compare Ket. 57a).

In conflicts of opinion between amoraim the following rules were employed. In matters of civil law the opinion of Rab prevails against the opinion of Samuel; in religious laws the reverse is the case (Bek. 49b). The same rule applies to conflicts of opinion between Rab Naḥman and Rab Sheshet. With the exception of six cases, decisions are always in accordance with the opinion of Raba when in conflict with Abaye (B. M. 22b). The opinion of Rabbah generally prevails against that of Rab Judah or Rab Joseph (Giṭ. 74b). In rabbinical institutions the more lenient opinion is followed (Yer. Giṭ. i. 2). In a conflict between earlier and later authorities (those coming after the period of Abaye and Raba) the opinion of the later takes precedence (see Asheri to Sanh. iv. 6; compare B. B. 142b).

These rules were followed by the various codifiers of the Jewish law. Although the law is now fixed in the codes of Maimonides and Caro, many of these rules have still their application, especially the one last mentioned, for it is considered that the later rabbis, who knew of the opinions advanced by their predecessors, were in a better position to decide correctly (compare AḤARONIM; AMORA; AUTHORITY; LAWS, CODIFICATION OF.

L. G. J. H. G.

CONFLICT OF PASSAGES. See HERMENEUTICS.

CONFORTE or **CONFORTI, DAVID:** Hebrew literary historian; born in Salonica about 1618; died about 1685. Conforte came of a family of scholars. His early instructors were R. Israel Ẓebi, R. Judah Girasi, and R. Baruch Angel. As a young man he studied the Cabala under R. Jefeth the Egyptian, and philosophy under R. Levi Pasriel. His chief teachers, however, were Mordecai Kalai and Daniel Estroza. Conforte married a granddaughter of Menahem de Lonsano. He journeyed twice to Palestine, once in 1644, alone, and a second time in 1652, when, together with his family, he settled in Jerusalem, founding there a bet ha-midrash. In 1671, however, he was in Egypt, where he occupied the position of dayyan. He is also known to have been in Smyrna.

His chief work is a literary chronicle now known by the title "Ḳore ha-Dorot," which contains the names of all the teachers and writers from the close of the Talmud up to his own day. This chronicle is divided into three parts, the first two of which, referring to the time before the expulsion of the Jews from Spain in 1492, are very short. The third part is divided into eleven generations, and is not systematically arranged. Conforte used all the earlier historical works, such as Abraham ibn Daud's "Sefer ha-Ḳabbalah," Zacuto's "Yuḥasin," and Yaḥyah's "Shalshelet ha-Ḳabbalah," especially the first mentioned, from which he cites whole passages. He also gathered material from various printed and manuscript responsa, and was the first to collect the names mentioned in these works. His chronicle is valuable for the literary history of the Jews in the sixteenth and seventeenth centuries, especially in Turkey, Italy, Africa, and the near East. Probably it was composed in Egypt, about the year 1683, if Cassel's conjecture be correct. Conforte was a mere compiler, and at times his data are contradictory. The original manuscript was brought from Egypt by R. David Ashkenazi of Jerusalem, who, to judge from a note in his preface, gave it the title "Ḳore ha-Dorot," and had it printed in Venice in

1746, without mentioning the name of the author. This poor edition has been critically reedited, and supplied with notes and index, by David Cassel (Berlin, 1846), who follows the pagination of the first edition. Conforte also wrote a volume of responsa, of the fate of which, however, nothing is known.

Gabriel Confoto, a Turkish Talmudist who is mentioned in the responsa literature of the seventeenth century, was probably a son of David Conforte.

G.

CONGREGATION: 1. An assembly convoked for a certain time and purpose (קהל = *ἐκκλησία*, I Kings viii. 65; Joel ii. 16; Ps. xl. 10. For מקהלים and מקהלות in Ps. xxvi. 12, lxviii. 26, "assemblies" would be more correct than "congregations" [A.V.]; and מועדיך in Ps. lxxiv. 4 should be rendered "synagogues," not "congregations," as in A. V.).

2. A single community (עדה = *συναγωγή*, Num. xxxv. 23 *et seq.*).

3. The whole body of Israel, called קהל יי ("the congregation of the Lord," Deut. xxiii. 1 *et seq.*; R.V. "assembly" is incorrect); עדת יי, Num. xxvii. 17; עדת ישראל = "the congregation of Israel," Ex. xii. 3; עדת בני ישראל = "the congregation of the children of Israel, Ex. xvi. 1; קהל עדת ישראל = "the assembly of the congregation of Israel," Ex. xii. 6 and Num. xiv. 5; or simply הקהל and העדה used indifferently, Lev. iv. 13 *et seq.*; Prov. v. 14, where עדה is preferably translated by LXX. *συναγωγή*, and קהל, *ἐκκλησία*. To this must be added קהלת יעקב = "the congregation of Jacob," Deut. xxxiii. 4 (R. V. "assembly"; LXX. *συναγωγαῖς*, plural; so also Ecclus. [Sirach] xxiv. 23).

From the Apocryphal and other Hellenistic writings (see Ecclus. xxiv. 2, xliv. 15, l. 13 *et seq.*; I Macc. ii. 56, iii. 13, etc.), and the inscriptions in Schürer ("Gesch. des Jüdischen Volkes," ii. 432 *et seq.*, iii. 40–46), it appears that "synagogue" = *συναγωγή* was the name, corresponding to כנסת, Aramean כנישתא, given to the Jewish congregation as a community, as well as to the place of worship; while the name *ἐκκλησία* (*τοῦ Θεοῦ*, or *Κυρίου* = "assembly of the Lord"; hence *κυριακή* [*οἰκία*] = "church") was chosen to designate the assembly of worshipers.

It was owing to the influence of Paul that *ἐκκλησία* (= "church") became the distinctive name of the Christian communities, while "synagogue" became that of the Jewish congregation, and for some time, also, of the Judæo-Christian congregations (compare Schürer, *l.c.*). See Community, Organization of; Minyan; Synagogue.

K.

CONGRESS OF JEWISH WOMEN: One of the denominational congresses of the World's Parliament of Religions, held at the Columbian Exposition in Chicago, Ill., 1893. It was the first delegate body of Jewish women ever called together. There were present 93 delegates from 29 cities of the United States. The congress was organized by (Mrs. Henry) Hannah G. Solomon, chairman, assisted by Miss Sadie American, secretary, and a committee of 25 other Chicago women. Its sessions were held Sept. 4–7, inclusive. Papers were presented setting forth the work and thought of Jewish women in philanthropy and religion. At the final session a resolution was adopted calling for the formation of a permanent organization of Jewish women, to be called the "National Council of Jewish Women" (see Council of Jewish Women). As a souvenir of the congress, there was issued a "Collection of Traditional Jewish Melodies," arranged and edited by the cantors William Sparger of New York and Alois Kaiser of Baltimore, with an introduction by Dr. Cyrus Adler of Washington.

Bibliography: *Papers of the Jewish Women's Congress* (Jewish Publication Society of America), 1894.

A. S. A.

CONIGLIANI, CARLO: Italian jurist and political economist; born at Modena June 25, 1868; died there Dec. 6, 1901. After studying law at Modena, receiving the degree of doctor of laws in 1889, he was sent by the government to Padua and London for further study. On his return to Modena he became lecturer at the university, being made instructor in finance in 1892. In 1898 he was appointed assistant professor on the faculty of law. He died suddenly on the same day on which he had been named for the full professorship. Conigliani was an earnest student of economics, being attracted especially to the problem of the effect of duties and taxes on the masses. When Minister Wollemborg was planning in 1901 a thorough reform of taxation, with the object of relieving the poorer classes, he called Conigliani into the ministry of finance as scientific adviser, to help him in elaborating his measures. Conigliani was also interested in Jewish communal affairs, and was for a long time a member of the governing board of the Jewish community of Modena.

During the last years of his short life he was the enthusiastic leader of the Zionists in Italy. He founded in 1901 "L'Idea Sionista" for the expression of their views, and acted as its editor until his death.

His works include: "Teoria degli Effetti Economici delle Imposte," Milan, 1890; "Un Nuovo Sistema di Tariffe Ferroviarie," Florence, 1890; "Le Basi Subbiettive dello Scambio," Padua, 1890; "Le Dottrine Monetarie in Francia nel Medio Evo" Modena, 1892; "I Pronostici del Futuro Sociale" and "Per l'Imposta Proggessiva," Turin, 1896; "La Riforma delle Leggi sui Tributi Locali, Studi e Proposte," Modena, 1898; "Ueber das Hausiergewerbe in Italien" (with Ugo Rabbeno); "Gladstone e la Finanza Inglese," Turin, 1898; and many shorter articles contributed to "Riforma Sociale," "Critica Sociale," "Rivista Popolare," and "Giornale degli Economisti."

CONITZ. See Konitz.

CONJUGATION. See Verb.

CONJUNCTIVE. See Accents in Hebrew.

CONNECTICUT: One of the six New England States, and one of the thirteen original states of the

Union. The first mention of a Jew in Connecticut is apparently that of a certain "David the Jew" in the Colonial Records, under date of Nov. 9, 1659 (i. 343); the records further show that a Jacob Lucena was fined £20 in 1670, probably for Sabbath-breaking, since the court, "considering he was a Jew," reduced his fine to £10, and later, upon petition of Asser Levy, to £5 (Hühner, in "Pub. Am. Jew. Hist. Soc." No. 8, pp. 21 *et seq.*).

In a short history of the New Haven congregation, deposited in the corner-stone of the new temple, and published in the local press of March, 1896, it is stated that about six Jewish families settled in New Haven as early as 1770. According to the recently (1901) published diary of Ezra Stiles, this statement is inaccurate. Stiles was born in New Haven in 1727, continuing his residence there till his removal to Newport in 1755. In an account of his visit to New Haven in 1772 he makes this assertion: "The summer past a family of Jews settled here, the first real Jews (except the two brothers Pintos, who renounced Judaism and all religion) that settled in New Haven." He adds that they were "10 or 8 Souls Jews, with six or 8 Negroes. Last Saturday they kept holy . . . the Family were worshipping by themselves in a Room in which were Lights and a suspended Lamp. This is the first Jewish Worship in New Haven" ("Diary of Ezra Stiles," i. 283). It is quite probable that of the Jews who came to Connecticut up to the year 1840 the greater number left the state, the others amalgamating with the families of other faiths. There are a few Christian families of Connecticut—notably those of an ex-president of Yale College, a former governor of the state, and an ex-minister to Russia—that trace their lineage to these early settlers, claiming relationship with Ralph Isaacs.

Considerable interest attaches to the brothers Pinto. They were doubtless the first Jewish settlers of Connecticut. A building known as the "Pinto Place," in State street near the railroad bridge in New Haven, is still in existence (see Pinto). In the "Roll of the Citizens of New Haven, Feb. 5, 1784, at their first incorporation," are found the names of the Pinto brothers—Jacob and Solomon. The latter was a student at Yale College, graduating there in 1777. He took part in the defense of New Haven against the British July 5 and 6, 1779, and was taken prisoner in that engagement ("Diary of Ezra Stiles," ii.).

New Haven.

New Haven is the most important city of Connecticut, having a population of 108,027 (1900). The number of its Jewish inhabitants is about 5,500. All records having been destroyed by fire, there exist no available data regarding the Jewish congregations of New Haven. The first synagogue, Mishkan Israel, had its origin between 1840 and 1843, as in the latter year a parcel of land in Westville (1¼ acres) was purchased for $50 for a cemetery. The first congregation consisted of twenty Bavarian families, among which were the Adlers, Bretzfelders, Lehmans, Lauterbachs, Milanders, Ullmans, Watermans, and Rothschilds. Milander was the first reader of the synagogue. The congregation worshiped from time to time in the Armstrong Building (at the corner of Fleet street and Custom House square), in the Brewster Building (at the corner of State and Chapel streets), and in Todd's Hall (in State street, near Court street), Meininger, Sternheimer, and Samuel Zunder being the successive readers. In 1854, by the will of Judah Touro, the congregation came into possession of $5,000, which enabled it to purchase the property of the Third Congregational Church in Court street. The new synagogue was dedicated in the following year, the Rev. B. E. Jacobs being minister. In 1855 a mere handful of people formed an Orthodox congregation, under the name "B'nai Sholom." They worshiped from time to time in West Water street, William street, and in Olive street; their present synagogue was built in 1894.

During 1862–64 the Court street congregation introduced a choir and an organ in the services, under the direction of Morris Steinert the Rev. Jonas Gabriel being minister. In 1873 the "Minhag America" was adopted as the ritual, and the first Sabbath-school established, with the Rev. Judah Wechsler as minister. He was succeeded in 1878 by the Rev. Dr. Kleeberg. Regular weekly sermons in German were introduced, the temple was enlarged, and a new organ installed. In 1893 Rabbi David Levy was elected minister. Various changes were made in the ritual, the sermon and a large part of the services being given in English, and the congregation decided to move to a more convenient quarter of the city. In 1896 the corner-stone of the new temple at Orange and Audubon streets was laid, and in March of the following year the new structure was dedicated. Since the Russian and Rumanian immigration there have been established a number of other congregations, among which are Bnai Israel, Bikur Cholim, Bnay Abraham, B'nai Jacob, and Shewath Achim, each having a large membership and being in a thriving condition. Daily religious schools are connected with these congregations.

While the Jewish community of New Haven consists mainly of merchants with large business and manufacturing establishments, it has had distinguished representatives in the legal and medical professions also. Some have been specially prominent, as Max Adler, president of the chamber of commerce; I. M. Ullman, officer on the staff of the governor; Morris Spier, commissioner of charities; Isaac Wolf, member of the legislature; H. W. Asher, president of the board of education; and J. B. Ullman, assistant corporation counsel. A considerable number have held important positions as teachers in the public schools. Maier Zunder (d. 1901) was for twenty years a member of the board of education. In recognition of his services in the cause of public-school education, a prominent school building bears his name. He was for many years, and up to the time of his death, treasurer of the Congregation Mishkan Israel, trustee of the B'nai B'rith Home, member of the board of the Masonic Home, and president of the Savings Bank of New Haven.

During the past twenty years there has been a considerable increase in the Jewish populations of other towns and cities of the state, especially in Bridgeport, Ansonia, Derby, Waterbury, and New

London. Though without a resident minister, they each maintain a cemetery and a Sabbath-school, and hold religious services during the important holidays of the year. The combined population of Jews outside of Hartford and New Haven is estimated to be one thousand. Since 1891 a number of Jewish farmers have settled in various parts of the state (see Agricultural Colonies in the United States).

Hartford.

The capital city of the state is Hartford, with a population of 79,850 (1900), the Jewish inhabitants numbering about 2,000. The first congregation established there was Beth Israel (1843). Among its rabbis have been Deutsch, Mayer, Rundbaken, and the present incumbent, Meyer Elkin. The congregation numbers about 100 members, and is in a flourishing condition. There are two or three other congregations, established by the Russian community within the past ten years, notably Adas Israel and B'nai Israel. Many Hartford Jews have held positions of honor in civic affairs, while not a few have held distinguished places in the medical and legal professions.

CONQUE, ABRAHAM BEN LEVI: Cabalist; lived at Hebron, Palestine, in the second half of the seventeenth century. Swayed by his cabalistic studies, Conque threw himself into the Shabbethaian movement, and became one of the most earnest apostles of the pretended Messiah. Even the apostasy of Shabbethai Ẓebi did not shake Conque's belief, and he remained until his death a faithful follower.

Conque traveled, as a collector for the poor of Palestine, throughout Germany and Russia, and everywhere endeavored to win adherents to the movement. At the request of a friend residing at Frankfort-on-the-Main, he wrote, in 1689, an account of Shabbethai Ẓebi's life, which reveals in the author a peculiar state of mind. The account is full of miracles and prodigies, firmly believed in by Conque. It is referred to in Jacob Emden's history of the Shabbethaian movement, "Zot Torat ha-Ḳena'ot." Conque was also the author of the following works: (1) "Abaḳ Soferim" (Dust of Scholars), Amsterdam, 1704, the first part, under the special title of "Em ha-Yeled," comprises homilies on the Pentateuch; the second, "'Uggat Reẓafim," contains Biblical interpretations by himself and others; and the third, "Em la-Binah," consists of nineteen sermons. (2) "Minḥat Ḳena'ot" (Offering of Jealousy), a treatise on jealousy. (3) "Abaḳ Derakim" (Dust of Roads), a collection of sermons. The last two are mentioned by Azulai, who claims to have seen them in manuscript.

CONRAD (CUNTZE) OF WINTERTHUR: Burgomaster of Strasburg during the Black Death, in 1348. Together with the councilors Goffe Sturm (Schöppe) and Peter Schwarber, he opposed the mob which, believing the Jews had caused the Black Death by poisoning the wells and rivers, demanded their lives. When a deputation of the citizens appeared before the council to insist upon the arrest of the Jews, Conrad energetically refused. They insolently demanded that he divide among the citizens a part of the money he had taken from the Jews for protection; whereupon Conrad arrested the whole deputation. His attitude toward the Jews was the more meritorious in that he exposed himself to the resentment of the populace, knowing clearly the consequences. Conrad and his colleagues were deposed, their property was confiscated, and they were excluded from the council for ten years.

CONRAT, MASE: Professor and writer on Roman law; born in Breslau Sept. 16, 1848. His original name was Cohn, which he exchanged for Conrat in 1882, when he embraced the Christian faith. Conrat attended the gymnasium of St. Maria Magdalena in Breslau up to the year 1867; and then entered successively the universities of Breslau, Heidelberg, and Berlin. At the last he took his doctor's degree in 1870. From 1870 to 1872 he filled the office of referendar in Breslau; he was appointed privat-docent in Roman law at the University of Heidelberg in 1873; and in 1874 he became professor at the University of Zurich. In 1878 he accepted a call as professor in Roman law to the University of Amsterdam.

His early studies lay mainly in the field of ancient Roman law; but afterward, and for twenty years, he turned his attention to the Roman law of the Middle Ages. Besides numerous articles in various periodicals, he is the author of the following works: "De Natura Societatum Juris Romani Quæ Vocantur Publicæ," 1870; "Zum Römischen Vereinsrecht," 1873; "Die Sogenannte Actio de Eo Quod Certo Loco," 1877; "Beiträge zur Bearbeitung des Römischen Rechts," 1880, vol. i.; "Das Florentiner Rechtsbuch," 1882; "Die Epitome Exactis Regibus," 1884; "Pandekten und Institutionenauszug der Britischen Dekretatensammlung," 1887; "Geschichte der Quellen und Litteratur des Römischen Rechts im Früheren Mittelalter," 1891; "Die Christenverfolgungen im Römischen Reich vom Standpunkt des Juristen," 1897. He translated from Dutch into German Asser's "Das Internationale Privatrecht," 1880, and Kappeyne van de Cappello's "Abhandlungen," 1885.

S.

CONSANGUINITY AMONG JEWS: Owing to their dispersion among populations professing creeds different from their own, Jews have married near relatives more frequently than the rest of the world. The marriage of first cousins and even of uncle and niece is quite legal and usual among them (see Marriage). The limitations on the marriage of those of priestly descent would tend to limit the choice of Cohens to those nearly related to them.

The tendency seems to have begun early, since Abraham is represented as having sought a wife for Isaac in his mother's family. In the Middle Ages it is difficult to ascertain how far the Jews tended to marry within their own families; but the Ghirondi family, to which Naḥmanides, Gersonides (who married his first cousin), and Simon Duran belonged, appeared to have married relatives for several generations (Steinschneider, "Cat. Bodl." cols. 2305–2310).

An attempt has been made to ascertain the proportion of first-cousin marriages among English Jews upon the method invented by G. H. Darwin ("Fortnightly Review," July, 1875), based on the number of marriages in which both bride and bridegroom have the same surname. This method gives a proportion of about one-fifth. Judging by this criterion, the percentage of cousin-marriages in the English peerage was 4.50 among the landed gentry, 3.75 in rural districts, 2.25 in London. Applying the same method to English Jews, Jacobs calculated that 7.52 per cent of their marriages were first-cousin marriages. By another method W. Stieda found that there were 23.02 per cent per thousand consanguineous marriages among the Jews of Alsace-Lorraine as compared with 8.97 among Catholics and 1.86 among Protestants ("Die Eheschliessungen in Elsass-Lorhringen," 1872–76, Dorpat, 1878). It would therefore appear that the proportion of first-cousin marriages among Jews is about three times greater than among the non-Jewish population.

It seems that consanguineous unions are more fertile and less sterile than other marriages. In England the ordinary percentage of sterile marriages is as high as 16.03 (Duncan, "Fecundity, Fertility and Sterility," p. 153, Edinburgh, 1856), whereas among a number of Jewish consanguineous marriages only 5.4 per cent were sterile. The children who lived numbered 4.6 on an average as compared with 2.26 among ordinary Englishmen.

It has been contended that the neurotic tendency of Jews is due to these consanguineous marriages. Boudin ("Traité de Géographie Medicale," ii. 140, Paris, 1857) contended that the greater prevalence of deaf-mutism among Jews was due to this cause; but this view is no longer credited among medical men, who regard consanguinity in marriage as aggravating any diathetic tendency in a family, but not as causing the tendency per se.

A. J.

CONSECRATION or **DEDICATION** (**חנכה**): The solemn setting apart of a person or thing to a special use or purpose. According to Fleischer (Levy, "Neuhebr. Wörterb." ii. 206), the word "ḥanak" (to initiate) is derived from the "rubbing of the throat" of an infant for the purpose of cleansing it and enabling it to take the mother's milk, and is therefore applied to every form of initiation. It appears, moreover, that the "rubbing" remained for a long time an essential feature of the rite of initiation, for "every consecration in Biblical times was accompanied by rubbing or anointing with oil the object to be consecrated. Thus the pillar at Bethel was anointed (Gen. xxviii. 18; compare the "dedication" of Nebuchadnezzar's image, Dan. iii. 2 *et seq.*). The priests and the vessels of the Tabernacle were anointed with oil (Ex. xxviii. 41, xxx. 26; Lev. viii. 10–12; Num. vii. 13), and by this rite they were "hallowed." "Mishḥat Adonai" is, therefore, "consecration to the Lord" (Lev. x. 7).

Priests and Altar.

In the case of a priest to be consecrated there was also an anointing with the blood of the initiation "sacrifice" (Ex. xxix. 1), the sacrifice receiving the name of מלואים, from מלא את יד, "the filling of the hand" of the priest with the offering which he had to bring in order to be thereby initiated as ministering priest (see Dillmann's and Strack's commentaries on Lev. vii. 37). The anointing of kings with oil (I Sam. xvi. 13, xxvi. 11; I Kings i. 39; II Kings xi. 12) is also a consecratory rite; hence, also, that of prophets (I Kings xix. 16). The consecration of the altar was most essential, and therefore accompanied with special solemnities in the form of sacrificial offerings (see Num. vii. 10, 11, 84–88). The consecration (חנוך) of Solomon's Temple consisted of a dedicatory prayer and a blessing, in addition to the sacrifices (I Kings viii. 15 *et seq.*, 55 *et seq.*, 63 *et seq.*). The consecration of the Second Temple is mentioned in Ezra vi. 16, 17, and for the probable date (25th of Kislew) see Num. R. xiii. 4 (compare Hag. ii. 10). It was the consecration of the newly erected altar which gave the feast of the Maccabees the name of Hanukkah (I Macc. iv. 53, 59). According to Deut. xx. 5, private houses also were consecrated, and as to the gates of a city see Neh. iii. 1 and Corner-Stone.

The warrior when going to battle was also "consecrated" (Joel iv. 9; Micah iii. 5; Jer. xxii. 7, Hebr.); hence, probably, the name חנוך for the young warrior initiated into war (Gen. xiv. 14). This gave rise to the proverb (Prov. xxii. 6, Hebr.): "Initiate the lad [A. V. and R. V. "Train up a child"] in the way he should go."

In Rabbinical Times.

It was considered the duty of parents to "initiate" the young into every religious practise, and this was a "consecration" to a life of religious duty (מחנכין, Yoma 82a; Nazir 29b). When children were to be initiated into the study of the Law or of the Hebrew language, Hebrew letters or Biblical sentences upon honey-cakes covered with honey were given them to eat, in accordance with Ezek. iii. 3 (see Maḥzor Vitry § 508, p. 628, ed. Horwitz; Zunz, "Z. G." pp. 167 *et seq.*; and compare Soṭah 11b and the symbolical offering of honey and milk as a similar Christian baptismal rite; Tertullian, "De Corona Militis," iii.; and Augusti, "Handbuch der Kirchlichen Archäologie," ii. 445 *et seq.*).

For the consecration of synagogues there is no special form mentioned in Talmudical literature; but the fact that in the beginning of the fourth century the churches had their dedication ceremonies (Eusebius, "Hist. Eccl." x. 4) makes it probable that the synagogues had some such form, as indeed Greeks and Romans also had for their temples (see Pfannenschmid, "Germanische Erntefeste," 1878, pp. 524–530). Mishnah M. Ḳ. i. 6 speaks of consecration of family sepulchers (מחנכין את הכוכין), and Yer. M.

K. i. 80d of consecration of cemeteries (חנוך בית הקברות). But this does not always imply a formal act, as may be learned from Sheb. 15a: "The vessels of the sanctuary after Moses' time were consecrated by their use without being anointed." Later practise, however, introduced ceremonies of dedication for synagogues, and also for a newly written "Sefer Torah" when given to a congregation. Modern life extended dedication ceremonies to every communal institution of an educational, charitable, or religious character. A fixed form for such dedication exercises does not exist; the Psalms to be read and the prayers to be offered are left to the discretion of the rabbi or officers in charge.

At the dedication of cemeteries a superstitious custom, sanctioned by R. Juda the Pious, was to kill a rooster (גבר, a term used for both man and rooster) and bury it as the first victim of death (see Isaac Lampronti, בית הקברות). For a wise selection of Psalms and prayers at the dedication of a cemetery, see Praeger, "Gebet- und Erbauungsbuch für Israeliten," 1860, pp. 178–181, and M. Silberstein, "Predigten bei Besonderen Veranlassungen," p. 163, Breslau, 1870. For the consecration of a new house see Singer, "Authorized Daily Prayer Book," pp. 300–303, London, 1891. For other dedications see "Liturgies" in Zedner, "Cat. Hebr. Books Brit. Mus."

E. G. H. K.

CONSENT: A voluntary yielding of the will, judgment, or inclination to what is proposed or desired by another. A rational and voluntary concurrence of the parties is necessary in all cases involving a legal act or contract. This principle gives rise to several distinctions in civil law. If a man has been forced to make a gift to another, his act is considered invalid, even though he made no formal protest (B. B. 40b; Ḥoshen Mishpaṭ, 242, 1). If he has been compelled, however, to sell either personal or real estate, the contract is valid, for it is presumed that, unless he had previously made a formal protest ("moda'a") before two witnesses, he was reconciled on the receipt of the money (B. B. *ib.*; Maimonides, "Yad," Mekirah, x. 1, 6; Ḥoshen Mishpaṭ, 205, 1).

In Business Transactions.

Minors above six years of age, who show intelligence and an understanding of business, are presumed to be capable of consenting to the purchase, sale, or gift of personal property, but not of real estate (Giṭ. 59a; Mekirah, xxix. 1; Ḥoshen Mishpaṭ, 235, 1). If a guardian ("apiṭropos") is appointed for them, they can negotiate no business without his consent (*ib.* 235, 2; see "Pitḥe Teshubah," quoting the opinion that even then his gifts should be valid).

The deaf-mute can enter by signs into contracts concerning personal estate. He must, however, be examined to see that he understands what he is doing (Giṭ. *l.c.*; Mekirah, xxix. 2; Ḥoshen Mishpaṭ, 235, 17). The mute can sell and buy and give away either personal property or real estate (*ib.* 235, 18). The idiot can make no contract, and the court appoints a guardian for him as for a minor (Ket. 48a; Mekirah, xxix. 4, 20; Ḥoshen Mishpaṭ, 235, 20).

In Marriage Contracts.

The consent need not always be expressed. Silence is regarded as voluntary consent (Yeb. 87b; B. M. 37b). Therefore, in marriage contracts, if a man gave a coin to a woman and pronounced the prescribed formula in the presence of two witnesses, and she did not protest immediately, the marriage is valid (Eben ha-'Ezer, 42, 1; see Isserles' gloss). By "immediately" a space of time is meant which would be sufficient for a disciple to greet his master thus: "Peace be with thee, my master and teacher" (B. Ḳ. 73b). If, however, she was under duress, the marriage is invalid (Yeb. 19b; see Rashi's commentary, where the principle of consent on the part of the woman is derived from Deut. xxiv. 2: "She may go and be another man's wife"; Ḳid. 2b; Eben ha-'Ezer, *l.c.*). Authorities differ, however, regarding cases in which the man is under duress in contracting a marriage; some are of opinion that inasmuch as he can divorce her at will afterward, the marriage should be valid (Eben ha-'Ezer, *l.c.*). Since, however, compulsory divorce is now impossible, according to the decree of R. GERSHOM, the man would be in the same position as the woman, and a forced marriage, whether the man or the woman be the party under duress, would be considered invalid (Mielziner, "Jewish Law of Marriage and Divorce," § 29).

Insanity and Idiocy Barred.

Consent being necessary, insane persons or idiots were considered incapable of entering into a marriage contract (Eben ha-'Ezer, 42, 2). If a person who is only weak-minded or temporarily insane has contracted a marriage, it is doubtful whether such a contract could be declared invalid, so that the woman may be allowed to marry again (*ib.* Isserles' gloss). A marriage contracted by an intoxicated person is valid, unless he was at the time of his marriage entirely unconscious, "as the intoxication of Lot" (*ib.* 42, 3). Deaf and dumb persons, being looked upon as idiots, could not contract a marriage according to Biblical law, but the Rabbis sanctioned such a marriage when performed by signs. This being merely a rabbinical institution, it is not as valid as other marriages, and a very serious question would arise were another man to contract a marriage with the woman after she had been married to the deaf-mute (Yeb. 112b; "Yad," Ishut, iv. 9; Eben ha-'Ezer, 44, 1; see Mielziner, *l.c.* §§ 33, 34). Minors are usually classed with deaf-mutes and idiots by the Talmudists, and their marriage is also considered invalid by lack of consent (Eben ha-'Ezer, 43, 1).

In Divorce.

While mutual consent is absolutely necessary in marriage, it is, according to the old Jewish law, not necessary in divorce, and the husband can divorce his wife even without asking her consent (*ib.* 119, 6; from Mishnah Yeb. xiv. 1). As in the course of time the act of divorce came under the control of the rabbinical courts, the Rabbis had an opportunity to restrict this law gradually by many regulations, until, in the eleventh century, by a decree of R. Gershom, this arbitrary right of the husband was entirely abrogated. Although Maimonides made no mention of it in his code, this bold regulation was soon adopted by the great majority of the Jews, and a divorce without sufficient cause will not be granted unless the consent of both parties is obtained (Eben ha-'Ezer, *l.c.* Isserles' gloss; see Amram, "Jewish Law of Divorce," iv.). In certain cases this decree is disregarded—for instance, if the woman commits adultery, or is even denounced as an adulteress by persons in whom the husband has faith (Eben ha-'Ezer, 115, 7); if she conducts herself in a manner unbecoming a Jewish woman (*ib.* 115, 4); if she causes her husband to transgress the religious precepts with regard to food or to cohabitation; if she curses her father-in-law (*ib.* 115, 4); if she contracts an incurable disease (*ib.* 117, 11); if she refuses him connubial rights for a whole year (*ib.* 77, 2, Isserles' gloss). There is a difference of opinion among authorities whether, under the decree of R. Gershom forbidding bigamy, the husband may marry another woman if he can not force his wife to the acceptance of the bill of divorce in the above-mentioned cases ("Pitḥe Teshubah" to Eben ha-'Ezer, 1, 10, and 119, 6).

An insane person, or one who is intoxicated to the degree of unconsciousness, is incapable of divorcing his wife. A deaf-mute, who became so after his marriage, can not divorce his wife. If, however, he was so when he first married, he may divorce her by signs as he married her by signs (Eben ha-'Ezer, 121, 1, 6).

For questions involving consent to deprivation of legal rights, see WAIVER OF RIGHTS; for those involving consent to a crime see ACCESSORIES.

J. SR. J. H. G.

CONSISTORY: An ecclesiastical court; in Jewish usage, a body governing the Jewish congregations of a province or of a country; also the district administered by the consistory. The term was originally, and still is, applied in the Roman Catholic Church to the College of Cardinals, assembled for deliberation or to hear a solemn declaration from the pope. Similarly every bishop has the right to convene for the purpose of deliberation a consistory composed of priests of his diocese. After the Reformation the Protestant Church adopted this term for the body which governed the ecclesiastical affairs of a country. In the latter sense the Jews in countries under French influence made use of the term in the beginning of the nineteenth century, when the movement for political emancipation demanded the creation of a representative body which could transact official business with a government in the name of the Jews, and when the desire for reform among the educated classes demanded the creation of a body vested with authority to render religious decisions.

France.

The first attempt to create such a consistory was made by Napoleon I. In 1806 he convened the Assembly of Jewish Notables, whose resolutions were confirmed by a subsequently convened Sanhedrin; after which, by the decree of March 17, 1808, he organized a consistory. According to this decree every department containing 2,000 Jews might establish a consistory. Departments having less than this number might combine with others; but none had more than one consistory. Above these provincial consistories there was a central consistory. Every consistory consisted of a grand rabbi, with another rabbi where possible, and of three lay members, two of whom were residents of the town where the consistory sat. They were elected by twenty-five "notables," who were nominated by the authorities. Eligible to become members of the consistory were Israelites who had reached the age of thirty years, who had never been bankrupt, and had not practised usury. The central consistory consisted of three grand rabbis and two lay members. Every year one retired, and the remaining members elected his successor.

Napoleon demanded that the consistories should see to it that the resolutions passed by the Assembly of Notables and confirmed by the Sanhedrin should be enforced by the rabbis; that proper decorum should be maintained in the synagogue; that the Jews should take up mechanical trades; and that they should see to it that no one evaded military service. The central consistory watched over the consistories of the various departments, and had the right to appoint the rabbis.

French Dependencies.

This organization was also introduced in the various countries which were under the sway of France during the Napoleonic era, as Holland, Belgium, and Westphalia. In the last-named country, ruled over by Napoleon's youngest brother, Jerome, a consistorial organization was introduced by the decree of March 31, 1808. It was composed of a president (who could be either a rabbi or a layman), three rabbis, two lay members, and one secretary. It was chiefly the outcome of Israel JACOBSON's efforts, who hoped to introduce through such a medium his Reform ideas. A circular of this consistory ordered the introduction of confirmation and removed the prohibition against leguminous plants on Passover. None of these organizations survived the Napoleonic era with the exception of that in Belgium, where the consistorial organization still exists as in France.

The following is a list of the original consistories as drawn up by Napoleon for the whole of the territory under his influence, in his Madrid decree of Dec. 11, 1808, with the census of Jews in each consistory and in its chief town (Halphen, "Recueil des Lois . . . Concernant les Israélites,"pp. 55-57):

Consistory.	Jews in Chief Town.	Jews in Consistory.	Consistory.	Jews in Chief Town.	Jews in Consistory.
Paris.........	2,733	3,585	Coblenz......	342	4,063
Strasburg.....	1,476	16,155	Krefeld......	160	6.218
Winzenheim.	536	10,000	Bordeaux....	2,131	3,713
Mayence.....	1,264	11,122	Marseilles....	440	2,527
Metz.........	2,400	6,517	Turin........	1,450	2,614
Nancy.......	739	4,166	Casal-Maggiore.........	790	2,929
Treves.......	261	3,553			

The desire to introduce reforms, and the difficulty of making them popular so long as they were individual decisions, led to various attempts during the middle of the nineteenth century to introduce either a consistory or a synod which should, by an authoritative vote, settle the difficulties which arose when the demands of the time came into conflict with the traditional law. None of these attempts was successful.

The Present Status.

Since Napoleon's decree of March 17, 1808, various changes have been introduced in the method of electing the delegates, and some of the provisions assigning to the rabbis the rôle of informers were dropped. The most important changes are contained in the laws of Louis Philippe (May 25, 1844) and of Napoleon III. (June 15, 1850, and Aug. 29, 1862), and the law of Dec. 12, 1872, which introduced the system of universal suffrage in the elections of the consistories. There are at present twelve consistories: Paris, Nancy, Bordeaux, Lyon, Marseilles, Bayonne, Epinal, Lille, Besançon, Algiers, Constantine, Oran; each is composed of the grand rabbi of the consistorial district and six lay members, with a secretary. Each consistory has a representative in the central consistory, which therefore is composed of twelve members and the grand rabbi of France; its seat is in Paris. In Alsace-Lorraine the former consistories of Metz, Strasburg, and Colmar still exist, but they are not united under a central consistory, though the establishment of such an organization is now (1903) under consideration. The consistory of Belgium has its seat in Brussels. See COMMUNITY, ORGANIZATION OF, IN MODERN TIMES.

D.

CONSOLATION.—Biblical Data: Comfort; alleviation of sorrow (נחמה, תנחומים); relief from grief (from נחם, meaning in pi'el form "to remove grief"); words of sympathy and encouragement offered to persons in distress (Gen. xxxvii. 35; II Sam. xii. 24; Job xvi. 2; Ps. cxix. 50, 82). After the burial of the dead, mourners were offered "consolation" by the friends, who made them partake of the mourners' meal and the cup of consolation (see Jer. xvi. 7; compare Ps. lxix. 20; Job xlii. 11). These friends, called "comforters," are frequently mentioned in the Bible (see Lam. i. 2 *et seq.*; Eccl. iv. 1; II Sam. x. 2; Job xvi. 2; Ps. lxix. 20; Nahum iii. 7), and the act of consolation is alluded to in Job xxix. 25, and especially in Isa. lvii. 18 *et seq.*, Hebr.: "I will restore comforts unto him and to his mourners—food for the refreshment of the lips" (the last Hebrew words, "bore nib sefatayim," have been strangely misinterpreted by the commentators, A. V. giving, "I create the fruit of the lips"; see Luzzatto *ad loc.*). Isa. lxvi. 10 *et seq.*, Hebr.: "All ye that mourn over her that ye may suck and be satisfied with the overflow of her consolation," also contains an allusion to this custom (compare Ps. xciv. 19, "thy comforts," and Job xv. 11). Also the interpretation of the name of Noah as the one who shall "comfort" men for their hard toil because of the curse of the earth (Gen. v. 29, זה ינחמנו), alludes to the wine of which he was the first producer (Gen. ix. 20; see Gunkel, commentary, *ad loc.*, and Prov. xxxi. 6). Consolation was especially promised by the prophets of the Exile to the people mourning over Jerusalem (Isa. xl. 1; xlix. 13; li. 3, 12; lii. 9; lxi. 2 *et seq.*; lxvi. 10-13; Jer. xxxi. 12 *et seq.*; Zech. i. 13, 17). Hence the name "Neḥamah" or "Neḥamata" (consolation) given to the prophetic literature as offering comfort to the mourners over Jerusalem by the promise of the advent of "the comforter," either "the Messiah" (see "Menahem" as name of the Messiah, Sanh. 98b) or the "messenger of glad tidings" (see PARACLETE; B. B. 14b; Ber. 31b; Yer. Ber. v. 8d).

——**In Rabbinical Literature:** "The consolation of Jerusalem" (see above) is mentioned in the prayer recited at meals (see GRACE AT MEALS); also by the Karaites in the wedding eulogy (see Müller, "Masseket Soferim," p. 273), before the reading of the Hafṭarah (see "Massek. Soferim," xiii. 12), and particularly in the benedictions recited over the cup of consolation at the mourners' meal. The consolation of Jerusalem is thus brought into connection with that of the mourners over the dead (see Ket. 8b; Siddur R. Amram, i. 55; Ṭur Yoreh De'ah, 379; Shulḥan 'Aruk, 2).

There were two gates in the Temple at Jerusalem, believed to have been built by King Solomon, through one of which bridegrooms marched, through the other mourners and anathematized persons; the former to receive the congratulations, the latter the consolations, of the inhabitants of Jerusalem, who gathered before these gates for the purpose of showing their sympathy. After the destruction of the Temple the synagogue became the place where bridegrooms received the congratulations and mourners the condolences of the people (Soferim, xix. 12; compare Pirḳe R. El. xiii.). Formerly the mourners stood still, and the people offering consolation passed by them; later on, in consequence of rivalry between families claiming rights of precedence on account of higher rank, the people were ranged in lines, and the mourners passed them, receiving consolation (Sanh. 19a). Ten men were necessary to form such a line (Sanh. *ib.*). Where there were no mourners to receive consolation, a congregation of ten men paid the honors to the dead (Shab. 152a, b). If the king was a mourner, the people said to him: "May we be thine atonement!" that is, May we suffer for thy sin! And he rejoined: "May ye be blessed from the Lord!" (Sanh. ii. 1). To the priest in the Temple who was in mourning or in misfortune, the friends standing to the right said: "May He who dwells in this house be thy Comforter!" (Middot ii. 2).

The friends who offered consolation sat down on the ground with the mourners and waited for the latter to speak first (Yer. M. Ḳ. iii. 83a). When Johanan ben Zakkai lost his son his disciples came to offer him consolation. R. Eliezer said: "The first man lost his son Abel, and was comforted; so should you be comforted." R. Joshua said: "Job had many sons and daughters, and lost them all on one day, and was comforted; so should you be comforted." R. Jose referred to Aaron the high priest, who lost his two sons on the day of the dedication of the

Sanctuary, and was comforted; R. Simeon referred to King David, who lost a son and was comforted. But R. Johanan ben Zakkai rejoined: "Your consolations only awaken grief, inasmuch as they recall the evil destiny which befell all these men." Then R. Eleazar b. 'Arak began: "A king gave a precious boon in trust to a man; and, behold, the man was in constant dread lest he might have it damaged or lost; and only when he had returned it safely did he feel at ease. The King of the world gave to thee a son who became a devotee of the Law; and then, having become familiar with all branches of learning, he departed this world free from sins; oughtst thou not be thankful that thou couldst return the treasure to God in such blameless shape?" Whereupon R. Johanan b. Zakkai replied: "Truly, thou, R. Eleazar, hast comforted me" (Ab. R. N. xiv.; compare Beruriah). Judah bar Naḥmani, the meturgeman of Resh Laḳish, spoke at the death of a child to the mourners: "Ye brethren who are afflicted by this loss, ponder upon this bitter lot of man foreordained from the days of creation; many have drunk of this cup, and many will yet drink of it. May the Lord of Consolation console you! Blessed be the Comforter of the Mourners!" To the friends who had come to condole with the bereft he said: "Brethren who practise benevolence, sons of practisers of benevolence, adhering to the covenant of Abraham our father, may the Lord of Recompense recompense you! Blessed be He who recompenseth good deeds!" (Ket. 8b).

In Midrashic literature God Himself is regarded as giving men an example of the "consolation of mourners" (Soṭah 14a, with reference to Gen. xxv. 11: "After the death of Abraham God blessed Isaac"). It is said of consolation that "it is one of those things which bring happiness to man" (Ab. R. N., A., xxx., ed. Schechter, p. 89); and it is declared that "wine has only been created for the cup of consolation" ('Er. 65a, with reference to Prov. xxxi. 6). Regarding the mourners' meal see Funeral Rites and Mourning Customs. K.

CONSOLO, BENJAMIN: Italian Hebraist; born at Ancona in 1806; died at Florence in 1887. He received his elementary instruction from Rabbi David A. Vivanti at the Talmud Torah of his native city, and then took up eagerly the study of secular sciences, though against the wishes of his teachers.

As he was excluded from the schools of Ancona, which were then under papal control, and was too poor to pay private tutors, he encountered great difficulties. He studied Italian with Count Pietro Alety, a student of Dante, and then Latin with Lorenzo Barili, who subsequently became a cardinal. Consolo was appointed secretary of the Jewish community at Ancona, and later of that at Florence. In the latter city he formed a friendship with the litterateur Cesare Scartabelli, whose enthusiasm in behalf of purism and a return to the language of the trecentists he shared. His love for Judaism, together with his interest in Italian literature, induced Consolo to translate Hebrew works into Italian.

His works include: "I Capitoli dei Padri, Trattato Misnico Morale con Commenti," an Italian translation of Abot; "I Doveri de' Cuori," Prato, 1847; "Volgarizzamento del Libro di Job," Florence, 1874; "Volgarizzamento delle Lamentazioni di Geremia"; "Il Salterio o Canti Nazionali del Popolo d'Israele Spiegati e Commentati," Florence, 1885. He was also the author of several shorter essays and poems. The autographs of these works, as well as the manuscript of his comparative treatise on Biblical and Roman law, entitled "Jus Civile," are preserved in the Biblioteca Nazionale at Florence. Consolo's wife, Regine, published an Italian translation of the "Enchiridion d'Egitto." The composer and virtuoso Federico Consolo is his son.

CONSOLO, FEDERICO: Italian violin virtuoso, composer, and scholar; born at Ancona in 1841. After studying the violin with Giorgetti in Florence and Vieuxtemps in Brussels, and composition with Fétis and Liszt, he played with great success at almost all the European courts and in the Orient. In 1884, however, he was compelled by a nervous affliction to discontinue violin-playing. He removed to Florence, and devoted himself to composition. His works include a number of Oriental cycles, concertos, and "Shire Yisrael" ("Libro dei Canti d'Israel," Florence, 1891) a collection of Sephardic synagogal melodies and original compositions. He subsequently undertook archeological studies, writing on musical notation, and especially on music in the Bible. He is a knight of several orders in different states.

CONSONANTS. See Hebrew Language.

CONSTANCE, DISTRICT OF THE LAKE OF: Region in the northeastern part of Switzerland. Of the Jewish communities designated as belonging to the district of the Lake of Constance, those of Ueberlingen, Constance, Schaffhausen, and Diessenhofen deserve special mention, although many others belong to the same district, as Bregenz, Engen, Aach, Feldkirch, Randegg, Isny, Donaueschingen, and Thiengen. This designation is found also in the "Memorbücher." The cemetery of the Jews at Ueberlingen is mentioned as early as 1226. The earliest Jewish settlement at Constance dates from the beginning of the thirteenth century. Jews of Schaffhausen are referred to in documents in 1299; while those of Diessenhofen are not mentioned until the fourteenth century, although probably some were living there long before that time.

In 1314 the Jews of Ueberlingen paid their taxes to King Frederick and Duke Leopold of Austria; in 1332 they were cruelly persecuted, more than 300 being killed, and their synagogue destroyed. Their synagogue and the Jewish quarter are again mentioned in 1349, when the Jews were completely exterminated by the Flagellants (Feb. 11), while the tombstones of their cemetery were used in building the cathedral and the hospital. Jews were again admitted in 1378. They suffered much under

(From a manuscript chronicle of Ulrich von Reichthal, in the library of the town hall at Basel.)

King Wenzel's law which canceled all debts owing to them (1385); and in 1429 twelve were banished.

In 1312 many Jews of Constance were burned on a charge of having desecrated the host. They had a synagogue at this time. In 1314 their quarter was destroyed by fire; 330 were killed by the Flagellants in 1349. In 1417 Jews from Constance went to meet Pope Martin V. in solemn procession.

Their synagogue is again mentioned in 1424. The liaison of a Jewess of the community with a member of Emperor Sigismund's family, in 1424, was used by Scribe as the subject of his libretto to Halévy's opera "La Juive." In 1429 and in 1443 all the Constance Jews were imprisoned; and from 1448 to 1533 none lived there.

At Schaffhausen many were slain in 1349 on a charge of having poisoned the wells. Their synagogue is mentioned in 1391; 30 Jews were burned in 1401; and in 1475 the last remaining Jew removed to Winterthur. At Diessenhofen, where they had a synagogue at an early period, they were persecuted in 1349. In 1401 a Jew, accused of having murdered a Christian boy, was burned; and in 1494 the Jews left the city.

In 1547 Charles V. gave Ueberlingen certain privileges regarding usurious contracts with the Jews, which were renewed by Maximilian in 1566. As late as 1853 two Jews who desired to live in Ueberlingen encountered difficulties in so doing; three were living there in 1880, and nine in 1902.

In 1533 it was decreed that but one Jew a week might remain for one night at Constance. Since 1847 Jews have been permitted to live there, though under many restrictions. In 1863 five Jewish families settled in Constance, and in 1866 formed a community that by 1902 numbered 130 families.

At Schaffhausen a Jewish physician, David, with his family of six members, was admitted as a resident in 1535. He was made to suffer many persecutions; and his son Samuel was expelled in 1562. Since 1865, Jews have again settled there, though only two families were resident in 1880.

At Diessenhofen, where, in 1667, six families were living, a Jew received permission to settle in 1865, and ten Jewish families were living in the town in 1880.

CONSTANTINE I. (FLAVIUS VALERIUS AURELIUS CONSTANTINUS): Roman emperor; born Feb. 27, 274; died May 22, 337; proclaimed emperor by the army in Gaul on the death of his father, Constantius Chlorus (306). He defeated Maxentius, his rival in Italy, in 312; and after routing Licinius, Emperor of the East (323), became sole ruler. In 330 he transferred his court to Byzantium, thenceforth called Constantinople; but died in the midst of his preparations for a Persian campaign, after receiving baptism from Eusebius, Bishop of Cæsarea. Being the first Christian emperor, the Church conferred upon him the title of "The Great."

Political and religious considerations dictated Constantine's friendly attitude toward Christianity. As early as the war against Maxentius, his standard bore a Christian emblem; but previous to his victory over Licinius he contented himself with placing Christianity upon a footing of equality with heathendom. As sole ruler he did not go materially beyond the gradual repression of heathenism and the public encouragement of Christianity; he showed his attitude on this question especially by conducting the first ecumenical council at Nicæa (325).

After his victory over Licinius, Constantine inaugurated a more and more hostile policy toward the Jews. It is true that as early as 321 a law was promulgated which made it obligatory for Jews to fill onerous, expensive municipal offices; while on the other hand such Jews as had devoted themselves to the service of their own religion were exempted in 330 from all public services, and those who were already "curiales" were freed from the levying of taxes. In 329, however, the Jews were forbidden to perform the rite of circumcision on slaves or to own Christian slaves; the death penalty was ordained for those who embraced the Jewish faith, as well as for Jews versed in the Law who aided them. On the other hand, Jewish converts to Christianity were protected against the fanaticism of their former coreligionists. Simultaneously with this an edict was issued forbidding marriages between Jews and Christians, and imposing the death penalty upon any Jew who should transgress this law. Some of these enactments were affirmed in 335. Noteworthy is the hostile language of several of these laws, in which Judaism is spoken of as an ignominious or as a bestial sect ("secta nefaria" or "feralis").

The hostile attitude of the Christianized state, which later became more and more accentuated under Constantine's sons, thus owed its origin to Constantine himself; it is even probable that it was Constantine who renewed the law prohibiting the Jews from entering Jerusalem.

CONSTANTINE (ancient **Cirta**): City in Algeria; capital of the department of the same name. In ancient times it was the capital of Numidia. Jews lived there as early as the first centuries of the common era, as is attested by epitaphs found in several places in that province. As Constantine remained under the Roman domination until its conquest by the Arabs (710), it is probable that, toward the middle of the fifth century, the greater part of the Jewish inhabitants left it and settled in the neighboring towns under the Vandals, among whom the Jews enjoyed a far greater amount of freedom than they did under Christian Rome.

In common with all Algerian Jews, those of Constantine enjoyed peace from the time of the Arabian conquest until the middle of the twelfth century. Under the Almohad dynasty they were subjected to frequent persecutions. From 1509 until 1555 Constantine was in the hands of the

Spaniards. During this period the Jewish community suffered severely. Under the domination of the Turks, Constantine was administered by beys, almost independent of the deys of Algiers, and under them the state of the Constantine Jews was similar to that of Jews elsewhere in ALGERIA.

Like all Algerian communities, that of Constantine was governed by a "mukaddam," or president, assisted by a council. Since the French conquest the city has been the seat of a consistory, to which belong the following communities: Ain Beida, Batna, Bône, Bougie, Guelma, Philippeville, Setif, Tebassa. This district counts 6,800 Jews, of which number 3,321 live in Constantine. The rabbis of the last thirty years have been: Netter, Abraham Cahen, Jacques Levy, and Paul Haguenauer, the present incumbent. Until recently there existed in Constantine an important rabbinical school called "Eẓ Ḥayyim."

S. I. BR.

CONSTANTINIS, ABRAHAM: Greek manufacturer, and president ("proëdros") of the Jewish community of Athens, Greece. He was born at Zante in 1865. After receiving an elementary education in his native city, he studied at Paris, where he took the degree of doctor of science, and graduated as engineer at the Ecole Supérieure de Télégraphie. He was at first in the employ of the Société Edison of Paris, and afterward in that of the Société d'Entreprises of Athens, in which city he constructed, in 1887, the first electric-lighting establishment, thereby greatly contributing to the popularization in the Greek peninsula of the most recent discoveries in electricity and telephony.

A commission and banking business which he founded has, in less than thirteen years, taken the foremost position in the commercial and industrial affairs of Athens. The emery trade of the island of Naxos is a state monopoly managed by the firm of A. Constantinis, which exports three-fourths of the emery consumed in the world. In recognition of Constantinis' services the Greek government appointed him secretary of the commission in charge of the Athens exhibit in the Paris Exposition of 1900. As president of the Jewish community he uses his influence for the protection of his coreligionists at Athens.

S. M. FR.

CONSTANTINOPLE (Turkish, **Stambul** or **Istambul**): Capital of the Ottoman empire, situated on the Bosporus; the "Byzantium" of the ancients. The earliest official document hitherto discovered relating to the Jews of Constantinople dates from 390. A decree of that year (Feb. 23) bearing the successive signatures of the emperors Valentinian II., Theodosius, and Arcadius, exempted the Jewish and Samaritan ship- and cargo-owners from sharing the burdens of the society known in that city as the "Navicularii" ("Codex Theodosianus," xiii. 5, 18). Other decrees in favor of the Jews were issued during the reign of Arcadius.

Theodosius II. was the first Byzantine emperor to curtail the civil rights of the Jews. Instigated by the clergy, he expelled the Jews from the city proper, and assigned to them a district at the other side of the Golden Horn, above Galata, called Stenum (the modern Pera). Hitherto they had occupied in the city itself a special quarter known as the "copper market," where they had their synagogue, which was later converted into the Church of the Holy Mother. Instead of being included in the jurisdiction of the municipal authorities, the Jews were placed by Theodosius under that of a special strategus. According to Ibn Verga ("Shebeṭ Yehudah," p. 40), the expulsion from the city proper was really a measure of clemency on the part of Theodosius, who had previously subjected the Jews to more rigorous persecutions in order to force them to embrace Christianity. This statement has, however, no historical basis, as such action was contrary to the policy of Theodosius, who in 412 forbade the disturbance of Jewish services and the appropriation of Jewish synagogues (compare "Novellæ Theod." title iii.).

It was Justinian I. (527–565) who first interfered with the religious customs of the Jews, forbidding them to celebrate the Passover before the Christian Easter. It is said that during his reign the holy vessels of the Temple were brought by Belisarius to Constantinople; but on the remark of a Jew that they would bring misfortune to Constantinople as they had done to Rome and Carthage, they were returned to Jerusalem.

There are no records of the fate of the Jewish community of Constantinople during the reign of Heraclius I. (610–641), who, after he had massacred thousands of Jews in Palestine in the course of his war with the Persians, ordered the remainder throughout his empire to be baptized. It seems, however, that the Constantinople Jews found protectors in the persons of Heraclius' wife, the empress Martina, and her son Heracleonas; for the historian Nicephorus records that, emboldened by their influence, the Jews on one occasion stormed the Church of St. Sophia.

The Iconoclasts.

With the accession of the Iconoclasts the Jewish community of Constantinople, like those of the other cities of the Byzantine empire, underwent terrible persecutions. Indeed, during the reign of Leo the Isaurian—as well as later under Basil I.—it actually ceased to exist, the Jews having been forced either to emigrate or to embrace Christianity. But the Byzantine capital, the greatest commercial center of that time, had such attractions for the Jews that the slightest relaxation in the persecutions brought thither masses of new settlers. No wonder, therefore, that it became the center of Judaism as soon as Leo VI. (886–911) had restored religious freedom to the Jews; although their social condition continued to be intolerable. Benjamin of Tudela, who visited Constantinople in 1176, gives the following account of the Jews there:

> "No Jew dwells in the city, the Jews having been expelled beyond the one arm of the sea. They are shut in by the channel of Sophia on one side: and they can reach the city by water only, whenever they visit it for the purpose of trade. The number of Jews at Constantinople amounts to two thousand Rabbinites and five hundred Karaites, who live on one spot;

Benjamin of Tudela's Account.

but a wall divides them. The principal Rabbinites, who are learned in the Law, are Rabbi R. Abatlion, R. Obadiah, R. Aaron Kustipo, R. Joseph Sargeno, and R. Eliakim the Elder. Many of the Jews are manufacturers of silk cloth; many others are merchants, some of them being extremely rich; but no Jew is allowed to ride upon a horse except R. Solomon ha-Miẓri, who is the king's physician, and by whose influence the Jews enjoy many advantages even in their state of oppression. This state is very burdensome to them; and the hatred against them is enhanced by the practise of the tanners, who pour out their filthy water in the streets and even before the very doors of the Jews, who, being thus defiled, become objects of hatred to the Greeks. Their yoke is severely felt by the Jews, both good and bad: they are exposed to beatings in the streets, and must submit to all sorts of harsh treatment. But the Jews are rich, good, benevolent, and religious men, who bear the misfortunes of exile with humility. The quarter inhabited by the Jews is called Pera."

The king referred to by Benjamin was Manuel Comnenus (1143-80), who—probably owing to the influence of Solomon ha-Miẓri—placed the Jews of Constantinople again under the jurisdiction of the municipal authorities.

Under the Turks.

A new era for the Jewish community began with the fall of the Byzantine empire (May 29, 1453). Mohammed the Conqueror (1451-81), on entering his new capital, granted to the Jews equal rights with all his non-Mussulman subjects, assigning to their chief rabbi a seat in the divan next to the spiritual chief of the Greek Church. Foreign Jews were invited to settle in the suburb of Haskeui, where building sites were gratuitously divided among the newcomers. Two Jews, Ḥakim Ya'ḳub and Moses Hamon, were elevated to high official positions: the former being appointed minister of finance; the latter, physician to the sovereign.

The sixteenth century was the golden age of the Jewish community of Constantinople. Sultan Bayazid II. (1481-1512) received the exiles of Spain; and these gave a great impulse to its material and intellectual life. Moreover, thousands of wealthy Maranos, who had been persecuted in Italy and Portugal, sought refuge in Constantinople, where they resumed their former religion. Among these were Joseph Nassi, created Duke of Naxos by Selim II. (1566-74), and Donna Gracia, his mother-in-law, both of whom liberally endowed the community with schools, charitable institutions, and synagogues. According to Stephan Gerlach ("Tagebuch," p. 90), the number of Maranos who settled in Constantinople up to 1574 amounted to 10,000, and the whole Jewish population numbered 30,000. There were 44 synagogues, representing as many separate congregations, each of which retained its own customs, rites, and liturgy.

Influential Jews.

Under Murad III. (1574-95) and Mohammed III. (1595-1603) many Constantinople Jews became very prominent in the politics of the Turkish empire. In addition to Joseph Nassi, Duke of Naxos, who held a high office, a physician named Solomon ben Nathan Ashkenazi, a native of Poland, held, about 1580, the office of ambassador at Venice. A Jewess named Esther Kiera, widow of Elijah Chendali, was powerful at court, being the favorite of the sultana Baffa, wife of Murad III. No less prosperous was the material condition of the community. The wholesale trade, customs dues, shipping, and coinage were mainly in Jewish hands. As Moses Almosnino relates in his description of Constantinople, Jews owned the largest houses, with gardens and kiosks equal to those of the grand viziers. Many easily earned a livelihood by teaching languages and by acting as interpreters, as is attested by Petrus della Valle, who himself learned foreign languages from a Jew at Constantinople ("Viaggi de Pietro della Valle," i. 71 *et seq.*).

Shabbethai Ẓebi.

An interruption of this happy state of the community took place in the seventeenth century. The ever-growing weakness of the sultans and the increase of the religious fanaticism of the Mussulmans made the Jews the prey of the soldiery, who often set fire to the Jewish quarters in order to plunder during the confusion. Another factor which contributed largely to the intellectual and material ruin of the prosperous community was the Shabbethai Ẓebi agitation. The scenes of disorder of which Constantinople became the theater during the pseudo-Messiah's stay in the city, alienated from the Jews the good will of the sultan, who saw in the movement not a purely religious manifestation, but a rebellion against his authority. Further, their affairs being neglected during the years of this Messianic chimera, the Jews were supplanted everywhere by the Greeks and Armenians; and they had neither the courage nor the power to regain their former position. All these causes combined to make the community a veritable type of the Turkish empire—without strength to live and without desire to die. Misery and ignorance went hand in hand, and annihilated all energy and enterprise in this once industrious and rich population. There were, indeed, from time to time some wealthy and influential families, such as the Agimans, the Gabbais, and the Carnionas, members of which held official positions; but the majority remained in the most abject destitution and ignorance.

An endeavor to raise the material and intellectual condition of the community was undertaken with some success in the second half of the nineteenth century, first by Albert Cohn, who in 1854 founded at Constantinople a school patterned after European institutions, and then by the Alliance Israélite Universelle through the numerous institutions which it established there for the instruction of young people.

In 1853 two Jews of Constantinople, Behar Effendi Ashkenazi and David Effendi Cremona, were appointed by 'Abd al-'Aziz members of the council of state; and in 1876 both of them were nominated senators by Sultan 'Abd al-Ḥamid.

Literary Productions.

Persecutions contribute but little to poetry and learning; and during the Byzantine period Constantinople did not produce any noteworthy rabbinical scholars. The Karaites, however, displayed some scientific activity, and counted among their number prominent men like Judah ben Elijah Hadassi (1150), author of "Eshkol ha-Kofer"; Aaron ben Joseph ha-Rofe (1290), author of the "Kelil Yofi" and "Sefer ha-Mibḥar"; Aaron ben Elijah of Nicomedia, author of "Eẓ Ḥayyim" (1346).

The security and prosperity enjoyed by the Jews under the first Turkish rulers brought about a great scientific movement; and Constantinople became the focus of Jewish learning. Mohammed the Conqueror followed the custom established by his predecessors in nominating a ḥakam bashi, or grand rabbi, chosen from the Rabbinite Jews. Sambari (Neubauer, "Medieval Jewish Chronicles," i. 153) gives the names of the rabbis of Constantinople who officiated from 1453 to 1672 as follows:

Rabbis.

Moses Capsali; Elijah Misraḥi; Tam ben Yaḥya, author of "Ohole Tam"; Elijah Capsali, author of a historical work entitled "Debe Eliyahu"; Samuel Yafe, author of "Yefeh Toar," etc.; Samuel Saba'; Joseph ibn Leb; Joshua Ẓonẓin, author of "Naḥlah li-Yehoshu'a"; Hananiah ben Yaḳar; Jehiel 'Anabi; Elijah ben Ḥayyim, author of "Torat Mosheh" and responsa; Moses Aruk; Mordecai ha-Kohen; Gedaliah Ḥayyun; David ha-Kohen; Samuel di Curiel; Elijah ha-Levi; Abraham ibn Jamil; Gabriel Alya; Eliezer ben Naḥmias; Shemariah Sharbiṭ ha-Zahab; Ḥayyim Egozi; Abraham Monson; Isaac Ashkenazi; Jehiel Bassan; Joseph of Trani; Jeremiah Mabrogonato (מאברוגונאטו); Salomon Caro; Samuel ben וולייסיד (?); Yom-Ṭob ben Ya'ish; David Egozi; Abraham Allegre; Baruch ben Ya'ish; Baruch ben Ḥayyim; Judah Afna'im; Abraham Sharbiṭ ha-Zahab; Aaron Cupino; Ḥayyim Alfandari; Moses ben Shangi; Baruch Ashkenazi; Joseph ben Shangi; Isaac Ispania ha-Rofe; Ẓemaḥ of Narbonne; Isaac Sasson; Moses Bassan; Elijah; Meïr Isaac; Eliezer ben Shushin (שושין); Isaiah of Trani; Joshua Benveniste; Ḥayyim Benveniste; Moses Benveniste; Yom-Ṭob ben Yaḳar; Joseph ha-Kohen Ḥasid; Ḥayyim Algazi; Moses Afna'im; Solomon ben Mubḥar; Yom-Ṭob Birbinya; Aaron Hamon; Jehiel Bassan the Younger; Aaron Yiẓḥaḳi; Nissim Egozi; Abraham Ashkenazi; Meïr de Boton; Samuel ha-Levi; and Samuel 'Adilah.

Besides these rabbis, many of whom were equally renowned for their great Talmudical knowledge and for their proficiency in the secular sciences, there were in the second half of the fifteenth century and during the sixteenth a succession of brilliant writers and scholars, such as Mordecai Cumtino, Shabbethai ben Malkiel, Solomon Sharbiṭ Zahab, Joseph ibn Verga, and Moses Pizanto. The characteristic feature of that period was the scientific intercourse between the Karaites and the Rabbinites. In spite of some obscurantists, who attempted to interrupt these relations by excommunications and other violent measures, Rabbinite scholars instructed the Karaites in rabbinical literature and the secular sciences; and this circumstance had a salutary effect upon the Karaite community, which had hitherto been immersed in ignorance. A series of brilliant writers and scientists, such as the Bashyaẓis, Caleb Afendopolo, Abraham Bali, Moses Bagi, and Joseph Rabizi, arose within it and became illustrious in various branches of knowledge.

Printing-Offices.

The impetus to learning was much furthered by the establishment in Constantinople of Hebrew printing-offices, the first of which was opened in 1503 by David Naḥmias and his son. In 1530 the renowned printer Gerson Soncino established another; and a third was opened in 1560 by the Ya'beẓ family. Authors who could not afford to publish their works found at Constantinople Mæcenates who were willing to defray the necessary expenses. Thus Esther Kiera paid the cost of publication of the "Sefer ha-Yuḥasin" of Zacuto in 1566; Nathan Ashkenazi, the son of the ambassador, published at his own expense the responsa of Moses Alshech. In 1579 the duchess Regina Nassi established a printing-office in her palace at Belvedere, where authors without means were sure of assistance. See CONSTANTINOPLE (TYPOGRAPHY).

The retrogression in the political and economic conditions of the community extended to the literary movement. After the Shabbethai Ẓebi agitation Constantinople ceased to be a focus of Jewish learning, and during the eighteenth and nineteenth centuries it could not boast of a single name of importance. The rabbis of this period were:

Abraham Rozanes (c. 1727); Samuel Moohas (1790); Abraham Levy (1835–36); Samuel Ḥayyim (1836–39); Moses Fresco, called "Rab ha-Zaḳen" (1839–41); Jacob Behar David (1841–54); Ḥayyim Cohen, called "Rab Cahana" (1854–60); Jacob Abigdor (1860–63); Yaḳir Geron, called "Rab Preciado" (1863–72); Moses Halevy (1872).

The leading rabbinical writers of this period were:

Abraham Soncino (1703); Eliezer ben Sanche (1720); Elijah Alfandari (1720); Tobias Cohen (1729); Jacob Kuli (1733); Elijah Palombo (1804); Moses Fresco and Abraham Abigdor (1827); Raphael Shacky (1839); Jacob Rofe (1849); Solomon Ḳimḥi (1862); Joseph Alfandari (1868); Ḥayyim Menahem Frangi and Hezekiah Medini (still living in 1902).

In 1853 Leo Ḥayyim de Castro founded the first Jewish periodical in Judæo-Spanish, entitled "Or Yisrael; õ La Luz de Israel," which was followed by "Jornal Israelit" (1860); "Sefat Emet, õ El Luzero" (1867); "Sharkiye" (The Orient), in Turkish, with Hebrew characters (1869); "El Tiempo" (1871); "El Sol" (1879); "El Radio de Luz" (1885); "El Amigo de la Familla" (1886); and "El Telegrafo." Of these papers two only are still in existence; viz., "El Telegrafo," a daily, and "El Tiempo," a biweekly.

There are about 55,000 Jews in a total population of 1,000,000, distributed in the following quarters: Haskeui, 20,000; Balata, 15,000; Ortakeui, 7,000; Kuskunjuk and Daghamam, near Scutari, 6,000; Pera and Galata, 5,000; Stambul, around the Sublime Porte, and Maḥmud Pasha, 1,000; various suburbs along the Bosporus — Arnaut-Keui, Pasha Bagtche, and Buyukdere—300; Haidar Pasha and Kadi Keui, 700. Ritually they are divided into three classes; viz., Sephardim numbering 51,000; Ashkenazim, 3,000; and Karaites, 500.

Population and Constitution.

In conformity with the "Constitution of the Jewish Nation" granted to them in 1865 by the Ottoman government, the Jews of Constantinople are governed by a ḥakam bashi, or chief rabbi, and two assemblies, the civic communal council, Mejlis Jasmani, and the spiritual council, Mejlis Ruḥani, each council being elected for three years by an assembly of notables. The former numbers among its members the majority of the Jewish officials employed by the government; while the latter is composed exclusively of rabbis well versed in the Talmud. The Jewish settlement in each quarter has in addition a spiritual leader, who is consulted on all sorts of religious questions, and who presides at the administrative council of every synagogue. In every quarter there is a Jew bearing the title "Kehaya," whose duty it is to notify the city government of Jewish births, deaths, and transfers of real estate.

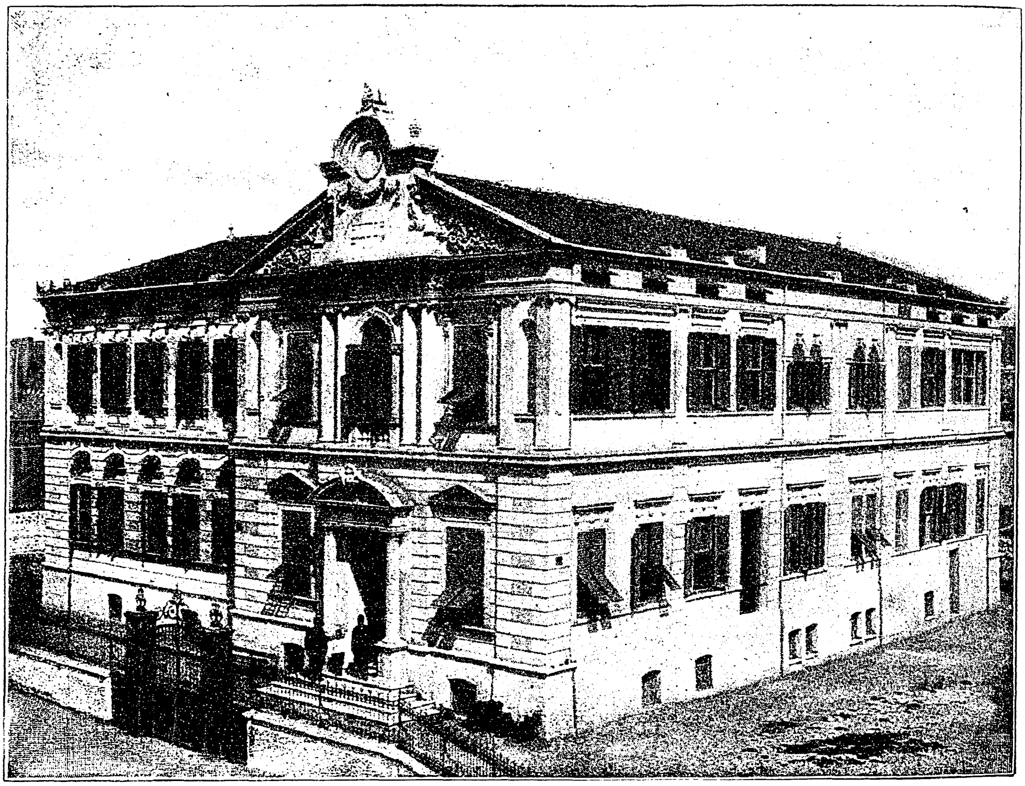
Rabbinical Courts.

In the three populous suburbs of the city there are three rabbinical courts, which, however, decide only in divorce cases, all other legal matters being under the jurisdiction of the state. The rabbinical court of

Balata has at its disposal a prison called "Ḥakan Khane."

The annual budget of the consistory amounts to 111,692 francs, being revenue from the tax on meat, cheese, wine, brandy, and unleavened bread, from a poll-tax paid by the rich notables, and from taxes on marriage certificates, passports, and transfers of real estate.

There are in Constantinople 40 synagogues and 4 batte midrashim. None of the synagogues is very old, all having been burned down and rebuilt. Those of Istipol and of Galata seem to be the oldest. In 1453 the physician to Mohammed the Conqueror, Moses Hamon erected a house of prayer at Haskeui, and called it by his name, "Ḳahal Ḳadosh Hamon." Other synagogues, notably that of the Exile ("Gerush"), were built after 1492 by Spanish exiles and others.



THE JEWISH HOSPITAL AT CONSTANTINOPLE.
(From a photograph.)

The Alliance Israélite Universelle supports 11 schools at Constantinople: 6 for boys and 5 for girls, with a total attendance of 3,000. More than 1,000 children attend the Talmud Torah; and there are about 30 private schools. In 1898 a Jewish seminary was founded under the direction of Abraham Danon. Some young Jews attend the higher schools of the state, for the study of medicine, law, pharmacy, fine arts, agriculture, etc.

The community possesses the following twelve benevolent agencies:

Benevolent Institutions.

(1) The Society of Jewish Women of Pera and Galata, founded in 1893, to assist lying-in women, widows, the sick, and the poor; (2) Ahabat Ḥesed, founded by young men of Pera and Galata, to provide clothing for poor children of the Jewish schools; (3) Bruderverein, founded in 1875, to assist the poor and the sick of the Ashkenazic congregation; (4) Jungbundsverein, founded in 1897, to provide meals for poor children of the German Talmud Torah; (5) the Society of German Women, founded in 1897, to establish a hospital and to maintain an asylum for the aged; (6) the Society of Jewish Young Women of Pera, founded in 1894, to feed the poor pupils of the girls' school at Galata: it clothes 150 children every year, besides furnishing medicine and relief to the poorest; (7) the Society of Jewish Women of Haskeui, founded in 1895, to aid lying-in women; (8) Or ha-Ḥayyim of Balata, founded in 1885, to establish and maintain a Jewish hospital, which latter was inaugurated Sept. 1900 in a handsome new building on the shores of the Golden Horn; (9) Society Meḳor ha-Ḥayyim of Haskeui, founded in 1895, to aid the poor and to provide pecuniary assistance to young men studying in the government colleges; (10) Society Ẓeror ha-Ḥayyim of Haskeui, founded in 1896, for a similar purpose; (11) Society Ha-Ḥemlah of Balata, founded originally under the name "Ha-Tiḳwah," for mutual financial aid; (12) Society 'Ozer Dallim of Kuskunjuk, for the same purpose as the preceding. There is also a ḥebra ḳaddisha in each quarter.

The majority of the Jews of Constantinople are poor, and are engaged in petty trade, in pedling, or as porters, fishermen, and boatmen. A small industry peculiar to the Jews is the cutting of cigarette-paper. Still, there are among them rich wholesale merchants and bankers of the second or third rank. A dozen Jewish banks are connected with

(In the Columbia University Library, New York.)

Present Conditions.

the stock exchange of Galata. At Pera four or five large Jewish houses manufacture novelties known as "articles de Paris." The principal houses for ready-made clothing are conducted exclusively by Jews from Vienna. A Jew from Salonica named Modiano owns the glass-works at Pasha-Bagtche, the only one of its kind, which furnishes glass to the whole of Turkey. Many Jews (almost all the Karaites) are goldsmiths, jewelers, and money-changers. Through the Alliance Israélite Universelle, Jewish young men are taught various trades, as carpentery, turning, goldsmithery, cabinet-making, type-setting, upholstery, etc. But the Alliance prefers to have them employed as secretaries or accountants in European companies: banks (Ottoman Bank, Crédit Lyonnais), insurance societies, water-works, gas companies, wharves, etc.

A number of Jews are employed in the government offices. The first secretary of the Imperial Divan, who collects all the reports of the Turkish foreign ambassadors and translates them into Turkish, is the Jew David Molho Pasha. Elias Cohen (known as "Elias Pasha") is physician to the sultan.

Jews are found in the civil list of the ministry of public instruction and in consular offices. There are among the 55,000 Jews of the city 20 physicians, and as many druggists, all educated in the government schools, some of them having completed their studies at Paris, Berlin, and Vienna. See BYZANTINE EMPIRE.

J. I. BR.

——**Typography:** In the year 1503 David Naḥmias, a descendant of an old Spanish family, established, in conjunction with his son Samuel, the first printing-office in Constantinople. According to Steinschneider, the first work published by the Naḥmias firm was the Tur, of which edition only one copy, now in the Oppenheim collection (No. 521 F) in the Bodleian Library, is extant. At the death of David Naḥmias in 1511, the press fell under the direction of Samuel, in conjunction with Astruc of Toulon and Judah ben Joseph Sasson. Together with Samuel Rikonim, Astruc of Toulon established, in the same year, an independent press, from which, however, the former withdrew two years later. Astruc continued the office until 1513.

In 1518 another printing-office, in existence only five years, was established by Solomon ben Mazzal-Ṭob. About the same time new presses were established by Joseph ben Ajid al-Ḳabiẓi, Yom-Ṭob Sichri ben Raphael, and Moses ben Samuel Facilino. In 1526 the well-known printer Gerson Soncino entered the field. After his death, in 1530, the business was continued by his son Eliezer until 1547, when it became the property of the physician Moses ben Eliezer Parnas, who held it until 1554. From 1560 typography in Constantinople began to decline; and in the last years of that century there was no press in the city. Printing was then carried on at Belvedere, where the widow of Joseph, Duke of Naxos, had established presses. In 1593 these presses were transferred to Kura Chesme, a village near Constantinople. In 1639 printing was resumed in Constantinople by Solomon Franco and his son Abraham, which concern was still in existence at the end of the century. The leading printers of the eighteenth century (some books appearing at Ortakoï, a suburb) were Jona Ashkenazi (with Naphtali ben Azriel) and his son Nissim Ashkenazi. The following list of the principal publications issued during the sixteenth century will give some idea of the activity of the Constantinopolitan presses during that period. It should be remarked that several of the prints are without the printers' names, some without place of origin, and a few without either.

1503. Arba' Ṭurim.

1586. Ḳohelet, with commentary by Samuel Aripol.
1593. Moses Alshech's "Torat Mosheh."

During the nineteenth century a few Hebrew books were printed at Ortakeui or Constantinople; *e.g.*, Abraham Abigdor's "Zeker le-Abraham" (1824), Isaac Farḥi's "Marpe le-'Eẓem" (1830), Abraham Zaki's "Shemen Rosh" (1839), and Joseph ha-Rofe's "Shemen ha-Ṭob" (1849). But a very large number of books in Judæo-Spanish, and not a few journals, have been issued, a list of the latter being given in the article CONSTANTINOPLE. Karaite books have been published in the nineteenth century by Irab Oglu & Sons.

CONSTANTINOV, VOLHYNIA. See STARO-KONSTANTINOV.

CONSTANZA (until 1878 **Custendje**): Rumanian town in the province of Dobrudja. During the Russo-Turkish campaign of 1828 some Jewish purveyors came with the Russian army to Constanza, and, settling in the place, formed the nucleus of a small community. A separate community was founded later by some members of the Sephardic (Spagnioli) communities of Asia Minor. In 1853, during the Russo-Turkish campaign, the community was further increased, and a cemetery was laid out. Sir Moses Montefiore, visiting Constanza on his journey to Jerusalem in 1868, gave £200 to the president, Ilie Avram, for the purpose of building a synagogue. At present (1902) there are about 1,000 Jews in Constanza; of this number about 400 persons are Sephardim (Spagnioli), and form a separate community. The majority of the Jews are engaged in trade, but there are also some tailors, shoemakers, tinkers, watchmakers, etc. There are two religious schools for boys, one Sephardic, conducted in Spanish, and the other where German is used. There are the usual philanthropic institutions. Aaron Leib Feigenbaum is rabbi of the Ḥobebe Ẓiyyon, and Ḥayyim Solomon Donaufeld of the Bene Ẓiyyon.

E. C. M. BUJ.

CONSTELLATIONS: Clusters of stars. The number of constellations named in the Biblical writings is small. In view of the extensive astronomical attainments of the Assyro-Babylonians, it is safe to predicate of the Hebrews larger knowledge of the starry heavens (compare Ps. viii.) than appears from references actually embodied in Biblical literature; and there is no necessity for accepting Stern's explanation that only such celestial bodies were regarded with interest by the Hebrews as were of importance for calendric purposes in ushering in the seasons (Stern, in Geiger's "Jüd. Zeit." iii. 258; Friedrich Delitzsch, "Hiob," p. 169; see also ASTRONOMY).

The Great Bear.

"'Ash" or "'Ayish" is mentioned twice in Job (ix. 9, xxxviii. 32, R. V.), and has been identified with the Great Bear, though this identification has been rejected by many Biblical scholars. The Arabs certainly knew this brilliant cluster of stars by the name of "Na'sh" (the Bier); and the three stars in the tail they designated as "Banat Na'sh" (the Daughters of the Bier); *i.e.*, the "followers," an appellation still in vogue in modern Syria. A legend is connected therewith, according to which Gedi (the pole-star) slew Na'sh, whose children now are intent upon avenging the murder; while "Suhail" (Canopus) would rush to the slayer's aid (Wetzstein, in Franz Delitzsch, "Hiob," 2d ed., p. 501). The assumed etymological affinity between "'Ash" and "Na'sh" is more than doubtful. Still, in Job xxxviii. 32 the "children" are also introduced, while it would be strange if this most brilliant group were omitted from Job ix. 9.

"'Ash."

The vocalization "'Ayush" is proposed by Hoffmann (in Stade's "Zeitschrift," iii. 107); "'Iyush," by Brown-Briggs (Gesenius, *s.v.*); and "'Esch," by Friedrich Delitzsch (in "Hiob," xxxviii. 32), who previously identified it with "Moth," a star known as such to the Assyrians ("Assyr. Handwörterb." *s.v.* "săsu"), but in his "Hiob," in ix. 9, translates by the German equivalent of "Great Bear." Luther renders "Wagen" (Wagon), and in this has been followed by Ideler ("Sternnamen," pp. 21 *et seq.*), Hirzel, Ewald, Franz Delitzsch, Hitzig; and R. V. Stern (*l.c.*) maintains that the Pleiades are meant—a view accepted by Schrader, Nöldeke (Schenkel's "Bibel-Lexikon," iv. 370), and G. Hoffmann (*l.c.*). Merx writes "Canopus." Of the old versions, the LXX. in Job ix. 9 has Πλειάς, and in *ib.* xxxviii. 32, Ἕσπερος. The Vulgate and A. V. in ix. 9 have "Arcturus," and "Vesperus" and "Arcturus" respectively in xxxviii. 32. Targum in the former verse gives the Hebrew word; in the latter renders by the Aramaic for "hen" (= Pleiades). The Syriac has "'Iyuta" (= Aldabaran; see Merx, in xxxviii.) or the Hyades, which Jensen (*l.c.*) also suggests. Of this Syriac word, the Talmudical יותא (אתא in some manuscripts), Ber. 58b, is the East Aramaic form. According to Levy, the latter is the seven-starred (Little) Bear; but in the passage itself R. Judah explains it as the *tail* of the Ram, if not the *head* of the Wagon or, according to Rashi, of the Bull. Kohut ("Aruch Completum," *s.v.*) derives it, as Stern and others before him, from the Greek Ὑάδες, and explains it as a cluster of seven stars in the head of Taurus. Of medieval Jewish commentators, Saadia identifies it with the Bear; ReDaḲ, again, in his dictionary, under עַשׁ, explains זנב טלה as the tail of the Ram. Ibn Ezra merely states that עַשׁ = "seven stars." Gersonides locates it as a constellation "within the sphere of the fixed stars."

What terrestrial being עַשׁ is, is not known. Ewald thinks of the Arabic "'ayyath" (lion), and says that the Hebrews called the group the "Lioness and Her Whelps."

Orion is undoubtedly designated by the Hebrew "Kesil" ("Fool"; see below) in Job ix. 9, xxxviii. 31; Amos v. 8; Isa. xiii. 10. Of the ancient versions, the LXX. has "Orion" in Job and Isaiah, while Targum and Peshiṭta render by "Giant." In this there is a reminiscence of an ancient, perhaps pre-Semitic, myth—also current in variants among the Greeks—concerning a giant bound to the sky, whom the Hebrews, with characteristic reflection upon his presumption to resist and defy heavenly power, labeled "Fool." Nimrod was associated with this "Fool" by later folk-lore. The question in Job about loosening the bands (xxxviii. 31) has reference to this, and not, as Dillmann contends (commentary, *ad loc.*), to the rise and fall of the stars according as the "rope with which they are drawn" is tightened or slacked.

The Jewish medieval commentators hold the "Kesil" to have been either the Arabic "Suhail" (= Canopus) or Sirius. On the plural, in Isa. xiii. 10, see Jensen, *l.c.* (note also his suggestion that "Kesil" is a generic name for "comet").

"Kimah" (Job ix. 9, xxxviii. 31; Amos v. 8) is the "Hen" (Luther) with her brood. Etymologically, the name signifies "a heap," and is thus very appropriately descriptive of the cluster, now known as the Pleiades, in the zodiacal sign of the Bull.

Pleiades.

Stern (*l.c.*) argues that "Kimah" is Sirius. In the Talmud occurs this statement: "But for the heat of Kesil, the world could not endure, on account of the excessive cold of the Pleiades, and vice versa" (Ber. 59a; B. M. 106b). "Kimah" is qualified as a planet (מזל; Ber. 58a); the etymology כמאה כוכבים = כימה is, of course, fanciful. The setting of the Pleiades is said to have been the cause of the Flood (Yer. Ta'an. i. 64a, at foot). According to Abu al-Walid, "Kimah" is the Arabic "Al-Thurayya" (= Pleiades). Ibn Ezra reports that his predecessors held it to be a group of seven stars in the tail of the Ram, but he believes it to be a single star, "the left eye of Taurus."

In Job xxxviii. 31 A. V. occurs the puzzling phrase "the sweet influences of Pleiades" (R. V. "cluster of the Pleiades"; margin, "chain"); מעדנות, as shown by the parallelism with the "bands of Orion," and the expression "canst thou bind," is a transposition of מענדות ("chains" or "fetters"). Some mythological allusion is probably hidden in the expression.

Ḳimḥi's explanation, that the reference is to the ripening of the fruit ("Kesil"), or the reverse ("Kimah"), is plainly too rationalistic, notwithstanding the Talmudic authority he quotes or the opinion of his father (under קיטר).

What "Mazzarot" (Job xxxviii. 32) may be is still unsettled. Perhaps it is identical with "Mazzalot" (II Kings xxiii. 5). If so, it might designate Saturn or the seven planets. Stern (*l.c.*) would have this strange expression denote the Hyades. Ewald, for the passage in Job, claims the reference to be to the Northern and Southern Crowns, corresponding to the "chambers of the South" ("Teman") in Job ix. 9. Others have suggested the constellation of the Southern Ship, characterized in an Arabic translation as the "heart of the South"; others again suggest Sirius. Friedrich Delitzsch leaves the problem open, simply transliterating the Hebrew (see his "Hiob," p. 169, note to verses 31 *et seq.*). It has also been held to designate the Zodiac.

According to Schrader (Schenkel, "Bibel-Lexikon," v. 398), the constellation of the Dragon is mentioned in Job xxii. 13 (R.V. "swift serpent"); but this is very problematic. Winckler has suggested to read for "Nadgalot"; in Cant. iv. 4, 10, "Nergalot"; *i.e.*, the Twins (Gemini; see "Altorientalische Forschungen," i. 293).

CONSTITUTION. See Government.

CONSUMPTION (TUBERCULOSIS): An infectious disease, due to the entrance of the tubercle bacillus into the body. The question of the relative infrequency of consumption among Jews has engaged much attention among physicians and anthropologists. It is well known that dwellers in large cities, particularly those living in crowded and insufficiently ventilated tenement-houses, are generally the first victims of the tubercle bacillus. Tailoring and other sedentary occupations that are favored by Jews tend to raise the percentage of tuberculous patients. Consanguineous marriages, common among Jews, are also a predisposing cause of this disease.

Predisposing Causes.

Accordingly, the Jews, particularly those residing in the congested tenement districts of large modern cities, like New York, London, Vienna, Odessa, etc., suffer from this disease more than others. In fact, the appearance of many a modern Jew would immediately lead one to suspect the presence of tuberculosis. He is more stunted in growth than almost any other European. According to the statistics given by Jacobs (see An-

THROPOLOGY), "the average height of the Jews is 162.1 cm. [5 ft. 3 in.]; span of arms, 169.1 cm. [5 ft. 6⅝ in.]; and girth around the chest, about 81 cm. [31.9 in.]: so that they are the shortest and narrowest of Europeans." The exceptionally narrow girth of Jews gives them what is technically known as the lowest "index of vitality." The Jews are also town-dwellers; four-fifths of the Jewish populations live in large towns, while only one-third of the non-Jewish populations live in cities.

All these conditions, added to their poverty, constant grief, anxiety, and mental exertion, besides the ceaseless persecutions to which they are subjected, tend to make them ready victims to tuberculosis; and when Jacobs attempted to collect statistics on the subject in 1885 ("Racial Characteristics of Modern Jews," in "Journal of the Anthropological Institute," 1885, xv. 23-62) he found only two favorable reports—one by Lombroso in regard to the Jews in Verona, showing a mortality from consumption of 6 per cent as against 7 per cent among Catholics; and the other by Glatter, from a Hungarian district, giving 14.4 per cent for Jews as against 16.9 per cent among Magyars, 16.4 per cent among Slavs and 19.5 per cent among Servians, but as against only 13.5 per cent among Germans. On the other hand, Jacobs has found in London no less than 13.1 per cent among Jews, against 11.3 per cent for the whole Whitechapel district. He further quotes Pruner to show that consumption is very prevalent among the Jews in Egypt, as it is in Algeria, according to Haspel and others, and in South Russia, according to Tchubinsky, etc.

In the Russian Army.

More recent statistics on the subject, however do not bear out the contention that the Jews are more liable to consumption than non-Jews. Thus, in a paper on consumption in the Russian army, Shtchepotyeff ("Vratch," 1900, viii. 232) states that among a certain number of soldiers, composed of 88.82 per cent Christians, 5.79 per cent Mohammedans, and 5.03 per cent Jews, the percentage of consumption was 88.89 for Christians (527 cases), 7.21 for Mohammedans (37 cases), and 3.98 for Jews (21 cases).

In the evidence taken before a commission in Victoria, Dr. MacLaurin stated that among the Jews of New South Wales, numbering 4,000, and dwelling mostly in towns, but one death from consumption had occurred in three years; whereas, if the disease had been as prevalent among them as among the rest of the population, 13 or 14 would have succumbed. Dr. Behrend says that their "comparative immunity from the tubercular diathesis has been recognized by all physicians whose special experience entitles them to express an opinion"; and it is the more remarkable when the adverse conditions under which the vast majority live are taken into consideration.

In London.

Drs. Loane, Gibbon, and Drysdale, medical officers of health in some of the poorest quarters of London, where the bulk of the Hebrew population dwell, have repeatedly commented upon this fact in their official reports. In May, 1897, the Jewish Board of Guardians in London appointed a committee to inquire into the increasing prevalence of consumption among the Jewish poor, with a particular view to the adoption of suitable prophylactic measures. The committee in its report arrived at the unexpected conclusion that during the preceding fifteen years there had been no increase in the prevalence of consumption among the Jewish poor, allowance being made for the growth of the Jewish population of the East End of London ("British Medical Journal," July 2, 1898). Dr. Gaster, basing his opinion on the burial returns of the United Synagogue from 1889 to 1893 as compared with those of the registrar-general, states that among the Jews in London there are relatively only about one-half as many cases of consumption as among the non-Jews.

Drs. Tostivint and Remlinger, who have lately investigated the subject in Tunis, state that during the four years 1895-99 the Jews of Tunis lost 2,744 by death, of whom only 34, or 1.24 per 1,000, died from tuberculosis. They further calculate that the average annual mortality from tuberculosis between the years 1894 and 1900 was:

Mussulman Arabs	11.30 per 1,000
Europeans	5.13 " "
Jews	0.75 " "

In the United States.

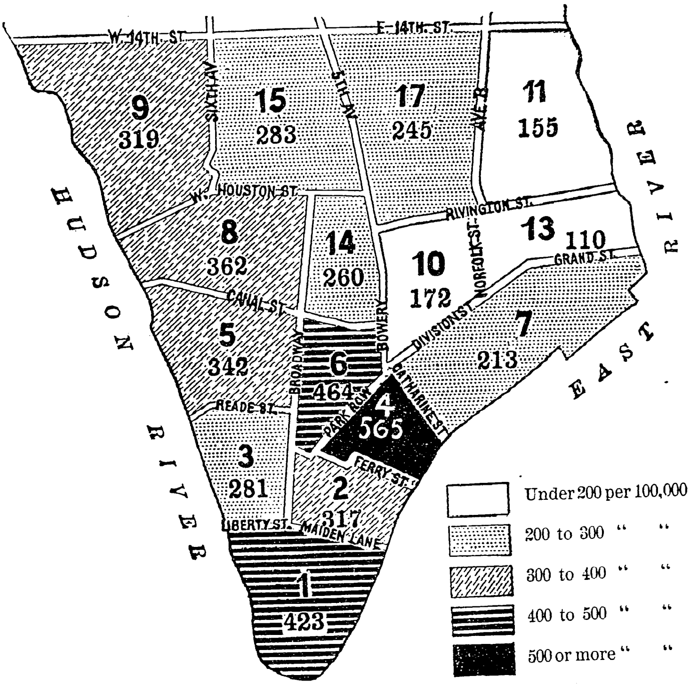
In the United States, Dr. Bowditch was the first to call attention to the fact that the Jews are less susceptible to tuberculosis than other races. Dr. John S. Billings, in his "Reports on Vital Statistics of the Eleventh Census of the United States," has again drawn attention to this curious fact. He has conclusively shown that the death-rate from consumption per 1,000 deaths among Jews was 36.67 for males and 34.02 for females; while that of the United States (1880) was 108.79 for males and 146.12 for females, and that of Massachusetts (1888) was 129.22 for males and 146.97 for females. Again, in his "Report on Vital Statistics of New York and Brooklyn," Billings has shown (see table below) that in 1890 the mortality from tuberculosis among the Russians and Poles of New York city, who are mostly Jews, was lower than that among any other race.

TABLE SHOWING THE DEATH-RATE FROM CONSUMPTION PER 100,000 POPULATION IN NEW YORK AND BROOKLYN DURING THE SIX YEARS ENDING MAY 31, 1890.

Race.	New York.	Brooklyn.
Colored	774.21	531.35
Mothers born in—		
Ireland	645.73	452.79
Bohemia	499.13	347.22
Russia and Poland (*mostly Jews*)	98.21	76.72
Scotland	384.12	269.24
Scandinavia	357.00	218.92
Canada	352.32	266.27
Germany	328.80	295.61
France	394.98	252.82
England and Wales	322.50	233.78
Italy	233.85	123.00
United States (*White*)	205.14	180.79
Hungary (*mostly Jews*)	155.05	120.77

"From these figures," says the census report, "it appears that consumption was most fatal among the colored, the Irish, and the Bohemians, and least fatal among the Russians and Hungarians; that is to say, among the Jews."

These statistics were objected to by some, on the ground that many of those registered by the census officials as Russians or as Poles, were not Jews, but Catholics. In order to test the validity of the figures, Dr. Maurice Fishberg has collected statistics of the mortality from consumption in the New York ghetto. By computing the mortality from this disease in each ward, approximately correct figures were easily obtained. The reports of the board of health of New York show that during the three years 1897, 1898, and 1899 there occurred 119,226 deaths from all causes, and of these, in the boroughs of Manhattan and the Bronx, 15,038 were due to tuberculosis. Of these the proportion for each of the wards in the section of the city below Fourteenth street is indicated in the accompanying map.



Map of New York City South of Fourteenth Street, Showing Average Death-Rates Due to Consumption, During 1897–99.

The average mortality from tuberculosis in the seventh, tenth, eleventh, and thirteenth wards (the Jewish wards) was 162.99 per 100,000 population for the three years 1897, 1898, 1899, while the average for Manhattan and the Bronx was 268.19; while in Manhattan and the Bronx during these three years the deaths due to tuberculosis amounted proportionately to 126 per 1,000 deaths; as is shown by the figures recorded above, in the four Jewish districts referred to the total number of deaths from tuberculosis was 1,419—that is, 99 per 1,000 deaths.

Increase in New York.

Consumption is undoubtedly on the increase among the poorer classes of Jews living in New York city. Dr. Lee K. Frankel, manager of the United Hebrew Charities, has shown that while in 1895 the ratio of consumptive applicants for relief was 2 per cent, in 1899 it reached 3 per cent, an appalling increase of 50 per cent in four years. Frankel also shows that consumption among the Jews in New York is almost wholly confined to the poorer classes, and that foreign-born Jews who suffer from this disease have contracted it after their arrival in the United States. He bases his deduction on an examination of 10,000 death certificates in the office of the New York City Board of Health, beginning with Jan. 1, 1900. In 888 of these the cause of death was stated to be tuberculosis, 72 relating to Jews. Recalling the fact that the Jewish population of New York city is estimated to be at least 15 per cent of the total population, it will be found from Frankel's figures that if consumption were as prevalent among the Jews as among the general population, the number of deaths due to this cause would have been 133. As it is, only 72 were recorded—a little over one-half the rate for the city at large. It is also to be noted that of these 72 cases, 39 died in tenement-houses, 23 in institutions, and only 1 in a private house. This tends to show that the well-to-do Jews are even less liable to consumption than the unfortunate poor, who are huddled together in congested tenements, in poverty and in want, and are exposed in every possible way to infection.

Causes of Relative Immunity.

For this comparative immunity of the Jews from tuberculosis different causes have been assigned. Lombroso attributes it to the fact that the Jews are usually engaged in occupations which require no exposure to the vicissitudes of the weather, this conclusion being strengthened by the fact that other pulmonary diseases, particularly pneumonia, are also infrequent among them, their lungs being consequently in a condition to resist infection by tubercle bacilli. Tostivint and Remlinger do not think it likely that ethnic differences afford the explanation. Nor are they able to discover the reason in deficient nourishment, lack of clothing, etc. The poor Jews in Tunis occupy a portion of the town in common with the Mussulmans; while the few rich Jews live in the European quarter. There is, however, one cause which has been selected as affording a probable explanation. Jews abhor the dusting-brush. They wipe all dusty surfaces with damp cloths, in some instances several times daily. By this means less dust is raised, and the risk of inhaling air laden with tubercle bacilli is lessened. Moreover, the Tunisian Jews use less furniture than their

French and Italian neighbors, and the opportunities for the settlement of dust are correspondingly diminished.

Behrend, with many others, is of the opinion that the relative immunity of the Jews is due to the careful inspection of their meat, examination being made particularly as to disease of the lungs and pleura, and bovine tuberculosis being thereby intercepted. More frequent house-cleaning is another reason given. Of all the causes assigned, however, the most probable are the careful selection of carcasses in Jewish slaughter-houses and the infrequency of alcoholism among Jews. It has been repeatedly shown that the flesh of tuberculous cattle sold for food is responsible for many cases of tuberculosis, and the rigid inspection of meat practised by the Jews has, therefore, the effect of checking to a very great extent the ravages of the disease.

In regard to the infrequency of alcoholism among Jews (see Alcoholism), it may be said that the deleterious effects of alcohol as a predisposing cause of consumption are now recognized by all authorities. Alcohol lowers the vitality of the tissues of the body, and thus enables tubercle bacilli to develop more readily.

In view of what has been said on the infrequency of consumption among the Jews, the conclusion that their comparative immunity from the disease is not due to any racial characteristic of a purely physiological nature, but to kasher meat and the non-abuse of alcohol, may be considered as established.

J. M. Fi.

CONTEMPT OF COURT: Disrespectful demeanor before, or disobedience of, a public authority. Courts of justice must be treated with respect, and their orders must be obeyed; therefore they have in all countries the power to punish acts of disrespect, and to enforce their orders by punishing disobedience.

The judges may punish any disrespect, or any annoyance of their messenger while he is in the exercise of his office (Ḳid. 12b), by infliction of stripes or by the lesser excommunication (M. Ḳ. 16a). When the disrespect is shown to the judges, the guilty party is subject to the law against insults to the learned (Shulḥan 'Aruk, Yoreh De'ah, 342). But the service of a process of contempt for disobedience to the court's orders, and as a means of enforcing obedience, is the more important branch of the subject. An offender is not warned; he is bidden to appear and submit to the court. If he does not he is guilty of disobedience; he has violated a high duty; and so, when the court's messenger reports that he summoned the defendant, and that he refused to appear, the court puts him under the lesser ban (שמתא or נדוי). But if the defendant, being summoned, simply does not appear on the day set for hearing, the ban is pronounced on the day following (B. Ḳ. 112b, 113a). The defendant is in contempt, and can clear himself only by submitting to the jurisdiction of the court and paying the cost of the writ of excommunication.

The notion arose as early as the tenth or eleventh century (see historic examples in Bloch, "Die Civilprozess-Ordnung," p. 27) that the court might bring the pressure of the community to bear on the renitent by suspending public worship in the synagogue which he attended, at first on work-days only, and then, this step being insufficient, on Sabbaths also.

After judgment rendered, if the condemned does not obtain a stay of proceedings, or show by oath his inability to pay, and no property of his is in sight, though the judges feel assured of his ability to pay, some maintain that a process of contempt in the shape of imprisonment can be awarded (Isserles' gloss to Ḥoshen Mishpaṭ, 97, 15; see Ket. 86a). If he declares that he will not obey, he should be put under the lesser ban at once; if he still fails to comply with the judgment, he must first be warned, and may then be put under the ban; and if he remains obdurate for thirty days, he is then subject to the greater excommunication ("herem"—see Ḥoshen Mishpaṭ, 19, 3; Sanh. 25, 11).

Although it is the duty of those who know disputed facts to come forward and testify (Lev. v. 1), yet rabbinical jurisprudence has not provided a writ to call for the attendance of witnesses at the instance of a litigant, like the subpœna of English and American law. Hence the process of contempt most frequent under that law, the attachment against the body of a witness who fails to appear when called, is not known to the Jewish codes.

L. G. L. N. D.

CONTRACT: In law a formal agreement recognized as constituting an obligation to do or not to do a particular thing. Both Bible (Prov. vi. 1-5; perhaps also Deut. xxiii. 23 and Ps. xv. 4) and Mishnah (B. M. iv. 2) attach great sacredness to a promise, and rebuke a breach of promise, even where the courts of law can not enforce its observance. From the above-cited passage in Proverbs and from other passages in the same book, it seems that at one time "striking hands" over a promise, like the "Handschlag" in German law, gave special force in the courts to a promise or contract. In the Talmud this ceremony carries only a moral or religious sanction. There is no one word, either in Bible or in Mishnah, which, like the Latin "contractus" or "pactum," or the English "contract," covers all agreements from which a liability or change of rights may arise. Different kinds of contracts, whether executed or executory, are denoted by their own special names. As to some of these the article on Deed may be consulted; in which article it also appears that greater force is given to a contract by the formality of drawing it up in writing and by having it attested by two competent witnesses. In the article Alienation and Acquisition it has been shown that the executed contract of sale, conveyance, or gift can take effect only by the actual delivery of an article, and not by the assent of the parties alone.

Contract by Deed.

An undertaking, in the course of judicial proceedings, to pay a stated sum—for instance, an undertaking by a friend of the defendant to become surety for him in order to postpone execution on a judgment—has in all respects the same force as an attested bond (this doctrine is deduced by the codifiers from Mish. B. B. x. 8; see references in "Be'er ha-Golah" to Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 129, 6); just as in common law a recognizance in court becomes a "debt by specialty" as much as a bond under seal.

Revocation by Contract.

The law, written or oral, has established certain rules which govern the ordinary relations of life and the contracts growing out of them; such as the relations between the owner and bailor, and the bailee or keeper of goods (see Bailments). In most cases it is competent for the parties to change the implied rules by express contract. He who exacts or stipulates for such special terms is called "matneh" (מתנה), and while the Mishnah (B. M. vii. 11) lays down the rule, "Whoever stipulates against what is written in the Torah finds his terms void," this is but one of those opinions of R. Meïr which form the undistinguished text of the Mishnah, but are not always good law; while, according to the Gemara (B. M. 94a), the opinion of his contemporary, R. Judah ben 'Illai, prevailed; viz., that in mere matters of money, stipulations contrary to the Torah were admissible. In the case of marriage it seems that all are agreed that a stipulation not to pay the wife the minimum of a jointure in case of the husband's death, or of divorce, being altogether contrary to the policy of the Law and to the dignity of the daughters of Israel, must be deemed void as well as immoral (see Ketubah). A contract for the payment to a fellow Jew of interest on a loan is, of course, void; for the Mosaic law forbids by its own terms the debtor's promise as well as the creditor's exaction of interest. For like reasons, it seems that an agreement to keep alive a debt (at least one arising from a loan) beyond the year of release would have been deemed ineffectual but for Hillel's institution ("taḳḳanah") of the Prosbul.

Conditional Contracts.

The rule as to conditions precedent, found in the same section of the Mishnah, has, at the end of the article on Alienation, been explained by a quotation from Maimonides applicable to cases where the fulfilment of the condition is to lead to the transfer of property. The Shulḥan 'Aruk (Ḥoshen Mishpaṭ, 207, 11, 12) shows how in other cases promises to take effect upon the fulfilment of a future condition are ineffectual, even where the promisor, to give effect to his promise concerning a bond or deed, puts it into the hands of a trustee ("shalish"). It seems to have been the policy of the sages to exclude everything like complication in contractual dealings between man and man.

Under the Jewish law an executory contract had to rest upon a consideration; but this need not go to the personal benefit of the obligor. There is a consideration for the promise of the surety, in a loan or forbearance given to the principal debtor, provided the surety binds himself at the time the debtor receives the benefit (see Deed, referring to B. B. x. 8); while a subsequent promise by the surety would be without consideration (see Asmakta).

But while, generally speaking, a consideration is necessary to support a promise, a person may, with his eyes open, bind himself by bond, or by a promise in the presence of witnesses, to pay to another a sum of money, though he does not owe him anything whatever, just as he may make to another a deed of gift of land; which principle is derived from B. B. 149a, "to acquire by acknowledgment," and from Ket. 101b (see Maimonides, "Yad," Mekirah, xi.; also Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 40). But where the bond or promise is made under a mistaken belief by the obligor that he owes, or is liable for, the sum named (see, for an illustration, Ḥoshen Mishpaṭ, 126, 3), such bond or promise may be avoided upon a showing of the true facts and of the mistake committed, just as a Mistaken Purchase may be set aside. For, as at common law "fraud vitiates everything," so, to a great extent, does mistake.

Date of Contract.

Where a contract is made on a Sabbath or a day of festival, although the parties should be punished for breaking the custom which forbids trading on the Sabbath and on festivals, yet the contract is good; for the act giving effect to it, such as the handling or moving of a bought chattel, or occupancy of a bought parcel of land by the purchaser, is not generally a breach of the Sabbath under the Mosaic law; and, after the day closes, the contract may be reduced to writing (Mekirah, xxx. 7; Ḥoshen Mishpaṭ, 235, 28).

For different kinds of contracts see Alienation and Acquisition; Bailments; Broker; Deed; Loans; Master and Servant; Suretyship.

CONTROVERSIAL LITERATURE. See Polemics and Polemical Literature.

CONVERSION TO CHRISTIANITY: Conversion is the Biblical term for the turning of the sinner from his evil ways to God (תשובה). "Sinners shall be converted unto thee" (Ps. li. 13; compare Isa. i. 27, and Jer. iii. 12, 14, 22, where the A. V. has "return"; Ecclus. [Sirach] v. 7, xvii. 24-26, xviii. 13, xlix. 2). There can be no conversion without change of heart and conduct; that is, repentance of sins committed (Deut. xxx. 2; Isa. lv. 7; Jer. xxiv. 7; Ezek. xviii. 27 *et seq.*; Joel ii. 13; see Repentance).

Conversion of the heathen nations to a belief in God is one of the fundamental Messianic expectations (Isa. lxvi. 19-23; Zeph. iii. 9; Zech. xiv. 9), and it is based upon the conception of an original revelation of God common to all men, wherefore heathen sinners are also expected to repent and turn to God (Jonah iii. 3; Sibyllines i. 129, iv. 169). For the sake of converting the heathen, idolatry was denounced by the seer of the Exile (Isa. xli.-xlvi.), and individual heathens were in fact won over (Isa. lvi. 6). The whole Hellenistic propagandist literature, foremost in which are the Sibylline Books, had the conversion of the Gentiles for its object, though its intention was to make them rather observers of the Noachidic laws, which included the worship of God as the Only One, than members of the Abrahamitic covenant; that is, full proselytes. A prayer for the conversion of the heathen is offered at the close of every service in the synagogue (see 'ALENU). In pre-Christian times very determined efforts were made toward proselytizing the heathens (see Matt. xxiii. 15: "Ye compass sea and land to make one proselyte"; compare Gen. R. xxviii. and Cant. R. i. 14: "The annual conversion of one heathen saves the whole pagan world"); but as soon as the Church took up the task, following the methods of Paul, who was eager to let "the fulness of the Gentiles come in" (Rom. xi. 25), the zeal of the Jews diminished, and "the conversion of the Gentiles," which "caused great joy unto all the brethren" (Acts xv. 3), became obnoxious to the Synagogue (Yeb. 47b; see PROSELYTES AND PROSELYTISM).

Conversion of the Heathen.

No sooner had the Roman world been conquered by the Church than the conversion of the Jews became its ever present aim, much against the intention of the founder of Christianity (Matt. x. 6); and henceforth conversion assumed a new meaning. It was no longer a return to God in repentance, but the adoption of a new faith—not always from inner conviction, but under the influence of a ruling and threatening outward power. No barbarity seemed too cruel to be used as a means of enforcing the conversion of the Jews (see the letter of Bishop Severus concerning the Jews of Magona [island of Minorca], in Grätz, "Gesch." 3d ed., iv. 363: compare v. 47, 49, etc.), although Pope Gregory I. (*ib.* v. 41), Bernard of Clairvaux (*ib.* vi. 151), and other prelates deprecated such measures (see Ersch and Gruber, "Encyc." section ii., pp. 57, 62, 68, 77, 124, 151 *et seq.*, 221 *et seq.*, 230 *et seq.*). Even when, for the sake of keeping up the semblance of conversion by arguments, "disputations" were held between Jews and Christians in the presence of potentates, prelates, and the people, the defeat of the Jews was a foregone conclusion, and renewed persecution the unfailing sequel. Strangely enough, Jewish apostates acted as the most unscrupulous defamers of Judaism with the view of converting their former brethren (see APOSTASY). The conversion of the Jews formed at all times an object of ambition of the Roman pontiffs, who compelled the Jews to attend at least once a year the Catholic service, for the purpose of listening to a conversionistic appeal. This practise was also followed in England, where the legal enactment forbidding Jews to disinherit their baptized children (see DISABILITIES) was enforced. In 1550 Pope Paul III. founded an institute for the conversion of Jews. England had its Hospital of Converts and House of Converts in London and Oxford as early as the thirteenth century (see "Missionen unter den Juden," in Herzog-Hauck, "Real-Encyc." 2d ed.).

Conversion of the Jews.

As to the results of such efforts Luther's utterance is characteristic: "It is as easy to convert Jews as to convert the devil himself" (quoted by Heman in "Missionen," in Herzog-Hauck, *ib.*). More typical is the story related of Everard, a highly respected Christian convert of the thirteenth century (see Brisch, "Gesch. der Juden in Cöln und Umgebung," i. 76 *et seq.*). After having led a secluded life as canon of the Church of St. Andrew in Cologne, he refused to take the sacraments in his dying hour, but gave orders to have a dog, a cat, a hare, and a mouse—animals which he had for years kept penned up in his courtyard—brought before him in the presence of all his friends; no sooner were they let loose than the dog seized the hare and the cat the mouse. "Behold," he then said to his assembled friends, "these four animals, which have never seen one another before, but have always been kept apart, acted simply in obedience to the instincts of their nature. Yet as little as the dog will ever cease running after the hare, and the cat after the mouse, so little will the Jew ever become a true Christian." Soon after, he breathed his last.

Futility of Conversionism.

For medieval conversions to Christianity see APOSTASY AND APOSTATES.

The modern era of culture and reason greatly changed the attitude of the Christian toward the Jew. No longer did the broad-minded Jewish man of affairs, such as the Spanish period produced, look down with disdain upon his intellectually inferior Christian antagonist. The breadth of view and the larger knowledge were now on the side of the Christian, while in the narrow ghetto the mind of the Jew had become cramped, and his whole life and thought were circumscribed by the Talmud. It was frequently from sincere pity that Christian statesmen and religious leaders looked for the day when, as the Church believed, "the veil of Moses" would be taken from the Jewish people, so that they should no longer appear "as a mere wreck and ruin of the past, a mummy preserved by the centuries only to testify to the living truths of Christianity." Their conversion was one of the motives which led men like Cromwell (Grätz, "Gesch." x. 104; Blunt, "Status of the Jews in England," p. 30) and Vane (see O. S. Straus, "Roger Williams," p. 172) to grant liberty and civil rights to the Jews. Others, again, were moved by the same motives to oppose such concessions (see "Juden-Emancipation," in Ersch and Gruber, "Encyc.").

Modern Conversionism.

In his turn the Jew came to regard Christianity in a different light, especially where a return to the simple teachings of the New Testament became the aim of many Christians, and where the growth of friendly relations disclosed to both Jew and Christian the fact that they had many more interests to unite them than differences to keep them apart. To Jews ambitious to obtain worldly success, the temptation came in many forms to remove the barrier of creed by a few drops from the baptismal font, willingly bestowed by the ruling Church; and many a descendant of Abraham, eager to eat of the fruit from the tree of modern knowledge, forbidden to him in the ghetto, was perplexed by the question whether he might not don the garb of Christianity in order to participate in its culture. The Protestant Church was quick to perceive her opportunity, and organized her efforts toward the conversion of the Jews, being in many countries supported by the government in its dealing with the Jews as citizens. Still the spirit of loyalty held the Jew within the fold, and only a few, and those rarely of the best elements, yielded to such influences.

Strange to say, Great Britain, with her liberal policy toward the Jews, presented at the close of the eighteenth century the first large list of secessions from the Jewish camp. The descendants of those who bravely resisted the storms of persecution in Spain were ready, when the sun of prosperity smiled on them, to sacrifice the pride of their ancestral heritage to the blandishments of fortune and fame offered to the converts (see J. Picciotto, "Sketches of Anglo-Jewish History," pp. 196 *et seq.*, and Converts, Modern).

In America, too, the same fate befell a number of Jewish families scattered throughout the country. Without organization and the strength of conviction, they were lost in the various churches; only occasionally features and names betray their Jewish origin (see "Publications Am. Jewish Hist. Soc." i. 98, ii. 91, iv. 197; Kohut, "Ezra Stiles and the Jews," pp. 37–49, 85, 111; Wise, "Reminiscences," pp. 62–70, 272; Lowell, in "Atlantic Monthly," Jan., 1897; Kohler, in "American Hebrew," Jan., 1892).

Christian Missions to Jews.

The first attempt to organize the work of converting the Jews was made in Holland at the synods of Dordrecht, Delft, and Leyden (1676–78). The example was followed in other Protestant countries. In Hamburg Esdras Edzard, a disciple of John Buxtorf, founded an institute for the conversion of the Jews, and the municipal laws of Hamburg, which forced the children of the Jews to attend the Christian schools, greatly aided him in obtaining converts. In Hesse-Darmstadt, where the Jews in the sixteenth century were, as elsewhere, compelled to attend the church once a year to listen to conversionist addresses, there existed also an institute for the conversion of the Jews. In 1736, "400 erring sheep were admitted into the Christian fold, and 600 impostors were refused admission," naively says the official record (see Herzog-Hauck, *ib.*). The next to take up the work of converting the Jews were the Moravian brethren in the middle of the eighteenth century, and the Pietists of Halle, whence the Callenberg Institute (1728–92) sent forth its missionaries over the world. But all these efforts were of little avail. Lavater's attempt to convert Mendelssohn showed the futility of such endeavors (see Mendelssohn, Moses).

Conversions from Worldly Motives.

The tidal wave of cosmopolitan enlightenment achieved for the Church more than all her conversionists could. Captivated by the liberal thought of the age which beheld in creeds the work of priestcraft and superstition, the upper classes of Jews in Germany, Austria, and France gradually broke away from their ancestral religion, which appeared to them as a shackle and a misfortune, and felt no scruple in taking a step which was the only means of freeing the Jew in the eyes of the Christian world from the yoke and the shame of centuries. Not from conviction, but attracted by the hope of brilliant careers or grand alliances, hundreds of Jewish families in Berlin, Vienna, Königsberg, and elsewhere joined the Church, "fluttering like moths around the flame until they were consumed" (Grätz, "Gesch." xi. 155 *et seq.*).

As Grätz correctly states, aversion to the Christian dogma and a profound attachment to the home life and the traditions of the past kept the majority from following the example. Only one power could really stem the evil of apostasy, and this Grätz ignores—the inner reform of Judaism which would again imbue the Jew with self-respect while disclosing to him his historical mission in the world (see Holdheim, "Gesch. der Entstehung der Jüdischen Reformgemeinde Berlin," pp. 33, 251, Berlin, 1857). The first attempt made by Zunz and his friends failed, and the consequence was despair and new conversions; *e.g.*, that of Eduard Gans, Heine, and others (Grätz, "Gesch." xi. 403 *et seq.*). And when at last a maturer stage was attained by the leaders of Reform, and measures were proposed to improve the religious and social life of the Jew, the governments interfered, preventing and prohibiting, as far as they could, reforms, in order to force the Jew to seek salvation in the arms of the Church. In fact, government and Church, press and people, conspired to render the life of the Jew as miserable as possible, a continual martyrdom, while the strong conviction which produced martyrs in former ages was lacking. And as if to deprive the Jew of every spark of self-respecting manhood, it was made part of the Pharaonic system to declare the Jewish persuasion to be a disqualification for governmental offices and posts of honor in civic life or in the army, and at the same time to bribe Jewish men of letters and learning by offering them promotion in case they would change their faith.

To this was added another factor opening a new field of promise to converts. Inspired undoubtedly by a genuine love for the Jewish nation (see Way, Lewis), "societies for the promotion of Christianity among the Jews" were started at the beginning of the nineteenth century in Great Britain, and spread under various names over the whole earth, sending forth missionaries and publishing tracts, books, and periodicals at an immense cost with the sole purpose of converting the Jews. Insignificant as the results were compared with the amount of labor and money spent by these societies, they have in the opinion of unbiased observers, Jews and Christians (see the opinions of the latter in Brann's "Jahrbuch," 1895, pp. 28–36), done great harm in endeavoring to uproot the faith of a race admired for its steadfast loyalty, and to alienate children from their parents and from domestic traditions which formed the basic element of their morality. Their main acquisitions seem to be the numerous converts in their employ, to whom they chiefly owe their success, if not existence, all of whom might have done far nobler work for the elevation of the Jewish race, had they been encouraged to strive for Judaism rather than against it. No reflection upon their sincerity of conviction or of purpose is necessary. That which offends the Jew in these conversionist efforts is that a premium should be put on an act of disloyalty as if it were a meritorious one (see Felsenthal, "Zur Kritik des Christlichen Missionswesens," Chicago, 1869; N. Samter, "Judentaufen im Neunzehnten Jahrhundert," in Braun's "Jahrbuch," 1895, pp. 9-48, where the literature is also given; "Missionen," in Herzog-Hauck, *ib.*; De Le Roi, "Gesch. der Evangelischen Judenmission, i. and ii., 1899).

As regards the number of converts, De Le Roi, in his work on missions, has estimated that they run to something like 204,540 during the nineteenth century. Of these, 72,240 have transferred their allegiance to Protestantism, 57,300 to Roman Catholicism, and 74,500 to the Greek Church in Russia (but see Converts to Christianity, Modern). The exact numbers for the latter country are only known from 1836 to 1897, when they ran up to 58,502, which did not include conversions to Roman Catholicism and Protestantism in that country. Naturally, conversions occur most frequently during periods of persecution; thus while in Prussia between 1872 and 1879 the average was only 65 per annum, in 1888, at the height of the anti-Semitic movement, the number was 348. In the year 1897 they sank to 299. Similarly in Vienna during the seventies the average was only 40 per annum, whereas in 1896 457 were converted, and 468 in 1898 ("Statist. Jahrb. für Wien," p. 346). According to the "Oesterreichische Wochenschrift," Nov. 21, 1902, the figures were: in 1898, 472; in 1899, 565; in 1900, 627; in 1901, 615; and up to Nov., 1902, 555 converts. In the whole of Hungary in 1897 only 220 were converted ("Magyar Statist. Evkönyv," iv. 435). The number of working agents employed by the English and Scottish societies in 1877 was 220, costing £670,000 ("Israel's Watchman," April, 1877, p. 55).

The number of conversions reached their height at the close of the nineteenth century, when under the watchword of anti-Semitism all the medieval fury of Jew-hatred was revived, and the Jews of continental Europe were made to feel that, in spite of their full and hearty participation in the political life and intellectual progress of their country, they were yet regarded and treated as aliens. Having in their worldly pursuits allowed their religious sentiment to fall to the freezing-point, and finding themselves disappointed in all their aims and aspirations, many wealthy Jewish families took that step which opened to them the door of admission into the highest circles. It must be left to the moralist to decide whether conversions caused by mere worldly motives benefit or demoralize society. It must be left to the statesman to decide whether in thus forcing Jewish elements to amalgamate with non-Jewish under the thin cover of a formal profession of creed, anti-Semitism does not rather defeat its own ends. From the Jewish point of view the law of natural selection, which is ever at work weeding out the weaker elements and allowing only those to survive that have the power of resistance, has been fitting the Jew for his highest task even in this crisis, just as Isaiah saw it in the vision of the tree reduced to a "tenth" by storm and fire (vii. 13).

The Berlin Society for Promoting Christianity Among the Jews spent more than 117,152 reichsthaler upon the conversion of 461 Jews during the fifty years of its existence (W. Zichte, "Fünfzig Jahre der Judenmission," Berlin, 1872), while the London Society paid between the years 1863 and 1894 from £600 to £3,000 for the conversion of a single Jew ("Saat auf Hoffnung," 1863, iii. 16; "Friedensbote," 1871, p. 149; "Jeshurun," 1895, p. 274).

The policy of the Roman Catholic Church, though formally prohibiting forcible conversion (Decretals, c. 5, D. 45), has always been to facilitate conversion as much as possible, even when the subject was not of an age to appreciate the gravity of the act. The age did not seem to have been settled till a decision was passed by the Holy Congregation of the Curia (June 16, 1809), which fixed it at seven years. Besides this, children, if in danger of dying or if one of the parents had been converted to Catholicism, might be baptized against the will or without the knowledge of their parents. On Oct. 22, 1587, the Roman Curia decided that a Jewish child, when baptized even against the canonical law, must be brought up under Christian influence. A special house for converts was created at Rome (see Catechumens, House of), and many Jewish children were immured in it up to 1858, when the case of Edgar Mortara drew the attention of the whole of Europe to the method of Roman Catholic propagandism as directed against the Jews at Rome. See also Coen, Josef di Michele.

Work of Jewish Converts.

The converts also seem to be destined to do work, though involuntarily, for Judaism. Whatever of mental vigor there is in an offspring of the Jewish race, whatever spark from the fire of Sinai still burns in a descendant of the house of Israel, he can not help, even though he stray far away from his Jewish cradle, contributing a share of the Jewish spirit to the upbuilding of the divine kingdom of truth and righteousness in the larger world which he has entered. Just as it was the religious genius of the Jew that made Saul of Tarsus the great missionary for the heathen, so did the Oriental imagery of Benjamin Disraeli, and the wit and ardent love of liberty of Heine and Börne, carry Jewish elements into the life and literature of the English and the German peoples. To the cosmopolitan character of modern art, literature, and philosophy, Jews, even under the guise of a Christian confession, have contributed very essentially. It is the cosmopolitan idea of humanity which even the disjoined and disloyal members of the Jewish race are bound to proclaim.

Most modern converts, unlike the apostates of former centuries, have retained in their heart of hearts love for the faith and the history of their nation, and in critical hours many have stepped forth in its defense. They are, in the terminology of the Rabbis, מומרים לתיאבון ("such as apostatized for personal motives"), but not להכעים ("such as apostatized to provoke the wrath of Heaven by any malice of their own") (see 'Ab. Zarah 26a). K.

CONVERSION TO ISLAM. See Apostasy and Apostates from Judaism.

CONVERSION TO JUDAISM. See Proselyte and Proselytism.

CONVERTS TO CHRISTIANITY, MODERN: The number of post-Mendelssohnian Jews who abandoned their ancestral faith is very large. According to Heman in Herzog-Hauck, "Real-Encyc." (x. 114), the number of converts during the nineteenth century exceeded 100,000; Salmon, in his "Handbuch der Mission" (1893, p. 48), claims 130,000; others ("Divre Emeth," 1880, p. 47; 1883, p. 187) claim as many as 250,000. For Russia alone 40,000 are claimed as having been converted from 1836 to 1875 ("Missionsblatt des Rheinisch-Westphälischen Vereins für Israel," 1878, p. 122); while for England, up to 1875, the estimate is 50,000 (De Le Roi, "Die Evangelische Christenheit und die Juden," iii. 60).

Modern conversions mainly occurred en masse and at critical periods. In England there was a large secession when the chief Sephardic families, the Bernals, Furtados, Ricardos, Disraelis, Ximenes, Lopez's, Uzziellis, and others, joined the Church (see Picciotto, "Sketches of Anglo-Jewish History"). Germany had three of these periods. The Mendelssohnian era was marked by numerous conversions. In 1811 David Friedlander handed Prussian State Chancellor Hardenberg a list of thirty-two Jewish families and eighteen unmarried Jews who had recently abandoned their ancestral faith (Geiger, "Vor Hundert Jahren," Brunswick, 1899). In the reign of Frederick William III. about 2,200 Jews were baptized (1822–40), most of these being residents of the larger cities. The third and longest period of secession was the anti-Semitic, beginning with the year 1880. During this time the other German states, besides Austria and France, had an equal share in the number of those who obtained high stations and large revenues as the price for renouncing Judaism. The following is a list of the more prominent modern converts, the rarity of French names in which is probably due to the fact that conversion was not necessary to a public career in that country. The names of living converts are not included.

Abrahamson, A. (1754–1811), German stamp-cutter.
Assing, David (1787–1842), German physician and poet.
Bach, Friedrich Daniel (1756–1830), German painter.
Bartholdy, Jacob (1779–1825), Prussian diplomatist.
Benary, Franz Friedrich (1805–60), German philologist.
Benary, Karl Albert (1807–60), German classical scholar.
Bendemann, Eduard (1811–45), German painter.
Benedict, Sir Julius (1804–85), English composer.
Benfey, Theodor (1809–81), German philologist.
Bernays, Michael (1834–97), professor of literature at Munich.
Bernhard, Max Adolf (1799–1866), German professor of music.
Bernhardy, Gottfried (1800–75), German philologist of Halle.
Bloch, Moritz (Ballagi) (1815–91), Hungarian professor of ecclesiastical history.
Börne, Ludwig (1786–1837), German political writer.
Braham, John (1774–1856), English composer and singer.
Breidenbach, Moritz Aug. Wil. (1796–1856), German lawyer.
Büdinger, Max (1828–1902), professor of history at Vienna.
Capadose, Abraham (1795–1874), Dutch physician and writer.
Caspari, Karl Paul (1814–92), professor of theology at Christiania.
Cassel, Paulus (1821–92), German writer and preacher.
Cerf, Karl Fr. (1782–1845), German theatrical manager, of Berlin.
Cohn, Ludwig (1834–71), German historian.
Cohnheim, Julius (1839–84), German pathologist.
Costa, Isaac da (1798–1860), Dutch historian.
Creizenach, Theodor (1818–1842), German professor of literature.
Csemegi, Karl (1826–99), president, Hungarian supreme court.
David, Christian Georg Nathan (1793–1874), professor of jurisprudence at Copenhagen.
David, Ferdinand (1810–73), German virtuoso and composer.
Dessoir, Ludwig (1809–74), actor at Berlin.
Detmold or Detmond, John (1787–1856), German statesman.
Disraeli, Benjamin (Lord Beaconsfield) (1804–81), British statesman and writer.
Dittel, Leopold, Ritter von (1815–98), Austrian surgeon.
Drach, David Paul (1791–1865), librarian of the Propaganda in Rome.
Eberti, Georg (1812–84), professor of jurisprudence, Breslau.
Edersheim (1825–89), English theologian and writer.
Ewald, F. C. (d. 1874), German divine.
Feinberg, Oscar (1844), artist of Mitau, Courland.
Felix, Rachel (1820–58), French actress.
Fould, Achille (1800–67), French minister of finance.
Fraknoi, Wilhelm (1843), Hungarian bishop; president of Hungarian Academy of Science.
Friedberg, Emil Albert von (1837), German professor.
Friedberg, Heinrich von (1813–95), Prussian minister of justice.
Friedenthal, Rudolf (1827–90), German deputy.
Friedlander, Ludwig (1824), German professor of archeology.
Friedlander, Ludwig Herman (1790–1851), professor of medicine, Halle.
Friedlander, Max (1829–72), German-Austrian journalist.
Gans, Eduard (1798–1839), professor of jurisprudence, Berlin.
Goldschmidt, Hermann (1802–66), German astronomer.
Gutterbrock, Karl Eduard (1830), professor of jurisprudence, Königsberg.
Hahn, Elkan Markus (1781–1860), professor of philology.
Heine, Heinrich (1799–1856), German poet.
Henle, Friedrich Gustav Jacob (1809–85), German anatomist, Göttingen.
Henschel, A. U., professor of botany (1824–37), Breslau.
Herz, Henrietta (1764–1803), German authoress.
Hiller, Ferdinand von (1811–86), German musical composer.
Hirsch, Siegfried (1816–60), professor of history, Halle.
Hirsch, Theodor (1806–81), professor of history, Greifswald.
Jacobi, K. G. (1804–57), professor of mathematics, Berlin.
Jacobsohn, Heinrich (1826–90), professor of medicine, Berlin.
Jacobsohn, Ludwig (1766–1842), professor of medicine, Königsberg.
Jacoby, Heinrich Otto (1815–64), professor of Greek, Königsberg.
Jaffe, Philip (1819–70), professor of history, Berlin.
Joachimstadt, Ferdinand (1816–61), professor of mathematics.
Josephsohn, Jacob (b. 1818), Swedish musical composer.
Kalisch, David (1820–72), German dramatist.
Kalkar, Christian (1803–86), Swedish writer and divine.
Klein, J. L. (1810–76), German litterateur.
Kossmann, Heinrich (1813–36), mathematician.
Kronecker, L. (1823), German mathematician.
Lebert, Hermann (1813–78), professor of medicine, Breslau.
Lehrs, Karl (1802–78), professor of Greek.
Lehrs, Siegfried, philologist.
Lessmann, Daniel (1794–1831), German writer.
Levin, Rahel, German social leader.
Lewald, Fanny (1811–89), German authoress.
Lopez, Sir Menasseh (1831), English judge; M.P.
Magnus, Eduard (1799–1872), professor of arts, Berlin.
Magnus, Heinrich Gustav (1802–70), professor of chemistry.
Magnus, Ludwig Immanuel, mathematician, Berlin.
Margoliouth, Moses (1818–81), Jewish historian.
Marx, Karl (1818–83), German socialist.
Mayer, Solomon (1797–1862), German professor of law.
Meier, Moritz Her. Ed., professor of philosophy, Halle.
Mendelssohn, Dorothea (1769–1839), German social leader.
Mendelssohn-Bartholdy, Felix (1809–47), German composer.
Montefiore, Lydia (baptized 1858), aunt of Sir Moses Montefiore.
Neander, Johann August Wilhelm (1789–1850), professor of ecclesiastical history, Berlin.
Neumann, Karl Fred. (1793–1870), German Orientalist.
Palgrave, Sir Francis Cohen (1788–1861), historian.
Philippi, Fr. Ad. (1809–82), professor of theology, Dorpat.
Ponte, Lorenzo da (1749–1839), writer and composer.
Ricardo, Daniel (1772–1823), political economist.
Rosenhaim, Johann Georg (1816–87), professor of mathematics.
Rubino, Joseph Karl (b. 1799), professor of history, Marburg.
Rubinstein, Anton G. (1829–89), Russian musician.
Simson, Martin Eduard von (1810), lawyer; president of German Parliament; leader of the conservative party.
Spiegelberg, Otto (1830–81), professor of medicine, Breslau.
Stahl, Fried. (1802–61), professor of jurisprudence.
Strousberg, Bethels Henry (1823–84), German financier.
Wolfers, Jacob Philip (1803), professor of astronomy.
Wolff, Oscar Ludwig (1799–1851), German professor of literature.
Wolff, Joseph (1795–1862), traveler.
Ximenes, Sir Moses (1762), English high sheriff.

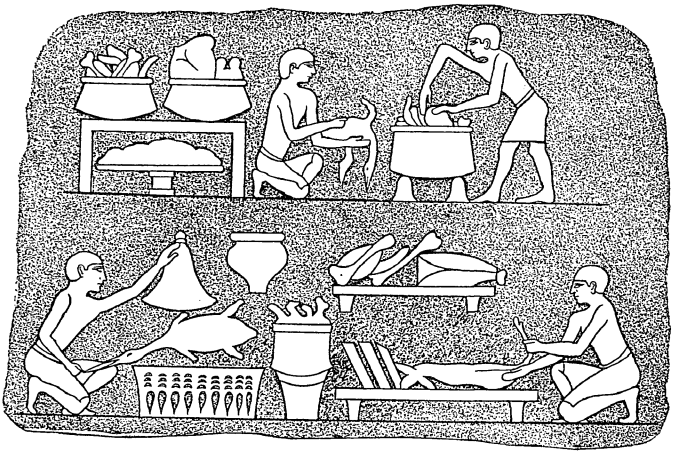
COOKERY.—Biblical Data: The preparation of the meal was in ancient times a very simple process. The principal articles of diet were bread and milk, to which were added, as supplementary dishes, fruits and vegetables (compare Baking and Milk). Meat was eaten only on festivals; and many vegetables, such as cucumbers, garlic, leek, onions, etc., were eaten raw. Lentils (Gen. xxv. 29; II Sam. xvii. 28) or greens (II Kings iv. 38 *et seq.*) were boiled in either water or oil. Fruit was often dried and compressed into solid, cake-like masses, making raisin-cake, fig-cake, etc. (I Sam. xxv. 18, xxx. 12; II Sam. xvi. 1, etc.; compare the "ḳamr al-din," or flat cake of compressed apricots, still popular among the Syrians); and a kind of sirup, or Honey ("debash") was sometimes extracted from it. A kind of porridge was made from corn by adding water, salt, and butter ("'arisah," probably the "'arsan" of the Talmud, which was a paste prepared of crushed and malted grain); and from this many kinds of cakes were made with oil and fruits (II Sam. xiii. 6 *et seq.*; Num xi. 8; Ex. xxix. 2, etc.; see the importance of these cakes in later sacrificial ceremonies, as mentioned, for example, in Lev. ii.).



Egyptian Cookery, Showing Processes of Preparing Food.
(After Lepsius, "Denkmaler.")

Meat, in ancient times, was usually boiled, and was consequently thus served at the table of Yhwh (Judges vi. 19; I Sam. ii. 15). The sauce in which it was cooked was also relished ("maraḳ," Judges vi. 19; perhaps also "merḳaḥah," Ezek. xxiv. 10). That the custom of boiling a young lamb or a kid in milk—still prevalent among the Arabs—existed among the ancient Hebrews, is proved by the prohibition of the custom in Ex. xxiii. 19. The word בשל, which may also signify "roasting," is usually applied to cooking in the sense of "boiling." It is reported of the wicked sons of Eli that they preferred roasted to boiled meat (I Sam. ii. 15). The meat of the Passover lamb was usually roasted; and indeed the custom of roasting ("ẓalah") became ever more prevalent. As among all the nations of antiquity, it was effected at the open fire, either by placing the meat directly upon the coals (compare the roasting of the fish mentioned in John xxi. 9), or by using a spit or grate, which appurtenances, though not specifically mentioned in the Old Testament, may reasonably be supposed to have been employed. Even in Genesis (xxvii. 6 *et seq.*) it is stated that Rebekah could prepare the flesh of a kid so that it tasted like venison; and from this statement a certain degree of culinary skill may be inferred. The progress of civilization, bringing about increased importation of provisions, materially contributed to the refinement of the culinary art among the Hebrews (compare Food).

E. G. H. I. Be.

——**Modern Jewish:** It is not surprising that Jewish cookery possesses characteristics of its own which differentiate it from ordinary cookery. The dietary and ceremonial laws to which orthodox Jews conform have naturally evolved a particular kind of culinary art. The institution of the Passover, the distinction between permitted and forbidden foods, the regulations as to butter and meat, and the custom of abstaining from meat at certain seasons, have all contributed to make Jewish cookery distinctive. But the preparation of food for the table is a matter which will always be influenced by local conditions. Every country and district has its favorite dishes, largely dependent upon its particular food products. Hence, Jews have carried with them, wherever they have wandered, the styles of cookery prevailing in the countries from which they have migrated. Thus in England old-fashioned Jews, who retain the customs of the ghetto, are comparative strangers to the plain English roast, boiled, and grilled meats, preferring the more savory dishes of the Continent. From Spain and Portugal they have derived, along with their fondness for olives, their custom of frying fish and other foods in oil. From Germany they have taken the habit of sour-stewing and sweet-stewing meats. To Holland they owe a taste for pickled cucumbers and herrings, and from the same country come such Jewish dainties as butter cakes and "bolas" (jam-rolls). From Poland, on the other hand, Jewish immigrants have brought into their new homes "lokschen" or "frimsel" soup (cooked with goose fat), stuffed fish, and various kinds of stewed fish. In this way almost all varieties of Jewish cookery are reproduced in an English form, to which this article is mainly confined.

Another influence has to be noted. The stringency of the dietary laws has combined with the peculiar domesticity of Jewish life to make cooking the special business of Jewish wives and daughters. It has thus been raised to the character of a fine art, even among the humblest classes. In the ghettos of Jewry no housewife would think of relegating the preparation of meals to a servant. Only by attending to them herself can she satisfy her conscience that such ritual requirements as the "kashering" of meat, the keeping apart of butter and meat, and the separation of "ḥallah" (the bread-offering) have been duly complied with. The kitchen has, therefore, always been regarded among orthodox Jews as the chief province of a Jewish housewife, and to her supremacy in this region the Scriptural words "The king's daughter is all glorious within" (Ps. xlv. 13) have not inaptly been applied. In times gone by, especially when the facilities of travel were few, the male members of a Jewish family whose vocations took them away from home would be exposed to many privations. Thus the responsibilities of Jewish housewives would be heightened. They would exercise their ingenuity to the utmost so that on the return of the breadwinners their hardships might be forgotten in the enjoyment of appetizing dishes. The influence of the dietary laws and ceremonial customs on Jewish cookery can be further traced in the details of the kitchen.

Passover Cookery.

The institution of the Passover, with its commandment to abstain during the festival from eating leavened bread, has had the natural effect of developing special kinds and methods of cooking appropriate to that period. The unleavened bread is not merely a staple article of food, but an ingredient of almost every Passover dish. "Maẓẓah klös" (dumpling) soup takes the place of lokshen for this week, and an immense variety of sweet cakes and puddings, manufactured from ground maẓẓah meal, replaces the confectionery and pastries of ordinary occasions. Fish, instead of being fried in a batter, is cooked with meal. An excellent flour can be made of potatoes, and Jewish cooks make use of it for pastries during Passover. All dishes which can be made from eggs are in special request, and this accounts for the popularity of almond pudding as a Jewish delicacy. Jews are also debarred during Passover from drinking malt liquor, which has to be replaced by such beverages as sassafras and lemonade.

Fish.

From very early times, as far back even as their sojourn in Egypt (Num. xi. 5), Jews have shown a strong liking for fish, and have developed special skill in its preparation. There are many reasons for this preference: (1) The necessity of abstaining from meat not killed according to Jewish law makes them particularly dependent upon fish. (2) It is not regarded as meat, and can therefore be eaten in conjunction with butter. (3) There are seasons, such as the "Nine Days," when strict Jews abstain from meat altogether. (4) The eating of fish has always been associated with the celebration of the Sabbath. From no orthodox table is fish absent at one or more of the Sabbath meals, however difficult it may be to procure. In inland countries like Poland, Jews are limited to fresh-water fish.

There are several distinctively Jewish modes of preparing fish, and English Jews have paid special attention to their practise. Anglo-Jewish methods of cooking fish were first introduced by Portuguese Jews, and copied by German Jews. Their favorite fish is salmon, which is either fried, white-stewed, or brown-stewed. Fish, white-stewed, with lemon and bread balls, is a specifically Jewish preparation, typical of their fondness for piquant stews in preference to the plain preparation common in non-Jewish families. Smoked salmon is another Jewish delicacy, and this, together with pickled herrings, pickled (yellow) cucumbers, and olives, is often to be seen on Jewish tables as appetizing adjuncts to fried fish.

Preparation of Meat; Butter and Meat.

The principal concern in the preparation of food for a Jewish table is compliance with the ritual requirements for KASHER meat. Orthodox Jews will not partake of meat unless, in addition to having been killed in accordance with rabbinical law, it has been entirely drained of blood. Therefore, before being cooked, it needs to be steeped in water for half an hour. On being taken out it is laid on a perforated board, sprinkled lightly with salt, and left for one hour. At the end of this time the salt is washed off (see MELIḤAH). Meat may not be cooked with butter or milk. Oil, and certain portions of the fat of clean animals (the שומן or kasher fat, as distinguished from the חלב, or ṭerefah fat), are the only fats that may be used. So far as cookery is concerned, the distinction between butter and meat necessitates the use of a double set of utensils. Some Jews have two kitchens, one for meat and one for butter; and two separate dressers are common. Jewish cooks are debarred from using butter in pastries, which are to be eaten in conjunction with meats, and from using milk or cream under the same circumstances. For butter, melted fat must be substituted, while cream may be imitated in a variety of ways. One reason why almond pudding is a favorite in Anglo-Jewish households is that it does not require either meat or butter, and can therefore be eaten at any meal.

Sabbath Preparations.

Notice must be taken of the special preparations made for the Sabbath. The Sabbath dish par excellence is the "kugel." Orthodox Jews not being permitted to cook on the Sabbath, their ingenuity has been much taxed to provide hot food for the day of rest. In the height of summer, cold meats are acceptable enough. The difficulty is to provide hot dishes in winter, and it has been overcome by the preparation of a dish known as "kugel." It consists, generally, of meat stewed with peas and beans, and placed in the oven before Sabbath. The fire having been made up, and the oven firmly closed, the dish requires no further attention, and will retain its heat until it is wanted for the Sabbath midday meal. The term "shalet" (see "sholent" in the article COOKERY IN EASTERN EUROPE) is used in some parts of Europe to designate what has just been described as kugel, while "kugel" is used as the name of a variety of shalet containing much fat; in other parts (*e.g.*, Bavaria) "shalet" is used of a sort of baked pudding; *e.g.*, maẓẓah, apple, nudel, or almond shalet. The form "shulet" also occurs, as in Bohemia, to indicate the "gesetztes essen" called "kugel" in the beginning of this paragraph. "Shalet" is explained by some authorities as a corruption of the German "schul ende," that being the name of a pudding which is prepared on Friday, to be ready when Sabbath morning or afternoon service is over. Others derive it from שלן ("that which remains [in the oven] overnight"), the final "t" being the German ending. The real derivation is probably from the Old French "chauld" (warm). The prohibition against cooking on Sabbath explains why fried fish, being primarily a Sabbath dish, is eaten by Jews cold, whereas other people eat it hot. Stewed fish is, of course, also eaten cold.

A prominent feature of Sabbath cookery is the preparation of twists of bread, which are known as "ḥallahs" or, as in southern Germany, Austria, and Hungary, as "barches." They are often covered with seeds to represent manna, which fell in a double portion on the sixth day. One other item remaining to be mentioned is raisin wine. Jews are required to offer over a cup of wine the Sabbath prayer for the sanctification of food. But in many countries wine is too expensive a luxury for the majority of Jewish families. A cheap preparation, made of boiled raisins, is therefore substituted, which, though it is far from resembling wine, satisfies all the requirements of the ritual.

J. I. H.

——**In Eastern Europe:** Most of the dishes cooked by the Jews in eastern Europe are akin to those of the nations among whom they dwell. Thus the **kasha** and **blintzes** of the Russian Jews, the **mamaliga** of the Rumanians, the **paprika** of the Hungarians, are dishes adopted by the Jews from their Gentile neighbors. Only on religious and ceremonial occasions do they cook peculiarly Jewish dishes.

The food prepared on Friday for the Sabbath is called **sholent** (the Russian equivalent of "shalet"). The most popular form of sholent is made of potatoes placed in the pot with meat, fat, and water. The potatoes appear on the table on Saturday glistening with fat, and are of a dark, brownish color. Some even consider them not alone palatable, but an excellent remedy for various ills. The commonest form of sholent is the **kugel**, a kind of pudding made of almost any article of food; the **magen-kugel** and the **lokshen-kugel** are two favorite varieties. The former consists of an animal's stomach filled with flour, fat, and chopped meat, peppered and salted to taste. The latter is made of lokshen; often raisins and spices are added. It is cut as ordinary pudding. Other kugels are compounded of rice, potatoes, carrots, etc. Lokshen consists of flour and eggs made into dough, rolled into sheets, and then cut into long strips. Macaroni is an excellent substitute for it. Cut into small squares, these strips are called "farfil." They are usually boiled and served with soup. On the day preceding Tish'ah Be'ab, **milchige lokshen** is eaten. This is ordinary lokshen boiled in milk.

Ẓimes, or compote, consists generally of cooked fruits, such as plums (flaumen ẓimes), or of vegetables, well spiced. The most popular vegetable is the carrot (mehren ẓimes), which is cleaned and cut into small slices, and boiled in water for about three hours. The water is then poured off and mixed with flour, sugar, and cinnamon. The carrot is then replaced, a fat piece of meat, preferably from the breast, added, and the concoction is again cooked for two or three hours. Turnips are also extensively used for ẓimes, particularly in Lithuania. In southern Russia, Galicia, and Rumania ẓimes is made of pears, apples, figs, prunes, etc. It is then somewhat like a compound of stewed fruits.

Another dish for Saturday is called **petshai** in Lithuania, **drelies** in South Russia, Galicia, and Rumania. This consists of cow's or calf's leg prepared in a special manner. The hair is burned off, and the leg is then thoroughly cleaned, and cut into pieces of a convenient size. These are placed in a pot with water, and pepper, salt, and onions are added. Then it is placed in the oven just as are the other sholent dishes. When it is removed from the oven on Saturday morning, it is either served hot, or it is distributed in plates, hard-boiled eggs being sliced into it, and it is put in a cool place. When served in the evening for "shalesh se'udot," it is a semi-solid mass, in which the meat is embedded. Drelies is made by adding soft-boiled eggs and also some vinegar as soon as it is removed from the oven, when it is served hot.

Soups are naturally the great standby of the poor. The best known of these is the **krupnik**, made of oatmeal, potatoes, and fat. This is the staple food of the poor students of the yeshibot; in richer families meat is added to this soup.

Kreplech or **krepchen** is another dish peculiar to eastern European Jews. It is prepared in the following manner: Flour and eggs are mixed into a dough. This is rolled into sheets and cut into three-inch squares. On each square of dough is placed fine-chopped meat, to which salt, pepper, and onions are added. The edges of the rolled dough are then brought together and well pasted. This is then placed in a soup previously prepared for the purpose. This kreplech is eaten at least three times a year by every pious Jew—on Purim, on the day preceding the Day of Atonement, and on Hosha'na Rabbah. On occasions when meat is not eaten, chopped cheese is placed inside the kreplech.

At weddings "golden" soup is always served. The only reason for its name is probably the yellow circular pieces of chicken fat floating on its surface.

The preparations of fish made by the eastern European Jews are famous even among the Gentiles, the most popular being the **gefillte** (filled fish). This is prepared thus: After undergoing the usual processes of cleaning and washing, the fish is cut into two or three parts. The bones are then taken out, the skin is removed, and the meat is chopped fine, eggs, salt, pepper, and onions being added. This mass is then replaced in the skin, dropped into boiling water, and cooked for about three hours.

B. Fr.

Besides the very popular dish of groats called

Soups.

krupnik, and many other grit soups, which are also common among non-Jews, there are still a number of soups which are more or less characteristically Jewish. The soup into which "kneidlach" (="knoedel," dumplings) are put, is the dish used most often on Saturdays, holidays, and other special occasions, particularly at Passover, when it corresponds to the "maẓẓah kloes" of western Europe. The expression "Me meint nit di Haggadah nor di kneidlach" (It is not the Haggadah that we like so much as the dumplings) owes its origin to the great favor this soup has attained among the Jews of eastern Europe. The kneidlach in most cases are made by grinding maẓẓahs into flour, and adding eggs, water, melted fat, pepper, and salt. This mixture is then rolled into balls about one and one-half inches in diameter. The kneidlach are then put into the soup, and it is ready to be served about half an hour after. Often the kneidlach are fried in fat and served apart from the soup. Another kind of kneidlach, made from mashed potatoes put into warm milk, forms a well-liked soup among Lithuanian Jews. The village folk of some parts of eastern Europe have still another form of soup, which is made by putting crisp "beigel" (round cracknel) into hot water and adding butter. Because of its nutritious qualities it is called **michyeh,** a corruption of the Hebrew word "miḥyah" (*i.e.*, food κατ' ἐξοχήν; compare the Latin "victus"). There are, however, a number of soups in the preparation of which neither meat nor even fat is used. Such soups form the food of the poor classes. An expression current among Jews of eastern Europe, "soup mit nisht" (soup with nothing), owes its origin to dissatisfaction with soups of this kind.

There are a number of sour soups, called **borshtsh,** the most popular of which is the "kraut," or cabbage, borshtsh, which is made by cooking together cabbage, meat, bones, onions, raisins, sour salts, sugar, and sometimes tomatoes. Before serving, the yolks of eggs are mixed with the borshtsh. This last process is called "farweissen" (to make white). Borshtsh is also made from the beet-root and "rossel" (the juice derived from the beet).

Gebrattens (roasted meat), chopped meat, and **essig fleish** (vinegar meat) are the favorite forms in which meats are prepared. The essig or, as it is sometimes called, "honnig," or "sauer fleish," is made by adding to meat which has been partially roasted some fish-cake, sugar, bay-leaves, English pepper, raisins, sour salts, and a little vinegar.

Fat of cattle, because of its cheapness, is used in the preparation of a great number of dishes. The fat of geese and chickens is used only on special occasions, but is kept in readiness for use when needed. Fat, being used so freely during Passover, is prepared in quantities long before that feast, in many cases as early as Ḥannukah (in December).

Gribenes, or "scraps," form one of the best liked foods among the Jews of eastern Europe. It is eaten especially on the Feast of Ḥannukah. So much do the Jews share in the belief "that there is no flavor comparable with the tawny and well-watched scraps," that it is often suggested as an inducement to friends to make a visit.

Jews of eastern Europe bake both black ("proster," or "ordinary") bread and white bread, or **ḥallah.** Of great interest are the various forms into which these breads are made; for while the black bread is usually circular in form, the shapes in which ḥallah is baked vary as the different holidays pass by. The most common form of the ḥallahs is the twist ("koilitch" or "kidke"). The ḳoilitch is oval in form, and about one and a half feet in length. On special occasions, such as weddings, the koilitch is increased to a length of about two and a half feet. Some are made in miniature for the small boys, as an inducement to say the "ḳiddush" (bread benediction) which is required on Friday night.

Bread and Cakes.

The dough of ḥallah is often shaped into forms having symbolical meanings; thus on New-Year rings and coins are imitated, indicating "May the new year be as round and complete as these"; for Yom Kippur (Day of Atonement) the ḥallah, which on that occasion is circular, carries a piece of dough in imitation of a dove, the significance being "May our sins be carried away by the dove." Ḥallah is also baked in the form of a ladder for Yom Kippur, expressing thereby the desire, "May our prayers climb up to heaven"; for Hosha'na Rabbah, bread is baked in the form of a key, meaning "May the door of heaven open to admit our prayers." The **Haman tash,** a kind of a turnover filled with honey and black poppy-seed, is eaten on the Feast of Purim, but probably has no special meaning.

The **mohn kiḥel,** a circular or rectangular wafer having in it a quantity of poppy, forms a part of the Sabbath breakfast. **Pirushkes,** or turnovers, are little cakes fried in honey, or sometimes merely dipped in molasses, after they are baked. The **strudel,** or single-layered jelly or fruit cake, takes the place of the pie for dessert. **Teigachz,** or pudding, of which the kugel is one variety, is usually made from rice, noodles, "farfel" (dough crums), and even mashed potatoes. **Gehakte herring** (chopped herring), which is usually served as the first dish at the Sabbath dinner, is made by skinning a few herrings and chopping them together with hard-boiled eggs, onions, apples, sugar, pepper, and a little vinegar.

Savories and Candies.

Teiglach and **ingberlach** are the two popular home-made candies. The teiglach are made by frying in honey pieces of dough about the size of a marble, the dough being mixed with sugar and ginger. The ingberlach are ginger candies made into either small sticks or rectangles. Jellies are made from all juices of fruits, and are used for different purposes; they are used in making pastry and are often served with tea. Among the poorer classes jellies are reserved for the use of invalids and patients, and so well has the practise of making jelly solely for that purpose been established, that often the words "Allewai zol men dos nit darfen" (May we not have occasion to use it) are repeated before storing it away.

J. I. G. D.

COOKING-UTENSILS: Among the ancient Hebrews cooking was naturally entrusted to the women of the household (compare I Sam. viii. 13), as was also the task of grinding the flour required for daily use, and that of preparing the bread. Even ladies of rank thought it no degradation to cook, and Princess Tamar is said to have displayed especial skill in preparing certain articles of food (II Sam. xiii. 8). The slaughtering and the dressing of meat were done by the men (Gen. xviii. 7; I Sam. ix. 23, ii. 14 *et seq.*), who also understood how to prepare food (Gen. xxv. 29; II Kings iv. 38).

Kitchens were found only in the palaces of the wealthy, a particular room for culinary purposes being scarcely requisite, since the primitive hearth consisted merely of a few stones upon which the pot was placed, and beneath which a fire was lighted on the mud floor (for oven, see Baking). In later times mention is made of fire-basins, כיור (kiyyor, Zech. xii. 6), and of a species of small, portable cooking-stoves, "kirayim" (Lev. xi. 35; in the Talmud the singular כירה is used); the latter, according to the Mishnah, was so constructed as to afford space for two pots.

Wood (often in the form of charcoal) and dried dung were used as fuel, and a draft was made by means of a fan, "menafah" (Kil. xvi. 7), as in the Orient at the present day. Fire-tongs, "melkahayim" (Isa. vi. 6) and shovels, "ya'im" (I Kings vii. 40), also formed part of the equipment.

In addition to the hand-mill, an indispensable adjunct of the Hebrew kitchen, were two large earthen jugs, called "kad," one of which was for carrying water (Gen. xxiv. 15 *et seq.*; I Kings xviii. 34), the other for storing meal or corn (I Kings xvii. 12). Milk and wine were preserved in goat-skins ("ḥemet," Gen. xxiv. 15, and elsewhere; "nod," Judges iv. 19, and elsewhere); oil and honey, in small earthen or metal jugs, "ẓappaḥat" (I Kings xvii. 12, etc.); fruits and pastry, in various kinds of Baskets.

The "dud," "kiyyor," "ḳallaḥat," "parur," "sir," and "ẓelaḥah" ("ẓallaḥat") are mentioned as vessels for cooking, but their specific uses are unknown. The sanctuaries were amply provided with these dishes and bowls (Num. lxxi. 3 *et seq.*; I Kings vii. 45, 50), which, as might be expected, were usually of bronze, silver, or gold (Jer. lii. 19); in the homes, however, metal vessels were found in great number only among the wealthy. As these vessels were introduced by the Phenicians (I Kings vii. 13 *et seq.*), whose artisans long continued to supply the Hebrew market, it is safe to assume that their forms were similar to those of the Phenician utensils. Among the common people and for daily use, it was customary to employ earthen vessels (Lev. vi. 21), the receptacle most frequently mentioned being the sir, a pot in which usually the family meal was cooked, and in which occasionally the sacred meat was prepared (II Kings iv. 38 *et seq.*; Ex. xvi. 3; Zech. xiv. 20, and elsewhere). It sometimes served also as a ewer (Ps. lxix. 10). For baking cake, etc., a tin plate ("maḥabat barzel," Ezek. iv. 3; Lev. ii. 5) or a deep pan ("marḥeshet") was used (Lev. ii. 7). Mention is also made of three-pronged forks, which were used, not for eating with, but for lifting the meat from the pot (I Sam. ii. 13). Knives were used for slaughtering animals, and for dressing the meat ("ma'akelet," Gen. xxii. 6, 10).

E. G. H. I. Be.

COPENHAGEN: The capital of Denmark. Shortly after the opening of Denmark in 1657 to settlement by Jews, a number are known to have resorted to the capital. A few were there even earlier; for there is a record of a Jew having been baptized in 1620. The first room for prayer-meetings was opened Dec. 16, 1684, in which year Israel David, the court jeweler, and his partner, Meyer Goldschmidt, were given permission to hold devotional exercises, provided they took place behind closed doors and without a sermon, that there might be no cause for scandal. The Jews were already in possession of a cemetery, the first interment in which is said to have occurred in 1670. This, the earliest known congregation in Copenhagen, probably followed the Sephardic ritual, since the first Jews permitted to settle in Danish cities were of Spanish-Portuguese extraction (see Denmark); though they were doubtless soon outnumbered by German Jews who emigrated from Hamburg, northern Germany, Holland, and Poland, either directly or by way of Sleswick-Holstein.

The Copenhagen community is probably first mentioned in specifically Jewish literature in 1691, in which year a number of Jews, bound from Holland to Courland, perished by shipwreck at Marstrand, near the Swedish coast. When the Copenhagen Jews heard of the disaster, they sent two members and the shammash to ascertain the details, according to Jewish law, so that the widows of the drowned men, who were then in Poland, might be enabled to marry again (see 'Agunah; compare responsa "Sha'agat Aryeh we-Ḳol Shaḥal," ed. Salonica, 1746, p. 35a). At that time no Jews were living in Sweden.

Social Condition.

The condition and mode of life of the Jews of Copenhagen were, on the whole, similar to those of Jews in other parts of Denmark; but jewelers, agents, manufacturers, and merchants of all sorts had better opportunities for business in the capital than in the provincial towns. They soon increased to such an extent that the rooms hitherto used for prayer-meetings were no longer large enough; and the first synagogue was dedicated in 1729. The community had had rabbis for some time. The first was Abraham ben Salomon; he was followed by Israel ben Issachar Berendt, who had officiated as rabbi in Altona, and whose little book "Ohel Yisrael" (The Tent of Israel), a commentary on Jacob Weil's "Schlachtregeln," was printed at Wandsbeck in 1733, a year after his death. At that time there was no Hebrew printing-establishment at Copenhagen, although Hebrew types were to be found in the common printing-offices. Rabbi Israel died at Fredericia. He was succeeded by Mordecai ben David. Then followed Ẓebi Hirsch ben Samuel Halevy and Gedaliah ben Aryeh, the latter being succeeded in 1793 by his son Abraham, who, in order to accept the post, resigned his rabbinate in Gnesen.

Even in the eighteenth century the community was distinguished for its men of culture. A branch

The Eighteenth Century.

of the Wessely family, to which belonged Hartwig Wessely, Mendelssohn's faithful coworker, and his brother Moses, the friend of Lessing, was established in Copenhagen. Although Hartwig Wessely, the most eminent of all the Jews of Copenhagen in the eighteenth century, left his native town, he still kept in touch with it, and when, in 1766, a new synagogue was dedicated, he wrote the dedicatory poem and delivered the oration. Another eminent family, the Wallichs, repeatedly intermarried with the Wesselys; but the Euchel family, to which belonged Isaac Euchel, one of Mendelssohn's foremost pupils, is even better known than either of the other families mentioned. Isaac's equally talented brother, Gottleb, was a business man in Copenhagen, and was also successful as a writer.

The community grew rapidly in the eighteenth century, notwithstanding the difficulties attendant upon immigration; but a serious calamity befell it when, in 1795, during a conflagration in the city, the principal synagogue was burned. There had been occasional dissensions in this, as in every other old Jewish community. At the end of the century, however, the movement with which Mendelssohn's name is associated had obtained so firm a footing in Copenhagen, and the differences between the older and younger members had become so acute, that an agreement in regard to the building of a new synagogue was impossible; and, accordingly, none was built. Several houses were, however, fitted up and utilized as synagogues. Although, as early as 1804, one of the Progressives, M. L. Nathanson, with the assistance of an Orthodox relative, had organized an excellent parochial school—still (1902) in existence—for poor boys, and though a similar school for poor girls was established a few years later, the members of the Jewish community could not unite in building a synagogue; nor could they do so even when, by the decree of March 29, 1814, civic equality was conferred upon them. The differences between the old Orthodox rabbis, supported by the majority of the community, and the younger, impetuously progressive minority, who were in intimate association with many highly cultured Christians, were too great.

The Nineteenth Century.

The public schools, as well as the university, were open to Jewish students; and the above-mentioned Nathanson, with his friends, was actively interested in enabling poor but talented children to pursue their studies.

The first Danish theologian produced by the community was Isaac Noah Mannheimer, who was appointed teacher in 1816, when only twenty-three years of age. It was his duty to "confirm"—that is, to hold an examination upon the completion of a course in religion; and since there was no public place in which he could preach, his friends and patrons met for devotional exercises at their homes. His activity in his native community, however was of but very short duration. Dissensions, on the one hand, and an eager desire for Danish culture, on the other, added to the impossibility of finding positions, led many Jewish students in the first decades of the nineteenth century to embrace Christianity. While, formerly, Christian missionaries had worked among the Jews without appreciable results — even though Jews were compelled, for a short time in 1728, to listen to Christian sermons, and proselytes thus won were materially favored—there was now an increasing number of conversions, whereby the community was robbed of many among the educated families. Just as in Germany the children of Moses Mendelssohn were baptized, so also in Copenhagen a number of his relations, friends, and followers became converts.

Mannheimer's successor as teacher was the younger and less gifted E. Levison, who continued religious instruction and confirmation, but abandoned the devotional exercises. In 1827 the death of the chief rabbi, Abraham Gedaliah, created a vacancy for which his son, although popular in the community, and possessed of wide Talmudic scholarship, proved unsuitable; for the congregation had learned to demand of its rabbis a wider range of knowledge. Accordingly an endeavor was made to find a chief rabbi who united Talmudic with secular learning; and an invitation was extended to A. A. Wolff, then rabbi in Giessen.

Struggles for Reform.

This young rabbi and doctor of philosophy succeeded in drawing both parties together to the extent indicated by the fact that a synagogue was dedicated in 1833. The services, on the whole, were arranged according to the old ritual—even now (1902) all the institutions of the community are conducted in the time-honored way—but Rabbi Wolff, to satisfy the younger members, added choral singing and a weekly sermon. In most respects the community was at peace; but some of the elder members, deeming the service too modern, maintained, in addition to the principal synagogue with the Portuguese ritual, a small private synagogue, which is still in existence. The extreme Radicals however, did not consider the innovations sufficient. They called for a greater number of prayers in the Danish language; and as this was not conceded they absented themselves from the service. Although secessions to Christianity gradually ceased, there was an increasing indifference to the affairs of the synagogue. But the chief inducement to baptism disappeared when, in 1849, the Jews throughout Denmark were accorded equal rights with their fellow citizens (see Denmark).

The sphere and influence of the Copenhagen Jews were now more widely extended. Many achieved distinction as bankers, manufacturers, and merchants; among them being the Meyers, Goldschmidts, Rubens, Malchiors, Hambroes, Triers, Baron Gedalia, the "etatsraad" Philip W. Heymann, the banker D. B. Adler, and Isak Glückstadt, a bank director and the present president of the community. The merchant Nathanson was prominent also as a statistician, political economist, and journalist.

Among other well-known members of the community mention may be made of the students Abrahams, David, and Lewy; the poet Henrik (Heiman) Hertz, who was baptized; the painters David Monies and Ernest Meyer; Joel Ballin, the etcher; and the musicians Bendix and Rosenfeldt; all of

Persons of Distinction.

whom flourished in the nineteenth century. The community has also produced many scientists, including S. Trier, the clinical lecturer; L. Jacobson, the anatomist and practising physician; A. Hannover, the physiologist; H. Hirschsprung, director of the children's hospital; Israel Rosenthal, chief physician of the communal hospital; Salomonson and L. Meyer, university professors; and Goldschmidt and Henriques, lecturers. Especial mention should also be made of L. I. Brandes, philanthropist and physician, uncle of Georg Brandes, and his brother, Eduard Brandes; Siesbye, the classical philologist; Hannover, of the Polytechnic; Fredericia, the historian; David and Rubin (1902), directors of the bureau of statistics; while the two Levy brothers are among many Jews who have held government positions.

Jews have also been active as politicians in Copenhagen. Among them were the poet Meier Goldschmidt; D. B. Adler, mentioned above; and the educator Herman Trier, vice-president of the Folkething, and chairman of the municipal council (1902).

Philanthropic Institutions.

The community of Copenhagen maintains a number of philanthropic foundations, many of them of considerable age. Their poor and sick are well cared for. The most recent of the many institutions is the Home for the Aged, founded a few years ago by N. J. Fränkel. The communal council holds bequests, exceeding one million dollars, for definite philanthropical purposes, while many societies and institutions hold property of their own. It should be noted that the Jews have also contributed generously to many non-Jewish philanthropies, among the more prominent of those leaving bequests for such purposes being D. A. Meyer and S. A. Eibeschütz. Their own prosperous circumstances have never caused the Jews of Copenhagen to forget their less fortunate coreligionists elsewhere. As early as the reign of Maria Theresa appeals were made to the Danish government to intercede for the suffering Jews of Austria; while in recent times undertakings like the Alliance Israélite Universelle have found prompt support in Copenhagen. In addition to the religious and parochial schools, several lecture societies are engaged in spreading a knowledge of Judaism.

The Jewish community of Copenhagen has never been large. In 1902 it numbered about 3,500, including the neighboring communities, about 1,000 being taxpayers. The affairs of the community are conducted by seven representatives, who, in conjunction with four wardens of the synagogues, constitute the representative committee, at the head of which is the rabbi. At Professor Wolff's death D. Simonsen succeeded to the rabbinate, and occupied it till his resignation in 1902.

COPONIUS: First procurator of Judea, about 6 C.E. He was, like the procurators that succeeded him, of knightly rank, and "had the power of life and death" (Josephus, "B. J." ii. 8, § 1; "Ant." xviii. 1, § 1). During his administration occurred the revolt of Judas the Galilean ("B. J." *l.c.*), the cause of which was not so much the personality of Coponius as the introduction of Roman soldiers. Moreover, owing to the reconstruction of the province of Judea then in progress, the census was being taken by Quirinus, which was a further cause of offense. In Coponius' term of office this incident occurred: During the Passover festival, when the doors of the Temple were opened at midnight, it happened that some Samaritans entered by the first door, and scattered human bones along the colonnade of the sanctuary. Shortly after this event Coponius was recalled to Rome, and replaced by Marcus Ambibulus ("Ant." xviii. 2, § 2). Probably it is on account of this occurrence that one door of the Temple bore the name of "door of Coponius" (Mid. i. 3; compare the reading in Parḥi 16a, ed. Edelman). Regarding the personal attitude of Coponius toward the Jews nothing definite is known.

COPPER: The first common metal to come into use, as it is easily obtained and readily worked. Burial-places in which utensils, weapons, etc., of iron are found are ascribed to a later period than are those containing copper or bronze weapons.

Name and Origin.

The word "copper" is derived from the name "Cyprus," the island from which the ancient Greeks obtained this metal; hence the name *χάλχος κύπριος*, Latin *æs cyprium*, copper. The Hebrew name "neḥoshet" denotes not only copper, but also copper alloy. Since copper is rather soft and very flexible, it was mixed with other metals, especially with tin, thereby becoming almost as hard as steel. Of such a copper alloy, probably, were made the spear-head (I Sam. xvii. 7), the lance (II Sam. xxi. 16), and the bow (II Sam. xxii. 35), and perhaps also fetters (Judges xvi. 21). In the earliest times swords and axes, doubtless, were cast in copper alloy (I Kings vii. 46); later on they were forged in iron (I Sam. xiii. 19; Isa. ii. 4).

In Palestine itself there were no copper-mines, and probably none in the Lebanon Mountains, though iron ore was found there; hence the Israelites had to import their raw material either from the Egyptians or the Phenicians. The former in very early times worked copper-mines on the Sinai peninsula; and the ruins of immense works may still be seen in Wadi Meghara and Wadi Nasb. The Egyptian inscriptions found there state that even before the time of Cheops or Khufu, who built the great pyramid at Gizeh, copper was mined by Senoferu, a king of the fourth dynasty. The Phenicians probably mined copper first in Cyprus. But Ezek. xxvii. 13 states that later on they obtained ore also from the Colchian Mountains through the Tibareni and Moschi. The Israelites had commercial relations both with the Egyptians and the Phenicians, but not in very early times. Moses, however, is represented as having made a serpent of brass ("neḥushtan," Num. xxi.

9), which was later on worshiped in the Temple of Jerusalem, and which Hezekiah "brake in pieces" (II Kings xviii. 4); and Bezaleel, while in the desert, is said to have made partly out of brass the vessels for the Tabernacle.

Images and Altars of Brass.

These instances are anachronisms; for it is shown in I Kings vii. 13 (compare II Chron. ii. 12 *et seq.*) that in the days of Solomon the process of casting brass was still unknown to the Israelites, since the king had to send to Tyre for a worker in brass (Hiram). Ex. xxxviii. is also an instance of anachronism, the furnishings of Solomon's Temple being taken as a pattern; while the neḥushtan of II Kings xviii. 4, if it actually belongs to early times, must have been imported from elsewhere. That such things were imported may be gathered from the commandment of Yhwh in Ex. xxxiv. 17. If a "molten image" (מסכה) is here forbidden to the people, it may be assumed that, in contradistinction to the old Hebrew Ephod of wood or stone, the imported image of brass was interdicted, and that in Ex. xxxiv. 17 the term "massekah" (מסכה) is to be taken in its specific sense of a brazen manufacture; for in early times idols of wood or stone, plated with gold or silver, were worshiped ("efod" or "pesel"; compare Judges viii. 22 *et seq.*, xvii. 1 *et seq.*). This assumption is all the more probable since there is no longer any doubt that foreign, more especially Phenician, influences affected the construction and furnishing of Solomon's Temple.

In early times the altar of Yhwh was built of earth or of unhewn stone (Ex. xx. 24 *et seq.*). The brazen altar in the Temple of Solomon indicates a breaking away from this old Israelitic custom; and Ahaz afterward had a new altar built in the Temple, patterned after an altar he had seen at Damascus (II Kings xvi. 10 *et seq.*). From this time on it probably became the custom in Israel to make their vessels of brass. Unfortunately the costly brazen pillars, calves, vessels, etc., that adorned the Temple since the days of Solomon, were destroyed by the vandalism of the Babylonians, who broke them into pieces and carried the metal to Babylon (II Kings xv. 13 *et seq.*; Jer. lii. 17 *et seq.*). In the Second Temple there were also brazen vessels, but not in such quantities; brazen cymbals are mentioned in I Chron. xv. 28 (compare Josephus, "Ant." vii. 12, § 3). The heaven of brass referred to in Deut. xxviii. 23 does not mean that after a long-continued drought the sky gleams like new molten bronze, since in the parallel passage of Lev. xxvi. 19 the earth also is compared to brass. It means rather that the vault of heaven is closed so tight that no drop of rain can descend, and the earth in consequence is turned into brass; that is, becomes hard and unproductive.

COR ASHAN. See Chor-Ashan and Ashan.

CORAL: A genus of polypus known to science as "coralligenous zoophytes"; also the hard structures secreted by these animals. The variety known as the red coral (*Corallium rubrum*) (Pliny, xxxii. 2, 11, and elsewhere) is found in the Mediterranean, and was greatly valued by the ancients. It was used for personal ornament, and also for talismans and amulets. It is not certain that the ancient Hebrews were familiar with the coral. The A. V. translates the Hebrew ראמות "coral" in Job xxviii. 18 and in Ezek. xxvii. 16, while in Prov. xxiv. 7 both the A. V. and R. V. give "too high" as an equivalent for the same Hebrew word.

In favor of a derivation from רום ("to be high") it might be urged that the red coral has a natural upward form of growth. According to Freitag ("Einleitung in das Studium der Arabischen Sprache," p. 332), the coral in use among the Arabs was white, not red. But he confounds glass beads with corals. In Job xxviii. 18 the Septuagint reads *μετέωρα*, Sym. *ὑψηλά*, Vulgate *excelsa*, showing the influence of the etymology from the word meaning "to be high." The Targum renders סנדלכון according to Cheyne = *σανδαράκη*), which is entirely inapplicable here; Jastrow prefers "sardonyx," Levy "sandarachina." Rashi holds ראמות to be the name of a precious stone found in the water. Ibn Ezra gives no explanation, and Gersonides, with the Targum, the paraphrase "costly pearls."

Of modern commentators, Dillmann thinks that "ramoth" (Job xxviii. 18), which Luther simply transliterates, designates something less valuable than "peninim," mentioned in the second half of the verse. Friedrich Delitzsch (in his German translation of Job, 1902) translates it "pearl shells." In Ezek. xxvii. 16 the Septuagint (Alexandrine Codex) has the transliteration *ραμμωθ*, the Vulgate *sericum*, and Targum "precious stones"; Luther, "sammet."

In Prov. xxiv. 7 "ramoth" suggests perhaps a play upon the word (= "too high"), but Bickell suggests a change into דמות, the Septuagint having an altogether different reading. In the margin of R. V. (Lam. iv. 7) "corals," "red corals," and "pearls" are suggested as truer renderings for the Hebrew word "peninim" (Job xxviii. 18; Prov. iii. 15, viii. 11, xx. 15, xxxi. 10). Luther has this translation in Lam. iv. 7; Friedrich Delitzsch in Job xxviii. 18. Gesenius ("Th.") holds "peninim" to be the red coral, and "ramoth" to be another, probably the black, variety. The use of the word משך ("draft") in connection with "peninim" in Job xxviii. 18, appears to recall the method employed in coral-fishing. Coral is broken off from the rocks by long hooked poles, and "drawn out."

Of medieval Jewish lexicographers, Abu al-Walid, in his "Book of Roots," rejects the opinion that "ramoth" signifies "coral." Ḳimḥi, in his dictionary, explains it as a precious stone. See Menahem ben Saruḳ in "Maḥberet," and "Sefer ha-Parḥon."

E. G. H.

CORBEIL (קורביל or קורבייל): City in the department of Seine-et-Oise, France. Jews were settled very early in Corbeil, occupying a special quarter, called the "Juderia." It is mentioned in Tosafot to Ket. 12b, Ḥul. 122b, and is probably referred to in a document of the fifteenth century wherein is mentioned a place "où soulit estre aulterfois l'eschole aux Juifs" (where formerly the school of the

Jews used to be) ("Rev. Et. Juives," ix. 62). In 1184 King Philippe Auguste presented the cleric Pierre with a house that had belonged to the Jew Hélie (Eli). In 1202 special taxes were imposed upon the Jews of Corbeil; and they were obliged to pay into the treasury a sum for affixing seals to the documents relating to their transactions with Christians. The journal of the treasury of the Louvre, 1298, mentions the Jew Hagin, who was a receiver of taxes, and the Jewess Thyerma, whose taxes amounted to 41 livres. In 1306 the Jew Cressant owned a house on the Seine which yielded a rent of 520 Paris livres. This Cressant is probably identical with the "Croissant, nevou Croisant de Corbueil" mentioned in the "Document sur les Juifs du Barrois" ("Rev. Etudes Juives," xix. 250), and with Cressent of Corbeil, one of the commissioners appointed by the king in 1315 to supervise the payment of the debts of his coreligionists (Saige, "Les Juifs du Languedoc," pp. 106, 330).

Many eminent Talmudists lived in this city. Among them were Judah of Corbeil; Jacob the Saint; Joseph, mentioned by Aaron ben Ḥayyim ha-Kohen in his commentary to the Maḥzor, written about 1227; Simson; Isaac ben Joseph; Perez ben Elia; Mordecai ben Nathan; Elhanan, son of Isaac the Elder, of Dampierre.

G. S. K.

CORCOS (קורקוס or קורקוש): A family whose history can be traced back to the end of the thirteenth century, and members of which are still living in Gibraltar and Morocco. The name first appears in Spain; but it was only in the two centuries following the expulsion of the Jews from that country that the family rose to distinction, in Italy, its new home. Here it was considered one of the most distinguished families of the country, owing to the culture, piety, and wealth of its members. Although the family pedigree, as given herewith on the authority of Vogelstein and Rieger, is in some points only conjectural, yet it may still be safely assumed that all who bear the name of "Corcos" in Italy belong to one family. On the other hand, the relationship of these to others of the name in Spain has not as yet been ascertained.

It is alleged that the family originated at a place called "Corcos," which, however, can not be satisfactorily identified. Some scholars therefore think that the name is a corruption of "Carcassonne," a place in southern France. Doubtful, likewise, is the statement made by Christian scholars that one branch of the family embraced the Christian faith in the sixteenth century and attained high distinction.

BIBLIOGRAPHY: Bartolocci, *Bibliotheca Rabbinica*, iii. 821-827; Berliner, *Aus Schweren Zeiten*, in the *Hildesheimer Jubelschrift*, pp. 162-163; Steinschneider, in *Hebr. Bibl.* xi. 71-72; Vogelstein and Rieger, *Gesch. der Juden in Rom*, ii. 101-108.

1. Abraham Corcos: The earliest known member of the family, father of Solomon Corcos (No. 14). He flourished in Spain in the second half of the thirteenth century.

2. David Corcos: Ancestor of the Corcos family in Italy; went in 1492 from Castile to Rome, where his son Solomon (No. 15) afterward became rabbi (Vogelstein and Rieger, *l.c.* p. 101).

3. Donna Corcos: Daughter of Solomon. About 1585 Lazaro da Viterbo dedicated to her his translation of the "Me'on ha-Sho'alim" (Steinschneider, "Cat. Bodl." col. 1987).

4. Elijah ben Solomon Corcos: Italian financier; flourished about the middle of the sixteenth century. In conjunction with his brother Joshua (No. 9), he opened a banking establishment in Rome June 11, 1537. He took part in the conference held by the Jewish bankers on that day, the object of which was to fix certain business usages which were to form the basis of an arrangement with Christian bankers.

He was an active member of the congregation in Rome, the financial affairs of which, especially in relations with the authorities, were entrusted to him. Thus (July 20, 1558) he engaged to pay to the papal vicariate 1,000 scudi in three instalments, this sum having been imposed as a fine upon the congregation because, a few days after the seizure of the Hebrew books by the officers of the Inquisition, a copy of Ibn Ezra's Commentary to the Pentateuch was found. So likewise the tax upon the congregation, which had been fixed at 360 ducats by Paul III., was paid by Elijah and two other Jewish bankers. Similarly, the tax on the congregation of Benevent, amounting to 35 scudi in gold, was handed to the authorities by Elijah on Jan. 31, 1542.

It seems that Elijah lived to an advanced age; for in 1581 he is still found as one of the delegates of the congregation who were appointed to confer with the tax-farmers of Romagna, Lombardy, and Tuscany concerning the security which the congregation in Rome was to furnish for them.

Elijah was also a rabbinical scholar; whose decisions, in his own handwriting, are still extant ("Revue Etudes Juives," x. 185). His identity with Elijah Corcos, the physician referred to by David de Pomis in the preface to his "Ẓemaḥ Dawid" (fourth line from foot), is, however, doubtful. Elijah had two sons, **Isaac** and **Moses.**

5. Hezekiah Manoah Corcos: Rabbi and Talmudist; born about 1580; died about 1650. In 1620 Hezekiah was appointed rabbi of the congregation in Rome, which position he held till his death. Though he shared his functions with A. di Iscario, D. della Rocca, and S. Castelnuovo, he was the dominant spirit; and it was through him that the rabbinate recovered to some extent its former importance. When, in 1629, an inquisition of Hebrew books was ordered in Modena, Hezekiah addressed a letter to Pelegrin Sanguinetti, calling his attention to the papal brief dated April 17, 1593, and to the decree of the Index Committee issued Aug. 29, 1596 (Stern, "Urkundliche Beiträge," p. 181).

Hezekiah was regarded as one of the foremost Talmudists of his day; and the few fragments of his literary activity found in the contemporary responsa literature show him to have been a very clever casuist (compare, for instance, Shabbethai

Beër in "'Oshek," No. 10). When Nathaniel Trabotti, through his work on ritual baths ("Miḳwa'ot"), called forth a number of controversial articles, it was Hezekiah who allayed the excitement by supporting Trabotti. A daughter of Hezekiah was married to Isaac Corcos, from which union sprang Hezekiah Manoah Ḥayyim Corcos (No. 6).

6. Hezekiah Manoah Ḥayyim b. Isaac Corcos (in Italian, **Tranquillo Vita**): Italian rabbi, physician, and scholar; born in Rome 1660; died there Jan. 13, 1730. Hezekiah, who, on his mother's side, was a grandson of Hezekiah Manoah (No. 5), and, on his father's, a nephew of Raphael Corcos (No. 10), early distinguished himself both as physician and preacher. His activity in the affairs of the congregation began with his election to membership on Aug. 12, 1692. Until the day of his death he worked untiringly in the interest both of his own congregation and of all the Italian Jews. The honorable title by which he was known, "Leader of the Age," was no exaggeration. Indeed, the history of the Jews in Rome from 1692 to 1730 is the history of Hezekiah Manoah.

His first important act was his stand against the convert Paolo Medici, who delivered anti-Jewish speeches in the churches and in the public squares of Leghorn, Pisa, Florence, and Bologna. In the last-named city these addresses led to bodily assaults. Corcos then published a memorial (Rome, 1692), addressed to the congregation of the Holy Office, refuting the charges of hatred against Christianity brought by Medici, explaining correctly the derided sayings of the sages, and directing attention with special emphasis to the fact that Medici's writings had already been several times suppressed by the ecclesiastical authorities. Another work by Corcos, written in 1698 or thereabouts, but not printed, was his memorial to the pope regarding the high rents which the Jews in the Roman ghetto had to pay in consequence of the papal edicts; the result of the memorial was that Innocent XII. ordered a reduction amounting to 12 per cent. In his "Informatione" (Rome, 1699) he attempted to show that every Jew had the right to dispose freely of his fortune by will; this right having been disputed by Christians in order to prevent converts being disinherited.

Great excitement was caused in Italy by the arrest in Viterbo (1705) of five Jews on a blood accusation, such charges having never before been preferred in Rome or its vicinity. Corcos came forward with his "Memoriale" (Rome, 1705), addressed to Monsignore Ghezzi, the papal reporter on Jewish affairs, wherein he demonstrated the groundlessness of the accusation. In addition to this, Corcos (*ib.* 1706) wrote a "Summarium," in which he produced documents, relating to the blood accusation, from secular and ecclesiastical authorities; and also a "Memoriale Addizionale," in which he presented additional material concerning the historical treatment of this subject. Of apologetic character is his "Spiegazione" (Rimini, 1713), which was written at the request of the inquisitor-general, and deals with the question whether the "mezuzah" serves superstitious purposes. Corcos, of course, denied this, and advanced instead a theory of angels, which reveals him as an adherent of the Cabala of Luria. This is also seen in his founding various mystical societies for private worship.

Aside from this, however, Corcos' activity in Rome, where he filled the office of rabbi from April 9, 1702, was highly beneficial. In consequence of his petition to the "Tribunal of Grace," the sale of meat in the ghetto was regulated, and the Jews were permitted to sell to non-Jews the meat which was forbidden to themselves. In 1727 he submitted to the Inquisition a memorial concerning Hebrew books. It should also be mentioned that Corcos brought about in 1719 the use of Italian in keeping the communal records, Hebrew having formerly been employed.

Corcos, who in point of secular education had no equal among the Jews of his time, was also considered a high rabbinical authority, as is shown by his decisions in the contemporary rabbinical literature, many of which are still extant. Apart from his works discussed above, in all of which he pursued some practical object, Corcos wrote a philosophic treatise for Purim, "Discorso" (Rome, 1710), in which he develops the pragmatic history of Esther and Mordecai; parts of it were recited by pupils of the academy at the Purim celebration. He left behind him an only son, **Samuel Ḥayyim** (died April, 1731), an active and noted member of the congregation, who wrote an introduction to his father's "Discorso."

BIBLIOGRAPHY: Berliner, Vogelstein and Rieger, as above; Steinschneider, in *Monatsschrift*, xliii. 517-529, 563-564; Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 105; Kaufmann, in *Revue Etudes Juives*, xxvi. 268-270.

7. Isaac Corcos: According to some authorities, the earliest known bearer of the name in Italy. Bartolocci records the Hebrew inscription on his tomb, which is dated Laterna, 1448. This reading must, however, be wrong, as the Corcos family probably did not go to Italy until after 1492; though the name Isaac is frequently found in the family.

8. Joseph Corcos: Spanish Talmudist; flourished at the end of the fifteenth century and in the first half of the sixteenth. Joseph left Spain as a youth, presumably in consequence of the expulsion of the Jews, and settled in Palestine. Here he occupied a high rank among the scholars of the day. David Abi Zimra, Joseph Caro, and Joseph Trani speak of him as a rabbinical authority of the first rank. He wrote a commentary on Maimonides' "Yad ha-Ḥazakah," which Joseph Caro had before him when he was writing his own commentary on that work. A small portion of it only has been printed (Smyrna, 1757; reprinted in the Warsaw ed. of the "Yad"), under the title "Hai Safra debe Rab," which work furnishes ample testimony of the author's wide scholarship and critical mind. Some of Joseph's responsa were published by Azulai in his "Ḥayyim Sha'al II.," Leghorn, 1792-95. The treatises containing his detailed studies of the "Yad," to which the Oriental scholars of the seventeenth century had access, seem to have been lost. Corcos must have reached an advanced age; for, as his responsa in Joseph Caro's "Abḳat Rokel" show (No. 200, erroneously ascribed to Caro), he was still living when Caro's "Bet Yosef" appeared. He must have died after 1575, to judge from a remark of Ibn Yaḥya in "Shalshelet ha-Ḳabbalah" (ed. Warsaw, p. 88; compare also Sambari in Neubauer's "Med. Jew. Chron." i. 140).

Not to be confounded with this Joseph Corcos is the Italian of the same name, author of the homiletico-exegetic work "Yosef Ḥen" (Leghorn, 1825), and compiler of a little volume entitled "Shi'ur Ḳomah" (*ib.* 1825?), containing readings taken principally from the Zohar.

9. Joshua ben Solomon Corcos: Italian banker of the sixteenth century. In conjunction with his brother Elijah (No. 4), he carried on an extensive banking business in Rome, which they had established in 1537. A century afterward Manasseh ben Israel could still point to the great wealth of the firm, which in 1656 represented the sum of 700,000 crowns. Joshua was an active member of the congregation; and as such, on March 16, 1558, acted as the representative of the united synagogues of Castiglione and Zafartine in the drafting with the united synagogues of Catalonia and Aragone of a deed of partnership in the use of certain synagogal utensils. Significant also is the compact drawn up by Joshua between the Jewish and the Christian tailors in regard to the manufacture of certain articles of attire. In more than one respect this document is highly interesting, but especially from the fact that the idea of a tailors' union was suggested by the Christians, who were aiming at common business methods with the Jews.

BIBLIOGRAPHY: Berliner, *Aus Schweren Zeiten*, pp. 159-160.

10. Raphael Corcos: Italian rabbi; died about 1692. He seems to have succeeded his kinsman

Hezekiah Manoah (No. 5) as rabbi. After the death of the latter he was the real representative of the Corcos family. This is why his nephew Hezekiah Manoah Ḥayyim held no office in the congregation during Raphael's lifetime, as the presence of uncle and nephew in the same rabbinate would not have been looked upon with favor. Corcos is to be distinguished from his namesake who was rabbi in Padua about 1620. The latter is mentioned by Isaac Cantarini ("Paḥad Yiẓḥaḳ," p. 106) as a noted scholar.

BIBLIOGRAPHY: Vogelstein and Rieger, *Gesch. der Juden in Rom*, ii. 106-107.

11. Samuel Corcos: Italian rabbi of the first half of the seventeenth century. He was rabbi at Sinigaglia, where he delivered the funeral sermon at the burial of Mordecai Graziani, father of Abraham Joseph Graziani (Nov. 7, 1643).

BIBLIOGRAPHY: Jona, in *Revue Etudes Juives*, iv. 113; Kaufmann, in *Monatsschrift*, xxxix. 352-353.

12. Solomon Corcos: Spanish Talmudist; flourished at the beginning of the fifteenth century. A responsum by Zerahiah ha-Levi, a disciple of Ḥasdai Crescas, addressed to Corcos, is included in the responsa collection of Solomon ben Abraham Adret, v. 166 (Halberstamm, in "Hebr. Bibl." xii. 42).

13. Solomon Corcos: Converted Jew, who is said to have embraced Christianity in 1573. Bartolocci states ("Bibliotheca Rabbinica," iii. 821) that, under Pope Gregory XIII., Corcos, together with his son Lazaro, became a Christian, and in consequence received titles and honors. He also identifies them with Ugo and Gregory, who, according to a papal "motu proprio" of the year 1582, the text of which he cites, were raised to the nobility. Proof of the correctness of this assertion, however, is wanting. It is certain that neither Solomon ben David (No. 15) nor his grandson Solomon ben Joshua, an active member of the congregation in Rome as late as 1574, is identical with the convert referred to by Bartolocci.

BIBLIOGRAPHY: Berliner, *Aus Schweren Zeiten*, in *Hildesheimer Jubelschrift*, p. 162.

14. Solomon b. Abraham Corcos: Spanish Biblical scholar; flourished in the first third of the fourteenth century. He was a disciple of Judah ben Asher, and wrote in Avila (Aug., 1331) a commentary to Israeli's "Yesod 'Olam," the manuscripts of which commentary are now in the libraries of Munich and Turin.

BIBLIOGRAPHY: Steinschneider, *Hebr. Bibl.* xi. 71; *idem*, in *Katalog der Hebräischen Handschriften in der Königliche Hof- und Staats-Bibliothek in München*, Nos. 33, 3; 43, 10; 261, 1; Vogelstein and Rieger, as above.

15. Solomon ben David Corcos: Italian rabbi in the sixteenth century. He was by birth a Spaniard, but, owing to the expulsion of the Jews from Spain, went to Rome with his father. As early as 1536 he appears as rabbi; afterward, in 1540, 1542, as משרת דק"ק רומא. The father of Donna Corcos is not identical with Solomon ben David; since Viterbo, in his work "Me'on ha-Sho'alim," which appeared about 1585, speaks of Solomon, Donna's father, as one still living; while Solomon ben David, in a record of March 16, 1558, is spoken of as deceased.

BIBLIOGRAPHY: Berliner, *l.c.* p. 159.

16. Yom-Ṭob Corcos: Spanish rabbi; flourished in Monzon at the beginning of the fifteenth century. He was one of the Jewish delegates at the disputation of Tortosa in 1413. Ibn Verga, who reports this fact, writes the name in his "Shebeṭ Yehudah" (ed. Wiener, p. 68) as קרקושה, which is probably only a variant of קורקוס (Corcos).

CORDOVA: A city in Andalusia, Spain. As early as the eighth century it included Jews among its inhabitants. They lived in a separate quarter or "Juderia," one of the gates of which was called "Bab al-Yahud," now the Almodovar gate. At this gate, later known to the Moslems as "Bab al-Huda," the Jews carried on an extensive trade in silks and slaves. They developed considerably in numbers and importance under 'Abd al-Raḥman I.—whose greatness is said to have been prophesied by a Jew—and under his successors. The Jews were not behind the Moors in their efforts to promote education and culture; and at the Academy of Cordova, founded by the califs, Jews and Moors together received instruction in philosophy, grammar, mathematics, botany, and even in music. One of the graduates from this academy was a Jew named Elias, who is referred to as a poet and as an author of synagogal verses and songs. Mention is also made of a Jewish musician by the name of Manṣur, who is said to have been a great favorite with Al-Ḥakim (Mariano Soriano Fuertes, "Historia de la Musica Española," i. 82, Madrid, 1855).

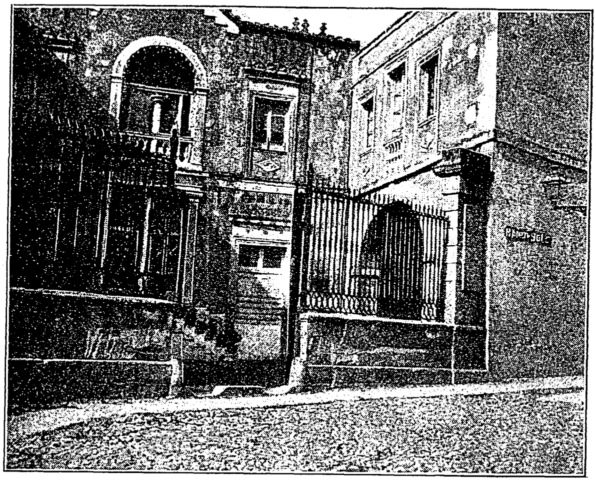
Bab al-Yahud or Gate of Almodovar, Formerly the Entrance to the Juderia at Cordova.
(From a photograph by Dr. W. Popper.)

In Cordova, as in Mohammedan countries generally, the Jews enjoyed the same privileges and were subject to the same duties as the other inhabitants. They fought in the Moorish army and held government positions. The cleverest Hebrew diplomat was Ḥasdai ibn Shapruṭ, minister of finance under

Ḥasdai ibn Shaprut.

'Abd al-Raḥman III. It was he who brought about the visit to Cordova of the proud queen Toda of Navarra with a large retinue, for the purpose of making an appeal to 'Abd al-Raḥman for protection and assistance. Through Ḥasdai's intercession the scholar Moses b. Ḥanok, who had been exiled to Cordova, was liberated. Ḥanok was afterward elected to succeed the chief rabbi, Nathan, who had voluntarily resigned. Ḥasdai founded at Cordova a school entirely independent of the gaonate, and thereby established the study of the Talmud in Spain. Through the efforts of Ḥasdai, who had attracted to himself many scholars, poets, and grammarians, such as Menahem b. Saruḳ, Dunash b. Labrat, and others, Cordova became the seat of Jewish learning.

After Ḥasdai's death (about 970) a dispute arose in the community concerning the rabbinical office at Cordova, which, after the death of Moses b. Ḥanok, was filled by his son. Many members of the community, especially the rich silk-manufacturer Ibn Gau, favored Joseph ibn Abitur for the position. The latter belonged to a prominent family of Cordova, and was greatly superior to Ḥanok in learning; furthermore, he was a poet of distinction and a master of Arabic. But the greater part of the community sided with Ḥanok. The dispute lasted for a long time, and was finally brought before the calif, Al-Ḥakim, who, yielding to the will of the majority, decided in favor of Ḥanok. When Jacob ibn Gau, however, received from Mohammed Abi-Amr the appointment of "nasi" and supreme judge of all the Jewish communities of Andalusia, and was elected by the Jews of Cordova as their chief, he removed Ḥanok from office, and, with the concurrence of the members of the community, recalled the banished Ibn Abitur as rabbi. But Ibn Abitur failed to respond to the call; and after the death of Jacob ibn Gau, who had meanwhile been removed from office and thrown into prison, Ḥanok was reinstated as rabbi, and retained his position until his death, which occurred on the last day of the Feast of Tabernacles (Sept. 29, 1014).



Calle de Maimonides, Cordova.

Persecutions Under the Moors.

Ḥanok lived long enough to witness the evil that came upon Cordova. After the death of Al-Manṣur a furious civil war broke out. The Berber chieftain Sulaiman, who was ambitious to be ruler, had united with Count D. Sancho of Castile; whereupon Mohammed, his rival, sent a deputation of rich Jews to invoke the aid of Count D. Ramon Borrell of Barcelona, who at once responded with an army. On hearing this, Sulaiman swore to avenge himself upon the Jews; and on April 19, 1013, he broke into Cordova, destroyed their dwellings, burned their storehouses, and drove the Jews from the city; only those living in one of the eastern suburbs being spared. This was the first persecution suffered by the Jews of Spain (V. Balaguer, "Historia de Cataluña," I., book iii., ch. v.). The most noted families of Cordova were reduced to beggary and driven into exile. Joseph ibn Shaprut, the son of Ḥasdai, and the grammarian Jonah ibn Jannaḥ settled at Saragossa; Samuel ibn Nagdelah, at Malaga. In Cordova, where, in 1117, a false Messiah had appeared, there remained but a comparatively small Jewish community; and this was soon subjected to new persecutions at the hands of the fanatical Almohades, whose leader, 'Abd al-Mumin, in 1148, compelled the Jews to choose between Islam and death. Many underwent the formality of conversion to Islam; while many others emigrated. The magnificent synagogue at Cordova, erected by Isaac ibn Shaprut, father of Ḥasdai, the rabbi of which was the scholarly Joseph ibn Ẓaddiḳ, became a prey to insatiate pillage by the fanatics.

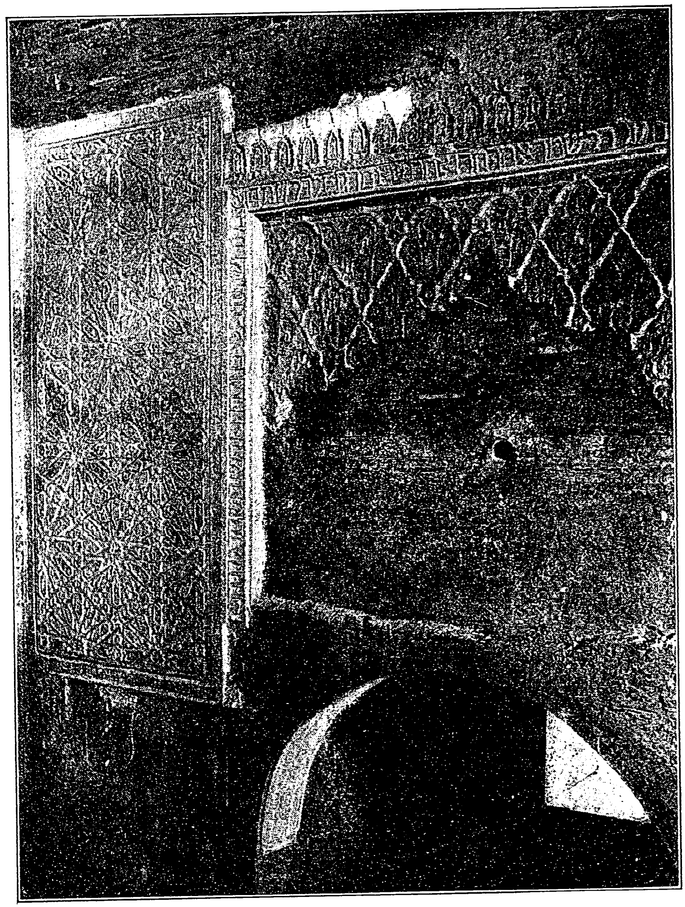
Under Castilian Rule.

Cordova, the old seat of the califs and the birthplace of Moses Maimonides, was retaken in 1236 by Ferdinand III., "the Saint" of Castile; and the Jews of the city again came under the jurisdiction of the canonical laws. The king assigned to them as their habitation the old Juderia, situated near the cathedral, and next to the fish-market ("la Pescaderia"); the principal street of the quarter being known as the "Calle de los Judios"—now the Calle de Maimonides. This Juderia was surrounded by walls, and dominated by a fort. They were obliged to wear distinctive badges and, in accordance with a decree of Pope Innocent IV., to contribute a tithe to the clergy. As soon as the Jews, in consequence of the privileges which had been granted to them by Ferdinand III. (Fuero de Cordova), again felt certain of protection, they began to build a synagogue, the height and magnificence of which aroused the wrath of the bishop and the chapter, who submitted a protest to the king. As this protest remained unheeded, however, the clergy turned to the pope, requesting him to forbid the completion of so imposing a structure. On April 15, 1250, Innocent IV. issued the desired prohibition; but the structure was nevertheless completed in the same year. The papal decree had this effect, however, that thereafter the Jews of Castile and Leon could not erect a synagogue without special permission (Amador de los Rios, "Historia," i. 365 *et seq.*, 556 *et seq.*; "Boletin Acad. Hist." v. 202, 234, 361 *et seq.*; "Rev. Etudes Juives," ix. 157 *et seq.*). Fifty-five years later a new and magnificent synagogue was built by the architect Isaac Meḥab b. Ephraim, in the middle of the Calle de los Judios, between the Place de las Bulas and the Almodovar gate. It was designed in the Moorish style, and had ogives 5 meters long and 6 meters wide. The northern and southern façades were decorated with colored faience, and bore Hebrew inscriptions, consisting principally of verses from the Psalms. The ornamentation of the western wall contained the only Arabic dedication to be found in any synagogue of Spain; while the eastern wall bore, in the form of a square, the following Hebrew inscription:

מקדש מעט ונוה תעודה שכללו
יצחק מחב בן הגביר אפרים
נבנה שנת שבעים וחמש בנין שעה
[קום] אל וחיש לבנות ירושלים

("This little sanctuary and a house of testimony was built in the year 75, by Isaac Meḥab, son of the honorable Ephraim, as a temporary structure: Haste, O God, to rebuild Jerusalem!")

In שעה ("temporary," lit. "of an hour") the year 75 (שנת ע'ה) is again indicated. Since 1722, and possibly from an earlier period, this building was in the possession of the Shoemakers' Gild. The original purposes to which it had been dedicated were unknown. In 1884, however, the origin of the building was discovered by two academicians, D. Fidel Fita of Madrid and D. Romero y Barros of Cordova; and, like the two synagogues of Toledo, it is now set apart as a national monument ("Boletin Acad. Hist." v. 202 *et seq.*; "Rev. Etudes Juives," x. 246 *et seq.*).



Decorations on the Walls of the Ancient Synagogue at Cordova.
(From a photograph by E. N. Adler.)

The history of the Jews in Cordova differs but slightly from that of those of other communities in Castile. Upon the death of Ferdinand IV., his widow, Queen Constance, decided (Oct. 4, 1312) that a yearly requiem should be sung in memory of her husband; the expenses to be defrayed out of the annual revenue of the slaughter-house at Cordova, aggregating about 4,000 maravedis. For about ninety years the Jews of Cordova enjoyed uninterrupted tranquillity, until they, too, became victims of the general persecution of 1391. The clergy, especially the archdeacon Ferrand Martinez, had so persistently instigated the people of Seville and Cordova against the Jews, that in Jan., 1391, an outbreak was considered imminent; and in June of the same year massacres of the Jews spread from Seville to Cordova. The dwellings, storehouses, and factories of the Jews became a prey to the flames; virgins were dishonored; and men, women, and children, without distinction of age or condition, were shockingly murdered. More than two thousand corpses lay in the streets, the houses, and the synagogues. Many persons, through fear of death, decided to embrace Christianity; and the community, once so flourishing, lay desolate. Of the beautiful synagogues, that built in 1315 alone remained. **Massacres.** In 1406 these persecutions were renewed. The shops and dwellings of the Jews were plundered or burned, and hundreds of persons were ruthlessly massacred. In consequence of these repeated cruelties the feeble king, Henry, imposed a fine of 40,000 doubloons upon the city of Cordova. Only 10,000 were paid, as the king died before the negotiations for a diminution of the sum had been completed (De los Rios, *l.c.* ii. 105, 361, 415 *et seq.*; Epistle of Ḥasdai Crescas, in the Appendix to "Shebet Yehudah," ed. Wiener, p. 129). After the massacre many Jews left Cordova and settled at Granada, which was still under Moorish dominion. In 1470 the "corregidor" (governor) of Cordova ordered the few Jews still remaining in the city to be removed from the Juderia, where their ancestors had dwelt for centuries, and to be transferred to the old Alcazar. At the petition, however, of Moses Barchillo, president of the Jewish congregation, this order was abrogated by a decree of Isabella the Catholic (March 16, 1470).

Procession of the Caridad.

Still more violent was the hatred against the apostate Maranos—a hatred which soon resulted in the formation of two parties; viz., the Old Christians, headed by the Bishop of Cordova and the Count of Cabra, and the Maranos, or New Christians, whose protector was the powerful Alfonso de Aguilar. One of the associations organized by the clergy was the Caridad, a society which excluded all Maranos without exception from membership. The solemn inauguration of this society was celebrated by a procession on March 14, 1473. All the streets through which it passed were strewn with flowers; and all the houses—excepting those of the Maranos, which remained closed—were decorated with flags and costly carpets. As the procession reached the Calle de la Herreria ("street of the smiths"), in the vicinity of the cathedral and the Juderia, the signal for assault was given. A smith, Alonzo Rodriguez by name, seized the torch illuminating an image of Mary, and set fire to the house of one of the richest Maranos of the city—an act which he averred to have committed out of vengeance, because water had been poured from one of the windows of the house in question upon the canopy under which the image was placed. In explanation of this charge it is said that a Marano girl, eight or ten years of age, had indeed inadvertently poured some water from the window. With the cry of "Viva la fé de Dios," the fanatical mob broke into the houses of the Maranos, pillaged and burned them, and mercilessly slaughtered the inmates. In order to terminate this cruelty, the governor, Alfonso de Aguilar, accompanied by his brother, Gonçalo Fernandez de Cordova, and several knights, ordered the smith, who acted as leader, to withdraw with his band. The smith answered with a volley of abuse, while the enraged mob attacked the governor, who thereupon ran the smith through with a lance. The governor's action infuriated the mob to such a degree that it poured into the streets inhabited by the Maranos—the S. Maria de Gracia, La Roperia ("street of the pedlers"), La Curtiduria ("street of the tanners"), La Alcaiceria ("the silk-market"), La Plateria ("street of the goldsmiths"), and many others, all of which soon ran with the blood of the slaughtered. De Aguilar was obliged to withdraw to the Alcazar, which also served as a place of refuge for many Jews and Maranos. After the storm had subsided the governor was obliged to leave Cordova; and he proceeded to Aguilar, whither he was followed by many Jews and Maranos. In 1473 an order was issued prohibiting Maranos from holding public office in Cordova; and this was soon followed by another royal decree prohibiting Jews from residing in that city and in Seville under penalty of death. Nineteen years before the general expulsion, therefore, the Jews were obliged to dispose of their houses in Cordova at any price and leave the city.

Cordova and Seville were the first to furnish victims to the Inquisition, which afterward destroyed so many thousands of Maranos in those cities (see INQUISITION). The chief autos da fé held in Cordova (and the victims at each) were: June 29, 1665 (Jorge Mendez de Castro and Domingo Rodriguez de Caceres); July 6, 1666 (Diego de Herrera, Juan Nicolas Lopez de la Peña, Catalina de Reyna y Medina, and Antonio Gabriel de Torres); June 13, 1723 (Miguel de Soto y Herrera, Juan Fernandez Dias and Simon de Molina); and April 23, 1724 (Bernardo Philip de Soria de Caceres and Diego de Acosta).

CORDOVERO, GEDALYAH BEN MOSES: Talmudic scholar; lived at Safed in the sixteenth century. He was a son of the famous cabalist Moses Cordovero, a nephew (on his mother's side) of the cabalist Solomon Alḳabiẓ, and a pupil of Solomon Sagis. He edited three works of his father: "'Abodat Yom ha-Kippurim"; "Or Ne'erab," to which he wrote a preface (Venice, 1585); "Pardes Rimmonim," also with a preface by him (Venice, 1586). He further edited "Ḥeshek Shelomoh," the work of an anonymous writer (Venice, 1588), and compiled a glossary of all the non-Hebrew words occurring in the Bible, giving their equivalents in Spanish (Venice, 1616). In addition, a responsum by him is mentioned by Yom-Ṭob Ẓahalon, in his collection of responsa (§ 116). See LONSANO, MENAHEM DE.

COREO DE VIENA ("Vienna Courier"): Judæo-Spanish journal printed in rabbinic characters, published at Vienna since 1870. It was for some years under the editorship of Adolfo de Zemlinski.

G. M. FR.

CORFU: Most northerly of the Ionian Islands. The native Jews of Corfu fall into three distinct divisions of different origin (Greek, Spanish, and Apulian) and belonging to different epochs. There was formerly also a fourth division, that of the Levantines, the greater part of whom apparently became merged into the Italians.

Origin.

1. Greek Division: Composed of Jews who came from Thebes toward the end of the twelfth and in the thirteenth century. Benjamin of Tudela, visiting the island in 1147, found only one coreligionist, the dyer Joseph. A large number of Jews came to establish themselves on the island after it had passed from Byzantine dominion to that of the Angevin kings of Naples. Many documents show that there were Jews in Corfu in the thirteenth century, having been carried thither as prisoners by King Roger of Sicily, who conquered Thebes (in Bœotia) and Corfu about 1150, or having voluntarily migrated from Thebes, and perhaps also from Sicily. King Roger had previously sent Theban Jews to the island for the purpose of introducing sericulture, Sicily being at that time under Angevin kings, who favored the Jews. A proof of the Theban origin of the Jews of Corfu is found in the word *σίδα* ("pomegranate"), from the ancient dialect of Thebes, a word used only by them, though their dialect is the Apulian.

The Greek Jews (who called themselves "Toshebim" or "Terrieri") differ from the other Jews on the island by various customs—*e.g.*, they celebrate the additional day of Purim (Shushan Purim; see Esth. ix. 18), while the Jews belonging to the Apulian synagogue celebrate only the first day. The former observe on the first day only the religious ceremony at the Temple and the small banquet, reserving the masquerading, the ball, and the grand banquet for Shushan Purim. They have also preserved Greek elegies for the Ninth of Ab (see specimens in "Israelite Chronographos," No. 2, Corfu, July, 1899), and until recently a Greek chant was recited in their synagogue on the day of Pentecost. The first complete Biblical text in modern Greek is a translation of Jonah (twelfth century) made for the Jews of Corfu. The Greek synagogue is the oldest on the island. Until recently it differed somewhat from the others in its liturgy, and the ministers officiating in Greek still preserve that nasal chant peculiar to the Greco-Oriental preachers. The Greek Jews, who were absorbed by the more numerous Apulians, forgot their language, but have retained characteristic words and phrases. Their family names are, or have been, Gesuã, Eliezer, Belleli, Moustaki, Naxon, De Semo, Mazza, Pangali, and Abdalá. At present they possess not only their own synagogue, but also their own burial-ground, called "the Greek cemetery."

2. Spanish Division: Composed of Spanish Jews who had lived for a time in the Two Sicilies, and who emigrated to Corfu at the end of the fifteenth and during the sixteenth century; among their number was Don Isaac Abrabanel. It seems that these few families for a long time preserved the Castilian language, for in a polyglot chant which can not date further back than the beginning of the nineteenth century, there are found Spanish verses, together with Hebrew, Greek, Italian, and Apulian; and it is evident that the author of the production, Dr. Lazarus de Mordo, wished to incorporate into it all the languages or dialects then spoken by the Jews at Corfu. These Spaniards united with the Apulians, who came at the same time or a little later, to form the Apulian or Italian congregation. Their family names, of Spanish origin, are as follows: Aboaf, Gaon, Cherido, Sarda, Razon, Castro, and Sforno; in addition to which there were formerly Abrabanel, De Miranda, Senior, and Coronel. They are few in number.

3. Apulian or **Italian Division:** Composed of Jews who had been driven (1540) from Apulia by Don Pedro of Toledo, viceroy of Naples. They were so numerous that in time they imposed upon their coreligionists not only their Apulian dialect, but also their costume. The fact that they possess their own synagogue and cemetery is attributed to the unfriendly reception which they met with at the hands of their Greek coreligionists. Eventually, however, their suffering must have softened the original ill will. As a matter of fact, the Greeks, who now constitute the majority of the Jewish population, speak the despised Apulian dialect, while the Apulians have generally adopted the more refined Venetian.

Many of the Apulian families have Biblical names: Israel, Nissim, Mattatia, Misan (משען), Azar, Baruch, Acco (?), Hanen, Ḥayyim, Elia, Levi, and Mordo (Mordecai); also Dente, Osno, Vivante, and Minerbo. The Nahamali and Maurogonato families, who belong to the Italian synagogue, though they apparently should belong to the Greek, probably either came after Corfu had become Italianized, or else left their original synagogue; the latter is known to have been the case with the Mazza family. Elegies in the Apulian language for the Ninth of Ab have been preserved, and it is still a custom, even among the well-to-do classes, who have given up the Spanish dialect, to explain the symbolic rites in Apulian ("ḳadesh," "u-reḥoẓ," "karpas," etc.) on Passover eve. The population, which to-day (1901) exceeds 3,000 souls, numbered 1,171 in 1760.

Fourteenth and Fifteenth Centuries.

The position of the Jews during the first two centuries of their establishment on the island was enviable, especially toward the end of the Angevin régime, the princes of that house issuing decrees which took the Jews under their protection (1317, 1324, 1364, 1365, and 1370). In 1332 Philip II. of Taranto called the attention of the Corfu authorities to the fact that his previous decrees (*e.g.*, March 12, 1324) in favor of the Jews had not been carried out. These privileges were renewed by his grandson, Philip III., in 1370, and probably also by Robert of Anjou in 1338. Robert's widow, Marie de Bourbon, Empress of Constantinople, especially charged the captain of Corfu to see that the Jews of the island were well treated. The same privileges were confirmed Dec. 18, 1382, by Charles III. (Duras), King of Naples.

Jews were often attachés of embassies sent by the community of Corfu to the King of Naples. In 1386 the island voluntarily sought the protectorate of Venice, remaining under Venetian rule until 1797. Among the six ambassadors sent to that city to conclude the negotiations was a Jew, David de Semo; while another Jew, Johama Mayeha, was a member of a foreign embassy in 1515. The seigniory of Venice, which became possessed of Corfu Jan. 1, 1385, took the Jews under its protection. By a decree issued Jan. 22, 1387, it assimilated the Corfiote Jews with the other citizens in the matter of taxation, and granted them the free exercise of their religion, though still holding them to the distinctive signs in their dress. But the Christian Corfiotes, jealous of the commercial success of the Jews, repeatedly sent delegates to the Senate of Venice to petition for humiliating measures against them; and in time the Senate weakly yielded. It did indeed deny the request for permission to stone the Jews ("de Judeis lapidandis"), made by the embassy of Corfiote patricians that came to Venice in 1406; but in order to satisfy the embassy, it decreed that the Jews should wear thenceforth on the front of their dress a yellow wheel or disk as large as a cake of bread, and the women yellow veils on their heads, under penalty of 300 ducats for non-compliance. It also forbade them to acquire houses or lands outside the city or outside the Jewry.

Jews Protected.

At the instance of a Jewish deputy, the physician Master Angelus, the Senate abrogated this decree in 1408, and in 1423 confirmed to the Jews the proprietary rights in their houses, and, upon the whole, recognized, as had its predecessors, the great services rendered by the Jews to the city. They carried on an extensive commerce and contributed more than their share to works of public utility (construction of walls, fountains, etc.), to the running expenses of the city, and to public loans. Many documents remain, dating from the time of the Byzantine emperors, the kings of Naples, and the republic of Venice, testifying to these acts of patriotism on the part of the Jews. For this reason there was never a ghetto at Corfu, in the exact sense of the word; and when in 1571 the republic of Venice expelled the Jews from its dominions, it excepted those of Corfu. By a strange combination of circumstances the republic of Venice, which, on its accession to power, had apparently awakened among the inhabitants the spirit of hatred and contempt against the Jews, protected these very Jews as soon as it recognized their utility to the state.

Documents are extant which show that the Jews knew how to defend their ancient rights. One of these, dating from 1425, is especially noteworthy. According to this document an attempt was made to force the Jews to tear down their houses, on the pretext of erecting upon the sites new walls for the city; whereupon the Jews reminded the magistrate that at the cession of the island a clause placed them on an equal footing with their fellow citizens, and (adds the document) "dicunt et affirmant se esse cives et habitatores Korphoy." Eventually, however, they were compelled to yield to the demand, and consequently dispersed over the entire city, to the great scandal of the Christians. They lived thus more than a hundred years without being molested.

About 1524 the Corfiote Christians began to protest against this close neighborhood, and sent an embassy to Venice to petition that the Jews be confined to a special quarter. The republic thereupon issued a ducal order to that effect, which, however, for unknown reasons (possibly at the instance of the Jews themselves) remained a dead letter. On Oct. 28, 1578, the brothers Menahem and Aaron Mozza received from the doge, Nicholas de Ponte, a confirmation of the ancient privileges of the Corfu Jews. They were expressly exempted from the levy of 50,000 scudi placed upon the Jews by the Venetian Senate July 12, 1573. Petition followed petition (1532, 1546, 1562, 1592), but only after the lapse of a hundred years (1622) were the Jews restricted to a special quarter (near the old fortifications at the Porta Reale and the Via Schulemburg), which still exists. This was not more of a ghetto than the old quarter had been; for a number of Christians lived there, and, unlike the ghetto at Zante and elsewhere, it had no gates to be closed at night.

Occupations.

The larger number of Jews followed some handicraft, and the rich ones were engaged in commerce, acquiring great wealth. They were devoted to their country, fighting for it and giving freely of their money, as may be seen from the written testimonials they obtained from the Venetian governors when the latter laid down their office and left the island. In 1431 they lent the Venetian Senate 3,000 ducats. In the seventeenth century they aided the Venetian armies with money during the disastrous wars with Crete and the Peloponnesus. But in 1656 the captain of the island levied a tax of 10,000 reals upon them, though they had declared themselves ready to pay 500 ducats a year for military purposes. The Jews protested, and on Oct. 25 the Senate ordered the money to be returned. In 1716 they bravely assisted in defending the island of Corfu against the Turks. Two documents testifying to their exceptional heroism are extant. One of these, written by the Venetian generalissimo himself, Count de Schulemburg, tells of the remarkable conduct of the Jewish community; the other, prepared by the governor-general of Venice, Count Loredan, is in favor of Mardochée Mordo (Barbanera), who particularly distinguished himself. Furthermore, the aide-de-camp of Schulemburg, the Corfiote strategos, writes that, of all the inhabitants, the Jews rendered the most signal services. This deliverance is solemnly commemorated every year on Aug. 6.

Seventeenth and Eighteenth Centuries.

In the seventeenth century there were 500 Jewish families at Corfu, and in the eighteenth 1,171 Jews, according to the statistics of the governor Grimani. About this time the Corfiote Christians were greatly excited over the conversion to Christianity of the Jewess Rachel, daughter of the rich merchant Vivante. Notwithstanding all their difficulties, the Jews still enjoyed some rights. Aside from the profession of medicine, which they practised everywhere, they were allowed at Corfu (certainly at a very early time) to practise law. It is true that a decree of May 14, 1637, inhibited the Jews of Venice from practising law; but although the attempt had been made to extend this inhibition to Corfu in 1679, it was withdrawn May 7, 1680. In 1654 Mordecai Cohen was granted a special authorization to defend his coreligionists at the bar. According to an ordinance of 1698, twenty candidates were admitted to the bar in that year, among them being seven Jews; namely, Mordecai Cohen, Elia Cohen di Mordecai, Joshua Forte, Matthew Forte, Solomon Nacamulli, Abraham Pipi, and Abraham Israele. When in 1728 a tax was levied upon the Jews of Dalmatia and of Venice, those of Corfu were again exempted, because of their ancient privileges. They were likewise exempted from the restraints put upon the Venice Jews in 1771. In 1774 orders were sent to Gen. Antonio Renier to remove the Jewish lawyers from the court. Renier's report on the subject was, however, so favorable to the Jews of Corfu that on Aug. 26 he received orders that they were in no way to be further molested.

While Corfu was under French dominion (1797–1799 and 1805–15) the Jews enjoyed all the rights of citizenship, and their rabbi ranked with the Catholic bishop and the Orthodox archbishop. But when, together with the other Ionian islands, it formed a republic under the protectorate of England (1815–1863), the Jews were not only forbidden to practise in the courts, but lost all their rights. When Corfu was annexed to Greece the Jews of the former, as well, as of Chalcis (Eubœa) became entitled to full civil and political rights, for the Grecian constitution makes no religious distinctions. That they entered into the enjoyment of these rights was due in large measure to the initiative of Ad. Crémieux, who in 1864 called the attention of the Ionian Senate to their situation. Since then Jews have figured among the municipal councilors of the island; *e.g.*, Dr. Victor Semo, Joseph Nacamulli, Raphael Gesuã, etc. Elia de Mordo, merchant, was the first assessor; and there have been three notaries and several other Jewish government officials.

In 1891 some evil-minded Christians of the island created a scandal in order to hinder the Corfiote Jews from participating in the elections. A little Jewish girl, Rubina Sarda, was killed, probably by some of these anti-Semites, and the report was spread that a Christian child had been slain for ritual purposes, thereby arousing the opposition of the populace against the Jews. Most of the latter were obliged to leave the place in order to escape a massacre. Although the impartial Greek press disclosed the plot, the instigators, protected, it is said, by high personages, were not punished.

Organization.

Until the annexation the community of Corfu was governed by two councils of administration (one for each congregation), whose decisions regarding communal matters were sanctioned by the government. Each congregation had two syndics ("memunim") and two parnassim. During the Venetian régime the syndics were elected every year by the council in the palace of the governor. They were responsible for order in their district, and occupied the office of conciliators and ediles. They attended the public ceremonies of the governor in their costume of cloth, the costume of the Christian syndics being of silk. Under the British protectorate the interference of the government in communal matters was limited to the presence of a sergeant-at-arms of the municipality at the conferences of the council. The two councils assembled together when questions of general interest were to be discussed. Since the annexation the government has had nothing whatever to do with communal affairs, the rabbis filling the position of civic officials. The two synagogues have been under one administration and one council since 1891.

Rabbis.

Religious studies formerly flourished in Greece, and especially in Corfu. A new impetus must have been given to these studies after the advent of the Apulian Jews, in whose communities they were assiduously cultivated. The paraphrase of the Bible verse "From Bari goeth forth the Law, and God's word from Otranto," is well known. David b. Ḥayyim ha-Kohen, the chief rabbi of Padua in the fifteenth century, was of Corfu. Moses ha-Kohen, rabbi of Corfu, wrote (1580–1600) a poetical version of the story of Esther, entitled "Yashir Mosheh" (ed. princeps, of David Mazza, Mantua, 1612). Mazza calls himself the most humble of the disciples of the chief rabbi Kohen, and in his preface announces the early publication of a work by himself, a commentary on Canticles. The following rabbis have lived at Corfu within the last two centuries: Joseph ha-Kohen, Menahem b. Samuel Vivante (about 1710), Eliezer de Mordo, Mordecai Ḥayyim Elie Mordo, Ḥayyim Shab. Jos. ha-Kohen (about 1744), Elia Menahem ha-Kohen (died 1803), Jeshurun Haï-Penso, Raphael Eliezer Shabbethai Semo, and Abraham Ḥayyim Caliman Ferro (died 1820), all of whom were Corfiotes except, perhaps, R. Penso (probably identical with a physician of the same name known to have lived in Corfu. The last of the native rabbis to officiate was R. Ferro.

Strangers were henceforth summoned to the office, the first of these being the chief rabbi Rabi Shem-Ṭob Amarilio, a native of Salonica, who occupied the chair of Corfu until 1830. This rabbi, who subsequently went to Larissa, Thessaly, was a great Talmudist, and left a large number of manuscripts, chiefly sermons, which are still preserved at Larissa. He was succeeded at Corfu by the chief rabbi (חסידא קדישא = "the pious sage") Judah Bibas of Gibraltar (or of Morocco), who had a large following there. Bibas left Corfu in 1852, going to Hebron, where he died shortly after his arrival. During the following six years the pulpit of Corfu was occupied by Moses Israel Ḥazan of Jerusalem, distinguished as an orator and writer, after whose departure it remained vacant for about five years, when it was again occupied (1865) for six years by the pious and learned R. Isaac Raphael Tedeschi, an octogenarian, who became later the grand rabbi in his native place, Ancona. An important event during his rabbinate was the official visit of King George of Greece to the Apulian temple, June 5, 1869.

Joseph Emmanuel Levi.

Four years after the departure of R. Tedeschi the pulpit of Corfu was occupied by the grand rabbi Joseph Emmanuel Levi (1875) of Italy, previously rabbi of Mondovi and Cuneo, Piedmont, who held the position until his death in 1887. He founded the girls' school and the institute of arts and crafts, organized lotteries for charitable purposes, and by his virtues won the support of the government and the people. Before his arrival he had written a good French grammar for Italians, and from 1878 to 1885 he published the review "Mosè Antologia Israelitica." At his death the government took charge of his funeral, burying him with the military honors due to a general. He died a poor man. In 1888 the community of Corfu called as rabbi the Rev. Alexander da Fano, then occupying the pulpit at Reggio (Italy), who after four years went to the grand rabbinate of Milan. R. Fano was distinguished by his pious eloquence and his kind heart. He tried in vain to found a kindergarten in Corfu. From 1900 till May, 1902, the pulpit of Corfu was occupied by Nathan Levy, a graduate of the seminary of Paris.

Among the Jewish physicians of note may be mentioned the Cesanas (father and son); Aboaf, the elder; Emmanuel Sipilli, surgeon in the Venetian army; Jacob and Marc Cohen, also army surgeons; Moses Sipilli; Lazarus and Shabbethai de Mordo; and especially Lazarus de Mordo, the younger (1744–1823), a member of the Ionian academy; and Cæsar Usiglio. Of Cypriote origin are the ophthalmologist Maimonides Levi; Victor de Semo, the director of the city hospital at Pisa, and Victor Belleli at Port Said.

Periodicals and Belles-Lettres.

The "Cronica Israelitica" (1861–63), a political and literary journal, aimed to bring about the political emancipation of the Ionian Jews. It was edited by Joseph Nahamali (died 1886), who was also the author of a grammar of the Greek language, a translation of the daily prayers, and a Greek translation of the Pirḳe Abot. From 1864 to 1879 he also edited at intervals the Italian weekly review called "Famiglia Israelitica," a periodical devoted to light literature. Nahamali was president of the community, and an indefatigable promoter of education among the people. In 1878 the grand rabbi Levi, began, the publication of "Mosè, Antologia Israelitica" (which was suspended in 1885); and in 1899 the Greek monthly "Israelite Chronographos" was established by M. Caïmi. The purpose of this periodical was to acquaint the Christian population with Judaism and the legitimate aspirations of the Jews and to create a rallying-point for the Greek Jews. Prof. Maimon Ventura of Egypt has published some poems in classical Hebrew; and the former grand rabbi of Corfu, Alexander da Fano, is the author of a volume of prayers, entitled "Preghiere" (1889). Dr. Lazarus Belleli has written (1890) a valuable study on the Greek Bible of Constantinople. Sp. C. Papageorgi and M. Caïmi published the dirges sung in private houses and synagogues in Corfu; and the former presented to the Orientalists' congress at Berlin a Greek hymn at one time used on the Pentecost festival, and originally sung in alternate Hebrew and Greek verses (see "Jew. Chron." July 26, 1901, p. 25). Prof. Dario Levi occupied in 1899 a chair at the Academy of Lacedogna, Italy. Alexander Levi (born 1871), an eminent sculptor, is established at Naples.

Educational and Philanthropic Institutions.

About 1840 a struggle broke out between the Orthodox members of the community and the Reformers, the former calling themselves "Marrochini," from "Morocco," the alleged birthplace of R. Bibas, and the latter "Sabbatini," perhaps after a certain "Shabbethai," one of the leaders of the party. The struggle was bitter, dividing the community into two hostile camps, which carried their differences even into the streets. The reformers founded the Hebrew institute. The pietists eventually obtained supremacy over the Sabbatini, who, it seems, constituted a secret society.

Two parochial schools for girls and boys have been founded, the expenses for general instruction being defrayed by the government and those for Hebrew by the community, the rabbi himself conducting the advanced class in this branch. The children of the well-to-do class attend the public high school. There is a committee on philanthropy, which derives its revenues from voluntary contributions; this being the only relief society, with the exception of the two burial associations ("gemilut ḥasadim"), one for each congregation. No bequests of any importance have been left to the community, excepting those of Samuel Gaon to the city hospital.

Synagogues; Rite.

The Apulian congregation has three temples, two of them large and the other small but attractive. In the two larger temples the women's gallery is supported by stone pillars. The large Apulian temple has a very fine mahogany Ark and reading-desk; while the temple of the Greek congregation is an immense structure devoid of pillars on the sides and containing a splendid ancient reading-desk designed in the Corinthian style and constructed of white wood, with well-preserved gildings. The rite of Corfu has in some respects the same peculiarities as has the Roman. Among those who have composed liturgic additions to this rite are Mazzal-Ṭob, Isaac ben Abraham, Abraham b. Gabriel b. Mordecai, and Moses ha-Kohen. Joseph b. Abraham, the commentator of the Maḥzor, lived in Corfu in 1554. The details of the Corfu rite may be seen in Bodleian MS. No. 1082 (Neubauer, "Cat. Bodl. Hebr. MSS." col. 275) and in those of the Montefiore Library in London (Hirschfeld, in "Jew. Quart. Rev." xiv. 395 *et seq.*).

Among the customs still peculiar to the Jews of Corfu may be mentioned that of celebrating the third night after a birth, when the Three Fates are believed to visit the child and pronounce its destiny. Gold coins and rue twigs are placed in the linen of the child, and visitors are treated to "kukkudi," a dish made of boiled wheat, pomegranate, and currants. This festival is called "Mire" (Moirai). The game of knuckle-bones ("astragali") has survived in its ancient form among the Corfiote Jews ("Jew. Chron." Sept. 19, 1902), p. 23.

Statistics.

Many Jews of Corfu are dealers in oil and manufactured goods. Others are engaged in manufacturing umbrellas, hats, artificial flowers, shoes, tinware, and jewelry, and a number are employed as grocers, printers, and tailors. The population in 1901 numbered 5,000 Jews in a total of 25,000 inhabitants. On account of adverse business conditions many of the Jews are now (1901) emigrating to Egypt.

CORI (Chore): Village of Campania, Italy, about thirty miles from Rome. There is a small Jewish community there, the origin of which is not positively known, though it is probable that it was formed by settlers from Rome. The community is first mentioned in a document dated 1535, where it is stated that of the Turkish tax imposed upon Rome, the community, as "vicesima," paid about one-eighth (amounting to the twentieth part of all its property). In 1536 the community was granted permission to move its synagogue to another site. Owing to persecutions, the community of Cori, like most of the others in the Papal States, rapidly declined in the next few years, the taxes turned over to the state by the head of the community, Sabatismus Amedei, in 1542 showing a material decrease. In 1566, after the Jews of the pontifical states had lost all their rights by the bull of Paul IV., and after the murderer of Abraham b. Bezalel of Cori had gone unpunished, the community, then numbering about 200 persons, resolved to emigrate to Palestine under the leadership of its rabbi, Michael Gallico, and join the Jewish colony founded at Tiberias by Don Joseph Nasi. The expenses were to be covered by a collection among its Italian coreligionists. It is not known whether the emigration was successfully carried out. In fact, there was still a small number of Jews there in 1569, paying a reduced tax-rate.

CORIANDER: An umbelliferous plant with white blossoms, which is peculiar to the Mediterranean district (*Coriandrum sativum*). It is widely cultivated in the East, and grows wild in Egypt and Palestine. It is especially abundant in the valley of the Jordan. Its fruits or seeds, which have a distinctly aromatic flavor, are used in the preparation of confectionery and also in ordinary cooking. They are employed medicinally to produce a stimulative effect and to relieve flatulence.

The only allusions to the plant in the Bible are in Ex. xvi. 31; Num. xi. 7, where the seeds are compared to MANNA.

The Hebrew name "gad" was thought by Lagarde to be of Indo-European origin ("Gesammelte Abhandlungen," p. 57). It is probably not connected with any Semitic root (compare Löw, "Aramäische Pflanzennamen," No. 155). By some scholars it is identified with "goid," which the Scholiast in Dioscorides, iii. 64 states is the Punic equivalent of κόριον ("coriandrum"). This Greek name is probably derived from κόρις ("bug"), owing to the unpleasant odor emitted by the plant when handled, which is highly suggestive of the effluvium of the bedbug. The Aramaic name "kusbara" appears in modern Greek in the form "kusbaras," which has supplanted the older name.

CORIAT: Jewish family of Morocco. In 1812 there appeared at Pisa a Hebrew work, under the title "Zekut Abot," in which three members of this family collaborated—Judah, his son Abraham, and his grandson Judah. This book contains an account of the religious customs of the Jews of Morocco, and gives their names, as well as the names of the places in Morocco inhabited by Jews.

S. M. FR.

CORINALDI, DAVID ḤAYYIM: Italian rabbi and author of the first half of the eighteenth century. He was a pupil of N. Pincherle, and rabbi at Reggio, Leghorn, and Triest. He wrote "Bet Dawid" (House of David), on the Mishnah; at the end of his work are diagrams relating to certain halakic points, and showing considerable mathematical knowledge (Amsterdam, 1738-39). Corinaldi also wrote notices on the Shulḥan 'Aruk, part of which were published by Azulai. There is, besides, a manuscript collection of sermons delivered in Triest, and an article, under the title "Dibre Shalom we-Emet," on the short ו found in the word "shalom" (Num. xxv. 12). In this MS. are also some critical notes against David Pardo, author of "Shoshannim le-Dawid," which had caused a conflict between the two rabbis. They were, however, induced to sink their differences by the intervention of the rabbis of Leghorn.

CORINTH: A city in ancient Argos, Greece, and the center of the cult of Aphrodite. Jews lived here, as in the other cities of Greece (Philo, "Legatio ad Caium," § 36), although little is known of their history. The apostle Paul preached Christianity in the synagogue of Corinth for eighteen months, and baptized the archisynagogue Crispus (I Cor. i. 14); but he was reviled by the other Jews and accused before the governor, Junius Annæus Gallio (53 C.E.). The latter, however, contemptuously declined to have anything to do with the religious quarrels of the Jews; and the populace maltreated before his eyes the archisynagogue Sosthenes (Acts xviii. 12–17), who was probably the inefficient successor of Crispus.

The occurrence of this scandalous affair in the very presence of the Roman governor shows that there were a large number of Jews at Corinth. They seem to have had a preference for that city; for Aquila and his wife Priscilla, who came originally from Pontus, went to Corinth with the Jews who were driven from Rome. Silas and Timothy, also, went there from Macedonia (Acts xviii. 2–5).

Pharisaic Judæo-Christians were the cause of much dissension in the young Christian community (II Cor. iii. 1, x. 13, xi. 5); for they objected to the celibacy of their Christian brethren (I Cor. vii. 1); and the Christian community was probably obliged to take a stand against the immorality that prevailed in certain circles (I Cor. v. 9–11, vi. 12–19; II Cor. xii. 21). These conditions have given rise to the modern hypothesis that the Jewish Book of Jubilees—which insists upon marital fidelity and condemns unchastity—was directed against the immorality at Corinth (Singer, "Das Buch der Jubiläen," p. 200, Stuhlweissenburg, 1898).

Corinth was a great center of art, and its influence spread as far as Judea. Josephus, in describing the Temple of Solomon, mentions the Corinthian style of architecture ("Ant." viii. 5, § 2). This, however, is an anachronism, and is copied from the description of the Herodian Temple, which had a number of columns in the Corinthian style (*ib.* xv. 11, § 5). There were splendid Corinthian candlesticks in the palace of Agrippa II. at Tiberias (Josephus, "Vita," § 13). The Corinthian bronze that Pliny praises ("Historia Naturalis," xxxiv. 1, § 3) was prized at Jerusalem (Josephus, "B. J." v. 5, § 3), and is also mentioned in rabbinical sources (Tosef., Yoma, ii. 4; Bab. 38a).

J. S. Kr.

CORMORANT: The translation given in the Bible (Lev. xi. 17; Deut. xiv. 17) of the Hebrew word שלך. In these passages it is specified as one of the unclean fowls. The A. V. (Isa. xxxiv. 11; Zeph. ii. 14) gives "cormorant" as the translation of קאת; but the R. V. renders it correctly as "pelican." Tristram, Post, and others agree that the derivation of the word from a root signifying "plunger" indicates the bird known to-day as *Phalacrocorax carbo*, which is abundant on the Mediterranean coast of Palestine and in the valley of the Jordan. Its classification among the unclean birds is due to the fact that it feeds upon fish. Its name indicates its characteristic of plunging into the water to catch its prey. Its habits seem to be similar to those of the tern or gull of Western waters.

E. G. H. I. M. P.

CORN (דגן): The seeds of cereal plants. (1) Barley ("se'orah"), which was and still is the most common grain of Palestine, is the ordinary food of horses, asses, and oxen. (2) Beans ("pol") were also in very general use. They were brought to David on his flight from Absalom (II Sam. xvii. 28), and were one of the ingredients which Ezekiel was commanded to mix with his bread (Ezek. iv. 9). (3) Fitches, or vetches ("ḳeẓaḥ"), really the seed of the nutmeg-flower (bot. *Nigella sativa*), were no doubt used as a condiment sprinkled over cakes, as at the present day (see Tristram, "Natural History of the Bible," p. 444). (4) Lentils ("'adashim") were a sort of vetch, grown in poor soil and often mixed with meal for bread. (5) Millet ("doḥan"; bot. *Panicum miliaceum*) was and is used in baking certain sweet cakes. Compare Ezek. iv. 9, where the prophet is commanded to use millet in making his bread. (6) Pulse ("zera'im") was a general name including most edible seeds, such as millet, peas, etc. (7) Vetch ("kussemet"; bot. *Vicia ervilia*) is wrongly translated "rye" in the A. V. (see Ex. ix. 32; Isa. xxviii. 25). Rye is unknown in Palestine. (8) The most important grain of ancient times was undoubtedly wheat ("ḥiṭṭah"). Compare the wheat-harvest mentioned in Gen. xxx. 14.

Indicates Various Grains.

The following are the most important terms used in the O. T. in connection with corn:

"Abib," "fresh young ears of corn" (Lev. ii. 14; R. V. "corn in the ear"; "grain of wheat"). "Bar," literally "clean, winnowed corn" (compare modern Arab. "burr," and Gen. xl. 49; Prov. xi. 26). "Belil," "cattle-fodder" (Job xxiv. 6; A. V. "mingled corn, dredge"). "Dagan," as indicated above, was the general term for corn or grain. It is very commonly used with "tirosh," "must, wine" (Deut. xxxiii. 2). It is probably not connected with the god-name Dagon. "Geresh" (Lev. ii. 14, 16), "beaten corn"; R. V. "bruised corn." "Karmel" (II Kings iv. 42), "ears of corn"; better, "fruit, garden-produce." "'Abur" (Josh. v. 11), "old corn"; R. V. in marg. "produce," "corn." "'Aremah" (Ruth iii. 7), "heap of corn." "Ḳali" (I Sam. xvii. 17), "parched corn." "Ḳemaḥ," "standing corn" (compare Judges xv. 5, where it is stated that Samson tied firebrands to the tails of foxes and loosed them in the Philistines' standing grain). "Ripot" (II Sam. xii. 19), "bruised corn." "Sheber" (from the root meaning "to break"), perhaps "broken corn," or "that which breaks the hunger" (Gen. xlii. 1), or simply "that which breaks the fast" ("sheber ra'abon"; compare *ib.*, verse 19); from this the denominative "hishbir," "sell corn." "Shibbolet" (Ruth ii. 2; Gen. xli. 5), "ear of corn" (Greek *στάχυς*, Matt. xii. 1; Mark ii. 23).

Terms for Corn in O. T.

Grain was reaped at about knee-height from the ground, quite near the ear. It was gathered up in the reapers' bosoms and tied into sheaves, which were then carried on pack-animals to the threshing-floor ("goren"), an open space exposed to the wind. Here it was threshed, either by the hoofs of cattle,

Reaping and Threshing.

which were driven around the floor on the spread-out grain, or by mechanical means. Of the latter the "morag" was the most important. This was a heavy sledge with a rough bottom which was weighted both by stones and by the driver, who stood upon it or else sat upon it on a stool (see Agriculture). The grain was then winnowed by being, for example, thrown into the air both by the "fan" (A.V.), more properly "fork," and by the "grain-shovel." The grain which fell back was heaped up (Ruth iii. 7) separately from the straw, which was reserved for fodder (Isa. xi. 7). The chaff was, of course, blown away.

Very little is known about the nature of the storage-places for grain mentioned in the Old Testament. At the present day grain is kept in underground chambers, which are usually hewn out of the rock, but sometimes dug in soft soil.

"CORNER-STONE." See Periodicals.

CORNER-STONE: The laying of the corner- or foundation-stone (אבן פנה, א' מוסדות, or א' מוסד) (Job xxxviii. 4–6; Ps. xviii. 15, xxiv. 2) of the earth by the Creator is a conception borrowed from Babylonian Cosmogony, the earth being regarded as a huge mountain piled upon the abyss (Job xxvi. 7; "Journal Asiatique," ix. 101; Prayer of Manasses; compare Ps. xviii. 7; Micah vi. 2; Deut. xxxii. 22).

The laying of the corner-stone of a city or of a great structure was the occasion of a solemn rite in ancient times. To the pagan mind it appeared as an undertaking provoking the jealousy of the deity unless some bloody sacrifice was offered to pacify him (see Tylor, "Primitive Culture," pp. 104–108). Henceforth the foundation-stone, or the threshold beneath which the sacrificial blood was shed, remained the seat of the guardian spirit of the edifice, and hence the altar of the household (see H. Clay Trumbull, "The Threshold Covenant," New York, 1896). The finding by Nabunahid, the last Babylonian king (556–538 B.C.), of the foundation-stone of the temple of Istar, built by Sargon I. 3800 B.C., is related as a triumph in his inscription (Schrader, "K. B." 1890, iii. 85), and the laying of the foundation-stone for his restoration of the temple of Nebo, with all the solemnities connected therewith, is described in another inscription (Schrader, *l.c.* iii. 5).

The story of Hiel the Bethelite, who rebuilt Jericho, laying "the foundation thereof in Abiram, his first-born," and setting up "the gates thereof in his youngest son" (I Kings xvi. 34; Josh. vi. 26), seems to be connected with the primitive custom of laying foundations with blood, as, indeed, skulls were found built in with the brickwork when the tower ("ziḳḳurat") of the temple of Bel at Nippur was excavated (see "Jour. Bibl. Lit." 1896, xvi. 11, and Cheyne and Black, "Encyc. Bibl." *s.v.* "Hiel"). The Midrash also knows of Hebrews who were immured in buildings in Egypt (Ex. R. v.; compare Trumbull, *l.c.* pp. 47 *et seq.*, and Simrock, "Handbuch der Deutschen Mythologie," 1874, p. 57). One of the many symbolical names given to the terraced tower of the temple of Bel-Marduk was "the foundation-stone of heaven and earth" (Jastrow, "Religion of Babylonia and Assyria," p. 639).

The same importance seems to have been attributed also to the foundation-stone of the Temple at Jerusalem. In I Kings v. 17, vii. 9, the costly wrought stones used for the foundation of Solomon's Temple are described, and in I Kings vi. 37 the time of the laying of the corner-stone is especially mentioned. In Ezra iii. 10–11 the solemnities at the laying of the corner-stone of the Second Temple by Zerubbabel are detailed (see also Hag. ii. 15, 18–23, and Zech. iii. 9, iv. 9–10, viii. 9). Indeed, the exilic seer must have been familiar with solemn corner-stone rites when picturing the rebuilding of Jerusalem (Isa. liv. 11; compare li. 1), just as Isaiah was when predicting a new and "tried and precious corner-stone of sure foundation" for Zion (Isa. xxviii. 16 *et seq.*; compare xiv. 32, Hebr.). The fragmentary beginning of Ps. lxxxvii. obviously refers to the foundation-stone of Zion as the most sacred spot of the earth, and the rabbinical "eben shetiyyah" (the foundation-stone of the world, Yoma 54b) is but the proof of a continuous popular tradition. But that here also the ancient rite of some blood-sacrifice was not altogether forgotten, seems to be indicated by the connection, preserved at least in the Book of Chronicles, between the laying of the corner-stone of the Temple and the sacrifice offered by David for the cessation of the plague, at the threshing-floor of Ornan the Jebusite (II Chron. iii. 1–3; compare I Chron. xxi. 18–31 with II Sam. xxiv.).

The ceremonious laying of the corner-stone of public buildings, especially of religious and charitable institutions, has become a universal custom, and was adopted by the Jews during the last century. The ceremony consists of placing an appropriate record or memorial in the hollow part of the stone beneath, and then of laying in place the corner-stone, accompanied by certain solemn forms. See also Consecration.

K.

CORNWALL: Extreme southwest county of England; distinguished in early days by the tin-mines which are said to have been visited by the Phenicians. Some of the relics of the old workings are still called "Jews' tin" and "Jews' houses." There is a town in Cornwall known as "Market Jew" (modern Marazion). Prof. Max Müller suggested that this was a folk etymology for "Thursdaies market" ("Marhas diow"), but there is distinct evidence of the connection of the Jews with the stannaries or tin-mines of Cornwall in the reign of King John, when they farmed the whole product of the mines for 100 marks, one-tenth of which was paid as a tithe to the Bishop of Exeter (Camden, "Britannia," ed. Gough, "Damnonii," p. 9). Besides this, in the Red Book of the Exchequer, in some clauses concerning the Cornwall stannaries dated 9 Ric. I., 1198, every regulation is drawn up with reference to "man or woman, Christian or Jew." There are no other traces of Jews in Cornwall in early times; but at the end of the eighteenth century a number of Jewish merchants settled in Falmouth, whence they sent out hawkers through the country towns, who returned on Friday evenings for Sabbath worship.

J.

CORO: A town in Venezuela, five miles from its seaport, La Vela de Coro, on the Caribbean Sea. It had, in the early days of the republic, many Jewish inhabitants, who came from the island of Curaçao, in the Dutch West Indies, about sixty miles from La Vela de Coro.

In the year 1855 the Jews of Coro, numbering about 300, were plundered, maltreated, and driven to seek refuge in their native place, Curaçao. As they claimed Dutch citizenship, the consul-general for the Netherlands, Van Lansberge, informed the home government, and three ships of war were sent to La Guayra, the principal seaport of Venezuela, and the redress demanded was at once granted. The Venezuelan government agreed to salute the Dutch flag; to restore to the Jews their property; and to pay an indemnity of 200,000 pesos ($160,000), the last clause being carried into effect in 1859, after lengthy diplomatic negotiations with the ambassador of the Netherlands, Jhr. O. van Rees.

In 1863 there were about 250 Jews in Coro, and religious services were held at the residence of Mordehay Abraham Senior, and afterward at that of his son Isaac. The cemetery, established in 1858, is situated on the outskirts of the town.

Another outbreak against foreigners, in June, 1902, compelled the Jews again to seek an asylum in Curaçao, tendered to them by the governor of the island, Jhr. J. O. de Jong van Beek en Doorn, who, upon learning the facts, despatched the Dutch man-of-war "Koningin Regentesse" to protect them. It returned to Curaçao with eighty Jewish women and children on board. In July following, the same vessel was sent to La Vela de Coro for the remainder, and only a few Jewish residents remained behind to protect the property of the exiles.

A. J. H. M. C.

CORONATION CHAIR: The so-called "Stone of Destiny," forming part of the coronation chair of the kings of England in Westminster Abbey, is said by tradition to be the identical stone on which Jacob rested his head when he saw the vision of the angels going up to heaven (Gen. xxviii. 11–12). According to some, the stone was that on which Abraham had intended sacrificing Isaac (see Rye, "Visits of Foreigners," p. 10, and compare Pirḳe R. El. 35, where the two stones of the Biblical stories are identified). According to a legend first found in the "Chronicles" of John of Fordun, the stone was transferred from Palestine to Egypt; from there Gathelus, son of Cecrops, King of Athens, who had married Scota, daughter of Pharaoh, transferred it to Spain, whence it was carried by Simon Brech, son of Milo the Scot, to Ireland. There it was used on the sacred Hill of Tara as the "Lia Fail," or "Stone of Destiny," on which the kings of Ireland were anointed. Fergus More, the founder of the Scotch monarchy, is said to have borne it from Ireland to Dunstaffnagge about 500, and it was ultimately taken by Kenneth II., about 840, to Scone. All the kings of Scotland were crowned upon it, until it was removed by Edward I. to Westminster Abbey; and upon it every king of England from Edward III. to Edward VII. has been crowned. An attempt to get it back was made by the Scotch in the reign of Edward III., and that king even wrote to the Abbot of Westminster ordering him to return it (Legg, "London Coronation Records," Westminster, 1901, p. 77); but the people of London would not allow it to be taken (Holinshed, "Historie of Scotland," p. 132). It has always been one of the chief attractions of Westminster Abbey, and is referred to as such by Addison ("Spectator," No. 329) and by Goldsmith ("Citizen of the World," letter xiii.).

The veneration with which the stone is regarded is undoubtedly due to the legend connecting it with Jacob; but Dean Stanley suggests that it was originally connected with St. Columba, and geologists are inclined to trace its origin to the island of Iona, the scene of St. Columba's last days.

The Anglo-Israelites make much of this connection of Jacob's stone with the coronation chair, and largely base upon it their claim to the identification of the English people with the Lost Ten Tribes (see ANGLO-ISRAELISM).

J.

CORONEL, NAḤMAN NATHAN: Palestinian scholar of Sephardic-Ashkenazic parentage; born at Amsterdam 1810; died at Jerusalem Aug. 6, 1890. His teacher was R. Abraham Susan. In 1830 he emigrated to Safed, Palestine, where he married, afterward settling in Jerusalem. There he studied in the Sephardic yeshibah. He became especially interested in rabbinical manuscripts, and acquired many rare copies, some of which he sold to European libraries, while others he published with his own annotations. The latter are: (1) "Bet Natan" (The House of Nathan), containing a varied version of Berakot, MSS. of Cairo, and decisions by Isaiah di Trani, the elder, with an introduction by Coronel (Vienna, 1854). (2) "Ḥamishshah Ḳonṭerisim" (Five Pamphlets), containing a varied version of Kallah, decisions in jurisprudence by R. Solomon Tazerat, and a letter of excommunication by David, the exilarch, etc. (Vienna, 1864). (3) "Seder R. Amram Gaon" (846 C.E.), containing a liturgy of the geonic period, of decided literary value (Warsaw, 1865). (4) "Teshubot ha-Geonim" (Responsa of Geonim), rules for the slaughter and examination of animals, by R. Jonah (Vienna, 1871). (5) "Zeker Natan" (Memory of Nathan), selected religious regulations for travelers (Vienna, 1872). (6) Decisions by R. Solomon b. Adret in reference to appropriating ḥallah (the priests' share of the dough), and decisions by R. Jacob b. Zahal of Jerusalem. Coronel, in his own essay, "Ḥaḳor Dabar" (Search out a Matter), attempted to establish a precedent for the exemption, like the Levite tithe, of the appropriation of ḥallah outside the Holy Land, for which he was rebuked by the rabbis of Jerusalem. (7) "Alfasi Zuṭa" ("The [abridged] Alfasi), by Menahem Azariah of Fano, with Coronel's commentary (Jerusalem, 1885). Coronel was awarded by the emperor of Austria the gold medal for art and science.

CORONEL, PAUL NUÑEZ: Spanish Orientalist; born at Segovia; died Sept. 30, 1534. Though baptized before the expulsion of the Jews from Spain in 1492, he was educated for the rabbinate, became conversant with Hebrew and with Biblical literature, and was on this account appointed professor of Hebrew at the University of Salamanca. Together with Alfonso de Alcalá, of Alcalá la Real, who had been baptized in 1492, and was also a professor at Salamanca, Coronel was commissioned by Cardinal Ximenez de Cisneros to translate the Bible into Latin. This translation is contained in the Complutensian Polyglot (1514–17). He also wrote "Additiones ad Librum Nicolai Lirani de Differentiis Translationum (Verborum)," which has not been printed.

G. M. K.

CORONEL-CHACON, AUGUSTINE: Portuguese Jew and agent at the court of Charles II. of England; born in Beira, Portugal; died after 1665. After living at Bordeaux (1640–44), he settled in Rouen in 1644, where he became an intimate friend of Enriquez Gomez, the Marano soldier and poet, to one of whose works he contributed a sonnet. Early in the fifties he established himself in England as a merchant and royalist agent, and there, associated with David da Costa and the Mendes family, to whom he was related, he received and distributed funds for Charles II. On 'Change he was known as "the littell Jue."

At the restoration, Coronel-Chacon was made consular and financial agent for Portugal in London, and was the first to suggest to Monk a match between King Charles and the infanta Catherine of Bragança. This marriage naturally increased his influence at court, and after embracing Christianity, in 1660, he was knighted in October of that year. As a Christian, Sir Augustine was not fortunate. He became a bankrupt in 1665, and after having been prosecuted by the Portuguese ambassador, was expelled from the 'Change and imprisoned in the Fleet. Afterward he turned informer against some of his former coreligionists, but to no avail. The latter part of his life was spent abroad, a dependent on his wealthy Jewish relatives.

J. M. W. L.

CORPORAL PUNISHMENT: Physical chastisement inflicted as legal punishment. Corporal punishment is one of the oldest forms of chastisement known to the law. The method of its infliction according to Jewish law differs from that of other penal codes, inasmuch as the former law carefully guards the convict from cruelty and excessive pain, stating expressly (Deut. xxv. 3), if the judge sentenced the wicked to be beaten a certain number of times, according to his fault, "Forty stripes he may give him, and not exceed; lest if he should exceed, and beat him above these with many stripes, then thy brother should seem vile unto thee." Upon this passage the Rabbis comment, saying: "The wicked is thy brother still" (Sifre 286; Mak. 22).

Three Judges Present.

The Talmudic law provides that whenever the infliction of corporal punishment is ordained, it is peremptory, and allows no discretion to the judge (Maimonides, "Yad," Sanh. xvi. 1), except in regard to the number of blows. Three judges must be present at the beating (*ib.* xvi. 2); one of them ordering the blows to be administered; the second counting them; and the third reading the verses Deut. xxviii. 58, 59, as an accompaniment (*ib.* xvi. 11). The punishment was inflicted by the beadle of the congregation, and the law recommends that the man chosen for this purpose shall be stronger in mind than in body, so that he may not strike too hard or upon a dangerous or weak spot (*ib.* xvi. 9; Mak. 23). The convict was tied to a post by his hands, his back and breast bared, and the beadle stood behind him, a fourfold thong of leather in hand. He was then bent forward and the lashes administered, one stroke on the breast and one on each shoulder alternately (Macc. iii. 12; "Yad," Sanh. xvi. 8–10). The maximum number of blows was thirty-nine (compare Mak. iii. 10, 22b with LXX. to Deut. xxv. 3, which reads במספר ארבעים, "about the number of forty)."

One less than the Biblical number of blows was given, in order to prevent the possibility of a mistake in giving one more than the lawful number.

Number of Stripes.

When the convict was found by medical examination to be physically unable to receive the full number of blows according to the sentence of court, he was given a smaller number, always a multiple of three ("Yad," Sanh. xvii. 1, 2). If he died under the lash, no one was held responsible, but if he died as the result of the infliction of a greater number of strokes than the law permitted, he was considered murdered (*ib.* xvi. 12); for no more blows could be given than the sentence of the court required, and in no event could the maximum of thirty-nine blows be exceeded (*ib.* xvii. 12). If the convict broke his bonds and escaped, he could not again be subjected to punishment for the same offense (*ib.* xvii. 6).

The infliction of corporal punishment was not, as Josephus says in the "Antiquities" (iv. 8, § 21), "a most ignominious one for a free man." Josephus' idea of its effect was probably the result of his affiliation with the Romans, among whom such punishment was infamous. The maxim of the Jewish law was that after the man had received his punishment he was again to be considered a brother (Mak. 23a). The infliction of stripes provided by the Biblical law was permitted only in Palestine; but the rabbinical authorities assumed the right, from the necessity of the case, to decree the infliction of corporal punishment outside of Palestine, denominating it "makkat mardut," or beating for disobedience ("Yad," Sanh. xvi. 3).

Punishable Cases.

Maimonides enumerates 207 cases in which corporal punishment by the lash may be inflicted. They may be divided as follows: twenty-one cases of breaches of negative commandments, chiefly crimes against morality, punishable by Karet (excision), but not by death; eighteen cases of breaches of the laws relating to the priesthood and sacrifice; and one hundred and sixty-eight cases of breaches of negative commandments which are not punishable either by karet or by death. Among the last are included the making of idols, breaches of the Levitical laws, of priestly regulations, of the dietary laws, of the land laws, of the laws of pledge, of sumptuary laws, of marriage laws, as well as slander, cursing, perjury, breaking vows, and others (*ib.* xiv. 1, 4). See Capital Punishment; Lex Talionis.

K. D. W. A.

CORPORATION: A combination of several persons, for certain purposes and under a common name, into one artificial body, which the law permits to act as a single person. In technical language there can also be a "corporation sole"; that is, one person filling a public position, who transmits the property rights and obligations of that position to his successors, as a natural person transmits his rights and obligations to his heirs.

A "corporation aggregate" is either public or private. The cities of the Holy Land were public corporations, and Jewish communities in the Exile corresponded to them (see Community, Organization of). Between the public and the private corporation stands the court (חצר) of the Mishnah, a group of houses surrounding an open place with a common entrance, the occupants of which have certain duties and corresponding rights (B. B. i. 6).

A private corporation is either eleemosynary (formed for purposes of charity) or commercial (that is, formed for the common good of the members). The former is known by the name of "ḥebra," the most important being the "ḥebra ḳaddisha" (burial gild); other ḥebras attend to the reception of travelers, the visitation of the sick, the maintenance of hospitals, etc., all more or less independent of the "ḳahal" (community). They have a common name, and a continuous life unhindered by change of members; they take property by purchase, gift, or will, and can dispose of it, and the rabbinical courts would recognize these rights; but the reported precedents are very few, and the various codes have but little to say on these points. The Shulḥan 'Aruk (Yoreh De'ah, 258, 8, 9) shows how an action may, under certain circumstances, accrue to the collectors of alms from an arrangement among the collectors, a contributor, and the latter's debtor; and similarly in other passages the right of action in eleemosynary corporations is incidentally acknowledged.

Commercial societies for various purposes, such as the caravan, and the mutual insurance company of muleteers or of shippers, are mentioned in the Mishnah (see Commercial Law). Whether they had any corporate powers or functions is not known. In later times, during the dispersion, Jews could hardly have entered corporations for profit except under the laws of the governments to which they were subject, and for many centuries there were few, if any, of these corporations in existence anywhere.

L. G. L. N. D.

CORPSE: A body of a dead human being polluted not only those that touched it, but also the dwelling, its inmates, and all uncovered utensils (Num. xix. 14 *et seq.*). A person made unclean by a corpse was required to be sprinkled with water on the third and the seventh day thereafter, and to bathe and wash his clothes on the seventh day (Num. xix. 19). It was a sacred duty to bury a corpse; and even the priests, with the exception of the high priest, were permitted to defile themselves by the dead bodies of their nearest kin (Lev. xxi. 2, 3, 11). The Nazarites, however, were required to keep away from all corpses (Num. vi. 6). Yet the Nazarite Samson ate honey which he had taken out of the carcass of a lion (Judges xiv. 9), since only the human body could be the source of uncleanness in others (Num. xix. 22). During the forty years in the wilderness, those polluted by touching human corpses were put out of the camp (Num. v. 2), nor could they partake of the Passover sacrifice or any other offerings (ix. 6). Even those polluted in battle must be purified (xxxi. 19). Not to bury a corpse was considered the greatest disrespect that could be shown to the dead (Jer. viii. 2; Ps. lxxix. 2, 3), although in time of war this was necessarily a frequent circumstance. The law demanded the burial of a condemned person (Deut. xxi. 23), this applying even to the bones of those who had been executed in vengeance (II Sam. xxi. 13). The Egyptians were experts in embalming; but in Palestine, where little was known of the art, bodies were removed as quickly as possible from the houses (compare Amos vi. 10; see Burial). Places where human bones accumulated, such as Tophet in the valley of Hinnom, near Jerusalem, were held to be especially polluted, and therefore horrible. "High places" were defiled by human bones more than by all else (II Kings xxiii. 14).

Need of Burial.

CORREA, ISABELLA (REBECCA): Spanish poetess of the seventeenth century; born in Spain; lived successively in Brussels, Antwerp, and Amsterdam; wife of the cosmographer D. Nicolas de Olivier y Fullana (Daniel Judah) of Majorca. Isabella Correa was a friend of Daniel Levi de Barrios, whose "Coro de las Musas" was praised by herself and her husband in verse. She was celebrated for her beauty and wit, her knowledge of the arts, and her linguistic attainments, which are said by some writers to have included nearly all the languages of Europe.

Her principal work is a metrical Spanish translation, with explanatory notes, of the "Pastor Fido" by Guarini (1st and 2d eds., Antwerp, 1694; 3d ed., Amsterdam, 1694), which is dedicated to

Manuel de Belmonte, the founder of De los Floridos, an academy of poetry of which Isabella was a member. Another of her works, entitled "Varias Poesias," which is said by De Barrios to have been ready for the press, was never published.

CORREGAL. See CARREGAL.

CORRENTI, CESARE: Italian statesman and author; born in Milan Jan. 3, 1815; died at Lesa, Novara, Oct. 4, 1888. He was one of the best friends of the Jews in Italy and a thorough enemy of anti-Semitism, whose adherents he regarded as "madmen." On various occasions he gave expression to his feelings of sympathy with the Jews; and in his work "Gli Ebri Come Patrioti" he praises them for the great services they have rendered in the emancipation and progress of Italy.

S. B. B.

CORRIERE ISRAELITICO: Italian monthly magazine devoted to Jewish history and literature; founded at Triest in 1863 by Abrama Vito Morpurgo, who edited it six years, and at his death the editorship devolved upon A. di S. Curiel, Morpurgo's son-in-law, its present editor. At times Morpurgo was assisted by Leone Racah and, later, by his son Gustavo. For several years Dante A. Lattes was one of the directors, and he has become the magazine's chief representative and contributor. During the early days of its career the "Corriere" published not only careful accounts of Jewish events at home and abroad, but also scientific articles by S. D. Luzzatto, Lelio della Torre, and their most distinguished pupils; poems and stories on Jewish subjects; and translations of scientific, devotional, and belletristic works. Later on it devoted itself entirely to the setting forth of the cabalistic theories current in Italy, Elia Benamozegh and his pupils becoming the chief of its contributors, among whom is also Prof. Vittorio Castiglioni.
G. I. E.

CORTISSOS, DON JOSÉ: Spanish army contractor; born 1656; died in London 1742. He was fifth in direct descent from Emanuel José Cortissos, Marquis de Villa, a grandee of Spain, who flourished about 1475. José Cortissos was ambassador of the emperor Charles to Morocco. He was invited, as a man of property and thoroughly acquainted with the Peninsula, to contract for the supply of provisions to the allied armies under the Earl of Peterborough in the year 1706, but he declined through want of confidence in the Portuguese government. However, on the personal assurances of Earl Galway, commander of the British forces, and Earl Stanhope, British minister to the court of Spain, that the British government would answer for the payment on the part of the Portuguese government, he undertook to supply the army. From authentic reports it appears that Cortissos actually saved the army from starvation. Notwithstanding these assurances, he never obtained payment in full for his services, and he eventually went to England in 1712 to urge his claims, but failed to obtain more than a fraction of the sum due him leaving a considerable balance owing from the British and Portuguese governments, all attempts to recover this proving unavailing. The unfortunate contractor, worn out in mind and body, died in poverty. It is reported that a portrait of him has been preserved, representing him in the court dress of the reign of Queen Anne, with a petition concerning his claim in his hands.

COS. See KOS.

COSENZA: City in southern Italy. Ferdinando Ughelli, in the ninth volume of his "Italia Sacra," reproduces two documents referring to the Jews of Cosenza. One was given by King Ferdinand I. to Pirro Caraccioli, Archbishop of Cosenza (1467), reestablishing the former archiepiscopal jurisdiction over the Jews of his diocese. Depping thinks that this prelate was authorized to bestow property belonging to Jews upon any one within his jurisdiction, or to confer upon him rights at the expense of Jews: for in 1469 the above-mentioned King Ferdinand confirmed him in such investitures. The Jews were expelled from Cosenza, as well as from the rest of the kingdom of Naples, in 1540 by a decree of the emperor Charles V.

COSIN, LEWI: Rabbi at Salonica, and later a preacher at Venice; born in 1573; died in 1625. He was the author of a collection of sermons arranged in the order of the Sabbatic sections, and entitled "'Aliyat Ḳir Ḳetannah" (A Little Chamber in the Wall). It was published by the son of the author, the first volume at Venice, 1636, the second at Constantinople, 1643. Conforte also ascribes to Cosin the ethical work "Toẓe'ot Ḥayyim," published at Salonica. Steinschneider, however, believes that Conforte confounded Cosin with Moses Nathan, who is generally believed to be the real author of the "Toẓe'ot Ḥayyim."

CÖSLIN, ḤAYYIM BEN NAPHTALI: Talmudical scholar and Hebrew grammarian of Berlin; died at Stettin, Prussia, March 21, 1832. He wrote the following works: (1) "Maslul," a Hebrew grammar, written in a catechetical form. It was used for a long time as a primer and text-book in Jewish schools. It was first published by the author himself at Hamburg in 1788, and was republished as follows: Brünn, 1796; Zolkiev, 1798; Wilna, 1815, 1848, 1859, 1890. (2) "Ḳeriat ha-Torah" (Reading of the Law), a treatise on the literal changes in Biblical passages found in the Talmud, and on some Talmudical rules concerning the Masorah (Berlin, 1814). To this work is appended an article by Cöslin, under the title "Be'er Reḥobot," on the language of the Mishnah, which is a reprint from "Ha-

Meassef" of 1786, and was republished in the "Bikkure ha-'Ittim," 1825.

Bibliography: Isaac Satanow, in *Ha-Meassef*, 1788 (reprinted in *Bikkure ha-'Ittim*, 1827); Fuenn, *Keneset Yisrael*, pp. 366, 367; Benjacob, *Oẓar ha-Sefarim*, p. 537; A. L. Gordon, *Mishpaṭe ha-Lashon ha-'Ibrit*, p. 38.

COSMOGONY.—Biblical Data: A theory concerning the origin ("begetting") of the world; the mythological or ante-scientific view, as preserved in the traditions, oral or written, and the folk-poetry of primitive and ancient peoples.

Curiosity concerning the origin of the visible universe and the manner and order in which the various forms of life came into being, manifested itself at a comparatively early period. Cosmogonies are, therefore, found among nearly all races, and form a large part of their mythologies, preserved as tribal or national traditions. Old as they are, they reflect climatic and cultural conditions of various localities; and these differences, often unharmonized, appear in the later literary and religious versions. The original cosmogonies are spontaneous productions of folk-fancy, and are therefore unsystematic, forming as a rule only a chapter in the theogonies or genealogies of the gods. Systematization is a sign that primitive notions have been subjected to treatment in the interest of a certain theology or advanced religious consciousness. By those who ascribe to the Hebrew mind the same process of development and to Hebrew literature the same manner of growth as are observed among other peoples, the cosmogony—or, to be more exact, the cosmogonies—of the Bible must be viewed and analyzed according to the light derived from comparison with similar conceits among non-Hebrews. By analogy, then, with other ancient peoples, the form in which the Hebrew cosmogony presents itself in the Bible is not the original. The literary documents are later than the material incorporated. They exhibit the influences of a developed theology as well as the effect of a blending of different accounts that are at variance with one another in their radical versions.

Early Hebrew Cosmogony.

The comparatively late date of the literary documents—according to the critical schools—has misled most of the modern commentators into the assumption that the early Hebrews were without cosmogonies. Rénan's denial to the Semites of the mythopeic faculty seemed thus to be borne out by the results of Pentateuchal analysis and of literary criticism of the other Biblical books. This inference, however, can not be maintained (see Gunkel, "Schöpfung und Chaos"; *idem*, "Genesis"). The Hebrews must have had the same impulse toward speculation on the origin of things as had other groups of men; and as this impulse manifests itself always at a very early period in the evolution of mind (the tribal or national consciousness), one is safe in the a priori ascription to the Hebrews of the production and possession of cosmogonic legends at a very remote epoch. This conclusion from analogy is corroborated by the study of the literary documents bearing on this point. Gunkel (*l.c.*) has demonstrated that the cosmogonic accounts or allusions thereto (technical archaic terms, like "tohu wabohu"; the use of words in an unusual sense, for instance רוח אלהים; and mythological personifications, like Rahab) display easily discernible signs of incorporated old material (Gen. i., ii.; Job xxvi. 12, xl. 25, xli. 26; Ps. xl. 5, lxxiv. 12–19, lxxxvii. 4, lxxxix. 10; Isa. xxvii. 1, li. 9). That Gen. i. belongs to the later strata of the Pentateuch (P) is conceded by all except those scholars that reject higher criticism altogether. Dillmann, for instance, and Delitzsch (in the last edition of his commentary) do not hesitate to assign it to the Priestly Code, though they would have it be pre-exilic. It certainly has the appearance of a systematic presentation, but nevertheless *it is not a free invention.*

It has long been recognized that Biblical cosmogony bears certain similarities to that of other peoples; *e.g.*, the Phenicians (who speak of *πνεῦμα* and dark *χαός* originally existent; through their union, *πόθος* ["desire"], *μώτ* ["primordial mud"] is generated; but of this *μώτ* come the egg, etc. [for other versions see Damascius, "De Primis Principiis," p. 125]; the wife of the first man is Βαθυ [= בהו]), or the Egyptians (who spoke of primeval water ["nun"] and the primeval egg [see Dillmann, Commentary on Genesis, p. 5, and De la Saussaye, "Religionsgeschichte," 2d ed., i. 146 *et seq.*]). The notion of the primeval egg seems to be a universal one (see Dillmann, *l.c.* p. 4; "Laws of Manu," i. 5 *et seq.*).

Babylonian Cosmogony.

Strikingly similar to the Biblical cosmogony is that of the Babylonians (Friedrich Delitzsch, "Babylonischer Weltschöpfungsepos"; Jensen, "Kosmologie der Babylonier," pp. 263-364; Zimmern, in Gunkel, "Schöpfung und Chaos," pp. 401 *et seq.*; Schrader, "K. B." vi.). Its birthplace is betrayed by its reflection of the climatic conditions of Babylonia. In winter, floods and darkness prevail. With the advent of spring the waters "divide" and are "subjugated" through the power of the winds that blow. Applying to primeval days this yearly phenomenon of the conquest of the flood and darkness, the Babylonian fancy assumes as self-existent in the beginning the great expanse of water (and unlit darkness). The former is conceived of as a monstrous dragon, Tiamat (= תהום), which, in the epitome given by Berosus, is represented as the "primeval woman," with whom Bel cohabits, splitting her into two halves, one of which becomes the earth and the other the sky, in characteristic reflection of Babylon's climate, and of the spring sun piercing the waters at the end of the winter's rainy season.

Babylonian Accounts.

Stories about Tiamat have been found as far back as the fourth millennium B.C. The narrative, as recovered from the tablets, begins by recording that "long since, when above the heaven had not been named, and earth was also without name [*i.e.*, non-existent] there was only primeval ocean-flood." This is personified as a male (Apsu) and a female (Tiamat). The gods, which had not yet arisen, were then made: Tiamat was their mother. Hatred of the new-born light causes her to rebel against the higher deities. Some of the gods side with her, and to aid her in her fight she produces huge monsters. Marduk offers to punish her, on condition that the supreme rule over heaven and earth be accorded him after the victory. He rides to the combat in his war-chariot, and, meeting Tiamat, kills her by forcing open her mouth, which he fills with the hurricane that cuts her in two from within, and puts her crew in chains. He then divides her carcass: out of one part he makes heaven; out of the other, earth. The following is the order in which Creation is said to have been successively called forth by Marduk: (1) the heaven; (2) the heavenly bodies; (3) the earth; (4) the plants; (5) the animals; (6) man.

It is plain that not only in Gen. i., but in other Biblical cosmogonic descriptions (notably in Ps. civ. 5-9; also in Job xxxviii. 10; Ps. xxxiii. 6, lxv. 8; Prov. viii. 29; Jer. v. 22, xxxi. 35; the Prayer of Manasses), traits and incidents abound that suggest this Babylonian myth. In the main, four theories have been advanced to account for this: (1) Both the Babylonian and the Hebrew are varied versions of an originally common Semitic tradition. (2) The Hebrews carried an originally Babylonian tradition with them when emigrating from Ur-Kasdim. (3) They adopted the Babylonian epos during the Babylonian captivity. (4) This tradition, originally Babylonian, as the background shows, had long before the Hebrew conquest of Palestine been carried to Canaan through the then universal domination of Babylon; and the Hebrews gradually appropriated it in the course of their own political and religious development. This last theory (Gunkel's) is the most plausible. Gen. i. marks the final adaptation and recasting under the influence of theological ideas (*i.e.*, monotheism; six days for work and the seventh day for rest). As now found in Gen. i., it seems to be a composite of two, if not more, ancient myths. Besides those Babylonian elements indicated above, it contains reminiscences of another Babylonian tradition of a primitive (golden) age without bloodshed (vegetarianism), and recalls notions of non-Babylonian cycles ("the egg idea" in the brooding of the רוח, the Phenician בהו).

Earlier Versions.

The allusions to this ancient (Babylonian) cosmogony are really much fresher and fuller in mythological conceits in the other passages quoted above. These, then, represent a cosmogony anterior to the reconstruction on monotheistic lines now incorporated in Genesis. In them the Dragon myth ("Tiamat," "Rahab") is of frequent recurrence; but while it points to a cosmogonic source, it may in some cases (Job xxvi. 13, for instance) have sprung from a natural celestial phenomenon such as an eclipse. So also in eschatological descriptions and apocalyptic visions these incidents of the old tradition recur (Ps. xviii., lxxvii., xciii. 3 *et seq.*; Nahum i.; Hab. iii.). See Dragon; Leviathan.

On the other hand, the Bible has preserved cosmogonies, or reminiscences of them, that are not of Babylonian origin. Gen. ii. 4 *et seq.*, belonging, according to critics, to the Jahvistic source, starts with *dry* earth, and makes the sprouting of vegetation depend on man's previous creation; that is, on his labor. This exhibits Palestinian coloring. The dry, parched, waterless soil without rain is taken from a Palestinian landscape (see, however, Cheyne in "Encyc. Bibl." i. 949). Again, Ps. xc. 2 speaks of the time before the birth of the mountains and the parturition of earth and world. In Job xxxviii. it is said that God laid the foundations of the earth "when the morning stars sang together," and all the "sons of God" broke forth in glee. In Ps. xxiv. 2 there is a reference to the mystery involved in God's grounding the earth on the waters so that it can not be moved. These are not mere poetic explications of Gen. i. They are derived from other cosmogonic cycles, which a tone time may even have included, as among all other ancient peoples, a theogony (notice the "sons of God"; see Gunkel, "Genesis," p. 119).

The value of the cosmogony of Genesis lies in its *monotheistic* emphasis. Though the plural "Elohim," the words "let us make," and the view of man being "the image of God" reflect polytheistic and mythological conceptions of a previous stage, the stress is laid on the thought that one God made the all by His will, and made it "good." The Sabbath—originally not a part of the Babylonian epos—is the crowning glory of this cosmogony, notwithstanding the strong anthropomorphism of the concept that the Creator Himself rested. The attempt to establish a concordance between Genesis and geology seems to do an injustice to science and religion both. The ancient Hebrews had a very imperfect conception of the structure of the universe. Gen. i. was not written to be a scientific treatise. It was to impress and to express the twin-doctrine of God's creative omnipotence and of man's dignity as being destined on earth to be a creator himself.

With the Babylonians, the Hebrews believed that in the beginning, before earth and heaven had been separated ("created," ברא), there were primeval ocean ("tehom," always without the article) and darkness (חשך). From this the "word of God" (compare such passages as, God "roars" [גער], Ps. xviii. 16; civ. 7) called forth light. He divided the waters: the upper waters he shut up in heaven, and on the lower He established the earth. In older descriptions the combat against the tehom is related with more details. Tehom (also Rahab) has helpers, the תנין and the Leviathan, Behemot, the "Naḥash Bariaḥ." The following is the order of Creation as given in Gen. i.: (1) the heaven; (2) the earth; (3) the plants; (4) the celestial bodies; (5) the animals; (6) man. The Hebrews regarded the earth as a plain or a hill figured like a hemisphere, swimming on water. Over this is arched the solid vault of heaven. To this vault are fastened the lights, the stars. So slight is this elevation that birds may rise to it and fly along its expanse.

K. E. G. H.

——**In Post-Biblical Literature:** Cosmogony, or the theory concerning the origin of the universe, began with pagan systems which recognized no Creator, and was therefore viewed with mistrust in rabbinical circles. For this reason it was taught in strictest privacy: "The creation lore is not to be taught before more than one disciple" (Ḥag. ii. 1; see Cabala). Even the oldest schools, the Hillelites and Shammaites, differed on the question whether the heavens (Gen. i. 1) or the earth (Gen. ii. 4) was created first, the Shammaites deciding that the heavens were created first, the Hillelites maintaining the contrary contention. The Hillelites, referring to Amos ix. 6, argued: "No architect, in building a house, begins with the upper story"; the Shammaites replied with reference to Isa. lxvi. 1: "No artificer makes the footstool first and then the throne." This difference of view was readjusted afterward by R. Simeon b. Yoḥai, who said, referring to Isa. xlviii. 13, that heaven and earth were created simultaneously, the former being put upon the latter as the cover upon the pot (Ḥag. 12a; Yer. Ḥag. ii. 1; Gen. R. i. and xii.; Pirḳe R. El. xviii.). The Shammaites seem to represent the older view, shared also by the Alexandrians (זקני הנגב, Tan. 32a; compare Bacher, "Agada der Tannaiten," i. 17 *et seq.*).

Probably connected with this difference of opinion is the controversy between R. Eliezer and R. Joshua regarding the origin of earth and sea, Joshua, with reference to Job xxxvii. 6, xxxvi. 28, claiming a cosmic or celestial origin for them; Eliezer, with reference to Ps. cxlviii. 4 *et seq.*, Gen. ii. 6, a mere terrestrial one (compare Gen. R. xii., xiii.; Yoma 54b; Bacher, *l.c.* i. 135, 173 *et seq.*). The principal concern of cosmogony was with the primal elements and their mode of composition; and in dealing with the question, the Gnostics resorted to both mythological and philosophical speculation, while Scripture treated it from the standpoint of theology (see GNOSTICISM).

The Primal Elements.

In the third century Rab, basing his speculation on Gen. i. 1-5, spoke of ten primal elements created on the first day: heaven and earth, Tohu and Bohu, light and darkness, wind and water, night and day (the last as time-measures); and of ten creative potencies: wisdom and understanding, knowledge and strength, rebuke and might, righteousness and judgment, mercy and loving-kindness, with reference to Prov. iii. 19, 20; Ps. lxv. 7 (6); Job xxvi. 11; Ps. lxxxix. 15 (14); xxv. 6 (5). Of these potencies he explained rebuke as the restraining power or the limitation exerted by God when the world (earth) and the sea expanded in all directions after He had turned the primal elements like the warp and woof of the weaver's loom (Ḥag. 12a). The older schools, however, spoke of only six, four, or two primal elements, and also of fewer potencies. When R. Joshua ben Hananiah was asked by the emperor Hadrian how God made the world, he answered: "He took the six elements and led them like weaver's threads in six directions: four horizontal and two vertical" (Gen. R. x.). To Gamaliel II. a philosopher said: "Your God is a great artist, but He found fine pigments to use as colors for his painting: Tohu and Bohu, darkness and wind, water and the abyss"; whereupon Gamaliel replied: "All these six God Himself created, as is shown by Isa. xxxiv. 11 (Hebrew, "Ḳaw tohu we-abne bohu"), xlv. 7; Ps. cxlviii. 4 *et seq.*; Amos iv. 13; Prov. viii. 24 (compare Gen. R. i.; Bacher, *l.c.* i. 86, note 4). These six elements are compared by R. Levi (Gen. R. i.) with the six things required for every structure: water, earth, wood, stone, iron, and the measuring-line. An old Baraita gives, with reference to Isa. xxxiv. 11, a deeper insight into Jewish or gnostic cosmogony: Tohu is the green circle ("ḳaw") which surrounds the cosmos, and from which darkness emanated, according to Ps. xviii. 12 (11); and Bohu is the foundation of the primal mire or chaos ("abne mefulamot" = Πηλωμα; see Lev. W. B. T., *s.v.* פילומא) sunk into the abyss, whence the water issues forth (Ḥag. 12a). Here Tohu and Bohu are actually the two primal elements out of which the other two, darkness and water, respectively emanated. Wind is taken by R. Jose (Ḥag. 12b; compare Yer. Ḥag. ii. 77a, and Bacher, *l.c.* ii. 186) to be a potency emanating from God's arm, whereas heaven is explained as a composite of primal fire and water (שמים=אש ומים; Ḥag. 12a). According to Pirḳe R. El. iii. (compare Yer. Ḥag. *ib.*) the earth was created from the snow from under God's throne, which, when cast upon the primeval water, turned into a solid mass (Job xxxvii. 6; compare Ex. R. xiii., where עפר ["dust"] is probably a corruption of שלג ["snow"]). Fire and snow are taken as primal elements also in Gen. R. x.

Whether light was the first created thing (compare IV Esdras vi. 40) or not is a matter of dispute between R. Judah and R. Nehemiah. Samuel bar Naḥman said: God wrapped Himself in light as in a garment and its radiance lit up the universe; that is, light is not created, but is eternally a part of God (Gen. R. iii., based upon Ps. civ. 2). From that light heaven also emanated, according to Pirḳe R. El. *ib.* It must be further noted that Pirḳe R. El. has only eight of Rab's ten elements, night and day being added by some one else; and instead of Rab's ten creative potencies there are only three: wisdom, understanding, and knowledge (compare Tan., Wayaḳhel, 6, ed. Buber; Midr. Teh. to Ps. l. 1). So are Yalda Bahut (= Βυθός) and Ḥokmuta (= Ḥokmah) fundamental in the various gnostic cosmogonies, the rest evolving in pairs (see GNOSTICISM). In Ex. R. three primal elements, water, fire, and wind or breath ("mayim," "esh," "ruaḥ"), are mentioned, begetting respectively three potencies, darkness, light, and wisdom.

Better than these scattered Midrashic fragments does the Slavonic Book of Enoch (xxiv.-xxx.) disclose the secrets of Ma'ase Bereshit, which God Himself revealed to Enoch, though "not known even to the angels":

The Upper and the Lower World.

> Out of the regions of the deep God caused a fiery stone, Adoil ("Ariel" = "fire of God" [?]), to rise; out of this broke light, and forth came the great upper world revealing the whole creation of God's design. Of it God made His own throne, and above it rose the light which became the foundation of all celestial things (compare Pes. 54a; Ned. 39b; Gen. R. i.; Tanna debe Eliyahu R. xxxi.; "Kisse ha-Kabod," after Ps. xciii. 2 and Prov. viii. 27, LXX.: "When He established His throne upon the winds"). Then God laid the foundation of the world of darkness below by calling into existence a firm, heavy, and red substance called "Arkhas" (= ארקא, the lowest part of the abyss; see "Seder Rabba di Bereshit" in Wertheimer's "Batte Midrashot," i. 15, 18; certainly not רקיע, as Charles thinks), and after it was divided there issued forth a very dark world bearing the creation of all things below; there was nothing beneath the darkness.
>
> Out of the mixture of light and darkness a thick substance came forth; this was the water which was spread in both directions above the darkness below and below the light above, and thus were the seven circles of heaven created like crystal, moist and dry; that is, like glass and ice (compare "a sea of glass,"

Rev. iv. 6, xv. 2; "and the pure marble stones that seem like water," Ḥag. 14b; compare Joël, "Blicke in die Religionsgeschichte," i. 163 *et seq.*).

Out of the waves of the water below, which were turned into stones, the earth was formed on the second day of Creation, and the myriads of angels and all the heavenly hosts were created out of the lightning which flashed forth from the fiery stone as God gazed upon it (compare Pesiḳ. i. 3a: "The firmament is made of water, and the stars and angels of fire," and Cant. R. iii. 11: "The firmament is made of hoarfrost [Ezek. i. 22, "crystal"], and the Hayot of fire").

Charles ("Book of the Secrets of Enoch," 1896, p. 32) and Bousset ("Religion des Judenthums," 1903, p. 470) find in this cosmogony traces of Egypto-Orphic influence; but a comparison with the Babylonian—that is, the Mandæan—cosmogony, with its upper world of light and lower world of darkness (see Brand, "Mandæische Religion," 1889, pp. 41–44), is no less in place. Remarkable is the cosmogonic view of Abbahu (Gen. R. iii.): "God created worlds after worlds, and destroyed them until He found the one which He pronounced as good."

Midrash Konen.

The Baraita on Tohu and Bohu, Ḥag. 12a, and on wind or breath, Ḥag. 12b, quoted above, formed undoubtedly part of an ancient Midrash, Ma'aseh Bereshit, of which the Midrash Konen preserved essential parts (Jellinek, "B. H." ii. 23–39; Introduction, xiii.). It is based on Prov. iii. 19, and the Torah being identified with the creative wisdom (compare Gen. R. i.), the sacred names or letters are made potencies of creation. The Midrash shows how, by the aid of three names, water, light, and fire were created; how, by the mixing of these, the heavens and the clouds of glory and all the celestial hosts were made; and, how from a lump of snow from under the Throne of Glory, the earth was formed and the foundation-stone of the world laid upon the water. The celestial orbs were made of fire; the water animals, including the leviathan, out of light and water; the birds, including the ziz or simurg, out of these elements mixed with mud; the terrestrial beasts, including the behemoth, out of water, earth, and light. The Midrash Ma'ase Bereshit, which is attached to Midrash Konen (Jellinek, "B. H."pp. 32 *et seq.*), forms also part of the Seder Rabba di Bereshit, published in Wertheimer's "Batte Midrashot" (i. 1–31), and presents the entire cosmogonic and cosmological system of the Rabbis (or Essenes, as is shown by the apotheosis of the Sabbath, pp. 7–8). Part of this cosmology—that is, the description of the upper and lower worlds and all their parts in their topographical relations—is found also in Pirḳe R. El. (iii.–ix.).

Sefer Yezirah.

Another and altogether different cosmogonic system is presented in the geonic work "Sefer Yezirah." Here letters and numbers, as in the New Pythagorean system, but scientifically arranged, are creative principles, and the three primal elements of the rabbis, fire, water, and light (אש מים אור) are, by the change of one vowel, transformed into fire, water, and air (אויר, אש מים אויר = the Greek ἀὴρ), the Spirit of God (Gen. i. 2) taking the place of the former "wisdom" as the creative power (see SEFER YEẒIRAH). For the cosmogony of the cabalists, based chiefly upon the idea of a primal and endless light, and a primordial "point" expanding into the Ten Sefirot, and upon Abbahu's view, quoted above, of worlds ever created and destroyed by the Creator, see CABALA; EMANATION; SEFIROT.

K.

COSSACKS' UPRISING: Since the fifteenth century, semi-military bands of Cossacks have been scattered over the steppes of southern and southeastern Russia, and have materially influenced the history of the Jews in that region. The Cossacks originally appeared as traveling merchants, pursuing their vocation generally in the steppes of South Russia, beyond the limits of their own country. For the sake of mutual protection they organized themselves into armed bands, led by hetmans, or atamans. Becoming permanent settlers, they retained their military and social organizations. Later there appear groups of Cossack agriculturists, Cossack settlements, and Cossack villages.

Of the different branches of Cossacks, only those of the Ukraine (Little Russia) are considered here. When King Casimir Jagellon transformed the principality of Kiev into a Polish waywodeship (1476), the Russian nobles of the Ukraine received equal rights with the Polish nobility (Kostomarov, "Bogdan Chmielnicki," i. 114). The free cities, towns, and villages being distributed among the nobility, the ancient system of self-government was abolished, and the first step taken toward the forced adoption of Polish customs and methods by the Russian nobility. The peasants of the Greek faith thus became the serfs of the landlords. Soon after the Ukraine Cossacks became conspicuous. Their organizations bore some resemblance to those of the order of knighthood, for they announced themselves as the champions of Christendom. When Poland and Lithuania were merged by King Sigismund Augustus into one commonwealth (1569), the provinces of Volhynia, Podolia, and the Ukraine were separated from Lithuania and came under the immediate rule of Poland. About that time the Ukrainian lord Wishnewetzki (Polish, "Wisniowiecki") built on an island in the River Dnieper the fortress of Khortitza, and placed Cossacks there for protection against the invasions of the Crimean Tatars ("Akty Yuzhnoi i Zapadnoi Rossii," ii. 148). This fortress with its garrison was known as the "Zaporogian Syech" (the fortified camp beyond the rapids). These Cossacks were joined by Little Russian peasants of the Greek faith who had broken away from their Polish Catholic landlords, by fugitives from justice, and by adventurers. It may be mentioned here that Jews also served in the ranks of the Cossacks. In 1681 Aḥmad Kalga, chief councilor of the Khan of the Crimea, complained to the Polish ambassador, Piasaczinski, that the Cossacks of the Lower Dnieper had made attacks on the Crimea. Piasaczinski replied stating that the Cossacks were not subjects of the Polish king, and that he therefore could not be held responsible for the acts of uncontrollable rovers of the desert; for while there were some Poles, there were also Muscovites, Wallachians, Turks, Tatars, Jews, etc., among them (Kostomarov, *l.c.* p. 55).

Complaint of Cossack Depredations.

In the responsa of Joel Särkes mention is made of "Berakah the Hero," who fought in the ranks of the Cossacks and fell in battle against the Muscovites (1601; Harkavy, "Yevrei-Kazaki," in "Russki Yevrei," 1880, p. 348). In 1637 a certain Ilyash (Elijah) Karaimovich (the name indicates a Karaite origin) was one of the officers of the registered Cossacks, and became their "starosta" (elder) after the execution of Pavlyuk (Kostomarov, *l.c.* p. 135). In ballads of Little Russia reference is made to a colonel named Matvi Borochovich (1647), who, as his family name (meaning "son of Baruch") indicates, was probably also of Jewish origin. The feeling against the Jews spread very rapidly from Poland into the Ukraine in the reign of Sigismund III. (1587–1632), who was an obedient pupil of the Jesuits. The gilds, which always feared the competition of the Jews, were prominent in connection with the accusations. The higher nobility, however, depended largely on the Jews to act as their leaseholders, agents, and financial managers, and this served in a measure as a bar to persecution.

Stephen Bathori (1575–86) intended to disband the Cossacks, who were a menace to the union of the Ukraine with Poland. Not long before his death he said: "Some day an independent state will spring up from this scum" (Kostomarov, *l.c.* p. 21).

Attacks by Cossacks.

As the power of the Jesuits increased, and with it their determination to force the peasants and Cossacks into the Catholic Church, there were manifest signs of trouble between the Cossacks and the Polish nobility. From time to time armed Cossack bands swept over the Ukraine, plundering the estates of the nobility, pillaging the Catholic churches, and robbing the Jews. When the Polish nobles Wishnevetzki, Potocki, and Koniecpolski settled in the Ukraine and began to build palaces and castles, the Jews were their trusted agents and managers, leasing their estates, mills, inns, rivers, lakes, and all other sources of revenue.

The Jews increased rapidly in the Little Russian territories at the beginning of the seventeenth century. They farmed not only the taxes, but even the revenues of the Greek Orthodox Church. At every christening or funeral the peasants had to pay a fee to the Jew. The lords were the absolute rulers of their estates, and the peasants their dependent subjects. When a lord or any other member of the nobility leased his villages or estates to a Jew, his authority also was delegated to the latter, who even had the power to administer justice among the peasants ("Yewen Mezulah," p. 2a). The extravagant life of the Polish landlords, who spent most of their fortunes abroad, frequently placed them in pecuniary difficulties, and their Jewish tax-farmers were often forced into exactions against the advice and warnings of the wise leaders of the Council of Four Lands, and the Jews of the Ukraine often suffered grievously for the sins of individuals of their race. The uprising of the peasants in the Ukraine has been ascribed by most historians to their oppression by Jewish leaseholders, as well as to the privileges granted to the latter by the kings and nobles of Poland. Recent historical research, however, indicates that the Jews living in the cities, particularly in those of the Ukraine, were not afforded the protection enjoyed by other citizens, and moreover were excluded from the privileges granted to the Christian merchants and burghers (Antonovich, "Monografii po Istorii Zapadnoi i Yugo-Zapadnoi Rossii," i. 188). Notwithstanding this, the Jews managed to gain control of the commerce of the country, as is evidenced by the complaints of the Christian merchants of Lemberg, Kamenetz, Kiev, and many other cities, shortly before the Cossack uprising ("Archiv Yugo-Zapadnoi Rossii," v., part i., xxxiv. 134, xl. 156, cxxi. 323; "Starozytna Polska," 11, 1023, 1369; "Sbornik Mukhanova," p. 192; Antonovich, *l.c.* p. 189). It was the combined opposition to the Jews of the urban and the peasant populations that made it possible for Chmielnicki to arm the entire country against them within so short a time.

Early Uprisings.

During their first uprising under Nalivaika and Kossinski (1591–93), and that under Taras (1630), the Cossacks did not exhibit any special animosity toward the Jews, but complained only of the Roman Catholics. But in the subsequent revolt, under Pavlyuk (1637), 200 Jews, mostly leaseholders and farmers of taxes, were killed in Pereyaslav, Lokhvitza, and Lubny, and many synagogues were destroyed; and when the Polish government restricted some of the rights of the Cossacks their animosity toward the Jews was still further increased.

In 1646 a general European alliance, including Ladislaus IV., was formed for the purpose of driving the Turks out of Europe. The Polish chancelor Ossolinski visited the Ukraine and opened negotiations with the Cossacks. The king was accused before the Diet of 1646 of attempting to curtail the rights of the "Shlyakhta"; the proposed war with Turkey was not sanctioned by the Diet, and the Polish cause was thus injured.

The Great Uprising.

The contents of the agreement between King Ladislaus and Bogdan Chmielnicki, the leader of the Cossacks, have never been positively ascertained, nor has it been shown how far, if at all, the latter was encouraged by Alexis, the Russian czar. It is only known that on Oct. 1, 1653, the Russian government decided to include the Cossacks among its subjects, whereupon war was declared against Poland by the Muscovites. Most of the historians, Russian, Polish, and Jewish, think that the personal animosity of Chmielnicki against Koniecpolski and Chaplinski (see CHMIELNICKI, BOGDAN) caused the Cossack uprising; yet even such a shrewd, ambitious, and daring leader as Chmielnicki could not so soon have become such a popular hero throughout the Ukraine had not the ground been prepared. When Koniecpolski learned of the alliance formed by Chmielnicki and the Tatars to make common war on Poland and to drive the Poles out of the Ukraine, he cast Chmielnicki into prison. A Jew, Jacob Sabilenki, helped Chmielnicki to escape; and when he was subsequently imprisoned for the second time, he again succeeded in effecting his escape. He then went with his fellow conspirators to the Syech, whence he issued his appeal to the Cossacks to rise and take revenge on both the Poles and the Jews. In his address to the Cossack elders Chmielnicki said: "You must be aware of the fact that the Polish nation is gaining power daily and that it oppresses our coreligionists. But it is not the noblemen alone who lord it over us: even the most abject nation [the Jews] hold us in subjection" ("Yewen Meẓulah"). This was enough to excite the people of Little Russia. The flame of revolution spread with great rapidity throughout the Ukraine, and Chmielnicki, encouraged by Ladislaus himself, concluded a treaty with the Khan of the Crimea. Chmielnicki still derived encouragement from the king himself, who, being often opposed in the Diet by the nobility, desired to make use of the Cossacks. Some historians hint that he even secretly promised to help them assert their rights against the nobles.

One of the paragraphs of this treaty stipulated that all prisoners of war should belong to the Tatars, as also the right to sell them as slaves in Turkish markets; and that the property of the Polish nobility and Jews should be allotted to the Cossacks. When the Tatar general Tugai-bey joined Chmielnicki with an army of 4,000 men, the whole of Little Russia, Podolia, and the Ukraine rose en masse, and, leaving their estates and homes, assembled in the Syech. The Jews soon learned of the plans of the allied armies, and warned the Polish field-marshals Potocki and Kalinovski to be on their guard (Kostomarov, i. 264); but they disregarded the warning. On May 18, 1648, the Poles were defeated near the Yellow Waters ("Zholtyya Vody"). Potocki was killed and Kalinovski made prisoner.

Attacks on the Jews.

After this, bands of the Zaporogians, the Little Russian peasants, and the roving Cossacks of the Ukraine joined the insurrection, and invaded the towns of Pereyaslav, Piryatin, Lubny, and Lokhvitza, plundering, robbing, and cruelly torturing the Jewish inhabitants. The Jews of Pogrebishche, Zotov, and Bozovka, about 3,000 in number, were more fortunate; for they gave themselves up to the Tatars, who, though they took them into captivity, treated them humanely. They were taken to the Crimea, and subsequently ransomed by the Jews of Constantinople. On the day of the above-mentioned battle, King Ladislaus died, which was a great misfortune for Poland as well as for the Jews. During the interregnum (May to Oct., 1648) the dissensions throughout Poland increased, and the conflicts between the different parties in the confederation weakened the resistance of the Poles.

While Chmielnicki negotiated with the Polish magnates, and especially with the Archbishop of Gnesen, troops from the Ukraine, both regular and irregular, were organized under brutal leaders, who reveled in the death-struggles of their Polish and Jewish foes. These bands, called "Haidamaks," were ordered by the Greek Orthodox popes to murder both Roman Catholics and Jews in the name of religion, and soon changed the whole country into a desert; only those Jews who fell into the hands of the Tatars, or those who changed their religion, escaped death. The most cruel leaders of the Cossacks were Krivonos, Morozenko, and Chmielnicki's son, Timofei.

After the defeat of the Poles near Korsun, the Cossack troops and the peasant bands under their leader Ganzha advanced against the fortified town of Nemirov, which had 6,000 Jewish inhabitants, and where the fugitives from the neighborhood were assembled. This was a very wealthy community, and contained many prominent and learned men. The Jews, who were in possession of the fortress, had closed the gates; but Greek Christians of the town, disguised in Polish uniforms, urged the Jews to open them again for their friends. They did so, only to be mercilessly slaughtered by the Cossacks and the Russians, those escaping immediate death undergoing frightful tortures (June 10, 1648). Among the victims was Jehiel Michael ben Eliezer, the cabalist, and the head of the yeshibah of Nemirov. While most of the Jews remained true to their faith, some escaped by embracing Christianity, although most of these returned to Judaism when the riots were over (Graetz, "Hist." Hebrew ed., viii. 135).

Treachery at Tulchin.

At the town of Tulchin about 600 Polish soldiers and 2,000 Jews had taken refuge in the fortress (called Nestrow); some of the latter being brave soldiers, sworn to defend the town and fortress to the last man. The Cossack peasants, knowing little of tactics, resorted to a trick. They assured the nobles that their hatred was directed solely against the accursed Jews, and that if these should be delivered up to them they would withdraw. The nobles, forgetful of their oath, proposed that the Jews should give up their arms to them. The Jews, who exceeded the Poles in number, at first thought of revenging themselves on the latter for their treachery; but Rabbi Aaron of Tulchin warned them that the Catholics would take bloody vengeance, and that all Poland would be excited against the Jews, who would doubtless be exterminated. The Jews then delivered up their arms, whereupon the Poles admitted the Cossacks into the town. After the Cossacks had taken everything from the Jews, they offered them the choice between death and baptism. Three rabbis, Eliezer, Solomon, and Ḥayyim, urged their brethren not to change their religion; and about 1,000 Jews who remained steadfast were tortured and executed before the eyes of the Polish nobles (June 24, 1648). Ten rabbis were spared by the Cossacks in order to extort large ransoms from their communities. The Poles were immediately punished for their treachery. Deprived of the assistance of the Jews, they were slain by the Cossacks. This sad event had a good effect, as the Poles after that sided steadfastly with the Jews, and were not opposed to them throughout the course of the long war ("Yewen Meẓulah," p. 23).

From Podolia the bands of rebels penetrated into Volhynia. Here the carnage continued during the whole summer and autumn of 1648. About 10,000 Jews were slain by the Cossacks or taken captive by the Tatars at Polonnoye. The cabalist Samson of Ostropol, who had been revered by the populace, with 300 pious inhabitants, was put to death in the synagogue. Similar massacres took place in Zaslavl, Ostrog, Starokonstantinov, Bar, Narol, Kremenetz, and other towns of the Ukraine. The Polish troops, especially those under Jeremiah Wishnevetzki, subdued the Cossacks here and there, but they were unable to put down the rebellion. In Sept., 1648, the forces of Chmielnicki had advanced to the very walls of Lemberg, which was subjected to a protracted siege. Having reduced the inhabitants by starvation, the Cossacks withdrew upon receiving from the city an enormous ransom, a considerable share of which was paid by the Jews (Caro, "Gesch. der Juden in Lemberg," pp. 51-64). From Lemberg, Chmielnicki with his hordes turned to Zamoscz and Lublin, even approaching Warsaw, where the election of the king was in progress. The choice fell upon the primate of Gnesen, Cardinal John Casimir (1648-68), brother of King Ladislaus IV.

The new king at once entered into peace negotiations with Chmielnicki, but owing to the excessive demands of the Cossacks no conclusion was reached. The war broke out afresh, and lasted to the end of the summer of 1649. In the course of it many more Jewish communities were desolated. After a series of battles unfavorable to the Poles a treaty of peace was concluded at Zborowo, between John Casimir and Chmielnicki. In this treaty there was a clause forbidding the Jews to live in the Ukraine; that is, in the waywodeship of Chernigov, Poltava, Kiev, and part of Podolia (Aug., 1649).

Interval of Peace.

After eighteen months of torture and hardship the Jews could once more breathe freely. To all who had entered the Greek Orthodox Church under threat of death, the king gave permission to return to their former faith. Jewish women who had been forcibly baptized fled in numbers from the Cossack husbands who had been forced upon them, and returned to their families. The Council of Four Lands, at its session in the winter of 1650, worked out a long series of measures intended to restore order in the family and social life of the Jews. The 20th of Nisan, the day of the Nemirov massacre, was the day previously set apart as a fast-day in memory of the martyrs of the Crusades, and was now made a day of mourning for the victims of the Cossack rebellion as well. The prominent rabbis of the time composed many elegies and prayers, which were recited in the synagogues on every anniversary of the fatal day.

But the Jews were not to rest for a long time. The treaty of Zborowo was satisfactory neither to the Polish government nor to the Cossacks, and in 1651 war again broke out. This time the Poles gained the advantage over Chmielnicki's forces, and the campaign ended with a treaty advantageous to the Poles. Under the treaty of Byelaya Tzerkov (Sept., 1651), many of the Cossacks' claims were rejected, and the right of the Jews to settle in the Ukraine was restored.

Alliance with Russia.

It was at this time that the agitation among the Cossacks and the Greek Orthodox Ukrainians was renewed. Bogdan Chmielnicki opened negotiations with Czar Alexis with the view of transferring Cossack-Ukraine, under the name of "Malorossia" (Little Russia), to the Muscovite realm. These negotiations were successful in 1654. In the same year the Russian troops penetrated into White Russia and Lithuania and began a war with Poland. During this war, which lasted two years (1654-56), the Jews of White Russia and Lithuania underwent much suffering. The seizure of many cities by the united Cossack-Muscovite army was accompanied by the extermination or exile of the Jews. When the city of Mohilev on the Dnieper surrendered to the Muscovite forces, Alexis, as requested by the local Russian inhabitants, ordered all the Jews to be banished from the city, and their houses to be distributed among the magistrates and other Russian officials. The Jews, however, trusting that the military disturbances would soon cease, did not immediately leave Mohilev; and for this they paid a heavy penalty. At the end of the summer of 1655 the commander of the Russian garrison at Mohilev, Colonel Poklonski, learned that the Polish army, under Radziwill, was marching on the city. Fearing that the Jews might unite with the advancing enemy, Poklonski ordered them to leave the city, promising them an escort as Polish subjects to Radziwill's camp. No sooner were the Jews, with their wives, children, and belongings, outside the walls, than the Russian soldiers, acting upon Poklonski's orders, fell upon them, killed nearly all of them, and appropriated their possessions.

Massacres in Poland.

At Vitebsk the Jews took an active part in the defense of the city against the besieging Muscovites. For this the enemy took ample revenge, the Jews being either forcibly baptized or sent into exile to Pskov, Novgorod, and Kazan. The Jews in the community of Wilna also suffered in the sack of that city by the Muscovite-Cossack forces in Aug., 1655. Most of the Wilna Jews, however, found safety in flight; those remaining being either slain or banished by order of the czar. It was soon the turn of the native Polish provinces to become the scene of war and invasion. The irruption of Poland's third enemy, the Swedes (1655-58), under Charles Gustavus, brought carnage into the very heart of the country. The greater portion of Little and Great Poland passed into the possession of the Swedes, and King John Casimir had to flee. At the hands of the Swedish invaders Jews suffered equally with Christians; but they often found themselves between the hammer and the anvil. The Polish leader, Czarniecki, while escaping from the Swedes, devastated all the country through which he passed, but manifested exceptional harshness in his treatment of the Jews. The Polish auxiliary bands were equally severe in their treatment of the Jews and other non-Catholics.

The horrors of the war were brought to a climax by the outbreak of the plague in Poland. The Jews in the provinces of Cracow, Posen, Kalish, Piotrkov, and Lublin perished in large numbers, both by the sword of the enemy and by disease. Only after 1658 did the disturbance caused by the war begin to subside. According to the chronicles, the number of Jews who perished during this time (1648-58) exceeded half a million. Over three hundred Jewish communities (740, according to the unreliable Samuel Phoebus in "Ṭiṭ ha-Yawen") were massacred and sacked. Approximately only one-tenth of the Jewish population remained in Polish Ukraine, Volhynia, and Podolia. The remainder had either perished or had emigrated into Lithuania, Poland proper, and

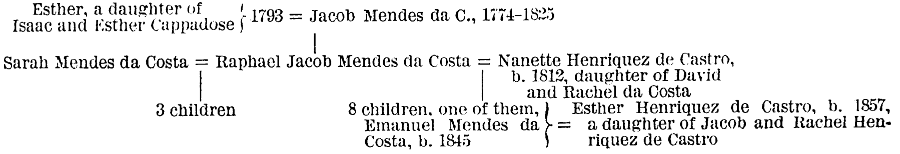
H. R.

COSTA, DA, PEDIGREE: The family of Da Costa is probably identical with that of the Mendez da Costa. It has even been suggested that an early Mendes called himself Mendez da Costa ("Mendes of the Coast"). The arms of the two families both in England and in Holland are practically identical.

Their wide connections with so many Marano families—Bravo, Bueno, Dias, Fernandez, Gradis, Jachia, Lopez, Silva, Suasso, Pinto, Mesquita, Ricardo, Belmonte, Capadose, Henriques, Aguilar, Osorio, Villa-Real, Franco, Quiro, Paiba—the large families resulting from these alliances, coupled with the wide extent of their migrations—make the Mendez da Costa pedigree the key to Sephardic genealogies. The principal branch of the Da Costa family in the Netherlands (pedigree I.) and the Holland Mendes da Costa branch (pedigree II.) follow herewith:

I.

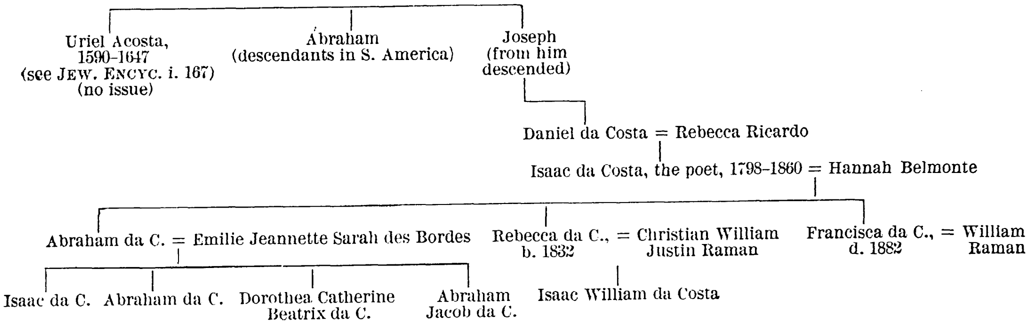
Mendes da Costa of the Netherlands



Abraham da Costa
Raphael Mendes da C. = in 1760 Rachel Mendes da Costa, a daughter of Moses
Esther, a daughter of Isaac and Esther Cappadose } 1793 = Jacob Mendes da C., 1774–1825
Sarah Mendes da Costa = Raphael Jacob Mendes da Costa = Nanette Henriquez de Castro, b. 1812, daughter of David and Rachel da Costa
3 children
8 children, one of them, Emanuel Mendes da Costa, b. 1845 } = Esther Henriquez de Castro, b. 1857, a daughter of Jacob and Rachel Henriquez de Castro

II.

Da Costas of Holland.



Uriel Acosta, 1590-1647 (see Jew. Encyc. i. 167) (no issue)
Abraham (descendants in S. America)
Joseph (from him descended)
Daniel da Costa = Rebecca Ricardo
Isaac da Costa, the poet, 1798-1860 = Hannah Belmonte
Abraham da C. = Emilie Jeannette Sarah des Bordes
Rebecca da C., b. 1832 = Christian William Justin Raman
Francisca da C., d. 1882 = William Raman
Isaac da C.
Abraham da C.
Dorothea Catherine Beatrix da C.
Abraham Jacob da C.
Isaac William da Costa

The English branch of the Mendez da Costas is especially noteworthy, and the genealogy for the early stages was compiled by an eminent member of the family, Emanuel Mendez da Costa, secretary of the Royal Society, London. He traces his own descent back to two Da Costas from whom he was descended on the father's (pedigree III.) and the mother's (pedigree IV.) side respectively. The two pedigrees follow on page 290.

The last inheritor of the fortunes of the English Da Costa appears to have been Mrs. Sarah Williams, who left £40,000 to Benjamin Disraeli, with the request that he should adopt the Da Costa arms.

J. H. Gut.

COSTA, ANDREA MENDES DA: Chamberlain of Queen Catherine of Bragança, wife of Charles II. of England; flourished about 1665. His position at court was due to the influence of his brother, **Antonio Mendes**, who had cured Queen Catherine, while in Portugal, of erysipelas. The queen had persuaded Antonio and his brothers to accompany her to England, where they all became members of her household. After their arrival in London they openly proclaimed themselves Jews. Andrea Mendes, as well as his brothers, is said to have taken an active interest in the affairs of the Jews of London, and frequently influenced Charles II. on their behalf.

J. M. Sel.

COSTA, ANTHONY DA (sometimes known as **Moses da Costa** or **Antonio da Costa**): An opulent Jewish London merchant of the eighteenth century. He attained the position—unusual for a Jew in those days—of a director of the Bank of England. In 1727 he brought an action against the Russia Company, which refused to admit him to membership on the ground of his being a Jew. The attorney-general decided that he must be admitted, whereupon the company petitioned Parliament to modify the former's charter so as to give it the right of refusal. Anthony also figured, in 1736, in a case with W. Monmartel relating to a bill of exchange.

Anthony was the son of Jacob (Alvarez or Alvaro) da Costa, who is probably the Da Costa referred to in the "Thurlow Papers." Jacob Alvarez (or Alvaro) da Costa arrived in England with his family in 1655. He married Leonora (Rachel) Mendes, sister of Fernandez (Fernando) Mendes, the Marano physician of John IV., King of Portugal.

Anthony married his cousin Catherine Mendes, in 1698. Catherine was born in Somerset House, and was named after Queen Catherine of Bragança, wife of Charles II., who graciously consented to stand sponsor to her. This Catherine da Costa is supposed to have made, in 1721, the water-color portrait of her father which now hangs in the vestry of the Bevis Marks Synagogue. Anthony and Catherine da Costa had a daughter, also named Catherine, who married a M. Villareal, becoming a widow at the age of twenty-one. She figured in the famous case of Da Costa *v.* Villareal, and subsequently in that of Villareal *v.* Mellish.

J. I. H.

COSTA, BENJAMIN MENDEZ DA: Philanthropist; born in 1704; died in England 1764. His family was among the most ancient and honorable of the Portuguese Jews, and Da Costa himself was in the foremost ranks of the Hebrew merchants of his day. As an instance of his philanthropy he distributed, during his lifetime, £3,000 a year in charity to the poor of all creeds. In 1762, in conjunction with Isaac de David Levy, he endowed a yeshibah, bestowing yearly distributions on the students who attended it. By a codicil to his will he desired his benefactions to be continued during the

J. G. L.

COSTA, EMANUEL MENDEZ DA: Librarian and fellow of the Royal Society of London, scientific writer, and fellow of the Antiquarian Society of London; born in 1717; died in 1791. He was a son of Abraham Mendez da Costa, who had come from Normandy to reside in England about 1696, and in 1702 had married Esther da Costa, his first cousin. Emanuel Mendez da Costa was distinguished as a botanist, naturalist, philosopher, and collector of anecdotes of literati and of valuable notes and MSS. He was made a member of the Aurelian Society Feb. 7, 1739, and in 1746 was elected a member of the Gentleman's Society at Spalding, and maintained a regular correspondence with Dr. Green, the secretary of that organization. On Nov. 26, 1747, Da Costa was elected fellow of the Royal Society of London, and later its librarian, after which he was elected a member of the Botanic Society in Florence. His publications were: "A Natural History of Fossils" (at the time of its publication the author was esteemed the greatest master of the subject in England); "Elements of Conchology, or An Introduction to the Knowledge of Shells," 1776; and "British Conchology," 1778. He also contributed several valuable papers to the "Philosophical Transactions" and other scientific publications. It was in his library that the list of the original Jewish settlers in England was found. His collection of printed books, manuscripts, engravings, and drawings of natural history was sold by public auction after his death.

J. G. L.

COSTA, ISAAC DA: Dutch poet; born Jan. 14, 1798, at Amsterdam; died there April 28, 1860. His father, Daniel da Costa, a relative of Uriel Acosta, was a prominent merchant in the city of Amsterdam; his mother, Rebecca Ricardo, was a near relative of the English political economist David Ricardo. Daniel da Costa, soon recognizing his son's love for study, destined him for the bar, and sent him to the Latin school from 1806 to 1811. Here Isaac wrote his first verses. Through his Hebrew teacher, the mathematician and Hebraist Moses Lemans, he became acquainted with the great Dutch poet Bilderdijk, who, at the request of Isaac's father, agreed to supervise the boy's further education. Bilderdijk taught him Roman law, and a familiar intercourse sprang up between them, which afterward developed into an intimate friendship.

In 1817 Da Costa went to Leyden, where he again saw much of Bilderdijk. He there took his degree as doctor of law in 1818, and as doctor of philosophy June 21, 1821. Three weeks later he married his cousin, Hannah Belmonte, who had been educated in a Christian institution; and soon after, at the instance of Bilderdijk, he was baptized with her at Leyden. At that time he was already well known as a poet. After Bilderdijk's death Da Costa was generally recognized as his successor among Dutch poets. He was a faithful adherent of the religious views of his friend, was one of the leaders of the Orthodox Reformed party, and during the last years of his life was a teacher and a director of the seminary of the Independent Scotch Church. However severely his religious views and efforts be censured, his character, no less than his genius, was respected by his contemporaries. Although he wrote much on missionary matters, he is distinguished from many other converts in that, to the end of his life, he felt only reverence and love for his former coreligionists, was deeply interested in their past history, and often took their part.

Aside from his fifty-three longer and shorter poems, Da Costa wrote largely on theological subjects. He also wrote "Israel en de Volken" (2d ed., Haarlem, 1848–49), a survey of the history of the Jews to the nineteenth century, written from the standpoint of the Church. The third volume, dealing with the history of the Spanish-Portuguese Jews, is especially noteworthy on account of the mass of new material used. The work was translated into English, under the title "Israel and the Gentiles," by Ward Kennedy (London, 1850), and into German by "A Friend of God's Word" (Miss Thumb), published by K. Mann (Frankfort-on-the-Main, 1855).

Da Costa's two papers, "The Jews in Spain and Portugal" and "The Jews from Spain and Portugal in the Netherlands," which appeared in 1836 in the "Nedersche Stemmen over Godsdienst-, Staat-Geschied- en Letterkunde," may be considered as preliminary to the history. Of interest also are his works on the Von Schoonenberg (Belmonte) family ("Jahrb. für Holland," 1851) and on "The Noble Families Among the Jews" ("Navorscher," 1857, pp. 210 *et seq.*, 269 *et seq.*; 1858, pp. 71 *et seq.*; 1859, pp. 110 *et seq.*, 174 *et seq.*, 242 *et seq.*). Da Costa possessed a valuable library which contained a large number of Spanish, Portuguese, and Hebrew manuscripts, as well as rare prints from the Spanish-Portuguese Jewish literature. It was sold at public auction a year after his death. A catalogue of the library, compiled by M. Roest, was published at Amsterdam in 1861.

COSTA, ISRAELE DI EMANUELE: Italian rabbi; born 1819; died 1897. He succeeded Abraham Baruch Piperno as rabbi of Leghorn in 1864. Of his works the following may be mentioned: "Sefer Bet ha-Zikkaron" (Maḥzor for Rosh ha-Shanah), with annotations, 1869; complete Sephardic Maḥzor, with Italian translation, 1892; The Zohar, in square Hebrew letters, with punctuation and vowel-signs, Leghorn, 1888; "Miḳweh Yisrael" (Hope of Israel), one hundred stories, 1851; "Yashir Yisrael" (Let Israel Sing), 1853; "'Arabim be-Tokah" (The Willows in Her Midst), 1880; "Ki Na'ar Yisrael" (For Israel Is a Lad), 1890; a Hebrew grammar for the use of children, several times reprinted; a Hebrew-Italian dictionary, in collaboration with the rabbis Funaro and Cabib, 1853; various remarks on the validity of the celebrated will of Caid Nissim Samama, 1877-78.

Costa was a Freemason, and reached the thirty-third degree. His Italian songs are very popular among the youth of the Jewish schools.

S. G. J.

COSTA, JOSEPH DA: 1. Younger brother of Uriel Acosta or da Costa, to whom Menasseh ben Israel dedicated his Spanish edition of the "Hope of Israel" (1650); lived at Amsterdam.

2. Relative of the preceding; wrote "Tratado de Cortesia y Politica" (Amsterdam, 1726), dedicated to Immanuel de Abraham Curiel.
S. M. K.

COSTA, SIR MICHAEL: Musical composer and conductor; born at Naples of a Sephardic family Feb. 4, 1810; died in Brighton April 29, 1884. He studied under his father, Pasquale Costa, his grandfather, Tritto Costa, and Zingarelli. In 1829 he visited England, assisting at the Birmingham musical festival, and conducting at Her Majesty's Theater in 1831. He was naturalized as a British subject in 1839. Subsequently he conducted at the Philharmonic Society concerts 1846, at the Royal Italian Opera 1847, for the Sacred Harmonic Society 1849, at the Handel festivals 1857, and at Her Majesty's Theater in 1871. Costa was knighted at Windsor April 14, 1868, and invested with the Royal Order of Frederick in 1869. He was also knight of the Turkish Order of the Medjidie, and knight commander of the Crown in Italy.

Costa's works include the operas and ballets "Il Delitto Punito," 1826; "Il Sospetto Funesto," 1827; "Il Carcere d'Ildegonda," 1828; "Malvina," 1829; "Malek Adhel," 1837; "Don Carlos," 1844; "Kenilworth," 1831; "Sir Huon," 1833; and "Alma," 1842; and the oratorios and cantatas: "L'Immagine," 1815; "La Passione," 1827; "Eli," 1855; and "Naaman," 1864. He also wrote many songs and miscellaneous compositions.

J. G. L.

COSTA, SOLOMON DA: Donor of Hebrew library to the British Museum; flourished about 1760. A broker by profession, he acquired a considerable fortune, much of which was distributed in deeds of piety and beneficence to non-Jews, as well as to his coreligionists. He was also able to render monetary assistance to several of the leaders of the House of Commons, and by his credit with them effected at times national good services. Among these was the preservation of the collection of Hebrew books at present in the library of the British Museum. These had been collected during the Commonwealth, and had fallen to Charles II. at the Restoration. They lay unnoticed throughout the reign of Charles, and this neglect continued during the reigns of James II. and William III. At length in Anne's reign they were sold to a bookseller, from whom, some time in the reign of George I., the entire collection was purchased by Solomon da Costa, then a young man, and desirous of knowledge, who subsequently presented it to the British Museum.

COSTER, ABRAHAM: Dutch anti-Jewish preacher; lived at Amsterdam in the seventeenth century. He wrote "Histoire der Joden," a history of the Jews from their dispersion to the author's time (Amsterdam, 1658). In this history he described the manners, customs, and fables of the exiles, with the purpose of influencing the authorities to prevent the Jews of Amsterdam from building a new synagogue.

COSTS: The outlays made by suitors which are incident to the administration of justice. The question of costs is a twofold one: (1) What do the several officials and the witnesses receive? and (2) What, if anything, does the successful recover from the losing party?

1. Among the officers the judge or judges are foremost; then such experts and referees as assist the court by their reports (*e.g.*, the appraisers of land: see Appraisement); next the clerks who take down the proceedings or make out judicial writings; next the messengers who summon the defendant and who carry out the judgment by seizure of goods and lands; and, lastly, the witnesses.

As to the judges and witnesses the Mishnah (Bek. iv. 6) lays down the stern rule: "One who takes hire to judge, his judgments are void: he who testifies for hire, his testimony is void."

Later authorities saw the impossibility of obtaining the services of the judge for nothing, and, following Ket. 105a, allowed him to charge for loss of time if he had a known occupation; but the mere claim that during the time consumed he might have secured some employment did not entitle him to any costs. The payment of a judge's fee was shared by the two parties in equal parts (compare Bribery; Fees).

The clerk's fees for noting the proceedings in open court, and for making out all writings in which both parties join, are borne by both parties in equal shares (B. B. x. 4). But if the ban has been pronounced against the defendant for refusing to appear, and he comes in to clear himself, he has to pay, before the ban is removed, the fee due to the clerk for making out the instrument (B. Ḳ. 112b).

The messengers are of course paid for their services and traveling expenses. In the Talmudical passage relating to the corrupt practise of Samuel's sons of enriching their underlings (Shab. 56a), the messenger is called חזן ("apparitor," lit. a synagogue official).

2. There is no provision for awarding to the winning party his outlay for costs against the loser, except in a procedure arising after Talmud times, and first mentioned by Alfasi: namely, that of Foreign Attachment, a procedure which is peculiar,

being due to the necessities of the times when the Jews had become wanderers from land to land.

L. G. L. N. D.

COSTUME.—In Biblical Times: The general Hebrew designation for "costume" is "beged," applied indifferently to the garments of rich and poor, male and female. Other general designations are "keli," "lebush," "malbush," "tilboshet," and also "kesut." An exact description of the successive styles of costume in use among the people of the Bible is impossible, since the material at hand is insufficient.

The earliest garment was the apron around the hips or loins ("ḥagorah" or "ezor"), made, in primitive times, of the skins of animals. This apron developed in course of time into the undergarment ("ketonet" or "kuttonet" = *χιτών*, "tunica"), which was worn next to the skin (Gen. ix. 21; II Sam. vi. 20), and taken off at night (Cant. v. 3). (See COAT.) It seems to have been distinct from the "sedinim" = *σινδόνες* (Judges xiv. 12 *et seq.*; Isa. iii. 23; Prov. xxxi. 24), usually designating undergarments of fine linen worn under the ketonet (compare the Assyrian "sudinnu").

Under-garments.

In ancient times undergarments of this kind were held together by a girdle, made of linen (Jer. xiii. 1), leather (II Kings i. 8), or gold (Dan. x. 5), and called "ḥagor" or "ezor" in the case of the priests (Ex. xxviii. 4 *et seq.*), or "abneṭ" (Isa. xxii. 21) in the case of officials. The original dress of the Israelites changed somewhat under Syrian and Babylonian influence. On Egyptian monuments the Syrians are clad in long, tight-fitting upper garments, striped in blue and dark red, richly embroidered, and in yellow undergarments with tight-fitting sleeves, and tight trousers (compare Josh. vii. 21). Trousers, which are now worn in the East, especially by women (compare "Zeit. Deutsch. Paläst. Ver." iv. 62), are not mentioned among the appointments of an ordinary wardrobe, but the priests in later times (compare Ex. xx. 26) wore a garment resembling modern trousers ("miknasim" or "miknasayim"; Ex. xxviii. 42 *et seq.*, xxxix. 28; Ezek. xliv. 18).

Cloak.

A cloak ("me'il") was generally worn over the undergarment (I Sam. ii. 19, xv. 27). This, like the me'il of the high priest, may have reached only to the knees, but it is commonly supposed to have been a long-sleeved garment made of a light fabric, probably imported from Syria. Every respectable man wore generally the upper garment ("simlah") over the ketonet; for any one dressed only in the ketonet was considered naked ("'arom"; I Sam. xix. 24; Amos ii. 16; Isa. xx. 2; Job xxii. 6, xxiv. 7, 10). The fellaheen of modern Palestine wear the "'abayah," a cloak usually black, or in black and brown stripes, which corresponds to the (outer) coat of the ancient Israelites.

The 'abayah consists of a rectangular piece of woolen cloth, sewed together so that the front and the two openings on the sides for the arms are unstitched. Like the fellah of to-day, so the poor Israelite of ancient times wrapped himself in this garment at night to keep warm (Ex. xxii. 26; Deut. xxiv. 13). Deuteronomy and the ordinances for the priests command that tassels ("gedilim," and "ẓiẓit") be attached to the corners of the coat (Deut. xxii. 12; Num. xv. 38 *et seq.*); and, according to the later interpretation, not given in Deuteronomy, these tassels were to serve the Israelites as a perpetual reminder to keep the commands of YHWH. At the breast the upper garment was arranged in a wide fold ("ḥeḳ"; Ex. iv. 6), into which idlers put their hands (Ps. lxxiv. 11), and which was frequently used as a pocket (II Kings iv. 39; Hag. ii. 12). Since the upper garment was in the way when worn at work, it was either left at home or removed by the workman. It was made of the same materials as the lower one, in early times generally of wool, in Palestine of flax also; but later on purple stuff was imported from Phenicia, byssus from Egypt, and artistic weavings and embroideries from Babylonia (Josh. vii. 21; Zeph. i. 8). The nobles often dressed in white (Eccl. ix. 8; compare the garments of the priests), but it is probable that gorgeously colored garments, like those found on the Syrian figures in Egyptian monuments, were also much used. According to Deut. xxii. 11; Lev. xix. 19, garments woven of both wool and linen were forbidden, probably for superstitious reasons (compare Stade's "Zeitschrift," xx. 36 *et seq.*; see SHA'AṬNEZ).

Upper Garments.

At a later period the nobles wore over the upper garment, or in place of it, a wide, many-folded mantle of state ("adderet" or "ma'aṭafah") made of rich material (Isa. iii. 22), imported from Babylon (Josh. vii. 21). As costly garments were worn only on special occasions and removed immediately afterward, they were called "maḥalaẓot" (Isa. iii. 22; Zech. iii. 4) or "ḥalifot" (Gen. xlv. 22; Judges xiv. 12 *et seq.*). This was especially the case with garments worn during the service in the Temple, which, having come close to the divinity, had become, figuratively speaking, saturated with the divine effluvium and could easily imperil the wearer. Persons of higher rank, especially the princes, had a great number of these festive garments (II Kings x. 22), which were taken care of by a special keeper of the wardrobe (compare II Kings xxii. 14). They were not merely for personal wear (Job xxvii. 16), but, as in the East to-day, they were frequently offered as presents (Gen. xlv. 22; I Sam. xviii. 4; II Kings v. 5).

Women's Dress.

The dress of women corresponded in the main to that of the men. They also wore the ketonet and simlah. According to Deut. xxii. 5, however, there must have been some difference. The garments of the women were probably longer (compare Nahum iii. 5; Jer. xiii. 22, 26; Isa. xlvii. 2), provided with sleeves (II Sam. xiii. 19), and wider than those of the men, and therefore better adapted to conceal the figure (compare "Zeit. Deutsch. Paläst. Ver." iv. 60). The dress of noblewomen was distinguished for its luxury and ornaments (compare Isa. iii. 16 *et seq.*; Ezek. xvi. 10 *et seq.*), and was even scented with perfumes (Ps. xlv. 8; Cant. iv. 11; compare especially the catalogue in Isa. iii. 16

et seq.). The luxury in dress displayed by women in the East at the present day suggests the probability of similarly luxurious habits on the part of their sisters of former times. Niebuhr saw women appear in eight or ten different dresses during one evening. Sandals (" na'alayim ") of leather, fastened with a strap (" serok "; Gen. xiv. 23), were generally worn to protect the feet in summer against the burning sand, and in winter against the damp ground; but they were worn neither in the house nor in the sanctuary (Ex. iii. 5; Josh. v. 15). Otherwise, however, to walk about without sandals was a sign of great poverty (Deut. xxv. 19) or of deep mourning (II Sam. xv. 30; Ezek. xxiv. 17, 23).

Head-Covering. Neither the monuments nor the written documents of Biblical times give any information of value concerning head-gear. On the marble relief of Sennacherib the Israelites appear uncovered; and while on the Shalmaneser stele Jehu's ambassadors have head-coverings, these are evidently patterned after the Assyrian fashion. Only one passage of the older literature (I Kings xx. 31) makes mention of " ḥabalim " that are wound around the head; these recall the Syrians on Egyptian monuments, who appear with a rope coiled around their long, flowing hair, as is still the custom here and there in Arabia. This custom, probably a very ancient one, did not long obtain, since it afforded no protection against the sun. It may be assumed, therefore, that even the ancient Hebrews had a style of head-covering still used by the Bedouins. This consists of a square woolen cloth (" kaffiyyah "), folded triangularly, and laid upon the head, over which one corner depends to protect the nape of the neck, while the two side corners are crossed under the chin and also hang down the back. A heavy woolen cord (" 'aḳal ") holds the cloth firmly on the head. In later times both men and women wore a covering more closely resembling the turban of the modern fellaheen of Palestine.

The cap (ṭakiyyah), often the only head-covering worn by boys, is generally made of two or three thicknesses of cotton cloth, intended to protect the rest of the head-covering against perspiration; over this are placed one, and often two, felt caps (" lubbadah"), and then the Turkish national head-covering (" ṭarbush"); finally a fringed cloth of unbleached cotton, a colored figured mandil, a yellow and red striped kaffiyyah, a black cashmere shawl, a piece of white muslin, or a green cloth is wound around this. This style of head-covering not only protects against the sun, but is also an admirable pillow, and serves as a repository for valuable documents (compare "Zeit. Deutsch. Paläst. Ver." iv. 57 *et seq.*). The use of a similar head-covering among the Hebrews seems to be indicated by the noun " ẓanif " (from the verb " ẓanaf "; Job xxix. 14; Isa. iii. 23), as well as by the verb " ḥabash," applied to the act of arranging the " ẓanif "; for the verb " ḥabash " means literally " to wind around," and the verb " ẓanaf " similarly signifies " to wind into a ball." It is possible that the various classes gradually came to use different forms of the turban.

Veils. Since the ancient Hebrews evidently knew nothing of the strict separation of men and women customary among the Moslems, the women wore veils only on certain occasions, as on the wedding-day (Gen. xxiv. 65, xxix. 22 *et seq.*). Later on, veils and gauze garments, adopted from other nations, apparently came into more general use among the Israelites (compare Isa. iii. 16 *et seq.*). The most common term for " veil " is " ẓa'if " (Gen. xxiv. 65), while " re'alot " (Isa. iii. 19) probably designates a veil consisting of two parts, one of which, adjusted above the eyes, was thrown backward over the head and neck, while the other, adjusted below the eyes, hung down over the breast. It does not follow from Ex. xxxiv. 33 *et seq.* that men also wore veils.

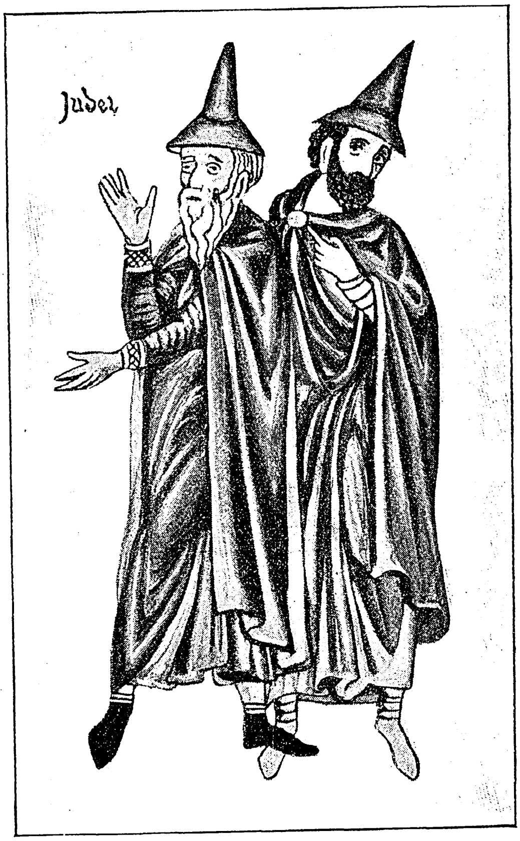
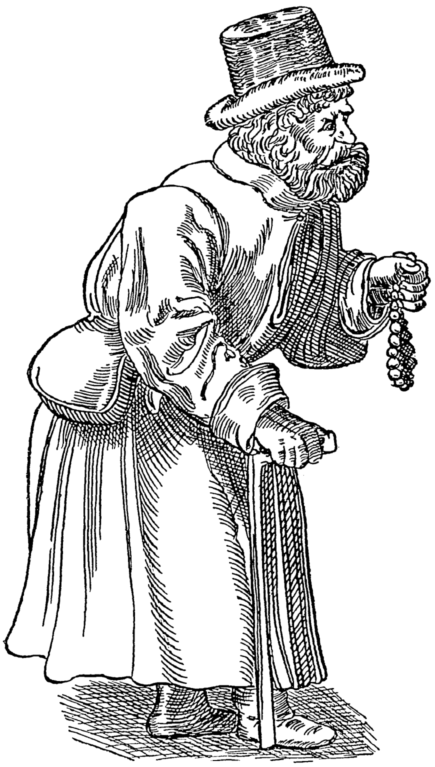
E. G. H. W. N.

——**In Post-Biblical Times:** The dress indicated in the Talmud does not differ much from that described in the Bible. Rules were given for the order in which the different articles of dress were removed before a bath, and from this can be ascertained the costume of the ordinary Israelite of the time, which consisted, in order of removal, of shoes, head-covering, mantle, girdle, shirt, and finally a vest known by the Greek name " epikarsion " (Derek Ereẓ Rabbah x.).



Costume of German Jews of the Thirteenth Century.
(From Herrad von Landsperg, " Luftgarten.")

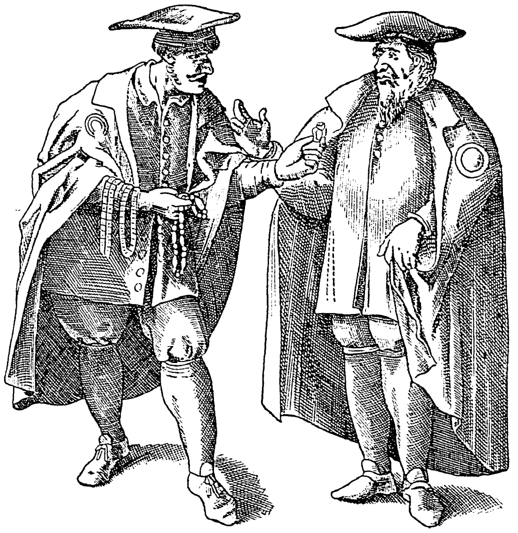


German Jew of the Early Sixteenth Century.
(After Hans Burgkmair.)

Hellenic Influence.

Many, if not most, of the terms applied to articles of dress were derived from the Greek, and it is therefore probable that their form and style were Hellenic. Thus the sagum, or armless mantle of the laborer (Kel. xxix. 1); the dalmatic of the leisurely classes (Kil. ix. 7); the sudarium, or handkerchief (Shab. iii. 3; Sanh. vi. 1; compare Luke xix. 20); the pileum, or felt hat (Niddah viii. 1); and the stola (Yoma vii. 1) are all spoken of by their Greek names. A more complete enumeration of clothing in Talmudic times is given in Shab. 120a, in which the question is raised as to what clothes may be carried out of a burning house on Sabbath, Rabbi Jose limiting them to eighteen of the more necessary articles. The parallel passage in the Jerusalem Talmud gives different names, which fact points to a difference in costume between Palestine and Babylonia. Most of these names, as well as those in Yer. Kil. ix. 4 and in Massek. Ẓiẓit, p. 22, are of Greek origin, and indicate the extent of Hellenic influence on Jewish dress. The Jews even borrowed from the Romans the superstitious practise of drawing on the right shoe first (Derek Ereẓ R. x.; Shab. 61a), though previously the opposite custom had prevailed among them (Yer. Shab. vi. 2). The pænula, a round cape with hood, mentioned in Yer. Ḥag. i. 8, and generally used by day-laborers to protect their tunics from rain and snow, is contrasted with the ṭallit as a Japhetic or foreign garment (Gen. R. xxxvi.).

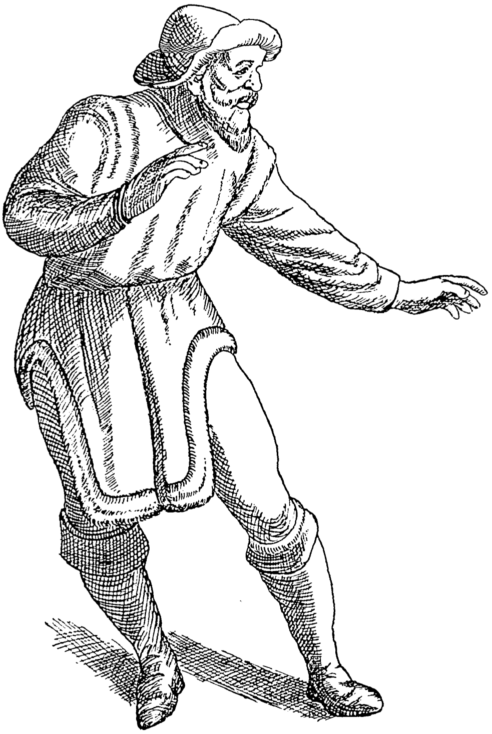
Generally speaking, it may be assumed that the Jewish dress of Palestine, at least in the cities, was adapted in a large measure from that of the Romans; yet at times conservatives like the masters of the Law kept to the old Palestinian costume: the "gollok," which they wore under the ṭallit (B. B. 57b), is specially declared to be like the so-called "coat of many colors" of Joseph (Gen. R. lxxxiv.). Owing to the flowing character of the robes there was very little difference in male and female dress, so that Rabbi Judah and his wife were able to manage with one street-robe between them. The stola, for instance, was used indiscriminately by men and women. It was a long mantle of finer material than the tunic or shirt, girdled under the breast and provided with a stripe of a different color and sometimes embroidered with gold. It was often very expensive, costing occasionally as much as 100 minas (Shab. 128a). The waistcoat, or epikarsion, used by both men and women, was brought round under one arm and then knotted over the shoulder of the other (Niddah 48b; compare Miḳ. x. 4). The trousers or drawers of the ordinary Israelite differed from those of the priests of earlier times only by being provided with openings (Niddah 13b). In regard to covering for head and feet see Hat; Shoe.



Jews of the Upper Rhine, End of the Sixteenth Century.
(From the Basel "Stammbuch," 1612.)

Color.

Mourners as well as excommunicated persons (Yer. R. H. i. 3) wore black, as did those accused of adultery (Soṭah 7a); but shoes were not to be black, because the wearing of black shoes was a distinctively Gentile practise (Ta'an. 22a). White was used at weddings and other festivals, and for this reason was adopted for the festival of New-Year (Yer. R. H. i. 3); for special apparel as a sign of mourning see Mourning, and for the use of crowns on festive occasions see Crowns. Jewesses did not wear red, which was regarded as licentious (Ber. 20a). Jews were cautioned against adopting the many-colored or purple garments of the heathen, or their wide pantaloons (Sifre, 81), and it became a general principle in later Jewish law that one should not follow in the ways of the heathen or use costumes peculiar to them (Shulḥan 'Aruk, Yoreh De'ah, 178, 1); and though this was interpreted as applying only to that kind of Gentile dress which was associated with some specifically religious practise, it was held that, if a religious principle were involved, it were better to face martyrdom than to change even the style of a shoelace (Sanh. 74b). The pious were particularly careful. Moses Sofer in his ethical will says: "Be careful of changing your name, language, or costume, which God forbid" ("Leb ha-'Ibri," i. 35). Only one exception was made to this general principle: those who were "near the government" were allowed and even recommended to wear the ordinary clothes of office (Yoreh De'ah, 178, 2). There is no definite proof that a distinctively Jewish dress was worn during the Middle Ages, either in Asia or in Europe. The gaon of Bagdad was clothed like a king ("Travels of R. Pethahiah," ed. Benisch, p. 43). Pethahiah himself noticed the difference between the costumes of Eastern and Western Jews (*l.c.* 11), the Persian Jews at that time wearing full and flowing outer robes. Considerable elegance was displayed by the wealthier classes. Gold embroidery is mentioned (Yer. Yoma vii. 3); and women were not above using false hair ('Er. 7b), and false teeth made of gold or silver (Sheb. 64b); the hair was also dyed (B. B. 60b).



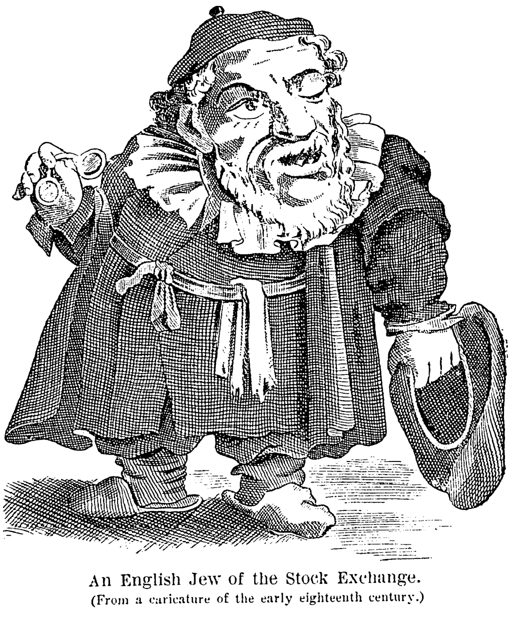
Costume of a Jew of Swabia, Early Seventeenth Century.
(After Daniel Meisner, "Politica Politice," 1700.)

Importance of Dress.

Great importance was attributed to dress: "The glory of God is man, the glory of man is dress" (Derek Ereẓ Zuṭa x.); dress was considered of even more consequence than food and drink: "Dear upon you, cheap within you" (B. B. 52a); and the rule was to dress according to your means, but to eat below them (Ḥul. 84b; but see Gen. R. xx.). The scholar especially was required to dress neatly and respectably. It was regarded as bringing shame upon scholarship if a learned person went out with botched shoes or darned garments (Shab. 114a). A bride was given a year to prepare the trousseau (Ket. 57a), and a man was obliged to give his wife each year one hat, one belt, three pairs of shoes (for the three feasts), and other articles of dress, amounting in all to fifty zuzim (Ket. 64b). While there was a strong tendency to adopt foreign costume, as shown by the names of garments, there was an equally marked tendency to avoid this, probably as part of the general principle of placing a fence about the law.

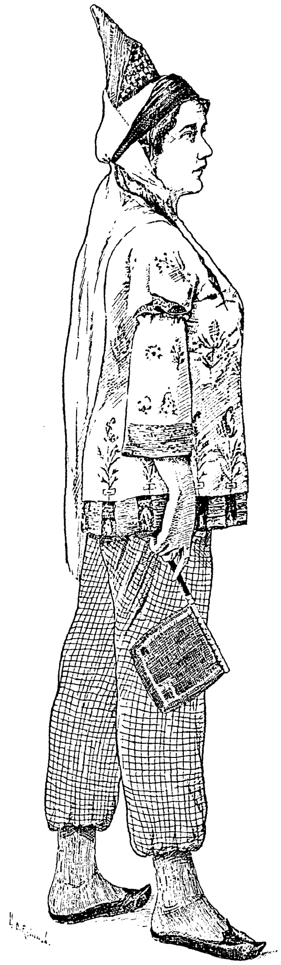
Influence of the Badge.

The great change came with the Lateran Council of 1215, which instituted the BADGE. Innocent III. in the preamble to the law enforcing the badge complains that Jews were being mistaken for Christians. From this time onward there was little danger of such mistake. The tendency among the Jews themselves was to make a distinction between their own dress and that of their neighbors. In particular, black became the favorite color of the Jews in Spain, Germany, and Italy (Berliner, "Aus dem Innern Leben," 1st ed., pp. 36-37). Their frequent expulsions caused them to carry into other lands the dress of their native places, and their natural conservatism caused them to retain it. The Rabbis, however, had throughout to contend with the innate tendency of the Jewess toward luxury and display, and they passed in vain many SUMPTUARY LAWS.



An English Jew of the Stock Exchange.
(From a caricature of the early eighteenth century.)

The only restriction on material is in the Biblical injunction against using garments "mingled of linen and woolen" (Lev. xix. 19; see SHA‘AṬNEZ). The leather of forbidden animals would also be unsuitable for Jewish use. Generally speaking, the material used was of the richest kind for female dress, but was chosen more for use than for show in the case of the men.



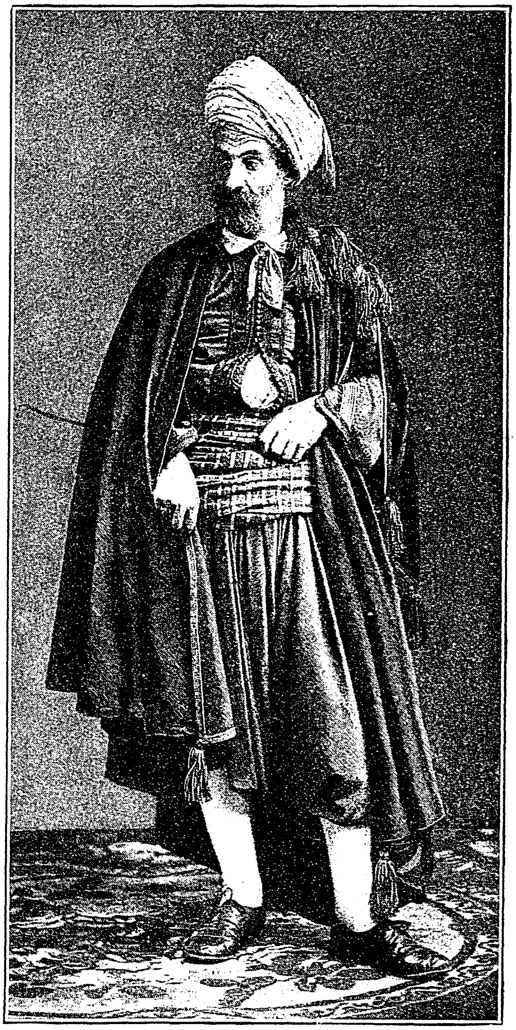
Tunis Jewess in Street Costume.
(After a photograph.)

Even from Talmudic times it was usual to reserve a better suit of clothes for the Sabbath. Every one should have two suits, one for week-days and one for Sabbath (Yer. Peah viii. 7), and where two suits are unattainable, the one should be differently arranged on Sabbath (Sanh. 113a). It is quite customary on modern Jewish holidays to carry out the Talmudic precept.

Regarding the costume of Jews in early Germany there are a few details in the sources given by Berliner in "Aus dem Innern Leben," 2d ed., pp. 62–65. The "Sachsenspiegel" speaks of the gray coats of the Jews, but black was generally recommended (Benjamin Ze'eb, Responsa, No. 282), though Jews might wear bright colors on journeys or in times of trouble ("Aggudah," 125b). Similarly fringes were disliked (Israel Isserlein, Responsa, No. 296), though the "kurse" worn by brides, a mantle with narrow sleeves, was trimmed with fur. Both sexes wore long garments. The Jew wore a "kappa" reaching to his heels, while on his head was placed a "mitra," or hood ("Maharil," pp. 36, 82). The mantle of the Jewess, however, was longer, and was held back by a brooch called a "nuschke" ("Or Zaru‘a," ii. 39). The best-known garment worn by the German-speaking Jews was the white "sargenes," called "kittel" in the Rhine regions. This was made of silk, often embroidered, and flowed ungirdled to the feet (Menz, Responsa, No. 86). It was worn mainly on the Sabbath and on festivals, and was without the right armhole, so that the right arm could not profane the Sabbath. Later on it was used as a shroud, but the earliest notice of this refers to the beginning of the fourteenth century. Grünbaum ("Jüdisch-Deutsche Chrestomathie," pp. 502–504) derives it from "sarge," but Berliner (*l.c.* p. 132) from the Old High German "sarroc," or shirt. For garments for the dead see SHROUD.

The pupils of Isserlein describe him as wearing a "geriffelte," a fur-lined mantle like that worn by women, with ruffles round the neck (Responsa, No. 297); but at the same time they state that only the older rabbis in Austria wore it. Sebastian Brant, in his "Narrenschiff," describes a particularly popular fringed mantle of his time as "Judisch syt" (Güdemann, "Erziehungswesen in Deutschland," Vienna, 1888, p. 274).

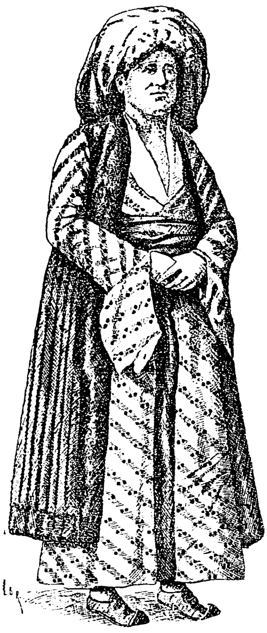
For information concerning the actual dress used by Jews in medieval and modern times, the portraits and caricatures of Jews found in manuscripts and books must be examined. These are rarely of Jewish origin except in the case of the illuminated Haggadot, and in these it is difficult to determine how far the illustrations represent specifically Jewish dress. In an early fourteenth-century Spanish manuscript Haggadah the tunics of the men come to a



Costume of a Jew of Algiers.
(From a photograph.)

point in front, while the women wear an outer mantle without sleeves which passes over the head, leaving the breast bare. The hat is large, and is worn toward one side of the head, with the back bent up and the front flat (Brit. Museum, Add. MS. 27,210). In an Italian Haggadah dated 1269 the women wear tight-fitting low dresses and have their hair fastened in nets and caps (*ib.* Add. MS. 26,957). The chief characteristic which will be observed in the first row of costumes in the accompanying plate is the length of the outer robe, which, except in the case of No. 12, a Swiss Jew of the fifteenth century, comes down to the feet. This points to the fact that the Jews during the three centuries indicated were debarred from handicrafts. A peculiarity that is particularly to be observed in the costume is that it exactly resembles that of the sedentary monk. The sole exception to the rule of the long outer robe is found in a representation (see illustration, p. 296) of a Jew of Swabia early in the seventeenth century, figured in Meisner's "Politica Politice," whereas the Italian Jew (No. 5) in the plate is more prepared for outdoor and a traveling life. With the Renaissance a new principle seems to have come into play: the Jews clung more tenaciously to their usual dress, and did not follow the innovations of fashion; so that they became distinguished by wearing the old-fashioned costume of their native country. The pictures of German Jews and Jewesses of the seventeenth century given by Hottenroth (Nos. 13, 15) do not differ in any respect from the ordinary dress of citizens of Worms, Nuremberg, and Frankfort, except by being somewhat old-fashioned. The same applies to the Jew and Jewess of Fürth (No. 18). Similarly, the costumes of Jews of Amsterdam depicted in Picart's "Coutumes Religieuses" exactly resemble those of the wealthier classes of Holland at that period.

Medieval Costumes.

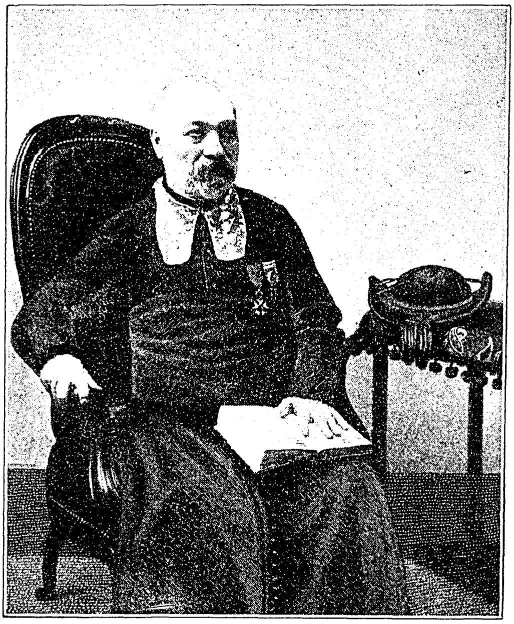


Jewess of Brusa, Turkey.
(After Racinet.)

It is doubtful whether, since the destruction of the Temple, Jews have had anything corresponding to the sacred vestments of the Church—that is, garments exclusively used in the discharge of certain religious functions. Archeologists endeavor to prove that Christian sacred utensils and vestments were directly derived from the Jews (J. W. Legg, "Inventories of Christ Church, Canterbury," London, 1902, Introduction), but without considering the historic conditions. Since the days of the Temple there has been practically no priestly caste among Jews. Every layman is qualified to perform all ecclesiastical functions, except that of the dukan. Consequently there was no need for special vestments either within or without the synagogue. On the other hand, the injunction (Deut. xxii. 12) to wear fringes led to the use of the Arba' Kanfot and the Ṭallit. Of recent years, however, and in Western countries, it has become customary for the Jewish clergy to adopt a distinctive garb. In the synagogue a velvet biretta is, perhaps, the most usual head-covering, with an ordinary academic gown, over which, on suitable occasions, the ṭallit is placed. Outside the synagogue there is a tendency to adopt the clerical dress of each country. Thus the chief rabbi of England wears a costume resembling that of the dean or bishop of the English Church, while a rabbi of a French consistory wears a hat with curved rims, and the lace bands, the broad sash, and surtout of a French parish priest.

Sacred Vestments.

In the East, Jewesses for the most part adopted the Mohammedan custom of wearing veils, though the custom was by no means so rigorously observed by them as by their Mohammedan sisters. In 1697 the Jews of Metz passed a law ordering all their women to wear veils when going to synagogue, except on Saturday nights, at the close of festivals, and on Purim. See Veil.



French Rabbi in Official Garb.
(From a photograph.)

With regard to those modes of dressing the hair which go with certain costumes, see Beard; Hair; Pe'ot; Wig.

In Eastern countries both law and custom compel a distinct difference in costume between Jew and Moslem, which difference was also enforced by Jewish law ("Kehunnat 'Olam," p. 14). Green veils are avoided because these are distinctive of descendants of Mohammed. In Egypt, Jews were obliged to

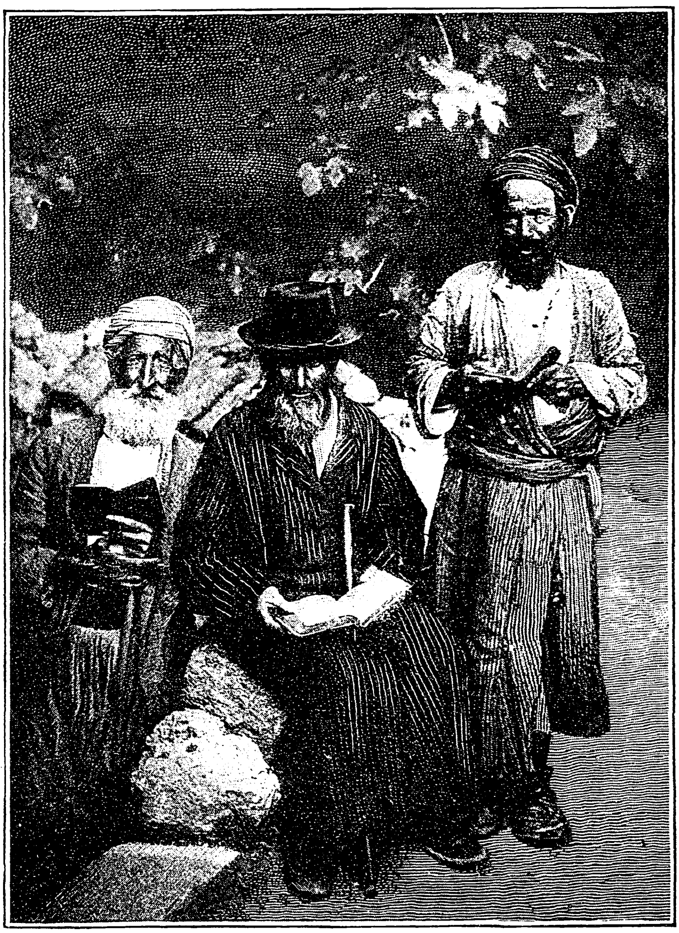
THE JEWISH ENCYCLOPEDIA VOL. IV. COPYRIGHT 1903, BY FUNK AND WAGNALLS COMPANY, NEW YORK & LONDON

wear yellow turbans. The dress of an Oriental Jew, especially when on his travels, is described at length by Ezra Stiles in his "Diary" (p. 362), but it would be dangerous to regard his description as typical.

Striped clothing is one of the striking characteristics of the Oriental male Jewish dress. This seems against the medieval principle of avoiding party-colored garments. It is not an invariable custom, but is frequent enough to deserve mention. J.



Jews of Jerusalem.

(From a photograph by the American Colony, Jerusalem.)

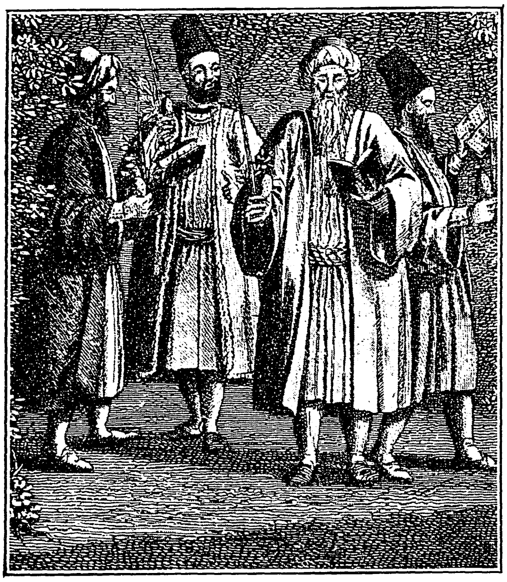
A contemporary Jewess of Algiers wears on her head a "takrita" (handkerchief), is dressed in a "bedenor" (gown with a bodice trimmed with lace) and a striped vest with long sleeves coming to the waist. The "mosse" (girdle) is of silk. The native Algerian Jew wears a "ṭarbush" or oblong turban with silken tassel, a "ṣadriyyah" or vest with large sleeves, and "sarwal" or pantaloons fastened by a "ḥizam" (girdle), all being covered by a mantle, a burnus, and a large silk handkerchief, the tassels of which hang down to his feet. At an earlier stage the Algerian Jewess wore a tall cone-shaped hat resembling those used in England in the fifteenth century (Jew. Encyc. i. 384; see also plate, No. 21). The costume of Tunis is very similar, and was described by Mordecai Noah as follows ("Travels in the Barbary States," p. 311, New York, 1819):

> "The Barbary Jews wear a blue frock, without a collar or sleeves, loose linen sleeves being substituted, with wide drawers of the same article, no stockings, excepting in winter, and black slippers, a small black skull-cap on their head, which is shaved, and around which a blue silk handkerchief is bound; they are permitted to wear no colors. The Italian Jews dress like Christian residents, with the addition of a haick, or bournouse, thrown over their heads. The Jewish women, like the Turkish, are considered as an inferior race—they are fat and awkward, their dress consisting of a petticoat of silk of two colors, principally yellow and purple, around which is thrown, in several folds, a thin gauze wrapper; the head is covered with a colored silk handkerchief; those who are single have their hair plaited in two or three rows, to the end of which they suspend colored ribands; they wear no stockings, but slippers, with silver cinctures around their ankles; and the soles of their feet, their hands, nails, and eyebrows, tinged and colored of a dark brown, from the juice of a herb called henna. When they walk they unloosen from their neck a piece of black crape, with which they cover their mouth and chin, leaving the upper part of their face bare."

Whatever the costume, in almost every case the outer garment is supported by a belt or girdle. This has Biblical authority, and besides enables the ultra pious to carry a handkerchief as a girdle on Sabbath; on other occasions the handkerchief is tucked inside the girdle, as is seen in a curious caricature of an English Jew of the Stock Exchange, as well as in a figure after Hans Burgkmair showing a Jewish pedler of the sixteenth century wearing a relatively modern felt hat (see illustrations, pp. 295 and 296). In the eighteenth century the Jew generally wore the ordinary three-cornered hat of the time, and even had his hair powdered (Arye ben Ḥayyim, Responsa, No. 6).

Turkish.

In Turkey the costume of the Jews was mainly distinguished by the black turban, but the outer garment was an "‘antari," a robe opening in front, of silk or figured calico, reaching a little below the knee and fastened round the waist by a sash passing twice round the body; over this was a "jubbah" lined with cats' fur. Some wore the "bunneṭah," or conical hat; some the "meminah," a cap of dark cloth round which a piece of silk was twisted several times like a turban. The modern Turkish Jew adopts mainly European dress with a fez. An especially dignified dress is that of the Jew of Salonica (see plate, No. 24). His ‘antari is covered by a "kundi," a long, showy, varicolored mantle lined with fur. The ‘antari reaches to his feet, and the sleeves are longer than that of the jubbah, under which is to be seen the "salṭah" or cloth fur-lined vest. The Jews of Brusa wear a high cap of pasteboard covered with black material, resembling the cylindrical hats worn by Greek priests. Around this is wound a piece of light-colored cotton to form a turban. This is the only distinction between Jewish and non-Jewish dress in Brusa. The Jewesses there have a house-dress and a street-dress. At home she wears an 'antari, often of rich silk, open in front, and fastened round the waist by a shawl; and a sleeveless "hyrka," or vest, lined with fur and trimmed with a band of the same. Her head-dress consists of an enormous "hotoz," which entirely covers her hair. This is covered by a "yashmak" when she goes out. The Jewesses of Rhodes also have a distinctive costume consisting of cotton 'antari and "chalwar" (puffed pantaloons of cloth), with a jubbah of silk or fine cloth, which covers all but the slashed sleeves of the 'antari. As a head-dress she wears a "takke" (cotton cap) hidden by two handkerchiefs.



Jews of Constantinople, Eighteenth Century, Celebrating the Feast of Tabernacles.

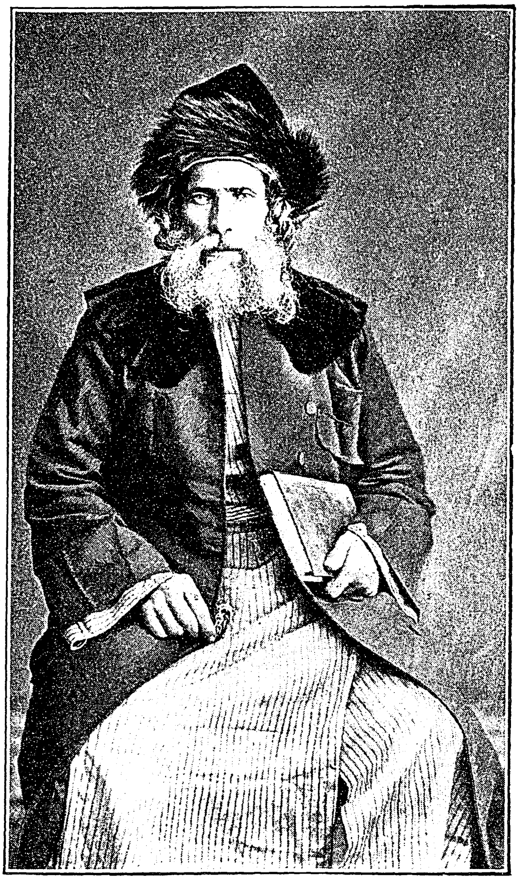
(From an old print.)

The Jewesses of Aleppo are distinguished among all the women of the East for displaying their hair, which is twisted into a spiral arranged high upon the head in the form of a dome. Their dress consists of a silken 'antari with broad red and yellow stripes, shalwar (pantaloons), "mintan," vest of the same material as the 'antari, with very long sleeves, hurka of plain taffeta, and a shawl of plain silk and cotton used as a girdle and tied in the front. They wear soft shoes and yellow "pabujas." In Jerusalem one Jewess has been described as wearing a "fistan" (gown) of dark-green satin trimmed with gold embroidery over the plaited skirt, the hem of which is also trimmed with embroidery, as well as the long open sleeves which open out of the narrow sleeves of the "salṭah," or jacket of white cashmere.

The hotoz is built up from a large number of figured "yemeni" and twisted one above the other in the form of a melon; round the lower edge is a row of gold coins; a small veil of white muslin is fastened to the top of the hotoz and is gathered round the face. M. Fr.

The Jews of the Caucasus are distinguished mainly by their head-dress, the men wearing a kind of busby, mushroom-shaped and made of fur, while the Jewish women and girls cover their heads with a hood attached to a mantle with full sleeves (see illustration, p. 301). The men carry weapons freely, which is quite exceptional among Jews.

The Jews of Cochin are in no way distinguished in their dress from the Hindus of their district. The black Jews wear the garb of day-laborers, a thin linen jacket and a long robe, the former being removed while at work. The white Jews wear a kind of paletot, and under this a waistcoat buttoned up to the chin; both classes wear a cap resembling a smoking-cap. In earlier times the men used to wear the gored pantaloons and white turbans of the Mohammedans of India (see plate, No. 20).



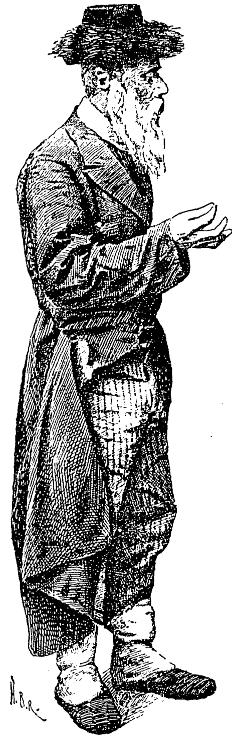
Rabbi of the Orient.

(From a photograph.)

The Ḥasidim of Galicia tend to distinguish themselves in dress as well as in customs; besides the fur hat and the old-fashioned "paletot" reaching to the ankles, the modern Ḥasid is invariably to be recognized by the pair of white socks into which the trousers are tucked.

Superstitions.

A number of superstitions have grown up about costume among the Jews of eastern Europe, though they have doubtless copied many of them from their neighbors. For every new garment a child puts on, the parents give a small sum in charity; and it is customary to dress a bridegroom, as soon as he is betrothed, in entirely new clothes. It is bad for the memory to put off or on two garments at the same time, or to put on one that has been washed within seven days. It is unlucky to put on a garment upside down or to catch it in a nail, the latter being a sure sign that an enemy is pursuing you. It is unlucky for two persons to dress a child at the same time: it may die or become sick. If you are mending your dress hold a part of it in your mouth, or it will tie up your memory.



Jew of Kolomia, Austrian Galicia.

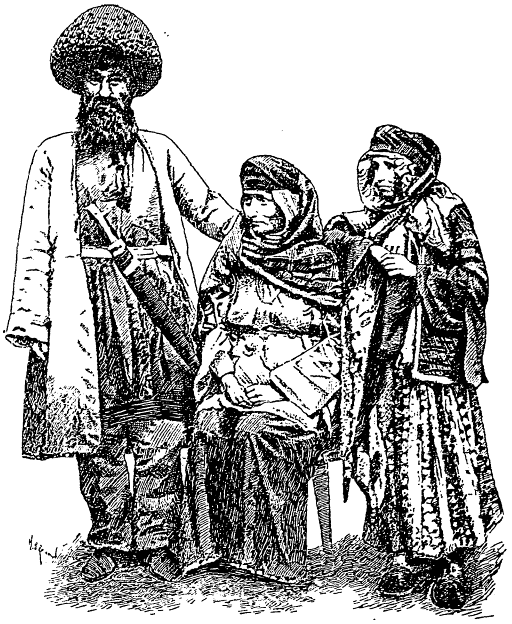
A. J.

——In Russia and Poland: In the Middle Ages the Jews of Poland and Lithuania dressed like their Christian neighbors, as is indicated clearly by Cardinal Commendoni in his well-known description of the condition in which he found the Jews when he visited Poland in 1561 ("Czacki Rosprawa o Zydach," p. 93). The special garb which, in medieval times, the Jews of Germany and other European countries were compelled to wear (see Bruno Köhler, "Allgemeine Trachtenkunde," iii. 100) was not known in Poland. There is, in fact, seemingly reliable evidence that the so-called Jewish garb of Poland, including even the "jarmulka" (under-cap), is simply the old Polish costume which the Jews retained after the Poles had adopted the German form of dress (see Plungian, "Ben Porat," p. 59, Wilna, 1858, quoting from Russian sources). As the Jews lived under their own jurisdiction



Jews of the Caucasus in Native Costume.

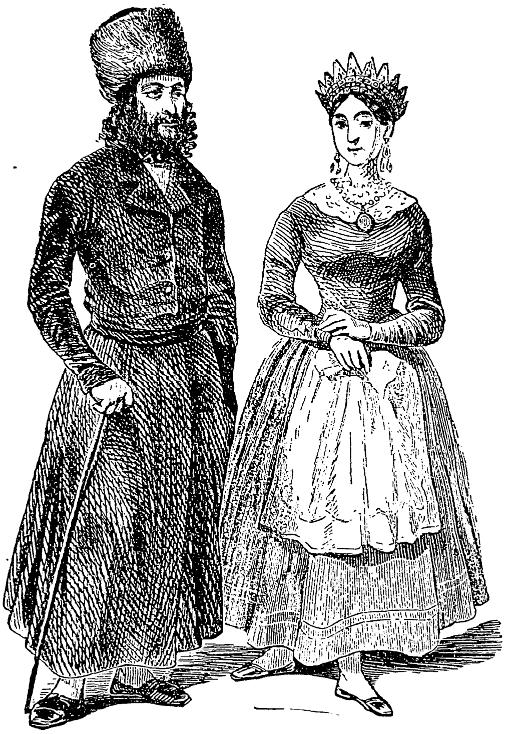
Polish Jewess and Jew of the Eighteenth Century.

(After Le Prince, 1765.)

practically until the division of Poland, and as the interior of Russia had no Jewish population before the acquisition of the Polish provinces, all Russian legislation on the subject of Jewish costumes is naturally confined to the nineteenth century.



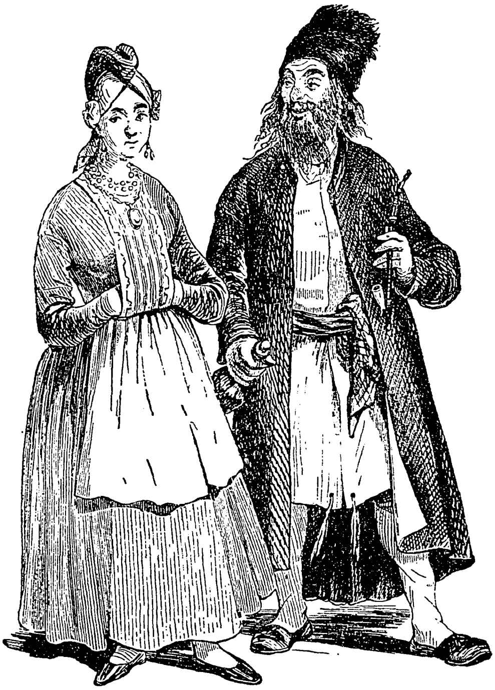
Warsaw Jew and Jewess of the Early Nineteenth Century.
(From Hollaenderski, "Les Israelites de Pologne.")

At first such legislation was limited only to special occasions. The "Polozhenie," or enactment concerning the Jews, issued by Alexander I. in 1804, permitted those Jews who adopted the German style of dress to visit the provinces of Russia outside of the Pale of Settlement, and allowed Jewish boys attending lower schools to retain their distinctive costumes, while at the high schools they were obliged to wear the German dress. The "Polozhenie" issued by Nicholas I. (April 13, 1835) reenacted this statute, with the addition that Jewish students at the universities must wear the costumes usual in those institutions, and that Jews elected to civil offices must wear the apparel fixed by law for such municipal dignitaries. In December, 1841, the Jews then actually residing in Riga received the permission of the government to remain there permanently on condition that they would conform to the dress of the inhabitants. The law of April, 1845, compelled all Jews in Russia to assume the German costume. The progressists among the Jews of Russia considered the law a great victory for their cause, and scoffed in prose and poetry at the consternation caused among the old-fashioned (Levanda, in "Den," 1870, Nos. 6-17; I. M. Dick, "Die Jüdische Kleiderumwechslung," Wilna, 1870; Goldberg, "Massa' Ẓafon," in "Kokbe Yiẓḥaḳ," No. 35).

Law of 1845.

But the strictly Orthodox not only had religious scruples against wearing the costume of the Gentiles, which is prohibited, though not clearly and decisively, by Maimonides, and the Shulḥan 'Aruk (Yoreh De'ah, 178), but considered the new law as another one of the many efforts of the emperor to Christianize them by force. It caused as much dismay as the worst decree of that harsh reign, and the number of Jews who preferred to suffer the penalty rather than comply with the law was so large that its enforcement was postponed for five years. But the suspension of the law, like most acts of the Russian government, was not complete, and some of the taxes were still collected which had been imposed upon those who desired exemption from that law. Among such taxes was that collected for wearing jarmulkas, which seems to have been collected in various places in an irregular manner, but was finally compounded, by a special decree of Feb. 11, 1848, for a tax of five rubles annually, the proceeds to go to the fund of the "korobka" (basket tax). The decree was reenacted May 1, 1850, to take effect Jan. 1, 1851, giving permission, however, to the governors-general of the various provinces to allow Jews over sixty years of age to continue the old garb.

Now that the costume laws are obsolete the Jews dress as they please. Old-fashioned Jews still cling to the long frock-coats and cloaks, length being the distinguishing feature of all kinds of Jewish costumes (see Carl Köhler, "Trachten der Völker in Bild und Schrift," p. 300, Dresden, 1871). The preference for silk, velvet, and expensive furs, against which the Jewish Council of the Four



Hassid and Wife of the Early Nineteenth Century.
(From Hollaenderski, "Les Israelites de Pologne.")

Present Day.

Lands legislated from the sixteenth to the eighteenth century, still prevails in many parts of Russia, though it is waning. The Ḥasidim, especially in the smaller towns of Poland, Podolia, and Volhynia, still use the old-time Jewish costume with some modifications. This includes the long coat; short white trousers, or rather knee-breeches, which also serve instead of underwear; long white stockings; and low, slipper-like shoes. The "arba' kanfot," or "little ṭallit," takes the place of a vest; the girdle, and—with the more pretentious—the "stramele" or "spodek" (round fur cap) over the jarmulka, complete the costume, which is not much unlike that described by Holländerski as worn before the government began to legislate on the subject. In larger and more progressive places, as well as in Russia proper, most of the Jews dress like their Christian neighbors, always with a tendency, among the older people, toward longer coats. The dress of Jewish women never differed much from that of other women, and any difference was more in the material used than in the form or style. Further descriptions of Jewish costumes in Russia will be found in the articles on the respective provinces and governments.

COTA, RODRIGO (also known as **Cota de Maguaque**): Spanish poet; born at Toledo; died 1497. He came of a Marano family, three members of which—Francisco Cota, Lopez Cota, and Juan Fernandez Cota—were employed by the state, and were deprived of their offices in 1450. It is uncertain whether Rodrigo was the son of Sancho Cota, the Toledo councilor.

Instead of taking the part of his former coreligionists, Cota sided with their persecutors, and in consequence was reproved by the Marano poet Anton de Montoro, who warned him that the Christians would always scorn him as a convert. The list of secret Jews who had recanted, published at Toledo in 1497, contains the entry "Rodrigo Cota el Viejo [the Elder], y el Mozo" [the Younger]. Rodrigo "the Elder" is the subject of this article. He flourished at the courts of Henry IV. and Queen Isabella, and is usually considered to have been the author of the first act of "Celestina," the earliest Spanish drama. He also composed the "Dialogo Entre el Amor y un Viejo," one of the finest Spanish poems of the fifteenth century (often printed since 1511; in Medina del Campo, 1569).

From Cota's poems, preserved in manuscript in the National Library at Madrid, a scurrilous one on his Marano relation Diego Arias Davila—who had not invited him to the marriage of his son or nephew with a relation of Cardinal D. Pedro Gonzalez de Mendoza—has been printed ("Rev. Hispanique," i. 69 *et seq.*, Paris, 1894).

Bibliography: *Cancionero de Anton de Montoro*, pp. 283 *et seq.*, 344 *et seq.*, Madrid, 1900; Kayserling, *Sephardim*, pp. 92 *et seq.*; *Rev. Hispanique*, i. 85 *et seq.*

G. M. K.

COTTBUS: Important manufacturing city of Prussia. It includes about 500 Jews in a total population of 40,000 inhabitants. Jews lived here during the fourteenth and fifteenth centuries, but were subsequently expelled. In the nineteenth century Jews resettled in Cottbus; and now (1902) have a synagogue, a B'nai B'rith lodge, a society for Jewish history and literature, a ḥebra ḳaddisha (organized 1875), a woman's society, and the Samson Armenkasse founded by Rabbi Leo Kamerase. Its first rabbi was Dr. Dienstfertig (d. 1895). The community is now under the direction of Rabbi Kamerase.

G. L. Ka.

COTTON: This word does not occur in the A. V., but express mention is made of the material in Esth. i. 6, where it is stated that in the court of the king's palace-garden were "white, green, and blue hangings." The Hebrew word here translated "green" is "karpas" (Greek, *καρπάσινα*). It should probably be rendered "cotton" (so R. V., margin) or, more accurately, "cotton muslin." It is plainly a loan-word from the Persian "karpâs" (fine linen), which itself goes back to the Sanskrit "karpâsa" (cotton). The English "cotton" is probably a loan-word from the Arabic "ḳutun," through the Spanish and French "coton."

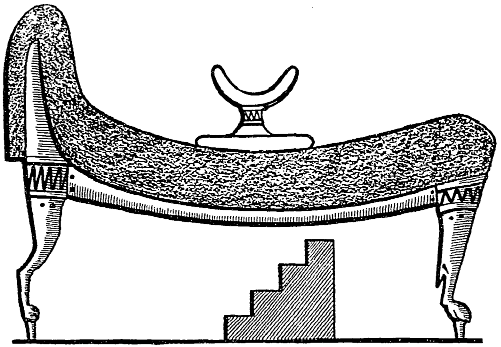
It is quite evident that cotton grew and was used for clothing in very ancient times in India. Although the nature of cotton was plainly known as early as Herodotus (iii. 106), it was the eastern conquests of Alexander that first made the Greeks, and subsequently other Western nations, acquainted with cotton fabrics. The Latins were especially familiar with it (compare Strabo, 15, § 71; Lucan, iii. 209, etc.), although "carbasus" was also applied to fine linen and cambric (see Yates, "Textrinum Antiquorum," i. 338 *et seq.*).

The cultivation of the cotton-plant (*Gossypium herbaceum*) spread from India throughout the entire East. It is now one of the most important staples of Palestine. The botanically allied cotton-shrub (*Gossypium arboreum*) probably originated in Egypt, more particularly in Abyssinia. It was formerly extensively cultivated in Lower Egypt, but was later driven out by the superior *Gossypium herbaceum*. This probably explains the fact that the Egyptians were not acquainted with cotton before the time of the Greek conquest in 333 B.C.

J. Jr. J. D. P.

COUCH: Structure on which to rest or sleep. The Hebrew term מטה, meaning "divan" as well as "bed," is synonymous with ערש (Amos iii. 12) and משכב (II Sam. xvii. 28). In olden times the Jewish bed, a plain wooden frame with feet, and a slightly raised end for the head (Gen. xlvii. 31), probably differed little from the simple Egyptian bed. The frame, covered with מרבדים (Prov. vii. 16), served as a bed for the old and sick during the day (Gen. xlvii. 31; I Sam. xix. 13 *et seq.*), while at meals people sat on it, perhaps with crossed legs (compare Ezek. xxiii. 41; I Sam. xx. 25).

Amos, who denounces the habit of reclining at table as a foreign custom (Amos iii. 12, vi. 4), speaks also of the luxury prevailing in the furnishing of these couches. The frames were made of costly cedar-wood inlaid with ivory (Amos vi. 4); the feet were plated with silver, and the backs with leaf gold (Song of Solomon, iii. 10). White pillows and bolsters were put on them, also costly rugs, purple embroidered covers, Egyptian linen, etc. (compare Amos iii. 12; Prov. vii. 16; Song of Solomon, iii. 10). Two references in the El-Amarna tablets show how early this luxury obtained in Palestine, and state that even in those ancient times couches of costly wood inlaid with gold were sent as presents from Palestine to Egypt (Schrader, "K. B." v. 27, xxvii. 20, 28). Sometimes pillows were laid on the floor. Esth. i. 6 speaks of beds upon a pavement of marble, which were covered with costly materials woven of threads of gold and silver (I Esd. iii. 6).



Egyptian Couch, Showing Head-Rest and Steps.
(After Wilkinson, "Ancient Egyptians.")

To-day the beds in the East are made by laying bolsters on the low divans which run along the walls, so that a room which serves as a parlor in the daytime is easily turned into a bedroom for eight or ten persons. In ancient Israel the wealthy often had separate bedrooms (חדר משכב, II Sam. iv. 7; compare Ex. viii. 3; II Kings vi. 17; also חדר, II Sam. xiii. 10, or חדר מטות, II Kings xi. 2; II Chron. xxii. 11), while the poor, especially the herdsmen, frequently slept out-of-doors, covered only with the "simlah," and with a stone under their heads (compare Ex. xxii. 26; Gen. xxviii. 11, xxxi. 40). See Bed.

COUDENHOVE, COUNT HEINRICH VON: Austrian author, traveler, and diplomat; born in Vienna Oct. 12, 1859. Count Heinrich studied law at the University of Vienna; served as volunteer in the Sixth Regiment of hussars; was made an officer in 1881; took the degree of doctor of philosophy in 1883; and then traveled in Syria and Egypt with the object of acquiring a knowledge of Arabic. He entered the diplomatic service in 1884, as attaché of the Austro-Hungarian embassy at Athens, and afterward at Buenos Ayres. He traveled through Paraguay and part of Brazil in order to familiarize himself with the country and people. He was transferred to Constantinople in 1887; and after making a tour through India for purposes of study (1889), traveled through the Caucasus in 1890. In 1891 he was transferred to Rio Janeiro, and from there to Japan. Since then he has devoted himself almost exclusively to study, and to the preparation of his religio-philosophical and political works.

His latest work, "Das Wesen des Antisemitismus," 1901, is an extensive volume of 526 pages, in which he brings an extraordinary knowledge of the literature of the subject to bear upon the phenomena of anti-Semitism. The author regards Zionism as a product of, and a remedy for, anti-Semitism. Though a devout Catholic, Coudenhove evidenced the highest reverence and admiration for Judaism and Jews, and predicted that the one universal religion of the future, combining Judaism, Christianity, and Mohammedanism, will be "Enochism," which he has celebrated in an allegorical poem prefacing this work.

J. N. R. L.

COUNCIL OF FOUR LANDS (Hebrew, ועד ארבע ארצות, Wa'ad Arba' Araẓot): The central body of Jewish autonomy in Poland for nearly two centuries—from the middle of the sixteenth to that of the eighteenth. The great number of the Jewish population of Poland, its importance in the industrial life of the country, and the peculiarities of the political and class organization of the Polish commonwealth ("Rzecz Pospolita") were the reasons why the Jews of Poland formed a separate class enjoying liberal autonomy within the sphere of their communal and spiritual interests, the outcome of which was their exemplary communal organization. A Jewish community, with its administrative, judicial, religious, and charitable institutions, constituted a unit of self-government. The term "ḳahal" denoted both the community and the autonomous communal administration, the two concepts being identical. The administrative functions—the assessment of state and communal taxes, the supervision of charitable institutions, etc.—of the ḳahal were performed by elective ḳahal elders ("seniores" = פרנסים); while the rabbis ("doctores Judæorum") had charge of religious and judicial affairs.

Beginnings at Lublin Fair.

The pressing need of solidarity among the ḳahals and rabbis of various localities was first realized in the judicial sphere. The rabbinical court was guided in its decisions by the norms of Talmudic legislation, both civil and domestic; but these norms often admitted of various interpretations; and the assistance of the great rabbinical assembly was necessary to clear up disputed points. Starting from the principle of self-government—the right to be tried by their own people only and not by strangers—the Jews were forced to create, in addition to the lower communal court, a higher court of appeals. This higher court was especially necessary whenever important litigations occurred between two ḳahals or between a private individual and a ḳahal. For such emergencies periodic rabbinical congresses, at certain points, were organized. In the first half of the sixteenth century these congresses were held during the great fairs, when considerable masses of people gathered in one place. The chief meeting-place was the fair at Lublin (יריד לובלין), which city was the residence of the father of Polish rabbinism, Rabbi Sheknah (d. 1558), among whose pupils was Moses Isserles. Here, even as early as the reign of Sigismund I., the rabbis used to assemble and try civil cases "in accordance with their own law." The king himself, in an edict of 1533, characterized one of their decisions in a private case as a decision of a supreme court for the Jews ("Russko-Yevreiski Archiv," i. No. 152).

The rabbis and kahal elders of the various districts of Poland and Lithuania (פרנסי המדינה ; דייני הארץ, Isserles, Responsa, Nos. 63, 64, 73, belonging to the period 1550–58) took part in the periodic sessions of the Lublin supreme court. It was here, too, that the rabbinical college investigated spiritual cases affecting all Polish Jews. Thus, for example, the rabbis and "rashe yeshibot" (rectors of Talmudic schools) of three countries (שלש מדינות)—Poland, Russia, and Lithuania—sanctioned the printing at Lublin (1559–80) of the Babylonian Talmud, with the proviso that copies of the edition be used in all the schools. This approbation ("haskamah") is printed on the title-pages of the several treatises, for general information. Here already appears the classification of the members of the Lublin congress according to the localities, three in number—namely, Poland (Great and Little, together); Lithuania, which came into closer administrative connection with the crown lands of Poland after the Lublin union of 1569; and Polish Russia; *i.e.*, Podolia, Volhynia, and Galicia.

The Number of "Lands."

These "fair congresses" formed the nucleus of the great central institution, which was firmly established during the last quarter of the sixteenth century under the designation "Council of Lands" (ועד הארצות). The ever-widening autonomy of the Polish Jews rendered imperative the founding of an institution which might serve not only as the supreme court in judicial and spiritual cases, but also as a central deliberative and legislative body to regulate the activity of all local institutions. Owing to this necessity, the Lublin Fair congresses became regular periodic sittings of the assembly of delegates, or the general congress ("Congressus Judaicus," or "Seim" [Diet], in the Polish documents). The general designation, ועד הארצות, varies in accordance with the number of provincial delegations participating in a "wa'ad" (council). In the earlier acts there is often encountered the designation ועד שלש ארצות ("Council of Three Lands") alternating with the usual designation "Council of Four Lands." During the same period occurs (comparatively rarely) the designation ועד חמש ארצות ("Council of Five Lands"); *i.e.*, of Great Poland, Little Poland, Russia, Lithuania, and Volhynia (compare Liva ben Bezalel, "Netibot 'Olam," ch. ix., Prague, 1596, where a decision of the wa'ad of 1587 is quoted). Among the leaders of the "wa'ad" up to this time (*c.* 1590) was Mordecai Jaffa, rabbi of Grodno and Posen, author of the rabbinical code "Lebushim" (see "Zemah Dawid," chronicle of 1592).

In the course of time the designation ועד ארבע ארצות ("Council of Four Lands") supplanted the others entirely, as is shown by documents of the seventeenth century. The four lands that sent their representatives to the wa'ad were Great Poland (with its capital, Posen), Little Poland (Cracow), Polish or Red Russia (Podolia, and Galicia with its capital, Lemberg), and Volhynia (capital, Ostrog or Kremenetz). Lithuania seemed to have its regular or extraordinary representative in the Polish-Jewish wa'ad until 1623, but in that year it established its own central organization (ועד מדינת ליטא), which acted independently (see LITHUANIA). In this crystallized state the Council of Four Lands is represented by writers of the middle of the seventeenth century, as, for example, Yom-Tob Lipman Heller (in his autobiography "Megillat Ebah," wherein he refers to the wa'ad of 1635) and the annalist Nathan Hannover ("Yewen Mezulah," Venice, 1653). The latter thus characterizes this institution (p. 12a):

> "The representatives [פרנסים] of the four lands had sessions twice in the year . . . at the fair in Lublin, between Purim and Passover, and at the fair in Yaroslav [Galicia] in the month of Ab or Elul. The representatives of the four lands resembled the Sanhedrin in the session chamber in the Temple of Jerusalem [לשכת הגזית]. They had jurisdiction over all the Jews of the kingdom of Poland, with power to issue injunctions and binding decisions [תקנות] and to impose penalties at their discretion. Every difficult case was submitted to them for trial. To make the task easier for themselves, the representatives of the four lands would select special judges from each land, who were called 'land-judges' [דייני מדינה], and who tried civil suits; while criminal cases, disputes over priority of possession [hazakah], and other difficult cases were tried by the representatives themselves [in full session]."

This testimony of a contemporary characterizes the flourishing period of the wa'ad's activity (*c.* 1600–1648). The record-books ("pinkeses"), wherein were written the decisions of this Jewish congress, have not been discovered, and it is doubtful whether they will ever be found; so far only seven separate sheets from the pinkes of the wa'ad in Yaroslav, of the years 1654 and 1671, have been unearthed, a facsimile of one of which accompanies this article. But in the extant manuscript pinkeses of individual kahals a great many copies of such decisions, relating to these kahals, have been preserved. Some, indeed, were published in old rabbinical works, responsa, etc., while others have been reproduced in recent times from manuscripts, in the monographs of historians of the Polish-Russian Jews. From this material, both manuscript and printed, it is possible to give a more detailed account of the organization and activity of the wa'ads.

Place of Meeting.

Organization: At first the wa'ads met annually at Lublin during the great spring fair, which began on the Catholic holiday Gromnice (Candlemas Day), in February, and lasted about a month. At the beginning of the seventeenth century another place of meeting was the Galician city of Yaroslav, where the chief fair took place toward the end of the summer. During the flourishing period of its activity the wa'ad's sessions occurred twice a year: before the Passover holiday, at Lublin, and before the autumn holidays, at Yaroslav. In exceptional cases, however, the sessions took place on other dates and (rarely) in other cities (Tishvitz, 1583; Lenczna, 1668, etc.). The fullest activity of the wa'ad was especially displayed after the catastrophe of 1648–55—the Cossack raid of CHMIELNICKI, followed by the secession of Little Russia, and the Swedish war—when the Jewish communal organization, wrecked in many parts of Poland, needed restoration.

Number of Delegates.

During the second half of the seventeenth century the sessions of the wa'ad occurred once or twice a year, and more frequently at Yaroslav than at Lublin. In 1671 the wa'ad decided to meet no longer in Yaroslav proper, on the ground that it was "a dangerous and pernicious place," but to assemble at a spot ten miles distant; subsequently this decision was rescinded. The number of delegates to the wa'ad can not be exactly ascertained. Nathan Hannover, in the above-mentioned chronicle (1653), maintains that one parnas, or representative to the wa'ad, was elected from each ḳahal, and that to these ḳahal delegates were added the six leading rabbis of Poland. It appears from the ḳahal pinkeses that only the most important ḳahals of each region sent their delegates to the wa'ad. The capitals (Posen, Cracow, Lemberg, and Ostrog) of the "four lands" each sent two or even more. The signatures of fifteen to twenty-five delegates—though often the signatures of the six rabbis only—are usually found attached to the extant decisions of the wa'ads. The total number of delegates, together with the rabbis, evidently reached thirty.

In the eighteenth century the operations of the wa'ad became more and more limited; its sessions took place less regularly, often at long intervals, and mostly at Yaroslav. One of the last important congresses was that held at Yaroslav in the fall of 1753. Among other matters considered was the famous dispute between the rabbis Emden and Eybeschütz over the Shabbethaian movement, resulting in the latter's acquittal on the charge of heresy. In 1764 the Polish Diet ordered Jewish general congresses to be discontinued (Vol. Legum, vii. 50): and in this way the activity of the Council of Four Lands came to an end. The subsequent partition of Poland among Russia, Austria, and Prussia, changing, as it did, the whole ḳahal system, was unfavorable to the existence of such central autonomous bodies as the wa'ads.

Activity: During the two centuries of the existence of the wa'ad its activity may be divided into four branches: (1) legislative; (2) administrative; (3) judicial; and (4) spiritual and cultural.

Legislative Functions.

The legislative activity of the wa'ad consisted in working out definite regulations and rules for various institutions which embodied Jewish self-government in Poland, as well as in issuing prescriptions extraordinary, called for by the exigencies of the moment. Such were the decisions of the Tishvitz wa'ad, 1583, enjoining the election of ḳahal elders and rabbis in the Jewish quarter only, without any interference from the local Christian authorities. The wa'ads of 1587, 1590, 1635, and 1640 solemnly interdicted the Jews from seeking rabbinical posts in communities by bribing ḳahals or by soliciting the Polish authorities. The wa'ads of 1671, 1677, and other years prohibited the Jews from leasing estates or farming other revenues from Poles, without the knowledge of the ḳahals in which they were enrolled; and they also ordered merchants to trade honestly with the Christians and not to engage in unlawful practises, lest they incur the wrath of the populace and the government. Most striking is the edict of the wa'ad of 1607, containing a series of detailed rules regulating the economic and religious life of the Jews. These rules dealt with credit operations, methods of charging interest, and obligations under promissory notes, while special attention was paid to the prevention of abuses under these heads on the part of creditors. This regulation was drawn up at the instance of the wa'ad by one of its participants, the Lublin rabbi Joshua Falk Kohen, and was subsequently published in "Me'irat 'Enayyim" (קונטרס הסמ"ע), Prague, 1606.

Administrative Functions.

The administrative activity of the wa'ad was very closely linked, and often identified, with its legislative activity. The wa'ad took necessary steps to better the general condition of the Jews in Poland or to avert some common danger. It sent its legal agents (שתדלנים) to Warsaw during the sessions of the Polish Seim, to represent Jewish interests before the government and the delegates. Here, by means of entreaties, money, and presents, privileges for the Jews were obtained or legislative curtailments of their ancient rights and privileges were forestalled. For such emergencies the wa'ad had a separate fund made up of special dues from each of the "four lands." Its activity was especially important at the "Coronation Diets," when, in accordance with custom, every new king was expected to confirm the rights and privileges granted to the Jews by his predecessors. On such occasions the wa'ad's representatives were on the alert lest Jewish interests should sustain damage through the influence of the anti-Jewish party of the Diet.

Nature of Edicts.

Cases are on record when the wa'ad did not succeed in averting oppressive measures against the Jews; and then, where resistance might prove dangerous, the only course left to the wa'ad was to support with its authority the measures of the government. Thus, in 1580 the wa'ad solemnly confirmed the government's edict forbidding the Jews to engage in farming state taxes and customs duties in Great and Little Poland and Mazovia. The wa'ad's edict explains its prohibition by the fact that the Jewish revenue farmers and leaseholders, in their pursuit of gain, give rise to accusations against Jews in general, and excite against them the Christian populace. In this case the "Jewish parliament" was confronted with the canonical principle, which permeated Polish legislation, that Jews must not hold offices which would give them power over Christians. The constitution of the Polish Diet held at Piotrokow in 1538 reads: "Statuimus inviolabiliter observandum, Judæos teloneis quibuscunque præfici non debere, neque posse, indignum et juri divino contrarium censentes, ejus generis homines aliquibus honoribus et officiis inter Christianos fungi debere" (Vol. Legum, i. 525). The wa'ad also saw to it that Jews should not settle in places interdicted to them. Thus, in 1669 the wa'ad confirmed the edict forbidding Jews to settle in Mazovia in the district of Warsaw. Such orders of the wa'ad were read publicly in all synagogues, with the addition of the threat of excommunication ("ḥerem") for transgressors. A whole series of orders of the wa'ad urges the cessation of internal contentions in Jewish communities; strict obedience to ḳahal discipline; and the prosecution of those who, by their reprehensible occupations, bring upon Jews the wrath of the government and of the Christian populace.

Yet, while thus remaining strictly within the limits of the existing state laws, the wa'ad was untiring in its struggle against the violation of the legal rights of the Jews on the part of local administrative and judicial institutions. Against unlawful decisions it appealed to the higher resorts: the chief tribunal, the Diet, the highest dignitaries, and the king. But the greatest energy was displayed by the wa'ad in combating false accusations against the Jews, prompted by religious fanaticism and superstition, such as the heinous charges of using Christian blood, outraging church sacraments, etc. The wa'ad also took care that the state taxes on Jews did not increase unduly, and were correctly apportioned to the four districts of Poland proper, the detailed apportionment of taxes within each province and each community being the task of minor provincial congresses (ועדי הגליל) and ḳahal boards.

Judicial Functions.

The judicial functions which the wa'ad exercised were very comprehensive. The wa'ad court was chiefly engaged in settling disputes between neighboring ḳahals concerning the boundaries of their administrative and fiscal districts. As each ḳahal district consisted of one city and the adjacent minor boroughs and villages, there often arose disputes between neighboring ḳahals as to which was to have the jurisdiction in certain border boroughs and villages, and especially over newly settled villages. The state and communal taxes being heavy, the more extensive and thickly populated the territory of a ḳahal was, the wealthier was it deemed to be; accordingly the contests over boundaries and parishes often reached quite a violent stage. The wa'ad had to try such inter-ḳahal suits, which often dragged on for decades. It was also the wa'ad's duty to delimit the local judicial circuits, to fix the grades of lower and higher rabbinical courts, and to assign the trial of a case to this or that court. In this respect the wa'ad in general, and its rabbinical board in particular, served as the highest court of appeal for all Polish Jews. The copies of the wa'ad's acts, preserved in the ḳahal pinkeses, consist mainly of such judicial decisions and prescriptions.

Cultural Activity.

The spiritual and cultural activity of the wa'ad was centered on the task of strengthening Judaism and establishing a uniform internal discipline as a means for the national unification of the Jews. Shortly after its formation (1594), the wa'ad passed a rule that all Hebrew books printed in Poland should be published only with the permission of the rabbis, who were to furnish each book with their approbation. Certain important publications were approved by the rabbis at the sittings of the wa'ad. The wa'ad also issued rules and programs for schools ("ḥadarim" and "yeshibot").

With a view to bringing up the people in a moral, religious, and national spirit, the wa'ad published fairly strict regulations. In the Lublin constitution of 1607, referred to above, the wa'ad prescribed, among other things, that the dietary laws concerning "kasher" and "ṭerefah" should be strictly observed in all communities; that a Jew should not drink wine in inns where Christians congregated, else he was to be stricken off the list of reputable members of his community and was to be ineligible for office in the ḳahal; that Jewish costumes should differ in their cut from those of the Christians, and that modesty and moderation be observed in dress, especially by women, who are always eager for sumptuous apparel; that the chastity of women, especially those living among Christians in villages, be safeguarded, etc. In the first half of the eighteenth century the wa'ad was particularly energetic in counteracting the dangerous heresy of Shabbethai Ẓebi, which spread among the Polish Jews and gave origin to the sect of Frankists, whose members openly embraced the Catholic faith (1759), owing to persecutions on the part of their coreligionists.

While thus guarding strict rabbinism, the wa'ad was evidently preparing for the struggle with the newly born Ḥasidic movement; but at that moment it had to cease its activity owing to the above-mentioned edict of the Diet of 1764, which prohibited all manner of congresses of rabbis and ḳahal elders under penalty of a fine of six thousand grivnas. The fall of the wa'ad was the beginning of the general decadence of the ḳahal system in Poland during the partition period of that kingdom.

Specimens of Enactments.

The acts and decisions of the wa'ad were usually written in rabbinic Hebrew; while acts of the proclamation type, designed to be read publicly in synagogues (כרוזים), were written in Yiddish. Below are given specimens of two minor acts, one of each kind, in the respective originals. The first is a decree of the year 1678, admitting to the wa'ad one regular delegate from the ḳahal of the city of Tiktin or Tykotzyn (from an old manuscript pinkes of that city). The second is a portion of the proclamation issued by the wa'ad at Yaroslav in 1671, on the necessity of stopping the quarrels that had arisen in the midst of the Jews of the Chelm district (from extant separate sheets of the wa'ad pinkes).

I.

We have this day granted the petition of the elders of the community of Tiktin, recorded on page ...., for representation on the Council of the Four Lands. We have acceded to their request that they be allowed to have a representative from this time forward, in the manner set forth on page ....., and again in the page for to-day.

These are the words of the Council of the Four Lands this day, Wednesday, 4 Siwan, 5438, at Lublin.

II.

האלופים הקצינים והרוזנים מנהיגי הארצות יצ"ו לאזין מודיע. מאחר דז זיך גיפונן האט דז אזו איין שערורי' אונ מחלוקת האט זיך דער וועקט אין גליל חעלם דז כמעט דאש גליל ווער אויף גיגאנגין און חלילה מזיק גיוועזין מעמד ומצב הכלל שארית ישראל און איז פרקריגט גיווארין כמה אלפים אזו האבין רוזני ד"א יצ"ו דיא זאך פר זיך גינומן און האבן גישטראפט דיא לייט דיא דאש האבין אן גיהובן און דיא דא האבן איין חלק דראן גיהט וועלכי דז מען ניט וויל פירט זיין מפני הכבוד. ומאחר דז זיך זילכי זכין דרוועקן אין קהלות דז לייט מכן קנוניות וקשרים בעו"ה די־ניט זיין דרהורט גיווארין און זיין עובר אויף הרמות קדמונים און זיין מהריב דיא קהלות, און איבר זילכי מעשים קאן מען ניט יוצא זיין ידי חובות כרגא דמלכא און קהלות וגלילות שולדיגין זיך דריבר ביא פריצים און גלחת וואש אייטל סכנת נפשות איז . . . אזו גיבן ראשי רוזני קציני מנהיגי ד"א יצ"ו רשות ומקל ורצועה לראשי הגלילות ולראשי הקהלות דז זיא זאלין רודף זיין זילכי לייט און שטראפין מיט חרפות (הרמות?) און קנסות ותפיסות אפילו בדיני גוים און אל דיא הוצאות זאלין זיין מכים קישרי קשרים . . . און די זעלביגן לייט זאלין כל ימיהם קיין התמנות האבין אין אירי קהלה או גליל און קיין חזקה . . . מאחר דז זי ניט האבין רחמנות אויף זיך זעלבשט און איבר דער קהלה אדר גליל און אויף דעם כלל . . . און זיא גידענקין ניט דז מיר זיין שפל און מאוס ומיאוס בעיני האומות. מכין זילכי לייט נאך גאר דז מיר בעו"ה זיין שפל ונבזה. אז ידוע איז דז שרים רבים רידן פון זילכי זכין . . . ע"כ זאל איטלכר משים על לב זיין ניט צו גיין אין זילכי דרכים רעים וילכו בדרך טובים. און דער כרוז איז איין גישריבן גיווארין בפנקס דד"א יצ"ו בתוקף פס"ד גמור.

[TRANSLATION.]

II.

The Council of the Four Lands report that a violent quarrel having arisen which almost ruined the whole district and—which God forbid!—might have harmed the remnant of Israel and involved the loss of thousands, the Council of the Four Lands took upon themselves the task of punishing those who initiated the quarrel or subsequently participated in it, whose names, out of respect for their position, are withheld.

And since, when similar events occur in communities, and persons intrigue and violate the ancient ordinances, and ruin the communities, reports of these things arouse the government, and communities and districts are considered guilty by the nobles and priests, and there is real danger to life, . . . the Council of the Four Lands hereby fully authorize the leaders of communities and districts to prosecute persons so intriguing and offending, and to punish them with the ban, with fines, or with imprisonment . . . at the cost of the offenders. . . . Such persons should never be nominated to any office in any community or district, nor should they have the right of ḥazakah, . . . since they have no pity on themselves, on the community or district, or on the whole of Israel. . . . They ignore the fact that we are already humiliated and abject in the eyes of the Christians—so much so that the authorities speak contemptuously of us—and make us still more so. . . . Let every one, therefore, take care to avoid such wrong courses and to walk circumspectly.

This notice has been inscribed in the pinḳes of the Four Lands.

The second specimen here given is an authentic reproduction of a sheet of the pinḳes of the Council of Four Lands. The original document contains the decision (mentioned above) of the council at Yaroslav, Sept., 1671, to the effect that thereafter the sessions be held, not in Yaroslav proper, which repeatedly proved "a dangerous and pernicious place," but ten miles away, the final decision as to the location of future congresses being postponed till the ensuing Gromnice (Candlemas) congress; *i.e.*, the spring fair at Lublin. Then follow fourteen signatures of delegates to the wa'ad, from Cracow, Posen, Lemberg, Lublin, Ladmur, Przemysl, etc. The authenticity of the signatures is made clear by the dissimilarity in the handwriting, which proves the document to be original and not a copy. It is taken from the few extant sheets of an old pinḳes of the wa'ad of the "four lands," which sheets were found in the city of Dubno, and are now in the possession of S. M. Dubnow of Odessa.

Bibliography: Manuscript Sources: fragments of an original pinḳes of the Council of Four Lands (seven sheets), containing acts of 1654-71; decisions of the wa'ad, copied in the ḳahal pinḳes of the city of Tykotzyn (28 documents of 1621-1700); the pinḳes of the ḳahal-rabbinical congresses in Lithuania during the years 1623-1761, and various other pinḳeses preserved in the archives of societies and private persons. Printed Sources: *Ḳonteres ha-Sema'*, Sulzbach, 1692; N. Hannover, *Yewen Meẓulah*, Venice, 1653; L. Heller, *Megillat Ebah*, Breslau, 1818; rabbinical books of the seventeenth and eighteenth centuries, particularly responsa, wherein various decisions of the wa'ad, or references to them, occur; Grätz, *Gesch.* 3d ed., ix. 450-452, 573-579; A. H. R. S. M. D.

COUNCIL OF JEWISH WOMEN: An organization which came into being as a result of the Congress of Jewish Women, one of the denominational congresses of the World's Parliament of Religions held at the Columbian Exposition in Chicago in 1893. It was organized in response to the appeal of Sadie American, and in pursuance of the following resolution offered by her at the final session of the congress:

> "*Resolved*, That we, Jewish women, sincerely believing that a closer fellowship will be encouraged, a closer unity of thought, sympathy, and purpose, and a nobler accomplishment will result, from a wide-spread organization, do therefore band ourselves together in a union of workers to further the best and highest interests of Judaism and humanity, and do call ourselves the 'National Council of Jewish Women,' whose work shall be:
>
> "(1) To seek to unite in a closer relation women interested in the work of religion, philanthropy, and education, and to consider practical means of solving problems in these fields.
>
> "(2) To organize and encourage the study of the underlying principles of Judaism, the history, literature, and customs of the Jews, and their bearings on our own and the world's history.
>
> "(3) To apply knowledge gained in the study and improvement of the Sabbath-school and in the work of social reform.
>
> "(4) To secure the interest and aid of influential persons in arousing general sentiment against religious persecution, whenever, wherever, and against whomsoever shown, and in finding means to prevent such persecution."

Hannah G. Solomon and Sadie American, respectively chairman and secretary of the congress, were elected president and secretary of the council, and have continued to hold these offices. In Jan., 1894, a circular was issued, setting forth the need, desirability, and objects of the National Council of Jewish Women, together with a provisional constitution, which called for a delegate convention to be held in 1896, when a permanent constitution would be adopted. This meeting took place in New York city in Nov., 1896, by which time 50 sections had been organized; it was attended by 83 delegates and alternates from 31 sections. The word "National," which, as originally employed in the name of the organization, referred only to the United States, was dropped on account of the entrance of two sections formed in Canada; and the title became "The Council of Jewish Women."

The objects of the council, as defined in the constitution finally adopted, are: "To further united efforts in behalf of Judaism by supplying means of study; by an organic union to bring about closer relations among Jewish women; to furnish a medium

for interchange of thought and a means of communication and of prosecuting work of common interest; to further united efforts in the work of social betterment through religion, philanthropy, and education."

The constitution provides for a continuous board of directors, who, with the general officers, form the executive committee, which has full charge of the affairs of the organization, and for five committees—to wit: on religion, religious school work, philanthropy, reciprocity, and junior sections—who respectively arrange the plan of work. There is no individual membership in the council, but membership through its branches, which are called "sections," and are organized (one only in each city) on the plan of the general society. Meetings with two delegates from each section are held triennially, and executive sessions annually. Junior sections have been formed with a membership of both sexes, between the ages of fifteen and twenty-one; these are under the guidance of the senior section in so far as three members of the latter sit on the executive committee.

The council "seeks to give its utterances no color of orthodoxy or reform." It is not propagandist, and stands for no particular phase of Judaism. Recognizing the existence of differences of belief and observance, and "seeking only to square conviction and conduct," but leaving each free to follow her own bent, it has united the Jewish women in a strong and unique organization. The council carries out its objects in meetings, conferences, study circles, lectures by specialists, and its various philanthropies, which can, perhaps, be measured and numbered: its significant and important results, however, can be neither measured nor stated in exact terms.

Born of the two tendencies of the time—the growing self-consciousness of the Jew and the tendency of women to unite in associations for self-development and preparation for the new responsibilities which modern life is thrusting on them—the council is becoming the center of religious and intellectual activity of the Jewish women, and the means of throwing them into the active life and work of the community at large. It is the policy of the council to cooperate and affiliate with the organized forces at work for progress and social betterment, both Jewish and non-Jewish. It is a member of the National Council of Women of the United States, and of the International Council of Women of the World. The visit of Sadie American, as delegate to the quinquennial of the International Council of Women, held in London in June, 1899, resulted, through a presentation of the work before a representative body of London Jews and Jewesses, in the formation of the Jewish Study Society of England, which is organized on the plan of the council; and between this society and the council there is close affiliation, as well as an exchange of pamphlets, plans of work, etc.

The sections are members of the city, county, and state federations of women's clubs, and are actively cooperative in all work for the public welfare. During the Spanish-American war the council within one week set its sections to work in aid of the soldiers and sailors, and in several places was the first organized body to take any steps for their relief. It raised ten thousand dollars in money, an equal amount in goods, and a nurse was sent to the army; the members were, during the continuance of the war, among the most active workers in the service of relief. It cooperated with the National Red Cross Society, the regimental auxiliaries, and the various state organizations. Through the influence of the council, 72 women have been placed on Sabbath-school boards of congregations; interest in the schools has been greatly increased thereby, and, what is of signal importance, the age of confirmation, in a number of communities, has been raised. It maintains fifteen mission schools.

The philanthropies of the council, numbering 85, are supported by voluntary subscription, and include settlements, clubs, libraries, free baths, night-schools, manual-training classes, household-schools, employment bureaus, penny provident funds, classes for crippled children, ice funds for consumptives, recreation-rooms, and gymnasiums. The following meetings have been held: first triennial, New York, Nov., 1896; Omaha Exposition, Oct., 1896; Chautauqua summer assembly, July, 1897, 1898; second triennial, Cleveland, March, 1900; first annual executive, New Orleans, La., Feb., 1901; third triennial, Baltimore, Md., Dec., 1902. The present officers, elected in 1900, are: president, Hannah G. Solomon; first vice-president (resigned); second vice-president, Babette Mandel, Chicago, Ill.; recording secretary, Gertrude Berg, Philadelphia, Pa.; corresponding secretary, Sadie American, New York city; treasurer, Bertha A. Selz, Chicago, Ill. It has (Nov., 1902) 7,000 members, in 70 sections; 15 junior sections, with 500 members; 89 study circles in religion, and 12 in philanthropy.

A.

COURAGE: That quality which enables one to encounter danger and difficulties with firmness, calmness, and intrepidity; Hebrew, חזק ונתחזק ("Be of good courage," II Sam. x. 12), or חזק ואמץ ("Be strong and of a good courage," Deut. xxxi. 7, 23; Joshua i. 6).

Physical courage, the result of man's struggle against conditions that threaten his very existence, and which often develops boldness, fearlessness, and an utter disregard of physical pain, is extolled by the Hebrews as a valued possession (compare Judges viii. 21; Eccl. x. 17; I Kings xvi. 27; II Kings xviii. 20; Micah iii. 8). Often the victor was made a popular idol. "Saul has slain his thousands, and David his ten thousands" (I Sam. xviii. 7), the women of Israel sang when David returned from a campaign against the Philistines. The angel of the Lord says to Gideon: "The Lord is with thee, thou mighty man of valor" (Judges vi. 12).

The examples of courage found mentioned in the records of ancient Israel are numerous. The undaunted valor of Barak, of Gideon, and of Jephthah; the fearlessness of Samson, of Saul, and of David, are eloquent testimonies of physical courage. But the Bible sets more value upon moral courage, which is so prominent in the life-history of

Biblical Examples of Courage.

the Jew, and which goes far to explain the power of resistance that he has shown at all times against those who made plans for his destruction. This courage is fostered by confidence and trust in God. "Hope in the Lord, be strong, keep thy heart steadfast, yea, hope thou in the Lord" (Ps. xxvii. 14, Hebr.); "But they that wait upon the Lord shall renew their strength" (Isa. xl. 31); "Through God we shall do valiantly" (Ps. lx. 14; compare Num. xxiv. 18; Ps. xxxi. 25; Prov. iii. 23–26); "Fear thou not; for I am with thee. . . . I will strengthen thee" (Isa. xli. 10); "Yet now be strong O Zerubbabel . . . and be strong, O Joshua . . . and be strong, all ye people . . . for I am with you, saith the Lord of hosts" (Hag. ii. 4; compare Zech. viii. 9, "Let your hands be strong, ye that hear").

In Post-Biblical Times.

In post-Biblical times the Jew displayed both physical and moral courage while standing for truth and right against a hostile world. He would face the obloquy of centuries to support a principle which, though unpopular, he believed to be true. "Strive for the truth unto death; and the Lord shall fight for thee" (Ecclus. [Sirach] iv. 28; compare *ib.* iv. 9, ii. 12; Baruch iii. 14). "In a place where there are no men, endeavor thou to be a man" (Ab. ii. 6b). Crushed to earth, defeated, driven from his native soil, pining in dungeons, made to furnish murderous sport for the wild beasts of the Colosseum and food for the flames of pyres and stakes, he still refused to surrender; struggling against terrible odds for national and political independence, for liberty of conscience, and for the rights of man.

The Martyrs.

Nothing stirred the Jew to resistance so much as interference with his religious belief and practises; for the abandonment of the Law was deemed the most heinous of crimes. Men had fought at all times for house and hearth; but to fight for one's religion was new. The plan of Antiochus Epiphanes to uproot the religion of Judea met with stubborn resistance. "God forbid," says Mattathias, the aged priest of Modin, "that we should forsake the law and the ordinances. We will not harken to the king's word to go from our religion, either on the right hand or the left" (I Macc. ii. 21, 22). Eleazar, one of the scribes, chose rather to die the glorious death of a martyr than to be faithless to his religion. "But when he [Eleazar] was ready to die . . . he groaned, and said, It is manifest unto the Lord . . . that . . . whereas I might have been delivered from death, I now endure sore pains in body . . . but in soul am well content to suffer. . . . And thus this man died, leaving his death for an example of a noble courage . . ." (II Macc. vi. 30, 31). Seven brothers, who were seized by the minions of Antiochus and scourged, to compel them publicly to abjure their faith by eating forbidden food, refuse to do so, and suffer the penalty of most cruel deaths. One of them voices the sentiment of all when he exclaims, "We are ready to die rather than to transgress the laws of our fathers" (*ib.* vii. 2; compare *ib.* xiv. 18). Though the seven were tortured in the presence of their mother, the awful sight did not weaken her resolution to endure a similar fate. "But the mother was marvelous above all, and worth of honorable memory: for when she saw her seven sons slain within the space of one day, she bore it with a good courage, because of the hope she had in the Lord" (*ib.* vii. 20). Even the king, and those who were with him to witness the torture of the seven brothers, marveled at their remarkable courage (*ib.* vii. 12; IV Macc. viii. 9).

Later, in the desperate life-struggle of the Jews against the trained legions of mighty Rome, which ended in the overthrow of the Jewish state and the loss of Jewish independence (70 C.E.), the heroism and self-sacrifice of the Jews were such as to elicit the admiration of all time. Josephus extols the courage of his fellow believers in facing death for the sake of the Law. "I do not mean such an easy death as happens in battles, but that which comes with bodily torments and seems to be the severest kind of death" ("Contra Ap." ii. 33).

Under Hadrian.

Later, under Hadrian (117–138), the Jews were goaded by edicts of violence and oppression into open revolt. With a desperate but ill-fated heroism the Jews under Bar Kokba made a last effort to regain their freedom. Rabbi Akiba, one of the ten martyrs, on the pyre praised his fate that it was now his good fortune to fulfil the Law: "Thou shalt love the Lord with all thy soul" (Deut. vi. 5); explaining that "with all thy soul" means "even by giving up one's life" (Ber. 61b).

Especially rich in deeds of martyrdom is the history of the Jews during the Middle Ages. Hated and despised, pelted and jeered at, burned and tortured, they nevertheless remained true to their ancestral faith. Moral cowardice was unknown to the Jew of the Middle Ages. During the reign of Richard I. Cœur de Lion the Jews of York were persecuted by their Christian townsmen, who were incited to rapine and robbery by the Crusaders. The Jews sought shelter in the castle, where they were besieged for several days. Spurning the thought of embracing Christianity in order to be free, the men, after slaying their wives and children to prevent them from falling into the hands of their enemies, killed themselves (1190). The expulsion of the Jews from Spain (1492) furnishes a most glorious lesson of moral heroism among the Jews. Those who had risen to opulence and to positions of honor and trust in Spain willingly gave up all they had achieved rather than go to the baptismal font. The heroic efforts on the part of Gabriel Riesser and others (1815) in behalf of the emancipation of the Jews in Prussia; Johann Jacoby's protest against the edict of Frederick William III. curtailing certain privileges of the Jews; and the heroism of the Reform pioneers, one of whom, Abraham Kohn, rabbi of Hohenems, was poisoned (1848) because of his advocacy of reforms within Judaism, give sufficient proof of the moral courage of the Jews in modern times. The persecutions within the last twenty years of Hebrews in Russia and Rumania have given rise to many exhibitions of courage in the Jew, who has left the land that cradled him and has become a friendless wanderer rather than forsake what he believes to be the highest truth. The heroism of DREYFUS, the French captain, has thrilled the whole civilized world.

COURLAND: A government in the Baltic provinces of Russia, bounded on the west and north by the Baltic Sea; on the northeast by the River Düna; and on the south by the government of Kovno. At the end of the eighteenth century the Jewish population was 9,000; in 1835, 23,030; in 1850, 22,743; in 1858, 25,641; in 1891, 42,776; and in 1897, 49,102 in a total population of 672,634 = 7.3 per cent. The Jews are distributed among the cities and towns of Courland as follows: Bausk, 3,000; Friedrichstadt, 3,800; Goldingen, 3,000; Grobin, 450; Hasenpot, 1,600; Jacobstadt, 2,400; Libau, 10,860; Mitau, 5,000; Pilten, 800; Talsen, 1,500; Tuckum, 2,500; Windau, 1,350; Griva-Semgallen, 3,240; Illuxt, 812; Polangen, 900; Sasmaken, 1,600; Frauenburg, 1,048; Zabeln, 830; and in the villages Kandau, Neu-Subbat, Schönberg, etc., 5,242.

Early History.

In the thirteenth century Courland was an independent territory, consisting of the two duchies of Courland and Semgall and of the bishopric of Pilten, and was under the domination of the Livonian Order of the Knights of the Sword. The Livonian Knights offered little encouragement to the settlement of Jews in Courland, as is shown by the following extract from a decree of their grand master Zeyfridt (Siegfried) von Feuchtwangen (1309): "For the glory of God and the honor of the Virgin Mary, whose servants we are, we decree . . . that no Jew, necromancer, magician, or waydeler [pagan priest] shall live in this country; and that any one sheltering one of such shall suffer with him . . ." (Jolowicz, "Gesch. der Juden in Königsberg i. Pr." 1867, p. 1).

Notwithstanding this decree, the Jews toward the end of the fourteenth century found their way into the country from Lithuania, as is intimated in the chronicles (Hennenberg, cited by Jolowicz, *l.c.* p. 2). At that time Vitold, Grand Duke of Lithuania, had already granted to the Jews of the neighboring Lithuanian towns the privileges of June 24 and July 2, 1388. Two gravestones were excavated in the vicinity of Mitau in 1857 which, it has been claimed, go to show that Jews had lived in that country even earlier than 1388; but the claim is hardly well founded, as there is a possibility that Firkovitch, who was consulted in the matter, was guilty of deception (see Wunderbar, in "Allg. Zeit. des Jud." 1857, No. 1).

Under Polish Rule.

When Courland came into the possession of Poland, according to the treaty between the last grand master of the Order, Gotthard Kettler, and King Sigismund Augustus (Sept., 1561), it was stipulated that no Jews should be permitted to engage in commerce or to lease customs duties or taxes in Livonia ("Pacta Subjectionis," in "Codex Diplomat. Regni Polon." V. cxxxviii. 238; Moraczewski, "Dzieje Rzeczypospolitej Polskiej," iv. 231). The treaty of 1561 did not, however, forbid the Jews to settle in Courland or to sojourn there temporarily for any particular commercial transaction. It was without any effect whatever in the bishopric of Pilten, where the Jews had not only been tolerated from the earliest time of the Order, but were permitted by law to organize communities and to engage in trade and commerce.

The district of Pilten contained the present districts of Grobin, Hasenpot, and a part of Windau.

Pilten.

The last Bishop of Courland, Johann von Münchhausen, who owned the bishopric of Pilten by inheritance, induced rich Jews to settle in his territory, and he derived "considerable income by taxing them for the right of residence and the privilege of engaging in trade."

As early as 1570 the Jews of Pilten enjoyed the rights of citizenship, and many of them owned real estate (Wunderbar, *l.c.* p. 17). When, in 1611, Pilten became part of Poland the position of the Jews became still stronger. As throughout Poland, the Jews of that district not only enjoyed all civil and religious rights, but also were made citizens of Hasenpot—a rare privilege at that time for Jews. Of the history of the Jews in this district during the seventeenth century there is but scanty information. The archives of Pilten have not yet been published, and the only complete history of the city of Hasenpot, written by Huhn, lies hidden in manuscript in the Rittenbibliothek at Riga. It is known, however, that during the great northern war (1718) a synagogue existed in Pilten (Manteuffel, "Piltyni Archivum Piltynskie," in "Warszawska Biblioteka," No. 2, p. 177; cited by Brutzkus, in "Voskhod," 1896, Nos. 7–8, p. 26). During the eighteenth century Pilten lost its importance.

The greatest number of Courland Jews lived in Hasenpot, where they carried on a considerable export trade; but at the last division of Poland, toward the end of the eighteenth century, only 896 males among the Jewish inhabitants were registered as citizens. They enjoyed all civil rights, and were often chosen to fill honorable positions. Thus in 1797 the Jew Euchel of Hasenpot was elected councilman ("Rathsherr"). Jewish affairs were governed by a ḳahal; and the Jews paid a special tax on their synagogue, which tax was called "Jüdische Capellengelder."

Hasenpot and Polangen.

The oldest community in the district of Pilten is that of Polangen, which formerly belonged to the grand duchy of Lithuania. In the "pinḳes" (record of the Jewish community) of that town, begun in 1831, there is an entry on the first page which states that, according to the preceding pinḳes, which had been destroyed by fire during the Polish Revolution, the cemetery and the burial brotherhood of Polangen were established in 1487 (רמ"ז), though doubts have been expressed as to the correctness of this date. The Jewish community of Polangen obtained a charter confirming that of King Stanislaus IV. (dated 1639), granting the Jews of Polangen and Gorzhd the rights of citizenship and the privilege of engaging in commerce, handicrafts, and agriculture. The Jewish houses of prayer and the cemetery were exempted from all taxes. The Jews were under the jurisdiction of the royal aldermen, with the right of appeal to the supreme court and to the king. This privilege was subsequently confirmed by Augustus III. (1742), and remained in effect until the annexation of Courland by Russia (1795), when the whole district of Zhmuda, in which Polangen was situated, was added to the government of Courland (Brutzkus, *l.c.* p. 29).

Other Parts of Courland.

In the other parts of Courland, including Semgall, the condition of the Jews was not so favorable. Notwithstanding the fact that the Duke of Courland was a vassal of Poland, and was not able to prevent entirely the influential Polish Jews from visiting his dependency, their sojourn there was made unpleasant and difficult at all times, especially after 1561. The cities jealously guarded their privileges not only from the Jews, but from all foreigners. Nevertheless, Jews managed to settle in Courland both before and after the subjection of the country by Poland, as is evident from some well-preserved gravestones with Hebrew inscriptions at Mitau and other places, dating from the first and last decades of the sixteenth century. During the uprising of the Cossacks in 1648–54 the people of Courland also expelled the Jews from their country. The barons Hector Frederick and Reinhold von der Osten-Sacken, when they founded on their estate the town of Neu-Subbat, inserted a paragraph in its constitution (April 5, 1686) forbidding Jews to live in the town or to establish a tavern there.

According to Ziegenhorn, no Jews lived in Courland, except at Pilten, from its subjugation by Poland up to about 1670 ("Staatsrecht," § 576). Toward the end of the seventeenth century Jews again began to settle in Courland: they even leased the customs duties and engaged in commerce. Although these privileges were soon curtailed ("Landtäglicher Abschied," 1692, § 6; 1699, § 29), the Jews were permitted to live both in the towns and in the country, and to do business as retail traders, innkeepers, distillers, and middlemen. In Mitau, the capital of Courland, they could live only in the so-called Jewish street (now known as "Doblen'sche Strasse") as protected Jews ("Schutzjuden"). On the remonstrance of the burgesses, the dukes repeatedly ordered the Jews to leave the country; but the nobility, to whom they made themselves useful, protected them until Duke Ferdinand published an edict, March 23, 1714, in which the Jews were ordered to leave the country within six weeks, under pain of the severest penalties. This edict was evidently not carried out, for on Sept. 20, 1760, Duke Karl repeated it in the same form. Soon afterward the magistrate, notwithstanding the duke's edict, permitted Jews as well as Jesuits to reside in Courland on the payment of 400 Albertus thaler annually; and the duke did not object to their admission (Gebhardi, "Gesch. von Kurland," p. 166, Halle, 1789). In 1737 Duke Ernst Biron entrusted the court Jew Lipman (Levi) with the management of his finances, dividing the profits with him, and granting him certain privileges. This naturally created ill feeling against the Jews (Ersch and Gruber, "Encyc." section i. part 10, p. 247).

At this period Jewish communities existed in Mitau, Bausk, Jacobstadt, Friedrichstadt, and other towns. Friedrichstadt was a station for the Jewish merchants of White Russia, who came down the Düna annually in barges and on rafts, bringing lumber, grain, flax, and other Russian merchandise to Riga. The edict of Empress Elizabeth (1742) expelling the Jews from Russia interfered considerably with this business. The council of Riga, fearing that the Jewish merchants might direct their trade to Windau, Libau, and Königsberg, petitioned the Senate in the matter, and, pending the resolution of the Senate, the vice-governor of Livonia stopped the Jewish traders in Friedrichstadt.

In 1760 the Jews of Courland, as already stated, were again expelled from the duchy. In order to prevent evasions on the part of the Jews, an order was issued that all foreign Jews having permission to bring Polish-Lithuanian merchandise to Mitau should present themselves to the mayor and obtain from him a special permit to remain in the city for the transaction of business, and that none should be permitted under any circumstances to stay longer than a day or two on any one occasion. Those who brought no merchandise had to pay a "sechser" on each visit. These Jews had to stay at a special lodging-house designated by the city authorities. In some places the execution of the order had already been carried out when, fortunately for the Jews, the emperor Peter III. of Russia recalled from banishment Duke Ernst Biron, and with his reinstatement the Jews regained their old liberties and even secured some new privileges. These liberties and privileges were not, however, legally recognized, as is seen from petitions of the Jews made to Duke Ernst Biron in 1765, and to his son and successor, Peter Biron, in 1775.

In 1770 the Russian government interfered in the solution of the Jewish question in Courland. Governor-General Browne of Livonia asked the Duke of Courland to expel the Jews from his possessions (Orshanski, "Russkoe Zakonodatelstvo o Yevreyakh," p. 374, St. Petersburg, 1877); but the plan could not be carried out on account of the opposition of the Courland nobility. Empress Catherine II., desiring to settle "New Russia," gave a secret order to Governor Browne (1765) to issue passports to Jewish inhabitants of Mitau who would travel to this territory, her purpose being to admit some of the Jews of Courland to settle in Riga and St. Petersburg (Buchholtz, pp. 57–60). By a later order (1785) Catherine again showed her favor to the Courland Jews by detaching the village of Schlock from Courland and annexing it to Riga, thus permitting the Jewish residents of Schlock to become recognized inhabitants of Riga (Wunderbar, *l.c.* p. 9).

Concerning the origin of the Jews of Courland opinions differ. Some think that the majority arrived by sea from Prussia and North Germany; and the biographies of rabbis and other prominent men enumerated below show that most of these were born abroad. Nevertheless, Brutzkus may be right in his statement that the greater part of the Courland Jews immigrated from the neighboring countries of Lithuania and Poland.

In spite of occasional disturbances, the life of the Jews in the duchy of Courland was a peaceful one, and they were permitted to trade outside the city limits of Mitau, the capital. Even in the center of the city a Jew, Meyer Kreslawe, received a license to open an inn, which was called "Hotel de Jerusalem" (the house still existed in the middle of the nineteenth century); and in 1784 Kalman Borkum laid the foundation-stone of a synagogue, which was built at his expense. Borkum, his brother Samson, and the court jeweler Rabbi Bär ben ha-Ḳadosh Rabbi Benjamin stood high in favor with the duke Biron. They were thus often enabled to afford protection to their coreligionists in Courland, and to those in Mitau in particular; and in addition extended them much financial and other assistance.

Kalman Borkum.

The year 1787 was especially marked by discussions of the Jewish question in Courland, not only officially but also in various pamphlets devoted to the subject. Of these latter the first appeared anonymously and without date under the title "Die Duldung der Juden," etc. (The Toleration of the Jews in the Duchies of Courland and Semgall), but Witte von Wittenheim, councilor of justice, was later identified as its author (Recke and Napierski, "Schriftsteller Lexikon," iv. 554). He advocated the opinion that the Jews should be tolerated under conditions conducive to the welfare of the country and of the respective towns in which they might settle. He further recommended that they be allowed to have their own schools, houses of prayer, synagogues, cemeteries, and courts for the settlement of internal disputes, and expected an improvement in their religious and judicial affairs to be manifest before another generation should have passed. In case the Jews should not be able to maintain their own schools, they should be permitted to send their children to the Christian schools, where they might acquire a knowledge of German and other necessary subjects. The higher schools should also be open to them. Wittenheim was in favor of limiting the occupations of the Jews; he would permit them to engage only in handicrafts, petty trading, and distilling, which were the main occupations of the Jews of Courland at that time.

Another pamphlet appeared the same year under the title "Bemerkungen über die Duldung der Juden" (Mitau, 1787). The author, supposed to be Christian David Braun (Recke and Napierski, "Schriftsteller-Lexikon"), was very much opposed to the idea of giving the Jews, "the despisers of the Christian religion," any social or political rights. This pamphlet called forth a reply under the title "Beantwortung der Bemerkungen über die Duldung der Juden," refuting the statements of Braun. The author was Dr. Lachman, a Jewish physician born in Prussia, who practised medicine in Bausk, and later removed to the interior of Russia. He showed that the Jews were useful citizens, occupying themselves with agriculture in Lithuania, and engaging in the arts and sciences, and in handicrafts wherever they were not hampered in their activity by the gilds.

About this time there appeared, under the title "Meine Gedanken, bei der Frage: Ob Man in Unserm Vaterlande Juden Dulden Solle, oder Nicht?" a most touching apology for the Jews. The author, Georg Gottfried Mylich, a Lutheran pastor at Nerft, looks at his subject not only from a utilitarian standpoint, but also from an ethical point of view. "Our honor and our Christian duty demand," he says, "that we should not look with indifference on the deplorable condition of the Jews of Courland and that we should no longer tolerate it. As patriots we must concentrate all our energy on the improvement of the present state of affairs. Indeed, the word 'Jew' should not indicate any class of people different from us, but only a different religious body; and as regards their nationality, it should not hinder them from obtaining citizens' rights and liberties any more than the people of Sleswick, the Saxons, Danes, Swedes, Swiss, French, or Italians who also live among us." On the other hand, the author appeals earnestly to the Jews to lay aside their specific costume and to follow the example of their more enlightened brethren.

These extracts indicate the attitude of the educated classes of Courland toward the Jews. The influence of the activity of Lessing, Mendelssohn, and Dohm had already reached the duchy. Though the broad-minded people in Courland were in a great minority, they nevertheless forced the lords and burgesses to discard their medieval intolerant views. After many long debates in the various Diets concerning the emancipation of the Jews of Courland, the Jews of Mitau through their aldermen, Aaron Lipman (Levi) and Isaac Moses Eides, presented a memorial to the duke March 13, 1793, in reply to which they were directed to submit propositions on the subject.

Accordingly on Jan. 20, 1795, propositions were presented in which they asked only: (1) Admission to the towns, villages, and estates in proportion to the number of inhabitants and industries, so that the Jewish families should not become a burden on the general population. (2) Reduction of the number of Jewish families in Mitau from 200 to 60, to be selected from among those whose ancestors had lived in Mitau, and who were known to be persons of irreproachable character; they would certainly become more useful citizens on obtaining equal rights with the other inhabitants. (3) The right of the community to settle all disputes concerning religion and unimportant civil matters among the Jews without recourse to the general courts—a right similar to that enjoyed by the ḳahal of Hasenpot; the ḳahal, however, to have the authority to appeal to the magistrates whenever necessary. (4) Permission for Jewish children to attend the public schools and the local academy.

In this memorial the Jews of Courland for the first time called themselves "Hebrews," by which name they have been designated up to the present day in the official documents of Russia and the Baltic provinces. The memorial was signed on behalf of the community by Isaac Judah, Solomon Borkum, Isaac Moses Eides, Isaac Moses, Wulf Jacob, Elijah Isaac, Lewin Wulf, Heimann Solomon, Aaron Lipman (Levi), and others.

While the duke and the Landtag were still discussing the Jewish question, the Polish Revolution broke out, so that nothing further could be done in the matter. Such was the uncertain legal position in which the Jews found themselves when Courland was annexed to Russia, March 16, 1797. Emperor Paul, during his visit to Mitau in the same year, received a deputation from the Jewish community. The government ordered an investigation of the occupations of the Jews, of the taxes paid by them, and of their legal status. The Courland authorities replied that the Jews had "never been legally tolerated—with the exception of those who live in the district of Pilten." In presenting the case to the emperor Paul, the Senate declared:

"Although the Courland administration reports that the Jews have never been tolerated legally, yet, since Jews have lived there for more than 200 years, they can not be considered as having entered the country surreptitiously; nor ought they to be deprived of such an old home while Jews are not prohibited from living in other parts of Russia." The Senate therefore ordered the Courland authorities, having in view the local conditions, to present a scheme of legislation for the further residence of Jews in Courland, "for the general welfare as well as for their own." At the same time the Jews addressed a petition to the senate in which they asked: (1) That they be permitted to organize ḳahals for the maintenance of Jewish communal life. (2) That Jews who join the gilds be granted all the rights of such gilds. (3) That agriculturists receive land at an annual rental, and be not claimed by any one as serfs. (4) That Jews be permitted to build synagogues; to conduct their religious services in the towns as well as in the villages; and to have their cemeteries and slaughter-houses. (5) That wherever there are no Jewish schools, permission be accorded the Jews to send their children to the German schools; and that the talented Jewish pupils be allowed to attend foreign academies and universities.

After considering this petition the Russian government resolved that the Jews be permitted to live in Courland, and that their settlement in that country be used for the benefit of the government and community at large. Jews were permitted to follow their various callings and to be included in the lists of the burghers and merchants, on payment of double the amount of the tax imposed on Christians. They were declared eligible for election to municipal offices; were allowed to conduct their religious services without hindrance, to organize ḳahals, to build synagogues, etc.; and were granted immunity from being bound as serfs. The approval of Emperor Paul was given to the foregoing resolutions March 14, 1799 ("Complete Russian Code," xxv., No. 18, 889).

During the reign of Alexander I. (1801–25) the condition of the Jews of Courland, as well as that of the Jews in the other cities of the Russian empire, was much improved. The enactment of Dec. 9, 1804, and the resolutions passed thereupon by the Courland legislature (March 6, 1806; affirmed Dec. 1, 1806), practically secured the rights of citizenship for the Jews of that government, and by a ukase of Nov. 8, 1807, the double poll- and gild-taxes hitherto levied on the Jews were abolished.

This was the legal position of the Jews of Courland until 1829; but the rights granted to them in 1799 in respect to trade and commerce did not please the local Christian merchants and artisans. On May 24, 1829, the merchants and artisans asked the Senate to limit the number of Jewish families registered there. The governor-general of the Baltic provinces was commissioned to present a plan for the diminution of the Jewish population in Courland and Livonia. He replied that in regard to Livonia there was no necessity to take any steps for lessening the number of Jews there, since they were living nowhere except in Riga and Schlock, and were registered in the latter place only. In order to decrease the number of Jews in Courland he suggested the deportation to Siberia of (1) such Jews as had no fixed occupations; (2) such as appeared to be illegally registered and such as were omitted from the registry list. Only such Jews, he considered, should remain in the country as belonged to the gilds, had their own houses, occupied themselves with handicrafts, or held bona fide positions.

This plan was transmitted for consideration to the government committee on Jewish affairs, and this body proposed the following measures: (1) That there be recognized as inhabitants of Courland only such Jews as at the last census had been entered in the registry lists of the Courland Chamber of Justice. (2) That each family of such Jews receive a certificate of its right to settle in Courland. (3) That Jews from other governments be prohibited from settling in Courland. (4) That Jews who removed from Courland lose the right of returning thither. (5) That the marriage of a Courland Jewess to a Jew from another government confer upon such Jew no right to live in Courland. (6) That a Courland Jewess marrying a Jew from another government and removing with him thither lose the right of residence in Courland. (7) That Jews not holding the above-mentioned certificates leave the country; and that those who do not present their certificates in time or were guilty of violating any of the foregoing regulations, be sent to settle in Siberia. All of these measures were sanctioned by the Czar May 24, 1829 ("Russian Code," iv., No. 2,884; Mysh, p. 217).

In 1836 Emperor Nicholas issued a manifesto offering inducements to those of his Jewish subjects who should settle in the agricultural colonies of South Russia. The first families to avail themselves of this offer were seventy from Courland led by Meyer Mendelssohn and Elijah Mitauer. Another group from Courland, consisting of 117 families, applied for permission to settle in the provinces of Siberia. In 1840, 341 families, consisting of 2,530 persons from Courland, joined the agricultural colonies in the government of Kherson. By a ukase of Dec. 19, 1844, all ḳahals in the empire were abolished. This affected the Jewish communities in Courland, and placed them under the direct supervision of the municipal councils in the respective cities. The Jews had, nevertheless, the right to elect several of their number aldermen in the tax department, an office the duties of which were to receive and record all the Jewish taxes. The Jewish community was also represented on the school board and on the board of charities. Moreover, the governor-general of the Baltic provinces had assigned to his staff a Jewish adviser on Jewish affairs in Courland.

In accordance with Part V., art. xii., of the Regulations on Passports, issued in 1890, only those Jews have a right to live in Courland or in the village of Schlock whose families were registered in the census of April 13, 1835. The admission to Courland of Jews from other governments is prohibited. These restrictions do not apply to Jews who by virtue of special legislation have the right to live anywhere in the empire. The singular position of the Jews of Courland compared with that of Jews in other governments of Russia is apparent from the case of Jacob Thal, who in 1895 appealed against the decision of the Courland administration, which expelled him from the estate of Autzhoff on the ground of the May Laws of 1882. The Senate found (Sept. 24, 1895) that the measures prohibiting the settlement of the Jews outside of cities and towns referred only to those governments which came within the Pale of Settlement; and as Courland was not included in the number of such governments, it must be held that the May Laws could not be applied to the Jews of Courland (Mysh, p. 135).

At the end of the eighteenth century the Jews of Courland followed generally the same trades and professions as were followed by the Jews of Lithuania and Poland. In the villages they were small traders, pedlers, distillers, and artisans, especially locksmiths and tinsmiths; in the cities, they were wholesale dealers in dry- and fancy-goods, agents, jewelers, etc. Important business firms were to be found in Mitau, Jacobstadt, Friedrichstadt, and especially in Hasenpot, where the Jews carried on a considerable export trade. It has been shown that many Courland Jews were engaged in agriculture also.

Intellectual Status.

The Jews of Courland have always shown themselves eager for enlightenment. That intellectual regeneration of Judaism which had begun in Germany in the time of Mendelssohn, did not pass without leaving its trace in Courland. The Courland Jews at that time, as at the present day, were more like their coreligionists of Germany than any other Russian Jews. Their life among a cultured people, their knowledge of German, and their relations with Germany soon removed the exclusiveness which still continued in Lithuania and Poland. At the beginning of the nineteenth century they represented the most cultured element of the Russian Jewry.

The first Jewish school conducted on modern principles was founded in Mitau in 1824 by a lawyer named Wolf. Here Lilienthal began his activity, and here Mordecai Aaron Günzburg wrote his first works. The Courland Jews, like the rest of the Russian Jews, are still awaiting full emancipation, although economically and intellectually they seem to be better situated than the Jews of Poland and Lithuania.

Even the poorest of the Jewish inhabitants send their children either to the Christian schools or to the Jewish religious schools, if they can not afford to give them a better private education; and with the exception of some aged people, the number of those who can not read and write German is very small; the Judæo-German jargon seems to be disappearing in the rising generation. In the cultured families a pure German is spoken, as well as good Russian and French; and as regards their home education, the Jews of Courland are not behind the intelligent Christian mercantile class.

Among the prominent Jews of Courland in the eighteenth century were the following: Rabbi Samuel ben Elkanah, of the Teomim family, author of "Meḳom Shemuel," Altona, 1722. He was born at Altona, and officiated as rabbi at Mitau, where he died in 1742. Daniel Ḥayyim Cleif (1729–94), rabbi at Hasenpot. Euchel, alderman at Hasenpot. Isaac Abraham Euchel (1756–1804), brother of the preceding. He spent considerable time at the house of his brother before going to Germany. David Abrahamson, physician; born 1740; practised medicine at Hasenpot. Bär ben ha-Ḳadosh Rabbi Benjamin, a native of Lithuania, where his father was killed during the uprising of the Haidamaks. He lived in Mitau about 1730, where he traded as a jeweler. He was held in high esteem by the dukes and knights of Courland, and made many gifts to the Jewish community of Mitau. Ẓebi Hirsch Ḥarif, rabbi at Mitau in the first half of the eighteenth century. Dr. Elrich; born in Prussia; practised medicine at Wilkomir, Lithuania, as government and city physician; settled in 1770 in Mitau, where he married (1784) the daughter of Kalman Borkum. He died there 1809. Aaron Horwitz, rabbi at Hasenpot and of "all the province of Courland," and later at Berlin, where he died in 1779. He was a friend of Moses Mendelssohn (Fuenn, "Keneset Yisrael," p. 83; Landshuth, "Toledot Anshe Shem," p. 85, Berlin, 1884). Eliezer Elias Löwenthal, physician; born at Tuckum 1763; graduated at Königsberg 1791; practised for some time at Bausk; and later removed to Odessa. Aaron Solomon Tobias, physician; practised at Hasenpot, where he died 1782. Carl Anton, convert to Christianity and disciple of Jonathan Eybeschütz; born in Mitau. Issachar Falkensohn Behr; practised medicine at Hasenpot about 1775.

Of the nineteenth century there may be mentioned the following men of prominence: Isaac Ahrony, teacher of German and Hebrew; born at Mitau 1798; died at Kherson 1842. From 1823 to 1830 he lived at Polotzk, then again in Mitau until 1840, when he emigrated with his family to one of the Jewish agricultural colonies in the government of Kherson. He soon removed to Kherson, where he instructed the children of a Jewish merchant. He published a pamphlet, "Die Thorah Lehrt Gottes- und Menschenliebe und Unterthanentreue," Dorpat, 1838. Abraham Bernard, physician; born 1762; practised at Mitau 1810–11. Marcus (Mordecai) Aaron Günzburg (1795–1846); went to Polangen as teacher in 1817, and later removed to Mitau, where he supported himself by teaching, and by translating and copying legal documents. Ezekiel Jekuthiel, rabbi at Mitau; died there 1823. He wrote notes on the Halakot Gedolot, which remained in manuscript, and which Benjacob saw in the possession of Jekuthiel's son Elijah, who also officiated as rabbi there ("Oẓar ha-Sefarim," p. 164). Wolf, father of Israel Lipkin (Salanter); was rabbi at Goldingen, and died there at the beginning of the nineteenth century. Ruben Birkhahn; died at Friedrichstadt 1822; was a relative of R. Samuel ben Elkanah. His son Bezalel was born at Friedrichstadt 1778; died there 1849. Lazar Isaac Seume, physician; born at Hasenpot 1782; studied at the universities of Berlin and Würzburg; graduated at Dorpat 1805, and practised at Libau, where he later joined the Lutheran Church. Councilor Wulff; born in Prussia; settled in Courland 1780, and established a Jewish school at Mitau 1824, which had an existence of two years only. Reuben Joseph Wunderbar, teacher and author, 1812–67. L. Rappenheim, Jewish alderman at Mitau; was sent by the government in 1854 to inspect the Jewish colonies of South Russia ("Z. d. J." 1855, No. 31). Löb Kalman Löwensohn, teacher; born at Goldingen 1809; died at Jacobstadt 1866. He was engaged at the government Jewish public school, and also as teacher of Greek and Latin at the progymnasium of the nobility. He was an eminent scholar, and corresponded with Pauker and Mädler on problems in higher mathematics and astronomy, and with Ḥayyim Sack and other Hebrew scholars on Talmudic and rabbinical topics. Moritz Rosenthal; born at Bausk 1818; died at Friedrichstadt July 29, 1896. He was a descendant of Mordecai Jaffe. Simon Zarchi, rabbi at Jacobstadt from 1857 to 1860, when he went to Jerusalem, where he died. J. Brutzkus, editor. Leib Cahn, rabbi in Friedrichstadt 1864, and now (1902) rabbi atMoscow. Lipman Friedmann, rabbi at Friedrichstadt; his activity extended over the second quarter of the nineteenth century. Joshua b. Aaron Heller, author of "Dibre Yeshua'" and other works; was rabbi at Polangen in the second half of the nineteenth century; died at Telshi 1880. Solomon Pucher, governmental rabbi at Mitau (1861–96); born at Neustadt, near the Prussian frontier, 1829; died Nov. 29, 1899. Senior Zalman, rabbi of Goldingen. Louis Arens, an opera singer. Lazar Behrmann and his son Vasili. Eliezer ben Alexander Kleinberg, called Eliezer Bausker, son-in-law of Israel Lipschütz (Antikoler). He was rabbi at Bausk and Wilna, and died in the United States 1891. He helped David Tevele of Minsk to publish his work "Dibre Dawid," and his haskamot are to be found in several works. David Isaacovich Bernstein, Russian lawyer; born about 1840 at Jacobstadt; died Jan., 1901, at St. Petersburg. He received his education at the district school of his birthplace, and at the gymnasium of Dünaburg, and graduated from the University of St. Petersburg in 1866. L. Kantor, formerly editor of "Russki Yevrei," was rabbi at Libau. Isidorus Brennson, physician at Mitau; born there Sept. 15, 1854. He is the author of a biographical dictionary entitled "Die Aerzte Kurlands von 1825–1900." Mitau, 1902. From this work it is apparent that of the 582 physicians of Courland in a period of 75 years, 101 (17.3 per cent) were Jews. Of this number 16 embraced Christianity. Of the 172 physicians now practising in Courland, 33 (19.2 per cent) are Jews. See also Bausk and Mitau.)

COURT JEWS: Court Jews, called also court factors, and court or chamber agents, played a part at the courts of the Austrian emperors and the German princes in the seventeenth and eighteenth centuries and at the beginning of the nineteenth. Not always on account of their learning or their force of character did these Jews rise to positions close to the rulers: they were mostly wealthy business men, distinguished above their coreligionists by their commercial instincts and their adaptability. Court rulers looked upon them in a personal and, as a rule, selfish light; as being, on the one hand, their favorites, and, on the other, their whipping-boys. Court Jews frequently suffered through the denunciation of their envious rivals and coreligionists, and were often the objects of hatred of the people and the courtiers. They were of service to their fellow-Jews only during the periods, often short, of their influence with the rulers; and as they themselves, being hated parvenus, often came to a tragic end, their coreligionists were in consequence of their fall all the more harassed.

Position and Duties.

The court Jews, as the agents of the rulers, and in times of war as the purveyors and the treasurers of the state, enjoyed special privileges. They were under the jurisdiction of the court marshal, and were not compelled to wear the Jews' badge. They were permitted to stay wherever the emperor held his court, and to live anywhere in the German empire, even in places where no other Jews were allowed. Wherever they settled they could buy houses, slaughter meat according to the Jewish ritual, and maintain a rabbi. They could sell their goods wholesale and retail, and could not be taxed or assessed higher than the Christians.

At the Austrian Court.

The Austrian emperors kept a considerable number of court Jews. Among those of Emperor Ferdinand II. are mentioned the following: Solomon and Ber Mayer, who furnished for the wedding of the emperor and Eleonora of Mantua the cloth for four squadrons of cavalry; Joseph Pincherle of Görz; Moses and Joseph Marburger (Morpurgo) of Gradisca; Ventura Pariente of Triest; the physician Elijah Ḥalfon of Vienna; Samuel zum Drachen, Samuel zum Straussen, and Samuel zum Weissen Drachen of Frankfort-on-the-Main; and Mordecai Meisel of Prague. A specially favored court Jew was Jacob Bassevi, the first Jew to be ennobled, with the title "von Treuenfeld."

Important as court Jews were also Samuel Oppenheimer, who went from Heidelberg to Vienna, and Samson Wertheimer (Wertheimher) from Worms. Oppenheimer, who was appointed chief court factor, together with his two sons Emanuel and Wolf, and Wertheimer, who was at first associated with him, devoted their time and talents to the service of Austria and the House of Hapsburg: during the Rhenish, French, Turkish, and Spanish wars they loaned millions of florins for provisions, munitions, etc. Wertheimer, who, by title at least, was also chief court factor to the electors of Mayence, the Palatinate, and Treves, received from the emperor a chain of honor with his miniature.

Samson Wertheimer was succeeded as court factor by his son Wolf. Contemporaneous with him was Leffmann Behrends, or Liepmann Cohen, of Hanover, court factor and agent of the elector Ernst August of Hanover and of the duke Rudolf August of Brunswick. He had relations also with several other rulers and high dignitaries. Behrends' two sons, Mordecai Gumpel and Isaac, received the same titles as he, chief court factors and agents. Isaac Cohen's father-in-law, Behrend Lehman, called also Bärmann Halberstadt, was a court factor of Saxony, with the title of "Resident"; and his son Lehman Behrend was called to Dresden as court factor by King Augustus the Strong. Moses Bonaventura of Prague was also court Jew of Saxony in 1679.

Intrigues of Court Jews.

The Models were court Jews of the margraves of Ansbach about the middle of the seventeenth century. Especially influential was Marx Model, who had the largest business in the whole principality and extensively supplied the court and the army. He fell into disgrace through the intrigues of the court Jew Elkan Fränkel, member of a family that had been driven from Vienna. Fränkel, a circumspect, energetic, and proud man, possessed the confidence of the margrave to such a degree that his advice was sought in the most important affairs of the state. Denounced by a certain Isaiah Fränkel, however, who desired to be baptized, an accusation was brought against Elkan Fränkel; and the latter was pilloried, scourged, and sent to the Wülzburg for life imprisonment Nov. 2, 1712. He died there 1720. David Rost, Gabriel Fränkel, and, in 1730, Isaac Nathan (Ischerlein) were court Jews together with Elkan Fränkel; Ischerlein, through the intrigues of the Fränkels, suffered the same fate as Elkan Fränkel. Nevertheless, Nathan's son-in-law, Dessauer, became court Jew. Other court Jews of the princes of Ansbach were Michael Simon and Löw Israel (1743), Meyer Berlin, and Amson Solomon Seligmann (1763).

The Great Elector.

The great elector also kept his court Jew at Berlin, Israel Aaron (1670), who by his influence tried to prevent the influx of foreign Jews into the Prussian capital. Other court Jews of the elector were Gumpertz (died 1672), Berend Wulff (1675), and Solomon Fränkel (1678). More influential than any of these was Jost Liebmann. Through his marriage with the widow of the above-named Israel Aaron, he succeeded to the latter's position, and was highly esteemed by the elector. He had continual quarrels with the court Jew of the crown prince, Markus Magnus. After his death his influential position fell to his widow, the well-known Liebmannin, who was so well received by Frederick III. (from 1701 King Frederick I. of Prussia) that she could go unannounced into his cabinet.

There were court Jews at all the petty German courts: *e.g.*, Zacharias Seligmann (1694) in the service of the Prince of Hesse-Homburg, and others in the service of the dukes of Mecklenburg. Others mentioned toward the end of the seventeenth century are: Bendix and Ruben Goldschmidt of Homburg; Michael Hinrichsen of Glückstadt, who soon associated himself with Moses Israel Fürst, and whose son, Reuben Hinrichsen, in 1750 had a fixed salary as court agent. About this time the court agent Wolf lived at the court of Frederick III. of Mecklenburg-Strelitz. Disputes with the court Jews often led to protracted lawsuits.

The last actual court Jews were Israel Jacobson, court agent of Brunswick, and Wolf Breidenbach, factor to the Elector of Hesse, both of whom occupy honorable positions in the history of the Jews.

A history of the various court Jews—still to be written—would be a valuable contribution to the history of the German dynasties.

COURTSHIP. See Marriage.

COUSSERI (COUSSER, קוצר): Jewish family of the fifteenth and sixteenth centuries; lived in Riva di Trento and neighboring towns of northern Italy. The epitaph on the tomb of **Meshullam Cousseri** (died July 20, 1541) indicates Riva di Trento as the original home of the family. **Mordecai ben Meshullam** of Riva, author of the letters in the manuscript of Halberstamm (No. 390), according to which he was still living in 1560, seems to have been the son of Meshullam Cousseri. Steinschneider derives the name "Cousseri" from "Yekussiel," the German pronunciation of "Jekuthiel." According to David Kaufmann, it was abridged into "Ḳoussel" and "Ḳoss"; other formations are "Ḳousi," "Ḳousel," and "Ḳousser," קוזי or קוצי. Since "Ḳoẓer" as a prænomen is found in a Mayence document of 1470, in which the Jews of the Rheingau are granted one year's sojourn, it may be concluded that the family Cousseri was of German origin; in fact this is proved from a German translation of the piyyuṭim of Rosh ha-Shanah and Yom ha-Ḳippurim by Jacob ben Joseph Ḳoẓer of Ferrare. The name "Cuzzeri" still exists in northern Italy.

D. S. Man.

COUTINHO (CUITIÑO, קויטיניו): Name of a Jewish-Portuguese family, members of which, during the seventeenth and eighteenth centuries, resided in Amsterdam, Hamburg, Brazil, and the West Indies.

1. **Abraham Pereyra Coutinho:** Mentioned as living in Amsterdam in 1675.

2. **Baruch Mendes Coutin:** Member of the benevolent society Sha'are Ẓedeḳ, founded in Amsterdam 1678.

3. **Daniel Coutinho:** Mentioned with No. 1.

4. **David Mendes Coutinho:** Mentioned with No. 2.

5. **Isaac Henriques Coutinho:** Mentioned in a Jamaica document of the year 1698. Resided at Amsterdam in 1675.

6. Jacob Coutinho: Son of Moses Henriques Coutinho (No. 11).

7. Jacob b. Abraham Mendes Coutinho: A brother of Moses (No. 10).

8. Lourença Coutinho: Mother of the dramatic poet Antonio José da Silva, and widow of João Mendes da Silva; arrested in Rio de Janeiro as a confessor of Judaism, and brought before the tribunal of the Inquisition at Lisbon, where she was imprisoned, and died in 1713 at the age of sixty-one.

9. Manuel Rodriguez Coutinho: Punished (for the third time) by the Inquisition at Lisbon on the charge of a relapse to Judaism.

10. Moses b. Abraham Mendes Coutinho: From 1696 to 1711 the owner of a Hebrew printing-establishment at Amsterdam.

11. Moses Henriques Coutinho: Perhaps a brother of Isaac Henriques (No. 5); lived for a time in Barbados, and settled in Jamaica 1679.

12. Samuel Gomes Coutinho: Mentioned with No. 1.

COUTINHO, FERNANDO: Defender of the Jews, councilor of the supreme court, and afterward Bishop of Silves, in the reigns of Manuel and João III. of Portugal. When, in Feb., 1497, Manuel agitated the question of compulsory baptism of the Jews, Coutinho energetically protested against any forcible measures in matters of faith, saying that "no compulsion and persecution can make a sincere Christian out of a single Jew." When a Marano of Loulé in Algarve was accused, in 1531, of having spoken disrepectfully of the Virgin Mary, and the royal council sent the proofs to Bishop Coutinho, he refused to pass judgment. In his decision he justified himself by saying that the Maranos were to be considered as Jews and not as Christians; for in being forcibly baptized they had not thereby accepted Christianity, and hence could not be treated as apostates from the Christian religion. "Even if I were not a man of seventy," he continues, "and were I more in accord with the present time, I would still pronounce the verdict to be false; since it is clear and evident that the law condemns it. The provost who brought the action, and all the witnesses, ought to be tortured; for no witnesses are ever called that have not been bribed with money or otherwise. I will have nothing to do with the matter. I need not act the part of Pontius Pilate. Let other, younger men pass judgment."

COVENANT (= ברית; Septuagint, *διαθήκη*; Vulgate, "testamentum").—**Biblical Data:** An agreement between two contracting parties, originally sealed with blood; a bond, or a law; a permanent religious dispensation. The old, primitive way of concluding a covenant (כרת ברית, "to cut a covenant") was for the covenanters to cut into each other's arm and suck the blood, the mixing of the blood rendering them "brothers of the covenant" (see Trumbull, "The Blood Covenant," pp. 5 *et seq.*, 322; W. R. Smith, "Religion of the Semites," pp. 296 *et seq.*, 460 *et seq.*; compare Herodotus, iii. 8, iv. 70). Whether "berit" is to be derived from "barah" = to cut- or from a root cognate with the Assyrian "berit" = fetter (see Nathanael Schmidt, in Cheyne and Black, "Encyc. Bibl." *s.v.* "Covenant"), or whether both Assyrian and Hebrew come from "barah" = to cut (compare "asar" = covenant and bracelet in Arabic; see Trumbull, *l.c.* pp. 64 *et seq.*), can not be decided here. A rite expressive of the same idea is (see Jer. xxxiv. 18; compare Gen. xv. *et seq.*) the cutting of a sacrificial animal into two parts, between which the contracting parties pass, showing thereby that they are bound to each other; the eating together of the meat, which usually follows, reiterating the same idea. Originally the covenant was a bond of life-fellowship, where the mingling of the blood was deemed essential. In the course of time aversion to imbibing human blood eliminated the sucking of the blood, and the eating and drinking together became in itself the means of covenanting, while the act was solemnized by the invocation of the Deity in an oath, or by the presence of representative symbols of the Deity, such as seven animals, or seven stones or wells, indicative of the seven astral deities; whence נשבע ("to be bound by the holy seven") as an equivalent for "swearing" in pre-Mosaic times (see Gen. xxi. 27, xxvi. 28, xxxi. 54; Herodotus, iii. 8; Josh. ix. 14; II Sam. iii. 12–20; W. R. Smith, *l.c.* pp. 252 *et seq.*). Salt was especially selected together with bread for the conclusion of a covenant (Num. xviii. 19; see W. R. Smith, *l.c.* p. 252; Trumbull, "The Covenant of Salt," 1899).

Covenant Between Men and Nations.

Every covenant required some kind of religious rite in which the Deity was invoked as a witness to render it valid (Gen. xxi. 23; Josh. ix. 19; Judges ix. 46; Jer. xxxiv. 18). The covenant made the life and property of the confederates ("ba'ale berit," Gen. xiv. 13) inviolable. To break "the covenant of the brothers" (Amos i. 9) was a heinous sin, and imposed the penalty of death (II Sam. iii. 28). The Mosaic law, therefore, forbade Israel making a covenant with the idolatrous inhabitants of Canaan or "with their gods" (Ex. xxiii. 32, xxxiv. 12; Deut. vii. 2). The covenant concluded by Solomon with Hiram (I Kings vi. 26), and those between the kings of Judah or Israel and the kings of Syria or Assyria and Babylonia (I Kings xv. 19; Hosea xii. 2; Ezek. xvii. 13), were therefore fraught with evil, nor could the covenant of Simon Maccabeus with Rome (I Macc. xiv. 24 *et seq.*) meet with anything but disapproval on the part of the Pharisees. The worst that can happen to a nation is to have its confederates ("anshe berit") conspire against it (Obad. i. 7). The pledge of matrimony also was, according to Mal. i. 13, 14; Prov. ii. 17; Ezek. xvi. 8, 61 (with which must be compared Job xxxii.), a covenant concluded before witnesses, and probably at some altar or sacrificial feast, at which the repast with the wine seems to have been an essential feature (see Gen. xxiv. 54).

God's Covenant with Men.

The relation of man to the Deity was also conceived of in Biblical times as a covenant concluded by God with certain men or nations, from which all laws derived their sanctity and perpetuity. God, when creating the heavens and the earth, made a covenant with them to observe the rules of day and night (Jer. xxxiii. 25), and when the flood caused by the sin of all flesh had interrupted the operation of the law, He hung the rainbow in the clouds as a sign of the covenant, to assure men that it would not again be suspended on account of man's sin. He thus made a special covenant with Noah and his sons, requiring them to preserve and show due regard for all human life, while pledging the preservation of the order of earthly life for all generations (Gen. ix. 1–17). Regarding this so-called Noachian covenant see below.

God concluded a covenant with Abraham (Gen. xv. 18, xvii. 2, 7) by which He entered into a special relationship with him and his descendants for all time; and as a sign of this covenant he enjoined on them the rite of CIRCUMCISION. This Abrahamitic covenant, expressive of the religious character of the descendants of Abraham as the people of YHWH, the one and only God, was renewed on Mount Sinai when, before the giving of the Law, Israel as a people pledged itself to keep His covenant (Ex. xix. 8). After the giving of the Law Moses sprinkled "the blood of the covenant sacrifice" half upon the people and half upon the altar of the Lord (Ex. xxiv. 6–8), to signify the mystical union of Israel and its God. Of this "everlasting" Sinaitic covenant between God and Israel the Sabbath is declared to be the sign forever (Ex. xxxi. 13–17). At the same time the tables of the Law upon which the pledge was made were called "the book of the covenant" (Ex. xxiv. 7), and the Ten Commandments "the words of the covenant" (Ex. xxxiv. 28); and so the tables containing these became "the tables of the covenant" (Deut. ix. 9, 15). Of peculiar significance to the people during its wanderings in the wilderness, and in its settled state in Palestine, was the ARK OF THE COVENANT (Num. x. 33; Deut. x. 8, xxxi. 26; and frequently in Joshua, Samuel, and Kings), which was regarded as "the testimony" ("'edut") to the presence of the God of the Covenant in its midst.

Renewal of Covenant.

Four times in the history of Israel this covenant of Sinai was renewed: by Moses in the plains of Moab (Deut. xxix. 1, 9); by Joshua before his death (Josh. xxiv. 25); by the high priest Jehoiada after the idolatrous Queen Athaliah had been deposed and young Jehoash proclaimed king (II Kings xi. 17); and finally by King Josiah after the book of the Law had been found in the Temple and "all the words of the book of the covenant" had been read before all the people (II Kings xxiii. 2, 3). In fact, the Book of Deuteronomy dwells with special emphasis (see ch. iv.–v. and xxviii.–xxix.) upon the covenant made in Horeb for all generations; and Jeremiah (see ch. xi., xxxi., xxxiv.), as well as Ezekiel (ch. xvi., xvii.) also recurs often to the covenant; but Isaiah never mentions the word "covenant." This fact has led many modern Bible critics to assume that the covenant idea originated among the late prophets of Judea. But the accusation that Israel "forsook the covenant of the Law" was made as early as the time of the prophet Elijah (I Kings xix. 10), while both Hosea (ii. 18–20) and Jeremiah held out the promise that the covenant which Israël had broken, thereby forfeiting its existence as a nation before God, shall be written anew and upon the hearts of all, never to be broken again (Jer. xxxi. 31–34). It must be observed, however, that parallel with the Sinai covenant there is also continuous reference to the older covenant which God concluded with the Patriarchs as the guaranty of Israel's redemption and renewed salvation (Ex. vi. 4; Lev. xxvi. 42–45; Deut. iv. 31, vii. 12).

Covenant with Aaron and David.

Besides the covenant with the people of Israel, God concluded a special covenant with the priestly tribe of Levi, and specifically with the houses of Aaron (Num. xviii. 19; xxv. 12, 13; Deut. xxxiii. 9; Jer. xxxiii. 21; Mal. ii. 4; compare Ex. xxxii. 29; Deut. x. 8, xviii. 5) and King David (II Sam. xxiii. 5; Jer. xxxiii. 21; Ps. lxxxix. 4, 35; cxxxii. 12; II Chron. xiii. 5). These two covenants, together with the one made with Abraham (Gen. xv. 18), were meant to perpetuate the three possessions: the land, the Davidic monarchy, and the Aaronitic priesthood. The perpetual character of the Sinai covenant was accentuated by the seer of the Exile, and Israel itself was declared to be "a covenant of the people"; that is, a covenant-people among the nations united by the word of God (Isa. xlii. 6, xlix. 8, liv. 10, lv. 3, lix. 21, lxi. 8; compare Jer. i. 5).

Meaning of the Divine Covenant.

While every sacrifice was regarded as a renewal of the covenant with God (Ps. l. 5), the conception of religion as a covenant concluded by God with man is peculiarly Jewish. The idea of the covenant of God is therefore coeval with the beginning of Israel as the people of God. It is also easy to understand why "berit" (covenant) became synonymous with the Law (Isa. lvi. 6 *et seq.*; Ps. xxv. 10, 14; l. 16; I Kings xi. 11). On the other hand, the idea of Israel as the covenant-people became more powerful when a prophet, "the messenger of the covenant," who would renew the covenant in the person of Elijah (Mal. iii. 3 [iv. 5]) was looked for, and still more when the preservation or violation of the covenant—that is, the maintenance or extermination of Judaism—was the question at issue between the two parties during the Syrian persecution (Dan. xi. 28–32; I Macc. i. 15, 63; Judith ix. 13; Ps. lxxiv. 20; see ELIJAH).

Special stress was laid on circumcision and the Sabbath during the Exile as the signs of the Israelitish covenant (Ps. lvi. 4–6), and they were regarded as the bulwarks of the faith in the Maccabean era (I Macc. i. 15, 45–48).

From this point of view the history of divine revelation was, in the second pre-Christian century, seen in a new light. The broader and more cosmopolitan view dwelt on the covenant of God with man. According to Ben Sira, God made a covenant of life even with the first man (Ecclus. [Sirach] xvii. 12, probably based on Hosea vi. 12; compare Sanh. 38b). But it is especially the covenant of Noah which was interpreted by the Rabbis to include all the laws of humanity.

Noachian and Abrahamitic Covenant.

The strictly nationalistic view found its vigorous expression in the Book of Jubilees, according to which the Noachian covenant, particularly resting on the sacredness of blood, was concluded upon the identical day, the fifteenth of Siwan, on which the Sinaitic covenant was concluded (Book of Jubilees vi. 11 *et seq.*); it puts the Abrahamitic covenant, however, in the foreground (*ib.* xv. 11-34, xxi. 4, xxiii. 16, xxx. 21, xxxiii. 19) as the only condition of eternal salvation for Israelites.

The Old and the New Covenant.

When Jeremiah spoke of "the new covenant" which the Lord "will make with the house of Israel and the house of Judah" (Jer. xxxi. 31) he immediately explained his words by saying: "I will put my law in their inward parts, and write it in their hearts" (*ib.* xxxi. 33; compare xxxiii. 40). Judaism knows of no other than the old Sinaitic covenant. Eternal as the covenant with heaven and earth is God's covenant with the seed of Jacob (Jer. xxxiii. 25 *et seq.*). Christianity, however, interpreted the words of the prophet in such a way as to indicate a new religious dispensation in place of the law of Moses (Heb. viii. 8-13). The Septuagint translation of the term "berit" being διαθήκη, which signifies both a compact and a last will or testament (Aquila, Symmachus, and Theodotion more correctly translate "berit" συνθήκη = covenant), the author of the Epistle to the Hebrews writes: "A testament is of force after men are dead, but not while the testator liveth; wherefore the first testament could not be dedicated without blood, as in fact Moses did enjoin the people by the blood of the testament; Jesus, however, as the mediator of the new testament offered his own blood for the redemption of the transgressions under the first testament" (*ib.* ix. 15-25 *et seq.*, Greek). This strange view is based upon the idea expressed by Paul (Gal. iii. 15 *et seq.*, Greek). "A man's testament [A. V. "covenant" gives no sense] if it be confirmed, no one disannulleth or addeth thereto. Now to Abraham and his seed were the promises made, and this seed is Christ. The testament then confirmed by God in Christ can not be annulled by the law four hundred and thirty years thereafter. The law was added because of transgressions till the seed should come in Christ." It was obviously in opposition to the Passover blood of the covenant (Ex. xii. 23; Ezek. xvi. 6) that the early Christians at their communion meals proclaimed their faith in the crucified Christ as "the new testament" (I Cor. xi. 25; Luke xxii. 20; Matt. xxvi. 28; Mark xiv. 24; see NEW TESTAMENT; PASSOVER).

——**In Rabbinical Literature:** The term "berit" is used occasionally in Talmudic-Midrashic literature in referring to the laws of nature, which are regarded as a sort of covenant between God and things (see Gen. R. xxxiv.; Niddah 58b); or it is used in the sense of a contract, as, for instance, "a covenant made with the lips" (M. Ḳ. 18; Num. R. xviii.), or a covenant made with the "thirteen middot, that they may be efficient during prayer" (R. H. 17b; Yer. Ber. v. 9a), but it refers chiefly to God's covenant made with Israel, and with Abraham, Isaac, Jacob, Moses, Aaron, Phineas, and David (Derek Ereẓ Zuṭa, i., end). Frequent reference is made in the liturgy to "the covenant with the fathers" (Lev. xxvi. 42, Hebr.). In one passage there is also a reference to the covenant made with the twelve progenitors of the tribes, by which a covenant like that made with the "fathers" is meant (Torat Kohanim; Beḥuḳḳotai, xxvi. 45). The intimacy existing between God and Israel as the descendants of the "fathers" was shown in the form of a covenant when Israel received the Torah (compare also Tanna debe Eliyahu R. iii.; Sifre, Deut. 4).

Repeated Covenants.

In view of the covenant between God and Israel concluded on Mt. Sinai, the phrase "the oath on Mt. Sinai" ("mushba' me-har Sinai"), referring to the duty of the Israelites to observe the Torah, frequently recurs in Talmudic literature. The following three ceremonies preceded this covenant: "milah" (circumcision), "ṭebilah" (baptism), "harẓa'at dam" (sprinkling of the sacrificial blood (compare Ex. xxiv. 6); hence they are deemed indispensable for the admission of a proselyte into the Jewish community (Ker. 9a; compare PROSELYTES AND PROSELYTISM). Besides the one on Mt. Sinai, a covenant was made on the departure from Egypt, and another shortly before the entry into the promised land (compare Deut. xxix. 11), when God made the Israelites swear that they would observe the Torah (Tan., Niẓẓabim, ed. Buber, p. 50; compare Soṭah 37b, top). Some especially important miẓwot are called simply "berit." In the first place stands circumcision (Shak. 135a; Mek., Yitro, ed. Weiss, 71), also designated "berito shel Abraham abinu" (the covenant with our father Abraham) (Abot iii. 17); and in the liturgy, in a passage dating from tannaitic times, "berit ḳodesh" (holy covenant). Akiba took "berit" (Ex. xix. 5) to mean the observance of the Sabbath and the recognition of God (Mek., Yitro, *l.c.*), while in the Zohar the Torah, circumcision, and God are designated by "berit" (Aḥare Mot, iii. 73b; compare also Zohar Pinḥas, iii. 220b, bottom).

The covenants between God and some of the elect mentioned in Scripture are a favorite subject of the Haggadah; and as early as the Book of Jubilees there is an explicit reference to the covenant between God and Noah when the latter left the ark (vi. 10, 11). God's covenant with the sons of Noah was, however, not made for all eternity, but was intended to be coeval only with the existence of this world (Gen R. xxxiv.). When God promised Noah to send no deluge, he also made a covenant with the earth that men should be filled with love for their homes so that all parts of the earth might be inhabited (Gen. R. *l.c.*). The Haggadah treats with much detail of God's covenant with Abraham, mentioned in Gen. xv. 9–21, which is designated in the liturgy as "berit ben ha-betarim" (the covenant between the sacrificial pieces) (compare also the Syriac Baruch apocalypse, iv. 4). "God showed him Gehenna and the dominion of the nations on the one side, and the revelation on Mt. Sinai and the service in the Temple on the other side, and said: 'If your children honor these last two [the Torah and worship], they shall be spared the first two; if not, the Temple shall be destroyed, and you may now choose between suffering under the heathen and suffering in Gehenna as the punishment of your descendants.' Abraham was at first inclined to choose the latter, but God induced him finally to choose the sorrows of the exile as punishment for Israel, in order that they might be spared the torments of hell" (Gen. R. xliv.; Pirḳe R. El. xxviii.). The APOCALYPSE of Abraham is in large part a detailed description of the "berit ben ha-betarim." Abraham is often severely censured for having made a covenant with the pagan Abimelech (Gen. xxi. 27; Tanna Eliyahu R. vii.; Yalḳ., Gen. 95; compare also ABIMELECH IN RABBINICAL LITERATURE).

Covenants Among Men.

E. C. L. G.

——**In Arabic Literature:** The belief in a covenant ("mithaḳ") existing between the divinities and their worshipers was prevalent in pre-Islamic times. The offering of sacrifices had no other object than that of strengthening the covenants between the divinities and the officiants, and blood was considered to be the best agent. A covenant concluded between men was often solemnized by dipping the hands in blood. The Banu 'Adi ben Ka'b and the Banu 'Abd al-Dar concluded a covenant, and to give it greater force the parties dipped their hands in a plate of blood (Ibn Hisham's "Life of Mohammed," p. 125). Mohammed taught, both in the Koran and the Tradition, that in the beginning God called all the souls of mankind together and made a covenant with them. "The Lord brought forth their descendants from the reins of the sons of Adam, and took them to witness against themselves" (Koran, vii. 171). In explanation of this verse Ubai ibn Ka'b relates that when God created the spirits of the sons of Adam He gathered them together and took from them a promise ("wa'dah") and a covenant ("mithaḳ"). Then Adam saw among them prophets appointed by special covenant (compare 'Ab. Zarah 5a, where this legend is given in detail).

Mohammed frequently reproaches the Jews with having broken the covenant: "O children of Israel! Remember my grace which I conferred upon you [when I said] keep the covenant with me and I will keep the covenant with you" (Koran, ii. 37). Mohammed connects the covenant which God made with the children of Israel with the giving of the Law on Mt. Sinai: "And when we made a covenant with you and lifted the mountain above you, saying: 'Receive with steadfastness what we have brought you, and remember what it contains'" (*ib.* ii. 60). The commentator Baiḍawi explains the expression "and the mountain was lifted above you" ("warufi' fauḳakum al-ṭur") by the following legend: When Moses brought the Torah, the children of Israel, seeing the numerous obligations imposed upon them, refused to accept it. Then God commanded Gabriel, and he tore out the mountain and suspended it over the Israelites. A similar legend is found in Shab. 88a: "'And they stood at the nether part of the mount' [Ex. xix. 17], said R. Abdimi bar Ḥana. From this expression we learn that God suspended the mount over them as a bat, and said to them: 'If you accept the Torah, it is all right; if not, you will find here your tomb.'" In regard to the covenant with the Prophets, Mohammed said: "Remember we have entered into covenant with the Prophets, with thee Mohammed, and with Noah, and with Abraham, and with Musa, and with Jesus, the son of Mary, and we made with them a covenant (sura xxxiii. 7).

G. I. BR.

——**Critical View:** The Hebrew "berit," usually translated "covenant" in the A. V., has a wider range of application than its English equivalent, since it is the ordinary term for any kind of agreement or compact. Naturally the word has to be considered in the sense of a solemn agreement; but it must be noticed that all agreements among ancient peoples were solemn and sacred, having the sanction of an oath or "curse," while covenant-breaking of any sort was held to be most sacrilegious. It is its comprehensiveness of meaning along with its intrinsic sacredness that gives the berit such great significance in the Hebrew Scriptures. The most binding covenant was naturally that made "before Jehovah" (I Sam. xxiii. 18), and the name BAAL-BERITH is a reminiscence of some similar covenant made before the "Ba'al" of the land.

[This Ba'al seems originally to have been the patron deity of Shechem (Judges viii. 33; ix. 4, 46), which, being one of the oldest cities of the land, retained even in later days its prominence as the capital of a confederation. Jacob buys a piece of land; that is, enters into a covenant with it (Gen. xxxiii. 18, 19; xxxiv. 2). It is appointed as a city of refuge—in other words, a covenant city (Josh. xx. 7). It is here that Joshua delivers his farewell address (Josh. xxiv. 1). Its rôle under Jeroboam (I Kings xii. 25) points in the same direction. By the Ba'al of the chief city the covenant between the component tribes must have been sanctioned. Hence this Ba'al became the Ba'al-berit par excellence. Though unsupported by epigraphic proof, the theory that among the Phenicians a Ba'al called also "Ba'al Elyun," or "Elyun Beruth," had a similar preeminence as the protector of an alliance of various cities (Creutzer, "Symbolik," ii. 87), throws light on the function of this Ba'al.—E. G. H.]

Besides the oath formally taken or implied, a ceremony was often performed, such as "passing between" the parts of a sacrificial victim slain for the purpose (Gen. xv. 18; Jer. xxxiv. 15), or giving the hand, or partaking of salt in common. Very primitive, wide-spread, and potential was the blood-covenant.

A peculiar Hebrew custom is that of imposing a berit upon another or others; *e.g.*, the covenant imposed by Joshua upon the Gibeonites (Josh. ix. 7, xi. 19), or that by Jehoiada the priest upon the people (II Kings xi. 17). So important is this apparently one-sided relation that it has molded the dominant prophetic conception of God's attitude toward His people. Thus the commands given at Sinai on "the tables of the covenant," and the whole giving of the Law, have come to be known as the Sinaitic covenant. Here the obligation is upon the side of the people. But in the progressive development of Yhwh's relations to Israel as God of the covenant there is an increasing assumption of obligation on His part, with all solemnity of assurance as to the fulfilment (see, for example, Jer. xxxiii. 20 *et seq.*). The idea is indeed the most germinal of all religious conceptions, for when Jeremiah utters the profoundest sentiment of the Old Testament, that the Law of God should be written upon His people's hearts, the promise is called "a new covenant" (*ib.* xxxi. 31 *et seq.*).

COVETOUSNESS: The inordinate desire to possess that to which one is not entitled, or that which belongs to another. Its prohibition forms the burden of the tenth commandment, "Thou shalt not covet thy neighbor's house; thou shalt not covet thy neighbor's wife, nor his man-servant, nor his maidservant, nor his ox, nor his ass, nor anything that is thy neighbor's" (Ex. xx. 17; compare Deut. v. 18). The Scriptures employ the following four terms as equivalents for "covetousness," differing in point of degree: (1) "Ḳin'ah" (from קנא), usually translated "envy." It signifies discontent with one's own possession because of the preferred possessions of others, as in Gen. xxxvii. 11; Isa. xi. 13; Ps. xxxvii. 1, lxxiii. 3; Prov. iii. 31, xxxiii. 17.

(2) "Awwah" (from אוה). This is the equivalent of "longing," and connotes the wish for another's belongings, as in the passage, "Neither shalt thou desire thy neighbor's wife," etc. (Deut. v. 18; compare Ps. xlv. 12, cvi. 14; Prov. xxi. 26; Eccl. vi. 2).

(3) "Ḥemdah" (from חמד). This is rendered "covetousness," and indicates the undue craving for that to which one has no right, as in Ex. xx. 17; Deut. v. 18, vii. 25; Josh. vii. 21; Micah ii. 2; Prov. xii. 12.

(4) "Beẓa'" (from בצע). The meaning, "gain," has reference to the appropriation of the property of another. Compare the passages: "Provide . . . men of truth, hating covetousness (Ex. xviii. 21); "For from the least of them even unto the greatest of them every one is given to covetousness" (Jer. vi. 13, viii. 10; see also Ps. x. 3, cxix. 36; Prov. i. 19, xv. 27).

Prophetic Denunciation.

The condemnation of covetousness is nowhere expressed more forcibly than, by implication, in the lament of Micah: "Wo to them that devise iniquity, and work evil upon their beds! When the morning is light they practise it, because it is in the power of their hand. And they covet fields, and take them by violence; and houses, and take them away; so they oppress a man and his house, even a man and his heritage" (Micah ii. 1-2; compare Hab. ii. 9: "Wo to him that coveteth an evil covetousness").

Covetousness never succeeds in the attainment of the object desired. The covetous man is despised by God. "For the wicked boasteth of his heart's desire, and blesseth the covetous, whom the Lord abhorreth" (Ps. x. 3). "He who violates the commandment Thou shalt not covet, is regarded as if he had transgressed all ten commandments" (Pesiḳ. R. 21; ed. Friedmann, p. 107a).

Naḥmanides (1195-1270), in commenting on Ex. xx. 17, holds that "if man subdues his desire he will never harm his neighbor." Isaac Aboab (*c.* 1300) contends that the execution of the nine preceding commandments depends on the fulfilment of the tenth. Says Aboab: "He who does not covet will not depart from God, serve strange gods, violate the Sabbath and holidays, show lack of respect for parents, murder, commit adultery, steal, or swear falsely." "Covetousness is the root of all jealousies, lust, transgressions, and the violations of commandments" ("Menorat ha-Ma'or," Introduction to section i.).

Significance of Covetousness.

The consequences attending covetousness are not lost sight of by Judaism. Covetousness is an evidence of moral decline. "A sound heart is the life of the flesh; but envy the rottenness of the bones" (Prov. xiv. 30). "He that hath no rule over his own spirit is like a city that is broken down, and without walls" (Prov. xxv. 28).

In some instances teachers have traced the direct effects of covetousness. The Pirḳe Abot (iv. 21) considers covetousness in its threefold manifestation the cause of man's removal from the world. "If you desire you will covet; and if you covet you will tyrannize and rob" (Mek. to Ex. xx. 17). Baḥya ben Asher, in dilating on the tenth commandment, says: "If you covet, you cause quarrel, trouble, and divorce."

Nemesis of Covetousness.

A gross injury resulting to the covetous from his inordinate desire for that not rightfully belonging to him is the loss of the property with which he is blessed. In other words, covetousness is responsible for its own ruin. That covetousness is the cause of the individual's discontent and unhappiness is certainly true. Perhaps this idea underlies the following remark: "He who looks enviously on that which does not belong to him not only fails to obtain that which he seeks, but also loses that which he has" (Soṭah 9a). A proverbial saying to the same effect is the Talmudical aphorism, "Because the camel wanted horns his ears were cut off" (Sanh. 106a). Even though covetousness does not result in violence, the wish to possess another's property suffices to merit condemnation. "The wish to be able to do wrong is worse than the deed itself" (Yoma 29a).

Covetousness is by no means unconquerable. Man can master this as well as all other passions. "Covetousness is a matter of the heart" (Solomon ben Melek, in Miklal Yofi to Deut. v. 21). Special precaution should therefore be exercised by man not to permit covetousness to master him. This may be prevented by schooling oneself against it.

Cure of Covetousness.

"Remember that the object of your lust is unattainable, and your mind will be at ease" (Abraham ibn Ezra to Ex. xx. 17). Man should be satisfied with his lot. "Who is rich? He who rejoices in his portion" (Ab. iv. 1). Man should vanquish his desire. Such victory is a mark of spiritual power. "Who is strong? He who subdues his evil inclination" (*ib.*). "Keep thy heart with all diligence; for out of it are the issues of life" (Prov. iv. 23).

K. W. R.

COVILHÃO: City in the province of Beira, Portugal, which in the thirteenth century had a Jewish congregation and was the seat of a district rabbi. After the banishment of the Jews from Portugal, many Maranos resided in Covilhão, where their descendants are still to be found. In 1543 the fanatical populace desired to make victims of all the Maranos in a single auto da fé. A number fled the city, while many fell victims to the Inquisition.

Pedro Vaëz, a medical authority of the sixteenth century, practised in Covilhão.

COVO or **COVOS:** Name of a Jewish family of Salonica, Turkey, a branch of which lives at Widdin, Bulgaria. As the name indicates, the family was originally of Covo, near Milan, Italy. There have been several rabbis of this name.

D.

Asher Covo, or **Raphael Asher Covo:** Chief rabbi of Salonica, Turkey, and man of letters; born 1799; died 1874. He officiated for twenty-six years, rendering great services to his community. Sultan 'Abd al-Majid decorated Covo with the Order of Nishan-i-Medjidie. He wrote "Sha'ar Asher," a collection of responsa on the Shulḥan 'Aruk, with two appendixes. See Ḥazan, "Ha-Ma'alot li-Shelomoh," *s.v.*

S.

Elias Covo: Turkish rabbi and author; died at Salonica in 1689. He wrote "Adderet Eliyahu" (The Mantle of Elijah), containing forty-three responsa. These, together with responsa by Joshua Ḥandali, were printed at Constantinople in 1739 under the title "Shene Me'orot ha-Gedolim." See Azulai, "Shem ha-Gedolim," *s.v.*

G. M. Fr.

Isaac Covo: Palestinian Talmudist; born in 1770; died Aug. 18, 1854, at Alexandria, Egypt. Apparently he was of the family of Asher Covo, rabbi in Salonica and author of "Sha'ar Asher" (See Ḥazan, "Ha-Ma'alot li-Shelomoh," p. 6a). Isaac Covo succeeded Abraham Ḥayyim Gagin as the Sephardic ḥakam-bashi of Jerusalem in July, 1848. At that time his congregation was encumbered by debt. English sympathizers promised that if the venerable rabbi would visit London, they would wipe out the whole of the liabilities. Covo went first to Egypt, and had succeeded in raising £400 ($2,000) in Cairo and Alexandria, when death terminated his efforts. He was buried in the latter city.

Covo was the author of "Gersa de-Yanḳuta" (Teachings of Childhood) and "Tif'eret Baḥurim" (The Glory of Young Men), still extant in manuscript.

L. G. J. D. E.

Jacob Hananiah Covo: Chief rabbi of Salonica; born there in 1825. Orphaned at the age of one year, he was educated by relatives. After passing through the yeshibot of Salonica, his native city, he continued his studies alone. Covo was a distinguished lawyer before becoming successor to the chief rabbi, Samuel Arditti (1888). For several years he was a member of the Mu'arrif-Majlisi (Council of Public Instruction). He founded the Mutual Aid Society ('Eẓ Ḥayyim) and a small rabbinical seminary (Bet-Yosef), and also reorganized the large Talmud Torah of Salonica. He has been decorated with the Order of the Medjidie, second class, and that of Osmanie, third and second classes.

S.

Joseph Covo I.: Chief rabbi and author; lived at Salonica at the end of the eighteenth century. He wrote a Hebrew work, "Gib'ot 'Olam" (Everlasting Hills), Salonica, 1744, a collection of responsa and sermons arranged according to the order of the pericopes. See Azulai, "Shem ha-Gedolim," *s.v.*

G.

Joseph Covo II.: Turkish rabbi and author; grandson of Joseph Covo I. He lived at Salonica at the end of the eighteenth century, and wrote "Ben Porat Yosef" (Fruit-Bearing Branch of Joseph), Salonica, 1797, a Hebrew work relating to the religious ordinances. See Azulai, "Shem ha-Gedolim," *s.v.*

S.

Raphael Ḥayyim Abraham Covo: Turkish rabbi and author; lived at Salonica, where he was chief rabbi from 1772 till his death in 1792; wrote the Hebrew responsa "Ḥayye Abraham," Salonica, 1804. See Ḥazan, "Ha-Ma'alot li-Shelomoh," *s.v.*

S. M. Fr.

COWAN, PHINEAS: English merchant, volunteer officer, and alderman; born at Chatham 1832; died at Buxton Oct. 22, 1899. From the first he took a keen interest in the Volunteer movement; he was a member of the Honorable Artillery Company; and in 1863 joined the Third London Rifles with three companies raised from his own workmen. He became lieutenant-colonel in this regiment, retiring in 1880 with the queen's permission to retain his rank. In 1883 he was elected sheriff of London and Middlesex during the first mayoralty of Sir R. N. Fowler, and in 1885 was elected alderman of the ward of Cordwainer, which office he resigned in 1892 owing to the claims of business.

Cowan served on the council of the Anglo-Jewish Association, and was closely associated with the Jews' Hospital and Orphan Asylum. He was a Conservative in politics, and in 1885 unsuccessfully contested the newly formed constituency of Whitechapel with Sir Samuel Montagu, Bart.

Bibliography: *Jewish Chronicle*, London, Oct. 27, 1899.

COWEN, FREDERIC HYMEN: English conductor and composer; born at Kingston, Jamaica, Jan 29, 1852; at the age of four he was taken to England. From his earliest years he enjoyed exceptional advantages in being brought into contact with the greatest artists during his father's treasurership to Her Majesty's and Drury Lane theaters. At the age of eight he had composed the music of an operetta entitled "Garibaldi"; and, studying under Sir Julius Benedict and Sir John Goss, on reaching his twelfth year he was thoroughly at home in Beethoven's sonatas.

Cowen made his first appearance in public at the age of eleven, in the concert-room of Her Majesty's Theater; and the following year the young musician gave a concert at Dudley House, at which Trebelli, Joachim, and Santley assisted. When fourteen years old he left for Leipsic to enter the Conservatory; and there he studied under Reinecke, Moscheles, and Moritz Hauptmann. Returning to London, he gave several matinées at Dudley House, and then proceeded to Berlin to resume his studies. Among his more popular early works were the cantata "The Rose Maiden," 1870; "The Language of Flowers"; and the "Scandinavian Symphony," 1880.

Frederic Hymen Cowen.

From 1871 to 1877 Cowen accompanied Her Majesty's Opera; he was conductor of the Covent Garden promenade concerts, 1880; of the Philharmonic concerts, 1888-92; and was specially summoned to Australia as conductor of the Melbourne Centennial Exhibition, 1888-89. Later he was appointed to succeed the late Sir Charles Hallé in the conductorship of the Manchester, Liverpool, and Bradford concerts, 1896.

Cowen's chief works, besides those already mentioned, are: "The Corsair," cantata, 1876; "Pauline," opera, 1876; "St. Ursula," cantata, 1881; "Welsh Symphony," 1884; "Sleeping Beauty," cantata, 1885; "Ruth," oratorio, written for the Worcester Festival, 1887; "Song of Thanksgiving," 1888; "St. John's Eve," cantata, 1889; "Thorgrim," opera, 1890; "Signa," an opera performed in Milan in 1893 and subsequently produced in London by Sir Augustus Harris; "The Water-Lily," cantata, written for the Norwich Festival, 1892; "Harold," an opera performed at Covent Garden, 1895; "The Transfiguration," oratorio, composed for the Gloucester Festival, 1895; "In Fairyland," suite, 1896; "Idyllic Symphony"; "Dream of Endymion," 1897; "Ode to the Passions," 1898. Cowen has also published over 200 songs, duets, piano pieces, etc.

COWEN, ISRAEL: American lawyer and jurist; son of Bennett and Bertha Cowen; born in Houston, Texas, Dec. 12, 1861; received his early education in the public schools of Texas and California, and in a private school in New York city. He then studied seven years in Germany, and, returning to Chicago in June, 1881, received the degree of LL.B. from the Northwestern University, being admitted to the bar Jan. 4, 1883.

Cowen was appointed master in chancery of the superior court of Cook county, Illinois, May, 1896, serving until March, 1899, and was nominated for judge of the superior court upon the Democratic ticket in 1900. He has been for several years identified with the order of B'nai B'rith, and in 1893 was chosen president of District No. 6. Since July, 1891, Cowen has held a membership on the Board of Delegates on Civil and Religious Rights. For many years he was a member of the executive committee of the Hebrew Sabbath-School Union, and is connected with many other national and local Jewish organizations. At the memorial services for Sir Moses Montefiore, held in the Chicago Opera House Aug. 30, 1885, he was the presiding officer.

Cowen has been an extensive contributor, in poetry and prose, to the religious and secular press, and has delivered many lectures in all parts of the country on both Jewish and public questions.
A. M. P. J.

COWEN (originally **Cohen**), **LAURENCE:** Journalist and politician; born in 1865 at Hull. For some years he lived at Newcastle-on-Tyne, where his father, E. Cohen, acted as ḥazzan. He went to London in 1888, and was on the staff of "Ariel," the paper conducted by Israel Zangwill. Later he established the journals "Commerce" and "Finance," of both of which he is (1901) the editor. These and "The Topical Times" are among the journals owned by his firm, "The Columbus Company, Limited," of which Cowen is the head. He is the founder and honorary secretary of the Article Club, an institution including most of the chief manufacturing firms in England. In 1899 he received the Knight Commander's Cross of the Order of Takovo, for services rendered in furthering the commercial interests of Servia. In Oct., 1900, he unsuccessfully contested Coventry in the Liberal interest.

Cowen in 1897 married Hélène Gingold, the novelist, granddaughter of Sulzer, the cantor and composer. His brother **Louis Cowen,** journalist, collaborated, under the pseudonym "J. Freeman Bell," with Israel Zangwill in his first book, "The Premier and the Painter," and in other productions.

COWEN, LIONEL: Painter; born 1846; died Aug., 1895; brother of Frederic H. Cowen, the composer. Cowen, a painter of considerable ability, was a member of the Royal Society of British Artists, and frequently exhibited at the Royal Academy. He died at sea in 1895, while on his way home from Hobart Town, Tasmania, where he had been for some years engaged in the practise of his art.

J. G. L.

COWEN, PHILIP: Jewish publisher and communal worker; born in New York city in 1853; educated in the public schools; was one of the founders and publisher of "The American Hebrew" (see American Hebrew), and has published several works of importance in American Jewish literature. He was interested in the organization of the Young Men's Hebrew Association, active in caring for the Russian Jewish immigrants in 1881–82, and collected the Jewish church statistics for the census of 1890. In 1902 Cowen was appointed supervisor of "The City Record," an important office in the city government of New York.

A. S.

COZBI ("deceiving"): A Midianitish woman, daughter of Zur, the leader of a tribe. She was put to death along with the Israelite Zimri by Phinehas (Num. xxv. 14–18).

E. G. H. G. B. L.

CRACOW (Polish, **Kracow**): A city of Galicia, Austria, formerly the capital of the kingdom of Poland; founded about 700 C.E. There are no records of the early history of the Jewish community of Cracow, but it is probable that the Jews gained a foothold in the city after the German inhabitants had forfeited their privileges by a revolt against King Ladislaus Lokietek (the Short) in 1311, and that their position became more secure when that monarch removed his capital from Gnesen to Cracow (1312). The ruins of the palace of Lobzow, where Casimir the Great was said to have spent his leisure time with his beautiful Jewish mistress Esterka, are near Cracow, and a large mound of earth in the garden was reverenced as her grave as late as the first half of the nineteenth century. The only record of that period is the massacre in 1348, at the time of the Black Death riots. Records show that the Jews owned houses and lived in Cracow at the end of the fourteenth century, and that King Jagiello (or Jagellon) in 1400 bought from the Jew Jossman one of the stone houses which formed the new university (Sternberg, "Gesch. der Juden in Polen," p. 87). Riots against Jews occurred during the Easter week of 1407, when the mobs were incited by the priest Budek. The Jewish quarter was fired; and in the conflagration a church and several streets inhabited by Christians were destroyed. The visit of Capistrano (Aug., 1453, to May, 1454) had there the same disastrous results for the Jews as it had in other places which he visited (see Responsa of R. M. Minz, No. 63, Cracow, 1617). In 1464 the Jews of Cracow were plundered, and thirty of them killed, by Crusaders. The attacks and riots became so frequent that King John Albert, in 1494, ordered the Jews of Cracow to settle in the present suburb of Kazimierz, which was then a separate city, and it has remained the Jewish quarter ever since. The Judengasse of Cracow proper is the only witness to the fact that Jews lived there before they were confined to Kazimierz. The change gave them no greater security, for their new quarters were attacked with the usual results as soon as the king left the capital.

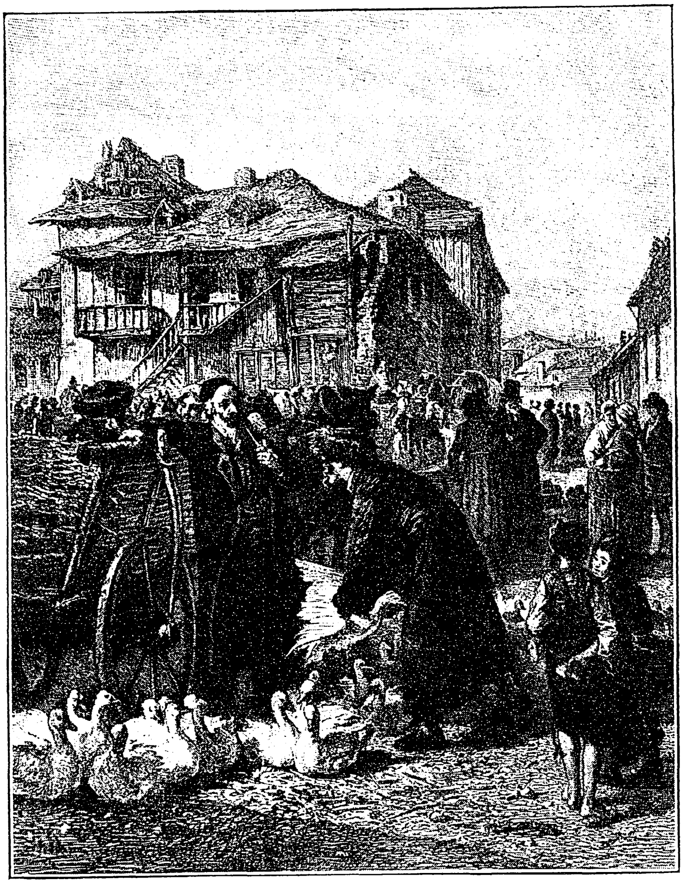
Fifteenth Century.

The students of the Cracow University were generally prominent in attacks on the Jews, and their persecutions led to the establishment of relations between the Jews and the authorities of the university, in the records of which the Jews of Cracow are first met with as a corporate body. A Jewish banker was appointed to lend money to students on pledges, and being appointed by the rector, he had the title of privileged servant of the university. In this way the banker became the protector of his fellows against the insults and cruelties of the students. A tax, at first irregularly collected, was also imposed upon the Jews of Cracow for the purchase of books and writing material for the students. This tax, known as "kozubalec," developed into a form of blackmail, levied under the guise of protecting them from attacks by the students.

Little is known of the communal and intellectual life of the Jews of Cracow until the sixteenth century, when both appear well developed under the rule of Sigismund I. (1506–48), who first reduced to order the administration of Jewish affairs in his dominions. It is believed that R. Jacob Pollak, who later became rabbi of Prague, stood, in his younger days, at the head of the Jewish community of Cracow (Dembitzer, "Kelilat Yofi," Preface); but the first rabbi of Cracow known as such is R. Asher, the grandfather of R. Meïr (MaHRaM) Lublin. In his time (he was there as early as 1507, and died about 1532) there were in Cracow a number of Bohemian Jews, under a rabbi named R. Perez. As the result of a dispute between them and the Polish community under R. Asher, King Sigismund decided in 1519 that the latter owned the synagogue and could prevent the Bohemians from entering it.

Sixteenth Century.

Those times, although not entirely free from violence and persecution, were probably the best which the Jews of Cracow ever enjoyed under Polish rule. Though legally confined to Kazimierz, Jews had places of business in all the principal thoroughfares of Cracow, and even on the Ringplatz. Large penalties were imposed on the city for every riot or act of violence against the Jews. This law, however, passed by the Diet at the instance of Chancellor Christoph Szydlowiecki, fell into disuse, and was suspended by Sigismund in 1536. He nevertheless refused to grant the demand of the German merchants, in 1542, that the number of Jews in Cracow be limited, or to listen to their complaint that the Jews sent money out of the country by importing goods from Wallachia (Grätz, "Gesch." ix. 432); showing therein his willingness to protect the Jews of his capital against unjust discrimination. The waywode Peter Kmit, who rose in influence under Bona Sforza, Sigismund's second wife, did at one time spread the report that the Diet intended to grant to the Jews of Cracow complete liberty of commerce, but this was done for the purpose of extorting money from the Christian merchants. In 1539 Katharina Zelazewska, the widow of an alderman ("Rathsherr"), was burned at the stake for embracing Judaism. In 1556 cholera caused many deaths in the community, while riots by the students in December of that year, repeated in May, 1560, added to the distress of the Jews. At that time they numbered about 3,000. The "pinḳes" (communal records) shows that no deaths occurred between November, 1590, and the Feast of Tabernacles, in 1591 and only one between April and September in 1594. In January of the following year the Jews rescued all the king's treasures during a conflagration in the palace, but this did not prevent the hanging of thirteen Jews on a false charge in 1596.



The Market at Cracow in 1869.
(From a drawing by A. Schönn, by permission of D. Appleton & Co.)

The "taḳḳanot," or ordinances for the administration of the communal affairs of Cracow, preserved in the old "pinḳes," and dated 1595, comprise an almost complete municipal code. They provide for dayyanim (assistant rabbis) as administrators for charities and other institutions; include rules for marriages and for the engaging of servants and apprentices; and contain various other regulations; all of which tends to prove that the Jews formed a practically independent community, with the management of their own internal affairs. This set of rules is, however, not the oldest extant, there being some isolated regulations regarding education and other subjects dating back to 1538, and signed by David Jonathan, scribe and treasurer of the community of Cracow, together with the other rabbis, parnasim, and notables who usually appended their names to documents of that nature.

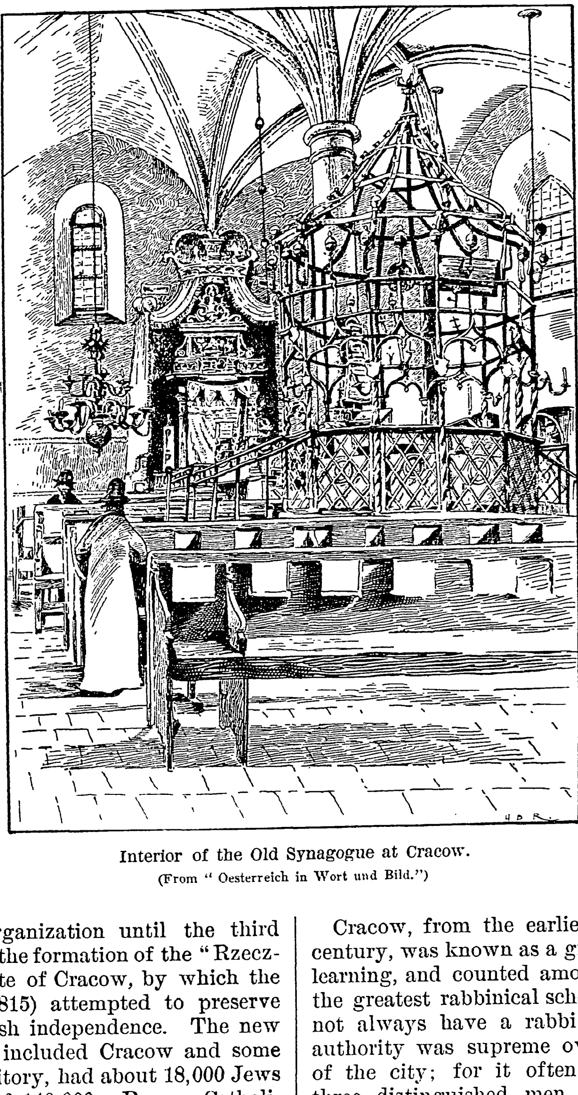
While Cracow shared the decline of Poland, which began in the seventeenth century, it still held its ascendency over the other Polish cities. A regulation of the Council of Four Lands, in 1606, decides that the gift to the king known as "spilkovi" (the "pin-tax" of later times) should always be given by the "ḳahal" (community) of Cracow, and be repaid to it from the treasury of the council, "as this is for the good of the Jews in Great and Little Poland, Podolia, and Ukraine" (Wettstein, "Ḳadmoniyyot," p. 26). The plague of 1623 devastated the Jewish quarters, and many of the communal institutions were closed.

Seventeenth Century.

Cracow did not regain its former prestige until about 1638, when arrangements were made to reopen the Talmud Torah. False accusations were very frequent at that period, when the community was disorganized and unable to protect its members. A certain R. Asher Anshel was burned at the stake in Nisan (April), 1631, R. Samuel Zanvil meeting the same fate in the following month. Four Jews were tortured and executed in Nov., 1637, and various other atrocities were perpetrated. The interesting regulations about barber-surgeons deciding who had, and who had not, the right to practise that profession, dates from Dec., 1639, and tends to prove that the community was now again in its normal condition. The terrible days of Chmielnicki and the wars of the Cossacks were now approaching, and although Cracow did not suffer in the fateful years of 1648-49, her turn came in 1655, when there was a general massacre of Jews, in which "hundreds and hundreds of heads of families lost their lives." There was no cessation even after peace was made, and in 1664 the druggist R. Matathia was burned "for blaspheming Christianity." A student riot on March 12, 1682, aroused the good king Sobieski to punish the rioters; but the Jews of Cracow found it safer to intercede in behalf of one of the leaders who was condemned to death.

Their fortunes went from bad to worse in the eighteenth century, when the impoverished and degraded community became heavily involved in debt. In Jan., 1726, the leaders and representatives issued a "keruz" (proclamation), calling upon the Jews of Cracow to contribute a twentieth part of their possessions to settle with the commission which the waywode had appointed to liquidate the debts of the community. The proclamation stated that the commission was a great boon, and that the sacrifice which the Jews of Cracow were required to make was the only means of preventing the abolition of the community and averting terrible persecutions and possible exile. The last act of the community of Cracow, before the final partition of Poland, was the "ḥerem," or great ban, pronounced there against the new sect of Ḥasidim on the 25th of Tishri (Sept. 29), 1785. It is signed by Rabbi Isaac ha-Levi and sixteen notables; but it had no more effect there than in other places, and Ḥasidism gained a firm hold in Cracow, which it has succeeded in retaining to this day.

Eighteenth Century.



Interior of the Old Synagogue at Cracow.

(From "Oesterreich in Wort und Bild.")

After the city became a part of Austrian territory in 1795, the condition of the Jews was, if possible, rendered worse than before; but when it became in 1810 a part of the duchy of Warsaw, the Jews were in theory emancipated. Still this did not prevent the new government from enacting a law which made the kasher-meat tax paid by Jews a permanent feature of the revenue. The ill-fated duchy lasted only until 1813, and the Jews practically retained their old communal organization until the third great political change—the formation of the "Rzeczpospolita," or Free State of Cracow, by which the Congress of Vienna (1815) attempted to preserve the last vestige of Polish independence. The new commonwealth, which included Cracow and some of its surrounding territory, had about 18,000 Jews in a total population of 140,000. Roman Catholicism was the official religion of the state, and a special set of laws for the Jews was adopted by the commission on organization, which placed the old community in a very lamentable condition. The kahal was abolished, and the Jews were placed under the "Gemeindevogt" (chief of the community), but not as free citizens. They were under special jurisdiction of the authorities, and burdened with so many harassing and degrading restrictions that their fate was rendered the most deplorable in Europe (Jost, "Neuere Gesch. der Israeliten," ii. 314 *et seq.*). This lasted with some slight modifications until the Free State was incorporated with the Austrian dominions in 1846. It became a part of Galicia, and has since then shared the lot of all other Jewish communities in Austria.

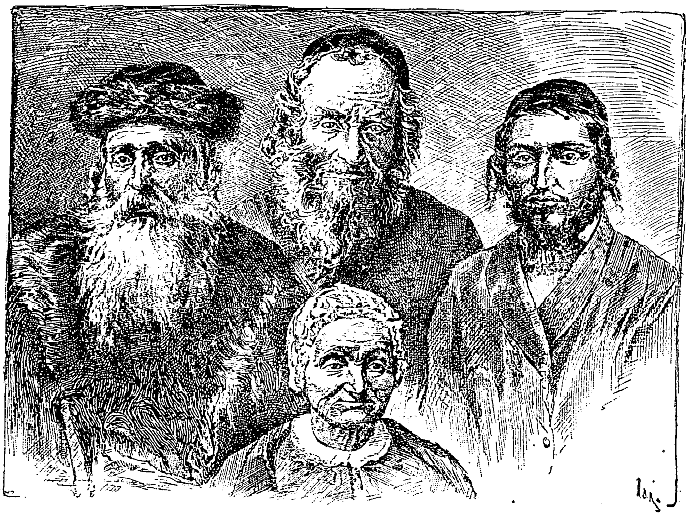
In the memorable year 1848 the Jews of Cracow, with the aid of Christian citizens, elected their rabbi, Dob Berush Meisels, as a member of the Reichsrath, which met at Kremsier, where he made a good impression. In the short-lived emancipation of that year Jews settled in all parts of the city, but in 1850 they were forced back to Kazimierz, few only remaining in Straddom, another suburb nearer the center of the city. Since their real emancipation in 1861 they have spread all over the city, although Kazimierz is to-day as much of a "Judenstadt" as when Jews were prohibited from living in any other part of the city.

Cracow was the first city in Galicia to adopt (1872), with some modifications, the new order of management for Jewish communities which was suggested by the "Musterstatut," the model plan issued by the representative of the central government after the emancipation.

Cracow, from the earlier part of the sixteenth century, was known as a great center of Talmudical learning, and counted among its citizens some of the greatest rabbinical scholars of Poland. It did not always have a rabbi or "ab bet din," whose authority was supreme over all the learned men of the city; for it often happened that two or three distinguished men stood each at the head of a "yeshibah," or great school, and acted independently of one another. R. Asher, mentioned above, was only a "rosh metibta," and so also was his contemporary R. Moses Storch. Moses Isserles (d. 1572); his brother-in-law R. Joseph b. Mor-

Rabbis and Other Notable Jews.

decai Gerson Kohen (d. 1591); Eliezer Ashkenazi (d. 1586); Isaac b. David Shapira (d. 1582); Mordecai Singer (d. 1576); Joel, the stepfather of the above-mentioned Joseph Kohen; Eliezer Treves; Meïr b. Gedaliah; Moses Mordecai Margoliot; and many other learned men have all been rabbis, or great religious teachers, who decided religious questions separately or in conjunction with others; but none of them was ever elected to the headship of the entire community. Sometimes one scholar, or even one who was not a recognized rabbinical authority, was placed, by the ruler of the land, at the head of the community, with legal jurisdiction, though not with the religious authority of the office. Such cases were rare, and most scholars succeeded one another in the limited authority which the community chose to confer on the heads of yeshibot, who were not especially selected as rabbis of the whole community.



Types of Cracow Jews.

(From "Oesterreich in Wort und Bild.")

The first rabbi who enjoyed the title of "ab bet din" of Cracow and the province was R. Isaiah Menahem b. Isaac (1591–99). His successor, R. Meshullam Phoebus, or Feivush, of Brest (d. 1617), was in Cracow at least as early as 1605.

Nathan b. Solomon Shapiro became the head of a yeshibah in 1617, and held this position until his death in 1633. He was not, however, rabbi of the community, that position being held by R. Joel ben Samuel Sirkes. Nathan was succeeded as "rosh metibta" by R. Joshua b. Joseph of Wilna, who died in 1648; and R. Joel, who died in 1640, was succeeded (1644) by R. Yom-Ṭob Lipman Heller four years later, who also succeeded R. Joshua, dying in 1654. Rabbi Joshua ben Saul Heschel (known as "Reb Heschele") of Lublin became rabbi of Cracow the same year, dying in 1664. He was succeeded by R. Aryeh Löb b. Zachariah, "the prophet" who died in 1671. His successor was R. Aaron Samuel Kaidanower of Wilna, who died in 1676, and was succeeded by R. Isaac Ḥarif Landau of Opatow, who died in 1683. The next rabbi, Aaron Teomim, who was chosen in 1687, did not arrive until 1690, and died four months after his arrival.

For about ten years, during which time no regular rabbi was appointed, R. Saul Katzenellenbogen of Pinczow attended to some of the rabbinical duties. In 1693 R. Jehudah Löb, son of R. David b. Samuel (Ṭure Zahab) of Lemberg, was chosen rabbi about 1700; he either died, or left for Brest. R. Saul, the son of the above R. Heschel, succeeded R. Löb, and died in 1707. There was again a vacancy for several years, for the next rabbi, R. Jehuda Löb b. Isaac of Shidlov, came to Cracow after 1714. He died between 1730 and 1732, and was succeeded by his son R. David Samuel Schmelka, who lived until 1741. He was succeeded by R. Isaac Joseph Teomim, who, in 1745, returned to Breslau to succeed his father. After an interregnum of nine years R. Isaac Landau of Zolkiev was chosen, and held the position until his death in 1767. He was succeeded by R. Aryeh Löb b. Samuel of Tarnow, who died 1776, and was followed by R. Isaac ha-Levi of Lemberg, who died in 1799. R. Moses Solomon of Warsaw (Brody?), formerly rabbi of Koretz, was elected to succeed him; but after preaching one sermon in the old synagogue he went to Warsaw, where he remained until his death in Dec., 1815. He retained, however, the title of rabbi of Cracow, for which he is said to have paid 500 ducats, and was so styled by others in references made to him in contemporary writings. R. Ẓebi David, son of the above R. Isaac ha-Levi, was acting rabbi until after the death of Moses Solomon, when he succeeded to the full title, and died at an advanced age in Dec., 1831. After much dissension the above-mentioned R. Berush Meisels was chosen rabbi, and nominally held that position over twenty years. His title, however, was for the greater part of that time disputed by a wing of the Ḥasidim, who considered R. Saul Landau as the rabbi. When the latter died, and R. Berush went to Warsaw in 1856, R. Alexander, the son of R. Saul, was chosen rabbi, but died a few weeks later. R. Simon Schreiber, son of R. Moses Sofer, was chosen in 1858, and remained rabbi until his death, March 26, 1883. Since then Cracow has been one of the many Austrian communities which have no rabbi, because the various factions can not agree in any selection. R. Ḥayyim Nathan Dembitzer, in succession to his brother R. Jacob Moses (d. 1863), was acting rabbi until his death in 1892. One of the dayyanim, "the rosh bet din," is at present (1902) the acting rabbi.

The most important members of the Cracow community were usually officers of the ḳahal, and at the

Important Scholars.

time when the Jews were under their own jurisdiction such officers carried with them not only religious but worldly authority. Until the abolition of the ḳahal in 1815, there were always four elected "roshim" (heads), five "ṭobim" (best, or chosen), fourteen ḳahal men, and three auditors, who practically ruled the community. Sometimes one would, on account of his great learning, or wealth, or abilities as a leader, enjoy special distinction, like R. Abraham Israel Hendels, who died in 1660, of whom it is said that he was "the leader of the community of Cracow for over fifty years." There were also many distinguished physicians, such as Isaac, the favorite of kings Alexander and Sigismund early in the sixteenth century, and Samuel, the surgeon to the queen, who is mentioned in a suit for slander in which the above R. Asher was a witness. The physician Solomon Kolahora (d. 1597) was a favorite of King Stephen Bathory. The family, which is later called "Kalihari," was still known in the last century, and has furnished many druggists, physicians, Talmudists, and "parnasim" to the community. Of the noted rabbinical scholars who were "dayyanim," or "rosh yeshibot," may be mentioned: R. Isaac ha-Kohen of Kremenetz, the father-in-law of R. Meïr Lublin; R. Joshua Kohen, who was "rosh bet din" over thirty years, and died in 1631; R. Jehuda Selkil, son-in-law of R. Joel Särkes; R. Berechiah Shapiro; R. Hirsch ha-Kohen; and R. Mordecai Krasnik, who flourished in the middle of the seventeenth century. The scribes or secretaries of the community, those whose names are found signed under the valuable records preserved in the "pinḳes," were usually also important men, and of them R. Matathia Delacrut (first half of seventeenth century), R. Isaac b. Hanoch (1660), and R. Jehuda Löb Kalischer (1738) deserve to be mentioned. The "shoḥeṭim," "bodeḳim," "menaḳḳerim," and even the butchers of Cracow were, in olden times, famous for their learning, and one of them, R. Ẓebi of Cracow, who died 1593, was the author of an authoritative work on "sheḥiṭah." Among the most prominent families in later times was the Mieses family, which removed to Germany in 1863, while reference should also be made to such scholars as Dr. M. Duschak and Dr. Landau. Of the scholars now living in Cracow, Dr. Rubin, and F. H. Wettstein deserve mention.

Synagogues.

Besides the old synagogue which was mentioned above, there are in Cracow the "new" synagogue built by Israel Isserles (father of R. Moses) in 1553; the "high" synagogue, built in 1633; one which bears the name of its builder, R. Isaac R. Yekel (d. 1673), and which was built in 1644; the "ḳuppah" (treasury) synagogue, so called because it was built (in 1647) by the community, not by private donation; and Popper's synagogue, which was finished in 1798. Cracow has also a temple of the Progressive congregation, numerous small "batte midrashim" and "stüblach," as the Ḥasidic houses of worship are called. Among the more considerable batte midrashim, of which there are about eight, the most famous is the one which tradition has connected with R. Nathan Schapiro (the author of the "Megalleh 'Amuḳḳot"), whose memory is sanctified by the pious Jews of Poland.

Present Conditions.

The Jewish community, with a population of 25,000, is ruled by a "Cultusrath" of 30 members, of which the officers are: Dr. Leon Horowitz (former member of Reichsrath), president; Hirsch Landau, vice-president; Sigmund Pelican, secretary. Other officials are: Ch. L. Horowitz, acting rabbi; Pinḥas Dembitzer, Joseph Lederberger, Kalman Gutwirth, Abr. Moses Rappoport, and Samuel Landau, rabbinats-assessors; Moses Landau, president of ḥebra ḳaddisha. Dr. Tohn is the rabbi of the Progressive or Liberal congregation. The university now has several Jewish professors (there were four in 1887), and the chamber of commerce is represented in the Reichsrath by Dr. Arnold Rappoport, a grandson of S. J. L. Rappoport of Prague, who in 1889 founded the "Israelitische Handwerksschule" (see Bloch's "Oesterreichische Wochenschrift," 1889, No. 24). The city has also various charitable organizations, and received a considerable share of the benevolent foundations of the late Baron de Hirsch in Galicia, which also includes another "Handwerksschule." The Sefat Emet society, founded in 1892, marked the beginning of the revival of the Hebrew language, and the Colonisations-Verein für Palästina, which was founded in 1893, was the forerunner of the Zionist movement, which has rapidly spread in Galicia in the last few years, and of which Solomon Fuchs, the editor of "Ha-Maggid," is one of the pioneers.

H. R. P. Wi.

——**Printing:** Cracow had the first Hebrew printing-establishment in Poland. The first books issued there were stated by Wolf to be a Pentateuch and the five Megillot (1530), and a Haggadah (1531), which do not, however, bear the name of the printer, and Steinschneider accordingly denies the existence of a press at Cracow at that date. Samuel Asher and Eliakim, the sons of Ḥayyim Halicz, established a printing-office in 1534, which survived only a short time. Johannes Halicz became a printer of Hebrew in 1538, and in 1539 he associated with him Johannes Kurzias of Glogau; but their enterprise was also short-lived, and the last work from their press is dated 1546. About a quarter of a century later Isaac b. Aaron of Prossnitz, also known as Isaac "Meḥoḳeḳ," established a printing-press in 1569, which had a better fortune. He employed as corrector Samuel, son of the martyr Isaac Bohm, who

Book-Printing. formerly lived in Venice, and the first book issued, the "Torat Ḥaṭṭat" of R. Moses Isserles, afterward reprinted three times, shows improvement over books previously printed in Cracow. Many books, some of which are now very rare, were issued from his press during the following thirty years. They included the Yalḳuṭ (1596). The earlier works, issued before 1580, when Samuel left him, vie with the best Italian products, and the title-pages are decorated after the Italian style. In 1600 R. Isaac returned to Prossnitz, but part of his plant remained in Cracow, where his three sons, Aaron, Moses Joshua, and Issachar Bär, began, in 1602, the publication of the Babylonian Talmud, finished in 1608. They did not place their names on the title-pages as printers until after their father's death (1612); but they are found, in accordance with the customs of the time, among the typesetters whose names were affixed at the end of each book. Their printers' mark was a ram.

The Polish establishments enjoyed a limited protection against foreign competition, the rabbis of Cracow and the COUNCIL OF FOUR LANDS having issued an edict that no Hebrew books printed in Poland should be reprinted in Italy, and the Italians, who had in Poland their best markets, thought it prudent to obey leaders who could effectively bar their products from that territory. Cracow was now declining, and the old printing-establishment was likewise losing ground. The last book it issued bears the date of September, 1628. There was also at that time another printing-office in Cracow, which issued one book, "Shomerim la-Boḳer," in 1627.

R. Nahum Meisels, a member of one of the best families of Cracow, embarked in the printing business in 1631. He imported new type from Venice, and made great efforts to secure prosperity for his venture. He printed many books, but the records of his business affairs show that he was generally financially embarrassed. He had frequently to bor-

row on unfavorable terms, or to take in partners; to pledge his plant and books to creditors; and, at last, to sell his house. The calamitous years of 1648–49 added to his difficulties, and in the latter year he failed, closing with the publication of "Ẓuḳ ha-'Ittim," by R. Meïr of Shebreshin, in which the disasters of the Cossack war are described in the quaint rabbinical style of that period. What remained of the plant of R. Nahum Meisels, who died in 1659, was inherited by his son-in-law, Jehuda Löb Meisels, who began to print books on a small scale in that year and continued until 1670, when he, too, was forced to suspend work.

For over 130 years in the period of the decline of Poland, Cracow had no Hebrew printing-office. In 1803 the wealthy Naphtali Hirz ha-Kohen Schapiro opened an establishment, and in 1820 his son Aaron Solomon became his associate. They sympathized with the "Haskalah," or progressive ideas, and did much to encourage its literature, but were forced to close their establishment in 1823 after having sustained great losses. There was again an interval of about forty years, when Karl Budweiser, in 1863, began the printing of Hebrew books. The most notable among the works issued from his office, before he removed to Lemberg in 1874, are those of S. J. L. Rappoport and Mieses.

Periodicals.

In 1879 Joseph Fischer established a Hebrew printing-office, which is now in a flourishing condition, and which has contributed to make Cracow a center of Neo-Hebrew literature during the last two decades. Since Ha-Maggid, the oldest of Hebrew weekly periodicals, removed to Cracow in 1892, that city has occupied an important position in the Jewish publishing world. Numerous Hebrew periodicals like "Ha-Eshkol," "Ha-Zeman," "Ha-Ḥeker," "Mi-Mizraḥ umi-Ma'arab," "Ha-Dor," the Yiddish weekly "Der Jud," and the monthly "Die Judische Familie" (the last two published by the Ahiasaf of Warsaw) appeared there; all of them, however, are now defunct. Cracow's proximity to Russia makes it a convenient place from which Russian publishers can issue books and periodicals for circulation in Russia, where permission to found a newspaper is difficult to obtain. Freedom from rigid censorship gives Cracow an advantage over greater centers like Warsaw or Wilna.

CRADLE SONGS, JUDÆO-GERMAN:

Songs written as lullabies; these exist in great variety and profusion among the Jews speaking Judæo-German or Yiddish, and among them may be quoted the following:

For boys:

Inter Yankeles wigele	Behind Jankele's cradle
Shteit a gilden tsigele;	Stands a golden goat;
Tsigele is gifurn handlen	Goat went to sell
Rozhinkelach mit mandlen.	Raisins and almonds.
Rozhinkelach mit mandlen	Raisins and almonds
Sanen di bäste schoire.	Are the best goods.
Yankele wet leirnen Toire;	Jankele will learn Torah;
Toire wet er leirnen;	Torah will he learn;
Briwelach wet er schraben,	Letters he will write,
In a eirlecher Id	And he will be a good Jew
Wet er af tomid farblaben.	And remain so for ever.

The last few lines occur in Bessarabia in the following form:

Lernen wet er keseider	He will learn properly
A por Shures, a por mailes.	A few lines, a few steps forward.
Moishinke wet paskenen shailes;	Moishinke will answer ritual questions;
Shailes wet er paskenen,	Ritual questions will he answer,
Droshes wet er darshenen.	And he will make religious speeches.

Another version, from the government of Suwalki, prophesies the boy's marriage:

Du west lernen Teire,	You will learn Torah,
Teire, Teire, in kepele,	Torah, Torah, will be in your head,
Kashe, kashe, in tepele.	Gruel, gruel, in your pot.
Puter mit breit shmirn.	You will put butter on your bread.
Der tate mit der mäme soln derleben	May father and mother live
Dir tsu der chupe firn.	To bring you under the canopy.
Firt men, firt men, tsu der chupe;	They take him, they take him, to the canopy;
Firt men, firt men, fun der chupe;	They take him, they take him, from the canopy;
Setst men aruf eibm on.	They seat him at the head of all.
In gold un in silber ongeton.	He is dressed in gold and in silver.
Git men a shtikl fleish,	They give him a piece of meat,
Sogt der chosn as di fleish is heis;	And the bridegroom says it's too hot;
Git men a shtikele of,	They give him a piece of poultry,
Sogt er di of i post.	And he says the poultry is too tough.
Darfar wet er derleben	For this he will live
Mit der kale shlofn.	To have a bride.
Shlof zhe, shlof zhe in dainem ru,	Sleep, sleep in peace,
Mach zhe daine koshere eigelach tsu;	Close your pretty eyes;
Mach zhe tsu, un efn ouf;	Close them and open them;
Kimt der tate un wekt dir ouf,	When papa comes to wake thee,
Sol er mir wekn, wi er wil,	Let him wake me as much as he likes,
Ich el mir stumachen di eigelach un shwaigen shtil.	I will close my eyes and keep quiet.

A Rumanian version looks forward to the period of the bar miẓwah:

A giter in a frimer Id wet mir dus kind blaben.	He will remain a good and pious Jew.
Toire tsiwe Moishe morushe.	Moses left us the Law as an inheritance.
Tsi der barmitswe wet es sugn a drusche;	He will make a speech at his confirmation;
Tsi der drushe wet er sech shteln.	He will rise to make a speech.
Der futer mit der miter wet unqueln;	Father and mother will swell with pride;
Gur dem oilem wet san drushe gefeln—	And the community will like his speech—
Gur dem oilem, gur der welt.	The community and the whole world.
Der futer mit der miter wet gibn nadn asach geld.	The father and the mother will give much money for his dowry.

The lullabies for girls are of a simpler nature, as may be shown by the following examples from the neighborhood of Kherson:

I.	I.
Shlof zhe, shlof, main taier kind;	Sleep, sleep, my dearest child;
Mach zhe tsu di eigelach gich un geshwind;	Close your eyes quickly;
Dain esn un dain trinken shteit shein greit do.	Your food and your drink are all ready.
Mach zhe tsu di eigelach af etlechene sho.	Close your eyes for a few hours.

II.

Dzhades un bern i do umedum ;
Sei geien in drousn arum ;
Sei obn sheine meidelach weinendik gefunen,
Obn sei gechapt un araingeworfen in brunen.

II.

Beggars and bears are all around :
They even walk around outside ;
And if they find pretty girls are crying,
They seize them and throw them into the well.

III.

Di sun is schon ufgegangn,
Der hon hot shon gekreit.
Er samelt keiches tsu dertrogn
Wos far dir is ongegreit.

III.

The sun has already risen,
The cock has already crowed.
He is gathering strength to bear
What you are getting ready for him.

IV.

Di lewone is shon arousgegangn
Fon ir getselt ;
Asei heich sol dain masel shainen
In der gantsen welt.

IV.

The moon has already disappeared
From its tent ;
So should your luck be
Over the whole world.

The following cradle song, the most elaborate collected ("Globus," xx.), is perhaps one of the most charming :

Shluf, man feigele,
Mach tsi dus eigele,
Shluf sech ois, man kind.
Di shlufst nit fraid.
Di weist nit ken laid ;
Shluf sech ois gesint.
Ich, dan miter,
Bin dan beshitser ;
Schluf sech ois gesint.
Der schluf der giter
Asoi, wi a hiter,
Shteit ba dir bis fri.
Mit san fligele
Iber dan wigele,
Dekt er dich sthil tsi.
Di shpilst sech af dan brist
Mit dane hentelech imsist.
Der takt hot ba dir ken wert ;
In mit di fingerlech
Oif di klingerlech
Piano in konzert.
Di west oifshtein fin den wig,
Hosti arbet genig
Far dir ungegrait atsind—
Shtikn shichelach,
Laienen bichelech.
Shluf derwal, man kind,
As s'wet weren a roit flekele
Oif dan bekele ;
Wet men wisen dan main.
Di west a kik tun finder sat,
Shtein inge lat,
Rach geklait in shain.
Dech wel'n libn,
Presenten gibn,
Solste sugn nain.
Di eltern soln leiben
In nadn geibn
Toisenter asach ;
Sech kishn in malechl,
Chusn mit der kalechl.
Mir weln sech frain glach mit ach ;
Di west gain a kleid
Mit shlaires banait.
Di west sech drein aher in ahin ;
In fin dan windele,
Man klain kindele,
Wet wern a karnolin ;
Di west tantsn in sal
Af dem gepitsten pol ;
Di west unmachn a wind
Demelst taminju ;
Westi heisn daminju.
Shluf derwal gesint,
Di west tsi der chipe gain
Ungetin shain.
Demelst westi wern rain fin sind.
Di west sitsen bam tish
Di west esn gefilte fish.
Shluf derwal, man kind.
Di west habn a klains,
A fans in a shains ;
Di west's libn wi ich lib dech ;
Di west im oiskishen yeider glidele.
West im singn dus lidele :
Shluf sech ois gesint !

Sleep, my birdie,
Close your eyes ;
Sleep enough, my child.
You sleep with joy.
You know of no sorrow ;
Sleep with health.
I, your mother,
Am your owner ;
Sleep with health.
The good angel of sleep
Will, like a guardian,
Stand by you till morning.
With his wings
Over your cradle,
He covers you well.
You play on your bosom
With your little hands.
Rhythm has no value to you ;
And with your little fingers
You play on the bells
As if it were a piano in a concert.
When you shall go out from your cradle,
You will have work enough
Prepared for you—
To embroider shoes,
To pray from books.
Meanwhile sleep, my child,
And a red spot will appear
On your cheek ;
They will know you're mine.
You will look sideways,
And young men will stand there,
Richly dressed and handsome.
They will love you,
And give you presents,
But you should refuse them.
Your parents shall live
And give you a dowry
Of many thousands ;
Shall kiss each other on the mouth
The bridegroom and the bride.
We will take joy in joy ;
You will wear a dress
With lace sewed on it.
You will turn around and around ;
And your swaddling clothes,
My little child,
Shall become crinoline ;
You will dance in a hall
On a polished floor ;
You will create a wind
Then, my sweet one ;
You will be called "lady."
Meanwhile sleep in health,
And you will go to the canopy
Nicely dressed.
Then you will be cleared from sin.
You will sit at the table
And eat stuffed fish.
Meanwhile sleep, my child.
You will have a little one,
A good one and a pretty one ;
You will love it as I love you ;
You will kiss every limb,
You will sing to it this song :
Take your sleep in health !

J. M. Gr.

CRAJOVA : Chief town of the district of Dolschi ; ancient capital of the Banat of Oltenie, Lower Wallachia. It may be assumed that Jews settled here at a very early period, some, doubtless, under Ladislaus Basarab between 1365 and 1367, after the expulsion of the Jews from Hungary by Louis the Great. At the beginning of the seventeenth century there was an organized community with a rabbi at Crajova. Many Jews coming from Turkey on business, settled in the city, and when Oltenie came under Austrian rule, in 1718, the community was probably augmented by new arrivals of Austrian and Hungarian Jews. The letter of privileges granted to the Bulgarian colonies (Oct. 1, 1727) by Charles VI. of Austria, forbade the Jews, as well as the Turks and the Greeks, of Crajova to display their goods at the fairs held in the city, the great annual fair being excepted. But when Oltenie again became part of Wallachia, in 1739, the privileges accorded to the Bulgarians were withdrawn, and the Jews of Crajova were once more free to ply their trades.

The community of Crajova, like all the Jewish communities of Wallachia, was under the jurisdiction of the Jewish starost of Bucharest, and therefore, since the beginning of the eighteenth century, under that of the ḥakam-bashi of Jassy. There was probably a starost-wekil at Crajova, who was raised to the rank of starost in 1805.

It is impossible to estimate even approximately the number of Jews formerly living at Crajova, for

Wallachia suffered greatly during the wars between Turkey and Austria, especially from the incursions of the bashi-bazouks and, later, from the armed hordes of Pasvant-Oglu. These inroads always forced the inhabitants of Crajova to disperse and seek refuge either beyond the Danube or beyond the Carpathians. According to the census of 1899 there were 2,891 Jews in a total population of 45,493. According to the statistics of trades made in 1900, which are very incomplete, there were 286 Jewish artisans. The Jewish population of Crajova is divided into two communities—Sephardim and Ashkenazim, the latter being the larger, and also the poorer. Each has its synagogue and its ḥebra ḳaddisha, but both use the same cemetery. They do not agree well together, in spite of the boys' school they maintain in common; but the Zion Society, now Independent Order B'nai B'rith, has done much to moderate their differences and lead to a better understanding between them. In consequence of these differences, however, Crajova is the only important Rumanian community without a rabbi.

Though the Jews of Crajova have lived in perfect accord with their Christian fellow citizens, the city has become during the last twenty-five years a center of anti-Semitic agitation. During the national festival of May 10, 1883, mobs went through the city, smashing the windows of Jewish shops and wounding some persons; a few days later one of the Jewish synagogues was set on fire. In 1884 a bomb was thrown into the theater while a Jewish company was playing. Since that time anti-Semitic hostilities and agitation have greatly increased, so that the Jews are leaving the city in great numbers.

CRANE: A rendering, in the A. V., of the Hebrew word סוּס or סִיס, which in the R. V. is more correctly translated "swallow." "Crane," however, is the proper rendering in the R. V. of the word עָגוּר, as in Isa. xxxviii. 14 and Jer. viii. 7. The first of these texts describes the crane as a bird that chatters; while the second points out its migratory character. The bird now identified with this crane, on the authority of Tristram and Hart, is the *Grus communis*. It is met with in Palestine in large numbers during the summer; and it winters generally in northern Africa. It is said to be the largest bird now found in Palestine, often measuring four feet in length. It gathers in large flocks at common roosting-places, where the chatter and clanging of its notes may be heard, especially at night, at a long distance. The peculiar anatomy of this bird has for some years engaged the attention of zoologists.

E. G. H. I. M. P.

CRANIOMETRY: The methods of measuring skulls for the purpose of determining certain topographical relations, the most important measurement of the skull being the cranial index, or the cephalic index in case the measurements are taken on the living. This consists in the ratio of the width of the head above the ears to the length of the head from the forehead to the most distant point at the back of the head. The cephalic index is expressed by multiplying the width of the head by 100 and dividing the product by the length. Thus, supposing a head to be 153 mm. wide and 186 mm. long, then $\frac{153 \times 100}{186} = 82.26$, the cephalic index. The broader or rounder a head is, the higher is its cephalic index, and vice versa. When the cephalic index is above 80 anthropologists term it "brachycephalic"; between 75 and 80, "mesocephalic"; and less than 75, "dolichocephalic."

There have been but few measurements of Jewish skulls, most of the measurements of Jews having been taken on the living. The following is a list of the measurements of 100 Jewish skulls taken by various anthropologists:

Origin.	No. of Skulls.	Cranial Index.	Observer.
Italian	3	76.33	Davis
Dutch	2	76.33	"
Polish	2	79.00	"
Various	15	78.4	Welcker
African	3	75.0	Pruner-Bey
Holland	5	77.48	Dusseau
Germany	4	....	Weissbach
Basel (13th and 14th centuries)	12	84.66	Kallman
Rome 2d (century)	5	78.5	Lombroso
Oran	1	74.4	Quatrefages
Paris	1	82.4	"
Constantinople	17	74.5	Ikoff
Crimea (Karaites)	30	83.3	"

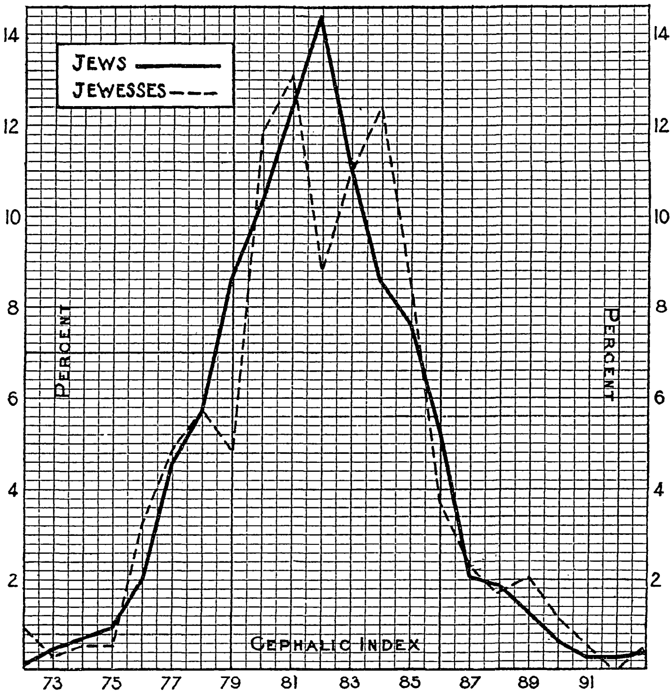
The 30 Crimean skulls measured by Ikoff, being those of Karaites, can not, perhaps, be considered Jewish in the strict sense of the word; and no conclusion can be drawn from the remaining 70.

Cephalic Index.

Resort must be had to an analysis of the measurements of the living for the determination of the Jewish cranial type. Appended is a table of nearly 3,000 Jewish heads, from various countries, measured during the last twenty years:

Country.	Number.	Cephalic Index.	Dolichocephalic, −75.	Mesocephalic, 75-80.	Brachycephalic, 80+.	Observer.
Galicia	413	83.6 81.7	3.63	17.67	78.69	Mejer and Kopernicki
Russia	100	83.11	1.00	13.00	86.00	Blechman
"	100	82.5	1.00	18.00	81.00	Weissenberg
"	67	82.2	....	17.9	82.1	Stieda
Lithuania	69	81.7	0.9	15.94	84.06	Talko-Hryncewicz
Ukraine	438	82.2		13.47	85.61	
Italy	112	82.14	2.68	19.64	77.68	Lombroso
Various	19	82.2	....	26.3	73.8	Weisbach
Russia	139	80.9	2.16	31.65	66.19	Yakowenko
Bosnia	55	80.1	7.3	34.5	58.2	Glück
Baden	86	83.5	....	11.6	87.8	Ammon
Caucasus	53	85.2	....	1.7	98.3	Pantukhof
Russia	51	82.8	....	....	....	Ikoff
England	363	80.0	....	....	....	Jacobs
Poland	325	81.9	1.0	22.0	77.0	Elkind
Italy	34	81.6	....	....	....	Livi
Various	500	82.12	1.8	23.8	74.4	Fishberg

On an examination of the figures in this table a remarkable uniformity of the cephalic index of the modern Jews will be noticed. Excepting the Caucasian Jews, of whom but few have been measured, it is shown that nearly 90 per cent are between 81.5 and 83. This indicates a limited variability and differentiation. In fact, the differences are so slight (from 80 to 83) that they may be fairly assigned to the usual discrepancies between different series of measurements of a single and homogeneous race. Another remarkable fact is the striking absence of the dolichocephalic type, which is characteristic of all the other modern Semitic races and tribes, as the Arabs, Syrians, Abyssinians, etc. Among the modern Jews this ranges, as is seen in the table, from 1 per cent, in Blechman's series, to 7.3 per cent in Glück's. On the other hand, the brachycephalic type predominates, nearly all the series showing more than 60 per cent of heads having a cephalic index of over 80.



Cephalic Index of 1,071 Jews and 345 Jewesses.

The index is indicated along the base-line. The percentage of a given index is indicated by the altitude.

Arrangement by Curve.

Modern anthropologists do not rely solely on averages for the purpose of ascertaining the character of a given race. The best test at present at the command of the anthropologist, of the homogeneity or variability of a race, is the seriation and coordination of the figures obtained by measurement, and the representation of them graphically in the form of a curve. In case the people investigated is a mixed race, its component elements are shown in the curve by different culminating points. From the literature on the anthropology of the Jews 1,071 measurements of Jewish heads in various countries have been collected, and the data has been arranged in curve-form. The figures from which the appended diagram is derived were obtained from the following sources:

139 Russian Jews, measurements made by Yakowenko.
100 " " " " Blechman.
100 " " " " Weissenberg.
67 " " " " Stieda.
112 Italian " " " Lombroso.
53 Caucasian " " " Pantukhof.
500 Jews from various countries measured by Fishberg.
1,071

These 1,071 heads are classified as follows: dolichocephalic, 17 = 1.58 per cent; mesocephalic, 235 = 21.94 per cent; brachycephalic, 819 = 76.48 per cent.

What is most worthy of notice is the small percentage of dolichocephaly—only 1.58 per cent—and the large preponderance of brachycephaly, 76.48 per cent. The graphic representation of these 1,071 measurements is shown on the accompanying diagram. The cephalic index is marked from left to right, the percentage of persons having a given index being indicated above each index. Thus, 10.46 per cent of heads have an index of 80; 14.19 per cent, one of 82; and so on. The curve culminates at the index of 82—corresponding exactly to the average and also to the mean index. The largest percentage of people have this cephalic index; and around them are clustered the majority of heads—those having larger indexes to the right, and those with smaller indexes to the left. At the index of 75 the line of the curve begins to ascend regularly and rapidly, until it reaches 82, when it rapidly descends. It thus forms an acute pyramid with its apex almost in the middle. "A sharp pyramid generally denotes a homogeneous people: if they were all precisely alike, a single vertical line, 100 per cent, would result" (Ripley).

The cephalic indexes from which this curve was obtained were those of Jews in various parts of the world. Russian Jews are those observed by Yakowenko, Blechman, Weissenberg, etc.; Italian Jews (Sephardim), by Lombroso; Causasian Jews, by Pantukhof; while those measured by Fishberg include Russian, Polish, Austrian, Hungarian, Rumanian, German, and American Jews. Some, though very few, in the last-mentioned series are of African origin. When figures taken from such diverse elements of Judaism present such a homogeneity, it can safely be concluded that the cranial type of the modern Jews shows very little if any intermixture of foreign blood. So little has this been anticipated that Lombroso, in his frequently quoted comparison of 95 Italian and 112 Jewish heads, insists upon the variability of the latter;

whereas, if he had drawn a curve, the result would have shown several apexes among the Italians and only one, and that a steep one, for the Jews at the usual index (82—), leading to an exactly opposite conclusion to that of Lombroso.

There appears no perceptible difference between the cephalic index of Jews and that of Jewesses, as can be seen from the following table:

Observer.	Cephalic Index.	
	Men.	Women.
Talko-Hryncewicz	82.20	83.00
Majer and Kopernicki	81.70	80.30
Weissenberg	82.50	82.40
Elkind	81.90	82.90
Yakowenko	80.90	81.24
Fishberg	82.12	83.00

Skulls of Jewesses.

In the measurements of 345 heads of Jewish women collected by Fishberg (50 from Weissenberg's measurements, 80 from Yakowenko's, and 215 from Fishberg's), the following distribution is found: dolichocephalic, 9 = 2.61 per cent; mesocephalic, 67 = 19.42 per cent; brachycephalic, 269 = 77.97 per cent. These figures agree with those cited above for men. A curve drawn from the measurements of 345 heads of Jewesses here recorded has the appearance indicated in the accompanying diagram. It will be observed that this curve is not a smooth pyramid, as is the curve of the cephalic index of Jews. It shows, in fact, a decided double apex: one pointing at an index of 81, the other at 84, which seems to indicate a greater variability and differentiation in Jewish females than in Jewish males. This is contrary to what has been observed throughout the organic world. This point, recently brought out by Fishberg ("American Anthropologist," Oct.-Dec. 1902), is of sufficient scientific interest to merit further investigation.

The absolute figures obtained by craniometry of modern European Jews show a striking uniformity unknown among other civilized races. In the accompanying table the length of the head varies from 183 mm. in Majer's and Kopernicki's, Weissenberg's, and Yakowenko's series, to 188 mm. in Blechman's—a difference of only 5 mm., which is comparatively insignificant. The same is the case with the width of the head, which varies from 150 to 156 mm.—a difference of only 6 mm.

Observer.	Length of Head.	Width of Head.
	Millimeters.	Millimeters.
Majer and Kopernicki:		
Series I	183	153
" II	186	152
Stieda	187	154
Weissbach	185	152
Blechman	188	156
Weissenberg	183	151
Talko-Hryncewicz:		
Ukraine	185	153
Lithuania	187	153
Yakowenko	183	150
Glück	186	149
Elkind	184	151

Circumference of Jewish Skulls.

Of the other measurements of the head, the horizontal circumference is important enough to be mentioned here. A table giving figures on this subject is appended:

Observer.	Circumference of Head.	
	Men.	Women.
Talko-Hryncewicz	549 551	512 528
Majer and Kopernicki	543	535
Yakowenko	564	532
Weissenberg	550	536
Glück	546	...
Blechman	557	...
Stieda	552	...
Weisbach	558	...
Elkind	553	536

As is the universal rule, the circumference of the head of the male is greater than that of the female by about 2.5 cm. (1 inch). Another point worth noting is that (wherever data are obtainable) the circumference of the head among the Jews is, as a rule, greater than that among the races with whom they dwell.

The most important problem suggested by a study of craniometrical results concerning Jews is the relation of the type head of the modern Jews to that of the ancient Hebrews and to the modern Semitic skulls. The pure Semitic skull is dolichocephalic, as may be seen from a study of the heads of modern Arabs, Abyssinians, Syrians, etc. The cephalic index of these races is from 73 to 77. As is at present accepted by nearly all anthropologists, the shape of the head is the most stable characteristic of a given race. It is little if at all influenced by climate, environment, nutrition, or sexual and social selection. The only way the type of the head may change is by intermixture with other races. If the ancient Hebrews were of the same stock as the modern non-Jewish Semites, and if the modern Jews are their descendants, then a pure dolichocephalic type of head would be expected among the Jews. As has been seen, all the results of craniometry prove that the Jews are brachycephalic, and that the dolichocephalic form is only found among them in less than two per cent of cases.

Ancient Jewish Skulls.

This can be explained in two ways: either the modern Jews have very little Semitic blood in their veins, as Lombroso, Luschan, and others are inclined to think, or the ancient Hebrews may have been a brachycephalic race. In order to establish this, an examination is necessary of more skulls of ancient Hebrews, which are not available at present. The only skulls of ancient Hebrews recorded are five obtained by Lombroso from the catacomb of St. Calixtus in Rome, dating back to 150 C.E. Lombroso aptly remarks that these skulls are of great importance, because at the period from which they are derived (second century), there could not have been any considerable racial intermixture of the Jews with other peoples, and the cranial type they represent should be considered pure. The cranial indexes of these skulls are 80, 76.1, 78, 83.4, and 75.1, giving an average cephalic index for the living of 80.5, which is far above the cephalic index of the non-Jewish Semites.

Of course, no positive conclusion can be drawn from only five skulls; still, the fact that among these are found two brachycephalic and only one dolichocephalic, points strongly against the opinion that the ancient Hebrews were a purely dolichocephalic race.

The twelve skulls from a Jewish cemetery in Basel, of the thirteenth and fourteenth centuries, which have been examined by Kollmann, are even more brachycephalic than those of contemporary Jews. The average cranial index of these skulls is 84.66; *i.e.*, a cephalic index of 86.66. This again shows that the brachycephalism of the modern Jews is not of recent origin.

It can therefore be stated that the modern European Jews are shown by craniometrical evidence to be a pure type, and that no evidence of appreciable racial intermixture is discoverable. The opinion that the Sephardim are dolichocephalic, while the Ashkenazim are brachycephalic, is not supported by craniometrical research on European Jews. The measurements by Jacobs, Lombroso, Livi, and Glück prove that the Sephardim are almost as brachycephalic as are the Ashkenazim, as can be seen from the accompanying table. Jacobs' measurements of the Jews in London show that the percentage of dolichocephalic is even larger among the Ashkenazim, being 28.3 per cent, as against only 17 per cent among Sephardim.

J. M. Fi.

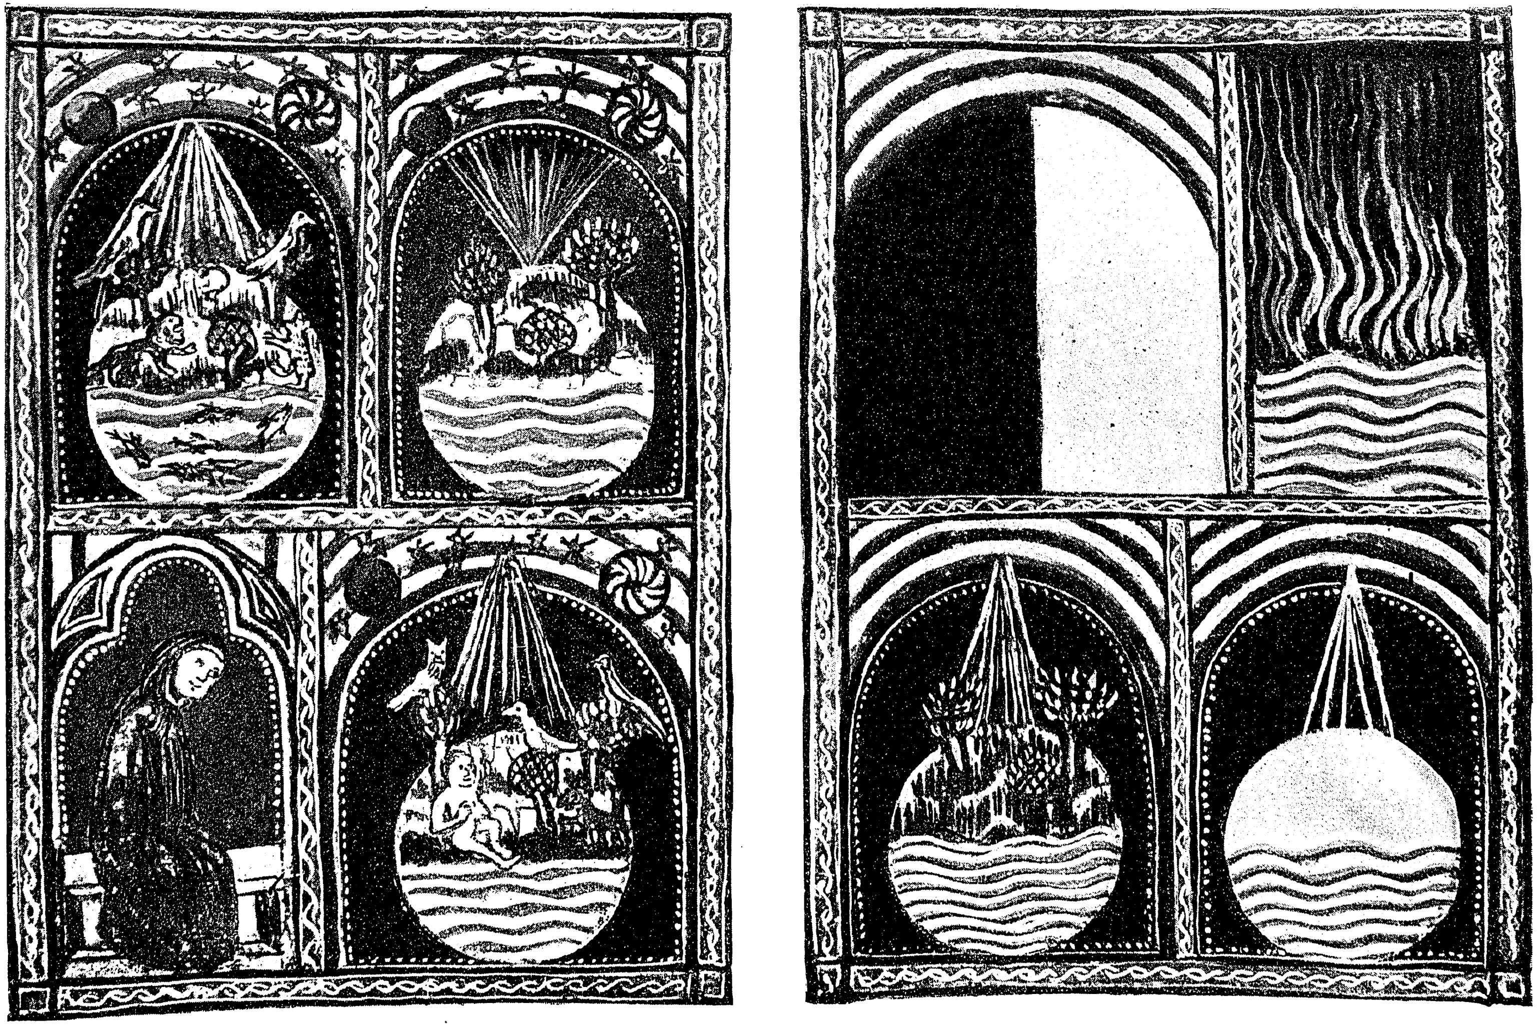
CREATION: The bringing into existence of the world by the act of God. Most Jewish philosophers find in בריאה (Gen. i. 1) creation *ex nihilo* (יש מאין). The etymological meaning of the verb בריאה, however, is "to cut out and put into shape," and thus presupposes the use of material. This fact was recognized by Ibn Ezra and Naḥmanides, for instance (commentaries on Gen. i. 1; see also Maimonides, "Moreh Nebukim," ii. 30), and constitutes one of the arguments in the discussion of the problem.

Whatever may be the nature of the traditions in Genesis (see Cosmogony), and however strong may be the presumption that they suggest the existence of an original substance which was reshaped in accordance with the Deity's purposes (see Dragon; Darkness), it is clear that the Prophets and many of the Psalms accept without reservation the doctrine of creation from nothing by the will of a supermundane personal God (Ps. xxxiii. 6–9, cii. 26, cxxi. 2; Jer. x. 12; Isa. xlii. 5, xlv. 7–9): "By the word of the Lord were the heavens made; and all the host of them by the breath of his mouth." To such a degree has this found acceptance as the doctrine of the Synagogue that God has come to be designated as "He who spake and the world sprang into existence" (see Baruk She-Amar and 'Er. 13b; Meg. 13b; Sanh. 19a, 105a; Ḳid. 31a; Ḥul. 63b, 84b; Sifre to Num. § 84; Gen. R. 34b; Ex. R. xxv.; Shab. 139a; Midrash Mishle, 10c). God is "the author of creation," עושה בראשית ("bereshit" having become the technical term for "creation"; Gen. R. xvi.; Ber. 54a, 58a; Ḥag. 12a, 18a; Ḥul. 83a; Ecclus. [Sirach] xv. 14).

The belief in God as the author of creation ranks first among the thirteen fundamentals (see Articles of Faith) enumerated by Maimonides. It occurs in the Yigdal, where God is called קדמון לכל דבר אשר נברא, "anterior [because Himself uncreated] to all that was created"; in the Adon 'Olam; and it is taught in all modern Jewish catechisms.

Difficulties of the Conception.

Nevertheless, Jewish literature (Talmudic, pseudepigraphic, and philosophical) shows that the difficulties involved in this assumption of a creation *ex nihilo* (יש מאין) and in time, were recognized at a very early day, and that there were many among the Jews who spoke out on this subject with perfect candor and freedom. Around the first chapter of Genesis was waged many a controversy with both fellow Jews and non-Jews. The influence of Greek ideas is clearly discernible in various Midrashic homilies on the subject—*e.g.*, those dealing with the mode of divine creation (Gen. R. i., "God looked into the Torah, and through it He created"—a Platonic idea; *ib.* x.); with the view of God as architect (*ib.* i.; Ḥag. 12; compare Philo, "De Opificiis Mundi," iv.); with the creative word or letter (Gen. R. i.; Midr. ha-Gadol, ed. Schechter, pp. 10 *et seq.*; Pesiḳ. R. xxi.; Yer. Ḥag. ii. 77c); with the original elements (Gen. R. x.; Ex. R. xiii., xv.; Yer. Ḥag. ii. 77a); with the order of creation, the subject of the well-known controversy between the schools of Hillel and Shammai (compare Ḥag. 12a; Ta'an. 32a; Pirḳe R. El. xxxvi.); with the various acts of creation assigned to various days (Charles, "Book of Jubilees," 1902, pp. 11 *et seq.*); with the time consumed in creation (Ber. R, xii.); with successive creations (Pes. 54a; Gen. R. i.; Ab. R. N. xxxvii.); and, finally, with the purpose of creation (Abot vi.; Sanh. 98b; Ber. 6b, 61b; see also Bacher, "Ag. Tan." and "Ag. Pal. Amor.," Indices, *s.v.* "Weltschöpfung," etc.). The Slavonic Enoch (xxiii.–xxxv.) contains an elaborate presentation of old Jewish cosmogonic speculations, apparently under Egyptian Orphic influences (see N. Bonwetsch, "Das Slavische Henochbuch," Berlin, 1896; "The Book of the Secrets of Enoch," ed. by W. R. Morfill and R. H. Charles, Oxford, 1896).



II. STAGES OF CREATION. I.

From right to left: I. Chaos; Division of Light from Darkness; Separation of Earth and Water; Vegetation. II. Sun, Moon, and Stars; Fishes and Birds; Animals and Man; Sabbath Rest.

(From the Sarajevo Haggadah of the fourteenth century.)

The danger lest speculation on creation might lead to Gnosticism underlies the hesitancy to leave the study of Gen. i. open to all without restriction (Sanh. 37a; Deut. R. ii.; Ḥag. 19b; Midr. Teh. to Ps. cxxxvi.; Midr. ha-Gadol, ed. Schechter, p. 4). That such speculation is of no consequence to the practical religiosity which Judaism means to foster is well expressed in the caution not to "inquire into what was before the world was" (Mishnah Ḥag. ii.; Yer. Ḥag. ii.). See Cabala.

The Alexandrian Jews, under the sway of Platonic and Neoplatonic ideas, conceived of creation as carried into effect through intermediate agencies, though still an act of divine will, while the relation of the agencies to the Godhead is not always clearly defined, so that it is possible to regard them almost as divine hypostases—subdeities, as it were, with independent existence and a will of their own (Alexandrian Philosophy). The divine *σοφία* ("wisdom") has a cooperative part in creation (Wisdom ix. 9). While the Palestinian (II Macc. vii. 28) insists that all was made by God "out of nothing" (*'εζ οὐκ ὄντων*), Wisdom (xi. 17) posits a formless arch-matter (*ὕλη*), which the Creator simply brought into order.

Views of Philo.

Philo proceeds to fully develop this idea. The Mosaic account of creation is not to be accepted literally (see Drummond, "Philo Judæus," i. 293). Creation was not in time. "It is folly to suppose that the universe was made in six days, or in time at all." The expression "six days" merely indicates the most perfect arrangement ("De Allegoriis Legum," i. 2; "De Opificiis Mundi," i. 3; "Quod Deus Sit Immutabilis," i. 277). To the question whether the world had no real beginning, he gives, though inconsistent with himself, a negative answer. There was a time when the parts of the cosmos "deified by the heathen" were not; God alone was never non-existent ("Dec. Orac." ii. 190). "For the genesis of anything," he says, "many things must combine: that by which, that out of which, that through which, that on account of which" (= cause, material, instrument, purpose). God is the cause of the cosmos, while the four elements are the material ("De Cherubim," i. 161, 162). Nothing suggests that he regarded this material as other than uncreated. It was there when God arranged the new order of things. God is the demiurge ("De Eo Quod Deterius Potiori Insidiatur," i. 220; "De Plantatione Noe," i. 320; his expressions are *δημιουργός, κοσμοπλάστης, τεχνίτης*). As in other points, so on this, Philo is not rigidly consistent. There are passages again from which a belief in the creation of matter out of nothing might be assumed. He speaks of matter as corruptible, and "corruptible" is, in his theory, a correlative of "created" ("Quis Rerum Divinarum Heres Sit," i. 495).

It was not matter, but form, that God praised as good, and acknowledged thus as His creative work. Yet Philo protests that God is "not a demiurge, but a creator." What before was not, He made (*οὐ δημιουργός μόνον, ἀλλὰ καὶ κτίστης αὐτὸς ὤν*, "De Somniis," i. 632; see Siegfried, "Philo von Alexandrien," p. 232). Drummond argues, against Siegfried, that God is here styled Creator only of the ideal, intelligible world, not of matter in the visible world (*l.c.* i. 304). In regard to Philo's Logos and the Memra of the Targum see Logos.

In Medieval Jewish Philosophy.

In the writings of the Jewish philosophers of the Middle Ages, creation is one of the problems most earnestly discussed. It belonged to the "four questions" (Maimonides, "Moreh," i. 71) which were regarded as fundamental. The alternative was between חדוש העולם, Ar. חדת אלעאלם ("creation"), and קדמות העולם, Ar. קדם אלעאלם ("eternity of matter"). The Arabian thinkers and schoolmen were perplexed by the same problem (Munk, "Mélanges," p. 421). They had been moved to discuss the subject by their studies (at second hand) of Plato and Aristotle. The Greek mind could not conceive of creation out of nothing—"Ex nihilo nihil fit."

Plato's *ὕλη* (consult his "Timæus") was eternal. Aristotle, too, maintained the eternity of matter ("De Cœlo," i. 10-12; "Phys." ii. 6-9). God is the source of the order of things predestined by Himself ("De Mundo," ii.), though Maimonides and Judah ha-Levi argue for the possibility of claiming for Aristotle the contrary view ("Moreh Nebukim," ii. 15; "Cuzari," i. 65).

Is the doctrine of the eternity of matter compatible with the Jewish conception of God? On three grounds this has been negatived: (1) It limits God's omnipotence and freedom. (2) It is in conflict with the Biblical account, and denies the possibility of miracles, though the Talmudic theory of miracles would not be affected. "God, when He created the sea, imposed the condition that it should divide itself before Moses' staff" (Ab. v. 9). (3) Great men, such as Moses and the Messiah, would be utterly impossible (Albo, "'Iḳḳarim," i. 12). The first point may be considered cogent, but the two others are not very profound.

In two ways do those of the Jewish philosophers who maintain the *creatio ex nihilo* attempt to prove their thesis: (1) by demonstrating the necessity of the Creation, and (2) by showing that it is impossible that the world was not created ("Cuzari," v. 18; "Moreh Nebukim," ii. 30). But in order to achieve this, they had first to disprove the arguments of their opponents. These were the same as those with which Mohammedan theologians (see Shahrastani, ii. 199 *et seq.*) had been confronted. Maimonides (*l.c.* ii. 14; compare also Aaron b. Elijah, "'Eẓ Ḥayyim," vi., vii.) arranges them into two groups: (1) מצד העולם עצמו (cosmological, Schmiedl's terminology), and (2) מצד האל ית' (theological).

In the first group there are the arguments: (*a*) Motion must be eternal, without beginning. Time is an accident of motion; "timeless (*i.e.*, changeless) motion" and "motionless (*i.e.*, changeless) time" are self-contradictory conceptions; therefore, time has no beginning. (*b*) The prime arch-matter underlying the four elements must be eternal. "To become" implies taking on form. But primal matter, according to its own presupposition, implied in the concept "prime," has no form; hence it has never "become." (*c*) Decay and undoing are caused by contradictory elements. But spherical motion excludes contradictory principles, and is without beginning and end. (*d*) Suppose the world had a beginning; then either its creation was necessary—that is, eternal—or its previous existence was impossible (and thus it might not be now); but if it was possible, then possibility (potentiality) presupposes a subject carrying attributes involving the possibility. This subject could not but be eternal.

In the second group there are the arguments (*a*) God could not have been a creator in potentia without suffering change in Himself from potentia to reality. What caused this change? (*b*) The world created in time presupposes some exciting cause for God's will to create. Either God did not previously will to create, or, if He did, He had not the power. The world can not be thought eternal unless we admit defects in God. (*c*) The world is perfect, the product of God's wisdom. God's wisdom and His essence are coincident. God being eternal, His work must also be eternal. (*d*) What did God do before the world was?

How did Jewish thinkers meet these positions? They followed in the paths of the Arab Motekallamin. Especially did they lay emphasis on the proof of free determination," which the Arabic logicians had developed (דרך התיחד, Ar. "al-takhṣiṣ"). Admitting no "law of nature," they posited the principle of limitless possibility. Things are as they are, not because they must be so, but because a free Being outside of them wills them to be so. He might also have willed them to be otherwise. He who determines is also He who creates; that is, produces from nothing. The world is as it is because a Being determined its being, preferring its being to its non-being. Matter dependent for form upon another, even if eternal, can not exist. God is by inherent necessity. The fact that matter is as it is, shows that it was created to be as it is by the preference of the Creator.

In historical succession Saadia was the first to take up the problem, especially in his "Emunot" (i. 1-5). He argues for the creation from the irrationality of an endless limitless quantity—a favorite theme among the Motekallamin. His argumentation is extremely obscure. He enumerates thirteen theories concerning creation; among them, first, the Biblical; then that of the atomists; next the theory of emanation and dualism; finally, that in which the four elements are held to be eternal, a theory which he says had many adherents among the Jews.

Ibn Gabirol devotes a large part of his "Meḳor Ḥayyim" to the problem. He does not rely upon Biblical texts. His creation theory is as follows: The prime substance emanated out of itself Will, or the creative Word. This Will mediates between God and the world. From the Will emanated universal matter (element) יסוד כללי, from which came all beings. His position is a sort of pantheism, not altogether Biblical.

Baḥya ibn Pakuda, in "Ḥobot ha-Lebabot," maintains that (1) nothing is self-created; (2) there must be a highest first cause; (3) composition proves generation or creation.

Judah ha-Levi invokes the testimony of tradition in his "Cuzari" (i. 43-68; see also Maimonides' "Moreh," iii. 50; Abravanel, in his שמים חדשים, p. 34). He pleads for the authenticity of the Mosaic account as being corroborated by tradition; by the facts of human speech, which show the common descent of all men; by the identity of the system for counting time; etc.

Abraham bar Ḥiyya Albargeloni is another defender of creation. His "Sefer Hegyon ha-Nefesh" tries to explain the Biblical tradition on mathematical grounds. "Ὕλη" and "form" had potential existence until God called them into reality through His will in combination. But when we speak of time and the like with reference to God, we use human similes. Time is only a measurer. Therefore before the world was, there was nothing to measure and consequently no time. Ὕλη = "Tohu," and form = "Bohu"; both were preexistent, as the text shows by its use of the expression "the earth had been" (היתה. "Form" = בו הוא).

Views of Maimonides.

Maimonides is most timid in his defense of creation. He concedes that it can not be proved. The most that can be attempted is to weaken the arguments of the opposition schools ("Moreh," i. 67, 71; see Gersonides to Gen. i.). He endeavors to disprove the eternity of the world as far as he may, and to strengthen whatever seems to favor the contrary theory ("Moreh," i. 13-30). He makes much of Aristotle's indecision concerning the point at issue. He advances "arguments that approximate demonstrations" (see MAIMONIDES, MOSES). They have contributed nothing to the solution of the perplexity.

Of his successors, Albalag, Gersonides, and Naḥmanides either reject creation-*ex nihilo* or seriously modify it. Ḥasdai CRESCAS (in "Or Adonai," iii. 1, 4) criticizes most severely Gersonides' assumptions that matter and God are equally absolute; while the former is void of everything, even of form, the latter is highest perfection. Why should equally absolute and necessary matter submit to the will of God? He charges Gersonides with inconsistencies in denying special providence while assuming the power of God over and in the special particulars of arch-matter. His pupil Albo regards the denial of creation *ex nihilo* as tantamount to the denial of God's perfection ("'Iḳḳarim," i. 23).

The Karaites as a rule accept *creatio ex nihilo*. It is one of their articles of faith (see "'Eẓ Ḥayyim," xii.). For the speculations of the Cabalists see CABALA. Regarding modern views see EVOLUTION.

K. E. G. H.

——**In the Koran and Mohammedan Literature:** The Koran does not contain a descriptive and detailed account of the Creation; but it abounds in allusions to God's power as manifested therein, and in appeals to it in refutation of heretical assumptions (Polytheism; sura xvi.), or in support of certain dogmas (Resurrection; *ib.* xxii. 1-7). On the whole, these various references show that Mohammed had a general, vague, hearsay acquaintance with both the Biblical and Talmudical traditions of the Jews. "It is God," according to sura xi. 9, "that created the heavens and the earth in six days." Before creation "His throne [compare כסא הכבוד] was upon the water" (see Gen. i. 2; suras l. 37, lvii. 4). Special emphasis is laid on the forming of the mountains, which are said to give stability to the earth (suras xxi. 22, xxxi. 9, xli. 9, lxxviii. 6). In this a reminiscence of the Biblical זרועות עולם (Deut. xxxiii. 27; compare Ps. xc. 2) is suggested, while the popular conceit of the Arabs has it that the earth, when first created, was smooth and flat, which induced the angels to ask who could stand on so tottering a frame. Thereupon God next morning threw the mountains on it (Sale, "Koran," p. 215, note g, Philadelphia ed., 1876). In the space of four days God distributed nourishment to all that asked (sura xli. 9). The earth and the heavens are said to have been originally a compact mass which God divided, while water is said to be the life-giving element (sura xxi. 9, 31). Things were created after a certain preestablished measure (sura liv. 49; the word "ḳadr" may also be rendered "decree"; but see Baiḍawi, *ad loc.*). "One word" alone brought the world into being "like the twinkling of an eye" (sura liv. 50). As Baiḍawi remarks, this word was "Kun" (Let there be!), though the statement is also explained to imply that God accomplished His work very easily and quickly, without manual labor or assistance (compare sura l. 37, and Talmudic בלא עמל ובלא יגיעה, Ber. R. xii.; see Baiḍawi, *ad loc.*). Nor did He create in sport (compare rabbinical לא לבטלה), but in truth, and for a definite term, to last until the day of final judgment (suras xliv. 35, xlvi. 2; Baiḍawi, *ad loc.*). With scant consistency, however, Mohammed speaks in another passage of a creation not in six but in two days. Baiḍawi (sura xli. 8) interprets "days" as "turns."

In Mohammedan Tradition.

Mas'udi ("Prairies d'Or," ed. Meynard and Courteille, i. 36 *et seq.*) gives in detail the following traditional order: "First water, which carried the divine throne, was created. From this primal water God caused a vapor to arise and form the sky. Then He dried the liquid mass, transforming it into one earth, which He split up later into seven. This earth was completed in two days—Sunday and Monday. The earth was placed on a fish that supported it [sura lxviii. 1; compare Pirḳe R. El. ix., and Ginzberg "Die Haggada bei den Kirchenvätern," p. 19, where it is shown that by this fish is meant the leviathan]. This fish and the earth God propped on blocks of stone, resting on the back of an angel, this again on a rock, and this finally on the wind. But the motions of the fish shook the earth mightily, so God put the mountains in place and rendered it stable. The mountains furnished food for earth's tenants. The trees were created during two days—Tuesday and Wednesday. Then God mounted up to the vaporous sky and made of it one heaven, which, in two more days—Thursday and Friday—He split up into seven. Hence the name for Friday, 'Jum'ah' (joining together), 'union' or 'assembly,' because on it the creation of the heavens was united to that of the earth. Then God filled the heavens with angels, seas, icebergs. Creation thus completed, God peopled the earth with the jinn, made of purest fire [sura lv. 14], among them being Iblis, the Devil. When about to create man (Adam), He informed the angels of His intention to make him His vicegerent on earth. The angels made objections [as in the rabbinical legend, Gen. R. viii.]. Gabriel was sent to bring clay from the earth, but the earth refused to supply it. Michael, also sent on the same errand, was unsuccessful. Finally the angel of death went forth, vowing that he would succeed. He brought back earth of various colors, hence the various colors among men. Adam was made of the surface ["adim"] soil. Forty years a portion of such soil was hung up to become a compact mass, and then left for another period of forty years, until the clay became corrupt. To this God then gave human shape, but left it without a soul for one hundred and twenty years. Finally, after enduring many indignities at the hand of Iblis, and being an object of terror to the angels, and at last causing Iblis' banishment, Adam was endowed with divine breath, according to some gradually; and when he was entirely permeated with this divine breath, he sneezed; whereupon God taught him to say: 'Praise be to God! may thy Master have mercy on thee, O Adam!'"

An altogether different account is found in the "Kitab Aḥwal al-Ḳiyamah," edited by Wolff ("Muhammadanische Eschatologie," Leipsic, 1872). The first object created was a tree with four thousand branches—the tree of knowledge; the second, the light of Mohammed—a pearl in the shape of a peacock, which was placed on the tree. Then God made the mirror of shame, placing it so that the peacock saw his reflected image; whereupon shame seized him and he prostrated himself five times before God. The light of Mohammed, too, blushed before God, and in consequence perspired. From the beads of perspiration taken from various parts of the body were created the angels, the upper and lower thrones of God, the tablet of revelation or of decree, the pen, Paradise and Gehenna, sun, moon, and stars, the dividing interval between heaven and earth, the Prophets, the Sages, the martyrs, the pious, the celestial and the terrestrial Ka'bah, the Temple in Jerusalem, the places for the mosques, the Moslems—men and women, the souls of the Jews, the Christians, the Magi, and, finally, the earth from east to west, and all that it contains. This apocalyptic account is comparatively late [but echoes rabbinical traditions concerning the light of the Messiah (Gen. R. i.), the כסא הכבוד, Paradise and Gehinnon (Pes. 54a); compare also Slavonic Enoch, xxv.—xxvi.—K.]. As to the theories of creation propounded in the various philosophical schools, see ARABIC PHILOSOPHY; ARISTOTLE IN JEWISH LITERATURE; MOTEKALLAMIN.

CREATION, BOOK OF. See YEẒIRAH, SEFER.

CREATION, ERA OF. See ERA.

CREATURE: A loose rendering in the A. V. of:

1. "Nefesh" ("a breathing thing"; Gen. i. 20 *et seq.*, ii. 19, ix. 10 *et seq.*; Lev. xi. 46).

2. "Beri'ah" ("creation"; R. V. better, "a new thing"; Num. xvi. 30).

3. "Ḥayyot" ("heavenly animals"; Ezek. i. 5 *et seq.*, x. 15; Septuagint, ζῷον).

In Apocryphal literature "creature" is the translation of κτίσμα or κτίσις (בריאה or בריה), and denotes either creation in general (Wisdom v. 17, xix. 6; Judith ix. 12, xvi. 14; III Macc. ii. 2) or mankind (Ecclus. [Sirach] xvi. 16; Wisdom xvi. 24). In rabbinical literature "beriyyot" is the regular term for fellow creatures or mankind (Abot i. 12, "Love the creatures"; *ib.* ii. 10, iii. 11; Ber. 19b, "Respect of the creatures"). Hence, also, Mark xvi. 15; Col. i. 23; Rom. viii. 19; and I Peter ii. 13 (A. V. renders, incorrectly, "every human ordinance"; see Taylor, "Sayings of the Jewish Fathers," 2d ed., pp. 21, 141).

The phrase "a new creature," in the sense of "regeneration," which occurs in II Cor. v. 17, and Gal. vi. 15, represents the rabbinical "beriyyah ḥadashah." See Baptism.

E. G. H. K.

CREED. See Articles of Faith.

CREEPING THINGS: A loose expression used in the A. V. as the equivalent of רמש and שרץ. רמש ("remes" = creeping—that is, without, or with imperceptible, feet; applies to terrestrial and also to water animals. The R. V. more correctly translates it "teemeth" in Gen. ix. 2; Lev. xx. 25, and "moveth" in Lev. xi. 44; Ps. lxix. 34; Gen. viii. 19. Generally, however, "remes" stands for "reptiles," possibly also for very small quadrupeds. In the Talmud "remes" is used as a general name for worms infesting the intestines of man or beast (Niddah 21a), for which elsewhere the words תולע (Ab. iii. 1) and רמה occur. But, according to Tos. to Niddah 23a, *s.v.* ליתרי, only the serpent was called the "creeping thing," חיה הרומשת.

שרץ ("sherez," Gen. vii. 21; Lev. v. 2; xi. 10, 29; Deut. xiv. 19) applies only to animals that swarm, whether terrestrial, such as the weasel, mouse, lizard (Lev. v. 29); aquatic (Lev. xi. 10; Gen. i. 2; compare Ex. vii. 28 [A.V. viii. 3]); or even winged (Lev. xi. 20-23). The fundamental connotation of the verb and noun is undoubtedly the incalculably prolific multitudes of little animals which always appear in troops or swarms. The R. V. therefore gives the translation "breed abundantly" (Gen. viii. 17, ix. 7; compare Ex. i. 7).

In rabbinical Hebrew "sherez" is the generic term for amphibious reptiles ('Ab. Zarah 31b). The etymological implication of prolific increase is brought out in Ex. R. viii. 2; Lev. R. § 13 (the "'aḳrab" throws 60 young). It is also the typical term for ritual and moral impurity, in the oft-recurring phrase טובל ושרץ בידו ("one takes the bath of purification while holding a sherez in his hand"), applied to one who would do penance without repentance (Yer. Ta'an. ii. 65d, beginning). A distinction is made between שרץ ארץ ("land insect"), ש' מים ("water reptile"), and ש' עוף ("winged insect") (Pes. 24a). Maimonides ("Yad, "Ma'akalot Asurot, ii. 12 *et seq.*) says: "שרץ המים are all animals that are not fishes but live in the water, such as leeches, sea-dogs. רומש על הארץ ["romes" = creepers upon the earth] are worms produced by the decomposition of other substances, helminths; while שורץ על הארץ ["those that swarm on the earth"] are generated through copulation of the parent animals."

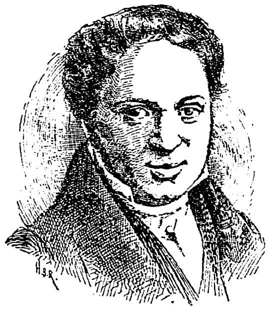
CREFELD. See Krefeld.

CRÉHANGE, ALEXANDRE BEN BARUCH: French Hebraist; born at Etain, in the department of Meurthe-et-Moselle, 1791; died in Paris Jan. 7, 1872. He acted as secretary to the Hebrew United Charities (Comité de Bienfaisance Israélite), and devoted himself to the circulation of religious works. He published: "La Semaine Israélite, ou le Tseena Ourena Moderne, Entretiens de Josué Hadass avec sa Famille sur les Saintes Ecritures," after the Hebrew, 2 vols., Paris, 1846; a French translation of the Haggadah of Passover, 1847; "Des Droits et des Devoirs du Citoyen: Instruction Tirée de l'Histoire Sainte," 1848; "Tefillat 'Adat Yeshurun," prayers of the French Jews, in Hebrew and French, 1850; "Minḥah Ḥadashah," prayers of the Sephardic Jews, in Hebrew and French, 1855; an illustrated translation of the Psalms, 1858; "Edouard Mortara, ou l'Enfant Volé" (n.d.); festival prayers for the use of Franco-Spanish and Franco-Portuguese Jews, in Hebrew and French, 6 vols., 1861-63; and from 1870 an almanac, "Annuaire Parisien."

S. J. W.

CREIZENACH, MICHAEL: German educator and theologian; born in Mayence May 16, 1789; died in Frankfort-on-the-Main Aug. 5, 1842. Creizenach is one of the most typical representatives of the era of transition, following the epoch of Mendelssohn, whose chief aim was the regeneration of Judaism by the methods of Talmudic dialecticism, which, as they imagined, would win over the Orthodox and yet achieve the necessary progress. Creizenach was educated in the traditional way, devoting his whole time to Talmudic studies; and he was sixteen years old when he began to acquire the elements of secular knowledge. This was during the French occupation, when a liberal spirit, greeted enthusiastically by both Jews and Christians, permeated the society of the ancient center of Catholic Germany. He studied mathematics with great zeal, and wrote text-books of the science. Through his influence a Jewish school was founded in Mayence, whose principal he was, at the same time giving private instruction. He was a very popular teacher, and counted many Christians among his pupils.



Michael Creizenach.

In 1825 Creizenach was appointed teacher at the Philanthropin in Frankfort, where he found in I. M. Jost an enthusiastic coworker in pedagogic and reform endeavors. He held services regularly in the hall of the school, and introduced confirmation exercises. His literary works were also devoted to the advocacy of Reform on the basis of rabbinical Judaism. With this object he wrote his "Shulḥan 'Aruk," in which he essayed to prove that the Talmud as a whole was untenable, but that a compromise with modern ideas could be effected in the same dialectical way in which the Rabbis had harmonized the Law with the exigencies of their time. In the later parts of his work, however, he abandoned this view; advocating a return to pure Mosaism, which a year after his death was more distinctly proclaimed as the program of the Frankfort Reformverein, at the head of which was his son Theodor. In spite of his Reform tendencies, Creizenach was deeply interested in Hebrew literature, especially in Hebrew fiction, and during the last two years of his life edited with his friend Jost the Hebrew periodical "Zion."

Creizenach's works are: "Versuch über die Parallellentheorie," Mayence, 1822; "Lehrbuch der Darstellenden Geometrie," *ib.* 1822; "Geist der Pharisäischen Lehre," a monthly, *ib.* 1823–24; "Ḥeshbon ha-Nefesh, oder Selbstprüfung des Israeliten Während der Busstage," Frankfort-on-the-Main, 1838; "Ḥinnuk li-Bene Miẓwah, oder Stunden der Weihe für Israelitische Confirmanden," *ib.* 1841; Ibn Ezra's "Yesod Mora" (edited with a German translation), *ib.* 1840; "32 Thesen über den Talmud," *ib.* 1831; "Lehrbuch der Technischen Geometrie," *ib.* 1828; "Lehrbuch der Algebra," Stuttgart and Leipsic, 1835. His chief work, mentioned above, is "Shulḥan 'Aruk, oder Encyklopädische Darstellung des Mosaischen Gesetzes," etc., in 4 vols.: (1) "Thariag, oder Inbegriff der Mosaischen Vorschriften nach Talmudischer Interpretation," *ib.* 1833; (2) "Shurat ha-Din, Anweisung zur Regulirung des Israelitisch-Religiösen Lebens," etc., *ib.* 1837; (3) "Ḥizzuḳ ha-Torah, oder die Dringlich Gewordene Befestigung der Mosaischen Lehre," etc., *ib.* 1839; (4) "Dorshe ha-Dorot, oder Entwickelungslehre des Mosaischen Ritualgesetzes," etc., *ib.* 1840.

S. D.

CREIZENACH, THEODOR: German poet and historian of literature; son of Michael Creizenach; born April 17, 1818, in Mayence; died Dec. 6, 1877, at Frankfort-on-the-Main. He studied classical antiquities in Giessen, Göttingen, and Heidelberg, and then lived for several years at Paris as tutor in the house of Aaron Anselm Rothschild. Upon his return from Paris in 1842 Creizenach became teacher in the Jewish Philanthropin at Frankfort-on-the-Main, and was one of the principal founders of the Frankfort Jewish Reformverein; in 1854, however, he abandoned the faith of his fathers and embraced Christianity. Creizenach was made teacher of the Frankfort municipal high school in 1859, and appointed professor of history and literature at the Frankfort gymnasium in 1863.

In the literary world he attracted attention by such poetical productions as "Dichtungen," Frankfort, 1839; and "Gedichte," Frankfort, 1848; 2d ed., 1851. Being familiar with the personality and life of Goethe in his relations to Frankfort, he edited and published Goethe's correspondence with Madame von Willemer, under the title "Der Briefwechsel Zwischen Goethe und Marianne von Willemer," 2d ed., Stuttgart, 1878. In conjunction with O. Jäger he took charge of the new edition of Schlosser's "Weltgeschichte," 1870 *et seq.*; and in conjunction with Otto Müller edited a weekly publication, "Das Frankfurter Museum."

S. B. B.

CREMATION.—Biblical Data: The act of burning the dead. Cremation was not the prevailing custom among the ancient Hebrews, as it was among other contemporary nations (see J. Grimm, "Kleine Schriften," ii. 226). It was, however, not unknown to them, and was occasionally practised. The Pentateuch prescribes burning as the punishment in certain cases of unchastity (Lev. xx. 14, xxi. 9; Gen. xxxviii. 24). In Josh. vii. 15, 25, and perhaps I Kings xiii. 2, and II Kings xxiii. 20, the burning of the corpse is added to the death penalty. From this it may be concluded that the burning of the human body was looked upon with horror. In exceptional circumstances—for instance, in the case of an epidemic—cremation may have been resorted to. This at least is inferred from Amos vi. 10. From the unusual word there employed מסרף, held to be a dialectic variant for משרף, many have concluded that in Amos' time cremation was far from being repugnant to the feelings of the people, and the care that the body should be properly burned became a sacred duty, devolving upon the nearest of kin—in the passage quoted, upon the uncle or the mother's brother, who therefore was designated as the מסרף (see Ḳimḥi's Com. *ad loc.*, and his ס״ השרשים, *s.v.* מסרף).

However, the evidence in support of this contention is very weak, מסרף probably meaning the maternal uncle without reference to an assumed obligation to direct the process of incinerating the bodies of his kinsfolk. Amos vi. 10 does not necessarily imply that the "bones of the dead" about to be removed from the house were burned. In a Karaite document by Jephet ben Ali (Felsenthal, in Kohut Memorial Volume, pp. 133 *et seq.*), מסרף occurs as "maternal uncle." Ibn Ezra, *ad loc.*, quotes Ibn Ḳuraish as authority for the meaning "maternal uncle," saying that it is unsupported; Abu al-Walid, in "Kitab al-Uṣul," ed. Neubauer, p. 494, mentions this meaning. The passage in Jer. xxxiv. 5 has nothing to do with cremation. A. V. renders it "so shall they burn odors for thee," a rendering accepted by Graf ("Der Prophet Jeremias," Leipsic, 1862) and Giesebrecht ("Der Prophet Jeremiah," in "Kurz. Hand-Comment. zum A. T." Göttingen, 1894). Nor can I Sam. xxxi. 12 be interpreted to imply that the corpses of kings were cremated, and that this constituted one of the royal prerogatives. It is far more likely that in order to guard the bodies from insult on the part of the Philistines, the inhabitants of Jabesh-gilead burned them, and for this received praise.

To the author of Chronicles the cremation of royal remains appeared so offensive that he changed it into a regular burial (I Chron. x. 12). He states the occurrences as follows: "And [they] laid him [King Asa] in the bed which was filled with sweet odors and divers kinds of spices prepared by the apothecaries' art; and they made a very great burning for him" (II Chron. xvi. 14). "And his people made no burning for him [King Jehoram] like the burning of his fathers" (II Chron. xxi. 19).

The custom of making "a very great burning" at the funeral of great men continued for several centuries. The Talmud ('Ab. Zarah 11a) records that at the funeral of Rabban Gamaliel the Elder (*c.* 117 C.E.) Aquilas, the proselyte, made "a very great burning."

——**In Talmudic Literature:** No mention is made of cremation in Talmudical literature. Both Oh. ii. 2, where the question is discussed whether the ashes of those who were burned are to be considered clean or unclean, and Niddah 27b, where a similar question is raised in regard to a burned corpse, the skeleton of which has been preserved, refer to cases of accidental burning. The Tosafot Ta'an. 15b, *s.v.* ונותנין, and 16a, *s.v.* אפר, are of the opinion that the ashes strewn on the reading-desk and on the heads of all that attended the service on fast-days were those of burned human bones. But אפר מקלה does not signify the ashes of burned bodies, but the ashes of the hearth. Nor does the Talmud contain any suggestion that cremation was once practised by the ancient Hebrews.

E. G. H. M. Sc.

——**In Modern Times:** The question whether, from the point of view of Jewish law, cremation may be allowed, has been extensively discussed in modern times. It is generally agreed that there is no express law to be found in the Bible demanding the burial of the human body; and though the Shulḥan 'Aruk (Yoreh De'ah, 362) contains the statement "Burial in the earth is a positive command," a position assumed also by Maimonides ("Sefer ha-Miẓwot," p. 261), this command is merely deduced from קבור תקברנו ("Thou shalt surely bury him") in Deuteronomy (xxi. 23; compare Sanh. 46b). It seems uncertain whether it was ever a custom in early times to burn the bodies of kings and nobles. Referring to such a burning, the Mishnah ('Ab. Zarah i. 3) says, "Every death which is accompanied by burning is looked upon as idolatry"; and the fact that Saul's body was burned (I Sam. xxxi. 12) is said to have been the cause of the three years' hunger at the time of David (Yeb. 78b; Rashi to II Sam. xxi. 1). Funeral pyres of costly clothes and other articles, to which reference is made (Tosef., ed. Zuckermandel, 119, 3, and parallels) in the case of Rabban Gamaliel the Elder, were also not unknown in Hasmonean times (Josephus, "Ant." xv. 3, § 4). According to the Shulḥan 'Aruk (348, 1) this is expressly forbidden in the case of ordinary people. Yom-Ṭob Lipmann Heller even tries to prove that the cases of burning mentioned in the Bible are to be explained as "embalming," by means of which all but the bones was destroyed (Tosafot to Pesaḥim, iv. 9).

On the other hand, it has been asserted by some authorities that burial is merely a custom ("minhag"), and that no serious objection can be brought against cremation. In proof of this the following citation has been adduced from Midr. Wayasha' (Jellinek, "Bet ha-Midrash," i. 37): "Isaac begged his father on Mount Moriah: 'Burn me completely, and bring my ashes to my mother that she place them in an urn in her own room, and that whenever she enters the room she may remember me with tears.'" The same idea is referred to in a number of liturgical pieces. It is further asserted that תיכף למיתה קבורה can not be construed as opposed to some other form of disposing of the dead, since it simply means that a Jew should be careful so to dispose of the dead as to bring the body as quickly as possible into contact with mother earth. Many authorities went so far as to permit calcium to be strewn over the body in the grave, in order to hasten the process of decomposition (Solomon b. Adret, Responsum No. 369; Moses Isserles to Yoreh De'ah, 363, 2). This custom became general among the Portuguese Jews. On dogmatic grounds, it is further asserted, no opposition can be entertained against cremation (Maimonides, "Yad," Teshubah, viii. 2, 3); and Joseph Albo ("'Iḳḳarim," iv. 30) criticizes Abraham ibn Daud and Naḥmanides for opposing the practise. Some Italian cabalists were opposed to cremation on the ground that according to their system the soul was supposed to go from the house of the deceased to the grave and back again during the seven days following death "Il Vessillo Israelitico, "xxx. 105).

Recent Declarations.

Orthodox Jewish authorities have as a rule opposed cremation on the ground that it is not in consonance with the spirit and traditions of Judaism. The Italian rabbinate made a declaration in this sense (*ib.* xxiii. 12). Zadok Kahn, grand rabbi of France, has decided that in the case of cremation the religious ceremony should precede incineration; that the rabbi should then retire and not be present during the act of cremation; and that the "Hashkabah" should be recited at the home. Herman Adler, chief rabbi of Great Britain, considers cremation a violation of Jewish law and custom; but he permits the "Lewayah" at the burying of the remains (*ib.* xliii. 394). The late haham of the Portuguese community in London, B. Artom, preached Nov. 7, 1874, a sermon on cremation, in which he asserted that it was opposed to the spirit and history of Judaism ("Jewish World," June 15, 1874; compare "Il Vessillo," xxiv. 294, 327). This position was also maintained by J. Hildesheimer in Berlin, Kohen in Inowrazlaw, and others. But Moses Israel Tedeschi, rabbi of Triest, published a responsum in 1890 in which he not only tried to prove that cremation was not opposed to the spirit of Judaism, but asked that at his death his own body should be disposed of in this way ("Monatsschrift," 1890, pp. 149, 153). In 1895 the rabbis of Württemberg declared cremation contrary to Jewish law because that law, with rare exceptions, forbids us to mutilate a corpse (see "Rev. Et. Juives," xxxii. 276).

One of the foremost advocates of cremation was Rabbi A. Wiener of Oppeln, who not only contributed articles to the "Flamme," but also became a member of the Gesellschaft für Feuerbestaltung. In 1892 the Central Conference of American Rabbis resolved "that in case we should be invited to officiate as ministers of religion at the cremation of a departed coreligionist, we ought not to refuse on the plea that cremation is anti-Jewish or irreligious" ("Year Book," 1892, p. 43).

A. G.

CRÉMIEU: Town in the ancient province of Dauphiné, France. As early as the fifteenth century it had an important Jewish community. Raoul de Gaucourt, governor of Dauphiné, renewed in 1441 the privileges of the Jews of that town for seven years in consideration of the sum of fifty florins, which the Jews Moses Dandéli of Crémieu and Aguinet Solomon of St. Symphorien were to collect from their coreligionists. The Jews of Crémieu refused to pay the sum, and emigrated in large numbers. The dauphin Louis recalled them in 1449, and promised them that if they would reopen their banking-houses he would exact of them in future only one ounce of fine silver, instead of the half-mark that they had formerly been taxed.

CRÉMIEU-FOA, ANDRÉ: An officer in the French cavalry; born in Paris Jan. 20, 1857; died at Porto Novo, North Africa, Nov., 1892. Crémieu-Foa early embraced the military career. The "Libre Parole," the organ of the anti-Semitic party, published in 1892 a series of articles on the preponderance of the Jewish element in the French army. Captain Crémieu-Foa, then garrisoned at Meaux, challenged the editor-in-chief of the "Libre Parole," Edouard Drumont, to a duel, and inflicted upon him a slight wound. Thereupon, the signer of the articles, M. de Lamase, challenged Crémieu-Foa, alleging that the latter should have applied to him for satisfaction.

After the encounter between Crémieu-Foa and M. de Lamase, in which four bullets were exchanged without either of the principals being hit (June, 1892), Armand Mayer, one of the seconds of the Jewish officer, a comrade and coreligionist, was taken to task on the spot by the Marquis de Morès, one of the seconds of M. de Lamase, the marquis charging Mayer unjustly with having divulged the contents of the procès-verbal which had been drawn up at the conclusion of the first encounter, and which should have been kept secret. In the subsequent duel between Mayer and Morès, the former was killed. Crushed by this fatal issue, and exposed to still more violent insults on the part of the anti-Semitic press, Crémieu-Foa was about to issue more challenges when M. de Freycinet, then minister of war, ordered him to Tunis to organize one of the two squadrons of Sudanese spahis destined for Dahomey, West Africa, which place was then in revolt against the French protectorate. In the ensuing expedition under the command of Colonel Dodds, Crémieu-Foa distinguished himself in several combats previous to the taking of Abomey, so that he was mentioned for bravery in the order of the day, and received in the presence of the troops the congratulations of the commander-in-chief. He died at Porto Novo, Nov., 1892, partly in consequence of a wound sustained while reconnoitering, and partly owing to an attack of tropical fever.

CRÉMIEUX (COLONY). See AGRICULTURAL COLONIES IN THE UNITED STATES.

CRÉMIEUX, GASTON: French socialist and writer; born at Nîmes June 22, 1836; died at Marseilles Dec. 1, 1871. He entered upon an active career as attorney and counselor at law at Aix in 1856, after having taken all the honors at the lyceum of Nîmes; but after two years spent in a fruitless effort to acquire a remunerative practise, he returned to his native town, where his generosity in dealings with impecunious clients soon procured him the honorable appellation of "Avocat des Pauvres."

In the spring of 1862 Crémieux was admitted to the Marseilles bar, and then and there started upon an aggressive political and journalistic campaign against Napoleon III. and the centralizing and reactionary tendencies of his régime. Crémieux's audiences consisted largely of working men, to whom he preached the most advanced political and economic theories of international socialism. The International Working Men's Association, established in London in 1864, found in him a tireless worker. As a participant in an insurrection against the local authorities (Aug. 8, 1870), Crémieux was arrested and condemned to six months' imprisonment; but he was subsequently freed by the revolution of Sept. 4, and was made procurator of the republic at Marseilles. His handsome, youthful exterior and the broad philanthropic range of his ideas made him one of the most conspicuous figures in the public life of southern France.

At the outbreak of the Paris Commune, Crémieux declared himself for the rebellious Parisians and against Thiers and the Versailles government. On March 23 the insurrection in favor of communal home rule took the department of Bouches-du-Rhône by storm; and Crémieux was elected president of a provisory departmental administration. Radical though he was, he was firmly opposed to extreme measures involving useless bloodshed; and he thus incurred the displeasure of his fellow revolutionists. On the twenty-eighth of the same month the department was put under a state of siege; and the Commune of Marseilles took a desperate step in arresting and threatening the lives of a number of prominent upholders of the reactionary government. On April 4 the central government at Versailles sent Gen. Espivent de la Villeboisnet against the rebellious town, enjoining him to resort to the most energetic measures. By a heavy bombardment of the prefecture, the seat of the self-styled communal government, the commander of the Versailles troops compelled the insurrectionary leaders to surrender.

A few days previous to the overthrow of the Commune at Marseilles, Crémieux had imperiled his own life by protecting the lives of the imprisoned friends of Thiers. The victors established a martial tribunal, whose sentences sent many hundreds to death or exile. Crémieux was arrested and court-martialed June 28, 1871. The trial was a mere formality of law, the court having decided beforehand upon capital punishment for all prominent offenders. Within a few minutes sentence of death was passed on Crémieux in spite of strenuous efforts on the part of friends, who testified to the extraordinary clemency and moderation of the defendant in his dealings with disarmed enemies. He received the verdict with perfect composure, and afterward met his death unflinchingly. Crémieux left a widow and four children, one child having died during his imprisonment in Aug., 1870.

S. J. Fu.

CRÉMIEUX, HANANEEL: French Hebraist and judge; born 1800; died 1878; son of Mordecai Crémieux. He was a Talmudic scholar, and was teacher of Hebrew to the Jewish children of Aix, besides often officiating in the capacity of shoḥet, mohel, and ḥazzan. In 1821 Crémieux entered upon what proved to be a successful business career, and later officiated for seventeen years as judge in the tribunal of commerce of Aix, Provence. In this capacity he was instrumental in securing the passage of the bankruptcy law which gave the assignee the right to institute legal proceedings against a corporation, the stockholders of which did not pay the amount of their shares, either in full or in part. Crémieux was one of the founders of the "Archives Israélites," and contributed to its columns, often anonymously. He was also a member of the consistory of Marseilles.

Bibliography: *Archives Israélites*, 1842, pp. 138, 140; 1878, pp. 140-142.

S. A. R.

CRÉMIEUX, HECTOR JONATHAN: French dramatist; born at Paris Nov. 10, 1828; died there in 1892; of the same family as Isaac Adolphe Crémieux. After a preparatory course of studies at the Lycée Bourbon he attended the Paris law school. In common with the majority of his fellow-students, he took an active part in the overthrow of the Orleanistic dynasty, and participated in the turbulent politics of the second republic. During the revolution of Feb., 1848, he secured a commission as lieutenant of the Garde Mobile. Though only twenty years of age, he carefully avoided committing himself to any extreme policy, and assumed a temporizing attitude, which he only abandoned shortly before the coup d'état of 1851, to attach himself to the administrative force of the usurper.

The revolutionary excitement of 1848 and the rôle played by Napoleon III. subsequent to the revolution, suggested to Crémieux the idea of adapting the history of Lodovico Fiesco, from the German of Friedrich Schiller, for the French stage. In collaboration with his brother Emile, he turned the sonorous masterpiece of the German poet into a spectacular tragedy of the "Hernani" type, in five acts and eight tableaux, full of stirring allusions to contemporaneous events. The emperor, solicitous to bestow political patronage upon those who had been daring enough to give him support in the risky affair of Dec. 2, rewarded Crémieux in 1852 with a clerkship in the Ministry of State; and this appointment, practically a sinecure, together with his first dramatic success, enabled him to enter upon a literary career and to exploit the financial possibilities of the Parisian stage of the second empire.

In spite of the never-wearying readiness of his pen, Crémieux could not hope to reap the whole harvest of success without assistance. During his whole career as a dramatic author he was perpetually collaborating with one or another, following therein the example set by the most popular and prolific French dramatists of his age. With Léon Battu he produced the melodramatic "Elodie, ou le Forfait Nocturne" (1852); with Taine the younger, "La Demoiselle en Loterie"; with Dennery, "Germaine," a dramatization of Edmond About's romance; with Woestyn and Bourget, "La Voie Sacrée, ou les Etapes de la Gloire"; with the Cogniard brothers, the fairy piece "Le Pied de Mouton." Ludovic Halévy, Philippe Gille, Henri Bocage, and Ernest Blum are only a few of his other collaborators. He also wrote librettos for Leo Delibes, Hervé, and Offenbach.

Crémieux's plays, written to suit the demand of the day and passing into oblivion with it, were produced at the Odéon, the Bouffes-Parisiens, the Variétés, and the Théâtre Lyrique. He tried his hand at every conceivable style of production in the dramatic category: opera, proverb, tragedy, melodrama, comedy, vaudeville, etc. Larousse, without claim to completeness, gives a list of thirty-five of his plays. But the only one which has retained its popularity is his libretto to Jacques Offenbach's "Orphée aux Enfers," a masterpiece of brilliant equivocation and mocking "blague" which has made the round of the stage of all countries and still firmly holds its position in the modern theatrical repertory. His collaboration with Offenbach brought him once more prominently before the eyes of his imperial master, who in 1864 made him Knight of the Legion of Honor. His extraordinary diligence and his favor with the public survived the empire and the first and second decades of the third republic. Crémieux committed suicide.

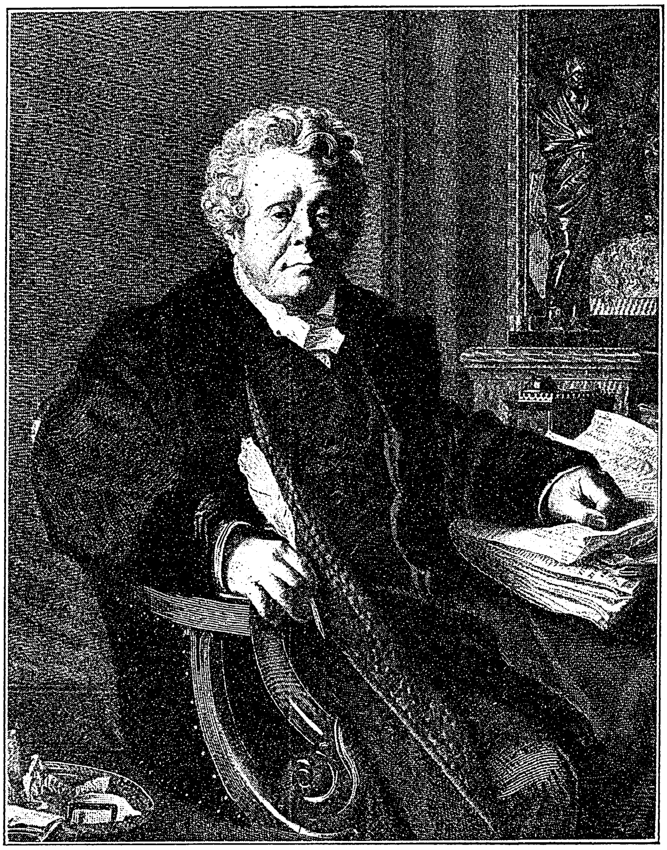
S. J. Fu.

CRÉMIEUX, ISAAC ADOLPHE: French statesman; born at Nîmes April 22, 1796; died in Paris Feb. 9, 1880. He was educated at the Lycée Impérial, where he and a cousin were the only Jewish students. Crémieux was at that time an ardent admirer of Napoleon I., and it was he who, at the head of a deputation of the pupils of the Lycée, addressed the emperor in the court of the Tuileries. For many years he remained faithful to this idol of his youth, and was the adviser and friend of the proscribed Bonapartes.

As Advocate.

Crémieux was admitted to the bar at Nîmes on attaining his majority (1817), and soon became famous. He was a brilliant orator and a skilful advocate; combining eloquence with a wide knowledge of the law, rare powers of assimilation, clearness, irony, and the faculty of inspiring others with his own enthusiasm. Many of the most important cases in the south of France were soon entrusted to him, the most famous being that of the notorious royalist bandit Trestaillon, whose conviction he obtained. This case made Crémieux's name as familiar in Paris as it was in the department of the Gard: the young lawyer entered into relations with all the Liberals of Paris, and he thenceforth passed his yearly vacations in that city. His patriotism was shown in the famous case called "De la Marseillaise" (1819), when he was called upon to defend three young men accused of having sung the hymn of the Revolution. In spite of the president's opposition, he dared to praise it, and recited the poem in paraphrase, to let the jurymen pass judgment upon it. At the famous verse "Amour sacré de la patrie," all the jurymen had risen, and the accused were acquitted. After the revolution of 1830 Crémieux removed from Nîmes to Paris, where he bought Odillon Barrot's practise at the Court of Cassation. This he retained for nearly seven years, and then resumed his private practise, ranking with the leading lawyers of Paris.



Isaac Adolphe Crémieux.

(After the painting by Count du Houy.)

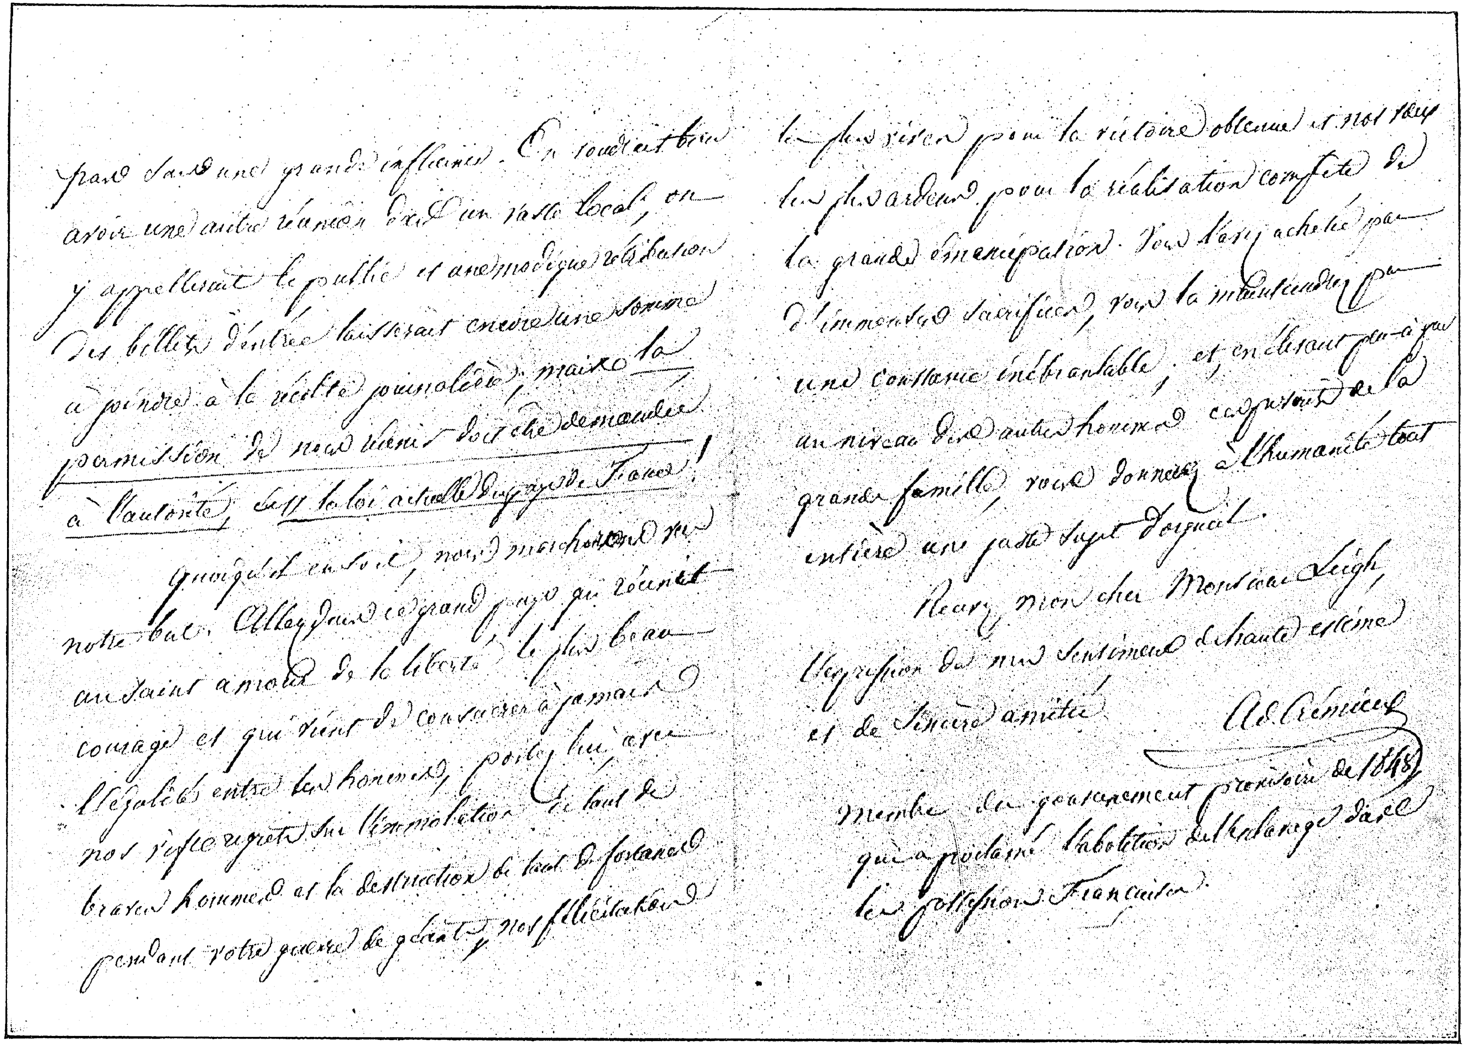
Participated in the Damascus Affair.

Crémieux was successful in obtaining the abolition of the humiliating oath known as the "More Judaico," which every Jew had been forced to take on coming into court; and this made Crémieux the leader of his coreligionists, whose social status and interests he protected during his entire career. In 1840 Crémieux took an important part in securing the acquittal, through Mehemet-Ali, of the Jewish victims of the famous Damascus ritual murder case (see Damascus Affair). His return from the Orient was a series of triumphs, the Jews of Vienna being foremost in their demonstrations of gratitude. He was also received by Prince Metternich, the then chancellor of the Austrian empire.

As Minister of Justice.

In 1842 the leaders of the opposition asked Crémieux to present himself for election in the arrondissement of Chinon, to supplant Piscatory, the ministerial deputy from Indre et Loire. After a hard struggle he was elected, and during the last years of Louis Philippe's reign he achieved brilliant successes, both as a lawyer and as a speaker. He was not only an able and disinterested defender of journalists and statesmen, but also the patron of all artists. At his reunions the most celebrated singers of the Opera and of the Théâtre des Italiens appeared; and on one occasion they were accompanied by Rossini, Meyerbeer, and Auber. Crémieux was one of the most brilliant orators of the "Campagne des Banquets," which brought about the revolution of Feb. 24, 1848; and his election as a member of the provisional government was due in a great measure to this fact. As minister of justice he was instrumental in abolishing capital punishment for political offenses, the exposure of the condemned to public curiosity, and the political oath. But the republic, of which he was so proud to have been one of the founders, came to an abrupt end.

Crémieux has often been blamed, and he doubtless blamed himself, for advocating Louis Napoleon's candidacy as president. He believed, however, in



pas sans une grande influence. On voudrait bien
avoir une autre réunion dans un vaste local, on
y appellerait le public et une modique rétribution
des billets d'entrée laisserait encore une somme
à joindre à la collecte journalière; mais la
permission de nous réunir doit être demandée
à l'autorité, c'est la loi actuelle du pays de France!

Quoiqu'il en soit, nous marcherons vers
notre but. Allez dans ce grand pays qui réunit
au saint amour de la liberté le plus beau
courage et qui vient de consacrer à jamais
l'égalité entre les hommes, portez lui avec
nos respects nos regrets sur l'immolation de tant de
braves hommes et la destruction de tant de fortunes
pendant votre guerre de géants, nos félicitations
les plus vives pour la victoire obtenue et nos vœux
les plus ardents pour la réalisation complète de
la grande émancipation. Vous l'avez achetée par
d'immenses sacrifices, vous la maintiendrez par
une constance inébranlable, et en élevant peu à peu
au niveau des autres hommes ces proscrits de la
grande famille, vous donnerez à l'humanité tout
entière un juste sujet d'orgueil.

Recevez, mon cher Monsieur Leigh,
l'expression de mes sentiments de haute estime
et de sincère amitié.

Ad. Crémieux

membre du gouvernement provisoire de 1848
qui a proclamé l'abolition de l'esclavage dans
les possessions Françaises.

PART OF THE AUTOGRAPH LETTER OF ISAAC ADOLPHE CRÉMIEUX CONGRATULATING AMERICA ON THE EMANCIPATION OF THE SLAVES.

the sincerity of the prince's expressions of republican sentiments, and cherished the illusion that a nephew of Napoleon would sustain the republic in France, and redeem the "eighteenth of Brumaire." Moreover he was strongly prejudiced against General Cavaignac, who, after having refused, on the pretext of ill health, the portfolio of minister of war, offered to him by the provisional government, suddenly became well enough to be the chief executive.

Open Letter to Louis Napoleon.

Crémieux's illusions concerning the policy of Louis Napoleon soon vanished. Under date of Dec. 15, 1848, he addressed a letter to the newly elected prince, in which he exhorted him to be a "standard for reconciliation and not of disillusionment," and to remain true to his republican principles. He never saw Napoleon again. On leaving the prisons of Mazas and Vincennes, to which the coup d'état of his former friend had brought him, he retired from active politics and went back to his law practise, defending throughout France the newspapers that were persecuted, and the interests of all the proscribed republicans, among them Louis Blanc, Challemel-Lacour, Ledru Rollin, Pierre Leroux, and many others.

To enumerate Crémieux's many and important cases would be impossible. Among his clients were the sultan and the viceroy of Egypt. He journeyed to Bucharest in the interests of the Alliance Israélite Universelle, of which he had been one of the founders and of which he had become the president in 1863. Finally, in 1869, he had to give way to the voters of Paris, and, in spite of his seventy-three years, was compelled to take his seat in the Palais-Bourbon, to help overthrow the empire and again save his beloved France. But this time the task was impossible. The incapacity of the leaders and Bazaine's treason lost the army. Gambetta himself, formerly Crémieux's secretary and now his colleague in the Government of National Defense, could not create a new army or capable generals. The five months of terrible anxiety, followed by the inglorious peace, prostrated Crémieux. He offered a part of his wealth to help pay the millions demanded by the Germans, but Thiers would not listen to the plan of a national subscription. Crémieux was made a life senator. He gave 50,000 francs in aid of the victims of the flood at Toulouse, urged by the same sentiments that, in 1860, had led him to address the following appeal to his coreligionists in behalf of the Christians of Lebanon:

Memorable Pro-Christian Appeal.

"The Christians of the East are subjected to the most horrible persecution. Tortures, rape, assassination, pillage, burning, the murder of women, children, and old people, even mutilation of corpses—such is the picture presented by the whole region of the Lebanon. Blood is shed; misery and famine are spreading among a dense population, whom Mohammedan fanaticism is destroying in a war even against the intention and forces of the Turkish government, and whose sole crime is that they worship the Christ. French Jews, let us be the first to come to the aid of our Christian brothers; let us not await the results of diplomacy, which is always so slow and which will regulate the future; let us alleviate present needs. Let a large subscription be begun to-day in Paris, and let a Jewish committee be organized to-morrow. Do not let us lose one day, one hour; let the signal for abundant relief be given in the midst of this Jewish assembly, gathered in this capital of civilization. This signal will be answered by our brethren in England, Germany, Belgium, Holland, and all Europe; in the countries that recognize them as citizens, and in those that still refuse them this noble title. You, also, Jews of the American countries where religious liberty is triumphant, you will help the Catholics of Asia, who are so cruelly oppressed by superstition. Let the rich Jew bring his large offering, and the poor Jew his pious obolus. But a still greater thought shall rise from this first impulse. Who knows? Perhaps God, who rules over all, has permitted these catastrophes in order to give a solemn occasion to all the cults to aid one another, for mutual defense against the furious hatreds, the daughters of superstition and barbarity. A permanent committee in every country, with eyes open for all the victims of fanaticism, without distinction of religion, must be created and supported. The misfortunes that fall at this moment upon so many innocent victims arouse the sympathy of all. They suggest the thought of a future protection against this scourge, which our century repudiates with horror—religious persecution."

His Character.

Crémieux's entire life is a proof of the nobility of his character. In 1832 he heard that his father, on leaving the prison in 1796, had found his business destroyed, and had been compelled to compromise with his creditors. Crémieux did not rest until he had found all these creditors or their heirs; and he returned to them not only the principal, which most of them had forgotten, but also the accumulated interest for thirty-six years. Thereupon he sought and easily obtained the rehabilitation of his father's name. He never sacrificed any of his convictions to his personal interests, and did not hesitate to antagonize the powerful influence of the Rothschilds in advocating, in the Chamber of Deputies, the acquisition of the railroads by the government.

Always ready to aid his coreligionists, Crémieux never forgave them a mean action. Thus, he refused to aid Deutz, the despicable accuser of the Duchess of Berry, who appealed to him as being a Jew. On Jan. 30, 1880, Crémieux lost his wife, who, since 1824, had been his constant companion and helper. Both had frequently said that neither could live without the other, and Crémieux's death occurred ten days after that of his wife.

CRÉMIEUX or **CRÉMIEU, MOSES BEN SOLOMON:** Scholar; born at Carpentras, France, in 1766; died May 4, 1837. He was a nephew and son-in-law of Mordecai Crémieux. In 1790 he removed to Aix, in Provence. Here he established a Hebrew printing-office, from which he issued (1829–1835) a corrected edition of the prayer-book used in the four French communities of Avignon, Carpentras, L'Isle, and Cavaillon, together with a commentary thereon, under the title "Ho'il Mosheh Be'er" (Moses Began to Explain). He also published (1833–36) notes on Ibn Ezra's commentaries on Genesis, Exodus, Leviticus, the Five Scrolls, Proverbs, and Job. The former work is of greater intrinsic value than the latter.

Bibliography: H. Crémieux, in *Arch. Isr.* i. 372, 418; Gross, *Gallia Judaica*, p. 263.

L. G. A. R.

CREMONA: Italian city in the plain of Lombardy; capital of the province of Cremona. The beginnings of the Jewish community in this city appear to date back to the middle of the twelfth century, but the first authentic notice is of the year 1420, when the decurions of the city renewed some earlier privileges of the Jews. They lived in the Via Giudecca (now Via Zuecca), where there was a large synagogue, and in a few contiguous streets; and they had a cemetery in the vicinity, designated to-day as "S. Maria di Bethlem No. 2174." In 1456 Francesco Sforza took them under his protection because of their fidelity to the state. In 1466–68 they were so numerous that the citizens petitioned Princess Bianca Maria Visconti not to admit any more Jews. The treatment received by the Jews in the territory of Milan was generally just. Their chief occupations seem to have been in commerce, banking, and agriculture. They fared ill, however, under Spanish rule. Charles V. permitted the preaching friars to excite the populace against the Jews; but this permission was rescinded in 1541 by Guido Ascanio Sforza, chamberlain of Pope Paul III.

The first considerable disturbance in the ghetto of Cremona occurred when steps were taken to enforce the bull of Pope Julius III. ordering all Talmudic works to be burned (1553). It was in 1559 that the inquisitor-general of the city ordered the Jews to deliver to the Inquisition all their copies of the Talmud. Some of them obeyed; but deputies of the various congregations protested in a memorial, and the governor of Milan intervened in their favor. The Inquisition, however, remained obdurate, and the Dominicans came to its aid. One of these, Hieronymus of Vercelli, was a vicar acting as assistant to the inquisitor-general of Cremona; the other, Sixtus of Siena, was an apostate well known to the Jews from his previous fanatical preaching against them in various parts of Italy. As a result of their agitations, a censorship commission was organized, to which were appointed Vettoria Eliano, another convert, and a Jew named Joshua dei Cantori. The last-named had lived in a feud with Joseph Ottolenghi, a scholar who had opened a school in Cremona, had edited many Hebrew works, and had helped to make Cremona a center of Talmud learning. Joshua was ready to avenge himself on Ottolenghi and his friends by joining the Dominicans in their denunciations, and the commission gave a decision against the Talmud and rabbinical works. These proceedings finally wore out the patience of the governor; he yielded, gave orders that the Talmud should be burned, and ordered Spanish soldiers to aid in searching Jewish houses and the printing establishment for the proscribed works. In April or May, 1559, between 10,000 and 12,000 books were publicly burned. Seven years later, in 1566, Hebrew books were again seized, but were immediately restored by the Senate. When Pius V. ordered the Jews to wear the badge, and forbade the lending of money on interest, Cardinal Borromeo extended the application of these measures to all the Jews of Lombardy. In 1582 a Christian, having murdered a Jew, was punished on complaint of the community; whereupon the Christian citizens of Cremona sent a deputation to Philip II. requesting the expulsion of all Jews. When the Bishop of Cremona was elevated to the papacy in 1590 as Gregory XIV., the Jews were in danger of being plundered, and dared not leave their houses for several days.

Expulsion 1597.

On receiving the deputation from the citizens of Cremona, Philip II. ordered a census of the Jews, and in 1592 their expulsion. But this order was not carried into effect by Volasco, the governor of Milan; on the contrary, he lent his aid to Samuel Coen of Alessandria when the latter offered to carry a petition to Madrid. Coen succeeded in persuading the king to withdraw the order. The inhabitants of Cremona and Padua, however, offered considerable sums of money to Philip as an inducement to expel the Jews, and, advised thereto by his confessor, he acceded to their wishes. At the same time the Jews were accused of fraud in regard to the taxes, and were thereby deprived of the protection of the state. When the order of expulsion arrived, in 1596, the Jews were unable to leave because of the war in Lombardy between the French and the Spaniards, and the governor permitted them to stay until 1597. A new decree was then obtained from the king, ordering an immediate expulsion, and Volasco was forced to obey it. He tried to soften the lot of the unfortunate Jews by advising a gradual emigration, and by aiding and supporting them with money; he also, hearing that the fugitives were being molested and annoyed, strictly forbade any ill treatment or plundering. Only two families were allowed to remain until the trial in connection with the taxes was finished, and then, after a decision had been given in their favor, these too left. The fugitives went to Mantua, Modena, Monticelli, Reggio, Verona, and Padua. No Jews have lived in Cremona since that time.

In 1588 the community of Cremona numbered 456 persons. It was well organized, and is known to have supported (1550) a school of the Talmud, under the direction of R. Joseph Ottling. There were a "Bet El," the by-laws of which, dated Nov. 26, 1582, are still extant ("Ha-Asif," iii. 220), and a charitable society, Ḥonen Dal, whose constitution dates from 1591, when the community was already threatened with danger. The reputation of the community extended beyond its borders. The consent of the rabbis of Cremona was obtained on the occasion of the proceedings against Azariah dei Rossi's "Me'or 'Enayim" (see "Rev. Et. Juives," xxxiii. 86). The community was always ready to render aid to the persecuted, as in the case of the Maranos of Pesaro (*ib.* xx. 70); and when the communities of Italy sent a deputation to Rome to protest against the burning of Hebrew books, that of Cremona was the leader of the movement.

For many years there was a Hebrew printing establishment at Cremona, and when the publication of certain works was interfered with in other places, Cremona shared with Mantua the work of completing them. For example, the "Ẓiyyuni," one thousand copies of which had been in course of publication and had been burned during the Milan troubles of 1559, was brought out in 1560. In 1556–61 and 1565–67 Vincenzo Conti published here in excellent form several important Hebrew works—the Psalms in 1561, the Pentateuch and the Megillah in 1566 (?). The device of the publisher shows Hercules with the hydra and the motto "Superavit ac virtus." Several other books were subsequently printed at Cremona (for instance, by Christopher Draconi, 1576); the editions were often very large, 2,000 copies of the Zohar being issued in 1559–60. The Jews regarded their works as safe from the Inquisition in the territory of Milan.

Rabbis of Cremona.

The earliest known rabbi of Cremona was Menahem Immanuel b. Abraham Raphael Coen Rapa Porto (1519). Then followed: Joseph Ottling (Ottolenghi [?]; 1555); Eliezer b. Elia Ashkenazi; Abraham b. Abraham Basola; Isaac b. Gershom Gentili; Abraham b. Kalonymus Pescarolo; Raphael b. Isaiah delli Piatelli; Moses Menahem Coen Rafa Porto; Abab b. Elia Ẓarfati; Joshua Samvil ben Jekuthiel; David Aaron Norlenghi (1596); Nathan da Cremona; Joshua and Jacob b. Elhanan Heilbronn (היילפרון), born in Cremona; Abraham Menahem Coen Porto, who worked as corrector at Cremona in 1574.

CRESCAS, ḤASDAI BEN ABRAHAM (or **BEN JUDAH**; misreading of חסדאי בן אברהם קרשקש): Religious philosopher; born in Barcelona, Spain, 1340; died 1410. He was of an illustrious and learned family, in "Ḳore ha-Dorot" falsely designated as of the family עמשי (the abbreviation of על משכבם שלום יבוא, found at the end of the genealogy in his own preface to his great work). He was a disciple of the Talmudist and philosopher Nissim ben Reuben (RaN), and, following in the footsteps of both his ancestors and his teacher, he became a Talmudic authority and a philosopher of great originality (Joël, "Don Chasdai Creskas," p. 78, note 2, Breslau, 1866), important in the history of modern thought for his deep influence on Spinoza. While he did not occupy an official position as rabbi, he seems to have been active as a teacher. Among his fellow students and friends, Isaac ben Sheshet (RIBaSH), famous for his responsa, takes precedence. Albo is the best known of his pupils, but at least two others have won recognition—R. Mattathias of Saragossa (see "He-Ḥaluẓ," vii. 94), and R. Zechariah ha-Levi, the translator of Al-Ghazzali's "Refutation of the Philosophers" (see Steinschneider, in "Oẓar ha-Neḥmad," ii. 231). Crescas was a man of means. As such he was appointed sole executor of the will of his uncle Vitalis (Ḥayyim) Azday by the King and the Queen of Aragon in 1393 (Jacobs, "Sources of Spanish-Jewish History," pp. 134–137). Still, though enjoying the high esteem even of prominent non-Jews, he did not escape the common fate of his coreligionists. Imprisoned upon a false accusation in 1378, he suffered personal indignities because he was a Jew (Grätz, "Gesch." viii., ch. 4). His only son died in 1391, a martyr for his faith (see Crescas' pathetic words in Wiener's edition of "Shebeṭ Yehudah," Appendix), during the persecutions of that period. Nevertheless he kept his "eyes turned to the Father in heaven." How deep his faith was is shown by the circumstance that, notwithstanding this bereavement, his mental powers were unbroken; for the works that have made him immortal are all posterior to that terrible year. Another episode of his life worthy of note is connected with the appearance of the pseudo-Messiah of Cisneros, one of whose adherents he became. In 1401–02 he visited Joseph Orabuena at Pamplona at the request of the King of Navarre, who paid the expenses of his journey to various Navarrese towns (Jacobs, *l.c.* Nos. 1570, 1574). He was at that time described as "Rab of Saragossa."

Of his writings three have become known: (1) His letter to the congregations of Avignon, published as an appendix to Wiener's edition of "Shebeṭ Yehudah" (see above), in which he relates the incidents of the persecution of 1391. (2) An exposition and refutation of the main doctrines of Christianity. This "tratado" was written in Spanish in 1398. The Spanish original is no longer extant; but a Hebrew translation by Joseph ibn Shem-Ṭob, with the title בטול עקרי הנוצרים ("Refutation of the Cardinal Principles of the Christians"), has been preserved. The work was composed at the solicitation of Spanish noblemen (Grätz, "Gesch." viii. 411, note 2), and this explains the use of the vernacular. Crescas' object in writing what is virtually an apologetic treatise on Judaism was to present the reasons which held the Jews fast to their ancestral faith. He does this in a dispassionate, dignified manner, by contrasting the reasonableness of Jewish doctrines with the unintelligible perplexities of the Christian dogma. Crescas may also have had in mind, while thus defending Judaism, the many apostates who tried to demonstrate the genuineness of their Christian convictions by attacking their native religion. He was a lifelong combatant in the ranks of those who would expose the falsehoods of these apostates.

His main contribution to literature is (3) a work entitled "Or Adonai" (Light of the Lord). In it he develops his philosophy and proves himself master in the realm of thought. He had intended this work for the first part of a complete presentation of the contents of Judaism. It was to be followed by a second, to be known as the "Ner Adonai" (Lamp of the Lord), in which he desired to treat of duties and ceremonies. But this second part was never written. He doubtless had in mind the example of Maimonides. The "Or Adonai," as a philosophical treatment of Jewish dogma, corresponds to Maimonides' "Moreh Nebukim"; the "Ner Adonai" was to have been written on the lines of Maimonides' "Yad ha-Ḥazaḳah."

The "Or Adonai."

Crescas' "Or Adonai," notwithstanding its signal merit as the production of an independent and original thinker, met with scant attention. The much less meritorious elaboration of his pupil Albo (the "'Iḳḳarim") found its way into the libraries and minds of innumerable readers, and was republished time and again, though its strong points are mostly purloined from Crescas; but the master and teacher suffered from neglect and even eclipse. (Munk, in his "Mélanges," forgets to mention him.) Only the haggadic commentaries which, always strikingly clear, embroider occasionally the text of his rigid speculations, were frequently quoted in "'En Ya'aḳob," by Jacob ibn Ḥabib, who characterizes them as "sweeter than honey." "Or Adonai" is found in manuscript in almost every extensive Hebrew collection, but the editions have been few and faulty. The first print is that edited at Ferrara in 1556, which edition is disfigured by intolerable carelessness. Other editions are the Johannisberg quarto and the Vienna (1860) octavo. Both have added to the old mistakes a considerable number of new ones (Philipp Bloch, "Die Willensfreiheit von Chasdai Kreskas," pp. ii., iii., Munich, 1879).

Neither the style of the author nor the inherent difficulties of the subject are sufficient to explain this lack of interest in the work. His vocabulary is precise, and the presentation concise. The book offers no insurmountable difficulties for earnest students. The matter is attractive enough, and not beside the range of the philosophical interests of the Jews. And yet those who read and commentated Maimonides and Albo passed Crescas by. It is the position taken by the author, the boldness with which he strikes at the very roots of the Maimonidean-Aristotelian thesis, that produced this indifference. In this he failed of the sympathy even of such as were glad to honor him as "the Ḥasid" (Joël, *l.c.* p. 2), Characteristic of the attitude and feeling of the more numerous class which idolized Aristotle as represented by Maimonides, are the words of Shem-Ṭob in his commentary to part ii. of the "Moreh Nebukim": "Perverted fool" and "without comprehension" are among the words employed, and he characterizes Ḥasdai's objection to Aristotle as "impudent [הזיות] nonsense" (Joël, *l.c.* p. 2, note 1). In other words, Crescas met the fate always in store for the iconoclast. Among the Arab philosophers Al-Ghazzali's experience is similar.

Object of the Work.

Crescas' avowed purpose was to liberate Judaism from the bondage of Aristotelianism, which, through Maimonides, influenced by Ibn Sina, and Gersonides (Ralbag), influenced by Ibn Roshd (Averroes) threatened to blur the distinctness of the Jewish faith, reducing the doctrinal contents of Judaism to a surrogate of Aristotelian concepts. Abu-Ḥamid al-Ghazzali wrote the "Tehafat al-Falasifa" (Destruction of the Philosophers; see Munk, "Mélanges," pp. 373 *et seq.*) with a like aim — namely, to defend orthodox belief as far as it was menaced first by the doctrines of the philosophers which teach that matter is eternal and indestructible, that the world is indestructible and permanent, and that God is merely a demiurge, and further by their efforts at demonstrating God's existence, their inability to disprove the possibility of dualism, and their denial of God's attributes.

Crescas makes no concealment of his purpose to vindicate orthodoxy against the liberalism of Maimonides and Gersonides. Of these two the former especially had endeavored to harmonize revelation and faith with philosophy. While, in those instances where this harmony could not be established, Maimonides refused to follow Aristotle to the exclusion of Moses, his successors seemed bent upon the opposite course. For them Aristotle was infallible. His concepts of God's providence, of creation, matter, and immortality were theirs. They had often enough been attacked by orthodoxy, but excommunications and invectives were then, as always, powerless to suppress thought. Crescas met them as a philosopher who recognized the right of philosophical speculation. He did not agree with those Christian and Mohammedan theologians who in their speculations were advocates of a twofold truth—one for the theologian and the other for the philosopher, the former not cognizable by natural man, because supernatural and irrational, the latter open to the intelligence of natural man (compare Isaac Albalag's מצד העין, "philosophical," as opposed to מצד האמונה, "theological").

Well versed in philosophical literature, Crescas then proceeds to show that Aristotle is far from infallible. He is, as the Jewish anti-Aristotelian, of one intention with Giordano Bruno, and the precursor of Spinoza. He deplores that Maimonides, whose scholarship and honesty he admires, should have made of the fragile theses of Greek philosophy props for Jewish doctrine, saying that the example proved pernicious for his imitators. He believes it is high time to probe the proofs of "the Greek [Aristotle] who darkens the eyes of Israel in these days." This is his task. After having shown the untenability of the Aristotelian propositions, he would "establish the roots and the cornerstones upon which the Torah [= Jewish religion] is propped, and the pivots upon which it turns" (Preface). He does not denounce heretics, but exposes the weakness of the ground on which rest what he considers to be heterodox views. He desires to set forth the contents of Judaism and the limitations in respect to them of the scope of philosophy.

His book comprises four main divisions ("ma'amar"), subdivided into "kelalim" and chapters ("peraḳim"): the first treating of the foundation of all belief—the existence of God; the second, of the fundamental doctrines of the faith; the third, of other doctrines which, though not fundamental, are binding on every adherent of Judaism; the fourth, of doctrines which, though traditional, are without obligatory character, and which are open to philosophical construction.

The First Cause.

The first main division opens with a thorough criticism of the twenty-five (twenty-six) Aristotelian propositions ("haḳdamot") which Maimonides accepts as axiomatic, and out of which he constructs his idea of God. In the first section he presents all the demonstrations for these theorems, especially those adduced by Tabrizi; in the second, he shows the inadequacy of these ontological and physical propositions, and thus demolishes Maimonides' proofs for his God-concept. Crescas, admitting that the existence of a first cause is susceptible of philosophic proof, but only by contingence (he rejects the Aristotelian assumption that an endless chain of causes is unthinkable; *i.e.*, the first cause of all that is must be regarded as existent), holds philosophy to be incompetent to prove God's absolute unity, as does Ghazzali. The first cause may be philosophically construed to be simple, for if it were composite another would have to be assumed for the compounding. Still, this would not necessitate the positing of God's unity. Other deities might with other functions still be in existence, even if our God were thought to be omnipotent. Therefore revelation alone is competent to establish God's unity. Without the "Shema' Yisrael," philosophy fails to be a trusty guide. He introduces a new element into his God-idea. His predecessors contended that God's highest happiness—the divine essence, in fact—was His knowledge. He rejects this as inadequate, and posits instead God's love, always intent upon communicating itself and doing good. He argues against Maimonides for the admissibility of divine attributes. From the human subjective point of view, attributes may appear to posit differences in God; but this does not mean that they do so in God objectively. In Him, in the Absolutely Good, they merge as identical unity; predicates, especially of only logical or conceptual significance, are incompetent to cause real multiplicity or composition.

In the second division he enumerates those six fundamental doctrines as presupposed by revealed faith, without which Judaism would fall: God's omniscience, providence, and omnipotence; the belief in prophecy, freedom of the will, and that the world was created for a purpose. God's omniscience embraces all the innumerable individual beings; He has knowledge of what is as yet not in existence; He knows what of all possibilities will happen, though thereby the nature of the possible is not altered. God's knowledge is different from that of man: inferences from one to the other are not valid. (Here he sides with Maimonides against Gersonides.) God's providence embraces directly and indirectly all species and individuals. It rewards and punishes, especially in the hereafter. Crescas rejects the theories of Maimonides and Gersonides on this point. Love, not knowledge (intellectual), is the bond between God and man. From God's love proceeds only what is good, and punishment is also inherently good. God's omnipotence is not merely infinite in time, but also in intensity. Revelation, and it alone ("creatio ex nihilo"), makes it clear. Natural law is no limitation for God, but whatever is irrational proves neither God's omnipotence nor His lack of power; that is, God acts reasonably. Prophecy is the highest degree of human mentality. Maimonides makes it dependent upon certain conditions. While Crescas admits this, he differs from Maimonides in that he will not admit the refusal of the prophetic gift when these conditions are fulfilled. Connection and communion with God are not brought about by knowledge, but by love and reverence, leading us to Him if we keep His commandments. Very extensive is his presentation of the freedom of the will. He inclines toward its rejection; at all events, to its limitation. The law of causality is so all-pervasive that human conduct can not withdraw itself from its operations. Moreover, God's omniscience anticipates our resolutions. But the Torah teaches the freedom of choice and presupposes our self-determination. Thus he concludes that the human will is free in certain respects, but determined in others. Will operates as a free agent when considered alone, but when regarded in relation to the remote cause, it acts by necessity; or, will operates in freedom, both per se and in regard to the provoking cause, but is bound if analyzed with reference to the divine omniscience. Man feels himself free; therefore he is responsible and must be rewarded or punished. The accompanying sentiment (readiness or disinclination to act) makes the deed our own.

The Purpose of the World.

In the sixth section of this division, Crescas displays characteristic originality. Maimonides rejected as futile and unwarranted all inquiry into the ultimate purpose of the world. Crescas posits such an ultimate purpose and assumes it to be the happiness of the soul. In this life the soul is intently striving after union with the divine; the laws of the Torah help to realize this, the soul's, never quiescent yearning. After death, the soul will enter upon greater possibilities of love, in the higher existence. Former thinkers made immortality depend on knowledge. This is contrary to the teachings of religion, and also utterly unreasonable. Love brings about the soul's happiness of eternal duration in the hereafter and the communion with God thereupon ensuing. "The soul is the form and essence of man, a subtle spiritual substance, capacitated for knowledge, but in its substance not yet cognizant." By this definition he establishes the soul's independence of knowledge. Knowledge does not produce the soul. Man's highest perfection is not attained through knowledge, but principally through love, the tendency to, and longing for, the fountainhead of all good. Man's last purpose, his highest good, is love, manifested in obedience to God's laws. God's highest purpose is to make man participate in the eternal bliss to come.

The third main division devotes much attention to the theories concerning Creation. Whatever theory, however, be accepted, the belief in miracles and revelation is not affected. Religious tradition is so preponderatingly in favor of the assumption that the world and matter are created, and Gersonides' counter-reasoning is so inconclusive, that Crescas regards the denial of creation as heterodox. Immortality, punishment, reward, resurrection (a miracle, but not irrational), the irrevocability and eternal obligation of the Law, the belief in urim and thummim and Messianic redemption, are the other tenets treated as doctrines which should be accepted, but which are not, strictly speaking, basic.

In the fourth division thirteen opinions are enumerated as open to speculative decision, among them the questions concerning the dissolution of the world. (Crescas holds the earth will pass away while the heavens will endure.) Have there been other worlds besides our own? Are the heavenly bodies endowed with soul and reason? Have amulets and incantations any significance? What are the "Shedim"? What about metempsychosis?

An opponent of Maimonides on philosophical grounds, Crescas was also dissatisfied with the method of the "Mishneh Torah," for reasons often adduced by others as well; namely, the absence of indications of the sources, the rare mention of divergent opinions, and the lack of provision to meet new cases, owing to its neglect to establish general principles of universal application ("Or Adonai," Preface).

If among Jews he exercised for a long time only through Albo any perceptible influence, though he was studied, for instance, by Abravanel, who controverts especially his Messianic theories, and by Abram Shalom in his "Neveh Shalom," Crescas' work was of prime and fundamental importance through the part it had in the shaping of Spinoza's system. Spinoza's distinction between attributes and properties is identical with Crescas' distinction between attributes subjectively ascribed and their objective reality in God. The connection between Spinoza's views on creation and free will, on love of God and of others, and those of Crescas has been established by Joël in his "Zur Genesis der Lehre Spinoza's" (Breslau, 1871). See Spinoza, Baruch.

K. E. G. H.

CRESCAS, MORDECAI EN, OF ORANGE: Prominent member of the community of Carcassonne, France; lived in the second half of the thirteenth century. As leader (syndic) of the Jews of the whole district, he succeeded in obtaining special jurisdiction for the Jews of Carcassonne, and secured a decree from Philip the Fair, assuring them of the peaceable possession of the synagogues, cemeteries, and other communal property in the city. If the words אזוב (ezob, lit. "hyssop") and אברנגה (abrengah) designate "orange," as several historians think, he may have been called also Mordecai ben Isaac Ezobi and Mordecai En Crescas d'Avrengah. In this case he would be the Talmudist of Carcassonne who was in correspondence with Solomon ben Adret of Barcelona (Responsa, iii., Nos. 214, 302), and the poet who, on his way to Béziers, exchanged some poems with Abraham Bedersi. It seems that toward 1304 he lived in Carpentras, and filled there the position of rabbi.

G. I. Lev.

CRESCAS, VIDAL, DE CASLAR (דשקשלארי; called also **Crescas Caslari**, corrupted into **Kislad, Gislad,** and **Décadolas**; Hebrew name, **Israel b. Joseph ha-Levi**): Physician and liturgical poet of Avignon; member of the Yizhari family of that place. In 1327 Crescas translated into Hebrew the "Regimen Sanitatis" of his contemporary, the Spanish physician Arnold de Villanueva, under the title "Ma'amar be-Hanhagat ha-Beri'ut," the manuscripts of which are preserved in various libraries. Crescas wrote a poem for Purim, "Mi Kamoka" (Who Is Like unto Thee?), in about two hundred and forty stanzas, relating the story of the Book of Esther. A few stanzas have been published by Zunz, in "Allg. Zeit. des Jud." 1839, p. 681.

Bibliography: Steinschneider, *Hebr. Uebers.* p. 779; Gross, *Gallia Judaica*, pp. 7, 257, 619; Zunz, *Literaturgesch.* p. 504; idem, *Z. G.* p. 466; Landshuth, *'Ammude ha-'Abodah*, p. 153.

G. M. K.

CRESCAS, (DON) VIDAL, OF PERPIGNAN: French Talmudist; flourished in the first half of the fourteenth century. He was probably a native of Spain, going to Perpignan shortly before the outbreak of the Maimonides controversy. His position in this religio-philosophical discussion was, like that of many other rabbis, neutral, notwithstanding the efforts of his brother Don Bonafos Vidal of Barcelona, and of Solomon ben Adret, to induce him to take part against the philosophical faction. It is evident, on the contrary, from the letter he addressed to them, that his attitude toward the movement was sympathetic, although he himself was strictly orthodox. He held that while the young should be taught to study the Talmud, they should also have full liberty in the study of philosophy and science. Hence he emphatically sided with his friend Samuel Sulami, who had given shelter to the ostracized philosopher Levi ben Abraham of Villefranche, though thereby incurring the reproach of the orthodox. Although Crescas did not openly espouse the cause of the unfortunate philosopher, yet his letters show how deeply he sympathized with him (Gross, "Gallia Judaica," p. 464).

L. G. A. Pe.

CRESCENZ, JULIUS BERNHARD: Anti-Jewish writer in Germany at the beginning of the seventeenth century. He wrote "De Judæorum Privilegiis," Darmstadt, 1604-12; "Geistliches Bedenken, ob die Juden und Ihr Wucher in dem Römischen Reich zu Dulden," *ib.* 1612.

Bibliography: Fürst, *Bibl. Jud.* i. 192.

G.

CRESCENZI, ALEXANDER: Jewish convert to Christianity; lived at Rome in the seventeenth century. In 1666 he translated from the Spanish into Italian Antony Colmenarde Ludesina's treatise on chocolate, printed with notes by Alexander Vitrioli, Rome, 1667. Mandosius speaks of Crescenzi as a mathematician who became celebrated on account of his report, which he edited with mathematical notes, on the eruption of Vesuvius in 1660.

D. M. SEL.

CRESPIN, ELIAS: Rumanian rabbi, teacher, and journalist; born about 1850 at Eskee Sara, eastern Rumelia; he fled to Rumania after the Turco-Russian war of 1878. He was the first in the East to found a Judæo-Spanish journal in Latin characters, "El Luzero de la Paciencia," which had an existence of two years (1886–87) and which he edited at Turn-Severin (Franco, "Histoire des Israélites de Turquie").

S. M. FR.

CRESPIN, SAMUEL: Turkish rabbinical author; lived at Smyrna in the first half of the nineteenth century; son of Joshua Abraham Crespin, grand rabbi of Smyrna. He was the author of "Meshek Beti" (Steward of My House; Gen. xv. 2), novellæ to the Talmud, 2 vols., Salonica, 1833.

L. G. M. FR.

CRESQUES LO JUHEU: Chartographer who flourished at Majorca and Barcelona at the end of the fourteenth century. Prince Juan of Aragon sent to Charles VI. of France in 1381, when the latter was a lad of thirteen years, a "mappa mundi" made by Cresques lo Juheu (see plate under CHARTOGRAPHY); it has been suggested that this is the well-known Catalan map now in the Louvre, which marks an epoch in the history of map-making, as the recent discoveries of Marco Polo were added to the usual information contained in the "portulani" or sea-charts of the Mediterranean mariners. (See CHARTOGRAPHY.) In 1390 Cresques obtained no less a sum than 60 livres and 8 sous for a map made by him for Don Juan, King of Aragon. In the Spanish persecutions of 1391 Cresques was forcibly converted, and was known as Jaffuda Cresques; he appears to have remained in Majorca for a considerable time and to have become known to the people there as "lo Juen buscoler" (the map Jew), or "el Judio de la brujelas" (the compass Jew). In 1419 Henry the Navigator, the second son of King John I. of Portugal, established a naval observatory at Sagres and summoned to him Mestre Jaime of Majorca, who was probably identical with Cresques.

G. J.

CRESSON, WARDER: Religious enthusiast, and convert to Judaism. Born in Philadelphia, Pa., July 13, 1798; died in Jerusalem, Palestine, Nov. 6, 1860. He was directly descended from Pierre Cresson, one of the settlers of "Haarlem," N. Y., whose grandson, Solomon, migrated to Philadelphia about the beginning of the eighteenth century. Warder Cresson's father, the grandson of the last named, was John Elliott Cresson (1773–1814), who married in 1795 Mary Warder.

Connection with Leeser.

Warder Cresson, as a young man, was much given to speculation upon religious and sociological questions. Though all in his family were Quakers, and he was reared in that faith, in 1830 he published a pamphlet entitled "Babylon the Great Is Falling! The Morning Star, or Light from on High," in which he deplores the extravagance and evil tendencies of the times, and exhorts all Quakers to lead a better and less wayward life. He now went through a period of strong religious mania, joining successively various sects as each appeared to him to represent the true religion. About 1840 he made the acquaintance of Isaac Leeser, who took an interest in him, and he became deeply attached to Judaism, discarding all his other forms of belief. On May 17, 1844, he was commissioned consul at Jerusalem (the first to be so commissioned), though no despatches from him are now on file in the Department of State. He speaks of his departure for Jerusalem as follows:

> "In the spring of 1844 I left everything near and dear to me on earth. I left the wife of my youth and six lovely children (dearer to me than my natural life), and an excellent farm with everything comfortable around me. I left all these in the pursuit of the Truth, and for the sake of the Truth alone."

Previous to his departure he had been successfully engaged in agriculture at Gwynedd, a suburb of Philadelphia, and had accumulated a competence.

Residence in Jerusalem.

He was much affected by the surroundings of the Holy City, became more and more inclined toward Judaism, and assumed the name Michael C. Boaz Israel. During these years (1844–48) he was a frequent contributor to Isaac Leeser's magazine, "The Occident," devoting much space to a criticism of the methods of the London Society for the Conversion of the Jews. While in Jerusalem he identified himself with the Sephardic community, and was on terms of intimacy with Ḥakam Jehiel Cohen and the present chief rabbi, Elyashar. In 1848 he determined to become a Jew, and in March of that year, after much opposition from the bet din and the chief rabbi, Abraham Ḥai Gagin, he was circumcised and received into Judaism. He returned to Philadelphia in Sept., 1848, to arrange his affairs in order that he might pass the remainder of his days in the Holy City.

Trial for Lunacy.

When his wife and family learned of his determination they interposed every possible obstacle to the execution of his plans. He became estranged from all except one son, and had much difficulty in tracing the property which he had left in their care. They regarded his actions as indicative of a loss of mind, and in May, 1849, his wife (Elizabeth Townsend) and his son Jacob applied to the court and obtained a commission in lunacy. He appealed from this decision, and the trial of this cause, which extended over six days in May, 1851, was one of the famous cases of the time. Eminent counsel were retained on both sides and nearly one hundred witnesses were called. The decision of the lower court was reversed, and Cresson was discharged. The argument of Horatio Hubbell, Jr., one of his counsel, was published in "The Occident" (xxi.) in 1863, with interesting comments from the pen of Isaac Leeser.

During the period of his stay in Philadelphia he was a regular attendant at the Mickve Israel synagogue, taking part in the Jewish communal life, and rigorously observing the ceremonial laws. During that time he contributed to "The Occident," and in 1851 published his strangely jumbled volume, "The Key of David: David the True Messiah, or the Anointed of the God of Jacob," etc. Its value lies mainly in its autobiographical character.

Agricultural Colony in Palestine.

Soon after the trial he returned to Jerusalem and actively supported the efforts then being made for the agricultural regeneration of Palestine. In the fall of 1852, when Sir Moses Montefiore and Judah Touro were working along the same lines, he announced his intention of establishing an agricultural colony in the valley of Rephaïm. In March, 1853, the columns of "The Occident" (x.) contained his circular, sent from Jerusalem, inviting attention to, and assistance for, his projects. Though interspersed with much theology and with many quotations from the Bible, the circular is one that only a practical farmer and a thinker upon educational subjects could have produced. The prevailing distress was to be relieved by the establishment of agricultural colonies, and the oppressed of Israel in all parts of the world were to be enabled to return to Zion. Ample provision was also projected for the education of the colony. But, the means not being forthcoming, his plans were doomed to failure. Yet he never seems to have given up hope, and during the years 1853–56 the columns of "The Occident" contained many communications from him on this subject.

He married a Sephardic woman shortly after his return to Jerusalem. He lived the life of a pious Oriental Jew, dressed as a native Sephardi, and became a prominent leader of the community. At his death he was buried on the Mount of Olives, with such honors as are paid only to a prominent rabbi.

Besides the two works mentioned above, Cresson wrote: "The Two Witnesses, Moses and Elijah," London, 1844; "The Good Olive-Tree, Israel," *ib.* 1844; "Jerusalem, the Center and Joy of the Whole Earth," Philadelphia, 1844.

A. H. F.

CRETE or **CANDIA**: Island in the Mediterranean, about 55 miles south of the Morea. Jews had settled there long before the Christian era (I Macc. xv. 23 mentions Jews in Gortynia, Crete). Philo speaks of the Jews of Crete ("Legatio ad Caium," ed. Mangey, ii. 587). About 4 B.C. the false Alexander, on his way to Rome, visited the Jewish communities of Crete, which, believing him to be a scion of the Hasmoneans, provided him with large sums of money (Josephus, "Ant." xvii. 12, § 1). Cretan Jews residing in Jerusalem are mentioned in Acts ii. 11. Crete fell into the hands of the Romans in 67 C.E.; and the Jewish communities there shared the fate of others under the dominion of Rome: they were treated as Roman citizens under the pagan emperors, but became the objects of persecution as soon as Christianity had become established. Thus, under Theodosius II. (408), the Cretan Jews were expelled. The period of their banishment, however, must have been of very short duration; for it is recorded that in 440 a pseudo-Messiah arose among them, and that the faith of the Cretan Jews in him was so great that they neglected their business, abandoned their property, and waited for the day on which the new Moses would lead them dry-shod through the sea into the Promised Land (Socrates, "Historia Ecclesiastica," vii. 36).

Under Saracens, Byzantines, and Venetians.

In 823 Crete fell into the hands of the Saracens, but nothing is known of the fate of the Jews at that time. The island was reconquered in 960 by the Byzantines, who held it until 1204, when it was sold by the Marquis of Montferrat, to whose lot it had fallen, to the Venetian republic. An insight into the history of the Jewish communities of Crete during the thirteenth, fourteenth, and fifteenth centuries can be gotten partly from an interesting series of communal regulations issued in 1328, and partly from documents in the archives of Venice, published by Hyppolyte Noiret in the "Bibliothèque des Ecoles Françaises d'Athenes et de Rome." The regulations give the 15th of Elul, 1228, as the date of their proclamation in the synagogue, but Güdemann has shown that the date must be the 16th of Elul, 1328. They were reenacted at a later date by a certain Rabbi Ẓedakah. They speak of four congregations in the island, at the head of which were three leaders (ממונים). One of the synagogues was named "Elijah the Prophet." These regulations are signed by Baruch ben Isaac, Menahem ben Joel, ELEAZAR BEN MATTHIAS, Isaac ben Joseph, Shemariah ben Solomon ben Isaac ha-Kohen, Samson Agora, Elijah ha-Parnas ben Reuben, Parnas Capsali ben Solomon ben Joseph, Joshua ben Obadiah ha-Levi (Berliner's "Magazin," vii. 131), Judah Anatoli, Benjamin ben Joseph Bonifacio, Shemariah the Cretan, Ishmael the Physician, Menahem ben Jacob ha-Parnas, and Samuel ben Gamliel ben Shem-Ṭob. They demand attendance at the synagogue services and meetings, uprightness in dealing with non-Jews, extreme caution in the use of the ban, attendance of the whole community at funerals, complete separation of the betrothed before marriage, cessation of all work at midday preceding Sabbaths and festivals, the abandonment of the habit of frequenting courts of law, and cleanliness of the ritual bath, finally forbidding the ejectment of tenants for non-payment of rent. Religious conditions in the island must have reached a stage of serious deterioration, for in the section relating to public prayers complaint is made that very often not even a "minyan" (ten worshipers) were present. The people were accustomed, on Sabbaths and festivals, to promenade in the parks, to go rowing, or to attend the courts of law.

Under Venetian Rule.

Heavy Taxation.

The Venetian documents cover the period between 1380 and 1485, when Jewish letters flourished in the island. Though numbering only 1,160 in a total population of 200,000, the Jews must have been of some consequence. In 1412 complaint is made that they own all the shops in Retimo and the neighborhood. Their importance is further indicated by the heavy taxes imposed upon them. Up to 1387, they had been taxed in the sum of 1,000 hyperperes. At that date the tax was raised to 2,500; increased in 1395 to 3,000. In 1403 they were compelled to bear one-half the expense incurred in repairing the walls of Candia; in 1439 they were constrained to assume the burden of the annual payment of 4,000 ducats toward the expenses of the war, though the rest of the island had to make but one payment of the same amount. Equally oppressive taxes were laid upon them in 1431, 1432, 1465, and 1485. In addition, they had to lend the government whatever sums were called for by the Senate; in 1410, for instance, 2,000 ecus for the sending of troops to Negropont; 20,000 ecus in 1431; 5,000 ecus in 1447; 3,000 ecus in 1452; 1,000 ecus in 1464. Occasionally the Jews protested against such exactions. In 1389 Shabbethai Retu, Melchior Cassan, and Justof Missin, of Candia, appealed to the Senate in the name of the Cretan Jews, and the sum was diminished to 2,000 hyperperes in consideration of the eminent services rendered by them to the Venetian republic. In 1415 a protest was again lodged with the Senate.

In the Fourteenth and Fifteenth Centuries.

At times "privileges" had to be bought. In 1386 the Jews of Retimo were allowed to reopen a synagogue closed by Pietro Grimani, upon payment of 800 hyperperes toward the expenses of constructing a port. In 1392 they were required to supply twelve men to guard the ramparts near the ghetto; but in 1395 this order was rescinded for a money consideration. In 1402 the Jews of Negropont were forbidden to acquire ground except in their own part of the city, all the gates in which, except three, were ordered to be closed. In 1412 complaint was made to the Venetian Senate that Solomon, son of Lazzar da Meïr, had secured permission for himself and his descendants to open shops in any part of Retimo. The concession was immediately revoked. In 1433 the Senate prohibited the Jews of Crete from engaging in the brokerage business. By 1398 the Jews of Khania were not allowed more than 12 per cent interest upon loans; in 1449 they were further prohibited from lending money on mortgages. On the other hand, it is recorded that in 1421 one Cherson, son of Solomon of Retimo, owed a considerable sum of money to three Christian noblemen.

In 1389 the Jews complained that they could not pay the increased tax, because their numbers had been decreased by epidemics and emigration. But by 1395 their numbers had been considerably augmented, perhaps by exiles from Spain (1391) or from Venice (1394). Some, as the Delmedigos, had come from Germany. In 1453 a conspiracy against Venetian rule in Crete was hatched by Sifios Blastos, and another in 1462 by Jean Gavala. In both cases the conspirators were denounced by a priest and by a Jew named David, son of Elijah Maurogonato. In recognition of the service rendered by David the Senate granted certain privileges to the Jews. Jews were often known as exporters, and were concerned in the exportation of sugar to Austria (Berliner, "Aus dem Inneren Leben," p. 78).

At the beginning of the sixteenth century the communities of Crete were greatly enlarged by the arrival of Spanish exiles. On that occasion the Cretan Jews showed their racial solidarity by selling the golden ornaments in their synagogue in order to raise money to free many exiles from the hands of the captains of vessels who had claimed their passengers as their slaves. Unfortunately, the Cretan Jews were the victims of their generosity; for some exiles from Rhodes, in 1523, carried to Candia the plague, which made great ravages in the community. In 1669 Crete was conquered by the Turks, and its history from that time parallels that of other communities within the Turkish empire.

Recent History.

In 1869, on the advice of the chief rabbi of the island, Moses Ashkenazi, all Jews who were Greek subjects formally adopted Ottoman nationality. A statute of organization issued at this time by the grand vizier, Ali Pasha, decreed that the island should consist of a general assembly elected by the whole population. In 1873 the Jews of Khania were accused of a ritual murder; but, owing to the efforts of the French consul-general, the missing child was found in a neighboring village; and the Greek authors of the plot were imprisoned.

At the beginning of the Greco-Turkish war of 1897 there were 225 Jewish families in Crete, or 1,150 persons in a total population of 250,000, distributed among the three cities: Khania (200 families), Candia (20 families), and Retimo (5 families). They are engaged in commerce and in various manual occupations.

During the fifteenth and sixteenth centuries Candia was a center of Jewish learning. The families Delmedigo, Casani, and Capsali produced a series of distinguished rabbis and philosophers. Judah, the chief of the Delmedigo family, settled at Candia about 1400 (see Delmedigo family). The following members of these families were rabbis at Candia: Judah Delmedigo, disciple of Judah Minz (1510), Eliezer Delmedigo (*c.* 1560), Elijah Delmedigo (*c.* 1590), Samuel Menahem Delmedigo (about 1510), Elijah Capsali (1490–1555), Elkanah Capsali, and Samuel Casani, Elijah Capsali accepting later a rabbinate at Constantinople. Samuel Algazi was rabbi at Candia at the end of the sixteenth century. At present (1902) the head of the consistory is Abraham Elbogen.

Two religious customs were peculiar to Crete. The Hafṭarot for the afternoon of the Day of Atonement were recited in Greek, with the exception of the first three verses (Elijah Capsali, in "Likḳuṭim Shonim," ed. Lattes, p. 22). The 18th of Tammuz was held as a feast, known as the "Purim of Candia," on which day the women abstained from work (Lampronti, "Paḥad Yiẓḥaḳ," fol. 81).

CRIME: An act forbidden by human law and punished by human authority, in contrast to sinful acts which are thought to be evil in the eyes of God.

In the Mosaic legislation the principal crimes against person and property—murder, mutilation, and theft—are punished at the instance of the party injured, or of his kinsmen. The murderer is pursued and brought to justice, or is killed outright (Num. xxxv. 21) by the Avenger of Blood; mutilation and other injuries to the person are paid for in money (see Assault and Battery); the thief is condemned to make double restitution, and is enslaved if unable to pay.

But there were many offenses not so much directed against any one person as against the whole nation of Israel. They included all those grosser violations of God's declared will which were thought to bring down His wrath and vengeance upon the nation: such acts as idolatry, Sabbath-breaking, blasphemy of the sacred name, incest, adultery (for which the husband had no such civil redress as is afforded by common law). The witnesses to the evil deed were called upon by the Lawgiver, not only to prosecute the offender, but to help in the execution of the sentence (Deut. xiii. 7-11, xvii. 2-7). The duty of witnesses to prosecute is still the law of England, and those who happen to witness a criminal act are often put thereby to great expense. Besides death and banishment to the cities of refuge, the Biblical law has also the punishment of stripes, which are never to exceed forty in number (Deut. xxv. 3). The infliction of stripes is awarded by a judge, not by the congregation.

Crimes Expiated by Fines.

The crimes which were expiated by a fine, or compensation in money, embraced not only, as said above, larceny, robbery, and mayhem, but also even the ravishing of a maiden "which is not betrothed" (Deut. xxii. 28, 29). The sum which is awarded against the owner of an ox which kills a free man or woman, or a bondman or bondwoman, provided the owner had been properly forewarned of its vicious disposition (Ex. xxi. 29-32), is expiation for this kind of manslaughter. For the commission of a forbidden act through ignorance, a sin-offering is prescribed (Lev. iv. 1-3); for certain dishonest actions a sin-offering, together with restoration of the thing wrongfully withheld, plus one-fifth its value, is imposed. But these penalties are self-inflicted. The repentant sinner brings them upon himself by confession, and with a view to divine forgiveness (Lev. v.); while punishment in the ordinary sense is only adjudged upon the testimony of witnesses.

Motives for Punishment.

In the Mosaic legislation there are two practical motives assigned for the infliction of death for offenses against God or against the state: one, to deter others from offending in like manner; the other, to root out the evil elements in the nation and to keep the poison from spreading. Sometimes both motives are named together. Thus the man who rebels against the judgment of the high priest or supreme judge must die: "and thou shalt put away the evil from Israel. And all the people shall hear, and fear, and do no more presumptuously" (Deut. xvii. 12, 13); while in the case of the idolater condemned to death, we read: "So thou shalt put away the evil from the midst of thee" (*ib.* 7). This latter motive is brought out strongly in dealing with idolaters, who are regarded as "a root that beareth gall and wormwood" (*ib.* xxix. 17). The punishment by stripes, if not meant to correct and reform the offender, was at least so regulated and limited as not to degrade him.

But there was a view of crime older than the Pentateuch, and firmly embedded in the hearts of people and rulers. Vengeance should not fall on the evil-doer only, but on his children also—on his father, if alive, and on all his father's issue: only thus can God's wrath be appeased. The Pentateuch protests against this savage conception: "Fathers shall not be put to death for sons, and sons shall not be put to death for fathers; every one shall be put to death for his own sin" (Deut. xxiv. 16, Hebr.). As an illustration of actual practise based upon this conception, there is the act of Joshua, who—when Achan had put away gold and silver and fine raiment out of the spoils of Jericho, which had been doomed to destruction—not only has Achan put to death, but also his sons and his daughters. In like manner David, on the complaint of the Gibeonites against the dead king Saul, avenges them by hanging five of Saul's grandsons (II Sam. xxi. 1-9). But when, seven generations after David, Joash, King of Judah, was murdered, Amaziah, his son and successor, caused only the murderers to be put to death, and did not punish their sons, "according to that which is written in the book of the law of Moses" (II Kings xiv. 6). The declaiming of the prophets Jeremiah (xxxi. 29) and Ezekiel (xviii. 2) against the proverbial saying, "the fathers have eaten sour grapes, and the teeth of the children are set on edge," shows that a desire to punish the children for the sins of the fathers was still alive among the people.

While English law has never inflicted death by the hands of the hangman on the traitor's or felon's children, yet as late as in the reign of James II. the forfeiture of the convict's property was enforced with such rigor that his helpless children often faced a slower death by starvation. Like cruelty prevailed in France and Spain. And it was equally severe in the old seats of Israel, except where and when the Torah prevailed (compare Confiscation and Forfeiture).

The Bible places the view that certain wrongful acts, such as murder, shall be punished by society, at least as far back as the days immediately following the Flood, when the sons of Noah were told: "Whoever sheddeth the blood of man, by man his blood shall be shed" (Gen. ix. 16); and Cain expresses the fear that, for the murder which he has committed, "every one that findeth me shall slay me" (Gen. iv. 14); in other words, it was the duty of society, and even of the beasts of the field, to avenge the blood of Abel.

Talmudic Conception.

In the Mishnah we find that some "institutions" of the sages are enforced by penalties; but, generally, only those acts that are sinful, because forbidden in the Pentateuch, meet severe punishment. Some acts, plainly forbidden by the Law, are left to "death by the hand of Heaven," such as the intrusion of non-Levites in the place assigned to the Levites in the service of the Temple (compare Sanh. ix. 6 with Num. i. 51, xviii. 7, as reconciled in Sanh. 84a). Even civil redress for wrongful acts is sometimes withheld, where the application of the law is not clear, and vengeance is left to the powers above (B. M. iv. 2).

The criminal jurisprudence of the Mishnah may be regarded as almost modern in its bearings. The avenger of blood has dropped out; the idea of making fathers and sons suffer for each others' guilt lies now so far in the dim past, that the sages give to the text in Deuteronomy (xxiv. 16)—which forbids such savagery, the law of individual responsibility being sufficiently covered by the concluding words, "every man shall be put to death for his own sin"—this entirely new meaning: "fathers shall not be condemned on the testimony of their sons" (Sanh. 28a). The "congregation" which is to judge of matters of life and death becomes a court of twenty-three learned judges. An execution by stoning or burning is regulated so as to inflict the least possible pain (see Capital Punishment). All possible advantages are given to the accused in order to temper the severity of the Pentateuchal law (see Accusatory and Inquisitorial Procedure; Acquittal in Talmudic Law).

Classification of Crimes.

Offenses are classified according to the gravity of the punishment: those punished by stoning, by burning, by beheading, and by strangling coming first; next in gravity are those punishable by stripes, the most serious being those for which the Mosaic law prescribes excision ("he shall be cut off from his people"; see Karet); then come those wrongful acts which the written law redresses by fine, forfeiture, or sacrifice, it being understood that whenever the Scripture imposes a duty or a penalty, stripes are excluded. There can be no stripes for theft, for double, fourfold, or fivefold compensation is expressly named as the penalty for the act. Nor can a battery be avenged by stripes, for the Law says "eye for eye," that is, compensation for the loss of the limb or organ; "bruise for bruise" that is, compensation for the pain; and so for other violence done (Ket. 32b), though the offense entailed both pain and loss of money. It is not easy to determine the proper classification of an involuntary killing, with its penalty of banishment; but it comes, like murder, before a court of twenty-three judges.

The sages believed that death under the sentence of the law, provided the condemned man confessed his guilt, was full atonement, and that he would have his share in the world to come (Sanh. vi. 2); that the infliction of stripes was equivalent to the excision with which the law threatens the offender (Mak. iii. 15), though the latter view is disputed on technical grounds (*ib.* 23b; Meg. 7b). But where the only redress is a money compensation to the injured party, the sages taught that payment alone was not sufficient to secure the forgiveness of God, unless the guilty party had first sought to appease his injured neighbor (see Assault and Battery).

Substitutes for "The Four Deaths."

A suggestion occurs more than once in the Talmud (Sanh. 37b; Ket. 30a *et seq.*) that, though Israel has lost its freedom, and its judges can no longer wield the sword of justice, "the four capital punishments have not ceased. He who deserves stoning will fall from the roof, or a wild beast will trample him down; he who deserves burning will fall into a burning house, or be bitten by a poisonous serpent. . . . He who deserves the headsman's sword will be delivered to the [heathen] government, or will fall among robbers." Death by the sword was the punishment for murder, and it thus appears that the Rabbis were not unwilling to see Jewish murderers put to death under the laws of Rome or of Persia. The list of offenses punished by death is given in the Mishnah (Sanh. vii., viii., ix., xi.) under the headings of "the stoned," "the burnt," "the beheaded," "the strangled." There are 18 offenses involving the punishment of stoning; 5, of burning; 2, of beheading; 6, of strangulation (compare Capital Punishment).

Irregular Justice.

Besides the regular forms of punishment for crime, Jewish law recognizes certain irregular methods. "If the thief be found breaking in and be smitten that he die, there shall be no bloodguiltiness for him" (Ex. xxii. 2, R. V.)

On the analogy of this Biblical case the Rabbis decide several others (see Burglary). In three cases the person on the point of committing a crime may be killed: where he pursues a neighbor in order to kill him; where he pursues a male to commit sodomy; and where he seeks to ravish a betrothed damsel; for Deut. xxii. 27 indicates the duty of all that hear her cry to help her. But it is not lawful to "save by death from sinning" in the case of the Sabbath-breaker, or of the idol-worshiper, etc. (Mish. Sanh. viii. 7). Where one is suspected of murder, and, though the testimony of the witnesses is not sufficient, the judges are convinced of his guilt, they should cause him to be locked up in a cell, on a scanty diet of bread and water (*ib.* ix. 5). The disputants in the Gemara on this passage are not agreed on the question how great the deficiency in such testimony might be and the judges still be justified in inflicting death by ill treatment and starvation. There had been no trials for murder during hundreds of years in the countries where these disputes took place.

He who steals one of the holy vessels, he who curses God, naming Him with an idol [the wording of the original is rather obscure], and he who cohabits with an idolatress—these are permitted to be killed by zealots. The right of zealots in the last of the three cases is evidently drawn from the example of Phinehas (Num. xxv. 6-8). Lastly, it is said: "When a priest dared to serve in the Temple while unclean, his brethren the kohanim did not bring him before a court of justice, but the young men among them dragged him outside of the place of assembly and brained him with axes" (Mish. Sanh. ix. 6). See also Burglary; Capital Punishment; Corporal Punishment; Karet; Criminal Procedure; Robbery.

L. G. L. N. D.

CRIMEA: A peninsula of southern Russia, on the northern shore of the Black Sea. It was formerly known as Krim-Tartary, and in ancient times as Tauric Chersonese. As shown by inscriptions (see Bosporus) unearthed in various parts of the Crimea, organized Jewish communities existed there long before the destruction of the Temple. Jerome in his commentary on Obadiah (verse 20) reports, on the authority of his Jewish teacher Hananiah, that, according to a tradition prevalent among the Jews, the Assyrians and Babylonians conveyed their Jewish captives to the coasts of the Black Sea. As to the inscriptions and monuments found in the vicinity of Kertch and Yenikale see Harkavy in "Yevreiskiya Zapiski," published by A. Pumpyanski. The Crimean Jews were Greeks in language, customs, and social life, and enjoyed equal rights with their fellow citizens. But, while their neighbors influenced them, they also exercised a formative influence upon the religion of their neighbors; and the associations termed *σεβόμενοι θεὸν ὕψιστον*, that existed there, although not altogether Jewish, certainly showed traces of Jewish monotheistic influence ("Voskhod," 1901, No. 4; compare Schürer, "Die Juden im Bosporanischen Reiche," in "Sitzungsberichte der Berliner Akademie," 1897, p. 204).

Chazars.

In 47 C.E. the Romans conquered the Crimea, but the period of their domination was brief; for about the middle of the first century the Alans seized the country. In the second century they were displaced by the Goths; the latter, in their turn, being dislodged by the Huns in the fourth century. Although there are no records concerning the fate of the Jews during this period, it may safely be assumed that the successive masters of the country did not recognize any difference between the Jews and other inhabitants. Theophanes (671) speaks of the Jews of Phanagoria (Harkavy, "Ha-Yehudim u-Sefat ha-Slawim," p. 129). At the beginning of the seventh century the Chazars, a Turkish tribe which occupied the northern shores of the Caspian, overran the plains of the Crimea and gave their name to the greater part of the peninsula. The Chazars being of a mild and tolerant disposition, the Jews under their domination enjoyed complete freedom. This attracted to the Crimea many Jews from neighboring countries, especially from the Byzantine empire during the reign of Leo III. the Isaurian (718), who persecuted them relentlessly. They soon exercised a great influence over the Chazars. As the latter adopted settled habits and began to feel the need of a religion, many of the better classes, including the Chaghan, embraced Judaism. Thus the Crimean Jews became practically the rulers of the country until 1016, when the Chazars were dispossessed by a combined effort of the Russians and Byzantines. An account of all the Crimean cities in the possession of the Chazars (965) is given in King Joseph's letter to Ḥasdai ibn Shaprut.

Another Asiatic people of Turkish stock, the Pecheneges, who had established themselves in the Crimea at the beginning of the tenth century, expelled the Russians. During the domination of the Pecheneges, which lasted about a century and a half, the peninsula enjoyed great prosperity. At the beginning of the thirteenth century the Crimea became a province of the empire of the Kiptchaks, or Tatars. The new masters behaved generally with tolerance to the subjected people, and the Jews enjoyed equal rights with other inhabitants. A change, however, took place in their condition in 1258, when Berke, the third ruler of the Crimean Tatars, with his followers, embraced Islam, and the relations between the newly converted Mohammedans and the Jews became strained. About 1263 the Genoese established themselves at Kaffa, and the seaboard known as Gothia, extending to Cembalo (Balaklava), was ceded to them in 1315. Although many Jews lived in these places, little is known of them during the period of the Genoese domination, which lasted until 1475, when Mohammed II. subjected the Crimea and enslaved the Genoese and other Christians. In Taman at that time reigned the descendants of the Genoese Jew Simone de Guizolfi, who had secured this dukedom in 1419 by marrying the Princess Bichachanim.

Under the Khans.

Travelers of the sixteenth and seventeenth centuries (Busbeck, Cureus, etc.) tell of a considerable Jewish population in the Crimea (see Loewe, "Die Reste der Germanen am Schwarzen Meere," pp. 90, 115, 174, 183). Judging from some letters patent of 1594 granted to Jews of Karasu-Bazar, they were the victims of the rapacity of the Tatars. In these letters patent the khan deemed it necessary to prohibit the local authorities from stripping his protégés of their property—a proof that this was a common practise. A similar clause is found in another grant of 1743. A collection of letters patent granted to the Crimean Jews by various khans was published by Z. Firkowich (son of A. Firkowich), who pretends that these letters were given to the Karaites. The truth is that they were stolen by Karaites from the Krimchaki of Karasu-Bazar (Harkavy). Travelers in the Crimea in the seventeenth century report Jews as living at Kaffa (Theodosia), Karasu-Bazar, Koslow, Turleri, Bakhchi-Sarai, and Mankup (Des Lucca," Relation des Tartares," i. 17).

As shown by an epitaph in the cemetery of Chufut-Kale (Firkowich, "Abne Zikkaron," No. 512), the Karaites of that city were attacked in 1778 by the Tatars, twenty-seven persons being killed. Chufut-Kale, situated on a rocky mountain, became the forced abode of the Karaites, who were allowed to spend only their business hours in the Tatar capital. Arriving opposite the palace of the khans, they were required to alight and proceed on foot till out of sight. It can not be ascertained whether the Rabbinites also suffered from the riots of 1778, or whether they were subjected to the same treatment. In 1783 the Russians conquered the Crimea, and the history of the Jews there becomes merged in that of the Jews of Russia. From a letter (1784) sent from Chufut-Kale to Lutzk it is learned that the Jewish communities suffered heavily from the war between the Russians and the Tatars.

The Krimchaki.

There are three classes of Jews in the Crimea: the Krimchaki, the Karaites, and the Polish-Lithuanian Jews. The Krimchaki are the oldest settlers of the country. The time of their settlement in the Crimea can not be ascertained. They themselves assert that they went there in the sixth century. A tradition prevails among them to the effect that the manuscript ritual, which is still preserved in their synagogue at Karasu-Bazar, was transmitted from generation to generation for twelve centuries. It was composed by Moses of Kiev (compare Harkavy, "Altjüdische Denkmäler"). It is known under the title "Ḥazanya," and, with the exception of some slight variations, is the general Rumanian ritual. Harkavy, however, believes that the settlement of the Krimchaki is relatively of recent date. At present the greater number of them live in Karasu-Bazar, where they have their synagogue, presided over by a rabbi. In order that no profane discourse shall be held in the synagogue, they gather in the courtyard of the synagogue and wait there until the whole community is assembled. Then they enter and proceed at once with the service. As soon as this is concluded they leave the sanctuary in a body. They distinguish themselves by many other customs derived from the Tatars, whose language and customs they still retain. Thus, for instance, the ceremony of marriage takes place at dawn. Instead of using a "baldachin" ("ḥuppah"), they cover the bridegroom and the bride with a "ṭallit," while the bridesman and bridesmaid ("shoshbinim") twirl chickens round the heads of the couple seven times. Then, after killing the fowls, the bridegroom recites the consecrating formula, and the ceremony is concluded. The bride is not allowed to leave the house for seven days. The Krimchaki are engaged in handicrafts, viticulture, and agriculture. They are renowned for their scrupulous honesty.

The Karaites.

The Crimea was in the Middle Ages, and still is, the headquarters of the Karaites. Although the inscriptions on the scroll of the Law (Pinner, No. 10) preserved at the St. Petersburg Library, are proved to be forgeries, it is beyond doubt that in 1381 there were four Karaite communities in the Crimea—at Kaffa (Theodosia), Kale, Koslow (Eupatoria), and Yenikale—as is proved by a document of that date which is preserved at the St. Petersburg Library (Neubauer, "Aus der Petersburger Bibliothek," document 46).

List of Karaitic Authors.

A strong literary movement existed in the Crimea for many centuries. Among the most renowned scholars of the Crimea were: Jacob ben Moses ha-Temani (of Teman, Greece), author of "Sefer ha-Piṭron" (about the tenth century); Jacob ben Solomon of Mankup, author of a Hebrew grammar (about the twelfth century); Ezechiah ben Gedaliah ha-Nasi, a pupil of Abraham Kerimi (1348); Samuel ha-Ḳodesh ben David, author of "Massa‘ la-Ereẓ ha-Ḳedoshah" (1641); Moses ben Elijah ha-Levi, author of "Massa‘ la-Ereẓ ha-Ḳedoshah" (1654); Joseph ben Jacob of Kale, liturgist; Isaac Ḥazzan ben Moses, liturgist (d. 1664); Hillel Ḥazzan Kenui, liturgist; Jacob ben Mordecai, liturgist (died 1701); Abraham ben Jacob Yerushalmi, author of "Emunah Omen" and several astronomical works (1713); Joseph Ḥazzan of Kale, liturgist; Moses Chelebi Sinani, author of a work on the slaughtering of animals (d. 1722); Simḥah ben Joseph of Kale, author of "Me‘il Shemuel" (d. 1743); Moses Pasha of Kale, author of a commentary on the "Aẓulah" of Aaron I.; Samuel ben Abraham of Kale, author of "Ner Shemuel" and other works; Elijah Yerushalmi ben Baruk, author of "‘Asarah Ma’amarot" (eighteenth century); Simḥah Lutzki, author of the bibliographical work "Oraḥ Ẓaddiḳim," and of many other works (b. 1740–41); Simḥah ben Joshua, former Rabbinite, author of Biblical commentaries (1818); Joseph Solomon ben Moses (known under the abbreviation "Yashar"), ḥakam of Koslow, author of "Ṭirat Kesef" (1825); Abraham ben Joseph Solomon, liturgist; Mordecai ha-Ḥazzan Sultanski, author of "Abḳat Rokel" and many other works (d. 1862); Abraham Firkowich, author of "Abne Zikkaron" (1786–1874); Solomon ben Abraham Beim, ḥazzan of the Karaite community of Odessa (b. about 1820). See Karaites and individual articles on the various scholars.

Condition in 1755.

Information concerning the condition of the Karaite communities in the Crimea in the second half of the eighteenth century is furnished by several documents preserved in the St. Petersburg Library. In a letter dated 1755 and addressed to Abraham ha-Shofeṭ, the writer gives details which are substantially as follows: "The total Karaite population of the four communities numbers 500 families: 300 at Kale; 100 at Koslow; 50 at Kaffa; 50 at Mankup. Near Kaffa is Sulchat, where formerly existed an important community, possessing the largest synagogue in the Crimea. To-day it is of little importance, possessing only a ḥazzan and a shoḥeṭ, who recite the prayers morning and evening. All the synagogues, schools, and habitations of the Karaites are of stone. In each of these communities there is a school in which study is carried on throughout the day under the supervision of a teacher; in Kale there were four schools, three of which, however, are now closed. In the first lived Samuel ben Joseph, the author of a commentary on the "Mibḥar," which he did not finish; in the second lectured R. Samuel, the author of "Ner Shemuel"; in the third, Elijah ha-Ḥazzan, the scribe; and in the fourth, Elijah Melammed ben Isaac. Samuel Ḥazzan lectured at Koslow; Hillel ben Isaac, at Kaffa; Judah Ḥazzan ben Shelomoh, at Mankup. In 1735 the Crimea was invaded by the Turks. At Koslow they destroyed fifty boxes filled with books belonging to Elijah ben Isaac Ḥazzan.

Another letter (1764) shows that the Karaites considered it lawful to have two wives. In 1796 Catherine II. relieved the Karaites by reducing by one-half the poll-tax of twelve rubles which they, in common with the Rabbinites, had hitherto paid. When Nicholas I. issued the edict obliging Jews to serve in the army (1827), the Karaite S. Bobowich went to St. Petersburg, and, appealing to the edict of Catherine II., obtained the release of the Karaites from this obligation. They thus remained free from military service until 1874, when a new law was enacted compelling every Russian subject to serve in the army.

Karaitic Constitution.

Freedom from military service was not the only advantage the Karaites had gained over the Rabbinites. Other privileges—for instance, that of living and trading in any part of the empire—were granted to them. In 1837 they obtained for their rabbis the privileges enjoyed by the clergy of other faiths. A consistory, dealing with all the matters concerning Karaite worship in the Crimea, was established at Eupatoria. It is presided over by a ḥakam assisted by a ḥazzan and a shammash. These officials are elected by the people, but the election must have the assent of the government. Once the popular choice is sanctioned they can not be removed without the permission of the civil authorities. In addition to the salary which these officials draw from the Karaite communities, the government grants them 140 acres of land: 60 to the ḥakam, 40 to the ḥazzan, and 40 to the shammash. In 1894 the government established at Eupatoria a Karaite seminary of five classes, the inspector and the teachers of which enjoyed the same privileges as those of the gymnasium.

The most important of the Karaite communities found in the Crimea is that of Eupatoria, which numbers about 500 families. The Karaites are engaged in trade, in which they succeed well, owing to the privileges they enjoy. It is very probable that, besides the Krimchaki, there were not many Rabbinites in the Crimea during the later period of the domination of the khans. The relatively happy condition of the Jews in Poland at that time had tempted most of the Crimean Rabbinites to emigrate thither. This circumstance accounts for the fact that in 1462 thirty Rabbinites, who had been shipwrecked near Kaffa, were compelled to appeal for help to the Karaites, and also explains the absence of Crimean-Rabbinite contributions to Jewish learning.

A few prominent men from the earlier times of the Tatar domination deserve to be mentioned: Abraham Kerimi (fourteenth century), author of "Sefat Emet"; his son-in-law Eliakim; Moses ben Jacob, the exiled (1449) liturgist and author of many works; Asher ha-Kohen (1449); Kalman Ashkenazi (fifteenth century); Isaac Panyanto; Jeremiah Isaac Banin; Moses Kokos (1584); Baruk of Kale, author of "Meḳor Baruk," and his brother Mordecai of Kale; David ben Eliezer Laḥno, author of "Mishkan David."

With the occupation of the Crimea by the Russians the Rabbinites gradually increased, and communities consisting chiefly of Polish and Lithuanian Jews are found throughout the country, which forms a part of the government of Taurida, Simferopol being its capital. The most important communities are: Armiansk-Perekop, Bakchi-Serai, Chufut-Kale, Eupatoria, Yenikale, Karasu-Bazar, Kertch (Bosporus), Kaffa (Theodosia). The Jewish population in the four Crimean districts is divided as follows: Eupatoria, 3,192 (5.06 per cent of the whole population); Perekop, 1,549 (3.01 per cent); Kaffa, 9,670 (6.05 per cent); Simferopol, 17,687 (8.85 per cent).

Antiquities.

Many Jewish antiquities were unearthed in the last century in various places in the Crimea. These antiquities consist of: (1) Judæo-Greek inscriptions, the authenticity of which is beyond any doubt. They give evidence that organized Jewish communities existed in the Crimea long before the common era. (2) Tumulary inscriptions to the number of 751, collected by the Karaite ḥakam Abraham Firkowich, in his "Abne Zikkaron," Wilna, 1872. The inscriptions were found in the cemeteries of the following places: 546 in Chufut-Kale, called "Emeḳ Yehoshofaṭ," dating from 151 to 1842; 5 at Sulchat, dating from 910 to 1140; 72 at Mankup, dating from 866 to 1777; 28 at Kaffa (Theodosia), dating from 1078 to 1845; 100 at Eupatoria, dating from 1593 to 1852. A. Harkavy expressed doubts concerning the dates of some of these inscriptions, believing them to have been altered by Firkowich. In Harkavy's opinion none of these inscriptions antedates the thirteenth century. In his "Abne Zikkaron" Firkowich gives the text of epigraphs which he pretended to have found on scrolls of the Law and on Bibles which he had collected and sold to the St. Petersburg Library. These epigraphs, which, if genuine, would throw some light on the history of the Jews in the Crimea during the domination of the Chazars, were manufactured by Firkowich himself, as has been demonstrated by A. Harkavy. See Firkowich, Abraham.

CRIMINAL PROCEDURE: The method indicated by law for the apprehension, trial, and for fixing the punishment of those persons who have broken or violated the law. The prosecution and trial of criminals in Biblical times is enveloped in doubt. The only example of anything like a regular trial of a criminal case found in the canonical books is that of Naboth in I Kings xxi.; but the only thing clear from that scanty account is that Naboth was convicted on the testimony of witnesses, and not upon an extorted confession. The requirement of two witnesses is clearly stated in many passages of the Pentateuch. For everything else, for all matters of detail, we have to look to the Mishnah, slightly aided by quotations from the Baraitas.

In treating of the course of proceedings the Mishnah (Sanh. iv. 1) says: "In capital cases they [meaning the judges] "open with a view to justification and not to guilt"; but the real meaning of this passage had been lost even as early as the time of the Amoraim (Gemara, *ib.* 32b). According to the Mishnah, capital cases must not be tried on the day preceding a Sabbath or festival, for the court must adjourn to the next day, before it can convict, and courts may not sit on days of rest. While any of the "disciples" present may volunteer an argument for acquittal, they are not allowed to argue for conviction. In capital cases those sitting at the ends—that is, the youngest judges, not the judges of highest standing—gave their opinion first, in order to avoid any undue influence by the latter. None but "priests, Levites, and Israelites"—to the exclusion of converts, as well as of persons whose daughters are disqualified from marrying into the priesthood—are competent to judge capital cases (Mish. Sanh. iv. 2). The Sanhedrin (of 23 or 71) sat in a half-circle so that the members could see one another, and two court clerks stood before them, one to take down the words of the condemning, the other to take down those of the acquitting, judges (*ib.* 3). In capital cases the witnesses were cautioned, after being brought into the court-room, in these or similar terms:

> "Perhaps you speak by way of guess or estimate, or from what you have heard, as a witness who heard from the mouth of another witness, or of some trustworthy man. Perhaps you do not know that we are going to test you by formal and by free cross-examination. You should know that cases of life and death are not like cases about money. In a case about money the false witness can repay the money lost and he is forgiven; in a capital case the blood of the accused and of all his posterity clings to him to the end of the world; for so we find it as to Cain, who killed his brother, of whom it is said: 'The bloods of thy brother are crying out against thee' [Gen. iv. 10, Hebr.]—his blood and that of all his posterity. Or perhaps you say: 'Why should we trouble ourselves about this man's guilt?' But it is written: 'When the wicked perish, there is gleeful song'" (Prov. xi. 10, Hebr.).

"By way of guess or estimate" in this exhortation means "from circumstances"; and such evidence was deemed wholly insufficient for a regular conviction (see CRIME).

In prosecutions for theft, embezzlement, and other crimes, which were only punished by fines, double compensation, etc., the procedure was the same as in cases for damage to property ("dine mamonot"), taking place before three ordained judges ("mumhim"). Involuntary manslaughter, punishable by exile to the cities of refuge, was tried under the same forms as capital cases. The Mishnah leaves it to be inferred that these forms were also applied to prosecutions for misdemeanors punishable by stripes. Compare ACCUSATORY AND INQUISITORIAL PROCEDURE; ACQUITTAL IN TALMUDIC LAW; CRIME; SANHEDRIN.

CRIMINALITY: The average tendency to commit crime. The critics of the Jews have always contended that the general standard of morality among the Jews was lower than that of their Christian neighbors, and their tendency toward crime therefore greater. Such a charge was made by Johann David Michaelis in his review of Dohm's apology for the Jews. Michaelis says that while the Jews form only one-twenty-fifth of the population of Prussia, they furnish one-half of the criminals ("Orientalische und Exegetische Bibliothek," 1775-1785, xix. 7). This statement is false in every respect. The Jews, even now, after the partition of Poland, form only 1 per cent of the population of Germany. Further, David Friedländer has proved from official records that in 1789, in Prussia, of 1,703 criminal convictions only 22 were of Jews. Still Friedländer did not draw the conclusion that Jews were better men than the Christians; he merely contended that in order to judge the moral status of a community other conditions, such as occupation, education, and the political situation of the country, must be taken into consideration.

Difficulty of Comparison.

The difficulties which beset an unprejudiced scientific examination into the figures on which the charge of criminality is based are manifold. First, owing to the numerical insignificance of the Jews, any investigation should extend over a long period of years and over a considerable area. It is known, for instance, that, at a certain time, in the two penitentiaries of the grand-duchy of Hesse there were, among 600 convicts, only 5 Jews, while, supposing them to be as criminally disposed as their neighbors, they should have had about 25 repserentatives in the penitentiary ("Mittheilungen des Vereins zur Abwehr des Antisemitismus," 1896, p. 44), it is wrong, however, to draw favorable conclusions from these figures, for the statistics may have been different a few weeks later. It would also be unfair to point to the fact that, among the 45 persons convicted in Germany between 1882 and 1892 for infringement of the navigation laws, there was not one Jew, and that, during the same period, only 12 Jews were punished for malfeasance in office, while their proportionate representation should have been 73 offenders of this class. The facts are that few Jews are seamen, and they do not very frequently hold public office in Prussia. Similarly it would be misleading to speak of a lower standard of morality among Jews because they have, during the period 1882-92, furnished 191 cases of fraudulent bankruptcy, when their pro rata would have been 20, and 1,116 cases of bankruptcy, when their pro rata would have been 69. These figures do not prove that a Jew is ten and twenty times more apt to become bankrupt, because they must be compared with the number of Jewish and of Christian merchants, before a conclusion can be arrived at. In fact, while the Jews form only 1 per cent of the population, over 16 per cent are merchants. The number of Jewish criminals in Germany appears to be larger than it is, as Jews who evade military service are included in the total. As a matter of fact, however, this is due to emigration, which is of greater moment to Jewish young men to whom the avenues of public offices are closed. If this class of offenders be deducted, the proportion of criminality will be found much smaller.

The greatest difficulty in the way of a thorough study of the subject consists in the fact that statistical material is incomplete, both geographically and chronologically. Few countries furnish complete statistics, and none go back further than a few years. From these statistics it appears that the proportion of Jewish criminals to the whole population is in general below the average, that crimes of violence are exceedingly rare among them, while bankruptcy, forgery, and gambling are found more frequently among them than among non-Jews; but this is simply explained by the fact that these are the chief offenses of the mercantile classes to which Jews mainly belong. The figures given below are based on official statistics.

For Württemberg, Von Steudel gathered statistics, given in "Monatsschrift für die Justizpflege in Württemberg," 1841, covering the period from Dec. 31, 1827, to June 30, 1839. According to him the Jewish convicts were:

Year.	Number of Jewish Prisoners.	Jewish Percentage in Total Number of Criminals.	Jewish Percentage in Total Population.	Year.	Number of Jewish Prisoners.	Jewish Percentage in Total Number of Criminals.	Jewish Percentage in Total Population.
1827....	8	0.6	..	1834..	8	0.6	..
1828....	6	0.5	..	1835..	11	0.8	0.7
1829....	10	0.7	..	1836..	14	1.0	..
1830....	5	0.4	0.6	1837..	9	0.7	..
1832....	6	0.5	..	1838..	12	0.6	..
1833....	9	0.7	..	1839..	8	0.8	0.7

This would indicate a degree of criminality slightly above the normal.

In Germany there were convicted, during the period 1882-92, 38,288 Jews and 3,973,667 non-Jews. To maintain an equality in crime would have required the conviction of 47,306 Jews. In 1882 there were 998 criminals to every 100,000 inhabitants; while among the same number of Jews there were 844 criminals. In 1891 the number of criminals among 100,000 inhabitants had increased to 1,073, while among the Jews it had decreased to 799.

For Austria the percentage of the Jews in the whole population is 4.8, while, according to the official statistics, the Jewish percentage in total number of criminals was as follows:

1881..................	4.2	1886..................	4.2
1882..................	4.1	1887..................	4.2
1883..................	4.0	1888..................	3.9
1884..................	4.0	1889..................	3.5
1885..................	4.1	1890..................	3.6

Even in Galicia, which has been always described as a hotbed of moral corruption, the figures are in favor of the Jews, for in 1889 there were among 7,102 convicts only 656 Jews, while, according to their percentage (11.68) in the population, there should have been 829.

D.

CRISPIN, ISAAC IBN: Spanish moralist and poet; lived at the beginning of the twelfth century. Judah al-Ḥarizi praises him among the renowned poets of the twelfth century; and, judging from the title השר הגדול ("The Great Prince"), which he prefixes to Crispin's name, the latter must have occupied a high official position ("Taḥkemoni," ed. Constantinople, iii. 9b).

Crispin was the author of an ethical work entitled "Sefer ha-Musar" (Book of Instruction). This book, mentioned by Al-Ḥarizi, is, according to Steinschneider, identical with the "Mishle Anashim Ḥakamim" (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1402, 8), and with "Mishle 'Arab," still extant in two manuscripts in the possession of Baron de Günzburg. Under the latter title it was published in the supplements of "Ha-Lebanon," 1867-68. The "Sefer ha-Musar" in this case would be, if not a mere translation, an adaptation from the Arabic, as stated in the introduction to the "Mishle Anashim Ḥakamim" (see Steinschneider, "Oẓerot Ḥayyim," p. 368). This adaptation was in its turn translated into Arabic by Joseph ibn Ḥasan, under the title "Maḥasin al-Adab," which is still extant in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1220, 4). Like the original Hebrew, the "Maḥasin al-Adab" is divided into fifty "ḳasidas," which agree with those of the "Mishle 'Arab," published in "Ha-Lebanon." The "Sefer ha-Musar," or "Mishle 'Arab," is mostly written in verse.

G. I. Br.

CRISPUS: The ruler of the synagogue at Corinth, who became a Christian, with all his house, through the preaching of Paul (Acts xviii. 8). In one of his letters to the church at Corinth (I Cor. i. 14), Paul speaks of Crispus as one of those whom he had baptized. There is a tradition that Crispus became such an important factor in the early Church that he was ordained Bishop of Ægina ("Apost. Const." vii. 46).

E. G. H. I. M. P.

CROATIA: Southwestern part of the Hungarian crown provinces; consists of Croatia, Slavonia, and the Military Frontier, included since 1868. The earliest allusion to Jews in Croatia is found in a letter of the Spanish vizier Ḥasdai ibn Shaprut, addressed to Joseph, king of the Chazars. Two men, named Mar Saul and Mar Joseph, were the bearers of this letter; and they had come with the ambassador of the "king of the Giblim" to Ḥasdai at Cordova. Since both words, "Giblim" and "Croats," have etymologically the same meaning—*i.e.*, "mountain people"—it is generally assumed that by "Giblim" is meant the people of Croatia. This is the only evidence, however slight, of the settlement of Jews within the present limits of Croatia in the tenth century. The proximity to Constantinople, as well as the active commerce with Italy, and more especially with Venice, leads to the conclusion that Jews were living in Croatia in the Middle Ages; but as yet the only historical evidence for this hypothesis

Earliest Mention.

is an ordinance of the Venetian doge, dating from the sixteenth century, which forbade the Jews in Dalmatia to own any real estate, and, consequently, to settle there. It is recorded that at about that time a Jewish physician on his way through Ragusa was permitted to stay in that city six months. The political unity which always existed between Hungary and Croatia resulted, naturally, in a common legislation; but it is not known whether the various pro-Jewish and anti-Jewish laws of the empire practically affected Croatia also. A single datum the only one within a hundred years, appears about the middle of the seventeenth century. At that time there is found in the literature, side by side with the common "Jidov" (derived from "Judæus"), the expression — still used by the people—"tschifut," borrowed from the Turkish. The former expression undeniably proves that the first Jews came to Croatia with the Turks during the time of the Turkish rule. But it seems that these Turkish Jews left together with the Turks; for in the eighteenth century the first Croatian Jews appear with German names; hence they had immigrated from the north. An edict of the year 1729 forbids Jews to live either in Croatia or in Slavonia. Yet a small number lived there, as, for instance, in Essegg in 1751, who were looked upon as "black sheep," and had no rights. They fared still worse at Semlin (Zimony), to which town they came during the Belgrade peace negotiations (1739): they were not allowed either as regular or temporary residents.

The enumeration of the Jews of Croatia under Maria Theresa (1773) showed hardly twenty-five families. It was only after the edict of toleration of Emperor Joseph (1782) that the immigration from the north and the south increased, at first in the villages and cities near the Hungarian frontier. Hungarian pedlers, who before this had visited Croatia, now settled here. The emperor's edict especially benefited the Jews of Semlin, who had managed to remain there in spite of the decrees against them. There were Jews in Warasdin in 1770; the ḥebrah there was founded in 1803, the congregation in 1811. The first Jew appeared in Kreuz in 1794; the Jews of Agram—who consisted of only two Jewish families under Maria Theresa —bought a plot for use as a cemetery in 1811; as early as 1820 there was a congregation in Karlstadt; and isolated families lived in the outlying country, going even into the mountain districts, where today not more than two or three families are to be found. In 1830 the gates of the free city of Pozega were opened to the first Jewish tax-farmer; and about the same time the Jews of the surrounding smaller villages had a rabbi at the head of their congregation. The congregations of Croatia were already formed in the first quarter of the nineteenth century.

A liberal legislation slowly bettered the condition of the Jews after 1782. On complaint of the Jews of Cirkvena against the intolerance at the office of the commanding general of Warasdin (in connection with the petition of the Hungarian Jews), a decree was passed (1791) permitting the Jews to live undisturbed wherever they chose, and confirming them in the condition in which they had been since the edict of toleration. A light is thrown upon this condition by the decree of the Warasdin magistrate, of the year 1781, which is a curious mixture of modern toleration and medieval prejudice. Under it no Jews besides the twenty-nine families already living in the city are allowed to settle there permanently. Other Jews must receive from the magistrate a certificate of residence for a few days; if this is prolonged without permission, the community has to pay a fine of twenty ducats. In accordance with the state law, they may not own real estate, but they may live in any street. The council of the community has the right, in lawsuits, to pass judgment up to fifty florins, from which there is no appeal; and, furthermore, it may use coercive measures or call in the police to guard its privileges and authority. It is also required that the council provide for the widows and orphans, the sick, and the poor; and they are permitted to engage a rabbi. Even on the Military Frontier the Jews, if living in the Hungarian crown provinces, or paying the toleration tax, have been allowed to peddle since 1787. This tax lay heavy upon the Croatian Jews, who were hoping in vain for a reduction in 1839, when they sent a delegation for that purpose, and addressed a petition for the granting of civil rights, to the Reichstag in Presburg.

Increased Toleration.

The Reichstag again granted them some privileges (1840); but the tax of toleration remained in force. They were now permitted to live anywhere, to build factories, to engage in business or trade, to devote themselves to the arts and sciences, and to acquire real estate in those places where custom formerly had permitted it. About 1850 the congregations were incorporated and chartered, and registers of vital statistics were instituted by the government. The attempt of Rabbi Rokonstein to introduce a hierarchy by making the rabbinate of Agram the chief rabbinate for the whole country, was frustrated by the government, which established the autonomy of every individual community, and recognized the appellation "chief rabbi" merely as an honorary title to be given to rabbis of merit, without combining therewith a higher rank.

In 1859 the Jews obtained the privilege to keep Christian servants; and in the following year they at last acquired the right to own real estate anywhere. The petition for complete equalization, which they sent to the Parliament in 1861, received no attention whatever. In 1873 the Croatian Diet decided upon the emancipation of the Jews: until then the Jewish religion had been merely tolerated, especially on the Military Frontier. The decree of 1840 was not valid in this district; and only a certain number of Jews were allowed to settle. Semlin alone had a school. The war office, while allowing them to engage in honest trades and occupations, did not permit anything that might lead to usury; and they were excluded from the farming of the revenues, except in connection with the catching of leeches. When the Military Frontier was annexed to Croatia, in 1868, the Jews were allowed to live anywhere and to acquire homesteads. Until then there had been only one congregation in Semlin, with one rabbi. To these restrictive measures in the old Military Frontier it is due that in many sections there were no Jews at the beginning of the twentieth century. The decree of emancipation of 1873 gave to the Jews full civic rights; and the state treasury granted them a moderate sum for Jewish institutions (religious instruction and synagogue-building). The increase of the Jewish population in Croatia is shown in the following statistics: 1840–41, 380 souls; 1857–64, 850; 1869–79, 876; 1880, 13,488; 1890, 17,261; 1900, about 20,000, equivalent to 0.31 per cent of the entire population in 1857 and about 1 per cent in 1900.

The immigrants came from Bohemia, Moravia, and Hungary (Great Kanizsa) into Croatia; from Hungary (Bonyhád) into Slavonia; from Turkey into the Military Frontier. With the exception of a small number of "Spaniolen" (Sephardim) they have the German rites.

There are twenty-seven communities in Croatia: two, at Agram and at Essegg, have over 2,000 souls each (4 per cent and 8 per cent respectively of the entire population), and fourteen over 200 souls each. Eleven congregations have rabbis; the others have rabbinical delegates. There are four Jewish schools, at Agram, Essegg, Semlin, and Vukovár. With the exception of two, the communities are progressive; most of them have new temples with organs, a ḥebra ḳaddisha, and one or two benevolent societies. The several communities are not bound together by any sort of organization whatever.

Statistics.

The Jews of Croatia are engaged in all occupations, even in agriculture, but especially in trade, wholesale and retail. The wood industries are flourishing since Jewish business men have taken hold of them and have introduced stave and cane factories; they have also opened the one cotton-spinning and weaving establishment in the province. In professional life there are 30 Jewish lawyers (out of a total of 200), 10 Jewish judges, and about 50 Jewish physicians, either holding official positions or practising privately. In the arts and sciences the Jews of Croatia have not distinguished themselves. Even in Jewish science very little has been done; a few religious books by Dr. Jakobi (see Agram), a few treatises relating to the history of social life by Dr. S. Spitzer, and some articles on the history of the Croatian Jews (in the "Journal of the Country Archives," 1901–02) having been the entire output in this field up to the end of the nineteenth century. A society, founded by the Jewish youth of Agram in 1899, for the study of Jewish history and science, heralds a new era of intellectual activity.

The relations of the Jews of Croatia with the other denominations have been until very recently most friendly. Anti-Semitism, even in 1883, found no support. The peasantry, again, is indebted to the village Jews for new means of livelihood and the marketing of its products; and in the cities the assimilation of the Jews with the Croatians prevents race-hatred. Numerous Jews hold offices as town councilors, some even as mayors, and honorary positions in philanthropic and national societies are held by them. It is only in the last few years that attempts have been made by the clerical party to injure the Jews economically in many industries by establishing cooperative associations.

D. G. S.

CROCODILE: This well-known amphibious reptile (*Crocodilus vulgaris* or *niloticus*) is not mentioned by a specific Hebrew name in the Bible. There are passages, however, in which allusions to it occur, and which give a faithful description of it (compare Brehm, "Illustriertes Thierleben," iii. i. 112). Whether Ps. lxviii. 30 (A. V. margin) refers to the crocodile in the phrase "the beasts of the reed" is still an open question. Upon these beasts destruction is invoked, which would be strange if they were meant to denote Egypt; for the crocodile is the most characteristic animal of that country, and the psalm is pervaded by a friendly spirit toward the empire of the Pharaohs. It is thus more reasonable to hold with Duhm ("Die Psalmen Erklärt," in Marti's "Kurzer Hand-Commentar zum Alten Testament") that swine are meant, as designating the population of the Jordan valley, which, at the time of the composition of the psalm, consisted largely of non-Jews. It is interesting to note in reference to Ex. viii. 2 that the word ẓefardea' (A. V. "frogs") was explained as referring to crocodiles (Arabic, "timsaḥ") by all the commentators whom Ibn Ezra mentions in his commentary to this passage.

The Leviathan.

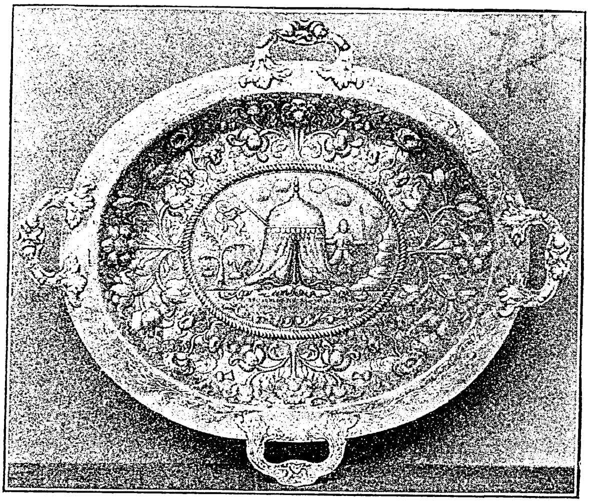
In Job (xl.–xli.) the description of the Leviathan certainly resembles that of the crocodile. Some of the particulars given—the impenetrable scales (xli. 15); the sharp scales (*ib.* verse 30); the teeth (verse 14); the thick armor (verse 7); the strongly marked difficulties besetting its capture; the futility of ordinary implements, as the hook, noose, and harpoon; and the impotence of the usual weapons, the spear, mace, and arrow (verses 2, 7, 26)—establish a strong presumption in favor of the identification. Against this evidence it has been urged that the other characteristics are not specific enough, as they are common to several large water-animals.

There is some possibility, however, that the writer was describing the crocodile from personal observation. "We have good evidence," says Canon Tristram in "The Natural History of the Bible" (8th ed., p. 261, London, 1889), "of its existence at the present day in the marshes of the Zerka, or Crocodile River." This fact, well known to Pliny ("Historia Naturalis," v. 17) and Strabo (p. 758), and confirmed by Pococke, was corroborated, according to Tristram (*l.c.*), by the Arabs with whom he conversed. W. M. Thomson ("The Land and the Book," popular edition, i. 73) testifies to the presence of crocodiles in the marsh of Zerka: he believes that he heard the splashing of crocodiles making their way "through this hideous swamp in quest of prey" (*ib.* p. 77). The latest testimony to the same effect is that of Schumacher ("Pal. Explor. Fund Quarterly Statement," Jan., 1887, p. 1), who reports having seen a crocodile in that neighborhood.

Although these coast districts did not belong to the regions familiar to the Hebrew writers, it is not reasonable to preclude the possibility that the poet in Job wrote of what he himself had seen, or from

Mythological or Real?

information supplied to him by those who had made personal observations of the animal. Even Gunkel ("Schöpfung und Chaos," p. 48), who, with Cheyne, would probably relegate this chapter to the domain of mythology, concedes that the poet meant to describe, not a mythological creature, but a monster actually living in his day, and that some of the characteristics mentioned are those of the crocodile. According to Gunkel, however, the bulk of the chapter is an adaptation of mythological material; the monster being taken from the Babylonian creation-myth. His objections are cogent and his theory must be admitted as having great probability as regards other passages, in which the crocodile is referred to under such designations as "tannim" ("dragons," R. V., Jer. xiv. 6), "rahab" (Isa. li. 9; Ps. lxxxix. 10), and "leviathan" (Ps. lxxiv. 14; Job iii.). But with reference to Job xli. 1 all facts point to the conclusion that the word "leviathan" is probably a later emendation, influenced by the mythical passages (F. Delitzsch, "Hiob," Leipsic, 1902). The enumeration of the characteristics is too complete to admit of any other explanation.



Silver Salver Bearing the "Arms of the Tribe of Judah."
Said to have been presented to Oliver Cromwell by Manasseh ben Israel.
(In possession of Sir Samuel Montagu.)

Other Biblical References.

The Arabs call the crocodile "timsaḥ," or "waral," both of which words have passed into Syriac. At one time they must have used the flesh of the animal for food; for the eating thereof is expressly forbidden to faithful Mohammedans. This may, however, be due to a reminiscent confusion of the crocodile with the "koaḥ" (Lev. xi. 30), mentioned among the unclean animals, and which the R. V. translates "land-crocodile" (marked in the margin as uncertain); while the A. V., following the Vulgate and the Septuagint, has "chameleon." According to Bochart ("Hierozoicon," i. 1069), the land-monitor, the "waral alarḍ" of the Arabs (*Psammosaurus scincus*), is meant, or perhaps even a larger monitor, the "waral al-baḥr," the Nilotic monitor. Bochart also seems inclined to make the "ẓab" of Lev. xi. 29 identical with the "koaḥ," or land-crocodile (*ib.* i., book iv., ch. 1). This latter is a lizard, if not a toad; and as such it is explained by the Talmudists (Ḥul. 127a). According to Ḳimḥi, the Hebrew "koaḥ" (Lev. xi. 30) is a lizard (in Linnē the *Lacerta stellio*). The Talmud characterizes this species as not dangerous to man and as having a soft, tender skin (Ḥul. 122a), which is easily removed from the body (Shab. 107). In Arabic it is called "ḥirdhaun." This חרדונא, in the Targ. for ẓab (the Syriac "ḥardana"), is translated by "crocodile," and distinguished from a land-lizard, as the "ḥardona" of the sea. This latter name occurs in a Talmudic caution that at prayer the curved posture of the "crocodile" (?) be not assumed (Yer. Ber. 3d). The Talmudic "ben nefilim" (Ḥul. 127a) has also been identified with the crocodile. But it seems to be the *Psammosaurus scincus* (Arabic, "saḳanḳur"). The crocodile is perhaps designated by the Talmudic קרוקיתא (Ned. 41a), which in B. B. 73b occurs in a fabulous connection as אקרוקתא, if this be not a corruption of עקרבא ("scorpion"). For Talmudic views on "leviathan" see the article under that title.

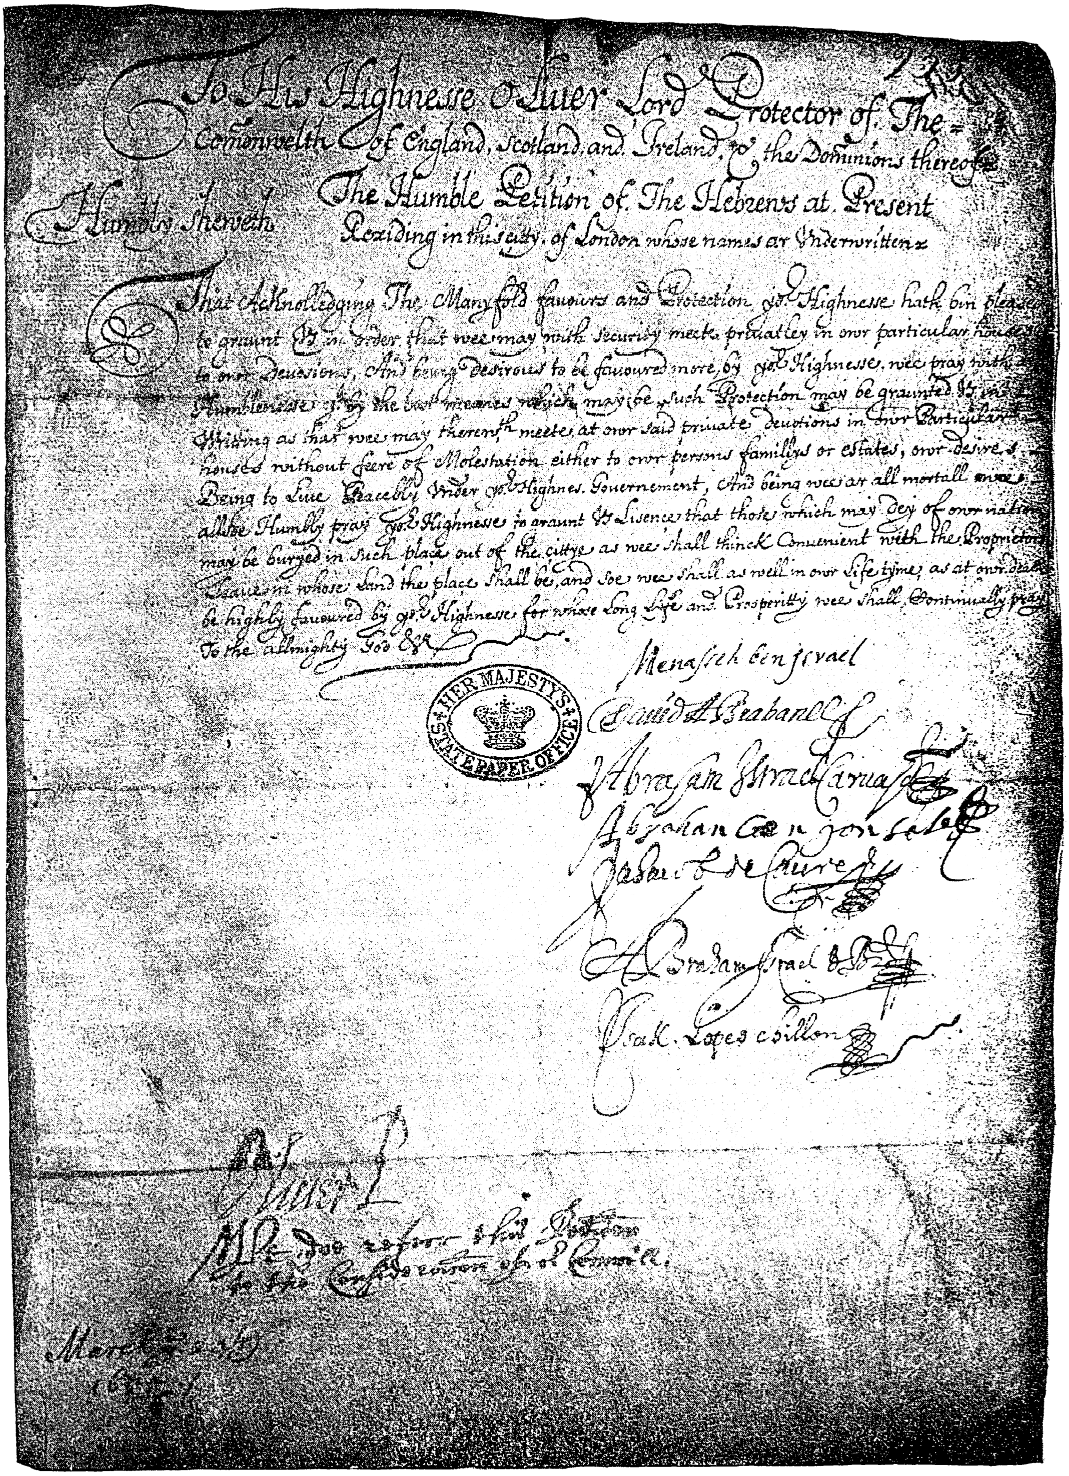
E. G. H.

CROMWELL, OLIVER: Lord Protector of England; born April 25, 1599, died Sept. 3, 1658. Cromwell favored readmission of the Jews into England, partly in the hope of thereby fulfilling the Messianic prophecy, but mainly because they had aided him as "intelligencers," and he foresaw that, with their control of the Portuguese and Spanish trade, and their large commercial interests in the Levant, the Hamburg Bank, and the Dutch East and West Indies, they would be of service to him in his expansionist policy, and would bring wealth into the country. There were at this time (1653) about twenty Marano families settled in England, who had fled from Spain through fear of the Inquisition. To all appearance Spanish merchants, and attending mass at the chapel of the Spanish ambassador, they were nevertheless known to Cromwell and a few others to be crypto-Jews. Antonio Fernandez Carvajal, a Portuguese merchant in London, had been of financial assistance to the Parliament, and had also, through a relative in Holland and a servant named Somers, or Butler, secured for Cromwell information regarding the Royalist intrigues with Spain. At the time of the Dormido mission to England to negotiate for readmission, Carvajal actively supported the petition, and it was favorably received by Cromwell. At this time, however, the anti-Jewish prejudices had become strong, and the Council would not consent (1654). Cromwell then sent for



To His Highnesse Oliver Lord Protector of The Comonwelth of England, Scotland, and Ireland, & the Dominions thereof

The Humble Petition of The Hebrews at Present Residing in this citty of London whose names ar Underwritten

Humbly sheweth

That Acknolledging The Manyfold favours and Protection yor Highnesse hath bin pleased to graunt us in order that wee may with security meete privatley in owr particular houses to owr devotions, And being desirous to be favoured more by yor Highnesse, wee pray with Humblenesse that by the best meanes which may be such Protection may be graunted us in Writting as that wee may therewith meete at owr said private devotions in owr Particular houses without feere of Molestation either to owr persons famillys or estates, owr desire Being to Live Peaceably under yor Highnes Governement, And being wee ar all mortall wee allsoe Humbly pray yor Highnesse to graunt us Lisence that those which may dey of owr nation may be buryed in such place out of the cittye as wee shall thinck Convenient with the Proprietors leave in whose Land the place shall be, and soe wee shall as well in owr Life tyme, as at owr death be highly favoured by yor Highnesse for whose Long Life and Prosperitty wee shall Continually pray To the allmighty God &c.

March 24
1655

PETITION OF THE JEWS OF ENGLAND TO OLIVER CROMWELL, DATED MARCH 24, 1655.
(In the Record Office, London.)

Manasseh ben Israel, and a motion was introduced in the Council in 1655, "That the Jews deserving it may be admitted into this nation to trade and traffic and dwell among us as Providence may give occasion." The motion was referred to a committee, and a conference was finally arranged to consider the question, the members being appointed by three of Cromwell's most devoted political adherents. The conference met in the Council Chamber at Whitehall, Dec., 1655. It consisted of representatives of the army, the law, the trading interests, and sixteen divines, the majority of whom Cromwell had carefully selected on account of their supposed approval of religious toleration.

The Whitehall Conference.

The first question which arose for consideration was whether there existed any law forbidding the readmission of the Jews, and this was settled by the decision that the expulsion of 1290 had never been valid. When the terms of admission were discussed, a distinctly hostile spirit manifested itself, and the mercantile interests and the clergy united in opposition. To secure a favorable vote the Protector added some more members who were thought to approve of the proposal, but they also ranged themselves with its opponents. Finally, on Dec. 18, a hostile crowd thronged into the Council Chamber, and it was obvious that Cromwell's project could not be carried except under the most extreme restrictions.

Cromwell now saw that his whole scheme would be thwarted if a vote were not prevented. With characteristic promptness he began at once to review the differences of opinion revealed by the various speakers. Protesting that he had no obligations to the Jews beyond those imposed by the Scriptures, he insisted that, "since there was a promise of their conversion, means must be used to that end, which was the preaching of the Gospel, and that could not be done unless they were admitted where the Gospel was preached." Then, turning to the objecting merchants, he said: "You say that they are the meanest and most despised of all people. But in that case what becomes of your fears? Can you really be afraid that this contemptible and despised people should be able to prevail in trade and credit over the merchants of England, the noblest and most esteemed merchants of the whole world?" Finally, having announced that nothing was to be hoped from the conference, and that he should use his own judgment in acting for the glory of God and the good of the nation, he vacated the chair and brought the proceedings to a close. The conference was cowed, and dissolved without a word of protest.

What finally precipitated the solution of the difficulty was the outbreak of the war with Spain. The Spanish Maranos were no longer able to live in England as Spanish citizens, and in 1656, relying upon the decision that the expulsion of 1290 was no longer valid, they openly threw off their disguise and assumed the position of Jews.

In the following year, probably on Feb. 4, 1657, Cromwell in a public meeting made a "seasonable benefaction" to Carvajal, perhaps a verbal assurance that the Jews would not be disturbed in the exercise of their religion. He had previously made a grant of £100 to Manasseh ben Israel. Altogether Cromwell's action enabled the Jews to live as such in England at a time when there was sufficient opposition to them on the part of the clergy and the mercantile classes to have prevented their residence, if the government had been weak or ill-disposed toward them.

CROOL, JOSEPH: Teacher and controversialist; flourished in England about 1838. He gave lessons in Hebrew to a few students in the University of Cambridge when, for several years, the regius professors of Hebrew were absentees. He was not by any means a man of learning, though he could read three languages, English, German, and Hebrew; he was given over to prejudices, and delighted in old wives' fables and vain traditions. He was in the habit of wearing a parchment girdle, on which were inscribed passages from the Law and the Talmud.

Crool was opposed to the emancipation of the Jews; believing that the introduction of Jews to Christians in the legislature would lead to the conversion of the former to Christianity. He wrote two works on this subject in 1829, entitled "The Fifth Empire" and "The Last Generation," both published at Cambridge.

CROSS: 1. The stake (*σταῦρος* = צלוב or צליבא) used by the Romans at crucifixion. This was so familiar to the Jews in New Testament times that they spoke frequently of "men carrying their cross before them while going to be executed" (Gen. R. lvi.; Pesiḳ. R. xxxi., ed. Buber, 143b), as did Jesus (Matt. x. 38, xvi. 24, and parallels; see Crucifixion).

2. A specific Christian symbol: termed by Jews שתי וערב ("warp and woof"); also צלם ("idol"). Concerning this the law is: "As far as it is made an object of worship by Christians, it is to be treated as an idol and prohibited for use; if, however, it is worn as an ornament without any religious object, its use is permitted to the Jews" (Isserles, Shulḥan 'Aruk, Yore De'ah, 141, 1; R. Mordecai to 'Ab. Zarah iii. in the name of R. Eleazar b. Jacob of Worms). However, being a Christian symbol, it has always been scrupulously avoided by Jews. Pious Jews would not even wear badges or decorations with the cross attached to them, whereas more liberal ones do not hesitate to wear either the Iron Cross as German soldiers, or the Red Cross as members of the Red Cross Society. To embroider ornamental crosses upon silk dresses for Christian ladies

is not forbidden to Jewish artists, according to Solomon b. Adret (see Berliner, "Aus dem Leben der Juden," 1900, pp. 13, 130). The Jewish aversion to using any sign resembling a cross was so strong that in books on arithmetic or algebra written by Jews the plus sign was represented by an inverted "ḳameẓ" (⊥).

The cross as a Christian symbol or "seal" came into use at least as early as the second century (see "Apost. Const." iii. 17; Epistle of Barnabas, xi.–xii.; Justin, "Apologia," i. 55–60; "Dial. cum Tryph." 85–97); and the marking of a cross upon the forehead and the chest was regarded as a talisman against the powers of demons (Tertullian, "De Corona," iii.; Cyprian, "Testimonies," xi. 21–22; Lactantius, "Divinæ Institutiones," iv. 27, and elsewhere). Accordingly the Christian Fathers had to defend themselves, as early as the second century, against the charge of being worshipers of the cross, as may be learned from Tertullian, "Apologia," xii., xvii., and Minucius Felix, "Octavius," xxix. Christians used to swear by the power of the cross (see Apocalypse of Mary, viii., in James, "Texts and Studies," iii. 118). Nevertheless Jewish teachers in the Middle Ages declared that Christians must be believed when swearing by the cross, as, in reality, they swear by the true God (Isaac of Corbeil, in "Sefer Miẓwot Ḳaṭan," 119, quoted by Güdemann, "Gesch. d. Erz. u. Cultur in Italien," 1880, i. 90). The fact, however, that the cross was worshiped as an idol during the Middle Ages caused the Jews to avoid (compare Ex. xxiii. 13) the very word "Cross," as well as all derivatives of it; for instance, "kreuzer "they called "ẓelem" or, abbreviated, "ẓal"; and the town "Kreuznach" they called "Ẓelem-Maḳom."

Several forms of the cross appear to have been used: the simple form, like a plus sign, the so-called St. Andrew's cross, and the Latin cross, which is mentioned in Ezek. ix. 4 (Hebr.) as the "mark of life set upon the men to be saved" (compare Aquila, Symmachus, Theodotion, and Vulgate, or St. Jerome, to Ezek. *l.c.*; and Tertullian, "Adversus Marcum," iii. 22; compare Job xxxi. 35). On the other hand, the oblique or St. Andrew's cross, resembling the letter "x," was used in Justin's time (see "Apologia," i. 60, where he compares the Christian cross with the cosmogonic starting-point in Plato's "Timæus," 36), and was known also to the Jews (see ANOINTING and CABALA), this form as the initial letter of *Χριστός* being preferably used. In Jewish circles the original connections of both the Latin and the St. Andrew's cross were quite naturally ignored.

CROSS-EXAMINATION. See EVIDENCE.

CROWN.—Biblical Data: The translation employed for five distinct Hebrew words in the Bible. It renders, first, "zer," a technical term used frequently in the Priestly portions of Exodus for the golden molding with which the Ark (xxv. 11), the table (xxv. 24), its border (xxv. 25), and the altar of incense (xxx. 3) were decorated. While this is an uncommon use, the word is employed secondly and more accurately for the Hebrew "nezer." This carries with it the idea of consecration, and refers solely to the circlet worn on the head by a Hebrew monarch as a symbol of his royal power (II Sam. i. 10; II Kings xi. 12), or to that worn by the high priest (Ex. xxix. 6, xxxix. 30). Because of the significance of the crown, the word is used figuratively for the authority of a king (Prov. xxvii. 24). A third word, "'aṭarah," is used in a perfectly general way both directly (II Sam. xii. 30; Ezek. xxi. 31 [A. V. 26] and figuratively (Job xix. 9, xxxi. 36). It also refers to wreaths used at banquets for purposes of decoration (Isa. xxviii. 1), or at games as rewards (Prov. iv. 9). For "crown" in the phrase "crown royal" in the book of Esther, however, there is another Hebrew word, "keter," which seems to be a Persian loan-word.

In the New Testament the words *στέφανος* and *διάδημα* are indiscriminately rendered "crown" in the A. V., but distinguished in the R. V. (I Cor. ix. 25; II Tim. ii. 5; Rev. iv. 4, 10). The latter is the real insignia of royalty; the former, a general symbol of superiority. This distinction is not maintained in the Old Testament. Finally, the word occurs not infrequently for "ḳadḳad" in the phrase "crown of the head," referring to the upper part of the head.

In the New Testament a crown symbolizes victory and all that it involves by way of reward. In the Old Testament it is rather a symbol of splendor and dignity (Prov. xii. 4, xvi. 31). Still, if the Hebrew reading is correct, in Ps. cxlii. 8 the crown is indicative of triumph.

E. G. H. F. K. S.

——**In Post-Biblical Times:** The use of crowns among the Jews in post-Biblical times, both in life and in literature, is varied. Under the influence of Greek custom the guests sat at the festive table with their heads crowned with garlands. In the Book of Wisdom (ii. 8) the ungodly are quoted as saying, with reference to their festal meals: "Let us crown ourselves with rosebuds before they be withered." With these are contrasted the righteous whose reward is with the Lord: "They receive the crown of royal dignity and the diadem of beauty from the Lord's hand (*ib.* v. 16). The custom of sitting with wreaths round the head at feasts seems to have been quite common among the Jews before the destruction of the Second Temple. Ben Sira describes a Jewish feast at which the symposiarch sits with a crown of honor (Ecclus. [Sirach] xxxii. 1–2). Judith and all the women of Israel celebrated a thanksgiving festival after the victory over Holofernes, "dancing, being crowned with olive garlands, and all the men of Israel followed in their armor with garlands" (Judith xv. 13; compare iii. 7). Thus the Jews of Alexandria, after their miraculous deliverance, celebrated a thanksgiving feast "crowned with garlands of all kinds of sweet-scented flowers" (III Macc. vii. 16; compare *ib.* iv. 8, and Josephus, "Ant." xix. 9, § 1). Likewise, the Jews in Maccabean times celebrated the Feast of Tabernacles sitting in their booths, "with wreaths upon

Festal Crowns.

their heads," as may be learned from the Book of Jubilees, xiv. 30, where Abraham is said to have received an ordinance to this effect for all generations. Obviously, this custom gave rise to the belief that the Tabernacle feast was a Bacchic festival (Plutarch, "Symposium," iv. 5; compare II Macc. vi. 7).

Whether this Greek custom goes back to ancient Semitic life (see Isa. xxviii. 1–5, and Luzzatto's Hebrew commentary) can not be decided. The Sukkah garlands or crowns of wheat (עטורי סוכה and עטרות של שבלים, Yer. Sukkah i. 51d; Tosef., Sukkah, i. 7) appear to be a reminiscence of the older "crowning of the head." Possibly the crowning of the cup of blessing at the saying of grace (עטור, Ber. 51a; Yer. Ber. vii. 11d; see also Frankel's commentary) is a survival of the Greek symposium.

Crowns of Glory.

Crowns were placed by the Gentiles upon their idols (Epistle of Jeremiah 9; Acts xiv. 13); and accordingly, such "crowns of wheat-ears or of roses" placed upon idols were interdicted (Yer. 'Ab. Zarah iii. 42c, 43d). The Jews, however, modified the custom by placing crowns of gold upon the forefront of the Temple at the dedication feast (I Macc. iv. 57). They also put garlands of olive around the festal steer that led the annual thanksgiving procession, and around the baskets containing the first-fruits (Bik. iii. 3, 9, 10).

God Himself is constantly represented as wearing crowns. The archangel Sandalfon binds wreaths for his Maker (Hag. 13b); and the angel Akatriel (אכתריאל = "the crowning angel") received his name from his charge of holding the crown of glory over the Most High on His heavenly throne (Ber. 7a). According to the Slavonic Enoch (xiv. 2–3), every evening four hundred angels remove the crown from the head of the sun and lay it before the Lord; and every morning they replace the crown before the sun sets forth upon its daily journey. "The king of light," whose head is surrounded with crowns, "places the crowns of light ever anew upon the angels in the heavens" (Brandt, "Mandäische Schriften," 1893, pp. 13–19). The four and twenty elders in heaven have also "crowns of gold" on their heads; and when prostrating themselves before the Lord they "cast their crowns before the throne" (Rev. iv. 4, 11).

Crowns of Reward.

Most crowns of reward mentioned in Hellenistic and rabbinical literature refer to the world to come. The angel of death says to Abraham (Testament of Abraham, A, xvii.; B, xiii.), "If any one is righteous I take crowns and come to him." "The greatness of thy love toward God becomes a crown upon thy head." (Compare "the crowns and thrones of glory" for the righteous in Ascensio Isaiæ, vii. 22, viii. 26, ix. 10; Hermas, "Similitudes," viii. 2.) Such crowns are especially accorded to the martyrs (see Testament of Job, ix. 13, probably based upon עטרות, Job xxxi. 36; Kohler, in Kohut Memorial Volume, p. 284). "When he has been approved he shall receive the crown of life which the Lord promised to them that love him" (James i. 12, R.V., obviously with reference to Judges v. 31, as interpreted by the Rabbis, Yoma 23a). Likewise, I Peter v. 4: "Ye shall receive a crown of glory that fadeth not" (compare Rev. ii. 10, "a crown of life"). Especially does Paul dwell upon the "incorruptible crown" obtained in the race for the higher things, in contrast to the "corruptible crown" given to the victor in games (I Cor. ix. 25; II Tim. ii. 5; compare II Tim. iv. 8, and Philo, "De Allegoriis Legum," xxvi. § 26). These older conceptions cast light also on later rabbinical passages concerning the CROWNS OF THE RIGHTEOUS and the CROWN OF THE LAW.

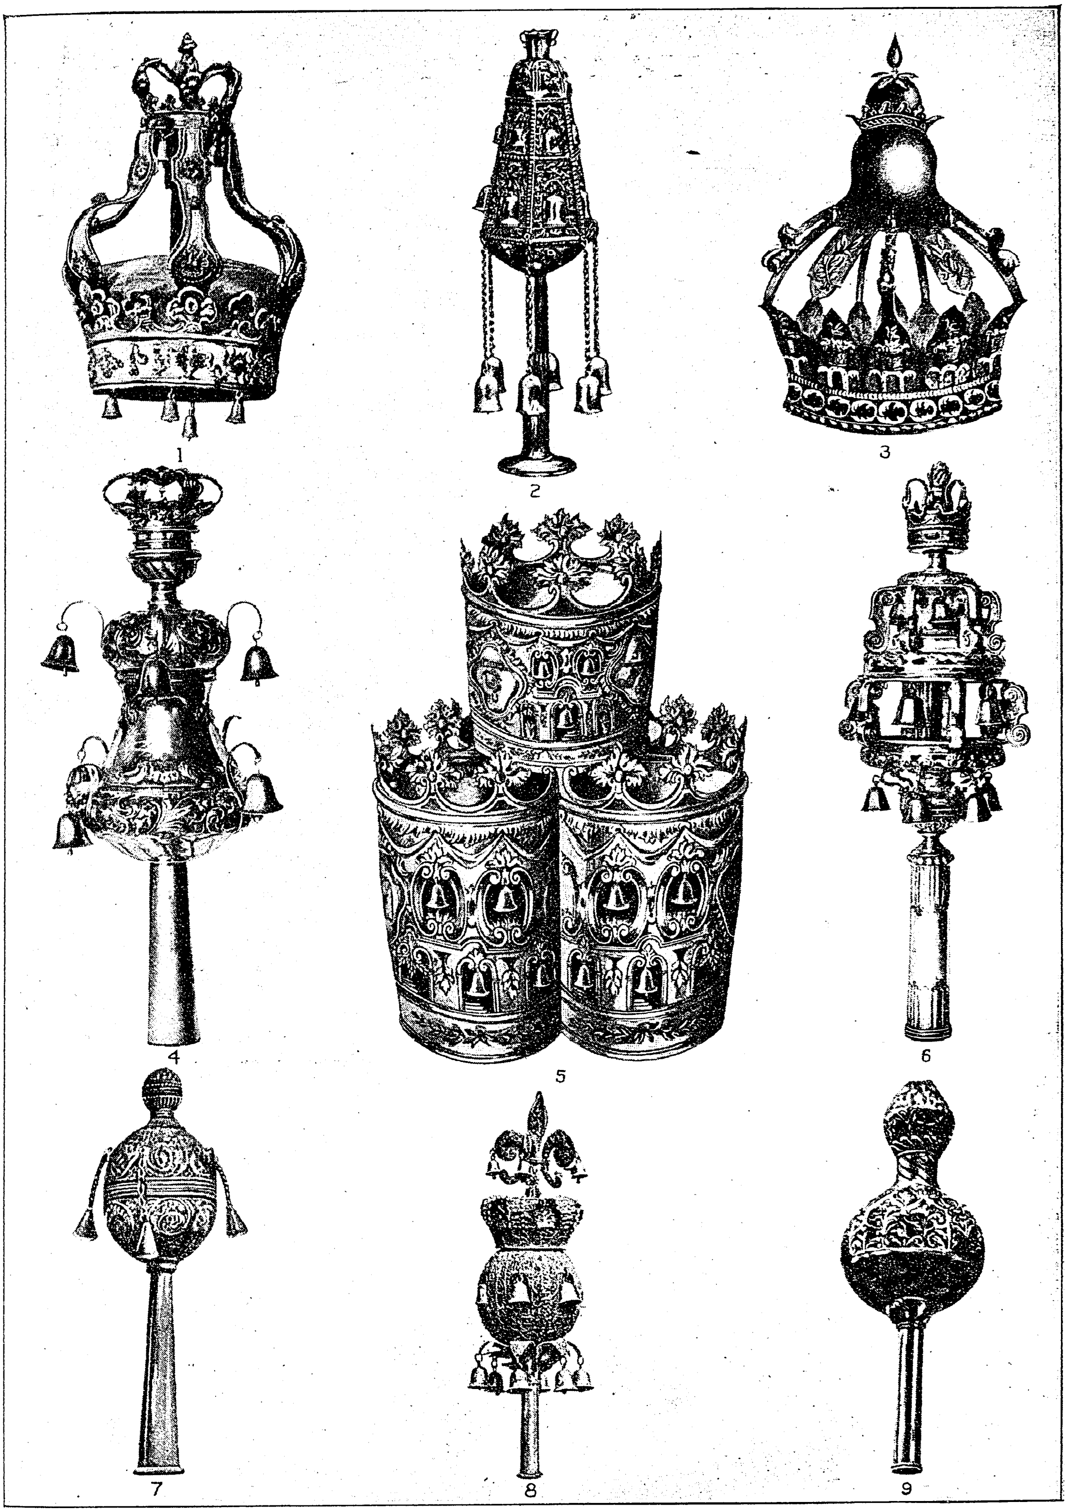
K.

In the Talmudic Hebrew, עטרה is used (compare the English "crown") for the Biblical זר in the sense of "border" or "rim" (Kelim v. 3; Oh. xiv. 1). In the Targumim זר is usually rendered by the identical זיר or דיר, or sometimes by כליל, which in sense is equivalent to "crown" or "wreath." For the insignia of royalty the late Biblical "keter" is used, together with "kisse" (throne) and "sharbit" (scepter). While the Biblical נזר drops out of use in the Talmudical Hebrew, which restricts the root to its original meaning, "cut off" (hence "devoted," a "nazir"), a new word is introduced, "taga" (תגא), of non-Hebrew stock, in the sense of royal crown and thence of ornament.

The "Three Crowns."

"Keter," as well as "'aṭeret" and its derivatives, has also the applied meaning of ornament, dignity, and distinction. The righteous will wear crowns in the hereafter (Ber. 17a; compare Meg. 15b, where God is the crown on the head of the pious; Lev. R. xxx.). So also prayer is woven into a crown for the head of God (Ex. R. xxi.). "Three crowns there are: the crown of the Torah, the crown of the priesthood, the crown of royalty; but the crown of a good name is higher than these altogether" (Abot iv. 13). In explanation of this enumeration of the three degrees of distinction Ex. R. xxxiv. and Num. R. iv. must be kept in mind. The crown of the learned man (Pharisee), that of the priest (Sadducee), that of royal blood, men of good repute not only attain but even surpass; that is, learning, birth, and station are worthless, while character is all. R. Simeon ben Joḥai enumerates these crowns in this order: the crown of royalty, that is, the "table of the showbreads," which had a golden border; the crown of the priesthood, that is, the altar; the crown of the Torah, that is, the Ark of the Covenant. Playing upon the vocalization of זר (zar and zer), he adds: "If one acquires the Torah, it is for him a zer, a crown; if he does not, it is for him something foreign" (compare Yoma 72b). God is represented in the Talmud as ornamenting the letters שעטנ״ז. as well as the letters ג״ץ (on ק see Shab. 104a), with "crowns," and refrains from multiplying them in view of R. Akiba's disposition to read into these "crowns" halakic decisions (Men. 29b; Shab. 89b). "Crown" is also used for "kingdom"; for instance, in the parable about the moon's jealousy of the sun, she asks: "Is it possible for two kings to have one 'crown'?" and God, acting upon the suggestion, reduces her to the second rank (Ḥul. 60b). Again,



Crowns of the Law.

1. In Hambro' Synagogue, London. 2. In a private collection, New York. 3. In the Synagogue at Pogrebishche, Russia. 4 and 6. In Temple Shearith Israel, New York. 5. In the Synagogue at Casale Monferrato, Italy. 7. Oriental; in the United States National Museum, Washington. 8. In the Victoria and Albert Museum, London. 9. Samaritan; in the possession of the Palestine Exploration Fund.

it is used figuratively for a deed entitling one to recognition, as in Yer. Dem. ii. 22c, bottom. Hezekiah was privileged by God to "acquire the crown" of the removal of the brazen serpent (Ḥul. 6b, 7b). In the same sense the caution occurs against making the Torah and learning a crown of self-glorification (Abot iv. 5).

The most distinguished men are called the crown of their fellows (for instance, in Tosef., Soṭah, xv.). With the death of R. Eleazar ben Azariah passed away the crown of the wise, for the wealth of the wise consists in the crown of learning (compare Soṭah 49b). So also the distinctions conferred on the first day are designated as its ten crowns (Sifra, Shemini Shab. 87b).

Bridal Crowns.

The bride wore a crown—wreath or chaplet—at the marriage feast, and so did the bridegroom, who, indeed, was regarded as a king during the nuptial ceremonies (Nowack, "Lehrbuch des Hebräischen Archäologie," i. 164). This custom was suspended for a time in consequence of the Roman wars (Soṭah ix. 14). These bridal wreaths could not be woven of myrtle or roses, but were made of reeds. The reason for this restriction is found in the idolatrous uses of wreaths of the kind prohibited (Yer. 'Ab. Zarah iv. 43d: "Not only wreaths made of wheat-stalks, but also of roses"; compare also Yer. Bik. i., toward end 64b, top; Soṭah 49a). In Yer. Soṭah ix. 24b, bottom, R. Jeremiah is reported as wearing a crown of olive-branches in order to amuse the bridal party, from which act he came to be known as the rabbi with the (myrtle bridal) crown (compare Gen. R. lxx.; Lam. R. 94b; the verse "the crown is fallen from our head" [Lam. v. 16] was interpreted to refer to him; Lam. R. to the verse, 69d). Mention is also made of ornaments in the shape of wreaths, which were much affected by women (Shab. v. 1 [57a]; Soṭah 49b). Some of these are even said to have shown in engraving the picture of Jerusalem. By later rabbis the custom of placing a wreath or crown on the head of the bridegroom was regarded as a token of mourning for Jerusalem, "the olive-branches being bitter" ("'Aṭeret Zeḳenim" to "Or ha-Ḥayyim," 560; Ṭur Eben ha-'Ezer, 65; Tos. Pes. 36a). See Crown of the Law.

E. C. E. G. H.

CROWN OF THE LAW: A coronet, usually made of gilded silver, with bells, bearing the Hebrew inscription כתר תורה. It is placed upon the upper ends of the handles of the scroll of the Law. Sometimes the crown is a double one. A similar emblem, often borne between two lions as symbols of strength, decorates the mantle of the scroll and the curtain of the Ark. The device signifies the majestic sovereignty of the Law. It is difficult to say when it was first adopted. In geonic times he who read the last chapter of the Pentateuch on Simḥat Torah had a crown of silver or gold or a garland of myrtle placed upon his head, similar to the one placed upon the head of a bridegroom; whence, probably, the name Bridegroom of the Law. From this arose the custom of having a crown placed permanently upon the scroll of the Law, the making of crowns or garlands on festival days being a transgression of the Law (see Abraham ben Nathan ha-Yarḥi in "Ha-Manhig," Suk. § 59; and R. Nissim to Alfasi, Meg. iii.; Shulḥan 'Aruk, Oraḥ Ḥayyim, 154, 10).

The masters of the school, called "kings" (Giṭ. 62a), were probably the persons originally decorated with the crown of the Law. This seems to be confirmed by the saying of Hillel: "He who makes use of the crown [תגא] perishes" (Ab. i. 13). [This "crown" was afterward understood to mean the "crown of God" (כתר = the Ineffable Name, which was probably engraved upon the crown; see Pirḳe R. El. xlvii.; Targ. Yer. to Ex. xxxiii. 4-6, 25.)] Compare Ab. iv. 5: "Make not the Torah a crown to glory in it." The saying of R. Simon b. Yoḥai concerning the three crowns—the crown of the Law, the crown of the priesthood, and the crown of royalty (see Crown in Post-Biblical Times)—appears also to indicate that the crown of the Law, like the two others, was a material crown, and not a figurative expression like "the crown of a good name." The crown of the Law is probably indicated by the following Haggadah: "When the Israelites before receiving the Law on Mount Sinai proclaimed 'We shall do and hearken!' [Ex. xxiv. 17], there came sixty myriads of angels with two crowns for each —one for each of the two promises; and when they sinned before the Golden Calf there came twice as many demons to take their ornaments away" (Ex. xxxiii. 6; Shab. 88a; compare Pesiḳ. 21 [ed. Friedmann, 102b]; Pesiḳ. de R. K. xiv. 124b; Tan., Teẓawweh, ed. Buber, 50a).

Regarding the question whether the Keter Torah in use may be sold for the purpose of settling a dowry for a daughter, see Isaac Lampronti, "Paḥad Yiẓḥaḳ," letter מ, 170b.

K. J. D. E.

CROWNS OF THE RIGHTEOUS: The future bliss of the righteous is described by Rab in Ber. 17b: "There is neither eating and drinking nor marrying nor bargaining nor envy nor hatred nor quarrel in the world to come; but the righteous sit with crowns upon their heads, and feed upon the splendor of the Shekinah, as it is said of the nobles of the children of Israel: 'He laid not his hand upon them, but they saw God, and this was their eating and their drinking'" (Ex. xxiv. 11, Targ.). In Sanh. 111b, Meg. 15b, R. Ḥaninah says: "God himself will be a crown of glory upon the head of each righteous one, as it is written: 'In that day shall the Lord of hosts be for a crown of glory, and for a diadem of beauty, unto the residue of his people'" (Isa. xxviii. 5). Accordingly the Zohar (Wayeḥi; ed. Cracow, p. 296) speaks of seats surrounded with crowns prepared for the righteous in paradise thirty days before their death, when their forthcoming arrival there is announced. So sings the poet of the "Aḳdamut":

> "Under a canopy of crystal clouds,
> Wearing a beauteous crown,
> Each in accordance with his deeds,
> On a throne with seven steps of fine gold."

CRUCEANU, STEFAN: Rumanian author; born at Jassy April 25, 1868. On receiving his bachelor's degree in 1889 he entered the University of Jassy as a student of philosophy, but at the end of a year he went to Paris to study medicine. In April, 1885, he published his first work, a socialistic story, in the "Drepturile Omului" (Rights of Man). He became a frequent contributor to different political papers, including the "Natiunea," "Drapelul," "Perdaful," "Fulgerul," "Tunul," and "Propashirea." In 1891 he published his first poem, "Bataile din Urma" (The Last Heart-Beat), in the "Revista Noua" of Bucharest. He is a contributor to the most prominent journals of Rumania, such as the "Convorbiri Literare," "Radicalul," "Evenimentul," "Noutatea," "Adeverul," "Literatura et Arta Romana," and the "Noua Revista Romana." In 1898 he published most of his poems in one volume under the title "Lacrime."

s. E. Sd.

CRUCIFIXION: The act of putting to death by nailing or binding to a cross. Among the modes of Capital Punishment known to the Jewish penal law, crucifixion is not found; the "hanging" of criminals "on a tree," mentioned in Deut. xxi. 22, was resorted to in New Testament times only after lapidation (Sanh. vi. 4; Sifre, ii. 221, ed. Friedmann, Vienna, 1864). A Jewish court could not have passed a sentence of death by crucifixion without violating the Jewish law. The Roman penal code recognized this cruel penalty from remote times (Aurelius Victor Cæsar, 41). It may have developed out of the primitive custom of "hanging" ("arbori suspendere") on the "arbor infelix," which was dedicated to the gods of the nether world. Seneca ("Epistola," 101) still calls the cross "infelix lignum." Trees were often used for crucifying convicts (Tertullian, "Apologia," viii. 16). Originally only slaves were crucified; hence "death on the cross" and "supplicium servile" were used indiscriminately (Tacitus, "Historia," iv. 3, 11). Later, provincial freedmen of obscure station ("humiles") were added to the class liable to this sentence. Roman citizens were exempt under all circumstances (Cicero, "Verr." i. 7; iii. 2, 24, 26; iv. 10 *et seq.*). The following crimes entailed this penalty: piracy, highway robbery, assassination, forgery, false testimony, mutiny, high treason, rebellion (see Pauly-Wissowa, "Real-Encyc." *s.v.* "Crux"; Josephus, "B. J." v. 11, § 1). Soldiers that deserted to the enemy and slaves who denounced their masters ("delatio domini") were also punished by death on the cross.

The crosses used were of different shapes. Some were in the form of a **T**, others in that of a St. Andrew's cross, **X**, while others again were in four parts, ✝. The more common kind consisted of a stake ("palus") firmly embedded in the ground ("crucem figere") before the condemned arrived at the place of execution (Cicero, "Verr." v. 12; Josephus, "B. J." vii. 6, § 4) and a cross-beam ("patibulum"), bearing the "titulus"—the inscription naming the crime (Matt. xxvii. 37; Luke xxiii. 38; Suetonius, "Cal." 38). It was this cross-beam, not the heavy stake, which the condemned was compelled to carry to the scene of execution (Plutarch, "De Sera Num. Vind." 9; Matt. *ib.*; John xix. 17; see Cross). The cross was not very high, and the sentenced man could without difficulty be drawn up with ropes ("in crucem tollere, agere, dare, ferre"). His hands and feet were fastened with nails to the cross-beam and stake (Tertullian, "Adv. Judæos," 10; Seneca, "Vita Beata," 19); though it has been held that, as in Egypt, the hands and feet were merely bound with ropes (see Winer, "B. R." i. 678). The execution was always preceded by flagellation (Livy, xxxiv. 26; Josephus, "B. J." ii. 14, § 9; v. 11, § 1); and on his way to his doom, led through the most populous streets, the delinquent was exposed to insult and injury. Upon arrival at the stake, his clothes were removed, and the execution took place. Death was probably caused by starvation or exhaustion, the cramped position of the body causing fearful tortures, and ultimately gradual paralysis. Whether a foot-rest was provided is open to doubt; but usually the body was placed astride a board ("sedile"). The agony lasted at least twelve hours, in some cases as long as three days. To hasten death the legs were broken, and this was considered an act of clemency (Cicero, "Phil." xiii. 27). The body remained on the cross, food for birds of prey until it rotted, or was cast before wild beasts. Special permission to remove the body was occasionally granted. Officers (carnifex and triumviri) and soldiers were in charge.

Mode of Execution.

This cruel way of carrying into effect the sentence of death was introduced into Palestine by the Romans. Josephus brands the first crucifixion as an act of unusual cruelty ("Ant." xiii. 14, § 2), and as illegal. But many Jews underwent this extreme penalty (*ib.* xx. 6, § 2; "Vita," § 75; "B. J." ii. 12, § 6; 14, § 9; v. 11, § 1; Philo, ii. 529).

During the times of unrest which preceded the rise in open rebellion against Rome (about 30–66 B.C.), "rebels" met with short shrift at the hands of the oppressor. They were crucified as traitors. The sons of Judas the Galilean were among those who suffered this fate.

The details given in the New Testament accounts (Matt. xxvii. and parallels) of the crucifixion of Jesus agree on the whole with the procedure in vogue under Roman law. Two modifications are worthy of note: (1) In order to make him insensible to pain, a drink (ὄξος, Matt. xxvii. 34, 48; John xix. 29) was given him. This was in accordance with the humane Jewish provision (see Maimonides, "Yad," Sanh. xiii. 2; Sanh. 43a). The beverage was a mixture of myrrh (קורט של לבונה) and wine, given "so that the delinquent might lose clear consciousness through the ensuing intoxication." (2) Jesus' legs were broken to shorten his agony, and his body was removed and buried, the latter act in keeping with Jewish law and custom. These exceptions, however, exhaust the incidents in the crucifixion of Jesus that might point to a participation therein, and a regulation thereof, by Jews or Jewish law. The mode and manner of Jesus' death undoubtedly point to Roman customs and laws as the directive power.

From the Jewish point of view, the crime of which Jesus was convicted by the Jewish priests is greatly in doubt (see Jesus). If it was blasphemy, lapidation should, according to Jewish law, have been the penalty, with suspension from the gallows after death (Mishnah Sanh. iii. 4; Sifre, iii. 221). Nor were any of the well-known measures taken (Sanh. vi.)

which provide before execution for the contingency of a reversal of the sentence. Neither was the "cross"—*i.e.*, the gallows for hanging—constructed as usual after lapidation, and as ordained in Sanhedrin vi. 4. His hands were not bound as prescribed; the "cross" was not buried with his body (Maimonides, "Yad," Sanh. xv. 9). Whether the Jewish law would have tolerated a threefold execution at one and the same time is more than uncertain (Sanh. vi. 4; Sifre, ii. 221).

Date of Jesus' Crucifixion.

The greatest difficulty from the point of view of the Jewish penal procedure is presented by the day and time of the execution. According to the Gospels, Jesus died on Friday, the eve of Sabbath. Yet on that day, in view of the approach of the Sabbath (or holiday), executions lasting until late in the afternoon were almost impossible (Sifre, ii. 221; Sanh. 35b; Mekilta to Wayaḳhel). The Synoptics do not agree with John on the date of the month. According to the latter he died on the 14th of Nisan, as though he were the paschal lamb; but executions were certainly not regular on the eve of a Jewish holiday. According to the Synoptics, the date of his death was the 15th of Nisan (first day of Passover), when again no execution could be held (Mishnah Sanh. iv. 1; and the commentaries; Yer. Sanh. ii. 3; Yer. Beẓ. v. 2; Ket. i. 1). This discrepancy has given rise to various attempts at rectification. That by Chwolson is the most ingenious, assuming that Jesus died on the 14th, and accounting for the error in Matthew by a mistranslation from the original Hebrew in Matt. xxvi. 17 (קרב וקרבו, due to the omission of the first קרב; see his "Das Letzte Passamahl Christi," p. 13). But even so, the whole artificial construction of the law regarding Passover when the 15th of Nisan was on Saturday, attempted by Chwolson, would not remove the difficulty of an execution occurring on Friday = eve of Sabbath and eve of holiday; and the body could not have been removed as late as the ninth hour (3 P.M.). Bodies of delinquents were not buried in private graves (Sanh. vi. 5), while that of Jesus was buried in a sepulcher belonging to Joseph of Arimathea. Besides this, penal jurisdiction had been taken from the Sanhedrin in capital cases "forty years before the fall of the Temple."

These facts show that the crucifixion of Jesus was an act of the Roman government. That it was customary to liberate one sentenced to death on account of the holiday season is not corroborated by Jewish sources. But many of the Jews suspected of Messianic ambitions had been nailed to the cross by Rome. The Messiah, "king of the Jews," was a rebel in the estimation of Rome, and rebels were crucified (Suetonius, "Vespas." 4; "Claudius," xxv.; Josephus, "Ant." xx. 5, § 1; 8, § 6; Acts v. 36, 37). The inscription on the cross of Jesus reveals the crime for which, according to Roman law, Jesus expired. He was a rebel. Tacitus ("Annales," 54, 59) reports therefore without comment the fact that Jesus was crucified. For Romans no amplification was necessary. Pontius Pilate's part in the tragedy as told in the Gospels is that of a wretched coward; but this does not agree with his character as recorded elsewhere (see Schürer, "Gesch." Index, *s.v.*). The other incidents in the New Testament report—the rending of the curtain, darkness (eclipse of the sun), the rising of the dead from their graves—are apocalyptic embellishments derived from Jewish Messianic eschatology. The so-called writs for the execution (see Mayer, "Die Rechte der Israeliten, Athener, und Römer," iii. 428, note 27) are spurious.

K. E. G. H.

CRUELTY: The disposition to inflict pain and to gloat over suffering. Widely prevalent among, if not characteristic of, savages and barbarians, it has influenced their treatment of strangers, enemies, and evildoers. Primitive races, however, are strongly inured to pain, being early in life trained to endure it unflinchingly, as the various initiatory rites at puberty in universal vogue among them show (see Heinrich Schurtz, "Altersklassen und Männerbunde," pp. 92 *et seq.*, Berlin, 1902). Moreover, lack of imagination incapacitates them for measuring the suffering entailed on others (Tylor, "Anthropology," p. 408, New York, 1897). Again, among them, as also among civilized nations of antiquity, religious notions sanctify the passion for revenge, nearly always an element of cruelty. Abel's "blood cries to heaven" (Gen. iv. 10, Hebr.). The deity itself is injured and offended, and the land is defiled by bloodshed (see Schneider, "Die Naturvölker," 1886, i. 86; Leopold Schmidt, "Die Ethik der Alten Griechen," ii. 309 *et seq.*, Berlin, 1882; Tiele, "Verglijkende Geschiedenis von de Egypt. en Mesopotam. Godsdienster," p. 160; "Tr. Soc. Bibl. Arch." viii. 12 *et seq.*).

"Lex Talionis."

The "lex talionis," universally observed by savage and semi-civilized peoples, illustrates this principle. Injury had to be requited by corresponding injury. "Eye for eye, tooth for tooth, hand for hand" (Ex. xxi. 24). Literally construed at first, the provisions of this law in course of time, and with the refinement of feeling accompanying progressing civilization, were translated into pecuniary assessments in compensation of injuries.

Cruel practises connected with the observances of religion, such as mutilations, the cutting of gashes (see Cuttings), the burning of children to propitiate Moloch, and human sacrifice generally, rest originally upon a similar idea.

The ancient Hebrews in their primitive state were in disposition little different from their neighbors and cognates. In the period of "ignorance" the pre-Mohammedan Arabs deemed "revenge to be the twin brother of gratitude," and not to visit an offense upon the offender was considered cowardly and ignoble (see Goldziher, "Muhammedanische Studien," 1889, i. 15 *et seq.*). The books of Judges and Samuel prove that the Israelitish invaders of Canaan displayed in their dealings with their enemies the temper of their day. The bodies of those slain in battle were stripped of everything valuable. Occasionally their heads were cut off as trophies (I Sam. xvii. 51, 54; xxxi. 9; II Sam. xx. 22). Among the Assyrians this was the rule (compare II Kings x. 6 *et seq.*). In later times, however, decent burial was accorded to dead enemies (Ezek. xxxix. 11), or they were cremated (Isa. xxx. 33).

Treatment of Captives.

Captives were shown little leniency. To mark them as conquered, they were subjected to the humiliation of being trodden under foot (Joshua x. 24; compare Ps. cx. 1). This was also the custom among the Assyrians and Egyptians. Still, excessive cruelties are only reported in cases where fury had been aroused by the length of the pursuit (Judges i. 6 *et seq.*). The most atrocious instance of cruelty in requital of previous insult is afforded, if the text is correct, by David's dealing with the Ammonites (see Klostermann's commentary on II Sam. xii. 31). Amaziah is reported to have hurled ten thousand captive Edomites from a rock (II Chron. xxv. 12). As a rule, however, the Hebrews did not go to such extremes, and, compared with the Assyrians, were merciful. The latter impaled their prisoners, or flayed them alive, or tore out their tongues (see, for the case of the Elamite prisoners, Koyundjik Collection, slabs 48–50; Kaulen, "Assyrien und Babylonien," 5th ed., p. 265). The Philistines put out Samson's eyes (Judges xvi. 21). Nahash, the king of the Ammonites, threatened the Jebusites with the blinding of their right eyes (I Sam. xi. 2). King Zedekiah was blinded by the Chaldeans (II Kings xxv. 7). Among the Chaldeans and Persians, and even now in Eastern countries, this procedure is not exceptional. Ezek. xxiii. 25 alludes to the cutting off of the noses and ears of captives. Rings were put through the under lips of captured kings to fasten the chain to (חחים, "S. B. O. T." Ezekiel, p. 133). Atrocious barbarities against women big with child are mentioned as having occurred in the ferocious civil wars of the Northern Kingdom (II Kings xv. 16), but these, as well as the dashing to pieces of children, seem to have been common among Syrians, Ammonites, Assyrians, and Chaldeans (II Kings viii. 12; Amos i. 13; Ps. cxxxvii. 9 *et seq.*). If not killed, the captives were led away "naked" (see Coat) and fettered, to be sold into slavery (Num. xxxi. 26; Deut. xx. 14; Isa. xx. 4).

The country of the enemy was devastated; its trees were cut down, its wells wrecked, its cities and hamlets sacked and razed; tribute was levied and hostages demanded (II Kings iii. 19, 25; xiv. 14).

Stages of Progress.

In the earlier civil code of the Hebrews, the "book of the Covenant" (Ex. xxi.-xxiv.), the law of retaliation is still fundamental. Mutilations were thus legalized. The Deuteronomic legislation applies this principle in the case of false witnesses (Deut. xix. 16 *et seq.*). A woman guilty of a certain indecent act lost her hand (Deut. xxv. 11 *et seq.*). Similar and severer provisions are also found in the recently discovered code of Hammurabi (see Winckler, "Die Gesetze Hammurabi," Leipsic, 1902); and the punishments provided by the laws of other ancient and modern Oriental nations show still greater cruelty. Adulterous women had their noses cut off, while the co-respondent was condemned to a thousand stripes (Diodorus Siculus, i. 78). The statement of Josephus ("Vita," §§ 33, 34) that rebels and traitors suffered the loss of one or both hands reflects the ferocity of the civil war.

The primitive severity of the earlier practise, however, was tempered by clemency. This appears clearly in the provisions for carrying out the punishment of stripes. The number of stripes must not exceed forty (Deut. xxv. 1-4; in Hammurabi's code the maximum is fixed at fifty), and they must be administered before a proper court officer. As also among the Egyptians (see Wilkinson, "Ancient Egypt," ii. 41 *et seq.*), the stripes were applied to the back of the delinquent, not, as is the cruel Eastern practise, to the soles of the feet. The instrument employed was in early times a rod or switch (Prov. x. 13). The later rabbinical authorities prescribe the use of a plaited leather strap, construing "biḳoret," in Lev. xix. 20, to indicate this (see Gesenius, "Th." i. 234), and limit the number of stripes to thirty-nine (Mak. iii. 10; Josephus, "Ant." iv. 8, § 21). The use of "scorpions" ("'aḳrabim"), mentioned in I Kings xii. 11, 14; II Chron. x. 11, 14, was, as the context shows, regarded as excessively cruel, and must have been rare. They were pointed and knotty rods, or whips with sharp iron points (Gesenius, *l.c.* ii. 1062). Beating with bags filled with sand and pointed pieces of iron was another method of punishment (Ephraem Syrus). The Syrians seem to have had recourse to similar instruments of torture (II Macc. vii. 1). Later, the Romans adopted the use of whips weighted with rough, heavy stones, or lead balls (Cicero, "Cluent." 63). Thorny rods or switches were also occasionally used (Judges viii. 7, 16; compare Prov. xxvi. 3).

Treatment of Slaves.

Other indications of the gradual refinement of feeling are revealed in the fact that the slave ultimately acquired a right to protection against bodily injury, and that the master who caused his death by cruel beating was punished (Ex. xxi. 21, 26–27). If, however, death was not immediate, the owner was considered to have injured his own property. Philo regards the provision which grants freedom to the maimed slave as based less upon the principle of compensation than upon the desire to protect the slave against further insult, the master naturally finding a constant cause of irritation in the slave incapacitated for full work in consequence of his rash or cruel treatment The law also modified to a considerable extent the rights of vengeance and Asylum (Ex. xxi. 13, 14), and provided for the protection of those guilty of manslaughter.

With what abhorrence the Prophets viewed the atrocities committed in the spirit of the savage in earlier times is clear from the opening chapters of Amos. They denounced the cruel rites—mutilations, human sacrifices—sanctioned by the religion of Canaan, and modified barbarity through the potent leaven of mercy and humanity. As a punishment the invasion of a "cruel" people is announced, and the detailed description shows that the Jewish people had outgrown the temper which regarded such atrocities as natural (Jer. vi. 23, 24; Deut. xxxii. 32, 33).

In the later books cruelty is expanded to include unfriendly and unnatural conduct (Prov. xi. 17) on the part of one from whom, by reason of friendship or consanguinity, consideration is to be expected (Job xxx. 21). As symptoms of cruelty, anger and jealousy are enumerated (Prov. xxvii. 4).

Attitude of Later Judaism.

Later Judaism, in interpreting the Mosaic legislation, proceeded upon the theory that any unnatural act was cruel. The seething of the kid in the milk of its mother, the wearing of wool and linen together, the yoking of ox and ass together, the sowing of different seeds in one field, were so regarded (Philo, "De Specialibus Legibus"). Humanity, therefore, was declared to be the sister of piety, and was inculcated in many injunctions of the Mosaic code; it is befitting the king (*idem*, "De Vita Moysis," ii. 1, 2); it is to be shown to strangers as readily and fully as to fellow countrymen; it is due to the demented and to dumb creatures (*idem*, "De Caritate"). The "lex talionis" was modified (Mek., Mishpaṭim, 8). Capital punishment was virtually abolished in all cases where malice prepense was not established beyond all doubt.

Judges who pronounced the death sentence too frequently were stigmatized as shedders of blood (Mak. 7a), and this in spite of the conviction that "misapplied clemency leads to unjustifiable cruelty" (Lam. R. vii. 16). And when the sentence of death was carried into effect tender regard was extended to the body of the executed (Sanh. v. 3; Babli 55b). Decapitation by the sword was for this reason declared to be an indignity (ניוול, B. B. 8b). Needless exposure of the body was looked upon with the same disfavor; a woman undergoing lapidation was not uncovered (Yer. Soṭah iii. 19b, end). This consideration was shown the dead in all cases, the view prevailing that until the body is inhumed, or, according to others, until decomposition sets in, the soul hovering over the abandoned frame feels whatever insult or injury is offered (see BODY IN JEWISH THEOLOGY). R. Akiba inhibited exhumation as an act of cruelty (B. B. 154a).

Philo ("In Flaccum") gives a vivid account of the outrages perpetrated by the Romans upon the living as well as upon the dead. Some cruelties commonly practised by the Romans seem never to have been known to the Hebrews. The exposure of children, and the burying alive of undesired daughters, common among pre-Mohammedan Arabs, were quite unknown to the Hebrews.

In rabbinical Judaism the idea of "cruelty" includes also an unforgiving temper. It thus came to signify what has been termed "the cruelty of civilized men" (Lazarus, "Ethik des Judentums," i. 308), such as calumny, slander, putting to shame, calling men by nicknames, slighting their honor. Characteristic of the one not cruel was the readiness to "forego one's due" (מעביר על מדותיו), and this disposition is deemed essential to the attainment of forgiveness of one's own sins (Yoma 23a). One that in public puts a man to shame is likened to the murderer (B. M. 58b, 59a). One that will not forgive his fellow is cruel: מנין שאם לא מחל שהוא אכזרי (B. Ḳ. 92a; see also Maimonides, "Yad," De'ot, vi. 6; Teshubah, ii. 10). Nimrod, Goliath, Haman, Cain, and others are remembered as examples of cruelty (Pesiḳ. ix. 78b). Tax-gatherers are typically cruel, as also among the Mohammedans (B. Ḳ. x. 1-2; Goldziher, *ib.* i. 19, note; Philo, "De Specialibus Legibus"; see PUBLICANS). Prophetic and rabbinical Judaism, in thus enlarging the scope of "cruelty" to embrace not merely the infliction of physical, but also of mental and moral suffering, and in denouncing a haughty, heartless, unforgiving, grasping disposition as "cruel," has discarded utterly the principle of retaliation. The Deuteronomic laws (Deut. xx. 7; Josh. vi. 21) concerning the annihilation of the seven aboriginal nations of the land, if they were ever carried out to the letter, were written in the spirit of holy warfare against idolatry (see BAN) at a time when cruel temper was universally prevalent. Later Judaism condemns cruelty in whatever form. Its abhorrence of barbarity is illustrated also by the prohibition against cutting out a piece of flesh from a living animal (אבר מן החי), which mutilation was a well-established practise among the Romans and many other ancient peoples (Ḥul. 101b *et seq.*). This prohibition does not rest upon ritual grounds, but is based on moral repugnance; the Noachides are also under this prohibition. The "pound of flesh" in Shakespeare's "Merchant of Venice" is an impossibility according to Jewish law, though the Roman Law of the Twelve Tables legalizes such security. The whole "Shylock" story originated in old Aryan mythology.

That evil-doers were not treated without cruelty is apparent from the frequent allusions in the Biblical books to the terrors and sufferings incidental to imprisonment (II Sam. iii. 34; Job. xiii. 27; Ps. lxxxviii. 7, cv. 18, cvii. 10; Isa. xxiv. 22; Zech. ix. 11). Though prisons existed (Jer. xxxvii. 15, 20), abandoned cisterns filled with mire were used for the detention of men that had incurred the displeasure of the mighty (Jer. xxxviii. 6). Ill fed (I Kings xx. 27), the prisoners were often bound with chains and ropes (Job xxxvi. 8; Ps. cxlix. 8); the feet especially were fastened together with brass (Judges xvi. 21; II Sam. iii. 34; Jer. lii. 11) or iron links (Ps. cv. 18; Prov. vii. 22). Often the feet were put into the stocks or blocks ("sad," Job xiii. 27, xxxiii. 11), while in other cases a veritable instrument of torture was used, the "mahpeket," a wooden contrivance so arranged as to force the body into unnatural contortions. The neck, too, was constrained by a ring ("ẓinoḳ") or iron collar (Jer. xx. 2; Sirach vi. 30).

The Romans, however, were past-masters in the art of applying these various expedients. Under the non-Hebrew designation קולר, the Latin "collare," the rabbinical books recall a neck-ring largely in use to render prisoners helpless (Eḥa Rabb. Proem. xxxiv.). Characteristic in this connection as showing the dread of the inhumanities of non-Jewish tormentors is the prohibition (Tosef., 'Ab. Zarah, ii. 4) "not to sell them either weapons or these devices for restraining prisoners"; *i.e.*, קולרין (ed. Zuckermann wrongly, קוללין) כבלין; סדין and שלשלאות של ברזל (iron chains).

K. E. G. H.

CRUELTY TO ANIMALS: The Bible contains no comprehensive principle regarding the rights of animals. In the Biblical account of creation man is made sole ruler over the lower creatures, with the right to use them for whatever purpose he desires (Gen. i. 28; Ps. viii. 6-8). Still, in the legislative portions of the Bible there are many laws concerning the rights of dumb creatures; so many, in fact, as to justify the assumption of the Rabbis that kindness to animals is a Biblical injunction (צער בעלי חיים דאורייתא; B. M. 32b). The prohibition against eating a limb or flesh cut from a living animal was included by the Rabbis in the seven Noachian Laws, and the act was thus forbidden not only to Israelites, but also to other nations.

Precepts of Consideration.

Animals must not be tortured unnecessarily. The ox must not be muzzled while threshing (Deut. xxv. 4), but must be free to eat of the corn while working, as the human laborer is permitted to do (Deut. xxiii. 25, 26; B. M. 87b). The Rabbis considered the term "ox" to be a generic term including all animals. Nor does it matter whether the animal belongs to a Jew or not; the Jew who employs it in threshing must not muzzle it (B. M. 90a; Maimonides, "Yad," Sekirut, xiii. 3; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 338; compare I Cor. ix. 9).

It is forbidden to emasculate an animal, whether clean or unclean, although when emasculated it may, if clean, be used for food (Lev. xxii. 24; Shab. 111a; Shulḥan 'Aruk, Eben ha-'Ezer, 5, 11). It is forbidden to pair, or couple in doing any kind of work, animals of different species, especially to pair a wild with a tame animal (Lev. xix. 19; Deut. xxii. 10, and Sifre *ad loc.*; B. Ḳ. 54b; Kil. viii. 1, 2).

Mother and young must not be slaughtered on the same day (Lev. xxii. 28). When the paternity of an animal is known, or can be ascertained, it is also forbidden to kill father and young on the same day. Although the transgressor of this commandment is liable to the punishment of flagellation, the animals may be used for food. The seller, if he knows that they are bought to be slaughtered on the same day, must notify the buyer of the relationship of the animals when he sells a mother with its young—for instance, if sold directly before the holidays, when any one buying cattle is presumed to intend to slaughter them immediately (Ḥul. 83a; "Yad," Sheḥiṭah, xiii.; Shulḥan 'Aruk, Yoreh De'ah, 16).

It is forbidden to take both mother and young from a nest. When the mother is liberated the young may be appropriated (Deut. xxii. 6). This law applies only to clean, undomesticated birds, but if one has domesticated geese, pigeons, etc., he need not drive off the mother when he takes the young (Ḥul. 138b *et seq.*; Yoreh De'ah, 292).

Hunting.

Hunting was discouraged by the Rabbis (see Ḥul. 60b), and the later authorities forbid its pursuit entirely if merely for sport (Ezekiel Landau, "Noda' bi-Yehudah," series ii.; Yoreh De'ah, 10).

The various regulations for the lawful killing of animals ("sheḥiṭah") are not only in harmony with the principle of the prevention of cruelty, but seem to have been dictated by it. These laws have no definite Scriptural origin, although the Rabbis take as a basis for them a Biblical expression (Deut. xii. 21). While the Rabbis themselves do not assign the prevention of cruelty to animals as the reason for the regulations (see Maimonides, "Moreh Nebukim," iii. 26, 48), many of their provisions—for instance, that the knife must be sharp, smooth, without any perceptible notch, and must be drawn, not pressed, against the throat of the animal (see Sheḥitah)—were obviously instituted for the purpose of lessening pain. In spite of the attempts made in various European states in the last fifty years to forbid the Jewish mode of sheḥiṭah on the ground of cruelty, this institution of Judaism still stands vindicated as far more humane than any of the modes employed by non-Jews (see Dembo, "Slaughtering of Animals").

The Jewish law not only forbids cruelty, but also enjoins kindness, to animals. "If thou see the ass of him that hateth thee lying under his burden, and thou wouldst forbear to unload him, thou shalt surely help with him" (Ex. xxiii. 5). The expression "of him that hateth thee" is explained by the Rabbis to refer to an irreligious Jew or to a non-Jew (B. M. 32b; "Yad," Roẓeaḥ, xiii.; Ḥoshen Mishpaṭ, 272).

If an animal falls into a pit on the Sabbath, food must be provided for it there for the day, and it must be removed in the evening. Should the animal be in danger of not being able to live through the day, the removal of vessels and tools from one place to another in order to save it is permitted (Shab. 128a; "Yad," Shabbat, xxv. 26; Oraḥ Ḥayyim, 305, 19). It is also permitted to ask a non-Jew to milk one's cow on the Sabbath when she is suffering from an oversupply of milk (Asheri to B. M. ii. 29). It is, moreover, lawful to cut the nails of an animal, or to comb it, or to heal it, on the week-days of the holidays (M. Ḳ. 10a; Rashi *ad loc.*; "Yad," Shebitot Yom-Ṭob, viii. 15; Oraḥ Ḥayyim, 536, 1-3).

Rest on Sabbath for Animals.

Beasts of burden and all domestic animals must rest on the Sabbath day (Ex. xx. 10, xxiii. 12; Deut. v. 14). It is not permitted to ride an animal on the Sabbath day, or to ride in a wagon drawn by animals, even when the driver is a non-Jew (Yer. Beẓah v. 2; Oraḥ Ḥayyim, *l.c.* 18, Isserles' gloss).

The Rabbis enlarged upon the principle of kindness to animals found in these Mosaic injunctions, by instituting laws to regulate man's dealings with the lower creatures. They teach that before an Israelite sits down to his meal his animals must first be provided with food (Ber. 40a; "Yad," 'Abadim, ix. 8). Some of the Rabbis are of the opinion that no one is permitted to buy animals unless he is able to support them (Yer. Ket. iv. 8). The ethical value of this precept is brought out with great emphasis in the haggadic portions of the Talmud. Moses and David were chosen leaders of Israel because as shepherds they had shown themselves kind and sympathetic to the lower animals (Midrash Rabbah Ex. ii. 3). The angel of God took the part of the dumb creature, demanding of Balaam why he smote his ass (Tan. and Yalḳ. to Num. xxii. 32). "A righteous man regardeth the life of his beast, but the tender mercies of the wicked are cruel" (Prov. xii. 10). God, the Righteous, has pity on animals as well as on man, inasmuch as He saved the animals together with Noah from the Flood (Yalḳ. *ad loc.*, and to Noah, 56). Rabbi Judah I was' punished with bodily suffering during many years because, when a young calf that was being led to slaughter hid its face in his skirts, he said, "Go! for this purpose wast thou created!" When, after many years of suffering, he showed mercy to a nest of mice which his maid wished to destroy, he was again restored to health (B. M. 85a). Standing not "in the way of sinners" (Ps. i. 1) is explained as a prohibition against associating with hunters who plague animals by urging dogs against them ('Ab. Zarah 18b; see Rashi). Compare CIRCUS; SHEḤIṬAH.

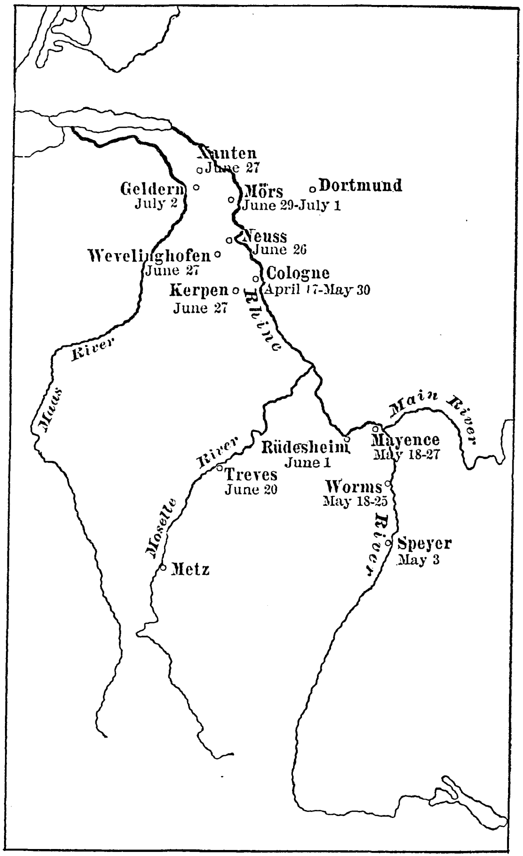
CRUSADES, THE: Expeditions from western Europe to recover Jerusalem and the holy sepulcher from the control of the infidel. The undisciplined mobs accompanying the first three Crusades attacked the Jews in Germany, France, and England, and put many of them to death, leaving behind for centuries strong feelings of ill will on both sides. The social position of the Jews in western Europe was distinctly worsened by the Crusades, and legal restrictions became frequent during and after them. They prepared the way for the anti-Jewish legislation of Innocent III., and formed the turning-point in the medieval history of the Jews. The outbursts did not come unexpectedly. Soon after Peter the Hermit and Urban II. had aroused the enthusiasm of French chivalry at the Council of Clermont in 1094, Godfrey de Bouillon declared that he would avenge the blood of Jesus on that of the Jews, and leave none of them alive, while his companions threatened to exterminate the Jews if they would not become converted.

First Crusade: 1096.

The Judæo-French communities accordingly sent letters to those on the Rhine, who thereupon appointed a fast-day to avert the evil (Jan., 1096); and when Godfrey de Bouillon came to Cologne and Mayence each community made him a present of 500 silver marks to secure his protection. When Peter of Amiens arrived with the crusaders at Treves early in 1096, he did not directly arouse the people against the Jews, but left a general ill will against them throughout Lorraine, especially through the influence of the knight Volkmar, who declared that he would not leave the kingdom until he had slain at least one Jew. In the spring of 1096 twenty-two Jews were slain at Metz, and on May 3 the crusaders and accompanying rabble attacked the Jews of Speyer, slaying eleven of them and only being restrained by the exertions of Bishop John from putting them all to death in the synagogue. On May 18 the Jews of Worms were all slain except a few who were forcibly baptized or who took refuge with the bishop. Their houses were destroyed, and even the corpses denuded. Many slew themselves rather than fall into the hands of the mob. The bishop's palace was stormed a week later, and all those within it were put to death. The number of the slain is said to have amounted to 800, though the extant list of names reaches only 400 (Salfeld, "Martyrologium," p. 107). One of the richest Jewesses, named Minna, when surrounded by the mob and implored by some of her friends among the nobles to accept baptism, resolutely refused and was put to death. Several were drowned, and Mar Shemariah with his whole family was buried alive amid the jeers of the mob, who nevertheless during the entombment offered in vain to grant them safety if they would become converted.



Map of Rhine Region, Showing Sites, with Dates, of Anti-Jewish Outbreaks During the First Crusade, 1096.

On the same day Count Emicho arrived at Mayence with a numerous band of crusaders, but he was not admitted by the archbishop Ruthard, who had promised protection to the Jews. Two days later, however, Emicho forced admission through a side gate, and, notwithstanding the armed defense of the Jews, succeeded in destroying them all except Kalonymus, the president of the congregation, and fifty-three others, who hid themselves in the treasure-house of the cathedral.

Mayence.

A number of Jews who had defended themselves all day in a fortified position found it untenable as night came on, and, rather than fall into the hands of the enemy, killed themselves. The corpses after being stripped were cast into nine graves; they are said to have numbered 1,014. Mar Isaac ben David, after having submitted to baptism, burned down his own house and the synagogue and perished in the flames, because it had been rumored that the Christians intended to turn the synagogue into a church. Kalonymus and his 53 companions were taken by bishop Ruthard in boats to Rüdesheim and kept there for some time; but on June 1 he declared he could not protect them unless they submitted to baptism. They determined to slay themselves rather than do this, and Kalonymus put his own son Joseph to death, and then, wild with grief, attempted to kill the archbishop, but was prevented and killed.

The crusaders again attacked the houses and synagogue of the Jews of Cologne on May 30; but here the citizens protected the Jews in their own houses until Archbishop Hermann, on June 3, sent them for safety to seven neighboring villages, Neuss, Wevelinghofen, Altenahr, Xanten, Geldern, Mörs, and Kerpen. The crusaders followed them to these places, killing 200 in Neuss and Altenahr, in several cases throwing old women and young children into the river (Salfeld, "Martyrologium," p. 133); forcing them to be baptized at Geldern and Kerpen; while in Wevelinghofen, Altenahr, and Xanten the Jews slew themselves rather than change their faith. The 300 Jews of Cologne who found themselves at Altenahr selected five men to slay the rest. In the month of June the crusaders reached Treves, and some of the Jews at once slew themselves, a number of Jewesses throwing themselves into the river. The rest betook themselves to the palace of Archbishop Egbert, who attempted in a sermon to persuade the people to spare the Jews, but was himself maltreated and besieged in his palace for a week, at the end of which he told the Jews there was no hope for their lives but in baptism. When they still remained obdurate some of them were exposed by him to the crusaders, who immediately slew them. The rest thereupon accepted baptism. The same fate befell the Jews of Regensburg, while those of Magdeburg were expelled. The crusaders on their march through Bohemia forced the Jews to become baptized, killing those who refused, notwithstanding the remonstrances of Bishop Cosmas. Next year, however, on the return of Emperor Henry from Italy, he granted them permission to revert to their ancestral faith (Pertz, "Monumenta," ii. 181), notwithstanding the protests of Pope Clement III. (Jaffe, "Regesta," No. 5336). The Jews of the Rhine district were decimated: it has been calculated that about 4,000 were killed or slew themselves. The few survivors of Mayence who had taken refuge at Speyer did not return to their old homes until 1104, when a new synagogue was dedicated (September 22). When the crusaders at last stormed Jerusalem, July 15, 1099, they drove all the Jews into one of the synagogues and there burned them alive.

Second Crusade: 1145-47.

During the preparations for the Second Crusade a narrow-minded monk named Radulph preached the Cross in the Rhine valley, and declared that the Jews should be slain as the enemies of the Christian religion. BERNARD OF CLAIRVAUX protested energetically against the unchristian behavior of Radulph, and only a few isolated cases of outrage occurred. The Jews were expelled from Magdeburg and Halle. Bernard went to Germany to preach the Cross, and met the monk Radulph in open disputation at Mayence in the beginning of November, 1146, but failed to influence the people in favor of the Jews. He accordingly addressed a letter to the peoples of western Christendom, protesting against the persecution of the Jews. Notwithstanding this, when the crusaders came to Würzburg they slew the rabbi, Isaac ben Eliakim, and about twenty-one men, women, and children, whose bodies were buried by the bishop in his garden. This was ultimately purchased by Hezekiah, the brother of the rabbi, as a graveyard for the Jews (see WÜRZBURG).

Third Crusade: 1189-90.

At the coronation on Sept. 3, 1189, of Richard I., before he started for the Third Crusade, a severe riot occurred, and after he had left the country the crusaders who were preparing to follow him attacked, with the aid of the populace, the Jews at Lynn, Stamford (March 7), Bury St. Edmunds (March 18), Colchester, Thetford, and Ospringe. The chief tragedy, however, occurred at YORK on the night of March 16, 1190, when 150 Jews of all ages, headed by Rabbi Yom-Ṭob of Joigny, immolated themselves to escape slaughter or baptism (see YORK).

Results.

Before the Crusades the Jews had practically a monopoly of trade in Eastern products, but the closer connection between Europe and the East brought about by the Crusades raised up a class of merchant traders among the Christians, and from this time onward restrictions on the sale of goods by Jews became frequent (Höniger, in "Zeit. Gesch. Juden Deutsch." i. 94 *et seq.*). The religious zeal fomented by the Crusades burned as fiercely against the Jews as enemies of Christ as against the Moslems. Thus both economically and socially the Crusades were disastrous for European Jews.

CRYPTO-JEWS: Jews professing another religion but practising Jewish rites in secret in their own homes. There was some tendency toward this even in early days, as is shown by the attempts of certain Jews to avoid being taken for such (see Josephus, "Ant." xii. 5, § 1; compare I Macc. i. 15); but the first wide-spread adoption of the practise appears to have been after the Almohade persecutions in Spain in 1146. The father of Maimonides is said to have nominally embraced Islamism at this time, and he was doubtless followed by others. Later, in Spain, after the persecutions of 1391, a whole body of Spanish Jews formally adopted Christianity, but observed Jewish rites in their homes. These were known as MARANOS or, in the

Balearic Islands, Chuetas. Officially they were known as "New Christians," and there was considerable legislation directed against them in both Spain and Portugal and in their colonies, the chief activity of the Inquisition being directed against them. It is stated that Maranos are to be found even at the present day, especially at Covilhão in Portugal.

It also appears that there are, or have been, several classes of Crypto-Jews in Moslem lands; thus the ancestors of the Daggatuns probably kept up their Jewish practises a long time after their nominal adoption of Mohammedanism. This was also done by the Maimins of Salonica (Grätz, in "Monatsschrift," Feb., 1884), and near Khorassan there still remain a number of Jews known as the "Jedid al-Islam," who were converted to Mohammedanism half a century ago ("Il Vessillo Israelitico," April, 1884).

CRYSTAL. See Glass.

CSEMEGI, KARL: President of the Hungarian Supreme Court of Judicature; born in Csongrad May 3, 1826; died March 18, 1899. Csemegi received his early education in the schools of Szegedin and Budapest. By order of Count Elemer Batthyanyi he organized a battalion of infantry in the Hungarian war of independence of 1848, at the head of which he fought throughout the whole war. After the conclusion of the campaign in the Bácska and Banát districts, he laid down his arms at Lugos, and as punishment was placed in an Austrian regiment, but was soon released on account of ill health. During the absolutist era he had a large law-office in Arad, but was compelled by the chicanery of Austrian officials to transfer it to Butyin in Rumania.

After the restoration of the former constitution, the Hungarian minister of justice, Balthasar Horvath, called him into the ministry, where a wide field presented itself for the employment of his ability. From ministerial secretary he became state secretary, in which capacity he proposed and codified chapter iv. of the laws of 1869, on the legal power and authority of judges. The incorporation of the judiciary of Fiume with that of Hungary was also his work. His epoch-making achievement in the judicial administration of Hungary was, however, the codification of the criminal law on a modern basis. Through this work he succeeded in fundamentally improving legal procedure in Hungary. Especially important was the comprehensive statement which he annexed to the code explaining the basic principles that underlie it, which statement contains a mass of legal knowledge still of much value. His influence left a distinct impress on the science of criminology, which developed rapidly after the adoption of his code.

Csemegi became president of the Supreme Court in 1879, and founded the Society of Hungarian Jurists, which to-day has among its members the most eminent jurists of modern Hungary. He was decorated with the Cross of the Order of St. Stephan of Hungary in 1878, and in 1882 became privy councilor. Twelve years later he resigned his position as president of the Supreme Court. He was granted the honorary degree of LL.D. by the juridical faculty of the University of Budapest in 1896.

Csemegi was a convert to Christianity. His literary work includes: "A Jogvesztés Elmélete és az Államjog," Budapest, 1872; "A Magyar Bünvádi Eljárás Szervezetének Indokai," Budapest, 1882; "Magyar Bünvádi Eljárás a Törvényszékek Elött," Budapest, 1883; "Az Egyházi Holtkéz," Budapest, 1897. The French government had the statement of principles which he subjoined to the Hungarian criminal code translated into French under the title "Code Pénal Hongrois des Crimes et des Délits," Paris, 1885.

S. M. W.

CSILLAG, ROSA: Hungarian opera-singer; born about 1840. She attracted much attention in the chorus of the Hungarian National Theater at Budapest. Trained by Professor Proch, she made her first appearance in 1858 as *Fides* in Meyerbeer's "Le Prophète," in the court opera-house of Vienna, where she delighted her audiences with her beautiful mezzo-soprano voice. Until 1873 Csillag belonged to the cast of the Vienna Royal Opera-House, and was a general favorite. On her tours also she met with much success. Her husband was the celebrated prestidigitator Hermann. When her voice began to fail she became singing teacher at the Vienna Conservatoire.

Bibliography: *Pallas Lexikon*, iv.

S. M. W.

CSILLAG, THERESE: Hungarian actress; born at Duna-Adony May 17, 1862. For many years she was a popular comedienne at the National Theater in Budapest. At the age of thirteen she attended the dramatic school in that city. In 1879 she was engaged at the National Theater, where she played in ingénue rôles up to 1898. Nearly all Hungarian playwrights of her day wrote special rôles for her, among them being Gregor Csiky, in whose plays she always excelled. Since 1899 she has been engaged at the Vigszinhaz in Budapest. She has embraced the Christian faith.

CUBA: An island in the Atlantic Ocean, the largest of the West Indian groups. The relations of the Jews with the island of Cuba date from the discovery of the island by Columbus in 1492, several Jews having accompanied him on his first voyage (see America, The Discovery of). On Nov. 2, 1492, Columbus sent Luis de Torres, together with a companion, into the interior to ascertain the character of the island and of its people, and to find its king. Kayserling ("Christopher Columbus," p. 95) asserts that Luis de Torres settled in Cuba and died there.

The records of the Inquisition in America, thus far published only in fragments, are the chief sources of information about Jews in Cuba. Jewish women, forcibly baptized, and sent to the West Indies by the Spanish authorities, seem to have been among the earliest settlers. In 1613 the Inquisition wrung from Francisco Gomez de Leon of Havana the confession that he was a Jew; as a consequence he underwent martyrdom for his faith, and the Inquisition confiscated his fortune, amounting to 149,000

Inquisition in Cuba.

pesos. About 1627 the Inquisition seized Antonio Mendez, Luis Rodrigues, and others on the charge of being Jews. About 1636, 150,000 pesos in gold was extorted from three citizens of Havana on the charge of Judaizing. Their names were Blas de Paz Pinto, Juan Rodrigues Mésa and Francisco Rodriguez de Solis; and they appear to have been among the most opulent men in the West Indies. The trial of Gabriel de Granada, about 1642, evoked a reference to an uncle, Miguel Nuñez de Guerta, alias Huerto, who was supposed to be in Havana at this time, and whose bones in 1649 were used by the Inquisition for his execution in effigy. About the same time Luis Mendez de Chaves, Luis Gomez Barreto, and Manuel Alvarez Prieto, of Havana, were in the clutches of the Inquisition on similar charges.

In the Eighteenth Century.

The Portuguese reconquest of Brazil about this period, which compelled thousands of Jews to leave the country, undoubtedly augmented the Jewish population in Cuba. Accordingly, about this time the number of charges of Judaizing increased, and commercial relations with Jamaica and Curaçao further augmented them. A party of the earliest settlers of New York, who arrived in that city in 1654, are supposed to have touched in the neighborhood of Cape St. Anthony, Cuba, on their way from Brazil. In 1689 Vincente Gomez Coello, a Portuguese, was denounced as a Jew in Cuba. The prosecution of Cubans on the charge of Judaizing continued into the next century. In 1712 Jacob Nuñez Lopez was denounced on this charge. In 1717 was celebrated the auto da fé in which Fray Joseph Diez Pimienta figured, an account of whose career has been published by Richard Gottheil. Pimienta lived for a considerable time in Cuba, and became a convert to Judaism, though he several times thereafter changed his faith. As late as 1783 the Inquisition claimed victims, as witness the fate of Juan Rodriguez Mexia and Antonio Santaella, of Havana. These are but a few of the many names of persons in Cuba who have been charged with Judaizing.

In recounting the history of the Jews in Cuba, it is important not to overlook their friendly commercial relations with the buccaneers, as it was customary to style the assailants of Spain's commercial monopoly in the New World, who waged for decades incessant war against her ports and her vessels; and there is reason to believe that there were some Jews among them. Cuba and Cuban waters were for a long time the principal headquarters of these predecessors of the American pirates, from whom the buccaneers differed, however, in that they waged war against Spain.

A considerable portion of Hamburg's trade with Cuba and other West Indian islands was also at this time in Jewish hands. The Jews' familiarity with Cuba and Cuban affairs, as well as their anti-Spanish sentiments, seems to have been known to the enemies of Spain. Thus, for instance, Admiral Vernon, in his expedition against Cuba in 1741, took with him a Jewish interpreter, whom he sent with messages to the governor at Santiago de Cuba in that year. It is also known that Jacob Franks of New York was a contractor for the British government, supplying the British navy at Jamaica with provisions during the campaign which resulted in the capture, in 1762, of Havana by the British. This capture was extremely important, Havana being regarded as of enormous political and commercial value as the key to America. Cuba's material prosperity is supposed to date from this period, notwithstanding the restoration of Havana to Spain by the treaty of 1763. It is probable that Jewish houses in New York, Newport, Jamaica, Curaçao, London, Amsterdam, and Hamburg were interested in the Cuban trade in tobacco, sugar, and other merchandise, which from this date on became increasingly valuable. Moreover, about this time the population of Cuba was beneficially augmented by the influx of French settlers from Martinique and Guadaloupe, including, apparently, some Jews.

Hernando de Castro, probably a Marano, has been credited with the introduction of the culture of sugar into Cuba. Jews were also engaged in early filibuster expeditions to Cuba; for instance, in 1851.

Until almost the end of the Spanish-American war of 1898, public religious services other than those of the Roman Catholic Church were forbidden; the Inquisition, however, had been abolished in the early years of the century. Since 1881 Jews have been tolerated in Spain and her colonies. The number of Jews in Cuba had increased prior to the war, particularly through Jewish-American interest in the tobacco trade. Richard Davey, in "Cuba: Past and Present," states regarding the conditions preceding the war: "Jews in Cuba barely number 500, and are mostly of Spanish origin, and engaged in trade. A great many Jews fled to the West Indies from Spain in the sixteenth and seventeenth centuries, but few remained in the Spanish possessions. The danger was too great. Five or six of the Cuban Jewish families are reported wealthy, and are much respected, but they keep entirely to themselves." There may, perhaps, be some exaggeration in these statements. A large number of American Jews served in the American army in Cuba during the Spanish-American war, waged for the liberation of Cuba. Since the war the number of American residents has increased, and it is estimated that there are now in Cuba about 1,000 Jewish residents.

CUBIT. See Measures and Weights.

CUCKOO (A. V. **Cuckow**): The A. V. rendering of שחף (shaḥaf) in Lev. xi. 16 and Deut. xiv. 15. In both places it occurs in the list of unclean birds. This identification, however, is only a conjecture, and there is no certain tradition to support it. The Targum transcribes the Hebrew word. The Septuagint gives λάρος ("sea-gull"). The R. V. rendering is "seamew," which is accepted by Gesenius, Bertholet, and Driver in their commentaries, and by Baentsch and Lewyson ("Zoologie des Talmuds," p. 182). The cuckoo, however, is found in Palestine, where it passes the summer. Two varieties are met with—the common and the spotted cuckoo.

E. G. H. G. B. L.

CUCUMBER: The rendering of the Hebrew קשאים (Num. xi. 5). There are at least two kinds of cucumbers in Palestine (Hasselquist, Groser, Post, etc.); viz., *Cucumis sativus* and *C. chate.* The former is the common green cucumber well known in the western world; and the latter is the Egyptian or hairy cucumber, which is said by Hasselquist to be "the queen of cucumbers, refreshing, sweet, solid, and wholesome." Post (Hastings, "Dict. Bible") speaks of it as doubtless one of the good things of Egypt (Num. xi. 5). "It is longer and more slender than the common cucumber, being often more than a foot long, and sometimes less than an inch thick, and pointed at both ends." The so-called "garden of cucumbers" referred to in Isa. i. 8 is the translation of מקשה, meaning "place of cucumbers"; *i.e.*, a place wherein cucumbers were cultivated. The "lodge" mentioned in the same verse is the shelter of the person who kept birds away and guarded the garden from robbers.

E. G. H. I. M. P.

CUENCA (קוינקה): City in New Castile, Spain, which, after its conquest by Alfonso VII.. possessed Jewish inhabitants. In the "fuero," or charter, granted to the city about 1189, the king secured to the Jews full personal protection, together with commercial privileges in every way equal to those of the Christians; and in consequence the Jewish community increased so rapidly both in size and in influence, that it was able in 1290 to pay 70,883 maravedis in taxes. The following circumstance is significant: The Jews of Cuenca refused to lend money or grain, greatly to the detriment of agriculture and industry; in consequence of which an agreement was entered into in 1326 between the city council and the Jewish community, whereby any Jew or Jewess was privileged to charge any Christian of Cuenca or its vicinity, either man or woman, 40 per cent annual interest on money or property. The prosperity and commercial activity of the Jews finally drew upon them the hatred of the populace; and in the "year of terror," 1391, the Jews suffered greatly; even the officials and other men of influence of the town participated in plundering and slaying them; many were murdered, while others either settled elsewhere or became converts to Christianity. The grandparents of the historian Joseph ha-Kohen left Cuenca, and repaired to the fortress of Huete.

G. M. K.

CULI, JACOB: Talmudist and Biblical commentator of the seventeenth and eighteenth centuries; died at Constantinople Aug. 9, 1732. He belonged to an exiled Spanish family, and was the grandson and pupil of Moses ibn Ḥabib. He edited various important works. The first fruit of his literary activity was the publication of his grandfather's writings. To this end he left Safed, where he seemed to have taken up his abode, and removed to Constantinople. As he points out in various passages in his writings, he found in Ḥayyim Alfandari the Younger a warm supporter. While engaged on the works of his grandfather, he entered (1714) into close relations with the chief rabbi of Constantinople, Judah Rosanes, at the time generally regarded the highest authority of the Orient. Rosanes appointed Culi dayyan, which, together with his position as teacher, secured to him a sufficient livelihood. In 1727 Culi published his grandfather's work "Shammot ba-Areẓ" (notes on various portions of the Talmud), with an index.

In this year Rosanes died. He left voluminous literary remains in a very chaotic condition. To introduce order into this chaos it needed a scholar of the first rank. With this task Culi was entrusted. But even for him it meant a labor of several years. First, in 1728, he edited the "Parashat Derakim," a work both haggadic and halakic. Three years later he published the voluminous "Mishneh la-Melek," enriched with numerous important notes. To both these works Culi wrote a preface. In the same year, he edited also his grandfather's "'Ezrat Nashim," in the beginning of which there are two responsa of his own. His most important work is his commentary on the Pentateuch, entitled "Me-'Am Lo'ez." This work, which is held in high regard by the Jews of the East, is a very elaborate encyclopedic commentary in Ladino, dealing with Jewish life in all its relations. Its material was taken from the Talmud, the Midrash, and the principal works of Talmudic and rabbinic literature. Culi carried his commentary on the Pentateuch through Genesis and as far as ch. xxiv of Exodus. After his death the work was continued by Isaac Magreso and Isaac Behor Arguiti. The five parts were published in Constantinople (1733), partly at the expense of Judah Mizraḥi. The first part appeared in a second edition (Salonica, 1798) and a third edition (Smyrna, 1870); and the other parts were republished at Smyrna (1871–73). A portion of the first was issued under the title "'Aḳedat Yiẓḥaḳ" (The Sacrifice of Isaac), Smyrna, 1864.

Culi also wrote a halakic work under the title "Simanim le-Oraita," which, however, remained in manuscript. He seems to have lived for some time in Hebron (compare his responsum No. 2).

CULTURVEREIN DER JUDEN. See Verein für Cultur und Wissenschaft der Juden.

CUMANUS, VENTIDIUS: Roman procurator in Judea (48-52). According to Tacitus ("Annales," xii. 54), he divided the procuratorship with Felix; the latter being at the head of Samaria, the former of Galilee. Such a division is unknown to Josephus, and, though accepted by Mommsen ("Gesch." v. 525), is rightly discarded by Schürer ("Gesch." i. 477). Grätz, who follows the statement of Tacitus, is forced to amend his text; holding that events show that Samaria belonged to Cumanus, and Galilee to Felix ("Monatsschrift," xxvi. 404).

The procuratorship of Cumanus lay in the stormy period preceding the final insurrection in Judea. He himself had to put down three uprisings, the last one causing his own downfall. The first of these happened in the Temple court at the Passover feast, when one of the Roman soldiers—who were always present on such occasions to keep order in the multitude—shocked the Jews by his indecent behavior. The tumult thus occasioned was suppressed by the soldiers, and a large number of those assembled (by Josephus said to have exceeded 3,000) were crushed to death. The second uprising also was brought about by a Roman soldier. Jewish robbers had attacked an imperial officer named Stephanus near Beth-horon ("B. J." ii. 12, § 2). The soldiers sent by Cumanus to restore order plundered the surrounding villages, and one of them tore up a scroll of the Law. At this the Jews became much excited, sent a large deputation to the procurator at Cæsarea, and were appeased only when the soldier was condemned to death.

Jealousy between the Samaritans and the Judeans was the cause of the third trouble. A Galilean, on his way to the Temple at Jerusalem, had been murdered at Gema ("B. J." ii. 12, § 3) or Ginea ("Ant." xx. 6, § 1; compare Boettger, "Top.-Hist. Lexikon zu Josephus," p. 129). Cumanus hesitated to inflict punishment upon the Samaritans: it is even said that he was in their pay. The Judeans, headed by the zealots Eleazar, son of Dineus, and Alexander, revenged themselves upon the Samaritans, despite the attempt of the leaders in Jerusalem to hold them back. Cumanus sent out the Sebaste troop from Cæsarea; but in the mean time both Samaritans and Judeans had made presentments to Ummidius Quadratus, the governor of Syria, who at once put to death in Cæsarea all those who had been captured by Cumanus, and in Lydda eighteen of the Judeans who had been involved in the disturbance. The high priests Jonathan and Ananias, the latter's son Anan, the Samaritan leaders, Cumanus and the tribune Celer, and others, were ordered to Rome to appear before the emperor. Claudius condemned three of the leading Samaritans to death, banished Cumanus, and sent Celer to Jerusalem to be beheaded. This judgment, according to Josephus ("Ant." xx. 6, § 3), was due to the influence of Agrippa II. with Agrippina, the emperor's wife.

According to Tacitus (*l.c.*), however, the trouble between the Samaritans and the Judeans had been fomented by the jealousy of the two procurators, and it was Quadratus himself who sat in judgment. Antonius Felix was exonerated, as he was the brother of the emperor's favorite, Pallas, and brother-in-law of King Agrippa.

CUMATIANO, MORDECAI B. ELIEZER. See Comtino, Mordecai b. Eliezer.

CUMBERLAND, RICHARD: English dramatist; born in the Master's Lodge, Trinity College, Cambridge, Feb. 19, 1732; died at Tunbridge Wells May 7, 1811. He was educated at Bury St. Edmunds and Westminster, and at Trinity College, where he was entered when but fourteen years old.

About 1750 Cumberland was appointed private secretary to Lord Halifax, and finding the position a sinecure, he devoted his leisure to play-writing. Among his most successful plays were "A Summer's Tale," 1765, and "The West Indian," produced by Garrick in 1770.

Cumberland's most important work, from a Jewish standpoint, was his drama "The Jew," written in 1777, in which he depicted the antithesis of Shakespeare's *Shylock* and Marlowe's *Barabas* in *Sheva*, the benevolent, grateful Jew. *Sheva* is rescued at Cadiz from an auto da fé by *Don Carlos*, and, later, from a mob in London by the son of *Don Carlos, Charles Ratcliffe*. In gratitude, *Sheva* gives £10,000 to *Ratcliffe's* sister as a marriage portion, and the balance of his fortune to *Ratcliffe*.

Incidentally it may be stated that "The Jew" appeared two years before "Nathan der Weise," which, however, had been written earlier.

CUMIN: The seed of the *Cuminum Cyminum*, an umbelliferous plant, which, coming originally from Mediterranean countries, spread to many parts of the world. Its name is common to Greek, Hebrew, Phenician, Syriac, Ethiopic, and Arabic, as well as to modern languages. Geoponicon and Bar Bahlul mention among its varieties the wild, the Ethiopic, and the domestic or garden cumin. Palestine grew a special variety of its own, the *Cyminum Syriacum* (Mish. Demai, ii. 1; the Yer. distinguishes it from the variety called *Cyprian*, the seed of which is curved). By the Arabs as well as by the Jews cumin was used as a condiment. It has a pungent taste, something like caraway, and is used by many people to flavor bread. The oven was heated with cumin for that purpose (Ter. x. 4). It is used also medicinally to soften swellings. In the Talmud it is mentioned as used to stanch excessive bleeding (Shab. 110b) during menstruation and after circumcision (Shab. 18, 4; see also Joel Müller, "Ḥillufe Minhagim," p. 41, Vienna, 1878); while it is also credited with curative properties for colics ('Ab. Zarah 29a, top). It is not certain whether, in the magic formula against boils given in Shab. 67a, the word "kammon" is an allusion to the seed; but in view of its application in such cases, this is highly probable.

In Isa. xxviii. 25 the method of threshing it is referred to. Instead of the usual instrument, a rod is used, and the knowledge of this method is pointed out as of divine origin. Matt. xxiii. 23 complains of those who give tithes of cumin but disregard the weightier matters of the Law.

CUNÆUS, PETRUS (also known as **Peter van der Kuhn**): Dutch Christian and rabbinical scholar; born at Flushing 1586; died at Leyden Dec. 2, 1638. From 1617 until his death he was professor of jurisprudence and politics at the University of Leyden. Cunæus holds a position of some importance in the development of Biblical archeology as the author of "De Republica Hebræorum," which appeared in three volumes, in 1617, at Leyden. It was republished in 1632 by Elzevir; and was translated into French in 1703. It was also reproduced in the "Critici Sacri" and in Ugolini's "Thesaurus."

In this book Cunæus deals with the constitution of the old Hebrew kingdom, which he regards as a purely theocratic one. The Lord was the sole ruler, and made the laws, appointed judges, decided questions of war and peace, and was high priest, liberator, and leader of the people. Cunæus had often compared the conditions of Jewish with those of Roman and Greek life, and concluded that Jewish laws were superior to those of the classical world. He instanced the jubilee year of the Hebrews, which, according to his view, would have been the only remedy for the evils of the "latifundia" in Rome. He made use of the teachings of the Rabbis, especially of Maimonides. Cunæus and Grotius were the first Christian scholars who accepted, in their Biblical interpretations, the explanations of the Rabbis.

CUNEIFORM INSCRIPTIONS. See Assyriology and the Old Testament.

CUNEO: Capital of the Italian province of the same name. According to local traditions, a Jewish community, founded probably after the expulsion of the Jews from France (1381), existed there in the fourteenth century. It seems to have been firmly established only after the immigration of Spanish and Portuguese Jews, the first of the immigrants being some bankers, who, at the end of the sixteenth century, received permission from the pope to open loan-offices ("Rev. Etudes Juives," xix. 143). The oldest monument preserved by the community is a "dukan" of the year 1611. The societies also date back to an early time: the Gemilut Ḥasidim was founded in 1687; the Talmud Torah, in 1770 by Solomon Jehiel della Torre. Two special memorial days are celebrated in the synagogue of Cuneo: one in memory of a conflagration in 1750, the other of the siege of 1799. The Spanish and the Italian rituals are followed. Among the rabbis have been the following: Jacob ben Mordecai Poggetto, in the sixteenth century; Solomon Jehiel della Torre, in the eighteenth century; M. Sorani, in the nineteenth century.

The community has a permanent population of about 300 persons. The Lattes family, which has lived there continuously since the sixteenth century, is especially noted.

G. I. E.

CUP.—Biblical Data: The word most commonly used in the Old Testament for drinking-vessel is כוס (Gen. xl. 11, 13). גביע first occurs in the story of Joseph for the cup with which he "divined" (Gen. xliv. 2-12, Hebr.), and from Jer. xxxv. 5 it appears that it was larger than the כוס, corresponding to a goblet or crater. The גביע was also one of the ornaments of the golden candlestick, or menorah (Ex. xxv. 33 *et seq.*, xxxvii. 17-21), and is described as being "almond-shaped" (משקד), like the calyx of the almond-flower. Other words, like אגן, קשות, סף, which the English versions sometimes render by "cup" or "goblet" (Isa. xxii. 24; Song of Solomon vii. 3; Num. iv. 7; I Chron. xxviii. 17; Jer. lii. 19), were used to designate rather a basin, or bowl-shaped vessel. It may be assumed that the cups of the Jews were in general of the same material, design, and workmanship as those of the Egyptians, Assyrians, and Phenicians, whose craters were celebrated even in Homer's time (Homer, "Iliad," xxiii. 743; *idem*, "Odyssey," iv. 615-618). The cups used at present in synagogues for "ḳiddush" and "habdalah" are generally of silver, oblong, and shaped like an inverted dome, with a stem and base, resembling the cup figured on the Maccabean coins.

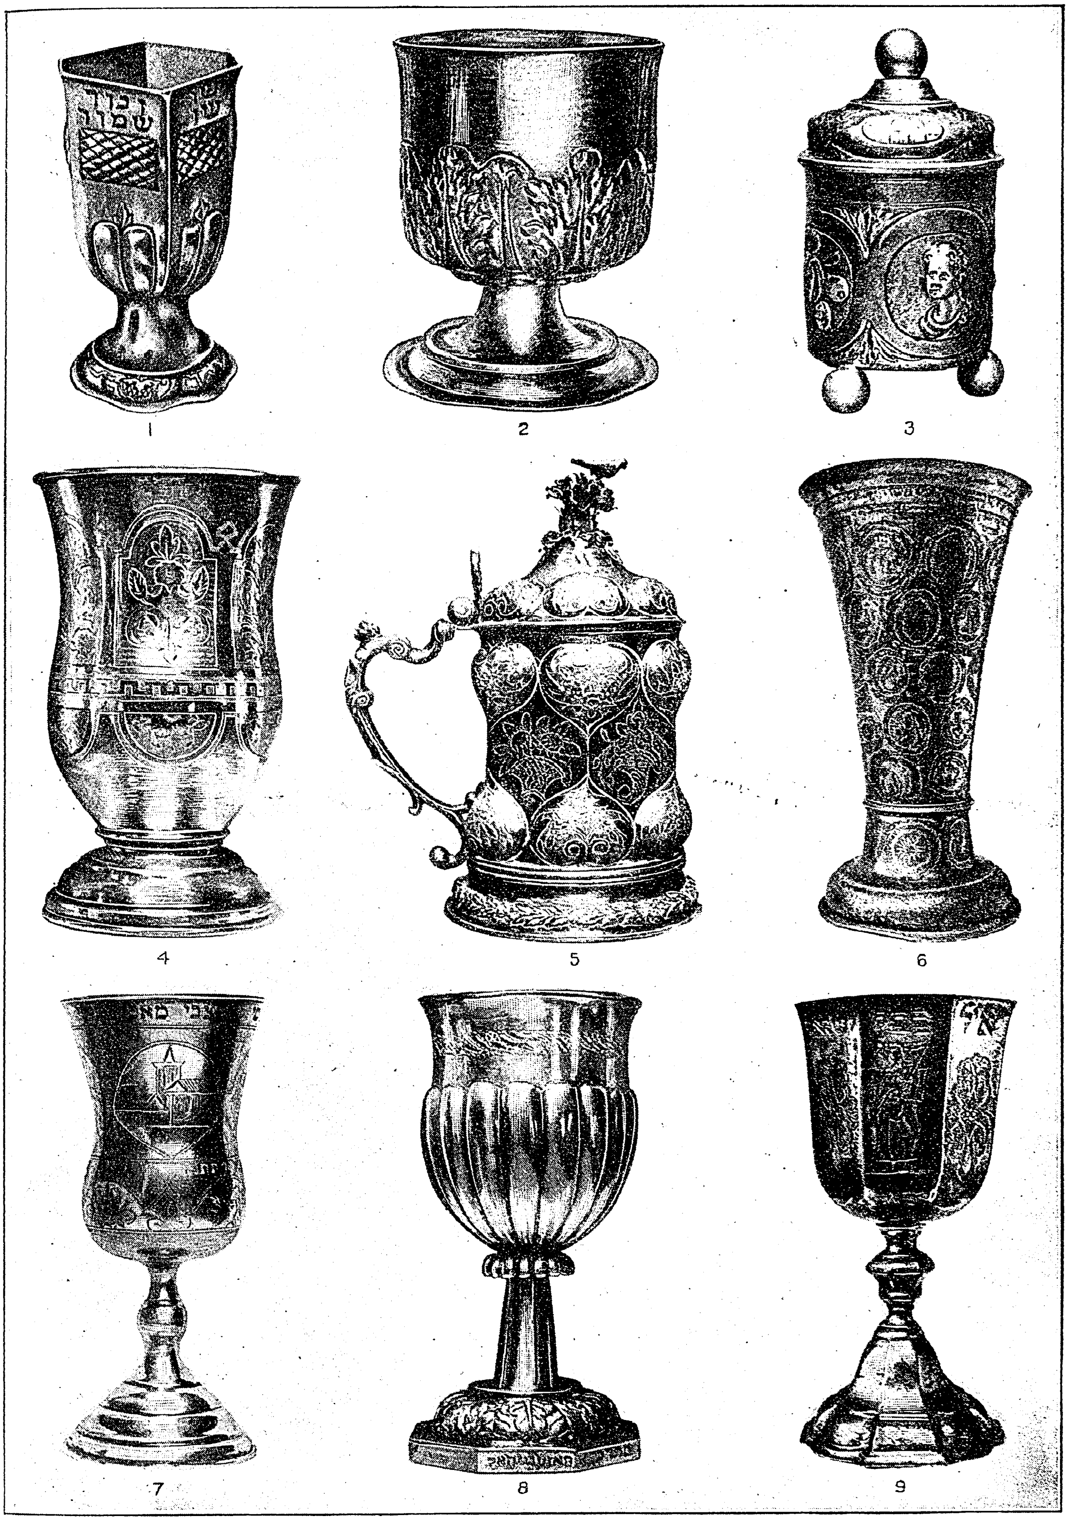
Metaphorical Use.

"Cup" is frequently used in metaphors of good or of ill fortune, as in "My cup runneth over" (Ps. xxiii. 5, xvi. 5); "the cup of his fury" (Isa. li. 17, 22); "the bowl of the cup of staggering" (Zech. xii. 2, Hebr.); "the cup of astonishment and desolation" (Ezek. xxiii. 33). Babylon is a "golden cup in the Lord's hand that made all the earth drunken" (Jer. li. 7). The "cup of consolation" (Jer. xvi. 7) is one offered to mourners; while the "cup of salvation" (Ps. cxvi. 13) is a cup of thanksgiving for deliverance, in allusion, perhaps, to the wine of the peace-offering ("shelamim"), or to the cup of praise and thanksgiving.

——**In Rabbinical Literature:** In the Talmud the figurative use of "cup" for trouble and suffering (Ḥul. 92a; compare Gen. R. lxxxviii. 5) is observed in the expression "to taste the taste of death" (טעם טעמא דמיתותא, Yoma 78b; in the N. T., Matt. xvi. 28; Mark ix. 1; John viii. 52; Heb. ii. 9; compare "Etymologicon Magnum": ποτήριον . . . σημαίνει καὶ τὸν θάνατον). Another figurative use of "cup" is for one's wife (Ket. 75b; Ned. 20b; Giṭ. 90a).

Ten—at one time fourteen—cups were ordained for the house of mourning (Ket. 8b; compare Sanh. 70a). The "cup of benediction"—*i.e.*, the third of the four cups of the Passover meal—is often referred to (Ber. 51a; B. B. 97b, etc.; in the N. T., I Cor. x. 16). For other interesting references to "cup" see Ket. 65a; Pes. 96b; Yoma 75a; Beẓah 15b, etc.

In Gen. xliv. 5 is found probably the oldest ref-



CUPS OF SANCTIFICATION.

CUP OF BENEDICTION (Hebrew, "kos shel berakah"): The cup of wine taken immediately after grace has been recited at the conclusion of a meal. The custom is first mentioned directly in Mish. Ber. vi. 6: "If wine comes to them [a company of three or more] during the meal, each one blesses for himself; if after the meal, one blesses for all of them." In other words, wine after the meal is treated with some solemnity. In Pes. x. 1 the four cups of the Passover night are mentioned: the third of these is the cup of benediction following the grace after supper.

In later times the custom arose that where one had with his meal only one unit of wine (one-fourth of a log—about the contents of an egg and a half), he should drink it after the meal as a cup of benediction; and many rabbis deemed it highly meritorious, indeed almost a duty, to have wine in readiness for this purpose at each meal, especially when three men were to partake of it, and would join in saying grace. In that case the one reciting grace aloud would take the cup in his right hand during the recital and hold sweet-smelling spices in his left (see Maimonides, "Yad," Berakot, vii. 14, 15). But the custom as to the spices has long since gone out of use. In northern countries wine is not accessible as a daily beverage to the mass of the Jews; hence, "strong drink"—*i.e.*, beer or mead, and, later on, spirits, under the name of "wine of the country"—or any beverage other than water, such as sirup or the juice of fruits, was deemed a fit substitute for wine in the cup of benediction (see Shulḥan 'Aruk, Oraḥ Ḥayyim, 182, 1–2, Isserles' gloss).

Speaking generally, the cup of benediction is drunk only on Sabbaths or at festivals and other joyous occasions.

Bibliography: Dembitz, *Jewish Services in Synagogue and Home*, pp. 345, 346, especially for the song based on the cup of benediction.

CUP OF SALVATION. See Periodicals.

CUPBEARER (משקה): The officer who served the cup to the king. Like the Cup, the cupbearer is first mentioned in the Old Testament in connection with the story of Joseph in Egypt (Gen. xl. 21), where the title "chief of cupbearers" (שר המשקים) would show that such a functionary existed at the Egyptian court. In Jewish history this officer is mentioned in the description of Solomon's court (I Kings x. 5; II Chron. ix. 4), and, later, at the court of Herod I. (Josephus, "Ant." xvi. 8, § 1). Nehemiah was cupbearer to the Persian king Artaxerxes Longimanus (465–425 B.C.; Neh. i. 11, ii. 1). Cupbearers are frequently represented on the Assyrian monuments (compare also Tobit i. 22). The Assyrian Rab-shakeh (רבשקה, II Kings xviii. 17; Isa. xxxvi. 2), formerly supposed to have been the captain of the cupbearers, is now known to have held a different office.

The Egyptian cupbearers were eunuchs (סריסים, Gen. xl. 2), as were those of Herod and those in Assyria; and it may be assumed that this was generally the case throughout the Orient. The office of cupbearer at the Median-Persian courts was, according to Herodotus (iii. 34) and Xenophon ("Cyropædia," i. 3, 8), one of great honor. The cupbearer had in some cases to taste of the cup before presenting it (Xenophon, *ib.*).

CURAÇAO: An island of the Dutch West Indies, captured from Spain in 1634. It is probable that Jews from Holland were among the first settlers in the island under the Dutch government. But they did not arrive there in considerable numbers until 1650, when twelve Jewish families—De Meza, Aboab, Pereira, De Leon, La Parra, Touro, Cardoze, Jesurun, Marchena, Chaviz, Oleveira, Henriquez Cutinho—were granted permission by Prince Maurice of Orange to settle there. The governor of the island, Matthias Beck, was directed to grant them land, and supply them with slaves, horses, cattle, and agricultural implements, in order to further the cultivation and develop the natural resources of the island, the earlier settlers being chiefly concerned in the more lucrative contraband trade with the Spanish Main. The land assigned to these immigrants was situated on the northern outskirts of the present district of Willemstad. This district is still known as the "Jodenwyk" (Jewish quarter; Corcos, "History of the Jews of Curaçao," pp. 7–8).

In those early years, despite the favorable auspices under which the Jews arrived, severe restrictions were put upon their movements, and they labored under all the disadvantages to which aliens were generally subject. They were even prohibited in 1653 from purchasing additional negro slaves, much needed for their farms.

In March, 1651, the directors of the Dutch West India Company (in which Jews were large stockholders) wrote to Peter Stuyvesant, the governor of New Netherlands, that they were seriously considering the abandonment of Curaçao, since the island was not proving a source of revenue. They decided, however, to make one more experiment, and entered into a contract with Joseph Nuñez de Fonseca (also known as David Nassi), who undertook to emigrate, taking with him a large number of people, under one Jan de Illan, also a Jew, as patroon.

"He intends," they write, "to bring a considerable number of people there to settle and cultivate the land, but we begin to suspect that he and his associates have quite another object in view; namely, to trade from there to the West Indies and the Main. Be that as it may, we are willing to make the experiment, and you must, therefore, charge Director Rodenborch to accommodate him within proper limits and in conformity with the conditions of the contract" (Albany MSS., "Pub. Am. Jew. Hist. Soc.," No. 10).

Settlement of Illan.

By Dec., 1652, Illan and his followers had made considerable progress, and had begun a trade in logwood with the neighboring islands. As this trade was not permitted by the terms of the contract, and as it was also contrary to the interests of New Netherlands, attempts were made by the directors to stop it. The grant of privileges to Nassi, bearing the date of Feb. 22, 1652, provided that he was to have two leagues of land along the coast for every fifty families, and four leagues for every one hundred families, that he should bring over. The colonists were further granted exemption from taxes for ten years, and the privilege of selecting the lands on which they desired to settle. They were also accorded religious liberty and toleration, though they were restrained from compelling Christians, should any be among them, to work on Sunday, "nor were any others to labor on that day."

This is the earliest known charter of privileges, specifically conceding religious liberty and toleration to Jews in the New World. Its favorable terms, as well as other attempts at settling Jews in Curaçao made at this time, were unquestionably due to the prominence of Jews on the directorate of the Dutch West India Company, and in Dutch affairs generally (see Menasseh ben Israel). On April 4, 1652, the directors wrote again to Stuyvesant, speaking of Nassi as "preparing to go there with a large number of people." Yet they had decided misgivings respecting the success of the enterprise, and no confidence in the people or in their leader (Corcos, *l.c.*). Their fears appear to have been justified, for all accounts tend to show that the plan was not carried out on any extensive scale (Corcos, *ib.* pp. 9, 17, 18; Daly, "The Settlement of the Jews in North America," p. 9).

Jews Prominent in Trade.

The history of the effective settlement of Jews in Curaçao begins, however, in 1654, when the conquest of Brazil by the Portuguese resulted in the expulsion of the Jews and their dispersion to the West Indies and to the mainland of North America, particularly to New Netherlands and to Newport, Rhode Island. Large numbers came from Brazil to Curaçao during that and succeeding years, bringing with them considerable wealth. During this period they laid the foundations of that prominence in the commercial development of the island which they have since retained (Corcos, *ib.* pp. 9–10). Shortly after this (1657), regular communication for purposes of trade was established between New Amsterdam and Curaçao. This was principally in the hands of the Jews, and contributed to the commercial development of both colonies. An original Spanish bill of lading and an invoice of goods shipped from Curaçao to New Netherlands in 1658, and directed to Joshua Mordeky En-Riquez, included Venetian pearls and pendants; thimbles, scissors, knives, and bells, thus showing the variety of the trade carried on by the Jews at this time ("Archives of the State of New York, Translation of Dutch Records," xii. 99).

In contravention of their instructions the local authorities connived at the trade carried on with Isaac de Fonseca of Barbados, which began in 1656, and which tended to undermine the trade monopoly enjoyed by the Dutch West India Company. The Curaçao authorities were kept from interfering with it by Fonseca's threat to turn his trade toward Jamaica and abandon Curaçao.

In 1659 Stuyvesant complained to the directors that Jews in Curaçao were allowed to hold negro slaves, and were granted other privileges not enjoyed by the colonists of New Netherlands, and he demanded for his own people "if not more, at least the same, privileges" as were enjoyed by the "usurious and covetous Jews," as he termed them (Albany MSS.).

The life of the Jews as a community begins definitely in the year 1656, when they established the Congregation Mikveh Israel under the direction of the Spanish and Portuguese community of Amsterdam. In the same year the land originally granted to the first twelve immigrant families was appropriated for a "bet-haim" (burial ground), and was enclosed with a brick wall and consecrated to its purpose. It is not likely, however, that this year witnessed the first services held by the new colonists. Probably they had gathered, as was the case elsewhere, in a room provided by one of their number. When, in 1656, they had outgrown the limitations of a private room, they rented a small wooden building, in which regular daily services were held.

Early Tombstones.

There is no evidence that they were numerous enough at this date to warrant the selection of a rabbi, though the fact that one of the earliest tombstones, bearing the date 22 Menahem (Ab), 5432 = 1671, carries the name of Rev. Abraham Haim Lopez da Fonseca, tends to prove that he officiated as ḥazzan for a time. The earliest tombstone decipherable is that of Isaac Henriquez Cotinho (5431 = 1670). Of those interred during the remaining years of the seventeenth century and the first decade of the eighteenth (1670–1707), the names of twenty-seven can be deciphered, thus affording an indication of the extent of the settlement. Among these may be recognized the names of a number of the first settlers of 1650 (Corcos, *ib.* pp. 10–13). The first regularly appointed ḥakam of the community was Josiahu Pardo, who arrived in Curaçao from Amsterdam in 1674, and remained there until 1683, when he left for Jamaica.

Indicative of the close relations between the communities of Amsterdam and Curaçao is the fact that this Pardo was the son of David Pardo, who, with Saul Levi Morteira, Menasseh ben Israel, and Ishac Aboab, constituted the college of rabbis at Amsterdam ("Publications Am. Jew. Hist. Soc." iii. 19).

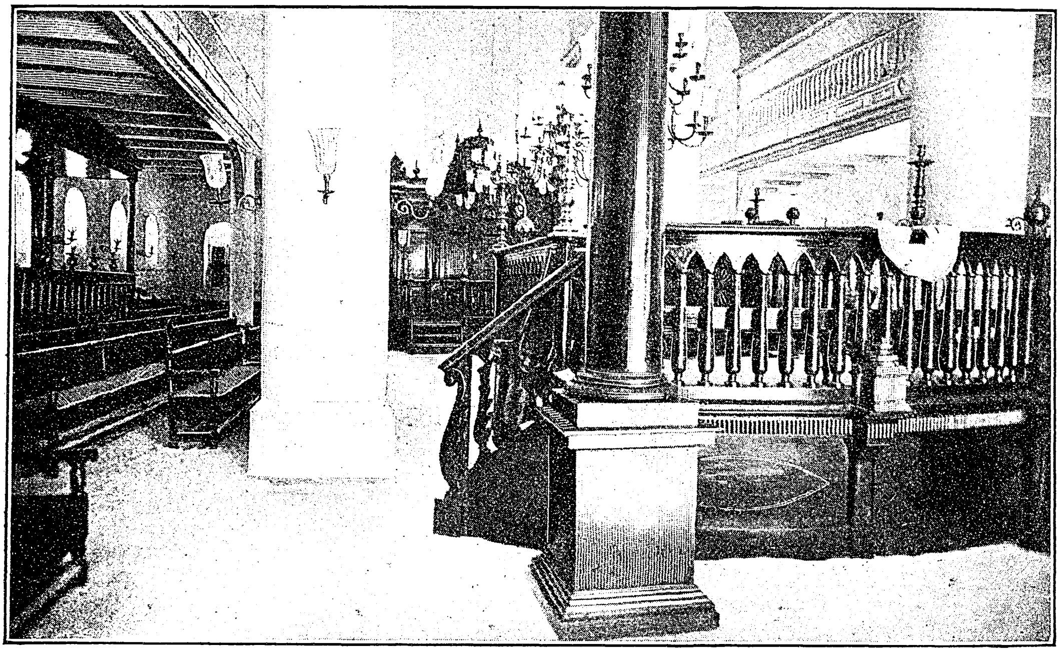
In 1692 the small wooden building used up to this time having been outgrown, a new synagogue was erected, and consecrated with appropriate ceremonies on the eve of Passover in that year, the services being read by the ḥazzan, David Raphael Lopez de Fonseca (d. 5467 = 1707). This building, enlarged and reconsecrated in 1731, still stands, a monument to the substantial constructive methods of the early builders.

For reasons not yet satisfactorily explained, in 1693 a considerable number of families left the island for the continent of America, many going to Newport, among them being members of the Touro family, afterward famous in the history of that town. During the year 1692 a number of Italian settlers in Curaçao, refugees from David Nassi's dispersed colony at Cayenne (dissolved 1664), departed for Tucacas, Venezuela, where they established a congregation called "Santa Irmandade."

A period of substantial prosperity for the Jews of Curaçao began early in the eighteenth century. In 1715 they established a benevolent society for the care of the sick and needy. Five years later they responded liberally to an appeal for aid from the Shearith Israel congregation of New York, and in 1756 met with equal generosity a similar appeal from the Jews of Newport. By 1750 their numbers had increased to about 2,000 (Chumaceiro). They were prosperous merchants and traders, and held positions of prominence in the commercial and political affairs of the island (Corcos, *ib.* p. 24). By the end of the eighteenth century they owned most of the property in the district of Willemstad. As many as fifty-three vessels are said to have left in one day for Holland, laden with goods which were, for the most part, the property of Jewish merchants (Chumaceiro).

Two communities had come into existence by 1740, the newer one occupying a tract across the harbor from Willemstad, then as now known as "Otrabanda." In order to avoid crossing the water on the Sabbath to attend divine services, those who resided in this outlying district formed themselves into the Neveh Shalom (Dwelling of Peace) congregation, and in 1745 (12th Elul, 5505) consecrated their synagogue. For a time this was regarded as merely a branch of the older congregation, and as under its direction. This led to a series of serious disputes, which culminated, in 1749, in an open breach, settled only by the intervention of Prince William Charles of Orange-Nassau, in a decree bearing the date of April 30, 1750, and commanding the disputing communities to terminate their strifes, to submit to the government of the parnasim and board of the original synagogue (Mikveh Israel), and to be subject to the regulations of the Portuguese community in Amsterdam. This arrangement continued until 1870, when the congregation became independent. On Aug. 19, 1750, the governor and council proclaimed a day of thanksgiving and prayer, which was to inaugurate an era of peace. On this occasion Rabbi Raphael Samuel Mendes de Sola preached a sermon, which was afterward published (1757) in Amsterdam (Corcos, *ib.* pp. 31-38; "Publications Am. Jew. Hist. Soc." iii. 17-18, ix. 149-150).

Congregational Disputes.

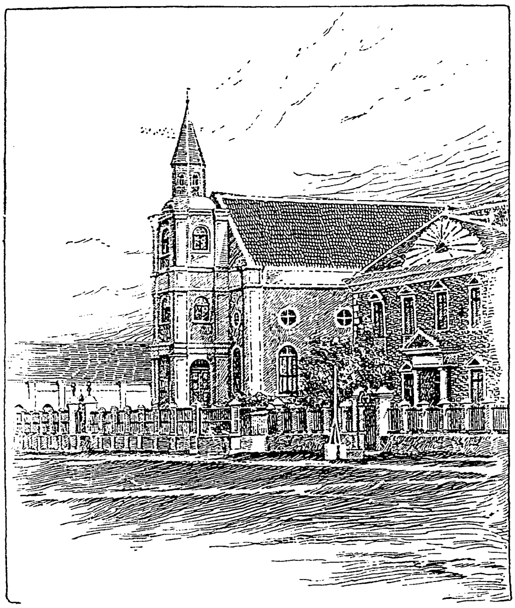


Interior of the Curaçao Synagogue.
(From a photograph.)

Increasing in prosperity and in numbers during the next century, the community was not without internal disputes. It was due to one of these controversies between the parnasim and the ministers that a society, called the "Porvenir," was founded in 1862. In the next year this developed into a Reform congregation, under the name "Emanu El," which in 1865 laid the corner-stone of its new building in the quarter "Scharlo," the synagogue being completed and dedicated in the following year. In 1863 a moderate change in the direction of Reform was introduced into the liturgy of the Congregation Mikveh Israel. At the present time the older congregation has a membership of about

800, the younger of 250. Each has its religious schools and charitable organizations.

The ministers of Temple Emanu El were Josuah Naar, Jacob de Solla Mezer Solas, and Isaac Lopez de Leao Laguna. Those of the older congregation (Mikveh Israel) were as follows: Abraham Haim Lopez de Fonseca (d. 1671); David Raphael Lopez de Fonseca (1692; d. 1707); Eliaho Lopez (1692–1712); Raphael Jesuran (1715–48); Raphael Samuel Mendes de Sola (1749; d. 1761); Isaac Henriques Farro (1761; d. 1762); Jacob Lopez de Fonseca (1765; d. 1817: he celebrated the fiftieth anniversary of his ministry in July, 1815); Aaron Mendez Chumaceiro (1856–69); Haim Israel Sant Cross (1869–89); Eleazar Polak (1893; d. 1894); Joseph Corcos (1896–98).



Temple Emanu El, Curaçao.
(After a photograph.)

At the present time (1902) the Jews are among the leading citizens of Curaçao. Forty-four out of fifty-two firms on the two principal business thoroughfares, De Heeren Straat and Breeden Straat, are Jewish. The leading lawyers, physicians, editors, and druggists are also Jews. Among the more prominent Jewish citizens and officials are two bank presidents, one member of the executive council, three members of the colonial council, one district judge, one chief clerk, ten consuls, four captains, and eleven lieutenants of the militia.

CURIEL: A wealthy Marano family which settled in the Netherlands and at Hamburg about the sixteenth century. They intermarried largely with the Da Costa family. In 1682 great excitement was caused at Antwerp by the attempt of the rector of the Church of Saint George to baptize forcibly the son of Diego Curiel, which effort, however, was frustrated. **Moses de David Curiel,** at the beginning of the eighteenth century, was a well-known London Jew.

G. C. de B.

CURIEL, JACOB (known in public life as **Alexander Nuñez da Costa**): Resident of the Portuguese court at Hamburg about the middle of the seventeenth century; died there in 1665. He had lived previously at Amsterdam, where he had taken an important part in the reunion, effected in April, 1639, of the Portuguese community, which, through the rise of the German Jews, had split into three bodies. John IV. of Portugal, discovering Curiel's skill in financial matters, sent him (*c.* 1650) to Hamburg as his agent, and conferred upon him the title of "Hidalgo da Casa Real" (Noble of the Royal House). In 1655 he was elected a warden of the Portuguese synagogue, to which he donated a "tebah" ("fes kodes"). He was buried in the Portuguese cemetery at Altona in 1665.

CURSING: The expressions used for "cursing" in the Bible are: (1) ארר, מארה; (2) קלל, קללה; (3) אלה (verb and noun) and תאלה; (4) קבב; (5) נקב (Lev. xxiv. 11, 16); (6) גדף.

In Talmudic literature occur the terms: ארירה, קלל בקוסם, קלל בקסם (Sanh. ix. 11), which the Jerusalem Talmud (*ad loc.*) explains as a Nabatæan form of cursing; החרים (M. Ḳ. 15a, 16a; compare Mandl, "Der Bann," p. 25); and the Aramaic אקל קלל (Eccl. R. iii. 11; Yer. Yoma iii. 7), לט, לטותא, לוט, לטי, לטט, לוטתא.

Biblical Conception.

Cursing rests on the belief in the possibility of bringing down calamity upon persons or things by the mere power of the spoken word, without any regard to its moral justification. Traces of this heathen conception of the objective reality of a curse, and of its mystic power, are found in the Bible (Ps. cix.) and in the Talmud (see below); but in general the Bible conceives a curse to be merely a wish, to be fulfilled by God when just and deserved. An undeserved curse has no effect (Prov. xxvi. 2), but may fall back upon the head of him who utters it (Gen. xii. 3; Ecclus. [Sirach] xxi. 27), or may be turned by God into a blessing (Deut. xxiii. 5). The declaration of punishments (Gen. iii. 14, 17; iv. 11), the utterance of threats (Jer. xi. 3, xvii. 5; Mal. i. 14), and the proclamation of laws (Deut. xi. 26–28, xxvii. 15 *et seq.*) received added solemnity and force when conditioned by a curse. Cursing is not only characteristic of the godless (Ps. x. 7), but serves as a weapon in the mouth of the wronged, the oppressed, and those who are zealous for God and righteousness

(Judges ix. 57; Prov. xi. 26, xxx. 10). A righteous curse, especially when uttered by persons in authority, was believed to be unfailing in its effect (Gen. ix. 25, xxvii. 12; II Kings ii. 24; Ecclus. [Sirach] iii. 11). One who had received exemplary punishment at the hands of God was frequently held up, in cursing, as a terrifying object-lesson (Jer. xxix. 22), and such a person was said to be, or to have become, a curse (II Kings xxii. 19; Jer. xxiv. 9, xxv. 18; Zech. viii. 13). It is especially forbidden to curse God (Ex. xxii. 28), parents (Ex. xxi. 17; Lev. xx. 9; Prov. xx. 20, xxx. 11), the authorities (Ex. xxii. 28; Eccl. x. 20), and the helpless deaf (Lev. xix. 14).

Talmudic Conception.

Parallel with the Biblical conception of a curse as being of the nature of a prayer (Ta'an. 23b; "Pirke R. ha-Kadosh," ed. Grünhut, vii. 14), and that an undeserved curse is ineffective (Mak. 11a) and falls back upon the head of him who utters it (Sanh. 49a), Talmudic literature betrays a belief, amounting to downright superstition, in the mere power of the word (Ber. 19a, 56a; compare "Z. D. M. G." xlii. 588). Not only is a curse uttered by a scholar unfailing in its effect, even if undeserved (Mak. 11a), but one should not regard lightly even the curse uttered by an ignorant man (Meg. 15a). A curse is especially effective when uttered three hours after sunrise (Sanh. 105b). The Biblical prohibitions of cursing are legally elaborated, and extended to self-cursing (Shebu. 35a). A woman that curses her husband's parents in his presence is divorced and loses her dowry (Ket. 72a). Among the Romans one condemned to death was gagged to prevent his cursing the king ('Er. 19a).

Cursing is permissible when prompted by religious motives. A curse is uttered against those who mislead the people by calculating, on the basis of Biblical passages, when the Messiah will come (Sanh. 97b). Cursed are those who are guilty of actions which, though not forbidden, are considered reprehensible (compare on this subject Tos. to Men. 64b, *s.v.* ארור).

Scholars cursed sometimes not only with their mouths, but by an angry, fixed look. The unfailing consequence of such a look was either immediate death or poverty (Soṭah 46b, and parallel passages). The expression used for this look is נתן עיניו בו (Aramaic, יהב בה עיניה). This look may be merely a mental curse. According to others it has no reference to the magic power of the "evil eye" (see Bacher, "Agada der Tannaiten," ii. 331, and EVIL EYE).

The Orientals have an ineradicable proneness to curse God, not only on so grave an occasion as the breaking out of war (I Sam. xvii. 43), or under the pressure of a great calamity (Isa. viii. 21), but on the slightest provocation in daily life (compare Luncz, "Jerusalem," v. 271). Talmudic literature contains many laws regarding BLASPHEMY.

L. G. C. L.

CURTAIN: An adjustable drapery, usually hung before a window or passageway to insure privacy. In Ex. xxvi. and xxxvi., containing the directions for the making and a description of the erection of the TABERNACLE, the Hebrew term "yeri'ah" (יריעה) occurs forty-four times. In the English versions it is rendered "curtain." A more correct translation, however, would be "rug" or "tent-cloth." The rugs described in Exodus were of costly material and of elaborate workmanship. According to rabbinical explanation (Rashi to Ex. xxvi. 1) the thread was composed of four strands, of the four different materials of varied colors mentioned in verse 1. The thread was then six-folded, so that it was actually 6 × 4 = 24-ply. Inwoven on both sides, not embroidered or sewed on, were pictures of the cherubim, showing on each side different figures, a lion, for instance, on one side, and an eagle on the other. Ten of these rugs were sewed (Rashi, "with a needle") or fastened together, in two sets of five each, and were used to screen off the Holy Place. The end rugs of each set were provided with equidistant loops, the loops in one rug having corresponding loops in the other. Each rug had a length of twenty-eight cubits and a breadth of four cubits; so that the five sewed together were twenty cubits in breadth.

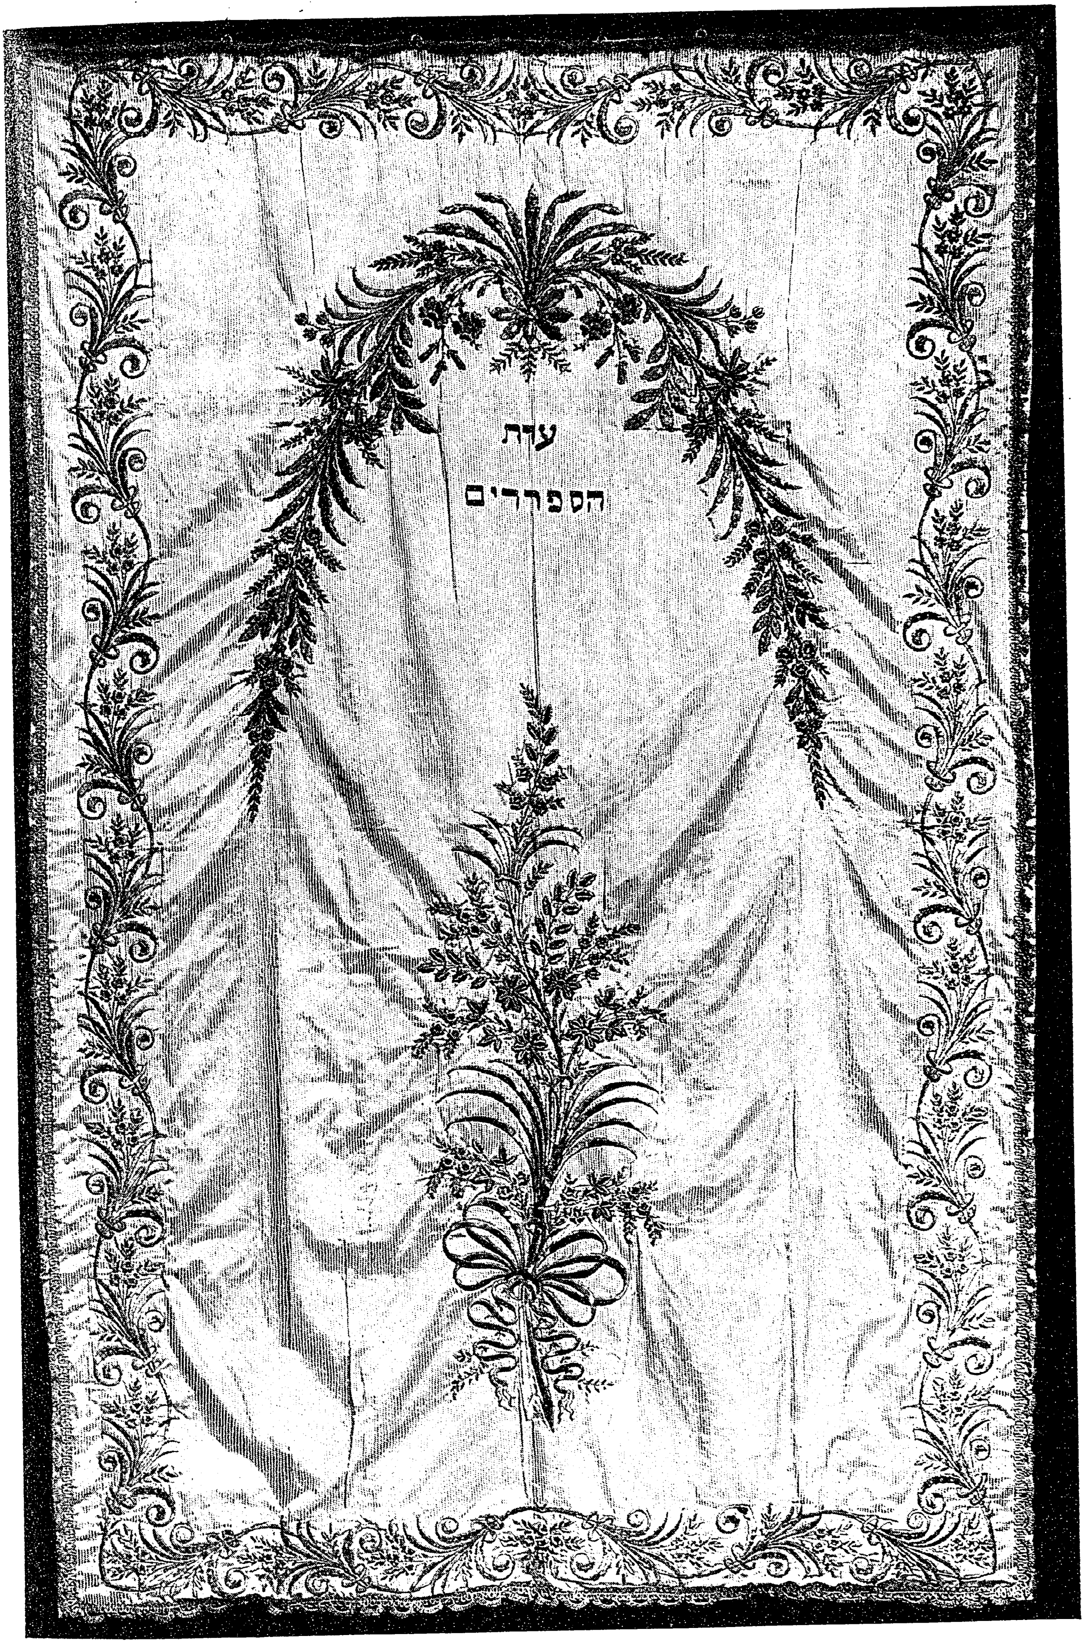
Curtains in Tabernacle.

In Middot detailed calculations of the dimensions of the Tabernacle and the adjustment of the curtains are given; but on some points the descriptions of the covering of the pillars on the morning side of the tent (see Shab. 98a) vary, and it is not possible to arrive at an accurate estimate of the proportions and the arrangement which the author of Exodus had in mind. Hooks were provided by which the corresponding loops were joined. Other rugs or pieces of cloth, eleven in number, woven of goat-hair, were used to cover the tent. The Hebrews had, at a comparatively early stage of their development, perhaps under Egyptian influence, attained considerable proficiency in the art of weaving such rugs (Nowack, "Lehrbuch der Hebräischen Archäologie," i. 241).

The Arabs were also adepts in this craft, many specimens remaining to show their skill in weaving figures and other ornaments into cloth (Le Bon, "La Civilisation Arabe," pp. 515, 517, 519). The style of these primitive Hebrew rugs is, perhaps, reproduced in the "kiswah" or covering of the "ka'bah" (a coarse fabric of mixed silk and cotton), which serves to confirm Rashi's statement that the yeri'ah was of mixed thread. That the original meaning of the term "yeri'ah" is "rug," or "tent-cloth," is made plain by Jer. xlix. 29; Isa. liv. 2; Jer. iv. 20, x. 20; and Hab. iii. 7, where it is used as equivalent to "tent." The later rabbinical use of the word for parchment, or writing material, of certain dimensions, supports the theory that originally it stood for pieces of cloth or hide cut into various lengths, ready to be fastened or sewed together (Men. 30a, b).

The rendering of "cloth," or "rug," is also sustained by Ps. civ. 2. The use of דק in a parallel passage (Isa. xl. 22) points to the same conclusion; for the word translated "curtain" stands for a thin, gauze-like material.

In Num. iii. 26 מסך is rendered "curtain." It is more properly a portière, at the gate of the court; and, in fact, it occurs in conjunction with another Hebrew word, "paroket" (פרכת), which is derived from a root, still extant in Assyrian, meaning "to



עדת
הספרדים

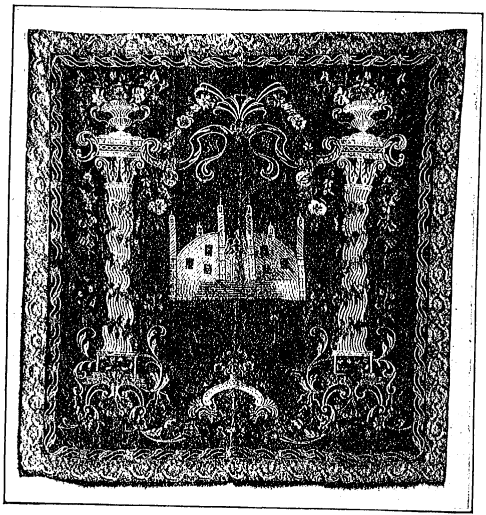
(In the United States National Museum, Washington, D. C.)

"Paroket."

shut off," and is found in Ex. xxvi. 31, and elsewhere, as the designation of the curtain that divides the Holy of Holies from other parts of the Tabernacle. In Assyrian "parraku," by metonymy, signifies the apartment and shrine which are "shut off"; while the Hebrew has retained the active sense, and denotes the means used for "shutting off." This curtain was made of the same material and in the same manner as the rug. It corresponds to the "burḳa'" (veil) in the ka'bah, which suggests what the paroket may have been in the ancient days of Israel. Talmudic tradition states that such curtains were hung in front of the various gates and doors in the Temple. In fact, thirteen are enumerated with their respective assignments (Ket. 106a). A special officer had charge of them (Sheḳ. v. 1), and women are mentioned as engaged in weaving them (Yoma 51b). That curtains were also used for secular ornaments is learned from Pirḳe R. El. 41, where mention is made of a canopy ornamented with black curtains.



Curtain for the Ark of the Law, Probably from Asia Minor.

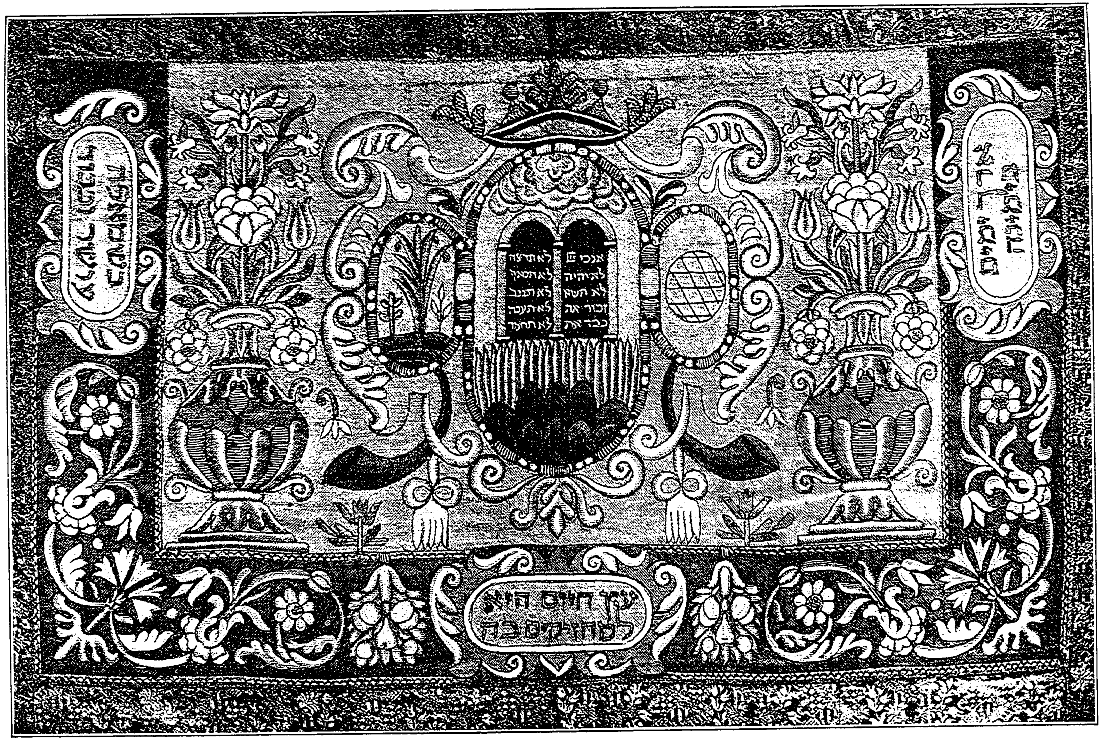
(In the United States National Museum, Washington, D. C.)

The Targumim translate "paroket" by "pargod" (Targ. Yer. to Ex. xxvi. 31, 33, 35; xxxix. 34 *et seq.*; Pirḳe R. El. iv.), a word of doubtful etymology, which, however, is rendered also a "coat," or "cloak," made of richly ornamented material and trimmed with fur (Gen. R. lxxxiv.). Curtains made of similar material might easily have been known by the same name (see Kelim xxix. 1). "Pargod" in the Talmud designates a curtain supposed to divide the inner or higher court of the heavens from the outer and more accessible celestial precincts. From behind this curtain or screen were heard voices that imparted information to the suppliant (Mek. to Ex. xix. 9). It is often contrasted with the direct communication on the part of an earthly ruler, or his secretary and ambassador (see Yoma 77a; Ber. 18b). This pargod is identical with or similar to the "velon" (= Lat. "velum"), a term which also connotes cloth and curtains made of the cloth (Kelim xx. 6; Beẓah 14b), and which is used in Num. R. iv. 13 in explanation of the Biblical פרכת (paroket). In its figurative application "Velon" (וילון = בילון) is the name of the seventh heaven, the Pargod (Ḥag. 12b; Ber. 58b, etc.).

The name is still in use among the Jews to designate the curtains hung in front of the Ark in the synagogue. Though the European Sephardic Jews do not use them, this may be due to the need of concealment in Inquisition days; and it is very doubtful if they were used in the earlier forms of the Ark of the Law. The earliest examples are without curtains (see Jacobs in "Jew. Quart. Rev." xiv. 737 *et seq*). The assumption that the curtains now attached to arks are intended to represent the curtain separating the Holy of Holies from the Tabernacle or Temple seems to be disproved by these representations. Very often these curtains were of costly material, velvet, brocade, and silk of various colors, though red and blue seem to have been the more common. They were provided with gold borders, fringes, and tassels, and were often embroidered in gold with inscriptions commemorating the pious donors and the event which occasioned the gift. Others display in artistic execution verses and quotations from the Bible; while symbols, such as crowns, or the letters כ"ת = כתר תורה ("crown of the Torah"), or lions, the emblem of Judah, are not infrequently woven into them or embroidered upon them. On the "awful days" (Rosh ha-Shanah and Yom ha-Kippurim) hangings made of white fabric are used.

Curtains in the Synagogue.

Suggestive symbolical significances and allusions have been read into the colors as well as into the dimensions of the curtains prescribed for the Tabernacle. According to Philo, the four colors which appeared in the thread indicated the four elements out of which the universe was created. Baehr, one of the more modern speculators on the symbolism of the Mosaic system, contends that the number seven in the dimen-



אנכי ה

sions is fundamental, and represents holiness in its various degrees. He also holds the four colors to have been of profound significance (Philo, "De Vita Moysis," iii. 6; Baehr, "Symbolik des Mosaischen Kultus," i. 207, 303).

J. E. G. H.

CUSA, NICOLAUS DE: Philosopher and theologian; born in Cusa, or Kues, on the Moselle, 1401; died in Todi, Umbria, 1464. He was Bishop and Cardinal of Brixan (Tyrol) at his death. As theologian he was known for his liberal views and wide mental horizon. It was he who facilitated the transition from the scholasticism of the Middle Ages to the philosophic speculations of the Renaissance.

As Papal Legate.

Cusa came in contact with the Jews both as a papal legate and as a philosopher. As legate he issued, with the approval of the Synod of Bamberg, an ordinance prescribing the badge for all Jews and Jewesses of Bamberg, and forbidding usury. Contravention of these laws would entail the ban (April 30, 1451). Through the intervention of the Roman emperor Frederick III. this ordinance was not immediately carried out. In 1452 De Cusa was compelled by the emperor to extend the term in regard to the Jews of Nuremberg, and on May 1, 1452, the pope (Nicolas V.) excluded Nuremberg entirely from the provisions of the ordinance. On March 20, 1453, on the representation of the Bishop of Bamberg, his diocese was also exempted; and on Oct. 15, in consequence of a petition of the Archbishop of Salzburg, the ordinance was made inapplicable to the whole of the Salzburg bishopric (see Stern, "Urkundliche Beiträge," i. 47, 52, 53, 55, 57).

As philosopher, De Cusa showed a much more impartial spirit in his attitude toward the Jews. He leaned toward the views of the German mystics. He refers to the book Raziel, without, however, evincing a thorough acquaintance with the Jewish mystics. He cites, also (in "De Beryllo" and "Reparatio Calendari"), Isaac Israeli, Avicebron, Abraham ibn Ezra, and the Maimonidist Jacob b. Makir.

Philosophical Views.

In his principal philosophical work, "De Docta Ignorantia," he credits "R. Solomon" (probably Maimonides) with these reflections: that pure truth is beyond the reach of all knowledge, and can not be reduced to a science; that man must strive to transcend the standpoint of mere reason if he would attain to pure truth; that science can never lead to a knowledge of God, for God alone can have a knowledge of His being, man's knowledge of God being at best a recognition of the unattainableness of positive knowledge. He follows R. Solomon in his treatment of the various names and attributes of God, holding that the nature of God is of infinite superiority, and can not be expressed in human language; and that only negative attributes can be ascribed to Him.

Nicolaus de Cusa had frequent controversies with Jewish scholars. He believed that they could be made to see the truth of the doctrine of the Trinity, but not that of the Incarnation. He complained that the Jews would not admit the divinity of the Messiah; that, in spite of their belief in a future universal resurrection, they continued to deny the resurrection of Jesus; and that, in spite of their belief in an eternal life, as is shown by their martyrdom, they would not recognize that this belief has its foundation, not in an observance of the Law, but in a belief in Jesus.

The above statements occur in his "Excitationes." In his "De Pace seu Concordia Fidei" he attempts to round off his system of philosophy with the theory that there is only one religion, manifesting itself in a variety of religious practises. To the different nations God has sent different prophets, in order that each should receive religious instruction in the manner best adapted to it. The existence of different religions is due only to the fact that men are not aware of this underlying religious unity. They all honor the same truth, however; and even the polytheists worship through their various idols a single God. Accordingly, it ought to be an easy matter, on scientific grounds, to reconcile the contending religious creeds; uniformity of religious practise, however, should not be demanded. Thus, the Jews might be allowed to retain their specific ritual, if only the symbolic meaning thereof be kept clearly in mind.

The contrast between these views and De Cusa's dealings with the Jews is explained by the universal idea of his time that it was necessary to segregate and humiliate them.

G. I. E.

CUSH.—Biblical Data: A nation whose founder is mentioned in Gen. x. 6; I Chron. i. 8 as brother to Mizraim (Egypt) and as a son of Ham; with the exception of the passages in Genesis, A. V. renders it "Ethiopia." This African country is evidently meant in Gen. x. 6, but in the next verse six Arabic tribes are mentioned as sons of Cush, and in verse 8, Nimrod, the representative of Babylonia (Assyria), appears as his descendant. These three verses present the vexing problem, much discussed by scholars, arising from the fact that nations identical in name extend over parts of Africa, Arabia, and Babylonia. In regard to the passages referring undoubtedly to Ethiopia, see Ethiopia. In a great many cases it is very difficult to determine whether the translators have used this Greek name correctly, or which of the two other divisions, Arabia or Babylonia, mentioned in the table of nations given in Genesis is meant.

The Arabian branch seems to be intended in II Chron. xxi. 16, where Judah, under Jehoram, is plundered by "the Arabians that were near the Ethiopians." These evidently did not come from the southwestern end of Arabia. In Num. xii. 1, Moses' wife, the Midianitish woman Zipporah, is called an Ethiopian (margin and R. V. "Cushite"). In Hab. iii. 7 the tents of Cushan (the Septuagint reads "Cushim"; the name evidently is the same as "Cush") and the land of Midian are mentioned (compare verse 3 for other names of northwestern Arabia). There are doubtful references in Isa. xliii. 3, xlv. 14, xx. 3, xviii. 1. Some critics place also the Cushite "Zerah" in northwestern Arabia (II Chron. xiv. 9).

Winckler, "Muṣri, Meluḥḥa, Ma'in," ii., in "Mitteilungen der Vorderasiatischen Gesellschaft" (1898, pp. 169 *et seq.*; see also Schrader, "K. A. T." 3d German ed., p. 144), throws light on these passages. He shows that the Assyrians speak of this people as "Kusi" (Kûsh) in northern Arabia, subjected by Esarhaddon. See also Friedrich Delitzsch, "Die Sprache der Kossäer," Leipsic, 1884.

For the Babylonian "Cush" compare Gen. x. 6-8 (see above), and *ib.* ii. 13, where one of the four rivers of Paradise, the Gihon, "compasseth the whole land of Cush." The old attempts to see in this river the Nile lead to impossible geographical identifications; it must have belonged to the system of the Euphrates and Tigris. In Isa. xviii. 1 (Hebr.) the very obscure verses speaking of the land "beyond the rivers of Cush" can not mean Ethiopia, as Winckler, who refers the chapter to Merodach Baladan's legation to Hezekiah ("Alttestamentliche Untersuchungen," p. 146), has asserted. Since Schrader's "K. A. T." 1st ed., p. 87, this name of the Babylonian Cush has been explained by the Kashshi, a warlike nation from the Median Mountains, who conquered Babylonia in the seventeenth century B.C., and ruled over it for several centuries (see BABYLONIA). They may be identical (as usually assumed) with the Cosseans, a mountain people mentioned by the Greeks, or with the Kissians in Elam, or connected with both (see Delitzsch, "Wo Lag das Paradies?" pp. 124, 129).

As confirmation of the Biblical statements connecting peoples so remote, the following parallels have been adduced: the Greeks speak of eastern or Asiatic Ethiopians on the Red Sea in Gedrosia (compare Homer, "Odyssey," i. 23). Assyriologists since Rawlinson have often tried to find negro or nigritic types on the sculptures representing Elamites, and French explorers (F. Houssay and Dieulafoy) have recently contended that traces of dusky tribes, relatives of the nigritic aborigines of India, are recognizable in modern Susiana. Various tribes of southern Arabia seem to show African, non-Semitic descent; on Assyrian reports of "dark Arabians" see Winckler, *ib.* p. 144. Glaser, however ("Skizze der Geographie und Geschichte Arabiens," ii. 326-329), treats Cush as a brown-red race, extending in earliest time through Elam, Arabia, and eastern Africa. Others deny the possibility of connecting the three groups, and assume that their names possessed only an accidental similarity, completed by the ancient, vowelless orthography.

E. G. H.

——**In Rabbinical Literature:** "Cush" in rabbinical literature is taken to be Ethiopia. According to an old Haggadah known to the pre-Christian Hellenistic writers, the wife of Moses, "the Cushite" woman, was the Queen of Ethiopia. Rashi claims that she was merely designated as an Ethiopian on account of her beauty, in order to protect her from the evil eye, but Onkelos makes her a "beautiful" woman, following in this the Talmudic application of the derivatives of the name, such as "Cushi," "black" persons of "negro" race, distinguished thus by their color from other men, to draw a lesson from a comparison for Israel. כושי משונה, the "distinguished Cushite" (= negro), is a standing expression in these Talmudic analogies (Yer. Mo'ed Ḳaṭan 16b). In Sifre to Num. § 99, the question is raised, "Was Moses' wife an Ethiopian?" and the answer is given, "She was 'beautiful' and thus 'distinguished' as the Cushi is by his color, by her beauty." In further development of this identification of "Cushite" with "negro," the former becomes simply a synonym for "black" (Suk. 34b; B. B. 97b). In Isa. xi. 11 Targum renders "Cush" by הנדאי ("India"), and in their discussion of Esth. i. 1 (Meg. 11a), Rab and Samuel dispute whether Cush is at the furthest extremity of the world or very close to India. The latter opinion rests on the confusion of Cush with the name of a province extending to the borders of India, Huzistan probably (Neubauer, "G. T." p. 386).

E. C. E. G. H.

CUSTOM (Hebrew, "Minhag"): An old and general usage, or a religious practise, not based on any particular Biblical passage, and which has, through the force of long observance, become as sacred and binding as laws instituted by the proper authorities.

"Custom always precedes law" (Soferim xiv. 18). This is true not only of the Talmudic laws prescribed by the Rabbis, but also of many Biblical institutions. Many statutes and commandments, civil, moral, and ecclesiastical, found on the pages of Scripture undoubtedly had their origin in the customs of the people, which, however, became modified and fixed by being inscribed on the sacred books. Some of the customs, as, for instance, circumcision, or the prohibition of eating blood or of eating the "sinew which shrank," may date back to patriarchal days; others, again, may have a later or perhaps a foreign origin. Moreover, even after the laws had been written down, the manner and form of practise could not always be detailed; and although the Talmud (Zeb. 115b; Sifra to Lev. xxv. 1; see Maimonides' Introduction to the Mishnah) relates that all the details of the Law were delivered by Moses to Israel, there were still many tribal and family customs which must have remained unmentioned. For example, the acquisition of property by the exchange of a garment of some kind ("ḳinyan sudar") is mentioned (Ruth iv. 7) as an old custom.

Authority of Custom.

Customs which grew up among the people in various places and in different forms, the Rabbis consider of binding importance. "When thou comest to a town follow its customs, for when Moses went up to heaven he refrained from food for forty days and forty nights; and when the angels came down to visit Abraham they partook of his meal, each one submitting to the custom of the place" (Gen. R. xlviii. 16; B. M. 86b). Even God Himself complied with the prevailing custom when He buried Moses (Sanh. 46b). If a judge be in doubt concerning a certain law, he is advised to follow the common usage of the people (Yer. Peah vii. 5; Ber. 45a). Should a custom conflict with some established institution ("halakah"), the custom frequently takes precedence (Soferim xiv. 18; Yer. Yeb. xii. 1). The court was equally empowered to inflict punishment upon the transgressor of a custom as upon the transgressor of a written law (Yer. Pes. iv. 3; compare Bek. 2a; Tos. *s.v.* "Ḳonsin"). To the question, Why men of the present time, who are acquainted with the calendar, must observe the second day of the holidays, the reply is "Be careful with the customs of your fathers" (Beẓah 4b; Maimonides, "Yad," Ḳiddush ha-Ḥodesh, v. 5). The later rabbis emphasized still more the importance of custom and precedent, making them of almost equal weight with Biblical injunctions (Shulḥan 'Aruk, Yoreh De'ah, 376, 4, Isserles' gloss). "Remove not the ancient landmark which thy fathers have set" (Prov. xxii. 28), was interpreted to refer to the ancient customs of the Jewish people (Yalḳ. *ad loc.*).

Legal Applications.

In civil cases the customary law was very frequently consulted. "Everything depends on the custom of the land," was a general principle of the Rabbis. Partners who agreed to divide a piece of land among themselves were obliged to contribute equally to the building of the fence. The material of which the fence should be made and the thickness of the fence were decided by the custom of the land (B. B. 2a; "Yad," Shekenim, ii. 15; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 157, 4). The length of a day's labor and the kind of food to be given to the laborer are also regulated by custom (B. M. 83a; "Yad," Sekirut, ix. 1; Ḥoshen Mishpaṭ, 331, 1, and Isserles' gloss). Whether a domestic servant is obliged to pay for breaking house utensils during service also depends on custom ("Pitḥe Teshubah" *ad loc.*). The charge of unchastity ("ṭa'anat betulim") could not be advanced against a woman in a place where bride and groom were permitted to remain by themselves before the marriage (Ket. 12a; "Yad," Ishut, xi. 8; Shulḥan 'Aruk, Eben ha-'Ezer, 68, 1).

The Talmud recognizes different kinds of customs: (1) of the land; (2) of the locality; (3) of the men of Jerusalem; (4) of certain families; (5) of the pious; (6) of scholars; (7) of chaste women; (8) of the Patriarchs; (9) of the Prophets; (10) of the non-Jews; and (11) of the common people.

Differences of Custom.

The provinces of Judea and of Galilee had peculiar customs, which differed greatly from one another. The Galileans and the inhabitants of Jerusalem used to include in the marriage contract ("ketubah") the condition that, if the husband died first, the widow should be permitted to live in his house all the days of her widowhood, while the Judeans added to it, "or until the heirs agree to pay her the money due to her by the contract" (Ket. 52b). The Galileans abstained from work the whole day preceding Passover; in Judea work was permitted until noon (Pes. 55a; compare Frankel's "Darke ha-Mishnah," pp. 66-68).

Whether one may work on the day before Passover, or on the Fast of Ab, depends entirely on the local custom (Pes. 50a, 54b). In some places the sale of small cattle to non-Jews was forbidden; in other places this was not the case (Pes. 53a). The right to eat roasted meat on the eve of Passover also depends on local custom. Todos of Rome established among the Roman Jews the custom of eating roasted kids on Passover nights (*ib.*). In some places lights were not permitted in the houses on the eve of the Day of Atonement (Pes. 53b). These customs were permitted to remain; and the people were obliged to observe the usages of their respective localities.

Customs of Jerusalem.

The men of Jerusalem also had their peculiar customs, which were often commended by the Rabbis. It was the practise among them, when a caterer was engaged to prepare a meal to which strangers were invited, and he spoiled it, to collect from him a fine for the disgrace caused both to the host and to the guests. In order to indicate the time when meals were ready and guests might enter, it was customary to hang up a screen in front of the door. So long as the screen was there, guests were welcome; when the screen was removed, guests might not enter (B. B. 93b). They were very careful in their transactions, and in their bills they noted even the hour of the day when the transaction took place (Ket. 93b). So zealous were they in the observance of religious ceremonies that they carried their "lulab" with them the whole day during the Sukkot festival (Suk. 41b). The "pure of mind" of Jerusalem would not sit down to a meal, nor sit in a court of justice, nor sign their names as witnesses, unless they were acquainted with their colleagues and assured of their fitness (Sanh. 23a). It was the custom in the courts of Jerusalem to dismiss both the principals and the witnesses before the discussion of the case by the judges commenced (*ib.* 30a).

Of the pious men—the earlier Ḥasidim—it is said that they used to spend a whole hour in preparing themselves for prayer. R. Akiba was accustomed to shorten his prayers when he prayed with the congregation, so as not to keep the people waiting for him (Ber. 30b). They are also reported to have been careful to hide sherds and broken glass three fists deep in the ground, so as not to obstruct the plowshare or to cause injury to passers-by (B. Ḳ. 30a).

R. Gamaliel II. set the example to all his contemporaries by a request he made before his death, to be buried in a plain cotton shroud—a custom which was followed by all Israel. This proved a great relief to the poor, who were unable to follow the luxurious customs formerly prevailing (M. Ḳ. 27b; Ket. 8b). It was the custom of R. Judah b. 'Illai to bathe his face, hands, and feet in warm water before Sabbath began (Sab. 25b). This also was adopted by the Jewish community (Shulḥan 'Aruk, Oraḥ Ḥayyim, 260, 1). The same rabbi was accustomed, before the eve of the Fast of Ab, to eat a crust of dry bread with salt and water while sitting near the stove, the most despised part of the house. This, with some modifications, was also incorporated among Jewish customs (Oraḥ Ḥayyim, 552, 6). Women were accustomed not to work on Saturday night until the "Habdalah" had been recited; or on new moons, or on Ḥanukkah while the candles were burning (Yer. Pes. iv. 1; Oraḥ Ḥayyim, 299, 10; Isserles' gloss, 417, 1, 470, 1).

While custom was thus regarded as very sacred and binding, the Rabbis were nevertheless careful to distinguish between custom and law (Yeb. 13b; Niddah 66a; Ta'an. 26b). New customs, although tolerated, were not regarded favorably; for the Rabbis aimed chiefly at unanimity and uniformity. It was a principle with them—fancifully derived from the expression "Lo titgodadu" (Deut. xiv. 1)—that there should be no division in custom and observance, although violations of this were unavoidable and frequent. They considered an erroneous custom to be one that had no basis in the Torah, and such they were ready to discard ("Ḳiẓẓur kelale ha-Talmud"; compare Yer. Pes. iv. 1).

Development of Custom.

As the Jews after the completion of the Talmud, wandered farther away from the centers of Jewish learning in Babylon, their customs became more and more divergent. Local usages grew up in every community, which were held in veneration by the people. Even the Geonim, who had a strong influence over the Jews of the Diaspora between the seventh and eleventh centuries, did not wish to tamper with the local "minhagim." They even frequently advocated the retention of a custom of which they themselves disapproved. In the course of time the customs increased in number; and the differences between them became very marked and portended danger of schism. Superstitions prevalent among the people of the dark ages frequently crept in among Jewish usages; and the Rabbis then became alarmed, and began to raise their voices against the multiplicity of customs. Maimonides vigorously decried this "minhag sickness," as Güdemann calls it, and Rabbenu Jacob Tam (1100–1171) said, in his epigrammatic style, that "minhag," when inverted, spells "gehinnam"; and that if fools are accustomed to do certain things, it does not follow that the wise should do likewise. During the thirteenth and fourteenth centuries many scholars endeavored to trace the origin of and the reason for the different customs; and a critical spirit prevailed even in the responsa of that period. This effort, the personal example of famous rabbis, and the synods that assembled at different places during that period, greatly helped toward introducing some uniformity in Jewish customs. The most important figure in this age is MhRIL, or Rabbi Jacob Levi Molin, who was born in the middle of the fourteenth century in Mayence and died in Worms in 1427. His book on minhagim, which was published after his death, became the standard for many generations for synagogal and communal customs (see Güdemann, "Gesch. des Erziehungswesens," iii.).

Sephardim and Ashkenazim.

Of far greater consequence than all these local differences of custom is the division between the Sephardim (Jews adhering to the Spanish and Portuguese ritual) and the Ashkenazim (those adhering to the German and Polish rituals). These differ not only in minor customs and observances, but also in the pronunciation of Hebrew and in their liturgies. The Sephardim have retained the pronunciation of Judea, while the Ashkenazim are considered to have brought with them the language of Galilee. They also differ in the manner of intoning their prayers; the Sephardim still maintaining the old Oriental chants, while the Ashkenazim have permitted a strong European element to enter into their synagogal music. The important portions of the service are alike in both, with some possible variations of words and phrases; but in the prayers of later origin the divergence is very great. The Ashkenazim are supposed to have brought their prayer-book from Tiberias, Galilee, the earliest authority for which is the Maḥzor Vitry (1208), while the Sephardim are supposed to have brought theirs from the Babylonian schools of the ninth century (R. Amram, "Siddur"; see Amram ben Sheshna). R. Joseph Caro, the compiler of the Shulḥan 'Aruk, himself of Spanish origin, in his code followed the Sephardic customs to a very large extent. This fact induced R. Moses Isserles of Cracow to add his annotations, remarking especially the more rigorous customs prevailing in the Ashkenazic Jewish communities. The Shulḥan 'Aruk, which first appeared in 1565, became, therefore, the standard in law and custom for all Jewry (see Caro, Joseph).

The Cabala, which flourished among the medieval Jews, left an indelible impress upon the customs of the people. Besides the many new customs that were introduced in its wake, many of the old ones changed their form and meaning by receiving cabalistic interpretations (compare Ḥul. 105b). Even the learned and the scholarly were influenced by its mysterious teachings, and in preparing their codes of laws and in writing their responsa on religious questions, evil spirits, magic, combinations of letters and words to produce certain effects were taken into account. This spirit crept even into the prayer-book, provided amulets for infants, regulated the manner of putting on the garments in the morning, washing the hands, and so forth (Oraḥ Ḥayyim, 3, 3, 11; 4, 2, 12, 19). The customs adopted by some of the great cabalists were collected and published to serve as a guide to their followers ("Minhag ha-ARI" = The Customs of R. Isaac Luria).

The Cabala is still of great value and of much influence in the lives of the Ḥasidim, a sect numbering hundreds of thousands of Russian, Galician, and Rumanian Jews. Founded by Israel Ba'al Shem in the beginning of the eighteenth century, this sect has since grown to very large proportions, in spite of the "mitnaggedim"—the rabbis and communities that opposed them. Although they do not discard the laws and customs of the Shulḥan 'Aruk, they still attach more importance to worship than to religious observance. In their service they follow to a large extent the Sephardic ritual, although they have retained the Ashkenazic pronunciation of Hebrew (see Ḥasidim; Ba'al Shem-Ṭob).

At the beginning of the nineteenth century a movement was set on foot among German Jews to introduce reforms in the Jewish service. Originating as it did with the rejection of a portion of the beliefs upon which the old service was founded, the movement also extended to other aspects of Judaism, and resulted in a change not only in the form of synagogal worship, but also in the practise and observance of the religious laws of the Jews. New customs were instituted, such as confirmation at the Feast of Shabu'ot, instrumental music on Sabbaths and on holidays, and so forth. Since the beliefs varied in different communities, the practise also varied; and although the Reform movement counts to-day many votaries in Europe and in America, there is not yet any uniformity in custom. Old Jewish usages, however, still survive in the majority of communities, frequently modified to suit modern requirements. See Reform; Ritual; Conferences, Rabbinical.

CUSTOMS. See Bridegroom of the Law; Burial; Cemetery; Childbirth; Folk-Lore; Funeral Rites.

CUTHAH or **CUTH** (Hebrew, כות, כותה; LXX., Χουθά; Eusebius and Jerome, Χωθά; Assyrian, "Kutu"): One of five cities from which Sargon, King of Assyria, brought settlers to take the places of the exiled Israelites (II Kings xvii. 24, 30). These settlers were attacked by lions, and interpreting this to mean that their worship was not acceptable to the deity of the land, they asked Sargon to send some one to teach them, which he did. The result was a mixture of religions and peoples, the latter being known in the Talmud as כותים ("Cuthim") and כותיא ("Samaritans"). They "are called in the Hebrew tongue 'Cutheans,' but in the Greek 'Samaritans'" (Josephus, "Ant." ix. 14, § 3). In the Assyrian inscriptions "Cutha" occurs on the Shalmaneser obelisk, line 82, in connection with Babylon. Dungi, King of Ur, built the temple of Nergal at Cuthah (Schrader, "K. B." iii. 81a), which fell into ruins, so that Nebuchadnezzar had to rebuild the "temple of the gods, and placed them in safety in the temple" (*ib.* 51b). This agrees with the Biblical statement that the men of Cuthah served Nergal (II Kings xvii. 30). Cuthah has been identified with the ruins of Tell Ibrahim, northeast of Babylon, uncovered by Hormuzd Rassam. The site of the Nergal temple can still be pointed out. Josephus places Cuthah, which for him is the name of a river and of a district ("Ant." ix. 14, §§ 1, 3), in Persia, and Neubauer ("G. T." p. 379) says that it is the name of a country near Kurdistan. See Schrader, "C. I. O. T." pp. 270 *et seq.*

E. G. H. G. B. L.

CUTTINGS: In Biblical usage, incisions or gashes in the flesh. The Law forbids the Israelites to make any cuttings in the flesh. For this operation two terms are used: "hitgoded" (Deut. xiv. 1) and "saraṭ" (Lev. xix. 28). From the context of these passages it is plain that some connection obtained between the practise so prohibited and the customs of mourning. In the days of Jeremiah such cuttings in the flesh seem to have been the prevalent method of manifesting grief at the death of kindred. The custom is anything but offensive to the prophet; for he mentions (Jer. xvi. 6) the impossibility of mourning for the dead in the usual way as one of the dire penalties awaiting the disobedient people. Other passages confirm the prevalence of this custom as a demonstration of grief and mourning (*ib.* xli. 5, xlvii. 5). From Biblical and other sources it is known that the practise was common to other peoples. Passages in Jeremiah (xlvii. 5, xlviii. 37; compare Isa. xv. 2) prove it to have been customary among both the Philistines and the Moabites; for the Arabs it is attested by Wellhausen ("Reste Arabischen Heidentums," p. 181), and it is still practised by the Persian Mohammedans at the annual celebration in memory of Ali, Ḥasan, and Ḥusain.

The assumption that this peculiar habit resulted from a desire to emphasize sorrow is insufficient; and the prohibition is certainly not founded on the idea that such excesses of grief were displeasing to God. The practise is interdicted as "defiling." This term suggests that the rite had originally some significance of a ritual character, and was part of a scheme of worship. This is apparent in I Kings xviii. 28, where the priests of Baal at the sacrifice cut their flesh in order to bring about the gracious reception of their offering and to elicit from their god an answer to their prayer. Some such meaning the custom must have had in the remote days of Israel. The prophet Hosea (vii. 14) reproaches the people because, contrary to the commandment of Yhwh, they made cuttings in the skin in order to obtain wheat and wine (the reading of the LXX. = יתגודדו).

A still earlier purpose than that of winning the favor of the Deity must be sought. Originally the custom was connected with the worship of the spirit of the departed. The tearing of the garment as a sign of mourning is a modification of the primitive ritual customs associated with the cult of the dead. In Assyrian is found the cognate verb for the Hebrew "saraṭ," in the sense of rending one's garment (see Delitzsch, "Assyrisches Handwörterbuch," *s.v.* "Sharaṭu"), the garment being a later substitute for the skin, which in primitive days was slashed and cut in honor of the dead. When the Law (Deut. and Lev.) prohibited this custom, the original association with the cult of the dead may no longer have been present in the mind of the people. It was, however, regarded as a heathenish practise, belonging to the service of Baal; and as such it was objectionable, and called for suppression.

Tattooing (marking the skin by pricking in pigments) is even at the present time a custom much in vogue in the Orient. It seems also to have been occasionally practised among the Israelites and other peoples of Bible days (Jer. xlvii. 5, xlviii. 37). It is prohibited in Lev. xix. 28.

For the custom of cutting the hair—also prohibited, and probably of similar origin—and its connection with funereal cults, see Hair.

CUZZERI, SEMA (צמח קוצר): Italian poet; resident at Padua. He witnessed the terrible attack on the ghetto of Padua on Aug. 20, 1684. He portrays the sorrows of that time in an Italian poem entitled "L'Innocenza Illesa," and narrates the horrible cruelties recorded in Isaac Cantarini's "Paḥad Yiẓḥaḳ"; he describes in detail the ghetto of Padua and the persecutions that occurred there, and defends the Jews against the groundless accusation, made at that time, of cruelties committed against the Christians of Budapest. The contents of the still unpublished poem are given in Antonio Ciscato's "Gli Ebrei in Padova," pp. 203 *et seq.* (Padua, 1901).

G. I. E.

CYMBALS: Musical instruments of percussion. The term is used in the A. V. in all passages except one (Zech. xiv. 20) as the rendering of the Hebrew "ẓelẓelim" and "meẓiltayim." Known to most nations of antiquity, cymbals served to mark time or rhythm at dances or for singers and other musical performers. This is also their function in the Bible. In Ezra iii. 10 they accompany "ḥaẓoẓerot" (trumpets) only; but elsewhere they are mentioned in connection with several other instruments. They were prominent in the music at religious ceremonies (I Chron. xv. 16, 19; II Chron. v. 13, xxix. 25; Neh. xii. 27). Levites were set apart as cymbalists (I Chron. xvi. 42).

One Pair in the Temple.

Cymbals were made of brass (I Chron. xv. 19; Josephus, "Ant." vii. 12, § 3; Yer. Suk. v., end), or of copper with a slight admixture of silver, to judge from a pair found in an Egyptian tomb. They varied considerably in size. Among the Arabs two different sets are in use: one, of a large diameter, at religious ceremonies; the other, of smaller size, to accompany the dance. A similar difference seems to be indicated by the several qualifications of the cymbals mentioned in Ps. cl. 5; viz., "high sounding" ("ẓilẓele teru'ah") and "loud" ("ẓilẓele shema'"). The fact that Josephus (*l. c.*) describes only one kind, *πλατέα* and *μεγάλα* ("broad" and "large"), has not been without weight in shaping the opinion that, as among the Arabs, so among the Hebrews, only the broad sort—*i.e.*, those of large diameter—were permitted at holy offices. The Mishnah, too ('Ar. 13a; compare Gem. 13b), is emphatic in stating that only one pair was used in the Temple. The "loud" (shema') cymbals have, in consequence, been explained as castanets, *i.e.*, four small plates fastened to the thumbs and forefingers of both hands (= *κρέμβαλα*, "seistra"; see Pfeiffer, "Ueber die Musik der Hebräer," p. 54)—but there is no warrant for the assumption (see illustrations in "Psalms," ed. Haupt, "S. B. O. T." pp. 232, 233).

The cymbals in use in the Second Temple were credited by the Rabbis of the Talmud with great antiquity, and had undergone repairs impairing the quality of the tone (Yer. Suk. v., end). Still their loud and far-carrying sound was also remembered (*ib.* 55c, below; Tamid 30b). The Temple cymbals were in charge of a special officer: Ben Arza is mentioned in this capacity (Sheḳ. v. 1; Yer. Sheḳ. 48a). His instruments gave the signal for the Levites to chant the psalms (Tamid vii. 3, 4). The verb used to denote playing on the cymbals is "hiḳḳish" (הקיש), which, in connection with the preposition "upon" (על) occurring in some passages (where, however, other readings have ב = "with"), may possibly indicate that the instrument in the Temple consisted of only one plate, which was stationary, and was beaten by the performer with a clapper or hammer. In confirmation of this view the fact may be considered that, while in Biblical Hebrew the name is a plural (?) or a dual, in later Mishnaic it occurs as a singular.

In Zech. xiv. 20 the Authorized Version renders the Hebrew words "meẓillot ha-sus" by "bells," while the Septuagint has "bridles" (see Bridle), and the Targum translates them as "blankets"; *i.e.*, caparisons. Rashi explains that reference is here made to נקישות ("clappers," or clapper-like, globe-shaped balls of metal), which, as he suggests by his translation into French, "tinter," emit a jingling sound—an explanation which Ḳimḥi, quoting Rabbi Eleazar b. Pedath (Bab. Pesaḥim 50a), accepts. The use of such contrivances to ornament horses' trappings is common in the Orient. In fact, "ẓilẓol," in Talmudic Hebrew, is the name of a belt (hence the LXX. "bridle") ornamented with such clappers, worn by women of ill repute and indicative of their trade (Midr. R. to Esther i. 11; Soṭah 9a).

Perhaps the allusion in I Cor. xiii. 1 is also to this custom. The *κύμβαλον ἀλαλάζον*, taken as denoting such an attachment to a belt of this kind and purpose, expresses most strongly and strikingly the underlying thought of the passage.

E. G. H.

CYPRESS: Generally, the tree known to botanists as *Cupressus sempervirens*, and common to southern Europe and western Asia. In modern Palestine the cypress is frequently found in the neighborhood of towns, and is often planted in cemeteries. There is some confusion as to which Hebrew word connotes the tree so named. In the A. V. the word "tirzah" (Isa. xliv. 14) is rendered "cypress," the context showing that a hardwood-tree is intended. The R. V., however, has abandoned this translation and adopted "holm-tree." On the other hand, a marginal note to Isa. xli. 19 (comp. lx. 13) suggests "cypress-tree" as a better equivalent than the usual "box-tree" for the Hebrew "te'ashshur" (תאשור), while in II Sam. vi. 5 it is proposed to read "cypress" instead of "fir" for the Hebrew "berot."

The older tradition, which favors the identification of the te'ashshur with the cypress, is fairly reasonable. The Arabs distinguish two classes of cypress-trees. One they call "sharbin," also known as the "tar-tree," because tar is derived from it; it is distinguished by broad branches that spread out on both sides of the trunk. The other class is called "sarw" ("sarwah"), and is of a very straight growth. Both names are derived from a root meaning, according to Fleischer, "to loom up high." Corresponding to "sharbin" is the Assyrian "surwan," also "shurmenu," which is the Syriac "shurbina" (written also "sharwina") and the Targumic "shurbana"; it is the tree known in the Talmud as "turanita." While some of the ancient authorities assume that this species is the cedar, or the *Juniperus oxycedrus*, others render it by the Greek *κυπάρισσος*. The "sarw" ("sarwah"), for which the Syriac has the same name as for the "sharbin," is the *Cupressus sempervirens*, known also as *C. fastigiata*, or, according to Linnæus, *C. pyramidalis*. Though the original distinction has not been clearly maintained in the cognate languages, it is proper to base upon it the difference between the tree designated in Hebrew by "te'ashshur" and that known as "berosh." The te'ashshur is the variety called in Arabic "sarw"—*i.e.*, the straight-growing—while the berosh is the tree known in Arabic as "sharbin," with branches spreading out. The "tirzah," also, is probably a tree of this family. The wood of the cypress was highly valued, and was used in the construction of ships (Ezek. xxvii. 5), of floors and doors, as well as for lances. Even musical instruments were made of this wood (II Sam. vi. 5). As in the Bible, so also in Assyrian inscriptions, the cypress is frequently mentioned in connection with other trees, but most generally with the cedar.

If the exact value of the Biblical names be in doubt, the accurate determination of the meanings of the terms occurring in the Mishnah and Talmud in designation of trees of the evergreen class is involved in still greater uncertainty. Etymological equivalents of these Biblical names can be found, and other words have been added, but which of them indicates the cypress, or either of the two kinds named, can not be definitely determined. "Berosh," in Tan. to Terumah ix., is explained as the pine; in other passages (B. B. 80b; Giṭ. 57a; R. H. 23a) the cypress is named "toranita," which, again, in the catalogue of the fourteen or twenty-four kinds of evergreen trees (Ket. vii. 31c), is held to be the acacia ("shiṭṭah").

A curious custom may be mentioned in this connection: In Bethar, when a boy was born a cedar-tree was planted; when a girl, a cypress (Rashi, "pine"; Giṭ. 57a). A new name for the cypress seems to be "ashuḥa," the "female" cedar or the cypress. It is plain, however, that the Rabbis understood by the various names which designated the cypress-tree, a tree of great endurance and hardness. An old saw illustrates this: "Why was this stone placed near the cypress?" (Peah viii. 20d); the meaning being, Why put one hard substance near another? or, Why ask puzzling questions?

E. G. H.

CYPROS: Wife of King Agrippa I., daughter of Phasaelus and Salampsio, and granddaughter of Herod I. She had three daughters, Berenice, Mariamne, and Drusilla; and two sons, Agrippa and Drusus, the latter dying in childhood (Josephus, "Ant." xviii. 5, § 4; *idem*, "B. J." ii. 11, § 6). When Agrippa I., while still a prince, was on the point of committing suicide in Idumæa because of his poverty and debts, his wife Cypros restrained him, and bade him appeal for assistance to his half-sister Herodias, Princess of Galilee ("Ant." xviii. 6, § 2). The alabarch Alexander Lysimachus, while refusing Agrippa's request for the loan of a certain sum wherewith to pay his debts, granted the money to his brave and clever wife Cypros (*ib.* 6, § 3).

G. S. Kr.

CYPROS: A woman of noble Arabian family; married about 75 B.C. the Jewish governor Antipater, to whom she bore five children, Phasaelus, Herod (afterward king), Josephus, Pheroras, and Salome (Josephus, "Ant." xiv. 7, § 3; *idem*, "B. J." i. 8, § 9). Once when Herod had to go to Augustus, he gave his mother, Cypros, and his sister into the care of his brother Pheroras, and had them taken to Masada ("Ant." xv. 6, § 5); but his wife Mariamne and the latter's mother, who looked down haughtily upon Herod's mother and sister ("B. J." i. 22, § 3), had to be sent to a different place. Κύπρις ("Cypris") is found as a variant of Κύπρος. Herod built a fortified and pleasant retreat near Jericho and called it "Cypros" in honor of his mother ("Ant." xvi. 5, § 2; "B. J." i. 21, § 9). This stronghold was destroyed at the beginning of the Jewish war under Nero (compare Mussafia, "Cyprus," in Kohut, "Aruch Completum," vii. 169).

G. S. Kr.

CYPRUS: The large island in the easternmost basin of the Mediterranean, probably deriving its name from the Cyprus flower (Κύπρος), the Hebrew appellation of which is כפר. Josephus states ("Ant." i. 6, § 1) that the island, called כתים in Hebrew, was named after the city "Ketion" or "Kition." Nevertheless the term "isles of Kittim" (Jer. ii. 10; Ezek. xxvii. 6) indicates that "Kittim" signified all the islands and coastlands of the West, and, according to I Macc. i. 1 (Χεττείμ) and viii. 5 (Κιτιέων βασιλέα), included Macedonia, and, according to Dan. xi. 30, even Italy. The inhabitants of Cyprus were at first, perhaps, Carians; in historical times, Phenicians; and later, Greeks. During the last period, as the Judean Agrippa writes to the emperor Caius, the Jews were numerous there (Philo, "Legatio ad Caium," 36; ii. 587, ed. Mangey). They stood in intimate relationship with the inhabitants of the island, and the favorable decree of the Romans regarding Jewish subjects was sent also to Cyprus (I Macc. xv. 23). During the war over the city of Ptolemais between Alexander Jannæus and Ptolemy Lathyrus, King of Cyprus, the Jews suffered severe losses, and Cleopatra III. of Egypt, mother of the Cyprian king, despatched her Hebrew commanders Chelkias and Ananias to the aid of Alexander Jannæus, who thereupon defeated the Cyprians. Referring to this event, Josephus ("Ant." xiii. 10, § 4) quotes the statement of Strabo that the Jews of Cyprus remained steadfast in their allegiance to the party of Lathyrus, notwithstanding the high favor shown them by Queen Cleopatra.

In Hasmonean Times.

In Cyprus as in Egypt, the Jews fared well at this time; and a distinguished Cyprian Hebrew, Timius by name, married Alexandra, daughter of Phasaelus and Salampsio, the latter a granddaughter of Herod the Great. This union, however, was without issue ("Ant." xviii. 5, § 4). Christianity was preached here among the Jews at an early date, Paul being the first, and Barnabas, a native of Cyprus, the second, to disseminate the new doctrine (Acts iv. 36, xi. 19, xiii. 5, xv. 39); and according to a legend Barnabas was killed here by the Jews ("Acta Barnabæ," § 23). There is also an account, agreeing well with what is known from classical authors concerning the fertility of Cyprus, that Queen Helen of Adiabene had fruit brought from the island to Jerusalem. Under the leadership of one Artemion, the Cyprian Jews participated in the great uprising against the Romans under Trajan (117), and they are reported to have massacred 240,000 Greeks (Dio Cassius, lxviii. 32). This

In Roman Times.

insurrection was finally quelled after considerable bloodshed (perhaps by Q. Marcius Turbo, who suppressed the uprising in Cyrene and Egypt), with the result that the Jews of Cyprus were almost entirely extirpated. The blood of the Jews slaughtered in Palestine is said to have streamed as far as Cyprus (Lam. R. i. 16, iv. 19); that is, the insurrection and the consequent slaughter of the Jews extended to Cyprus. In further punishment a severe law was enacted, according to which no Jew was thereafter to be permitted to land on Cyprian soil, not even in case of shipwreck; nevertheless Jewish residents were still to be found upon the island at a later period; and the products of the soil, to which Talmudists frequently refer (for instance, the "cumin" of Cyprus, Yer. Dem. ii. 1), were probably brought into the market by them. So rapidly did the Jews multiply that in 610 they were sufficiently numerous to participate in the insurrection against the Greeks under Heraclius.

A scholar, Moses of Cyprus by name, is said to have been arbitrator (in the eleventh century) between the Armenians and the Greeks ("Zeit. für Hebr. Bibl." vi. 116). Benjamin of Tudela found in Cyprus a number of Jewish communities, one of which was guilty of the heresy of observing the Sabbath from Saturday morning to Sunday morning, instead of from Friday evening to Saturday evening. Judah Mosconi also visited the island, as did Menahem ben Perez (Zunz, "Gesam. Schriften," i. 168). In 646, and again in 1154, Cyprus was devastated by the Arabs; in 1571 it was annexed by Turkey, having been wrested from the Venetians on the advice of Don Joseph Nasi, who came near attaining to the dignity of the Cyprian crown (Hammer, "Gesch. der Osmanen," iii. 564). In 1878 Cyprus came under English rule.

Recent Colonization.

During the last twenty years of the nineteenth century several attempts were made to colonize Russian and Rumanian Jewish refugees in Cyprus. The first attempt, in 1883, was made by Friedland, and a settlement of several hundred Russians was effected in Orides near Papho. In 1885, 27 Rumanian families settled in the island as colonists, but were not successful (see "Ha-Meliẓ," 1888, No. 71, col. 1136). Nothing daunted, Rumanian Jews in 1891 again bought land here, though they did not themselves emigrate. Fifteen Russian families under the leadership of Walter S. Cohen founded a colony in the year 1897 at Margo, with the help of the Ahawat Zion of London and the Jewish Colonization Association; and in the year 1899 Davis Trietsch again advocated colonization in Cyprus, especially for Rumanian Jews. As a delegate to the Third Zionist Congress at Basel, in Aug., 1899, he attempted to get an indorsement of the project from the congress; but he was met by a decided refusal ("Stenographisches Protocoll des III. Zionisten-Congresses," p. 232). He nevertheless persevered, inducing a dozen Rumanian Jews and, in the spring of 1900, twelve of the Boryslav miners to emigrate to the island. Twenty-eight Rumanian families followed these; and the colonists received assistance from the Jewish Colonization Association. These settlers have farms at Margo, and at Ashcriton ("Jewish Chronicle," April 20, 1900, p. 18). The colonists in Cyprus have not prospered; and it is said that the government is opposed to a wholesale immigration of Rumanians ("Bulletin All. Isr." 1900, No. 25, 32). Notwithstanding these reverses, the Jewish Colonization Association has continued to give a small support to the work in Cyprus.

In 1900 there were 36 persons living at Margo ("Palästina," i. 65). In 1902 a pamphlet was presented to the Parliamentary committee on alien immigration in London, bearing the title "The Problem of Jewish Immigration to England and the United States Solved by Furthering the Jewish Colonization of Cyprus." In 1901 the Jewish population of the island was 63 males and 56 females. See W. Bambus, "Jüd. Kolonisation in Cypern," in "All. Zeit. des Jud." 1899, p. 436.

G.

CYRENE: A large and important city in Cyrenaica, the district of Upper Libya on the north coast of Africa, west of Egypt. Cyrene was one of the five large cities that gave to this region the name of "Pentapolis" (compare Josephus, "B. J." vii. 11, § 1; Targ. Yer. Gen. x. 13, 14; Targ. I Chron. i. 12). Many Jews went from Egypt to Cyrenaica, for even Ptolemy I. Lagus sent Jewish settlers to Cyrene and other cities of Libya (Josephus, "Contra Ap." ii. 4). According to Strabo (cited by Josephus, "Ant." xiv. 7, § 2), the inhabitants of Cyrene at the time of Sulla (*c.* 85 B.C.) were divided into four classes: citizens, farmers, resident aliens, and Jews; and the extant fragments of the same author show that Lucullus was sent to Cyrene by Sulla to quell disturbances in which the Jews were taking a prominent part. When concessions to the Jews were recommended by the Romans to the various authorities of the East (I Macc. xv. 15–24), the city of Cyrene was among those that received such notification. In 74 B.C. Cyrene was created a Roman province; but, while under the Egyptian kings the Jews had enjoyed equal rights (*ἰσονομία*), they were now oppressed by the autonomous Greek population ("Ant." xvi. 6, § 1).

Several Jews of Cyrene are known to history, among them being Jason of Cyrene, whose work is the source of the Second Book of Maccabees (see II Macc. ii. 23), and Simon of Cyrene, who carried Jesus' cross (Matt. xxvii. 32; Mark xv. 21; Luke xxiii. 26). In the Acts of the Apostles several Cyrenians are mentioned as being present at the Feast of Pentecost in Jerusalem (Acts ii. 10), where they had their own synagogue (*ib.* vi. 9). Some, including Lucius (*ib.* xiii. 1)—said to have been the first Bishop of Cyrene—went to Antioch (*ib.* xi. 20).

The Jews of Cyrene were in close touch with their brethren in Palestine, and were free to forward their offerings to Jerusalem ("Ant." xvi. 6, § 5). Agrippa sent a letter written in their favor to the Cyrenians ("B. J." ii. 16, § 4). Three sons of a certain Ishmael—who was beheaded in Cyrene—were present at the siege of Jerusalem (*ib.* vi. 2, § 2); and after the war had been ended in Syria, the Romans still met with opposition in Cyrene, where the Sicarian Jonathan incited the Jews to a riot. The disturbance was, however, quickly suppressed by the governor Catullus ("B. J." vii. 11, § 1; "Vita," § 76).

More serious was the insurrection of the Jews of Cyrene under Trajan (117 C.E.). This was quelled by Marcius Turbo, but not before about 200,000 Romans and Greeks had been killed (Dio Cassius, lxviii. 32). By this outbreak Libya was depopulated to such an extent that a few years later new colonies had to be established there (Eusebius, "Chronicle" from the Armenian, fourteenth year of Hadrian). Bishop Synesius, a native of Cyrene in the beginning of the fifth century, speaks of the devastations wrought by the Jews ("De Regno," p. 2).

The Targum (Amos i. 5, ix. 7) identifies Cyrene with the Biblical Kir; but this is suggested only by a similarity of sound, and is not warranted (compare Targ. II Kings xvi. 9, and Payne Smith, "Thesaurus Syriacus," p. 3564). Cyrene fell into ruins in Mohammedan times. The spot is now (1902) marked by the village of Grenne or Kurin, in the province of Barka.

G. S. KR.

CYRIL (called also **Constantine the Philosopher**): Apostle of the Slavonians and author of the Slavonic alphabet (Cyrillitza), which is probably a modification of an older Slavonic alphabet (Glagola); born at Salonica about 820; died in Rome Feb. 14 869. His baptismal name was Constantine, and on account of his learning he was called "the philosopher." In his last days he became a monk, and took the name Cyril, by which he is generally known. When the empress regent, Theodora the Byzantine, received in 848 a deputation from the king of the Chazars, with the request to send him a learned man to conduct a religious controversy with the Jews and Mohammedans, Cyril and his elder brother Methodius (died 885) were chosen for the mission. On their way they stopped at Kherson (Chersonesus), and Cyril acquired a knowledge of the Hebrew language and literature from the Jews of that place. He then translated into Slavonic the Old Testament and "eight parts" of the Hebrew grammar.

According to Archbishop Filaret, in his treatise on Russian theological literature entitled "Obzor Russkoi Dukhovnoi Literatury," published in "Uchonyya Zapiski Vtorovo Otdyelyeniya Akademii Nauk," iii. 1, 3, the philosopher translated the "eight parts" of the grammar from Hebrew into Greek. This translation is now lost, as is also his work on the controversy with the rabbis, which his brother Methodius translated into Slavonic. A. Harkavy, in his treatise "Slyedy Znakomstva s Yevreiskim Yazykom," etc., on traces of the knowledge of Hebrew in the ancient Russian writings, is of the opinion that the grammar referred to was translated from Greek into Slavonic.

Owing to the friendship existing at that time between the Byzantine empire and the kingdom of the Chazars, it was natural that Constantine should succeed in converting a couple of hundred heathens and Greeks to the Greek Catholic Church; the majority of the people, however, remained Mohammedan, and the king and his court still confessed Judaism at about the middle of the tenth century, as is seen from the letter of King Joseph to Ḥasdai ibn Shaprut, dated about 960.

T. H. R.

CYRUS (Persian, "Kurush"; Babylonian and Susian, "Kurash"; Hebrew, כרש and כורש; Masoretic, "Koresh"; Greek, Κῦρος): The founder of the Persian empire. The name is also found in India as "Kurus," and is evidently Aryan. The translation "sun" given by Ctesias (in Müller's edition of Didot's "Herodotus," fragm. 29, 49) is due to a confusion with a Persian word, which appears in Zend as "huare."

Sources.

Persian tradition has surrounded the founder of the empire with many myths. Herodotus, writing about 430 B.C., says (i. 95) that four different stories were current concerning the origin of Cyrus. One of these, to the effect that he was exposed as a child and suckled by a she dog, is rejected by Herodotus (i. 122). It is found, however, in an ancient Greek author (probably Charon of Lampsacus; see Gutschmid, "Kleine Schriften," v. 66), from whom it was borrowed by Dinon, and from the latter again by Trogus Pompeius. This myth, in various forms, is current among many peoples, the most familiar example being the story of Romulus and Remus. It was in all probability narrated of Kai Chosrau, the mythical king, long before Cyrus (Nöldeke, in "Grundriss der Iranischen Philologie," ii. 132 *et seq.*). The second version which Herodotus examines is the rationalistic transposition of the first; and here the she dog is metamorphosed into a shepherdess of the name of Spako. In Herodotus, another myth, in which Cyrus is the son of a Persian named Cambyses and of Mandane, daughter of the Median king Astyages, is blended with the preceding. In this myth a dream (which Sophocles has embodied in his "Electra," verse 422) foretells that the son of Mandane is to conquer all Asia. The kingship of Cyrus is legalized in this narrative, which makes him the lawful successor of the Median kings. This narrative of Herodotus was controverted about 390 B.C. by Ctesias, who states that Cyrus was not related to Astyages, but that, after dethroning him, he married Astyages' daughter Amytis. This statement is probably correct. Other and purely mythical narratives, probably originating with Ctesias, are contained in the fragments of Dinon (*c.* 340 B.C.) and of Nicolaus

Damascenus (under Augustus). The story or novel entitled "Cyropædeia," which Xenophon wrote in his old age (after 360), has no value for the historian.

Herodotus has, however, retained, in addition to the legendary features, the historical statement that Cyrus was descended from an old royal family of Persia (i. 125, vii. 11). As regards the deeds and conquests of the king, the traditions in Herodotus are correct, although several features suggest mythological embellishments. Concerning the death of Cyrus, Herodotus knew many traditions (i. 214); yet he relates only those which appear to him the most credible. In Ctesias, however, the traditions are extravagant and distorted.

Thoroughly trustworthy historical accounts of the wars of Cyrus against Babylon, and the manner of his death, are preserved in the fragments of the Babylonian historian Berosus (*c.* 280 B.C.); while his dealings with the Jews are recorded in the Old Testament. Of the monuments erected by the Persians to his memory, only his tomb now remains. A number of authentic records have, however, been brought to light in Babylon. Among these are: (1) references in the inscriptions of Nabonid; (2) the so-called "Cylinder of Cyrus," or the proclamation which Cyrus issued to the inhabitants of Babylon after the conquest of that city (Rawlinson, "Cun. Inscr. of Western Asia," v. 35); (3) the annals of Nabonid, the last king of Babylon, which were collected after his death, and which contain a summary of the events of his reign; and (4) about 400 private Babylonian documents, dated according to the years of Cyrus' reign.

Foundation of the Persian Empire.

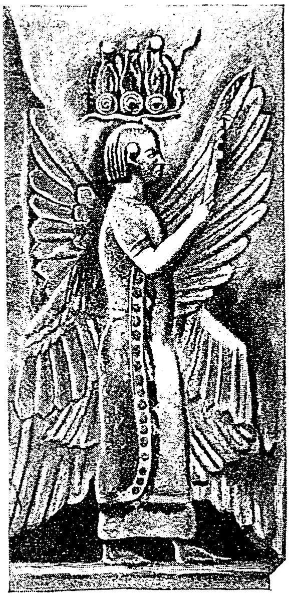
The Persians dwelling along the southwestern spurs of the Iranian highlands, the Farsistan of today, became divided into a number of tribes, enumerated by Herodotus (i. 125). Among these tribes were the Pasargades in the district watered by the River Araxes (now Kur or Bendamir) and by its principal tributary, the Medos or Kyros (Pulwan), where, later, the city of Persepolis (Istakhr) was founded. This tribe was ruled by the dynasty of the Achæmenidæ, to which Cyrus belonged.

In the middle of the sixth century all Iran, and very likely also the kingdom of the Achæmenidæ of Anshan, were subject to the Median kingdom. Nabonid (Rawlinson, *l.c.* v. 64, line 29) designates Cyrus as a petty vassal of the Median king Astyages. According to Herodotus (i. 214), Cyrus was king for twenty-nine years; he therefore succeeded his father in 558. Ctesias and Dinon (fragm. 10), like Justin (i. 8), give him thirty years. Ctesias' dates for this period are, however, unreliable. For the chronology of the Persian kings see E. Meyer, "Forschungen zur Alten Gesch." ii. 437 *et seq.* In 553 Cyrus revolted against Astyages, the date being firmly established by the above-mentioned passage of Nabonid. On the events of the war there is little information. If a few Greek sources, dating back to Ctesias and Dinon, are reliable (Polyænus, vii. 6, 1 [= c. 45, 2], 9; Nicolaus Damascenus, fragm. 66; Justin, i. 6), the Persians were at first repeatedly defeated, but finally gained a victory at Pasargadæ (compare Anaximenes in Stephan of Byzance, "Strabo," xv. 3, 8). According to the annals of Nabonid, the troops of Astyages, in 550 B.C., revolted against their king, whom they took captive and delivered up to Cyrus (this is probably the origin of Herodotus' story of the treachery of Harpagus); Cyrus thereupon invested the city of Ecbatana, and carried off the spoils to Anshan.

Cyrus and the Medes.

In the rising of Cyrus against the Medes only three of the Persian tribes participated—the Pasargades, Maraphians, and Maspians; and it was only after the victory that the whole people became united (compare E. Meyer, "Gesch. des Alterthums," iii. 10). This explains why in the annals of Nabonid Cyrus is thereafter no longer designated as "King of Anshan," but as "King of Persia."

The rise of Cyrus was at first hailed by Nabonid as propitious; for not only was the danger threatened by the Medes thereby removed, but it also became possible to occupy Ḥarran, and to rebuild the temple of Sin, which had been destroyed (Rawlinson, *l.c.* v. 64; compare Scheil, "Recueil de Travaux Egyptiennes et Assyriennes," xviii.; and Messerschmidt, "Stele Nabunaid's," in "Mittheilungen der Vorderasiatischen Gesellschaft," 1896, i. But the neighboring kingdoms soon became aware that the new state was more dangerous than the old one, united to them as the latter had been by means of treaties and dynastic alliances. Thus it came about that a powerful coalition was formed against Cyrus by Babylonia, Egypt, Lydia, and Sparta. The attack was commenced by Crœsus of Lydia in 546; but Cyrus anticipated his adversaries, and before their armies could unite, he defeated Crœsus and took him captive in his own capital, Sardis (546). In the following year the generals of Crœsus completed the subjugation of Asia Minor.



Portrait Sculpture of Cyrus.

(After Ball, "Light from the East.")

A war against Babylon was now inevitable. In 547 Cyrus had already crossed the Tigris below Arbela, and had conquered a state, the name of which is unfortunately obliterated in the annals of Nabonid. The crash came in 539. Nabonid was not the legitimate heir to the throne, but had been elevated thereto in 556–55 by the magnates, who had supported the incompetent Labashi-Marduk, the son of Neriglissar. The tenure of Nabonid had never been secure. He held aloof from Babylon, where he did not feel safe, and sought support among the people of the rural towns and their deities, which latter were as a rule much older than Babel and its god Marduk. The jealousy of the cities and of their priests was an important factor in the final catastrophe of the Chaldean empire, and materially facilitated the victory of the Persians. Upon the approach of Cyrus, Nabonid had the gods of Accad (Babylonia) brought to Babylon, thereby still further embittering the priesthood of that city against him (for the correct date—erroneously given in the chronicles of Nabonid as Tammuz—see E. Meyer, *l.c.* ii. 468 *et seq.*; Stade's "Zeitschrift," xviii. 339). Cyrus gained a victory, which incited rebellion in every part of the Babylonian empire. On Tishri 14 (Oct. 8) Gobryas and his Gutaean warriors occupied Sippara; two days later Babylon fell without a blow, and Nabonid was captured. On Marheshwan 3 (Oct. 27) Cyrus formally took possession of Babylon, but spared the city, and returned the rural gods to their respective towns. In his inaugural proclamation, preserved on the Cyrus cylinder, he attributes his victory to the grace of the god Bel-Marduk, who had overthrown Nabonid, and had sought out a just king who would restore the service and the honors due to the god.

Cyrus Conquers Babylon.

There can be no doubt that Cyrus and his Persians, like Darius at a later period, were faithful believers in the pure doctrine of Zoroaster, and disdainfully regarded foreign cults; that they had the consciousness of a superior religious belief, and relied upon the protection of Ahuramazda, the great god who had created heaven, earth, and man, and had placed the world at the feet of the Achæmenian kings. In a political sense, however, they were compelled to reckon with the religions of the subjugated peoples; and Cyrus and his successors skilfully employed this necessity as a means of securing their power. The time-honored customs of the people were everywhere preserved. Cyrus always conformed to the traditions of the thrones he usurped, and, together with his son Cambyses, rendered homage to the native deities. On the first day of the year, Nisan 1 (March 20), 538, in conformity with Babylonian custom, he grasped the hands of the golden statue of Bel-Marduk, and thus became consecrated as monarch. From this ceremony dates the first year of his reign as "King of Babylon, King of all the Lands."

His Religious Belief.

Upon the downfall of the Chaldean empire the foreign possessions, Syria, Phenicia, Palestine, and the border-lands of the desert, all became tributary to Cyrus. In 530 he placed his son Cambyses upon the throne as King of Babylon, and organized a great expedition against the predatory nomads of the Turanian steppes, in which expedition he met his death (528 B.C.). He lies buried in the midst of his tribe, in Pasargadæ, the Murghab of to-day. The frequently expressed doubt ("Z. D. M. G." xlviii. 653) as to the identity of Murghab with Pasargadæ appears unfounded, as does more particularly the assumption that the figure on the tomb represents the younger Cyrus, the brother of Artaxerxes II. Cyrus' tomb, restored by the Greeks in the time of Alexander, is still (1902) standing. On the pilasters, or galleries surrounding it, is the picture of the king, with four wings—typifying the soul, or "ferwer," of the great ruler—and a crown patterned on Egyptian models, and bearing the inscription, "I am Cyrus the king, the Achæmenian."

Later Wars; His Death.

The earnest desire of the Jews for the downfall of the Chaldean kingdom was fulfilled; but the outcome was not what their prophecies had led them to expect. The political power of the Chaldeans had been broken, but no vengeance had fallen upon Babylon for its misdeeds. Instead of being destroyed as was anticipated, the city remained intact, and became the splendid winter residence of the Persian kings. Nor was the longed-for universal revolution, crowned by the establishment of the Messianic kingdom, effected. Another and more powerful pagan empire had taken the place of that which had been overthrown. The faith in the world-dominion of YHWH was now shaken, and despondency settled upon the Jews.

It was to counteract these evils that the anonymous comforter, conveniently called "Deutero-Isaiah," the author of Isaiah xl.-lv., now arose. The very fact that YHWH had carried out His prophecy in a wholly unexpected manner, by choosing a pagan to overthrow the idols of the nations, so that He alone might be acknowledged as the only true God, was accepted by the second Isaiah as the surest evidence of the divine government. This prophet, Cyrus, through whom were to be redeemed His chosen people, whom He would glorify before all the world, was the promised Messiah, "the Shepherd of YHWH" (xliv. 28, xlv. 1). Having received the sovereignty of the whole earth as the ransom for Israel, Cyrus would now rebuild Jerusalem for them. The chapters in question were published after the fall of Babylon (xlvi., xlvii., etc.); consequently, in the winter of 539-38, before the Return, and in Babylon itself, not, as Duhm believes, in Palestine. The fanciful hope of Deutero-Isaiah, that upon the return of the Jews the world would change its character, and the desert become level, fruitful, and well watered, was not fulfilled. Cyrus, however, permitted the Jews to return to their own land. There was no reason to detain them longer in Babylon; and if they returned to their homes, they would be in a position to defend the border-land against Egypt and the desert. In the first year of his reign as King of Babylon, Cyrus issued from his summer residence, Ecbatana, an order for the return of the Jews and for the rebuilding of the Temple. Fragments of this edict are contained in a proclamation of Darius (Ezra vi. 2-5; compare *ib.* v. 13 *et seq.*); and the doubts as to the authenticity of this edict are as little justified as is the opinion expressed by Kosters (and approved by many) that the alleged return of the Jews during the reign of Cyrus did not take place at all. The reason why the Jews did not at once rebuild the Temple is to be found in the sorry economic condition in which they were left.

Cyrus and the Jews.

The author of II Chron. xxxvi. 22 has substituted an invention of his own for the genuine edict of Cyrus contained in Ezra i. 1 *et seq.* Cyrus "the Persian" is also mentioned in Dan. vi. 28, x. 1, as the successor of the "Median" Darius (vi. 1). After all, the author of the Book of Daniel had a very vague conception of the history of the Persian empire.

CYZICENUS ANTIOCHUS. See ANTIOCHUS IX. CYZICENUS.

CZACKI, TADEUSZ: Polish statesman and author; born in Poryck, government of Volhynia, Russia, Aug. 28, 1765; died in Dubno, Volhynia, Feb. 8, 1813. When Prince Adam Czartoryski was placed at the head of the educational district of Wilna, Czacki was appointed school inspector of Volhynia, Podolia, and the Ukraine. An opponent of the Jesuits, he combated their work in the field of pedagogy, and on one occasion raised by public subscription the sum of two millions of Polish florins to insure the existence of the gymnasiums in Vinnitza and Kiev. In 1805 he founded the high school in Krementetz, Volhynia, which was destined to be of inestimable benefit to the Poles. Its influence is still evident in Volhynia, Podolia, and the Ukraine. After Czacki's death his heart was deposited in one of the halls of this Volhynian school, under the inscription "Ubi thesaurus tuus, ibi est cor tuum." It was Czacki that discovered the grave of Copernicus, proving most conclusively the Polish origin of that great astronomer.

Czacki's "Rozprawa o Zydach" (Discourse on the Jews), first published at Wilna 1807, and translated into Russian by Basil Anastaszewicz, passed through several editions, and was published finally in "Dziela Tadeusza Czackiego" (Works of Tadeusz Czacki), edited by Edward Raczynski, Posen, 1845 (iii. 138–270).

For the history of the Jewish institutions, Czacki, who did not know Hebrew, availed himself of the only sources open to him; namely, Bartolocci and Ugolino.

After relating the primitive history of the Jews, Czacki describes their situation among the Arabs, Italians, Spaniards, French, Germans, and Hungarians. He tells of their entrance into Poland in the twelfth century; of their intellectual condition; of their government and laws; and of the persecutions to which they were subjected.

History of the Jews.

"Under the rule of most of the Christian governments," says Czacki in his "Rozprawa o Zydach," "they [the Jews] experienced indulgence rarely, oppression often, and disdain almost always" (p. 37). "Their profits were wrested from them." "Many a writer considered it an honor to multiply the number of the insults against the Jews, or to charge them with horrible crimes" (p. 54). "In the reign of Sigismund III. of Poland the spiritual authorities ventured to give permission for the erection of synagogues. Permission was granted also for the printing of books, which could not have been inspected, since in them are found criticisms and gibes against the Christians." Of a few Polish authors who wrote against the Jews—Moiecki (1598), Miezynski (1618)—Czacki declares that "they have vented all that frenzy under the guise of religious zeal can utter" (p. 95).

Exemption from the poll-tax was granted in 1775 to those who would apply themselves to agriculture, and by 1787, owing to Czacki's efforts while he was serving on the Commission of the Treasury (see his report of 1787 on the Ruthenian and Ukrainian provinces), he had the satisfaction of seeing a few scores of families in the enjoyment of that privilege. There were many Poles who worked with Czacki for the emancipation of the Jews. "When, in the year 1794, despair armed the [Polish] capital, the Jews were not afraid of death, but, mingling with the troops and the populace, they proved that danger did not terrify them and that the cause of the Fatherland was dear to them" (the official organ of the Warsaw Revolution of 1794, and other Warsaw newspapers).

Chapter iv. of Czacki's "Discourse" contains a brief analysis of Duke Boleslaus' privilege, which was confirmed by Casimir the Great and by Duke Vithold; chapter vi., the sources of the laws with which the Jews were permitted to govern themselves, and an account of the Jewish civil law, according to Selden and Maimonides; chapter vii., an exposition of the criminal law; and chapter viii., an account of the state of learning among the Jews.

Chapter ix. bears the title "Of the Plan of the Reform of the Jews." In 1788 the Polish Diet directed its attention to the Jews. The Commission of the Treasury, of which Czacki was a member from 1786 to 1792, examined the subject, and found: (1) that there were in Poland about 900,000 Jews of both sexes, and that they multiplied exceedingly; (2) that the young generations bore to a gradually increasing extent the germs of diseases (especially *spina ventora* and the itch), and that there were one and a half times as many deaths among Jewish children as among Christian children; (3) that the knowledge prevailing among the Jews was nothing but a systematic ignorance; (4) that the rabbis exercised a despotic authority; (5) that three-fourths of the export trade and one-sixteenth of the import trade of Poland was in Jewish hands; (6) that as the living expenses of a Jewish merchant were half as much as that of a Christian merchant, he could sell his goods more cheaply; (7) that bankruptcies were more frequent among the Jews than among the Christians; (8) that in the provinces, with the exception of Great Poland, almost one-half of the workmen were Jews; (9) that every city had barber-surgeons who possessed "no knowledge except experience"; (10) that there was no learned Jewish midwife in the whole country, wherefore many Jewesses died in confinement; (11) that there were fourteen Jewish agricultural families in the whole country; (12) that it was a very rare case for a Jewish fortune to hold together for several generations; (13) that the cause of the hatred of the Jews for those of a different faith was the pride peculiar to ignorant people.

The reforms in the laws regarding the Jews were to be based on the following grounds: (1) hitherto the government has tolerated the Jews; henceforth it must grant them the rights belonging to citizens; (2) the government has the right to require that the Jews should be educated in the measure of the needs of the country; (3) when the differences abasing the Jews disappear, all injurious disabilities will be abolished; (4) all trade and manufactures are free, but as the Jews have become the cause of the ruin of the peasants in the keeping of inns, that right is suspended. The project of reforms consisted of eight sections, from which the following passages are quoted: "The law recognizes the Jews as free people. . . . They can be elected officers, and they can elect officers, according to the universal laws. The law awards the same reward and the same penalty to Jews as to Christians. They are at liberty to acquire lands and mills by inheritance. . . . The authorities will permit those Jews to buy estates who will aid in the execution of this law, especially in the matter of the settling of Jews on farm-lands. This privilege is granted to all Jews after the lapse of twenty years. Taxes are to be the same for Jews as for Christians. No Jew shall be baptized until he has reached a proper age—the twentieth year in the case of men, the eighteenth in that of women. The civil and criminal laws of the Jews are discontinued. They shall, however, maintain their own religious institutions for the adjustment of religious affairs. A Jew that settles on farm-land is exempt from taxes for ten years. The most industrious Jewish agriculturists for the same interval will receive the value of ten bushels of rye. There will be twenty of these prizes." The remaining sections (iv.–viii.) consider in a series of paragraphs the education of the Jews; the Jewish superiors and their powers; the family and arbitration courts; the change of dress, and the use of the language in public and private transactions; the debts of the Jewish communities and the way of canceling them.

The short discourse on the Karaites ("Dziela Tadeusza Czackiego," iii. 271–285) attempts to explain, on the basis of the sources accessible to the author and referred to above, "what the Karaites are, and wherein they chiefly differ from other Jews; when their separation occurred; and in what countries they dwell."

H. R. S. Po.

CZARNIECKI, STEFAN: Polish general; born 1599; died at the village of Sokolovka, Volhynia, Feb. 12, 1664. Czarniecki distinguished himself in the wars against Sweden and Russia (1656–61), but unlike Wishnevietzki, who stands out as the protector of the Jews during the Cossack uprising, he dealt very harshly with them. After the Cossack rebellion of 1648 he joined Prince Potocki against Chmielnicki, but was surrendered to the Tatars after the defeat of the Poles at the Yellow Waters (see Cossacks' Uprising). He was released after a captivity of two years, then fought against the Cossacks again, and helped to defeat them near Berestaczko. When the Swedish king, Charles X., invaded Poland and forced John Casimir to flee into Silesia, Czarniecki hastened to Cracow and besieged the castle, but lack of provisions soon forced him to retire. Poland was now made the battle-ground for Russia, Poland, and Sweden, and the Jews, receiving protection from none, were harshly dealt with by all.

The communities which had been spared the fury of Chmielnicki and his followers now felt the effects of the conflict. The Russians showed them no mercy; the Swedes gave them no protection; and the Poles accused them of being friendly to the Swedes, and cut them down in great numbers. Czarniecki dealt remorselessly with them. Retreating from the Swedes, he devastated the country and vented his rage on the Jews. He is said to have killed 200 in Kobylin; 100 in Mezhirich; 100 in Wreschen; 300 in Lenczyc; 600 in Kalisch, Posen, Petrokov, and Lublin. Hundreds of families were exterminated in Cracow (1656); many Jews, in order to escape a worse fate, drowned themselves in the river; and others changed their religion. The Poles destroyed the synagogues and took great delight in tearing up the Holy Writings. Some of the most important communities were utterly destroyed; others were reduced to a pitiful condition of ruin and helplessness. The numerous communities of Great and Little Poland became depopulated by war and migration, and the unceasing conflicts which led to the decline of Poland caused also the decline of Polish Judaism.

H. R. J. G. L.

CZARNIKAU: Town in the district of Bromberg, province of Posen, Germany. The Jewish community of this town probably dates back to the beginning of the seventeenth century, at which time, according to tradition, the Polish prince Sapieha had various relations with the Jews living there. The community was most numerous in the years 1855–64, when it numbered 1,200 persons, while it numbered only 470 in 1815, and 600 in 1900. In place of the old synagogue, built in 1759, a beautiful and massive building was erected in 1878. In 1819 the new cemetery was laid out on the Posener Chaussée, the old one being transferred to the city to be laid out as forest. In 1842 the community built its own schoolhouse, which was enlarged in 1878. The elementary school, with three grades, is a public school; and its two teachers are appointed by the government. The community supports, in addition, a Hebrew religious school, with three grades, under the direction of the rabbi.

The following rabbis have officiated in the community: Isaac Fränkel, Elia Spiro (1830–55; distinguished for his Talmudic scholarship and piety; born at Inowrazlaw, and educated at the yeshibah of Lissa), Dr. Popper (1855–90), Dr. Freund (1893–1899). The present (1903) incumbent is Dr. Weyl. The Jewish societies of Czarnikau include: a ḥebra ḳaddisha, an Israelitischer Frauenverein, a Verein zur Unterstützung Durchreisender Armen, and a Litteraturverein. For more than fifty consecutive years Jews have had a seat in the municipal council.

G. I. Co.

CZARTORYSKI, PRINCE ADAM GEORG: Polish statesman and patriot; born in Warsaw Jan. 14, 1770; died in Montfermeil Castle, near Paris, July 15, 1861. After the final partition of Poland Czartoryski and his brother Constantine went to St. Petersburg in 1795 and entered the service of the Russian government. The prince became the intimate friend of Grand Duke Alexander, and when the latter ascended the throne, Czartoryski became assistant to the minister for foreign affairs. When his aspirations for the restoration of Poland by the aid of his friend, the emperor, proved futile, he became the bitter enemy of Russia and was at the head of the Polish insurrection of 1830–31. After the failure of the last effort for the liberation of Poland he went to Paris, where he was recognized as the leader of the Polish refugees until his death.

Czartoryski was generally friendly to the Jews. In his early career he was the protector of the Jewish scholar Mendel Levin (Satanover), whom he engaged as teacher for his children. As a member of the commission appointed by Emperor Alexander I. (1804) to prepare the enactment of Dec. 9, 1804, concerning the Jews (see ALEXANDER I. of Russia). Czartoryski did not, as alleged of him, work against the interests of the Jews. As a Polish patriot he was concerned mainly with the welfare of Poland, his zeal on behalf of the Jews of Poland being none the less genuine though subordinate to his main object.

In later times, mainly through the efforts of Jean Czynski, and other Polish patriots who pointed out the hopelessness of liberating Poland without the help of the middle classes and of the Jews, the prince became an outspoken champion of the emancipation of the Jews. In a speech which he delivered on Nov. 29, 1844, he advocated granting the same rights to Polish Jews as were claimed for all other natives of Poland, and eulogized the Jewish martyrs of the insurrection of which he was the leader. The prince in his last days also instructed his son, Prince Ladislaus, ever to remain the friend of the Jews. Czartoryski is still revered among the Polish Jews, especially among those who emigrated to France or came under the influence of the community of Polish exiles in Paris.

H. R. P. WI.

CZATZKES or **TSCHITKIS, BARUCH:** One of the Neo-Hebraic poets of the beginning of the nineteenth century; lived at Lutzk, Volhynia. Delitzsch ("Zur Gesch. der Jüdischen Poesie," p. 109) mentions him as one of the Germanizing Hebrew poets of the "Bikkure ha-'Ittim" school. The poem "Ha-Biṭṭaḥon" by Czatzkes in that periodical (xi. 177) is translated from the Russian of Kheraskov, and is, according to Weissberg ("Neuhebräische Aufklärungsliteratur in Galizien," p. 53, Leipsic and Vienna, 1898), the first instance of a German Slavic Jew translating Slavonic poetry into Hebrew. Czatzkes also contributed sixteen proverbs to the above-cited volume of the "Bikkure ha-'Ittim," and was the author of a song of praise, which appeared in the first edition of I. B. Lewinsohn's "Te'udah be-Yisrael."

H. R. P. WI.

CZECHOWIC, MARTIN: Polish Unitarian priest; born at Zbaszynie about 1530; died 1613. Czechowic lived at a time when religious restlessness was prevalent in Poland. Numerous religious sects arose, varying from the old Catholicism and the new Reformation to sects which rejected the Trinity and denied the divinity of Jesus. The members of the sect which professed disbelief in the Trinity were called Unitarians, and the most radical among them were called by their opponents "Half Jews." The religious dissension and constant disputes which arose in consequence led to a number of Jews taking part in these disputations.

Martin Czechowic frequently changed his religious views. He was a Roman Catholic priest in Kurnik until 1555, when he became a member of the Bohemian Brotherhood in Wilna, and, in 1575, wrote in denunciation of the baptism of infants (Lublin, 1575). He also wrote a book endeavoring to show that the objections of the Jews to Jesus as Messiah were unfounded. It was published under the title "Rozmowy Chrzescijanskie o Tajemnicach Wiaru" (Rakow, 1575). In reply to this, Rabbi Jacob Naḥman of Belzyc wrote a defense entitled "Odpis Jacoba Zyda z Belzyc na Dialogi Marcina Czechowiza" (Lublin, 1581). The arguments of Jacob Naḥman were able and logical, and called forth a reply from Czechowic, entitled "Vindiciæ Duorum Dialogorum Contra Jacobum Judæum de Belzyce."

CZENSTOCHOW. See CHENSTOCHOV.

CZERNIGOV. See CHERNIGOV.

CZERNOWITZ: Capital of the province of Bukowina, Austria, situated near the banks of the Pruth, about 150 miles from Lemberg. Jews were living here and in a few other places in Bukowina when the Austrians took possession of the country in 1775. They were mostly of Polish and Rumanian origin, and had probably settled there in the fifteenth century, when it formed a part of Moldavia. During the occupation of Bukowina by Russia (1769–74) some White Russian Jews found their way thither. Czernowitz was termed "village" in the official documents of 1775, and in 1816 it had a total population of 4,516 persons. Its development began only in the thirties, from which time the history of the Jewish community may be said to date. Toward the middle of the nineteenth century the community was divided into two hostile camps: the Orthodox Jews, who detested all innovation; and the advocates of reform. The two parties avoided intercourse with each other, and the affairs of the community suffered considerably from this state of things. A kind of truce founded on mutual toleration was brought about by Chief Rabbi L. E. Igel, who held the office from 1854. He employed all his efforts to maintain peace in the community. During the forty years of his rabbinate many useful institutions were founded. Religious schools were opened under the supervision of Dr. Heinrich Atlas and Mandel Tit-tinger, who for twenty-five years held the office of deputy burgomaster of Czernowitz. In 1879 the Alliance Israélite of Vienna established at Czernowitz a center for the crownland of Bukowina. The community possesses a yearly income of 20,000 florins for charitable purposes, in addition to casual donations. In 1895 L. E. Igel was succeeded in the chief rabbinate by Joseph Rosenfeld, assisted by the rabbis Benjamin Weiss and Berl Bremer. The community possesses many synagogues, one of which is Sephardic. From 1836 to about 1860 a Hebrew printing-office existed at Czernowitz; but owing to the poverty of the plant and management, it was never very active. The total population in 1900 was 67,622, of which about 22,000 were Jews. Among the numerous societies and charitable institutions the most noteworthy are: the Jewish Hospital, the ḥebra ḳaddisha, the Jüdischer Frauen-Verein, the Krankenunterstützungsverein, and the Talmud Torah. Czernowitz was at one time the home of a famous printing-press. See GALICIA.

E. C. I. BR.

CZESTIONEV: Village in the government of Warsaw, Russian Poland. It is the seat of a Jewish agricultural college, which was completed in 1901, accommodation being provided for sixty students. The college lands comprise 1,630 acres, 1,090 of which are arable, the remainder consisting of forest and meadows. The live and dead stock is (1901) valued at 2,574 rubles and 10,350 rubles respectively; and the receipts from the farming operations for 1901 were entirely satisfactory.

The students receive elementary instruction of a thoroughly practical nature in agriculture, horticulture, market-gardening, and dairying; and they also learn to work in wood and iron and to repair the agricultural plant. Candidates for admission to the college must know Russian, and have completed their thirteenth year. A preparatory school has been established for pupils who are not sufficiently advanced to enter the college. The college has opened up a new field for many of the Jewish youth of Poland.

H. R. A. P.

CZYNSKI, JAN (JEAN): Polish lawyer, author, and journalist; born June 20, 1801; died in London, England, Jan. 31, 1867. The son of Jewish parents who had embraced Roman Catholicism before his birth, Czynski was throughout his entire life one of the most zealous defenders of the Jews. After completing his studies he practised law in Lublin, and became an active participant in the wars of the Polish Revolution of 1830, serving as chief of staff under General Szczeptycki, the commandant of the palatinate of Lublin. The animosity exhibited toward the Jews during the revolution was most bitter, and Czynski was unsparing in his efforts to prove that it was undeserved. On one occasion, when the Lublin populace had accused them of evading military service, and threatened to attack them as traitors and spies, Czynski appeased the mob, and called a meeting of the leading inhabitants in the synagogue, where he stoutly defended his Hebrew compatriots.

On the failure of the revolution, he settled, in 1832, in Paris, where he lived for many years, and cooperated on the Polish National Committee with Prince Adam Czartoryski and Lafayette, ultimately removing to London. In 1851 he issued a circular to his compatriots, suggesting the formation of a society to consist of all Polish Jews in England and France.

Czynski was a versatile and prolific writer, mainly on historical subjects. He wrote a series of historical novels, and, under the pseudonym of "Ernesta Rollin," some plays, which were produced on the French stage. Of principal interest to Judaism were: "Le Reveil d'Israel," Paris, 1847; "Le Fils de la Juive," *ib.* 1848; and "Israel en Pologne," *ib.* 1861. Czynski was associated with several journals, including "La Pologne," of which he was for some time editor-in-chief.

In all his works and newspaper articles he never failed to seize an opportunity to espouse the cause of the Jews of Poland; and the grateful esteem with which his efforts were regarded is best evidenced by the obituary notices contributed to the "Archives Israélites" (xxviii. 167) by Léon Hollaenderski and Isidore Cahen. The former pays a glowing tribute to Czynski, of which the following is a translation: "The name of Jean Czynski is inscribed with gratitude in the annals of Judaism side by side with the immortal names of Czacki, Synowiecki, Castellan Ostrowski, and other illustrious friends of humanity and of the Jews of Poland."

D

[**D', DA, DE:** In the alphabetical arrangement of names the above prefixes have been disregarded; consequently **D'Aguilar** will be found as **Aguilar, D'**; **Da Costa** as **Costa, Da**; etc.]

DABBASHETH: A town on the border-line of Zebulun (Josh. xix. 11). It has been identified by Conder with Dabsheh, the ruins of which are near the hills east of Acco. The Septuagint reading is Βαιθάραβα.

E. G. H. G. B. L.

DABERATH: A town on the eastern boundary of Zebulun (Josh. xix. 12), but belonging to the domain of Issachar, and assigned to the Levites (Josh. xxi. 28; I Chron. vi. 58). It is the modern Deburieh, an important strategic position at the foot of Mount Tabor and overlooking the entrance into the great plain of Esdraelon. It was here, perhaps, that Barak mustered his troops (G. A. Smith, "Hist. Geog. of the Holy Land," p. 394). From Josephus ("B. J." ii. 21, § 3) it is known that a Jewish garrison was placed here for the purpose of watching the plain. The name occurs in a slightly altered form in the Talmud (Neubauer, "G. T." p. 265). Moore conjectures that Deborah was a native of this place (see Buhl, "Geographie des Alten Palästina," p. 216).

E. G. H. G. B. L.

DACOSTA, ISAAC-FRANCIS: Musician and composer; born at Bordeaux Jan. 17, 1778; died there Nov. 29, 1864. He was a pupil of the Musical Conservatory in 1798. Later, while first cornet at the opera in Paris, he was vice-leader of the Musique des Gardes du Corps, under Louis XVIII. He wrote several romances and concertos. Meyerbeer composed for him, in 1836, the clarinet solo in the fifth act of "The Huguenots." He is believed to have been the son of the musician Samuel-Franco Dacosta, who was arraigned before the revolutionary tribunal at Bordeaux in 1794.

G. C. DE B.

DAGESH: The diacritical point placed in the center of the letters of the Hebrew alphabet to indicate either their intensified (doubled) pronunciation, or, in the case of the letters בגדכפת (b, g, d, k, p, t), their hard (unaspirated) pronunciation. The root "dagash" means in Syriac "to prick" (compare Targ. to Prov. xii. 18); but the context in which the term "dagesh" first occurs militates against deriving it from this signification of the root. The use of "dagesh" as the name of the point indicating the intensified pronunciation is only a secondary one, for in the old Masoretic texts and in the Maḥzor Vitry (ed. Horowitz, p. 228), "dagesh" indicates the intensified pronunciation itself, in contrast to "rafe," the weak pronunciation. The root "dagash" occurs only once in the traditional literature, in a reference to the letter ד (d) of the word אחד ("eḥad," Deut. vi. 4), and that, too, in a sentence of the Palestinian Talmud which is known only from a later quotation (Ṭur Oraḥ Ḥayyim, lxi.). A reference to the dagesh, though without the use of the specific term, is to be found in the Pesiḳta Rabbati and in "Sefer Yeẓirah."

From the Masorah the word passed into the terminology of the grammarians in its earlier sense, as, for instance, in Ben Asher and Saadia Gaon. The latter called one part of his grammatical work "The Book of Dagesh and Rafe"; preserving, as did the Karaite lexicographer David b. Abraham, even in the Arabic text the Hebrew-Aramaic terms. Saadia uses Arabic noun and verb forms derived from the word. Ḥayyuj uses in their stead the corresponding Arabic terms "shadid," "mushaddad," "khafif," "mukhaffaf"; and he was followed in this by others writing in Arabic. From the time of Abraham ibn Ezra, however, philologists writing in Hebrew reestablished the use of the word "dagesh," from which various nominal and verbal forms were derived and added to the terminology of Hebrew grammar.

There is no trace among the early writers of a classification of the various uses to which the dagesh was put, such as became customary later, though the relation in which the six letters בגדכפת stood to the dagesh was of course emphasized; the letter ר, because of its double pronunciation by the Palestinians, was added to the six in "Sefer Yeẓirah" and in Ben Asher. The term "dagesh ḳal" (light dagesh), to denote the hard unaspirated pronunciation of the letters בגדכפת, occurs perhaps first in David Ḳimḥi's "Miklol" (ed. Venice, 1545, p. 49a). The rules for the "dagesh ḥazaḳ" (strong dagesh, that denoting a doubling of the letter) were first formulated by Elijah Levita ("Perek Shirah," 54a *et seq.*), who enumerates eight cases in which it occurs. Later grammarians have superseded this division by a more extended one (see König, "Lehrgebäude der Hebr. Sprache," i. 52 *et seq.*).

Graetz has shown that the use of the dagesh is anterior to the use of the vowel-points, for which it was, in a measure, a substitute. It distinguished the absolute from the construct state, the quiescent shewa from the mobile, and at times stood in place of the "matres lectionis." The regular use of the dagesh and its representation by means of a point seem to be a peculiarity of the Tiberian vowel-system. In the so-called superlinear, or Babylonian, system, the point was originally not used at all, nor was dagesh indicated in all cases which required it. In Berlin MS. Or. quart. 680, which, according to Kahle, originally contained the true Babylonian punctuation, the dagesh has the form $\underline{\lambda}$. It is used with the six letters בגדכפת, in such cases as require regularly the dagesh forte, but generally only where a mistake might be made; also in the letter resh, in alef when that letter is consonantal; and with lamed, especially in enclitic words. The dagesh is found four times with the alef in the Masoretic system (Stade, "Der Masoretische Text," § 42b) and often in the Karlsruhe MS. (see "Proc. Fifth Or. Congress," II. i. 136). The dagesh is also used with the preposition את, and is often retained at the end of a word, a practise not adopted by the Tiberian system.

In the peculiar fragments of shortened Hebrew published by M. Friedländer ("Proc. Soc. Biblical Archeology," 1896), the sign for both dagesh forte and dagesh lene is $\underline{{}^{c}}$, while rafe is expressed by $\underline{{}^{\frown}}$. The alef when consonantal is also provided with the dagesh. This system is also employed in the Maḥzor fragment published by Levias ("Am. Jour. Semit. Lang." xv. 157). In certain genizah fragments at Cambridge and in others in the possession of Elkan Adler, the dagesh is indicated by a line placed over the preceding vowel; though at times a point is used for dagesh lene. In the St. Petersburg codex of the Prophets, also, dagesh forte is represented by a line over the preceding vowel; dagesh lene, by a point in the letter as in the Tiberian system. The point, however, is used occasionally for both dageshes. In all these cases the use of the point seems to be an intrusion from the Palestinian system. The irregularity in the use of the dagesh may also be seen in MS. Berlin Or. quart. 578, from which Praetorius has published the Targum of Joshua (1901).

G. W. B.—G.

DAGGATUN: Nomad tribe of Jewish origin living in the neighborhood of Tementit, in the oasis of Tuat in the Moroccan Sahara. An account of the Daggatun was first given by R. Mordecai Abi Sarur of Akka (Morocco), who in 1857 journeyed through the Sahara to Timbuctu, and whose account of his travels was published in the "Bulletin de la Société de Géographie" (Dec., 1895; see "Bulletin All. Isr." ii. 42, 1880; "La Grand Encyclopédie," xxiii. 254; Meakin, "Land of the Moors," p. 17). According to R. Mordecai, the Daggatun live in tents and resemble the Berber Tuaregs, among whom they live, in language, religion, and general customs. They are fairer in complexion than the generality of African Jews, and are still conscious of their origin. They are subject to the Tuaregs, who do not intermarry with them. R. Mordecai is authority for the statement that their settlement in the Sahara dates from the end of the seventh century, when 'Abd al-Malik ascended the throne and pushed his conquests as far as Morocco. At Tementit he tried to convert the inhabitants to Islam; and as the Jews offered great resistance he exiled them to the desert of Ajaj, as he did also the Tuaregs, who had only partially accepted Islam. Cut off from any connection with their brethren, these Jews in the Sahara gradually lost their Jewish practises and became nominally Mohammedans.

These statements of R. Mordecai evidently rest upon some foundation. The Arabs driven to Ajaj are to be identified with the Mechagra mentioned by Erwin de Bary ("Ghat et les Tuareg de l'Ain," p. 181), among whom a few Jews are said still to dwell. V. J. Horowitz ("Morokko," p. 58, Leipsic, 1887) also speaks of many free tribes in the desert regions who are Jews by race, but who have gradually thrown off Jewish customs and have apparently accepted Islam. Among these tribes, he says, are the Daggatun, numbering several thousands and scattered over several oases in the Sahara, even as far as the River Dialiva or Niger. He says, also, that they are very warlike and in constant conflict with the Tuaregs. According to Horowitz, the Mechagra mentioned above are also to be reckoned as one of these Jewish tribes.

Jews Among Berbers.

There seems to be little doubt that Jewish blood has largely been mixed with that of the Berbers living in the Moroccan and Algerian Sahara. In fact, the Berbers are said to have been at one time Jews ("Jew. Quart. Rev." iv. 375); according to another tradition they are descended from the Philistines driven out of Canaan (Basset, "Nedromah," p. 13). There is a tradition that Moses was buried in Tlemçen, and the presence of a large number of Jews in that part of Africa is attested, not only by the many sacred places and shrines bearing Biblical names which are holy to the Mohammedans as well as to the Jews, but also by the presence there of a large number of Jewish sagas, which Basset has collected in the work cited above. L. Ruin ("Origines Berbers," p. 406) says: "Certain Berber tribes were for a long time of the Jewish religion, especially in Amès; and to-day, even, we see among the Hanensha of Sukahras (Algeria) a semi-nomad tribe of Israelites devoted entirely to agriculture" (see "Rev. Arch. de Constantine," 1867, p. 102). In addition, it may be noticed that Jews are to be found in the Berber "ksurs" all along southern Morocco and in the adjacent Sahara. Thus, at Outat near Tafilet there is a mellah with about 500 Jews (Horowitz, *l.c.* p. 202); and at Figuig, a mellah with 100 Jews (*ib.* p. 204). Going farther south from Tafilet to Tuat, there is a large community of Jews in the oasis of Alhamada; and at Tementit, a two weeks' journey from Tafilet, the 6,000 or 8,000 inhabitants are said to be descendants of Jews converted to Islam (*ib.* p. 205). Even much farther to the west, in the province of Sus, there is Ogulmin with 3,000 inhabitants, of whom 100 are said to be Jews. Detailed information in regard to the Daggatun (whose name may perhaps be derived from the Arabic "tughatun" = infidels) is still wanting. Rohlf ("Reise Durch Marokko," p. 144) found no professing Jews in the whole oasis of Tuat; those who lived there in former times having all been either converted or exterminated by the Mohammedans. He notes, however, that their descendants have preserved the Jewish characteristic aptitude for trade.

G.

DAGGER: A short, edged, and pointed weapon for stabbing. It is given in the Ehud episode (Judges iii. 16, 21, 22) as the English equivalent for "ḥereb," which elsewhere is rendered "sword." See WEAPONS.

E. G. H. G. B. L.

DAGHESTAN: Russian province, situated on the eastern slopes of the Caucasus, and bounded by Circassia, Georgia, and the Caspian Sea. In Turkish the name means "mountainous country."

According to the last census, that of 1897, the Jewish inhabitants numbered 12,000, or 1.85 per cent of the total population. The distribution of Jews in the various districts of Daghestan was as follows (1894): Avar, 11; Andi, 2; Gunid, 3; Dargi, 4; Kazikumukh, 3; Kaitago-Tabassaran, 2,853; Kyurin, 2,762; Temir-Khan-Shura: city, 1,950, and village of Sultan-Yangi-Yurt, 95; Derbent, 2,490; Petrovsk, 915; total, 11,088.

Some other Caucasian tribes of Daghestan are supposed to be descendants of Jewish colonists who in the centuries before the common era migrated to Daghestan in great numbers (Erckert, "Der Kaukasus," p. 360). Among these may be mentioned the Andies, numbering 26,000, and the Kyurines, numbering 150,000.

Manners and Customs.

The Jews of Daghestan greatly resemble the other warlike inhabitants of this mountainous region; and they have acquired the virtues as well as the faults of the latter. They differ from their Christian and Mohammedan neighbors in speech, using the Tat language, which is a combination of Persian and Hebrew. Their writing is a mixture of square characters and Rashi. They wear the Circassian dress, and always go heavily armed, even sleeping without having removed their weapons. Their houses, like those of the other inhabitants, are ill built and dirty, and on the walls one finds, together with brightly shining arms, smoked fish or mutton hung up to dry. The main occupation of the Daghestan Jews is agriculture; but little of the land is owned by them, it being usually rented of their Mohammedan neighbors, to whom they pay their rent in produce, usually tobacco. They raise in addition vegetables and grapes; and some of them are engaged in the tanning of hides; while a few are small traders.

The rabbis and prominent Jews of Daghestan in the nineteenth century were:

Rabbis: Shalom ben Melek Mizraḥi, Temir-Khan-Shura; Elijah ben Mishall Mizraḥi, Derbent; Saadia ben Ezra, Tarku Ephraim ben Ḥaninah; Nissim ben Sharbiṭ, Derbent; Jacob ben Isaac Mizraḥi, chief rabbi of Daghestan (1866), Derbent; Isaac Mizraḥi, father of Jacob, Derbent.

Other prominent men: Abraham ben Enoch, died 1861; David ben Shabbethai; Bisra ben Machir; Ephraim ben Koshi; Joseph ben Rabba; Ḥanukkah ben Jacob; Aaron ben Jeremiah; Pesaḥ ben Jonah; Osiyahu ben Elijah; Baba ben Machir; Mordekai ben Pereẓ; Joshua ben Ḥanukkah; Ḥaninah ben Mordekai; Ẓaddiḳ ben Nissim—all of Temir-Khan-Shura; Benjamin ben Issachar, president of Jewish community (1866), Derbent.

Women.

The Jews of Daghestan are noted for their hospitality; and they still retain the old Hebrew custom of washing the feet of strangers who visit them, this duty being performed by the women. The latter, like all Eastern women, lead a rigorous life. They have their separate rooms, are not allowed to sit at the same table with the men, and on the very rare occasions when they show themselves to strangers they keep their faces covered. As in Biblical times, they may be seen every evening on their way to the well, rich and poor alike barefooted and carrying earthenware jars upon their heads. The gathering by the well seems to be a recreation for the women, who exchange news there and linger to gossip with their neighbors. Another occupation which the women appear to enjoy is the noisy lamentation for some departed friend. Gathered on the flat roof, they sit in a circle, and, swaying their bodies, begin a mournful song. Gradually they all wail louder and louder, tearing their hair and biting their fingers until they find themselves compelled to stop from sheer exhaustion. When a funeral occurs the entire community takes part in the lamentations, which are kept up for a whole week. It is customary to break a silver coin over the open grave, and to scatter the fragments in different directions, presumably to drive away evil spirits.

The Daghestan Jews are very ignorant and superstitious, and are made the more so by their life and surroundings. Their rabbis are illiterate, although they speak Hebrew rather fluently. The Mohammedans often attack and rob the homes of the Jews, destroy their burial-places, and molest their graves. The Jews, being compelled to rent the land of them, are completely at their mercy, and are obliged to pay very heavy taxes, which at times are almost unbearable. In some places the Jews are reduced to great poverty; they live in dugouts, are constantly abused and exploited, possess scarcely any property, and have not even the means to pay for the religious instruction of their children. The Mohammedan landowners require every able-bodied man and woman to work for them a certain number of days in each year, either in the fields, or tending cattle, threshing, repairing their houses, etc. In one village the inhabitants give to the landlords at least one hundred days each in the course of a year, and are obliged besides to furnish a certain number of eggs and chickens, as well as charcoal, sand, wood, salt, and shoes. They must also make many cash payments for various purposes.

There is a tradition among the Jews of Daghestan that they are the descendants of the Lost Ten Tribes; but the history of their wanderings is now forgotten, the written documents which they once possessed having in the course of time been either lost or destroyed.

The mountain Jews dwell in "auls" (villages), scattered among those of non-Jewish tribes; at times in separate communities, and at other times in mixed ones. The greater part of them live in the districts of Temir-Khan-Shura, Kaitago-Tabassaran, and Kyurin, and the remainder in the cities. There are (1902) five synagogues in the province, besides numerous houses of prayer, and twenty-six Hebrew schools with an aggregate of 520 pupils. See CAUCASUS; CHAZARS; DERBENT.

DAGOBERT: King of France (602–638). In order to emulate the religious zeal of Heraclius and Sisebut, the rulers of the Byzantine and West-Gothic empires, who were persecuting the Jews, Dagobert decreed, about 629, that the Jews who were not converted to Christianity by a certain date should either leave his dominions or be put to death. "Many changed their faith at that time, while large numbers were slain by the sword," says the Jewish historian ("'Emek ha-Bakah," p. 8). This measure could hardly have been instigated by Heraclius, since it was unlikely that Dagobert was in communication with him; it was rather, as Cassel rightly asserts, a local persecution, directed against certain individuals; and it was not even carried out rigorously, for at the Council of Rheims, held a year later, the canonical decrees issued previously, referring to the traffic in Christian slaves, attendance at Jewish feasts, and the filling of public offices, were renewed.

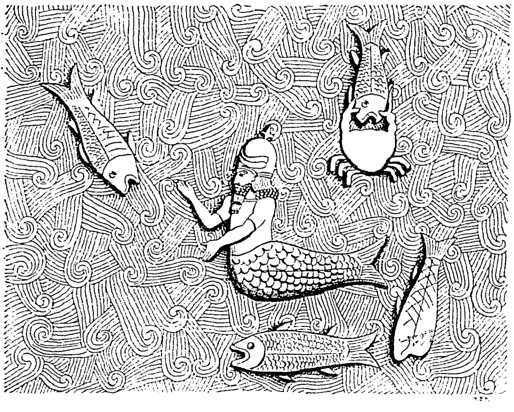
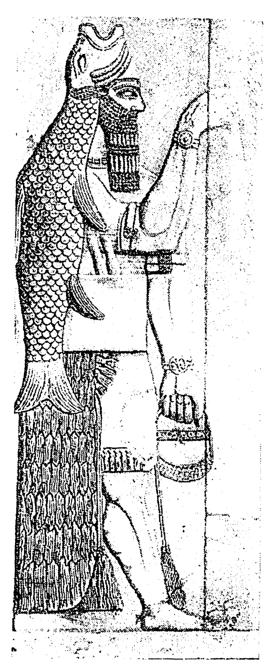
G. M. K.

DAGON (Hebrew, דגון): Philistine god, referred to in Judges xvi. 23; I Sam. v. 2–5; and I Macc. x. 83, xi. 4; but not in Isa. xlvi. 1, where *Δαγων*, in "Cod. Alex.," is a mistake for *Ναβά*; nor in I Chron. x. 10, where בית דגון is a corruption of בית שן (I Sam. xxxi. 10). The extent of the worship of Dagon is also indicated by the name "Beth-dagon," designating (Josh. xv. 41) one of the towns of the Shefela, and another on the boundary of the territory of Asher (*ib.* xix. 27). The inscription of the Phenician king Eshmunazar also mentions "towns of Dagon" (line 19). The significance of this god can be gathered with sufficient certainty from his name and from the plastic representations of him: for דגון is most probably a derivative of דג ("fish"), just as צידון (Sidon) is derived from ציד ("booty") and שמשון (Samson) from שמש ("sun"); and it is probable that "Odakon" (*Ὠδάκων*), by which the Chaldean Berosus designates a personification of Oannes, who is supposed to rise out of the Persian Gulf, is identical with "Dakon," probably changed into "Odakon" through the similarity in sound to "Oannes."



Representation of Dagon.
(From a bas-relief in the Louvre.)

It is, furthermore, by no means certain, notwithstanding G. F. Moore in "Encyc. Bibl." i. 985, that Dagon, the Odakon just mentioned, and the Assyrian god Dakan-Dagan stood in no relation with one another. Indeed, it is quite possible, as some scholars have suggested, that the figures of Dagon found on Babylonian gems, on an Assyrian cylinder, on a piece of sculpture from Khorsabad, on a similar piece from Nimrud, and on a Babylonian cylinder (compare the reproductions of these figures, especially in H. Clay Trumbull's "Jonah in Nineveh," 1892, p. 19), combining in different ways the body of a man and of a fish, are simply different representations of the god Dakan-Dagan (see Friedrich Delitzsch in Calw's "Bibellexikon," *s.v.* "Dagon"; Layard's "Nineveh," 1849, ii. 466 *et seq.*). Neither is it contradicted by what is said in I Sam. v. 4 about the figure of the god Dagon, for the Assyro-Babylonian images also show the head and hands of the god. In this case, Dagon personifies the idea that the ocean, with its wealth of fish, was worshiped as the chief source not only of human nourishment, but also of human culture (compare Berosus' interesting amplifications of this idea in Trumbull, *l.c.* pp. 8–11). The same god would naturally be worshiped both near the Persian Gulf and on the Mediterranean Sea. The El-Amarna tablets indicate an intercourse at an early period between the regions along the Euphrates and Tigris, and those of western Asia and Egypt.



Assyrian Representation of Dagon.
(From Layard's "Nineveh.")

As regards the worship of Dagon, very little is known. Details of the construction of his "house," mentioned in Judges xvi. 26 *et seq.* and in I Sam. v. 1 *et seq.*, are likewise uncertain; and the only feature of the ritual to which reference is made (I Sam. v. 4 *et seq.*; compare Zeph. i. 9) is the fear of touching the threshold of his temple. Dagon's temple at Ashdod was burned by the Maccabee Jonathan (Josephus, "Ant." xiii. 4, § 5). See Threshold, Sacredness of the.

E. C. E. K.

DAINOW, ZEBI HIRSCH B. ZEĔB WOLF (known as the **Slutzker Maggid**): Russian preacher; born at Slutzk, government of Minsk, in 1832; died in London March 6, 1877. He possessed oratorical ability of a high order, and inspired the progressive element of the Russian Jewry through his exhortations in behalf of secular knowledge and his glorification of industry, patriotism, and progress. In him the modern Russo-Jewish "haskalah" (progressive movement) found its orator; and its great exponents, like Gordon, Smolenskin, and their friends and followers—who up to that time had received from the pulpit nothing but condemnation and censure—recognized in Dainow a powerful ally, and at first encouraged him in every possible way. But he aggravated, rather than allayed, the fear of the conservative classes that he was not in accord with them on some religious questions; and by discarding the traditional dress and manners of the "maggid" he aroused suspicion and also opposition in certain quarters. The support and encouragement that he received from the government officials augmented the hostility, and this fact misled Dainow to believe that he was persecuted by fanatics and had to suffer for the sake of the principles which he wished to enforce on his audiences. Judah Loeb Gordon, who understood the Russian Jews and their needs much better than Dainow did, made light of these imaginary persecutions, and warned Dainow against the evils that would result from a complaint to the authorities against his opponents. The violent attack on his antagonists in general, and particularly on the Jews of Byelostok and on A. B. Gottlober—which Dainow published in "Ha-Shaḥar," v. 329-347—gives a good idea of the condition of his mind. The reply to that attack (*ib.* pp. 601-605) contains a good description of Dainow and his methods at that time.

In 1874 he left Russia forever, and settled in London, where he became preacher in a congregation of Russian and Polish Jews, and also lecturer on Haggadah at the En Jacob synagogue. Even in his letters from London he complained continuously of opposition and persecution, giving vent to grievances that were as imaginary as those he had suffered in his native land, if not more so. All contemporary accounts agree that he was highly respected and well treated in London, where his oratorical powers were recognized even by the English rabbis. His premature death in March, 1877, was universally regretted; and his funeral was probably the most imposing that a Russian Jew had ever had in the British capital.

Besides the article mentioned, there is only one publication bearing Dainow's name. It is a pamphlet named "Kebod ha-Melek" (Glory of the King, Odessa, 1869), and contains a sermon, delivered by Dainow in Odessa, eulogizing Czar Alexander II. It appeared also in a Russian translation.

DALBERG, KARL THEODOR, BARON VON: Archbishop of Mayence and subsequently Grand Duke of Frankfort-on-the-Main; born Feb. 8, 1744; died Feb. 10, 1817. He was one of the noblest German princes and statesmen, and took a friendly and liberal attitude toward the Jews. He always favored their complete emancipation; but was long prevented from realizing it in his own dominion, through the Frankfort patricians and, especially, the Rhenish Confederation. After the dissolution of the latter—when Frankfort created a constitution of its own on the principle of equality—Dalberg enacted (Dec. 28, 1811) a special law decreeing that all Jews living in Frankfort, together with their descendants, should enjoy civil rights and privileges equally with other citizens. For this the Jews paid him 440,000 florins, in consideration of which the annual protection tax of 22,000 florins was abolished. Thus Dalberg transmuted the Frankfort Jews from tolerated into full citizens.

DALE, ALAN. See Cohen, Alfred J.

DALET (ד): Fourth letter of the Hebrew alphabet. The name is evidently connected with "delet," meaning "door," and was borrowed from the shape of the letter in the Phenician (ancient Hebrew) script (see Alphabet). It corresponds to the "delta" (Aramaic pronunciation of "dalet") of the Greek alphabet, in which the original form of the letter has been very clearly preserved. In the classification of letters (consonants), as it is found for the first time in "Sefer Yeẓirah" (iv. 3), the dalet is included in the group דטלנת (d, ṭ, l, n, t), which are formed at the upper edge of the tongue. The grammarians, who classify the letters according to the organs of speech by which they are formed, designate this group as linguals (see Abu al-Walid, "Luma'," ii.; Abraham ibn Ezra, "Ẓaḥot," 11b).

According to modern phonetic terminology, dalet ("d") is the sonant dental, corresponding to which ת ("t") is the mute, and ט ("ṭ") the emphatic explosive dental (König, "Lehrgebäude der Hebräischen Sprache," i. 34). According to the Masorah, dalet belongs to the letters (בגדכפת) which have a double pronunciation: softened or aspirated, and hard or unaspirated (see Dagesh; Rafe). The aspirated dalet (ד) was most probably pronounced like the Neo-Greek δ or the soft English "th" (in "the"). In the grammatical division of the letters which has been adopted generally by Hebrew philology since Saadia, dalet is included in the eleven which occur only as root sounds and never as functional sounds. Only Dunash b. Labraṭ included the ד as well as the ט in the group of functional sounds, because in forming the "hitpa'el" of certain roots, both represent ת (see Bacher, "Abraham ibn Esar als Grammatiker," p. 58).

For the textual criticism of the Biblical books the similarity of dalet (ד) and resh (ר) is an important point, as may be seen, for example, on comparing Gen. x. 3 with I Chron. i. 6 (ריפת and דיפת) or Gen. x. 4 with I Chron. i. 7 (דודנים and רודנים). In Job xxiv. 24 רמו is translated by the Targum אוריכו as if the word were דמו ("wait"), which was certainly the original reading. As a numeral, ד has the value 4. As an abbreviation it stands for דף ("page"), especially in later literature, and also for other words beginning with ד. The tetragrammaton is sometimes represented by 'ד, as being the second letter of אדני.

G. W. B.

DALLAS: County seat of Dallas county, Texas, on the east bank of the Trinity River. It was settled in 1844. It has a population of 50,000, including 1,200 Jews. Moses Ullmann, now of Galveston, Tex., and Dr. E. M. Tillman, still of Dallas, were the first Jewish settlers, taking up their residence there in February, 1871. A few emigrants made Dallas their home after the promulgation of the Russian May Laws in 1881, a larger number arriving subsequent to the Russian persecutions ten years later. Since then the growth of the Jewish population has been gradual and steady.

The Hebrew Benevolent Association was founded in May, 1872, and the Ladies' Hebrew Benevolent Association in the same year. The Jewish cemetery was purchased in 1872, and the first Jewish service was held during the New-Year holidays of that year. Dallas Lodge, No. 197, I. O. B. B., was established in 1873, and now has a large membership. Congregation Emanuel was organized in 1874, and held its first service in the hall of the I. O. B. B. Temple Emanuel was dedicated on Shabuoth (Feast of Pentecost), 1876, but having become too small for the increased congregation, a new temple on Ervay street was dedicated in 1898. The Orthodox Jews established a congregation, Shearith Israel, in 1884, but their synagogue was not dedicated till 1894. Besides the two congregations here mentioned, there are two hebrot (small congregations) maintained by the Polish, Russian, and Rumanian immigrants. The Orthodox community also supports a ladies' benevolent association, making three Jewish benevolent societies in Dallas.

The social and literary interests of the Dallas community are represented by the Phœnix Club and the Progressive Literary Association. Benevolent orders are represented by the I. O. B. B., Free Sons of Israel, and B'rith Abraham. The following rabbis have ministered at Temple Emanuel since its foundation: A. Suhler, H. M. Bien, Henry Schul, Joseph Silverman, E. M. Chapman, G. A. Kohut, Oscar J. Cohen, and William H. Greenburg, the present (1902) incumbent.

In active communal and public life Dr. E. M. Tillman, David Goslin, E. M. Kahn, Charles Kahn, Alex. Ortlieb, and Alex. Sanger are prominent. Philip Sanger, recently (1902) deceased, was identified with nearly every public movement in the city. D. A. Eldridge, attorney, is an ardent communal worker.

Dallas has a Jewish weekly newspaper, "The Jewish Sentiment," edited and published by Frank J. Cohen.

A. H. C.

DALMBERT, SIMON MAYER: Officer in the French army, and communal worker; born at Mutzig, Bas-Rhin, in 1776; died May 11, 1840. He took part in the early campaigns of the empire, at first with the cavalry, then with the infantry. He was commissioned at Cassel in 1809 to organize the army of Westphalia. Returning to France after the fall of the kingdom of Westphalia, he settled at Paris (1813), entering the service of the government. He took an active interest in the organization of Jewish worship, being nominated vice-president of the Central Jewish Consistory of Paris in 1816. He was instrumental in the abrogation (1818) of the decree of March 17, 1808 (see Napoleon I.). He obtained the royal ordinance of June 29, 1819, establishing Jewish primary schools, and secured the ordinance of Aug. 20, 1823. Dalmbert also contributed to the establishment in 1829 of the central rabbinical school of Metz. He was made a member of the Legion of Honor and was decorated with the Order of Westphalia.

DALPHON: The second of the ten sons of Haman. All were killed by the Jews and hanged upon gallows (Esth. ix. 10–14). The Septuagint reading is *Δελφών*.

E. G. H. G. B. L.

DALPUGET: Family of merchants; settled at Bordeaux, France. They originally came from Avignon, and refused to obey the decree of expulsion from Bordeaux passed by the jurats and Parliament of that city in 1734 at the request of the Portuguese Jews there. Successive decrees in 1739 and 1740 were likewise suffered to pass unnoticed, the Dalpugets plying their trade as linen merchants and building up quite a large business as bankers. In time the members of this family came to be looked upon as the leaders of the Avignonese Jews. In 1750 they were tacitly accepted as citizens of Bordeaux, although they still labored under certain disabilities, for the removal of which they and members of the Astruc and Lange families petitioned the king in 1757. In 1759 (July 14), letters patent of complete registration were granted to them.

Emanuel, Israel, Jacob, Joseph, Manuel, and **Salon Dalpuget** were the most prominent members of the family, all being engaged in commerce at Bordeaux. Several of the female members were converted to Christianity.

D. A. M. F.

DALY, CHARLES P.: Historian and jurist; born in New York city 1816; died in 1899. Daly was of Roman Catholic parentage. He was admitted to the bar at the age of twenty-three, and, after serving for a year in the state legislature, was elected judge of the court of commons pleas of New York in 1844, and filled the judicial office for forty-two years, for twenty-seven years as chief justice, retiring in 1886.

Judge Daly's profound scholarship, unquestioned integrity, brilliant conversational gifts, and commanding dignity combined to give him for many years a unique position in American life. He was deeply interested in Jewish affairs and Jewish history, and lost no opportunity to express disapproval of anti-Semitism. He was often chosen to be the orator at important Jewish functions, as, for instance, on the occasion of the celebration in 1872 of the fiftieth anniversary of the Hebrew Orphan Asylum in New York city; and again in 1883 on the laying of the corner-stone of the new building erected by that society, both of these addresses being published at the time. The former, as expanded by him in 1893, was reprinted in book form, with annotations by Max J. Kohler, under the title "Settlement of the Jews in North America," New York, 1893. It was one of the earliest works on the subject of American-Jewish history, and is still authoritative. Judge Daly was an honorary member of the American Jewish Historical Society, and several times presided over sessions of its annual meetings.

Bibliography: Max J. Kohler, in *The American Hebrew*, Sept. 22, 1899, reprinted in pamphlet form; *Publications Am. Jew. Hist. Soc.* No. 9, pp. 157-160.

A. M. J. K.

DAMA, SON OF NETINA: The name of a non-Israelite held up by Rabbi Eliezer and other rabbis to his brethren as an example of true love and piety toward parents. He lived in Ashkelon, and occupied there a high position, being *πατὴρ βουλῆς*, "head of the council" (Pesiḳ. R. 23). One day, when grossly insulted by his mother in the presence of his colleagues, he preserved his reverential attitude toward her, and no angry utterance escaped his lips. Dama was once in possession of a precious stone wanted to complete the breastplate of the high priest. The agents commissioned to buy it happened to come when his father was asleep, the key of the box containing the stone being under his pillow. No offer of the agents could induce Dama to disturb his father. The agents were disappointed and went away. It is further related that in the year following, a red heifer was born in his herd, which compensated for the sacrifice incurred in carrying out his filial duty. As regards the name "Netina," it can not be determined with certainty whether it is that of a male or of a female. "Netina" may mean one of the Netinim (see Mishnah Ḳid. i. 1; compare the name *Δημαίνετος*, name of a popular leader in the city of Gaza; Josephus, "Ant." xiii. 12, § 3).

Bibliography: *Ḳid.* 31; *'Ab. Zarah* 23; *Yer. Peah* i. 1; *Ḳid.* i. 7; *Pesiḳ. R.* 23.

DAMAGE: Money recoverable as amends for a wrong or injury sustained. The simple and clear rule as to the obligation of a person who has caused damage to his fellow man is to give full compensation, and is expressed in the words "He that kindled the fire shall surely make restitution" (Ex. xxii. 6). Where one causes physical injury to his fellow man the following five things are to be considered in determining the amount of compensation due to the injured person: (1) "nezeḳ," the permanent loss, if any, caused by the injury; (2) "shebet," the temporary loss during the illness caused by the injury; (3) "ẓa'ar," the pain and suffering of the injured person; (4) "rippui," the cost of the cure required for the restoration of health; (5) "boshet," the insult involved in the injury. The rule "as he hath done so shall it be done to him: breach for breach," etc. (Lev. xxiv. 19), has been interpreted by Jewish tradition and practise to refer to compensation, and does not demand actual mutilation of the body, as a literal interpretation might imply. Compensation had to be given by the offender not only for injuries inflicted by himself, but also for those caused by his property. The latter are brought under four heads ("arba'ah abot neziḳin"), namely: (1) a goring ox, (2) a pit, (3) a feeding animal, (4) fire. See Baba Ḳamma; Neziḳin.

S. S. M. F.

DAMASCUS: An ancient city of Asia Minor, situated at the foot of the Anti-Lebanon, 180 miles south by west of Aleppo; now the capital of the vilayet of Syria. In the Old Testament it is called דמשק (Dammeseḳ), or דרמשק (Darmeseḳ, I Chron. xviii. 5 *et seq.*; II Chron. xvi. 2, xxiv. 23), or דומשק (Dummeseḳ, II Kings xvi. 10). The form with "r" is Aramaic, although the Egyptian lists also contain a "Saramaski," which W. Max Müller ("Asien und Europa," p. 227) explains as "Tiramaski." The usual Egyptian transcription is "Timasḳu" (*ib.* pp. 162, 234). In the cuneiform inscriptions the name reads "Dimashḳi" or "Dimashḳa," the latter form being used also in the El-Amarna tablets (ed. Winckler, 142, 21), where, however, the form "Timashgi" (*ib.* 139, 63) also occurs. The Arabs called the city "Dimashḳ-al-Sham," for which "Al-Sham" is to-day usually substituted.

Position.

The present Damascus, which is undoubtedly situated on the site of the ancient city, covers the northwestern part of the beautiful and fruitful plain Al-Ghuṭa, south of the Anti-Lebanon. This plain is intersected by numerous mountain streams, one of which, Nahr Barada ("Amana," II Kings v. 12; the "Chrysorrhoas" of the Greeks), on leaving the mountains, separates into seven branches, two of which pass through Damascus. The rich vegetation of the plain, as well as the numerous gardens behind which the city lies half concealed, presents an enchanting view to the traveler approaching from the desert, who now understands why both Jews (Bab. 'Er. 19a) and Bedouins have called the city a paradise.

The situation is particularly favorable to commerce. Caravan routes of great antiquity, stretching from the shores of the Mediterranean, from Arabia, from the Euphrates, and from northern Syria converge at Damascus and serve to make it a commercial center of great importance. That inhabitants of the city, even in ancient times, utilized its favorable location is evident from I Kings xx. 34. Among the articles of commerce, Ezek. xxvii. 18 mentions wine of Helbon and other commodities. Unfortunately, however, these passages, owing to the corruption of the text, are no longer intelligible (compare Cornill, Bertholet, Kraetzschmar, and Toy *ad loc.*).

In Biblical Times.

That Josephus ("Ant." i. 6, § 4) mentions Uz, the son of Aram, as founder of Damascus, has little value, as the tradition probably reflects later conditions only. Similarly, the statement of Nicholas of Damascus ("Ant." i. 7, § 2), according to which Abraham immigrated to Damascus and ruled there for a time, probably rests upon later combination (compare Justin, xxxvi. 2), and finds no firm support in the ambiguous statement of Gen. xv. 2. The oldest reliable data in regard to the city are found on the Egyptian monuments, to which the El-Amarna tablets may be added. Damascus is mentioned among the cities captured by Thothmes III. From the El-Amarna tablets it appears that under Amenophis III. the Egyptian dominion in these districts began to totter, as the Hittites continually invaded the country. If the identification of Max Müller (see above) is correct, Rameses III. succeeded in conquering the city. At the time of David, Damascus, together with the neighboring territory, was inhabited by Arameans. They endeavored to come to the assistance of their hard-pressed fellow tribesmen of Zobah; but David overthrew them, so that Damascus was compelled to recognize his authority (II Sam. viii. 5 *et seq.*). Under Solomon the fruits of this conquest were lost. A former subject of the King of Zobah, Rezon (LXX. 'Εσρώμ), the son of Eliadah, declared himself King of Damascus and founded a kingdom which was destined to give the Israelites considerable trouble (I Kings xi. 23 *et seq.*). The struggles with the Arameans of Damascus, of which the Jewish kings skilfully availed themselves (*ib.* xv. 18 *et seq.*), constitute a great part of the history of the Ephraimitic kingdom (*ib.* xx. 22; II Kings vi., viii. 12, x. 32, xiii.; Amos i. 3). Only when the danger threatening from Assyria became more obvious did a later king, Rezin (or, more correctly, Raẓun) of Damascus, change his policy. He formed a coalition with Pekah of Ephraim, with whose help he determined to enter upon the conquest of Judah (Isa. vii. 1–16). Ahaz meanwhile summoned the aid of the Assyrians; and the new policy finally led to the conquest of Damascus by an Assyrian army in 732 B.C. (II Kings xvi. 9). Concerning the city and its inhabitants during a period of 200 years there is no information. According to I Kings xx. 34, a quarter of the city was assigned to the Ephraimitic merchants. II Kings xvi. 10 *et seq.* mentions an altar in the city, of which Ahaz ordered a copy to be made; otherwise information on the religion of the Damascenes is confined to the facts which may be gleaned from the theophorous names of the kings (compare Baethgen, "Beiträge zur Semitischen Religionsgeschichte," pp. 66 *et seq.*).

In Post-Biblical Times.

After its conquest by the Assyrians, Damascus continued to be of a certain importance because of its favorable position. While little can be gleaned from the references contained in the Later Prophets (Jer. xlix. 23 *et seq.*; Ezek. xxvii. 18, xlvii. 16 *et seq.*; Zech. ix. 1), it is clear that the city, like other places in Syria, exchanged Assyrian for Babylonian rule, and this again for that of the Persians and of Alexander the Great. After the battle of Issus (333 B.C.), Damascus, when the Persian king had left behind his harem and his treasure, was treacherously delivered over to Parthenio (Curtius, iii. 13). During the following period, although the Ptolemies occasionally succeeded in exerting dominion over the city, it was principally in possession of the Seleucids; Antioch, however, and not Damascus, was made their capital.

In the history of the Maccabees the city is mentioned several times in connection with the campaigns of Jonathan (I Macc. xi. 62, xii. 32); and upon the division of the Seleucid empire it became for a short time the capital of a smaller kingdom (Josephus, "Ant." xiii. 13, § 4; 15, § 1). But in the year 85 Antiochus XII. was vanquished by the Nabatæan princes, who as a consequence acquired control over Damascus (*ib.* xiii. 15, §§ 1–2). About 70 B.C. Ptolemy of Chalcis endeavored to take the city, for which reason Aristobulus, son of the Jewish queen Alexandra, marched to its aid (*ib.* xiii. 16, § 3). But in 65 the Romans put an end to this period of changes by conquering Damascus and incorporating it with the province of Syria. Damascus obtained, however, the relative independence of a Hellenic city, and belonged to the municipal confederation of the Decapolis (Schürer, "Gesch." 3d ed., iii. 118 *et seq.*). The importance of the district which belonged to Damascus may be seen from the fact that it was adjacent to that of Sidon (Josephus, "Ant." xviii. 6, § 3). For a time the city was again under the dominion of the Nabatæan kings, inasmuch as the Arabian king Aretas (II Cor. xi. 32) had an ethnarch there, the Romans having probably accorded this privilege for the purpose of propitiating him.

In Talmudic Times.

At this time about 10,000 Jews lived at Damascus, governed by an ethnarch (Acts ix. 2; II Cor. xi. 32). The attraction which Judaism exercised at that time over the pagans was so great that many men and women were converted to that religion. Paul succeeded, after a first rebuff, in converting many of the Jews of Damascus to Christianity (49 C.E.). This irritated the Jewish ethnarch to such a degree that he attempted to arrest Paul; and the latter's friends only saved his life by lowering him in a basket out of a window built in the wall of the city. Many Jews were murdered by the pagan inhabitants upon the outbreak of the great war of liberation (Josephus, "B. J." ii. 20, § 2; vii. 8, § 7). Later, Damascus, as the coins show, obtained the title of metropolis; and under Alexander Severus, when the city was a Christian colony, it became the seat of a bishop, who enjoyed a rank next to that of the Patriarch of Antioch. In the fifth century, under the rule of the Eastern empire, being the Talmudic time, Jews were living at Damascus; for the rabbi Rafram bar Pappa went to pray in the synagogue of Jobar (Bab. Ber. 50a). During the conflicts between the Byzantines and the Persians the city frequently suffered heavily. When Syria was conquered by the Persians (614), the Jews of Damascus, profiting by the presence of the invaders, joined with their coreligionists of Palestine to take vengeance on the Christians, especially those of Tyre. In 635 Damascus fell into the hands of the Mohammedans; the inhabitants, by their timely and voluntary surrender, succeeding in saving fifteen Christian churches.

Under Arab Rule.

The rule of the Ommiads brought a new period of splendor to the city, which now became the capital of that califate. The Jewish community continued, and certainly existed in 970; "for," says a historian, "Joseph ben Abitur of Cordova, having lost all hope of becoming the chief rabbi of that city, went to Palestine in that year, and settled at Damascus" (Abraham ibn David, "Sefer ha-Ḳabbalah," in Neubauer, "Med. Jew. Chron." i. 69; Conforte, "Ḳore ha-Dorot," 5b). This period terminated with the advent of the Abbassids, and the city suffered during the following centuries from continuous wars. Fortunately for the Jews, it resisted the siege of the Second Crusade (1147). Some time afterward a large number of Palestinian Jews sought refuge at Damascus from the enormous taxes imposed upon them by the Crusaders, thus increasing the community.

G. F. Bu.

Little information exists concerning the Jews in Damascus during the following centuries. The few data are given by travelers who visited the place. In 1128 Abraham ibn Ezra visited Damascus (though compare the note of Harkavy, "Ḥadashim gam Yeshanim," vii. 38). According to Edelmann ("Ginze Oxford," p. ix.), Judah ha-Levi composed his famous poem on Zion in this city; but Harkavy (*l.c.* p. 35) has shown that "Al-Sham" here designates Palestine and not Damascus. In 1267 Naḥmanides visited Damascus and succeeded in leading a Jewish colony to Jerusalem.

Benjamin of Tudela visited Damascus in 1170, while it was in the hands of the Seljukian prince Nur al-Din. He found there 3,000 Rabbinite Jews and 200 Karaites. Jewish studies flourished there much more than in Palestine; according to Bacher it is possible that during the twelfth century the seat of the Palestinian academy was transferred to the city. The principal rabbis of the city were: Rabbi Ezra and his brother Sar Shalom, president of the tribunal; Yussef Ḥamsi, R. Maẓliaḥ, R. Meïr, Yussef ibn Piat, R. Heman, the parnas, and R. Ẓadok, physician.

About the same time Pethahiah of Regensburg was here. He found "about 10,000 Jews, who have a prince. The head of their academy is Rabbi Ezra, who is full of the knowledge of the Law; for Rabbi Samuel, the head of the Academy of Babylon, ordained him" (ed. Benisch, p. 53). It was a Damascus rabbi, Judah b. Josiah, who, toward the end of the twelfth century, was "nagid" in Egypt (Sambari, in "Med. Jew. Chron." i. 133). At a later period another nagid, David b. Joshua, also came from Damascus (Grätz, "Gesch." ix., note i.).

Plan of the Modern City of Damascus.

(After Baedeker, "Palestine and Syria.")

In 1210 a French Jew, Samuel b. Simson, visited the city. He speaks of the beautiful synagogue situated outside the city (Jobar) and said to have been constructed by Elisha (see below; compare "Oẓar Ṭob," 1878, p. 38; Carmoly, "Itineraires," p. 136).

Twelfth to the Fifteenth Century.

Under Saladin the city again enjoyed considerable importance; but upon his death the disturbances began anew, until in 1516 the city fell into the hands of the Turks, since which time it has declined to the rank of a provincial town.

It seems probable that Al-Ḥarizi also visited Damascus during the first decade of the thirteenth century. At least he mentions the city in the celebrated forty-sixth "Makamah."

Toward the end of the thirteenth century Jesse b. Hezekiah, a man full of energy, arose in Damascus. He was recognized by Sultan Kelaün of Egypt as prince and exilarch, and in 1289 and in June, 1290, in conjunction with his twelve colleagues, he put the anti-Maimonists under the ban (Grätz, "Gesch." vii. 186-195).

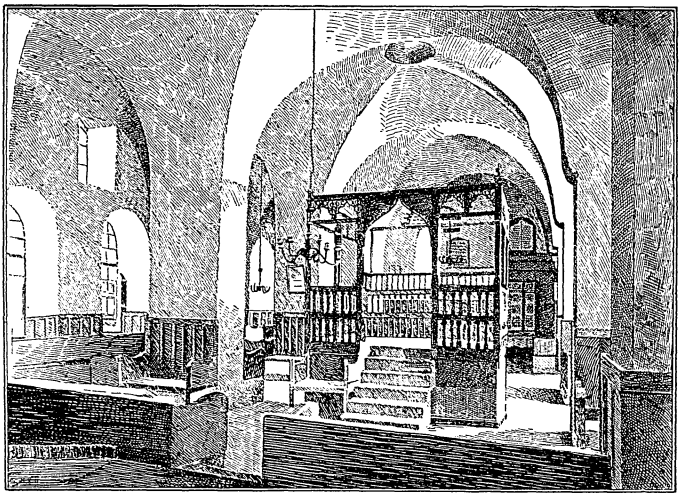
The letters of the rabbis of Damascus and of Acre have been collected in the "Minḥat-Ḳena'ot" (a compilation made by Abba Mari, grandson of Don Astruc of Lunel). No data are available for the fourteenth century. Estori Farḥi (1313) contents himself with the mere mention of Damascene Jews journeying to Jerusalem (Zunz, "G. S." ii. 269). A manuscript of David Ḳimḥi on Ezekiel was written by Nathan of Narbonne and collated with the original by R. Ḥiyya in Damascus, Ab 18, 1375 (Neubauer, "Cat. Bodl. Hebr. MSS." No. 316). The Jewish community of Damascus continued its existence under the sultans (Borgites and Mamelukes) of Egypt, who conquered Syria: for the Jewish refugees of Spain established themselves among their coreligionists in that city in 1492, constructing a synagogue which they called "Khata'ib." The anonymous author of the "Yiḥus ha-Abot" (1537; published by Uri b. Simeon in 1564) also speaks of the beauties of Damascus; and of the synagogue at Jobar, "half of which was constructed by Elisha, half by Eleazar b. 'Arak" (Carmoly, *l.c.* p. 457; compare similar accounts by Raphael of Troyes and Azulai, *ib.* p. 487).

Elijah of Ferrara (1438) had come to Jerusalem and had a certain jurisdiction in rabbinical matters over Damascus as well. He speaks of a great plague which devastated Egypt, Syria, and Jerusalem; but he does not say in how far the Jews of the first-named city suffered (Carmoly, *l.c.* p. 333). Menahem Ḥayyim of Volterra visited Damascus in 1481, and found 450 Jewish families, "all rich, honored, and merchants." The head of the community was a certain R. Joseph, a physician ("Jerusalem," i. 211).

Obadiah of Bertinoro (1488) speaks in one of his letters of the riches of the Jews in Damascus, of the beautiful houses and gardens (ed. Neubauer, p. 30). A few years later (1495) an anonymous traveler speaks in like eulogistic terms (*ib.* p. 84). He lived with a certain Moses Makran, and he relates that the Damascene Jews dealt in dress-goods or engaged in some handicraft. They lent money to the Venetians at 24 per cent interest.

An anonymous Jewish traveler (see "Shibḥe Yerushalayim," 51b; and Graetz, "Hist." Hebrew transl., vii. 27) who arrived a few years after the Spanish immigration, found at Damascus 500 Jewish households; also a Karaite community whose members called themselves "Muallim-Ṣadaḳah"; and a more important Rabbinite community, composed of three groups and possessing three beautiful synagogues. One of these belonged to the Sephardim; another, to the Moriscos (Moorish Jews) or natives; and the third, to the Sicilians. In each synagogue there was a preacher, who read the works of Maimonides to the pious every day after the prayer. The preacher of the Sephardim was Isḥaḳ Mas'ud, that of the natives Shem-Ṭob al-Furani, and that of the Sicilians Isaac Ḥaber. There were also two small schools for young students of the Talmud, containing respectively thirty and forty pupils.

Sixty Jewish families were living in the village of Jobar, one mile from Damascus, who had a very beautiful synagogue. "I have never seen anything like it," says the author; "it is supported by thirteen columns. Tradition says that it dates from the time of the prophet Elisha, and that he here anointed King Hazael [see also Sambari in Neubauer, "Med. Jew. Chron." i. 152]. R. Eleazar ben 'Arak [tannaite of the first century] repaired this synagogue." In order to indicate, finally, that the city was even then under the Ottoman rule, the narrator adds that the people of Damascus had just received a governor ("na'ib") from Constantinople.



Interior of a Damascus Synagogue.

(After a photograph.)

In the Sixteenth Century.

The "Chronicle" of Joseph Sambari (finished 1672) contains the names of a number of rabbis of note who lived here during the sixteenth century. He says that the Jewish community lived chiefly in Jobar, and he knows of the synagogue of Elisha and the cave of Elijah the Tishbite. At the head of the community was a certain Abu Ḥaṣirah (so-called from a peculiar kind of headdress which he wore), who was followed by 'Abd Allah ibn Naṣir. Of the rabbis of Damascus proper he mentions Joseph Ḥayyaṭ; Samuel Aripol, author of "Mizmor le-Todah"; Samuel ibn 'Imran; Joseph al-Ṣa'iḥ; Moses Najjarah, author of "Leḳaḥ Ṭob"; Ḥayyim Alshaich; Joseph Maṭalon; Abraham Galante ("Med. Jew. Chron." i. 152). In this home of learning there was also a model-codex of the Bible called "Al-Taj" (the Crown; *ib.* p. 119). In 1547 Pierre Belon visited Damascus in the train of the French ambassador M. de Fumel. He speaks of the large number of Jews there; but makes the singular confusion of placing in this city the events connected with the famous Aḥmad Shaiṭan of Egypt ("Revue Etudes Juives," xxvii. 129).

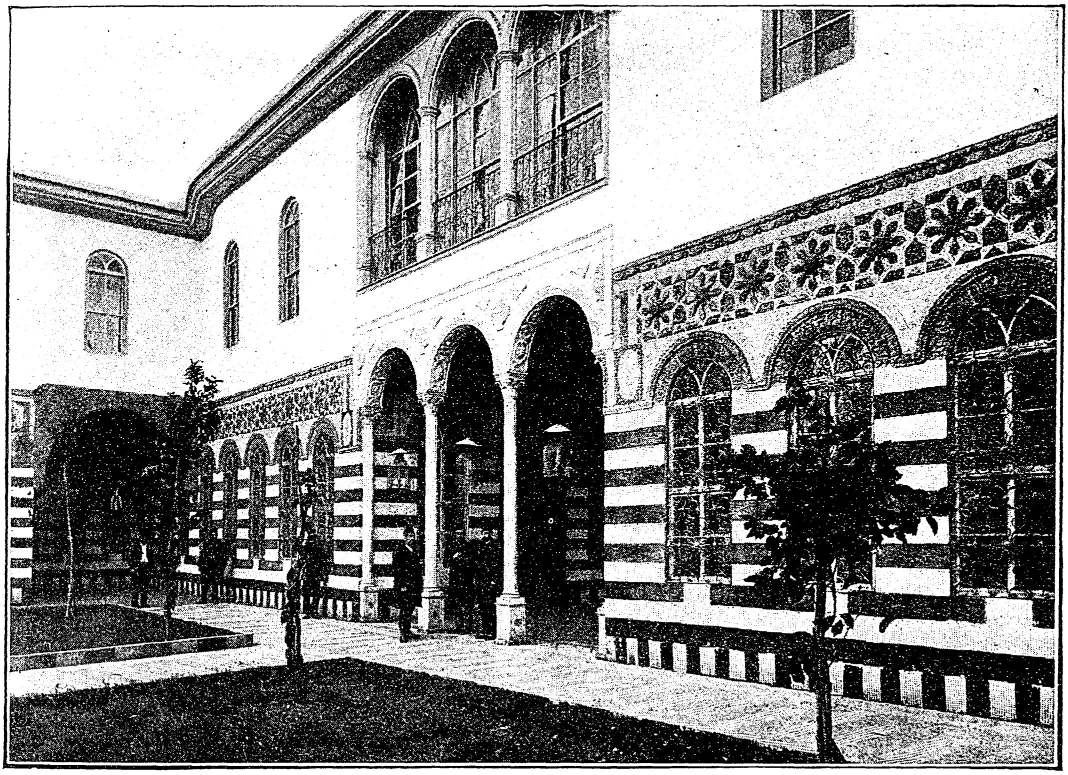
Among the spiritual leaders of Damascus in the sixteenth century may be mentioned: Jacob Berab, who, in the interval between his sojourns in Egypt and at Safed, lived there for some years (*c.* 1534); Ḥayyim Vital the Calabrian (1526–1603), for many years chief rabbi of Damascus, and the author of various cabalistic works, including "Eẓ-Ḥayyim"; Samuel ben David the Karaite (not "Jemsel," as Carmoly, "Itinéraires," p. 511, has it), who visited Damascus in 1641, mentions the circumstance that the Karaites there do not read the Hafṭarah after the Pentateuch section (*ib.* p. 526; but see Zunz, "Ritus," p. 56). Moses Nagara; his son, the poet Israel Nagara; and Moses Galante (died in 1608), the son of Mordecai Galante, were also among the prominent men of the sixteenth century. The most celebrated rabbis of the seventeenth century were Josiah Pinto, a pupil of Jacob Abulafia, and author of the "Kesef-Nibḥar" ("Med. Jew. Chron." i. 153; "Ḳore ha-Dorot," 49b), and his son-in-law, Samuel Vital, who transcribed and circulated a large number of his father's cabalistic manuscripts. During the eighteenth century nothing important is known of the community.

In the Nineteenth Century.

Some information is obtainable from travelers who visited Damascus during the nineteenth century. Alfred von Kremer, in "Mittel-Syrien und Damaskus" (1853), states that in the municipal government of the city two Christians and one Jew had places; the number of Jews was 4,000, only 1,000 of whom, however, paid the poll-tax; the last Karaite had died there some fifty years previously, the Karaite synagogue being then sold to the Greeks, who turned it into a church ("Monatsschrift," iii. 75). Benjamin II. gives the same number of inhabitants.

He describes the synagogue at Jobar (to the northeast of the city) thus:

> "The structure of this ancient building reminds one of the Mosque Moawiah; the interior is supported by 13 marble pillars, six on the right and seven on the left side, and is everywhere inlaid with marble. There is only one portal by which to enter. Under the holy shrine . . . is a grotto . . . the descent to which is by a flight of about 20 steps. According to the Jews, the Prophet Elisha is said to have found in this grotto a place of refuge. . . . At the entrance of the synagogue, toward the middle of the wall to the right, is an irregularly formed stone, on which can be observed the traces of several steps. Tradition asserts that upon this step sat King Hazael when the Prophet Elisha anointed him king" ("Eight Years in Asia and Africa," pp. 41 *et seq.*).



COURT-YARD OF A JEWISH RESIDENCE AT DAMASCUS.

(From a photograph by Bonfils.)

Benjamin II. also speaks of valuable copies of parts of the Bible to be found in Damascus; though the dates he gives (581 and 989) are unreliable. Neubauer mentions a copy of the Bible which belonged to Elisha ben Abraham b. Benvenisti, called "Crescas," and which was finished in 1382 ("Med. Jew. Chron." i. 21).

Damascus has had eight chief rabbis during the last hundred years, namely: (1) Joseph David Abulafia (1809–16). (2) Jacob Antebi (1816–1833). (3) Jacob Perez (1833–48). (4) Aaron Bagdadi (1848–66). (During the next two years the office of chief rabbi was vacant, owing to internal quarrels.) (5) Ḥayyim Ḳimḥi of Constantinople (1868–72). (6) Mercado Kilḥi of Nish (1872–76). (7) Isaac Abulafia (1876–88). (8) Solomon Eliezer Alfandari, commonly called "Mercado Alfandari" of Constantinople, who was appointed by an imperial decree in 1888 (still in office in 1901).

During the nineteenth century the Jews of Damascus were several times made the victims of calumnies, the gravest being those of 1840 and 1860, in the reign of the sultan 'Abd al-Majid. That of 1840, commonly known as the DAMASCUS AFFAIR, was an accusation of ritual murder brought against the Jews in connection with the death of Father Thomas. The second accusation brought against the Jews, in 1860, was that of having taken part in the massacre of the Christian Maronites by the Druses and the Mohammedans. Five hundred of the last named, who had been involved in the affair, were hanged by the grand vizier Fuad Pasha. Two hundred Jews were awaiting the same fate, in spite of their innocence, and the whole Jewish community had been fined 4,000,000 piasters. The condemned Jews were saved only by the official intervention of Fuad Pasha himself; that of the Prussian consul, Dr. Wetzstein; of Sir Moses Montefiore of London, and of the bankers Abraham Camondo of Constantinople and Shemaya Angel of Damascus. From that time even down to the present day, blood accusations have several times been brought against the Jews; these, however, have never provoked any great excitement.

The present Jewish community of Damascus numbers 11,000 (though in 1894 Socin-Benzinger, in Baedeker's "Palestine," 2d ed., estimated their num-

Situation in 1901.

ber as 6,320) persons in a total population of 160,000 inhabitants. It has eight synagogues, besides the ancient one of Jobar; several of them, according to local traditions, date from the sixteenth century. The entire administration of the community is concentrated in the hands of the chief rabbi, his secretary, and some rabbis. Twice a year, at Passover and at Sukkot, all the families are taxed by the chief rabbi in proportion to their means, and the revenues are collected accordingly. This sum is used to defray the salaries of the chief rabbi, the rabbis who study the Talmud at the yeshibah, and the slaughterers at the butcher-shops; also to relieve the poor of the community. The chief rabbi ("ḥakam bashi") represents the community in affairs with the government. There is also a spiritual chief to decide in religious questions, the incumbent in 1901 being Isaac Abulafia. On the peculiarities of the ritual, which Damascus has in common with other Syrian communities, see Zunz, "Ritus," pp. 55, 56.

There are four Jewish benevolent societies in Damascus: (1) "Aḥe-Ezer" (mutual help), distributing money and food to the needy Jews of the city; (2) "Yishma' Yisrael," furnishing dowries for poor young girls; (3) "Biḳḳur Ḥolim," for relief of the sick poor; (4) the Ladies' Society, helping indigent families and women in childbirth.

The majority of the Jewish population are engaged as engravers on copper and wood, or as weavers, carpenters, and smiths. There are a few bankers and some small merchants. Four or five Jews are employed in the government offices, among them being Jacob Ades Effendi, inspector-general of real estate on the civil list in the vilayet of Damascus. But the mass of the population lives in misery. The members of the rabbinate, who form a kind of corporation, study in the yeshibot or in libraries belonging to pious families. Isaac Abulafia, the spiritual leader, is the only rabbinical author of the present time. Of the eight works which he has written, five are entitled "Pene-Yiẓḥaḳ"; one, "Leb-Nishbar"; and two are collections of discourses. Some of these books are still in manuscript.

Aside from the synagogues mentioned above, there is a yeshibah containing many books and an ancient genizah. In 1880 the Alliance Israélite Universelle founded a boys' school (which in 1899 had 229 pupils on its roll), and in 1883 a school for girls (298 on the roll in 1899). Two of the most important Talmud Torahs are now under the supervision of the Alliance: in 1899 they had 419 on their rolls. The Anglo-Jewish Association also contributes to the support of all these schools.

In 1902 a dispensary for the Jews was opened in Damascus by Edward D. Stern of London ("Jew. Chron." Jan. 2, 1903, p. 24).

DAMASCUS AFFAIR: Accusation of ritual murder brought against the Jews of Damascus in 1840. At that time Damascus, together with Syria, belonged to Mohammed Ali, pasha of Egypt, who had revolted against the authority of his suzerain, the sultan Maḥmud of Constantinople. The governor of Damascus was an Egyptian Arab, Sherif Pasha by name.

On Feb. 5, 1840, Father Thomas, originally from Sardinia, and the superior of a Franciscan convent at Damascus, disappeared with his servant. This monk, who practised medicine, was very well known in the Jewish and Mohammedan quarters, as well as among the Christians. Some days previous he had had a dispute with a Turkish muleteer, who had heard him blaspheme Mohammed, whereupon the Turk is reported to have said: "That dog of a Christian shall die by my hand." Upon Thomas' disappearance the French consul at Damascus, Ratti Menton, who was an enemy to the Jews, following the advice of certain monks, instituted investigations in the Jewish quarter; and the governor, Sherif Pasha, pretending to act merely in accordance with the friendly relations existing between the governments of Louis Philippe and Mohammed Ali, aided the French consul in a culpable way. A confession was extorted by torture from a Jewish barber named Negrin, and eight of the most notable Jews, among them Joseph Lañado, Moses Abulafia, and Farḥi, were imprisoned and tortured. Their teeth and beards were pulled out, they were burned, and finally tempted with gold, to persuade them to confess an imaginary crime. Lañado, a feeble old man, died under this treatment. Moses Abulafia became a Mohammedan in order to escape the torture. In spite of the stoic courage displayed by the sufferers, Sherif Pasha and Ratti Menton agreed on the guilt of the accused in view of the words resembling a confession that had escaped them in their agony. While Ratti Menton published libels against the Jews in French and in Arabic, Sherif Pasha wrote to his master, Mohammed Ali, demanding authorization to execute the murderers of Father Thomas. In the mean time the populace fell upon the synagogue in the suburb of Jobar, pillaged it, and destroyed the scrolls of the Law.

The Jewish communities of Europe were appealed to, and public meetings were held in London, Paris, and even New York and Philadelphia. Especially important was a meeting called by the lord mayor of London at the Mansion House, London, July 3, 1840. As a result the lawyer Isaac Crémieux and the Orientalist Solomon Munk from France, and Sir Moses Montefiore from England were sent as mediators to Alexandria to plead with the khedive. They arrived at Alexandria Aug. 4, and after repeated interviews with Mohammed Ali, obtained from him, on Aug. 28, the unconditional release and recognition of the innocence of the nine prisoners who still remained alive of the thirteen imprisoned. They then went to Constantinople, and obtained from the sultan Majid a firman declaring the accusation of ritual murder to be absurd (see Blood Accusation). The Austrian consul at Damascus, Merlatto, and the Austrian consul-general at Alexandria defended the rights of the Jews during all the incidents arising in this celebrated case. It was in part the Damascus affair which suggested to some French Jews later the idea of founding the Alliance Israélite Universelle.

DAMIANI, PETER: Italian prelate; born at Ravenna 1007; died at Faenza 1072. About 1035 he entered the convent of Fonte Avellana near Gubbio, of which he became abbot. Together with Hildebrand, subsequently Pope Gregory VII., and Abbot Desiderius of Monte Casino, Damiani belonged to the most zealous champions of Church reform. In 1057 he was appointed Cardinal-Bishop of Ostia. At the instance of an Egyptian ecclesiastic, Honestus, he wrote two small controversial pamphlets to serve as a guide in religious disputations against the Jews, although he himself had no taste for such polemics.

In the first of these pamphlets, "Antilogus Contra Judæos," he sought, by means of numerous passages from the Old Testament, such as those relating to the Creation, the building of the Tower of Babel, the triple priestly benediction, the thrice-repeated "Holy," and the Messianic passages, to prove the Christian doctrines of the Trinity, the Messiah, and the divine sonship of Jesus. In the second, entitled "Dialogus Inter Judæum Requirentem et Christianum e Contrario Respondentem," he endeavored to refute—by claiming that all of the laws referred to are to be interpreted spiritually—the objection raised by the Jews that the Christians fail to observe the ceremonial law, although Jesus declared that he came to fulfil that law.

DAMPIERRE (Hebr. דמפיר, דנפירא, or דפירא): Village of Champagne, in the department of the Aube, France; not to be confounded with "Dompaire," Vosges, as is sometimes done (Zunz, "Z. G." p. 33, and Renan-Neubauer, "Les Rabbins Français," p. 444). In the Middle Ages there was a somewhat important Jewish community in this village. King Philippe-Auguste, after an agreement with the Countess of Champagne, and Gui, Seigneur of Dampierre, in 1206, ordered the Jews to affix a special seal to the documents recording their loans, and forbade them to lend money on holy vessels or on the lands of the Church. During the years 1212, 1220, and 1225 the Jews had among their debtors the seigneurs of Dampierre and the abbey of Saint-Loup of Troyes.

Rabbis: (1) Isaac ben Samuel the Elder, abbreviated ר"י, surnamed "the Saint" (1120-95); (2) his son Elḥanan, martyred in 1184; (3) Joseph ben Simeon; (4) Isaac ben Abraham, abbreviated ריבא or ריצבא, called sometimes "Isaac the Younger" to distinguish him from Isaac ben Samuel; (5) Isaac ha-Laban ben Jacob.

G. S. K.

DAMROSCH, LEOPOLD: German-American violinist and conductor; born at Posen, Prussia, Oct. 22, 1832; died in New York Feb. 15, 1885. He commenced to learn the violin at the age of nine, but owing to his parents' opposition, who wished him to study medicine, he was compelled to study in the house of friends. In 1851 he entered Berlin University, where he studied medicine, and was graduated with high honors three years later. He then returned to Posen, and soon forsook medicine in order to devote himself entirely to music. In 1856 he appeared at Magdeburg as a violin virtuoso, and afterward made a tour of the chief cities of Europe. He was one of the famous band who sat under Liszt at Weimar. Liszt made him solo violinist in the ducal orchestra, and dedicated "Tasso" to him, a distinction conferred only upon two other musicians, Wagner and Berlioz.

In 1858 Damrosch married Helene von Heimburg, a singer of talent. He now became director of music at the Stadttheater in Posen, where he remained until 1866, when he accepted the position of director of the Philharmonic Concerts at Breslau. Here he organized a symphony society with an orchestra of eighty members. The society gave twelve annual concerts, and many eminent artists appeared among the performers. Damrosch also established a choral society, and gave recitals as a soloist.

In 1871 Damrosch was invited by the New York Arion Society to become its conductor. He went to America and soon became very successful both as a violinist and as conductor of his own compositions. In 1873 he organized a musical choir. Morris Reno and some twelve other lovers of music met at Damrosch's house and formally pledged themselves to become musical missionaries. Trinity Chapel was secured for a study-room, and on Dec. 3, 1873, was given the first concert of the Oratorio Society, with choir numbering 50 to 60. By the following May the society was able to produce Handel's oratorio "Samson" at Steinway Hall.

For five years Damrosch worked gratuitously for the Oratorio Society (at the time of his death it had a membership of 500, and ranked among the leading choruses of the world). In 1876 Damrosch became conductor of the Philharmonic Society, and in the following year, yielding that place to Theodore Thomas, founded the Symphony Society of New York. In 1880 he received the degree of doctor of music from Columbia College. The next year he planned the great musical festival which was held at the Seventh Regiment Armory, with a chorus of 1,200 voices and an orchestra of 250 instruments. But his crowning success was in 1884, when he successfully established German opera at the Metropolitan Opera House, New York. On the failure of that theater to secure an Italian troupe, he went to Germany, and in five weeks brought back a number of artists, who constituted the famous company which first established German opera in America. Damrosch not only personally directed each opera, but at the same time continued his work as director of the Oratorio and Symphony societies. His health broke down under the strain, and he died of pneumonia in the following year.

Damrosch was one of the great conductors of modern times, and no man, except possibly Theodore Thomas, contributed so largely to the cultivation of good music in America. He was a devotee of Wagner. His works include: seven cantatas; symphony in A; the music to Schiller's "Joan of Arc"; an opera, "Sulamith"; and many other pieces.

A. V. E.

DAN.—Biblical Data: 1. The name of Jacob's fifth son (Gen. xxx. 6), whose mother was Bilhah, Rachel's handmaiden (*ib.* xxx. 3, xxxv. 25). He was therefore a full brother of Naphtali (xxx. 8). Dan's name occurs also in Gen. xlix. 16 *et seq.*; Judges xviii. 29; I Chron. ii. 2, and in all the passages where his sons are mentioned (Gen. xlvi. 23 *et seq.*).

The Tribe.

2. "Dan" designates one of the twelve tribes of Israel, both in poetic (Deut. xxxiii. 22; Judges v. 17) and in prose passages (Num. i. 12; ii. 25, 31; Deut. xxvii. 13; Judges xiii. 25, xviii. 12; Ezek. xlviii. 1, 32 *et seq.*; I Chron. xxvii. 22; II Chron. ii. 13); but it generally occurs in combinations such as "the sons of Dan" (Num. i. 38, ii. 25, vii. 66, x. 25, xxvi. 42; Josh. xix. 47), "the generations of Dan" (Num. xxvi. 42), "the tribe of the sons of Dan" (Num. xxxiv. 22; Josh. xix. 40, 48), or, simply, "the tribe of Dan" (Ex. xxxi. 6, xxxv. 34, xxxviii. 23; Lev. xxiv. 11; Num. i. 39, xiii. 12; Josh. xxi. 5, 23). The following are detached details from the history of the tribe given in the Old Testament. The artist Aholiab or Oholiab, who took part in the construction of the Tabernacle (Ex. xxxi. 6, xxxv. 34, xxxviii. 23), was a member of this tribe, as was also the mother of a man who blasphemed the name of Yhwh (Lev. xxiv. 11). At the time of Moses, Dan is represented as one of the larger tribes of the children of Israel, and as numbering 62,700 men of twenty years of age and upward (Num. i. 39, ii. 26). Somewhat later, when the tribe of Benjamin, for instance, is reported as having only 35,400 (Num. i. 37) or 45,600 men (*ib.* xxvi. 41), the number in the tribe of Dan is given as 64,400 (*ib.* xxvi. 43). Its men able to bear arms were among the three tribes (Dan, Asher, and Naphtali) whose army in the wilderness of Sinai covered the northern flank (Num. ii. 25–31, x. 25–27). Ammiel, one of the twelve spies (*ib.* xiii. 12), belonged to Dan; and its prince was Bukki (*ib.* xxxiv. 22). On entering Canaan the representatives of Dan, together with those of Reuben, Gad, Asher, Zebulun, and Naphtali, took their position on Ebal, the mount of the curse (Deut. xxvii. 13). In Moses' blessing Dan is characterized as "a lion's whelp: he shall leap from Bashan" (*ib.* xxxiii. 22). The latter clause, however, does not fit Dan, since that tribe did not live in the well-known plain of Bashan east of the Jordan.

The Territory.

The land assigned to the tribe of Dan was in western Canaan, its several cities and boundaries being enumerated in Josh. xix. 40–46. Noteworthy among the cities are Zorah, Eshtaol, Thimnathah or Timnah, Ajalon (near which was fought the famous battle described in Josh x. 12), and Ekron, which is found in the cuneiform inscriptions as "Amḳarruna." On the north the territory of Dan ended opposite Joppa, the modern Jaffa. This territory, not very extensive originally, was soon diminished by its dangerous neighbors, the Philistines. It is not surprising, therefore, that the Danites had great difficulty in conquering the country that had been assigned to them (Josh. xix. 47; Judges xviii. 1). Accordingly, they sent a deputation to find a district suitable for the reception of a part of the tribe. This was found in the vicinity of the city of Laish (Judges xviii. 7–27; see below, 3). Another indication that the tribe of Dan was harassed is found in the sentence "Why did Dan remain in ships?" (Judges v. 17). This probably had reference to the fact that members of the tribe of Dan had enlisted on the ships of the Phenicians (see Budde, "Kurzer Handcommentar," 1897, and Nowack, "Handcommentar," 1900).

The distress of Dan increased when, toward the end of the period of the Israelitish judges, the Philistines, receiving reenforcements from their former home (Guthe, "Gesch. des Volkes Israel," 1899, p. 65), endeavored to invade the middle territories of Canaan (Josephus, "Ant." v. 8, § 1). Then help arose for Dan in the person of the hero Samson (Judges xiii. 2–xvi. 31), whose work was brilliantly continued by Samuel (I Sam. vii. 11), and then by David and other kings. This explains why the tribe of Dan is mentioned in the accounts of David (I Chron. xxvii. 22) and Solomon (II Chron. ii. 13), and in later times (Ezek. xlviii. 1, 2, 32).

3. The later designation for the Canaanite city Laish (Judges xviii. 7, 14, 27, 29) or Leshem (Josh. xix. 47), the latter name being probably derived from "Lesham." The city lay in a deep valley near Beth-rehob (Judges xviii. 28), on the northern frontier of Palestine, at the place where "men come to Hamath" (Num. xiii. 21). According to Josephus ("Ant." v. 3, § 1), it was not far from the sources of the lesser Jordan, and, according to the "Onomastica Sacra" (*s.v.* "Dan"), three or four Roman miles from Paneas. In the Book of Enoch (xiii. 7) it is said that "Dan lay south of the western side of Mt. Hermon." Originally inhabited by Canaanites, it was captured by a part of the tribe of Dan, whose territory in southwestern Palestine was invaded by the Philistines (Josh. xix. 47; Judges xviii. 1 *et seq.*), and who named it after their tribal ancestor (Josh. xix. 47). The mention of the name of Dan as early as the time of Abraham and Moses (Gen. xiv. 14; Deut. xxxiv. 1) is therefore anticipated by the later chronicler (compare "Beth-el" in Gen. xii. 8 and xxviii. 19). Consequently there is no reason to assume, from Gen. xiv. 14 and Deut. xxxiv. 1, the existence of another city of Dan.

The place seems to be identical with Dan-jaan (II Sam. xxiv. 6), which was situated east of the Lake of Gennesaret toward Sidon; and as this was the route on which Laish-Dan lay (Judges xviii. 7, 29), it is probable that "Dan-jaan" is a corruption of

"Dan-jaar" (Dan in the wood), and that this was merely an occasional designation of the city of Dan.

The place is often mentioned in the phrases "from Dan even to Beer-sheba" (Judges xx. 1; I Sam. iii. 20; II Sam. iii. 10; xvii. 11; xxiv. 2, 15; I Kings iv. 25; Amos viii. 14) and "from Beer-sheba even to Dan" (I Chron. xxi. 2; II Chron. xxx. 5); while in Jer. iv. 15 and viii. 16 it is mentioned as a northern frontier town of Palestine.

Dan is also referred to in connection with the ritual; for, according to Judges xviii. 31, a graven image stood there up to the time of the destruction of the sanctuary at Shiloh, which sanctuary is mentioned for the last time in I Sam. iv. 12. Jeroboam I. set up at Dan one of the two golden calves which he intended as symbols for Yhwh (I Kings xii. 29). Many persons of the northern tribes of Israel, therefore, made pilgrimages to Dan (Amos viii. 14; II Kings x. 29); but the city soon fell into the hands of Israel's northern enemies (I Kings xv. 20; II Chron. xvi. 4).

A hill near the valley in which lay the ancient city of Dan is to-day called "Tall al-Ḳaḍi"—*i.e.*, "Hill of the Judge"—the name being, perhaps, a reminiscence of the name Dan = "judge."

E. G. H. E. K.

——**In Rabbinical and Hellenistic Literature:** Dan plays a peculiar rôle in rabbinical tradition. Owing to the fact that his name, as the name of a tribe, is connected with the blasphemer (Lev. xxiv. 11), and with the idolatry of northern Israel (Judges xviii. 30; I Kings xii. 29; Amos viii. 14), while Samson, the judge of the tribe of Dan, proved faithless to his nazirate (Judges xiii. 2), Dan came to be regarded as the black sheep of the house of Jacob. His hatred of Joseph, because he brought to his father evil reports against the sons of Bilhah and Zilpah, induced him to plot against Joseph's life, and he advised the brothers to deceive their father by telling that they had found the coat of Joseph dipped in blood (Test. Patr., Zebulon, 4; Dan, 1; Gad, 1). Dan and Gad were in league with the crown prince of Egypt against Joseph and Asenath (see Asenath, Prayer of).

As early as the days of Moses the tribe of Dan worshiped idols, wherefore the pillar of cloud failed to protect it, and consequently Amalek smote Dan, who was the "hindmost" and "feeble" because "he feared not God" (Targ. Yer. to Deut. xxv. 18; Pesiḳ. iii. 27b; Pesiḳ. R. xii.; Tan., Ki Teẓe). Being "the rearward of all the camps" (Num. x. 25), Dan fell a victim to "the fire that devoured the uttermost part of the camp because of the idol which provoked the anger of the Lord" (Targ. Yer. to Num. xi. 1, Hebr.). It was also Dan's idolatry which induced Balaam to order altar and sacrifices for the defeat of Israel (Targ. Yer. to Num. xxii. 41, xxiii. 1). Dan's idolatry restrained Abraham in his march against the Babylonian kings (Gen. xiv. 15; Gen. R. xliii.) and appalled Moses in his vision of the future (Targ. Yer. to Deut. xxxiv. 1; Sifre, Debarim, 357). The children of Dan taught their sons the idolatrous Amorite practises contained in the books hidden under Mount Abarim (Gaster, "Chronicles of Jerahmeel," 1899, p. 167).

Jacob's blessing of Dan, in which he is compared to a serpent (Gen. xlix. 16–18), is referred to Samson (Gen. R. xcviii.), and the serpent is said to have been made the emblem of the tribe on its standard (Num. R. ii.).

Dan, Type of Antichrist.

But Dan became the very type of evil-doing. He was placed to the north (Num. ii. 25), this being the region of darkness and evil (Jer. i. 14), because of his idolatry which wrapped the world in darkness (Num. R. ii.). Still further goes a tradition which identifies the serpent and the lion (Gen. xlix. 17 and Deut. xxxiii. 22) with Belial (see the literature in Bousset's "Antichrist," 1895, pp. 87, 113). Irenæus ("Adversus Hæreses," v. 302), Hippolytus ("De Christo et Antichristo," pp. 14, 15), and other Church fathers have a tradition, which can not but be of Jewish origin, that the Antichrist comes from the tribe of Dan, and base it upon Jer. viii. 16: "The snorting of his [the enemy's] horses was heard from Dan"—a verse referred also in Gen. R. xliii. to Dan's idolatry. Irenæus remarks that Dan is, in view of this tradition, not in the Apocalypse (Rev. vii. 5–7) among the 144,000 saved ones of the twelve tribes. Nor is the omission of Dan in I Chron. iv. *et seq.* unintentional. Bousset, who has a special chapter devoted to the Dan Antichrist legend (*l.c.* pp. 112–115), believes that the connection of Dan with Belial in Test. Patr., Dan, 5 points to the same tradition. This seems to find corroboration in Targ. Yer. to Deut. xxxiv. 3, where the war against Ahriman (ארמלגום) and Gog or Magog in the vision of Moses seems to refer to Dan, 1 (compare Sifre, *l.c.* to הים האחרון; see also Dan, in Ten Tribes, the Lost.)

K.

——**Critical View:** Kuenen ("Theologisch Tijdschrift," v. 291) and others after him, such as Cheyne ("Encyc. Bibl." *s.v.*), have argued that "Dan" is the title of a deity. In the etymology adduced in the explanatory remarks attributed to Rachel (Gen. xxx. 6) nothing is said about the character of the child. The judgment referred to is by God, and is passed upon Rachel. The reference to the name "Daniel" and to the cuneiform name of a king, "Ashur-dan," in support of the critical view has not been regarded by conservative scholars as sufficient to prove the contention in issue. Still, the analogy with other names, both tribal (Gad) and personal, is strongly in favor of the views advanced by Kuenen and his successors. "Daniel," in all probability, means "Dan is El" (compare "Eliyahu") and not "God is my judge"; and "Ashur-dan" is also a combination of two names of deities.

The personal existence of a son of Jacob bearing the name "Dan" has also been denied by modern scholars. This is in accord with the general doubt cast on the patriarchal biographies and genealogies. It is contended that no clan or tribe ever sprang from one ancestor. While among the tribes one of the name of Dan may have existed, the designation is that of an eponym, assumed after the tribe had come to reflect upon its own origin and its relations to other tribes (Cornill, "History of Israel," p. 32; Stade, "Gesch. des Volkes Israel," i. 124, 146; Guthe, "Gesch. des Volkes Israel," pp. 5 *et seq.*; Holzinger, "Kurzer Handcommentar," on Gen. xxx. 24; Gunkel, "Handcommentar," on Gen. xxix. 35; Cheyne, in "Encyc. Bibl." cols. 992 *et seq.*).

The assumption that Dan was the son of Rachel's handmaid, Bilhah, whose other son was Naphtali, signifies, according to the modern view of the ideas underlying such genealogies, that the tribe of Dan recognized a closer geographical or historical connection with that of Naphtali, in common with which it was regarded, or regarded itself, as somehow in a position subordinate to the tribes that traced their descent directly through Rachel from Jacob. The universal applicability of this principle has been doubted by König ("Bibelkritisches," 1902). In the case of Dan, tradition furnishes only scant material by which to test the theory. Yet, as the genealogies and biographies of other tribal eponyms appear to justify the general principle, there is no reason, from the point of view of the critical school, to question its applicability to Dan (see TRIBES, THE TWELVE). E. G. H.

DAN ASHKENAZI: German Talmudist and exegete; flourished in the second half of the thirteenth century. Dan, who was one of the most prominent Talmudists of Germany and the teacher of Mordecai ben Hillel, emigrated to Spain toward the end of the thirteenth century, probably in consequence of the cruel persecutions to which the Jews of Germany were subjected at that time, when many were driven to seek asylum in other countries.

In Spain, where he was called "Ashkenazi" (German), he met the foremost rabbinical authorities, who thought highly of him. Dan, however, was so imprudent as to give a letter of recommendation to a youth who pretended to be a prophet (compare ABRAHAM OF AVILA); and when the latter turned it to account, Solomon Adret cast scorn upon the German rabbi in his circular letter on the pseudo-prophet (Adret's Responsa, No. 548). Even before this occurrence the relations between these two men do not seem to have been very friendly, since Dan declared at Saragossa that, from the strict point of view of the Halakah, there could be no objection to the slaughtering of animals by Christians, as the reason given in the Talmud for forbidding the slaughtering of animals by pagans did not apply to Christians; for the pagan regarded the slaughtering as a sacrifice to his idols, while the same could not be said of the Christians (*ib.* No. 529; but Dan's reasons are not clearly stated).

Dan, who was a person of much individuality, was misunderstood by many, and acts were ascribed to him which he certainly did not commit (*ib.* No. 530). Adret's five responsa (Nos. 1229–1233) show that Dan was not a man to be overlooked; Adret's successor as rabbi of Barcelona, Nissim b. Reuben, also recognizes Dan's scholarship (Responsa, No. 32; ed. Rome, p. 72). Yom-Ṭob b. Abraham of Seville (RIṬBA) calls Dan "our teacher" (*ib.*), although this did not prevent him from writing a pamphlet against Dan regarding their dispute over an important halakic question (RIṬBA to Yibum, 109).

Dan was also very independent as an exegete; the fragments of his exegesis that have been preserved in manuscript, and also in the works of Baḥya ben Asher and in the collection "Hadrat Zeḳenim" (Leghorn, 1840), are highly interesting on account of their rationalism, which was not to be expected from one who had allowed himself to be misled by a false prophet. For instance, he interpreted מלאך, in Ex. xxiii. 20, as "messenger," not "angel," and supposed it to refer to Joshua. It is curious to note that in the collection of responsa "Besamim Rosh," which Saul Berlin published as Asher b. Jehiel's work, the statement is made that Dan wrote his Tefillin in Aramaic (No. 24).

DAN-JAAN: If the reading is correct, the name of a city mentioned only once in the Bible (II Sam. xxiv. 6). It was one of the places included in the route of Joab and his associates when they were sent out by David to number the people. Their route was eastward across the Jordan, northward through the trans-Jordanic tribes, westward to Sidon, passing Dan-jaan on the way, and southward as far as Beer-sheba. It is natural, then, to identify Dan, on the northern boundary of Israel, with Dan-jaan, although Conder, after Schultz, seeks to identify it with Danian near Achzib. For "Jaan" various emendations have been proposed. Gesenius changes יען into יער ("Dan of the wood"). Wellhausen and, following him, Budde, Kittel, and Driver read ומדן סבבו ("and from Dan they went round"). Klostermann and Grätz change יען into עין (Ijon), a city mentioned in connection with Dan in I Kings xv. 20.

DANCING.—Biblical Data: Rhythmical and measured stepping to the accompaniment of music, singing, or the beating of drums. This exercise, generally expressive of joy, is found among all primitive peoples. It was originally incident to religious worship, or to the martial demonstrations of a tribe. It may be inferred, therefore, that dancing of this character obtained also among the ancient Hebrews. Their cognates, the Bedouin Arabs, at the present time indulge in wild dances of this kind (Doughty, "Arabia Deserta," i. 31), and in the rites of the hadj old religious dances have been preserved (Wellhausen, "Reste Arabischen Heidentums," 1st ed., pp. 106, 165).

Terminology.

That dancing among the Hebrews was chiefly connected with demonstrations of joy is indicated by the use of the word שחק = צחק, usually connoting "playing," "sporting," or "jesting" (I Sam. xviii. 7; II Sam. vi. 5, 21; I Chron. xiii. 8, xv. 29; Jer. xxx. 19, xxxi. 4: במחול משחקים). That violent motions of the feet, not a graceful gliding, characterized the dance appears from the verb רקד, meaning originally "to leap like lambs," used with the meaning of "to dance."

כרכר, in II Sam. vi. 14, 16, seems to indicate a round dance (compare I Chron. xv. 29), most likely the turning round and round upon the heels on one spot, as practised by the dervishes. The choric dance is denoted by מחלה מחול, a derivative of חול = "to writhe," "to turn" (Lam. v. 15; Ps. xxx. 11, 12; Cant. vii. 1; Ex. xv. 20, xxxii. 19; I Sam. xviii. 6 [Septuagint, "dancing women"], xxi. 2, xxix. 5; Judges xi. 34, xxi. 21; Ps. lxxxvii. 7). That the religious dance constituted the principal feature of every festival is shown by the history of the word חג ("Z. D. M. G." xli. 719; Driver's "Notes on the Books of Samuel," p. 173; Wellhausen, "Israelitische und Jüdische Geschichte," p. 101, Berlin, 1897; *idem,* "Reste Arabischen Heidentums," *l.c.*). In the course of time it came to mean merely a festival, or one of the three pilgrim festivals, though its primitive connotation was a procession around the altar or shrine executed in a certain halting rhythm, whence the pilgrimage to Mecca, the hadj, has taken its name. The term "pesaḥ" recalls the same facts. It indicates this "limping" dance (see Toy in "Journal of Biblical Literature and Exegesis," xvi. 178 *et seq.*); whence, also, the jibe in I Kings xviii. 26: "How long will you dance at two 'thresholds'" (Jastrow's emendation). These religious processional dances may have represented some mythological event, a swaying to and fro of contending parties (see Jacob's experience in Gen. xxxii. 29: "he limps").

Religious Dances.

The Biblical books have undoubtedly preserved the memory of religious dances in connection with the making of the golden calf, and at the Red Sea (Ex. xv. 20, xxxii. 19). The story of Jephthah's daughter (Judges xi. 34) illustrates this custom, and suggests that it was a part of a very ancient sacrificial cult. In I Sam. xviii. 6, xxi. 11 women dance in honor of Saul and David. It seems that women were prominent in these choragic ceremonies. The "ḳedeshot" attached to every sanctuary may even have been professional dancers. Ps. cxviii. 27 probably alludes to a procession of this kind in the puzzling phrase אסרו חג. Post-exilic psalms evidence that processions of dancers to the sound of various musical instruments (flutes, trumpets, timbrels, cymbals, drums) had a prominent share in religious celebrations (Ps. xxvi. 6, cxlix. 3, cl. 4 [lxviii. 25: S. B. O. T.]). The request which was addressed to Pharaoh by Moses (Ex. x. 9) indicates that such processions were an old-established custom.

As do the dervishes even at the present day (Tristram, "Eastern Customs," pp. 207–210), so did the Prophets resort to dancing as a means of working themselves up to the proper nervous pitch (I Sam. x. 10, 11; xix. 20–24). Their resulting exaltation proved contagious, as do, according to Lane, the mad contortions of the dancing dervishes to-day.

Tribal and Family Dances.

Dancing marked also tribal and family festivals. At Shiloh an annual feast was celebrated at which the maidens indulged in dancing (Judges xxi. 21), and it is more than probable that Abel-meholah ("the dancing meadow") owes its name to a similar usage (I Kings xix. 16). For the times of the Talmud a kind of "marriage dance," such as is found in many modern children's plays, is remembered (Ta'an. iv. 8) as occurring on the Day of Atonement and on the fifteenth day of Ab; and the theory that these "dances" are survivals of marriage by capture is not without reasonableness. The "torchlight procession" which took place at the Festival of the Water-Drawing (שמחת בית השואבה) was particpated in by the most distinguished notables (Suk. v. 1–4).

In the days when Greek immoralities menaced the very existence of Judaism, dancing—especially by professional and probably lewd women—was looked upon with disfavor (Ecclus. [Sirach] ix. 4). The daughter of Herodias undoubtedly imitated and took the place of a professional dancer at the banquet (Matt. xiv. 6). From other Biblical passages it is clear that dancing was demanded on similar occasions (Jer. xxxi. 4, 13). Lam. v. 15; Eccl. iii. 4; and Ps. xxx. 11 indicate that the dance was considered an expression of joy. Some have urged Cant. vii. 1 in support of the theory that a sort of square dance ("kimeḥolat ha-maḥanayim") was known to the Jews. Wetzstein identifies it with the sword-dance that still takes place at Eastern wedding-feasts.

E. G. H.

——**In Talmudic Times:** In post-Biblical times dancing continued to be a favorite exercise on both religious and secular occasions. "The woman of sixty runs to the sound of music like the girl of six" (M. Ḳ. 9b). A feast was made complete by dancing, and noted scholars were in the habit of providing such entertainment for their guests (Ned. 51a). Dancing in honor of the bride at a wedding was deemed an act of piety, and sedate rabbis often vied with one another in its exercise. Thus, R. Judah b. 'Illai used to dance at weddings waving a myrtle branch (Ket. 17a). Moreover, the festive procession which in Biblical times made the periodical pilgrimages to Jerusalem such a source of popular joy, forming the main feature in the observance of the great holidays, continued to fill with glee the highways of Palestine in Talmudic days. Franz Delitzsch properly uses a description of these jubilant ceremonies as an argument against these theorists who hold that the Law had rendered the life of the post-exilic Jews sad and gloomy, depriving their religious practises of spontaneity and joyfulness. The Mishnah, for instance, relates in how truly popular a manner and with what accompaniment of genuine joy the men from the provinces were wont to bring the first-fruits to the Temple at Jerusalem. They did not come singly, as men bearing burdens, but in festive processions, with light, joyous, grateful hearts.

> "All the villages of a district send their dwellers to the chief city of the district; the pilgrims pass the night in the streets of the town, refraining from entering the houses, and at dawn the leader cries out: 'Arise, and let us go up to Zion, to the house of our God!' While on the march they sing choral psalms, 'I was glad when they said unto me, Let us go unto the house of the Lord,' being the favorite refrain. When they reach Jerusalem they chant: 'Our feet are standing within thy gates, O Jerusalem!' (Ps. cxxii.). At the Temple mount they strike up: 'Praise ye the Lord, praise God in his sanctuary!' (Ps. cl.), and having reached the hall, they finish with 'Praise ye the Lord, praise the Lord, O my soul!' (Ps. cxlvi.). The men from

the neighborhood bring fresh figs and grapes, and those from afar dried figs and grapes. And the ox of sacrifice goes before them, its horns embossed with gold and a crown of olive on its head. The flute is played all the while they are marching, until they come close upon Jerusalem. Then they send delegates to the city to offer their first-fruits. The foremost priests come out to meet them: according to the number of pilgrims is the priestly deputation. In Jerusalem all workmen in the streets pause in their work to greet the comers: 'Be welcome, our brethren, men of such-and-such a town!' And the flute still plays on before them until they reach the mount of the sanctuary" (Bik. iii. 2; Yer. *ad loc.*).

Festival of Water-Drawing.

The Talmud also contains traditions concerning the joyful manner in which the two national holidays, the 15th of Ab (the Feast of Wood-Offering, or "Xylophoriæ," as Josephus calls it) and the Day of Atonement, were celebrated. Various causes, it appears, were held to have given birth to these two feasts; at any rate, they were generally observed. On those days the maidens of Israel were in the habit of going forth to the vineyards, each clad in well-washed white, and joining in the choral dances. They all appeared in borrowed gowns, so as not to shame the poor. The young men came and looked on, while the dancers sang appropriate songs. It would seem that brides were oftentimes chosen at these gatherings (Ta'an. 30b). Similarly, there is a Talmudic tradition that "whoever has not witnessed the joy of the Festival of Water-Drawing has seen no joy in his life." On those occasions, on the night of the first day of the Feast of Tabernacles, huge assemblies of people gathered in the women's court of the Temple, bearing lamps of gold and vessels for water, while every house in Jerusalem was brightly illuminated. "Pious men and men of affairs," adds the tradition, "danced with torches in their hands, singing songs of joy and of praise, and the Levites made music with lyre and harp and cymbals and trumpets and countless other instruments" (Suk. 51a; Maimonides, "Yad," Lulab, viii. 12, 13). Two galleries were built for the spectators, one for men and one for women. The celebration lasted all night and ended at dawn, announced by blasts of trumpets, with the pouring of water upon the altar.

The fondness of the ancient Jew for dancing is suggested in the hope naively expressed by R. Eleazar: "Some day the Holy One, blessed be He! will give a dance for the righteous, and He will sit among them in the Garden of Eden, and each one will point his finger at Him, saying, as it is written (Isa. xxv. 9), 'Lo, this is our God; we have waited for him, and he will save us: this is the Lord; we have waited for him, we will be glad and rejoice in his salvation'" (Ta'an. end).

It will be seen that dancing among the Jews preserved its primitive character: a spontaneous expression of joy rather than an esthetic pleasure. In both ancient and medieval times, therefore, it consisted of "gesticulations, violent leaps and bounds, hopping in a circle, rather than graceful pose, and soft, rhythmic movements." The popularity of the amusement in the Middle Ages is attested by the spread of the dancing-hall, or "Tanzhaus," which, for the use of both weddings and ordinary dances, was established in almost every ghetto of France and Germany. At first these halls, frequented especially on Sabbaths and feast-days, witnessed little mixed dancing. But when the latter habit came into vogue, the Rabbis opposed it strenuously on account of the license and the marital quarrels to which it led, citing in support the verse in Proverbs: "Hand to hand shall not go unpunished" (xi. 21, Hebr.). The nearest relations alone, such as husband and wife, father and daughter, brother and sister, were exempted from the inhibition. Needless to say, the rabbinic rule was often infringed by the bolder young men and women. That mixed dancing was not without its moral dangers was witnessed by the license which its prevalence engendered among the enthusiastic followers of Shabbethai Ẓebi. Occasionally, professional Jewish dancers occur; for instance in the seventeenth century, when the sultan engaged Jewish fiddlers and dancers to perform at a banquet; and they are not infrequent in the modern Orient, more especially in Tunis. In these latter forms, of course, dancing has become a purely social diversion without any religious import; but the original significance of dancing as an expression of religious joy and fervor may yet be observed in the synagogues of Orthodox Jews on the Feast of Simḥat Torah ("Rejoicing of the Law"), where the primitive religious dance may be said to have survived.

DANHAUSER, ADOLPHE-LÉOPOLD: French musician; born in Paris Feb. 26, 1835; died there June 9, 1896. He studied at the Paris Conservatory under Bazin, Halévy, and Reber; took first prize in harmony (1857); first prize in fugue (1859); second Prix de Rome (1862). He became chief inspector of instruction in singing in the schools of Paris in 1875; afterward professor of solfeggio at the Conservatory. He composed: "Le Proscrit," a musical drama (produced at Auteuil in 1866); "Maures et Castillans," a three-act opera (not produced); several "Mélodies Vocales"; "Soirées Orphéoniques" (collection of twelve choruses for three equal voices). He wrote a well-known textbook, "Théorie de la Musique" (1878); "Abrégé de la Théorie de la Musique" (1879); "Chants pour les Ecoles"; "Recueil de Petits Chants à Une Voix" (1883); "Questionnaire, Appendice de la Théorie de la Musique" (1886).

DANIEL.—Biblical Data: In Hebrew (1) דנאל; (2) דניאל. (1) The form without the י (see Masorah Magna to Ezek. xiv. 14) occurs in Ezek. xiv. 14, 20; xxviii. 3; also in a Palmyrene inscription (see De Vogüé, "Syrie Centrale," No. 93). The pronunciation "Dani'el" (God is my Judge) is more probable than "Dan'el" (God is a Judge), because in consonance with the general structure of Hebrew names. It is therefore probably correct to vocalize the consonants in the three places thus: דָנִאֵל. (2) The hiatus between the vowels "i" and "e" gave rise to the pronunciation "Daniyel" (דָנִיֵּאל, Dan. i. 6), with the insertion of a consonantal י; compare "Eli' atah" ("Eliathah," I Chron. xxv. 4) with "Eliyata" (verse 27; compare König, "Historisch-Kritisches Lehrgebäude der Hebräischen Sprache," ii. 481 *et seq.*). The name should be interpreted, in accordance with Gen. xxx. 6, as "God is the Defender of my right."

The Name in the Old Testament.

The following persons called "Daniel" are mentioned in the O. T.: **1.** A son of David by Abigail (I Chron. iii. 1); the parallel passage (II Sam. iii. 3) has "Chileab"; but this reading is perhaps a corruption due to the fact that the last three letters of כלאב are identical with the first three letters of the following word, לאביגיל, and the form in I Chron. iii. 1 is probably correct. The forms of his name found in the Septuagint—*Δαλουια* and *Δαμνιηλ*—support this view, in that they show the first letter of the name to be ד (Δ). G. Kerber (in his "Die Religionsgeschichtliche Bedeutung der Hebr. Eigennamen," 1897, p. 36) combines the name "Kile'ab" with "Kaleb," the name of the well-known companion of Joshua, and with "keleb" = dog. This, however, is a mere hypothesis, and can not serve as an argument for the name "Kile'ab."

2. A man of extraordinary righteousness (Ezek. xiv. 14, 20) and wisdom (xxviii. 3), who appears to have been almost as well known as Noah and Job, with whom he is mentioned in both of the passages cited.

3. A priest of the sons of Ithamar (Ezra viii. 2). The parallel passage in the Greek Book of Ezra (viii. 29) has the forms *Γαμαηλ*, *Γαμηλος*, and *Γαμαλιηλ*, which are evidently miswritings for *Δανιηλ*. This priest returned with Ezra from Babylonia to Jerusalem in 458 B.C., and was one of those who sealed Israel's covenant with God (Neh. x. 6).

Descent of Daniel.

4. The most important bearer of the name is the hero of the canonical Book of Daniel and of the additions found in the Septuagint. This Daniel was among the prisoners carried by Nebuchadnezzar to Babylon after the capture of Jerusalem in the third year of the reign of Jehoiakim; he was also one of the young men instructed, by order of Nebuchadnezzar, in the learning and the tongue of the Chaldeans (Dan. i. 3–4). No mention is made, however, of Daniel's birthplace or family. It is not known whether he belonged to the family of the King of Israel or to that of an Israelitish magnate. Josephus ("Ant." x. 10, § 1) evidently inferred from Sanh. i. 3 that Daniel was a relation of King Zedekiah (*ἦσαν τῶν ἐκ τοῦ Σεδεκίου γένους τέσσαρες*), while Pseudo-Epiphanius, on the strength of the same passage, makes Daniel the scion of a noble Israelitish family (compare Prince, "Critical Commentary on the Book of Daniel," p. 25).

Daniel's Career.

The Chaldeans gave Daniel a new name derived from their own language; namely, "Belṭeshaẓẓar," the Hebraized form of "Balatshu-uẓur" (lit. "His Life Protect"). When requested to eat the food of the heathen, he asked that he and his Hebrew friends might be given their own food, in keeping with the Law of their fathers. Daniel soon had an opportunity to reap the reward of his piety; for, inspired by God, he interpreted King Nebuchadnezzar's dream, and the king in return made him ruler over the whole province of Babylon and chief over all the wise men of Babylon (Dan. ii. 48). Daniel distinguished himself a second time by interpreting another dream of Nebuchadnezzar (*ib.* iv.), and by deciphering the mysterious words "Mene, Mene, Teḳel, Ufarsin" (*ib.* v. 25).

Daniel retained his high position under Darius until his fellow dignitaries induced the king to issue a decree forbidding any one to ask anything of God, or of any man except the king, for a period of thirty days. When Daniel, nevertheless, continued to pray three times a day at an open window looking toward Jerusalem, he was cast into the lion's den, but was rescued by his God and honored anew by the king. He retained his influence until the third year of Cyrus' reign over Babylon (that is, up to 536 B.C.), and prophesied the future of God's kingdom (*ib.* i. 21, vi. 28, x. 1).

E. G. H. E. K.

——**In Rabbinical Literature:** According to rabbinical tradition Daniel was of royal descent; and his fate, together with that of his three friends, Hananiah, Mishael, and Azariah, was foretold by the prophet Isaiah to King Hezekiah in these words, "and they shall be eunuchs in the palace of the king of Babylon" (Isa. xxxix. 7; compare Sanh. 93b; Pirḳe R. El. lii.; Origen, commentary to Matt. xv. 5; Jerome, commentary to Isaiah, *l.c.*). According to this view, Daniel and his friends were eunuchs, and were consequently able to prove the groundlessness of charges of immorality brought against them, which had almost caused their death at the hands of the king. Even in his youth, when he convicted the false witnesses against the pious and beautiful Susanna, Daniel gave proof of that wisdom (see SUSANNA, THE BOOK OF) which afterward made him so famous that it was said of him, "If he were in one scale of the balance and all the wise men of the heathens in the other, he would outweigh them all" (see Yoma 77a). When the king Nebuchadnezzar heard Daniel reproduce the dream which he had, had he could not doubt the truthfulness of his interpretation (Tan., ed. Buber, i. 191). Nebuchadnezzar admired Daniel greatly, although the latter refused the proffered divine honors, thus distinguishing himself favorably from his contemporary Hiram (the "prince of Tyre," in Ezek. xxviii.), who demanded honor as a god (Gen. R. xcvi.).

Nebuchadnezzar's Idol.

Life at court was fraught with many dangers for the pious Daniel. In the first place he denied himself much in the matter of food, since he would not partake of the wine and oil of the heathens ('Ab. Zarah 36a); and more than once he endangered his life by refusing to take part in the idolatry of the king. Daniel was not forced, as were his three friends, to worship the idol which Nebuchadnezzar set up; for the king, who well knew that Daniel would rather be cast into the fiery furnace than commit idolatry, sent him away from

Babylon in order that he might not be forced to condemn his own god—namely, Daniel, whom he worshiped—to death by fire. Furthermore, it was God's intention to cause the three men to be taken out of the furnace during the absence of Daniel, so that their rescue should not be ascribed to the merit of the latter (Sanh. 93a; compare also Cant. R. vii. 8, and AZARIAH IN RABBINICAL LITERATURE). Nevertheless, the king endeavored to induce Daniel to worship the idol by trying to make him believe that it was something alive and real; and he ordered that there be placed in its mouth the frontlet ("ẓiẓ") of the high priest, on which was written the name of God; and since this name possessed the miraculous power of enabling inanimate things to speak, the idol could utter the words "I am thy god." Daniel, however, was not to be so easily deceived. Asking permission to kiss the idol on the mouth, he stepped before it and conjured the frontlet in the following words: "Although I am only a man of flesh and blood, yet I stand here as God's messenger. Take care that God's name is not desecrated by you, and thus I command you to follow me." While he was kissing the idol the frontlet passed from the idol's mouth into his. When Nebuchadnezzar, as usual, sent for musicians to give songs of praise to the idol, he noticed that Daniel had silenced it (Cant. R. vii. 9).

On another occasion Daniel was strongly urged by King Cyrus to recognize Bel, whose divinity was evidenced by the fact that he ate up the sacrifices placed daily before him. This was reported by the priests, who entered the temple every night by a subterranean passage, ate the sacrifices, and then announced that the idol had eaten the offerings. Daniel exposed this fraud. He had ashes strewn on the floor of the temple, and on the following day he convinced the king that persons had entered the temple at night, by showing him the footprints in the ashes. At another time a dragon was worshiped by the Babylonians, and their king tried to make Daniel also worship it. Daniel boiled pitch, fat, and hair together and gave lumps of it to the dragon, which thereupon burst.

In the Lion's Den.

Daniel's success at court naturally excited the envy and ill will of the Babylonians, who gathered in a mob and threatened the king and his house if he did not deliver Daniel to them. The king was powerless to resist, and the people took Daniel and threw him into a den with seven famished lions. Daniel remained there unharmed for six days, being fed during that time by the prophet Habakkuk, whom an angel had in an instant transported from Judea to Babylon, holding him by the hair of his head. On the seventh day the king went to the den to bewail Daniel, and was astonished to find him alive. Praising God for the help accorded to His pious servant, the king ordered that Daniel should be drawn out of the den and that his accusers should be cast therein; and they were immediately devoured by the wild beasts (see BEL AND THE DRAGON).

In like manner was Daniel delivered from lions in the reign of Darius. By the advice of Daniel this ruler had placed the affairs of the government in the hands of a board composed of three officials, with Daniel at their head. He was, therefore, the second after the king. His high position excited the envy of the other officials, who, in an underhand way, succeeded in inducing the king to sign a decree forbidding any one, on pain of death, to pray to any god or man, except to the king (Yosippon, ed. Cracow, 1589, iii. 7a–7d). Although Daniel was not forced to sin in any way, he was prepared to sacrifice his life rather than omit his prayers; hence it was easy for his enemies to convict him of having violated the royal order. While he was at prayer his enemies entered his room, and watched to see whether the accusations against him could be substantiated, as the king did not believe them. Daniel did not omit his "Minḥah" prayer. Notwithstanding his friendship for Daniel, the king listened to the accusations of the nobles, and condemned him to be cast into the den of lions. The mouth of the den was closed with a huge stone, which had rolled of itself from Palestine to Babylon for that purpose. Upon this stone sat an angel in the shape of a lion, so that Daniel's enemies might not harass him (Midr. Teh. xxiv., lxvi.); and the beasts in the den received Daniel as faithful dogs might receive their returning master, wagging their tails and licking him (Yosippon, iii. 8b; Aphraates, "Homilies," ed. Wright, iv. 67). Early the next morning the king hastened to the den in order to learn Daniel's fate, and called him by name; but he received no answer, as Daniel was just then reading the "Shema'" (Midr. Teh. lxvi.), after having spent the night in song of praise to God, to which the lions had silently listened (Yosippon, *l.c.*). Daniel's enemies insisted that the lions were tame because they were not hungry, whereupon the king commanded that the accusers themselves spend a night with the beasts. As a result the enemies of Daniel, numbering 122, with their wives and children, making a total of 366 persons, were torn by 1,469 lions (Midr. Teh. *l.c.*; in Yosippon [*l.c.* 8c] this experience is attributed to Habakkuk. The legend of the dragon is in any case probably only a later differentiation of the Biblical story in Dan. vi.).

These miracles kept Daniel in favor with the king, who thereupon issued orders that the Jews should return to Palestine and rebuild the Temple. Daniel's great age induced him to ask for his dismissal from the king's service; but his request was not granted until he had found a worthy successor in Zerubbabel, whom he recommended to the king for all the offices that he himself had filled. Daniel was then graciously dismissed with valuable presents from the king, and went to Shushan, where he lived piously until his death (Yosippon, *l.c.* 9d–10a; but compare Cant. R., *l.c.*, according to which Daniel returned to Palestine at the command of Cyrus). Although Daniel was no prophet, God held *him* worthy to receive the revelation of the destiny of Israel, even to the Day of Judgment, thus distinguishing him from his friends, the prophets Haggai, Zechariah, and Malachi, who had no visions (Dan. x. 7). Daniel, however, forgot the "end" (קץ) revealed to him, after an angel had shown him everything (Gen. R. xcviii. 2).

E. C. L. G.

——**In Arabic Literature:** The Moslems consider Daniel as a prophet, though he is not mentioned in the Koran. It was he who preached in Babylonian 'Irak—that is to say, Chaldea—exhorting the people to return to God. He lived during the reigns of the Persian king Lahorasp and of Cyrus, and taught these two princes the unity of God and the true religion. Tabari says ("Chronique," French translation of Zotenberg, i. 44) that thousands of people who had died in a certain town from an epidemic were resuscitated a thousand years later by the prayer of Daniel, a legend probably borrowed from Ezek. xxxvii. 1-10.

When Daniel had become a noted prophet, Cyrus made him the chief of all his kingdom in order that he might teach his people the true religion. The prophet asked the king to let him go back to Palestine and build the Temple. Cyrus consented to the reconstruction of the sanctuary, but refused to let him go, saying, "If I had a thousand prophets like thee, I should have them all stay with me." There is another tradition, to the effect that Daniel was king of the Israelites after their return from captivity.

According to Muhammad ibn Jarir (quoted by Tabari, *l.c.* p. 751), it was Nebuchadnezzar who ordered Daniel to be thrown into the lion's den. A pit was dug purposely for him; and he and five companions were cast before a famished animal. Shortly afterward the king, on approaching the pit, saw there seven persons instead of six. The seventh was an angel, who struck Nebuchadnezzar a blow in the face, and by that changed him into a wild beast.

The Arabs attribute to Daniel the invention of geomancy ("'ilm al-raml") and the authorship of the "Uṣul al-Ta'bir" (The Principles of Interpreting Dreams).

Mas'udi says there were two Daniels: Daniel the Elder, who lived in the period between Noah and Abraham, and was the father of the above-mentioned sciences; and Daniel the Younger, who, according to a tradition, was the maternal uncle of Cyrus, whose mother was a Jewess. The Arabs attribute to him the book "Kitab al-Jafar" (Divination) and many predictions relative to the Persian kings.

Traditional Tomb of Daniel.

(From Flandin and Coste, "Voyage en Perse Moderne.")

DANIEL, TOMB OF: Tradition has named two places as the site of Daniel's tomb. In the "Martyrologium Romanum," for instance, which consecrates July 21 to Saint Daniel, the place of his death is given as Babylon, and it was claimed that he was buried in the royal vault there. Benjamin of Tudela, who visited the Holy Land about 1160 C.E., gives much more accurate information in his account of Susa. In the façade of one of its many synagogues he was shown the tomb assigned by tradition to Daniel. Susa is the modern Shuster, and this synagogue is still standing. There are some good representations of it, as, for example, in Flandin and Coste, "Voyage en Perse Moderne" (plate 100), and in Loftus, "Chaldæa and Susiana" (pp. 317 *et seq.*).

Benjamin declares, however, that the tomb does not hold Daniel's remains, which were said to have been discovered at Susa about 640 C.E. The remains were supposed to bring good fortune; and bitter quarrels arose because of them between the inhabitants of the two banks of the Choaspes. All those living on the side on which Daniel's grave was situated were rich and happy, while those on the opposite side were poor and in want; the latter, therefore, wished the bier of Daniel transferred to their side of the river. They finally agreed that the bier should rest alternately one year on each side. This agreement was carried out for many years, until the Persian shah Sanjar, on visiting the city, stopped the practise, holding that the continual removal of the bier was disrespectful to the prophet. He ordered the bier to be fastened with chains to the bridge, directly in the middle of the structure; and he erected a chapel on the spot for both Jews and non-Jews. The king also forbade fishing in the river within a mile of Daniel's bier ("Itinerary of Benjamin of Tudela" [Hebr.], ed. Asher, i. 74-76, ii. 152-154; compare Pethahiah of Regensburg, p. 77, below, Jerusalem, 1872). The place is a dangerous one for navigation, since godless persons perish immediately on passing it; and the water under the bier is distinguished by the presence of goldfish.

Mohammedan traditions agree in stating that Daniel was buried at Susa, and a similar tradition was current among the Syriac writers (Budge, "Book of the Bee," p. 73). Al-Baladhori (ninth century) says that when the conqueror Abu Musa al-Ash'ari came to Susa in 638, he found the coffin of Daniel, which had been brought thither from Babylon in order to bring down rain during a period of drought (compare Al-Ṭabari, i. 2567). Abu Musa referred the matter to the calif Omar, who ordered the coffin to be buried, which was done by sinking it to the bottom of one of the streams near by ("Futuh al-Buldan," p. 378). A similar account is given by Ibn Ḥaukal (ed. De Goeje, p. 174) and Al-Iṣṭaḥri (ed. De Goeje, p. 92), who add that the Jews were accustomed to make a circuit around Daniel's tomb and to draw water in its neighborhood (see also Yaḳut, "Mu'jam al-Buldan," iii. 189). Al-Muḳaddasi (ed. De Goeje, p. 417) refers to the contention between the people of Susa and those of Tustar. A slightly divergent tradition reported by Ibn Taimiyyah says that the body was found in Tustar; that at night thirteen graves were dug, and it was put in one of these—a sign that the early Moslems were opposed to the worship of the tombs of holy men ("Z. D. M. G." liii. 58).

The authenticity of the tomb at Susa is believed in by the mollahs of Arabistan, even though five days journey from Dizful, near Mal Amir, there is another tomb sacred to Daniel.

DANIEL, APOCALYPSE OF. See APOCALYPTIC LITERATURE.

DANIEL, BOOK OF*—**Critical View:** One of the books of the Old Testament. It may be divided into two parts: chapters i.-vi., recounting the events of Daniel's life; chapters vii.-xii., containing his prophecies. "While the first part proves that it is impossible for the world-empire to belong to the heathen forever, the second part shows that Israel is destined to found this world empire through the son of man, who has long since existed in heaven" (J. Böhmer, "Reich Gottes und Menschensohn im Buche Daniel," 1899, p. 60).

In its form the book shows striking differences, for while ii. 4 to vii. 28 is written in Aramaic, the preceding and following portions are written in Hebrew. It is not easy to discover the reason for this peculiarity; it suggests, however, that the "Chaldeans" in this book are the Arameans or Syrians. A similar instance occurs in the Seder 'Olam Zuṭa (ed. Joh. Meyer), where the author gradually lapses into Aramaic in talking of personages of the Babylonian exile, but on p. 117 returns to Hebrew. The author may have meant to introduce the "Chaldeans" in their own language, and then inadvertently continued in the language that was familiar to him (see Driver, "Daniel," in "Cambridge Bible for Schools," p. xxii.). J. Böhmer (*l.c.* p. 150) maintains that the Aramaic portion was so written because its contents concerned all peoples; Prince and others suggest that the whole book was written originally in Hebrew, and translated into Aramaic; and that a part of the Hebrew book was lost, and replaced by the Aramaic translation. This opinion, however, does not weigh the fact that the Aramaic begins with the speech of the "Chaldeans." Other scholars think that the whole book was originally written in Aramaic, while the beginning and end were translated into Hebrew so that the book might be incorporated into the canon (Marti, in his Commentary, 1901, p. ix.). But if its inclusion in the canon had depended on its Hebrew form, it would have been necessary to translate the whole into Hebrew. In any case the linguistic diversity in parts of this book is no reason for assuming two sources for it, as Meinhold does in his Commentary (p. 262); for the Aramaic Book of Daniel could not have begun with ii. 4.

Form.

Another difference in form is found in the fact that the political history forming the background of the first six chapters is absent in vii.-xii. This difference may be thus explained: The author thought it his first task to recount without a break the historical facts of Daniel's life; his second task being to record the revelations vouchsafed to Daniel which were not connected with the experiences of other people. In the first six chapters Daniel is introduced in the third person, while in the others he appears as the speaker. This is explicable on the ground that the second part of the book is concerned only with the presentation of Daniel's inner experiences to the exclusion of all objective relations. Such transitions are found in other books—compare, for example, Hosea i. and iii. The change of person therefore does not necessarily affect the unity of the book. (For other opinions on the composite character of the Book of Daniel, see Eduard König, "Einleitung ins Alte Testament," p. 384; Von Gall, "Die Einheitlichkeit des Buches Daniel," 1895; G. A. Barton, "The Composition of the Book of Daniel," in "Jour. Bib. Lit." 1898, pp. 62-86). Barton finds a contradiction between i. 1, 5, 18, and ii. 1; for Nebuchadnezzar is designated as "king" in i. 1, and, according to i. 5, 18, Daniel and his friends were to be prepared three years prior to appearing before the king, while in ii. 1 it is stated that this happened as early as the second year of Nebuchadnezzar. Still it was not an unnatural prolepsis on first mentioning Nebuchadnezzar, who subsequently became king, to give him the title by which he was commonly known at the time of writing. Barton also finds a contradiction between the words "And Daniel continued even unto the first year of King Cyrus" (i. 21) and "In the third year of Cyrus, king of Persia, a thing was revealed unto Daniel" (x. 1). But i. 21 does not mean that Daniel *lived* "even unto the first year of Cyrus," but that Daniel survived even the fall of Nebuchadnezzar's kingdom and that of his successor. The other contradictions mentioned by Barton are discussed by Eduard König in "Theologisches Litteraturblatt," 1898, cols. 539 *et seq.* His conclusion that nine different and complete episodes follow the first chapter is therefore untenable. The book, however, may have included originally only i.-vii., an assumption that would explain the following three circumstances: the dropping of the Aramaic; the formula "Hitherto is the end of the matter" (vii. 28); and the juxtaposition of two materially identical narratives as found in vii. and viii. As events unfolded themselves, amplifications of the prophecy in the form of pamphlets, pointing even more clearly to the day of liberation, may have been added.

---

* For Biblical Data see DANIEL.

Date of the Book.

The date of the writing of the book may be inferred from the following considerations: It was not written by one of the exiles, for many portions of the text could not have been composed by a contemporary of the second king of the Babylonian empire and his immediate successors. This is proved even by the form of that king's name as given in the book. His Assyrian name was "Nabu-kudurriuẓur" (Friedrich Delitzsch, "Assyrische Lesestücke," 1900, p. 192), which the Hebrews at first pronounced "Nebu-kadr-eẓẓar" (Jer. xxi. 2 *et seq.* [26 times]; Ezek. xxvi. 7, xxix. 18 *et seq.*, xxx. 10). The middle "r" was then dissimilated from the final "r," giving "Nebu-kadn-eẓẓar," a form which is found in Jeremiah only in xxvii. 6–xxix. 3, but which is the usual form in all later writings (II Kings xxiv. 1 *et seq.*; II Chron. xxxvi. 6 *et seq.*; Ezra i. 7; Esth. ii. 6; Dan. i. 18 *et seq.*; Soferim xiv. 7; Seder 'Olam R. xxiv. *et seq.*; and Septuagint, *Ναβουχοδονόσορ*).

Nor would a contemporary of Nebuchadnezzar and his successors have written the stories of the Book of Daniel in the form in which they exist, since they contain many details that can not be harmonized with the data furnished in other historical sources. The first verse, for instance, contradicts other passages of the O. T. in saying that King Nebuchadnezzar came to Jerusalem in the third year of the reign of Jehoiakim, and besieged it. For the verb בא means here, as elsewhere, "come," "arrive," and can not be equivalent to "break up"; this is also proved by the context of i. 1. But Jeremiah announced the coming of the Chaldeans only in the fourth year of Jehoiakim, a year that is expressly designated, in Jer. xxv. 1, xlvi. 2, as the first year of King Nebuchadnezzar. The date, "in the third year of the reign of Jehoiakim" (Dan. i. 1), is probably derived from II Kings xxiv. 1 *et seq.*, where it is said that Jehoiakim, after having been subject to Nebuchadnezzar three years, turned and rebelled, and was attacked by predatory bands of the Chaldeans and their vassals. As no date is given for the beginning of this period of three years, it might be supposed that it began with the accession of Jehoiakim. The supposition being made, it could be said that the Chaldeans besieged Jerusalem in the third year of Jehoiakim, when Nebuchadnezzar would naturally be their leader. But these statements in Dan. i. 1 are erroneously drawn from II Kings xxiv. 1 *et seq.*, and contradict those found in Jer. xxv. 1, 9, and xlvi. 2. Such discrepancies are not unparalleled in the O. T. (compare Eduard König, "Einleitung ins Alte Testament," pp. 172 *et seq.*). Nor can Nebuchadnezzar's madness (Dan. iv. 12 *et seq.*) during seven years be taken literally. Belshazzar's father, Nebuchadnezzar, is mentioned again (v. 11, 13, 18, 22) in a way which compels the inference that he really was such. This may be explained on the ground that during the long period of oral tradition the unimportant kings of Babylon might easily have been forgotten, and the last king, who was vanquished by Cyrus, would have been taken as the successor of the well-known Nebuchadnezzar. The same thing occurred in Bar. i. 11, and Sennacherib is mentioned as the son of Enemessar (*i.e.* Shalmaneser) in Tobit i. 15, Sargon (Isa. xx. 1) being passed over. It is also well known that the period 516-331, of which only a few events are recorded, was contracted to thirty-four years in computing the time elapsed since the Creation (Seder 'Olam R. xxx.).

The Book of Daniel was not written immediately after the Exile. The post-exilic prophets did not know it, for the four horns to which Israel's enemies are compared in Zech. i. 21, have a local meaning, representing the four points of the compass, and do not refer to the successive kingdoms, as in Dan. ii. 29 *et seq.* The same is the case with the four chariots in Zech. vi. 1 *et seq.* These passages are not exactly parallel with the predictions in Daniel, but it is also stated in Hag. ii. 6–9 *et seq.*, that within "a little while" the Messianic time will come. And even Ben Sira says expressly (Ecclus. [Sirach] xlix. 15) that he has never found a man who resembled Joseph, a statement he could not have made had he known the extant Book of Daniel, since Daniel is there drawn as a man who, like Joseph, rose to be prime minister by virtue of his ability to interpret dreams.

The Book of Daniel was written during the persecutions of Israel by the Syrian king Antiochus Epiphanes. This assertion is supported by the following data: The kingdom which is symbolized by the he goat (viii. 5 *et seq.*) is expressly named as the "kingdom of Yawan"—that is, the Grecian kingdom (viii. 21) the great horn being its first king, Alexander the Great (definitely stated in Seder 'Olam R. xxx.), and the little horn Antiochus Epiphanes (175-164). This kingdom was to persecute the host of the saints "unto two thousand and three hundred evenings and mornings" (viii. 14, R. V.); that is, "half-days," or 1,150 days; and Epiphanes did, in fact, profane the sanctuary in Jerusalem for about that length of time, from Kislew 15, 168, to Kislew 25, 165 (I Macc. i. 57, iv. 52). The little horn described in Dan. viii. 9-12, 23-25 has the same general characteristics as the little horn in vii. 8, 20; hence the same ruler is designated in both passages. The well-known passage ix. 23-27 also points to the same period. The first and imperative rule in interpreting it is to begin the period of the seventy times seven units (A. V. "seventy weeks") with the first period of seven (ix. 25), and to let the second period, the "sixty-two times seven units," follow this; for if this second period (the sixty-two weeks) be reckoned as beginning again from the very beginning, the third period, the "one week," must be carried back in the same way. The context demands, furthermore, that the origin of the prediction concerning the rebuilding of Jerusalem be sought in Jer. xxv. 11–13 and the parallel passage, *ib.* xxix. 10. The "anointed," the "prince," mentioned after the first seven times seven units, must be Cyrus, who is called the anointed of the Lord in Isa. xlv. 1 also. He concluded the first seven weeks of years by issuing the decree of liberation, and the time that elapsed between the Chaldean destruction of Jerusalem (586) and the year 538 was just about forty-nine years. The duration of the sixty-two times seven units (434 years) does not correspond with the time 538–171 (367 years); but the chronological knowledge of that age was not very exact. The Seder 'Olam Zuṭa (ed. Meyer, p. 104) computed the Persian rule to have lasted fifty-two years. This is all the more evident as the last period of seven units must include the seven years 171–165 (see "Rev. Et. Juives," xix. 202 *et seq.*). This week of years began with the murder of an anointed one (compare Lev. iv. 3 *et seq.* on the anointing of the priest)—namely, the legitimate high priest Onias III.—and it was in the second half of this week of years that the Temple of the Lord was desecrated by an abomination—the silver altar erected by Antiochus Epiphanes in place of the Lord's altar for burnt offering (see I Macc. i. 54).

Genesis of the Book of Daniel.

Stories undoubtedly existed of a person by the name of Daniel, who was known to Ezekiel as a wise man. Tradition then ascribed to this wise man all the traits which Israel could attribute to its heroes. He was exalted as the pattern of piety and faithfulness; and it may also have been said that he interpreted dreams, read cryptograms, and foreshadowed the beginning of the Messianic kingdom. In any case his name may have played the same rôle in literature as that of Solomon or that of Enoch; and as one author ascribed his book, "Koheleth," to Solomon, so another author may have made Daniel responsible for his. As to the origin of his prophecies, it would probably be unjust to say that they were inventions. They may have been suggested by the author's enthusiastic study of the past history of God's people. He utilized the past to unlock the future. This is evident from ix. 2, where the author says that he had paid attention to the prophecy of Jeremiah concerning the seventy years, which prophecy became the basis for a new prophecy. This shows that the author was merely a disciple of the Prophets, one who reproduced the prophecies of his masters. His book, indeed, is not included in the section Nebiim.

DANIEL IBN AL-ANISHATA. See Daniel b. Saadia ha-Babli.

DANIEL, ḤAYYAṬA ("The Tailor"): A Palestinian, two of whose Scriptural interpretations are preserved in the Midrash: one to Gen. xxvi. 14 (Gen. R. lxiv. 7; compare Sanh. 58b; Yalḳ. on Prov. xii. 11), and the other to Eccl. iv. 1 (Lev. R. xxxii. 8; Eccl. R. *ad loc.*). The time of Daniel may only be conjectured. As the rabbis mentioned in the contexts are of the third and fourth centuries, and as the one cited after him, and supplementing his views, is of the fourth generation of amoraim, Daniel can not be placed earlier than that generation. Bacher ("Ag. Pal. Amor." iii. 761) includes him among those whose period is uncertain.

DANIEL BEN ḤASDAI. See Daniel ben Solomon.

DANIEL B. ISAAC. See Pisa, Daniel da.

DANIEL BEN JACOB OF GRODNO: Russian halakist; died in Grodno April 30, 1807. He was dayyan there for forty years. He is ordinarily called "saint," "pious," and "modest." He is the author of "Ḥamude Daniel" (The Precious Things of Daniel), on questions concerning the preparation of food (Grodno, 1810). Daniel's opinions are frequently mentioned in Ẓebi Hirsch Eisenstadt's widely used work, "Pitḥe Teshubah," on Shulḥan 'Aruk, Yoreh De'ah.

L. G. I. Ber.

DANIEL BEN JUDAH: Liturgical poet, who lived at Rome in the middle of the fourteenth century. He was the grandfather of Daniel ben Samuel ha-Rofe, rabbi at Tivoli. According to Luzzatto, Daniel ben Judah was the author of the well-known hymn "Yigdal Elohim Ḥai," containing the thirteen articles of belief of Maimonides. This poem, which forms part of the morning prayer among the Ashkenazim, and is sung by the Sephardim on the eve of Sabbaths and holy days, is included in the Romania ritual for Saturday evening.

Bibliography: Zunz, *Literaturgesch.* p. 507; Luzzatto, *Mebo*, p. 18; *He-Ḥaluẓ*, vol. ix., part 2, p. 50.

G. I. Br.

DANIEL B. ḲEṬINA: Babylonian amora; flourished in the second half of the third century. He was a contemporary of Zeira (Yer. Suk. iv. 54b; Ḥul. 62a *et seq.*). He is cited in the Palestinian as well as in the Babylonian Talmud by some of the foremost teachers of his generation (Yer. Shab. iii. 5c; Yer. 'Er. i. 19d, ii. 20a; M. Ḳ. 8b, 12a; Ḥag. 8b; Ket. 97a; B. Ḳ. 97a; B. M. 64b), but generally as the transmitter of Halakot he had learned from his predecessors. That he was regarded as a saint appears from the legend relating that he would daily inspect his garden and mark the beds requiring water, whereupon rain would descend and moisten the beds thus marked (Ta'an. 9b; Yalḳ., Zech. 578). Rabbah bar bar Ḥanah, Rab's nephew, married his son to Daniel's daughter (Ber. 47a; compare Rabbinowicz, "Diḳduḳe Soferim," *ad loc.*).

Bibliography: Heilprin, *Seder ha-Dorot*, ii. *s.v.*; Frankel, *Mebo*, 73a.

L. G. S. M.

DANIEL BEN MOSES AL-ḲUMISI, or **AL-DAMAGANI:** One of the most prominent Karaite scholars of the earlier period; flourished at the end of the ninth or at the beginning of the tenth century; a native of Damagan, the capital of the Persian province of Ḳumis, in Tabaristan, as is shown by his two surnames, the latter of which is found only in "Ḳirḳisani." His attitude to Anan and his violent opposition to the Ananites (*i.e.*, the first Karaites, Anan's followers and immediate successors) are characteristic of his place in Karaism. At first he esteemed Anan highly, calling him "rosh ha-maskilim" (chief of the scholars); but later he despised him and called him "rosh ha-kesilim" (chief of the fools). Nevertheless, Daniel's opinions were respected by the Karaites.

As regards Daniel's theories, he denied that speculation could be regarded as a source of knowledge, and, probably in accordance with this tenet, he maintained, in opposition to Anan, the principle that the Biblical laws must not be interpreted allegorically, nor explained contrary to the simple text (see below). He evinces little regard for science, as, for instance, when he asserts that it is forbidden to determine the beginning of the new moon by calculation, after the manner of the Rabbinites, because such calculations are condemned like astrology, and the practise of them is threatened with severe punishment, according to Isa. xlvii. 13–14. Yet Daniel himself, in his commentary to Lev. xxvi., indulges in long reflections on the theodicy and on the suffering of the pious. His conception of the angels, also, is most extraordinary. He says that wherever "mal'akim" (angels) are mentioned in the Bible, the designation does not refer to living, speaking beings who act as messengers, but to forces of nature, as fire, fog, winds, etc., by means of which God performs His works (compare Maimonides, "Moreh," ii. 6). This may be due to the influence of the Sadducees (who also denied the existence of angels; compare Acts xxiii. 8), in view of the fact that works circulated among the earlier Karaites named after Ẓadoḳ and containing Sadducean opinions.

Legal Decisions.

Daniel favored a rigorous interpretation of the Law. The following decisions of his have been preserved: It is forbidden to do any work whatever on the Sabbath—even to clean the hands with powder—or to have any work done on the Sabbath by a non-Jew, whether gratuitously, or for wages or any other compensation. The burning of lights is forbidden not only on Friday evenings, but also on the evenings of the festivals. In the description in Lev. xxiii. 40 of the trees which, according to Daniel, were used in erecting the booths, the phrase "peri eẓ hadar" (the fruit of goodly trees) is more definitely explained by "kappot temarim" (branches of palms), the palm being distinguished for its beauty (Cant. vii. 8).

Like Anan, Benjamin al-Nahawandi, and Ishmael al-'Okbari, Daniel forbade in the Diaspora the eating of those animals that were used for sacrifice, adding to the proofs of his predecessors others drawn from Hosea ix. 4 and Isa. lxvi. 3. The prohibition contained in Ex. xxiii. 19 ("Thou shalt not seethe a kid in his mother's milk") must not be interpreted allegorically, as Anan interpreted it, but literally. The priest carried out the injunction to "wring [pinch] off the head" of the bird ("meliḳah," Lev. i. 15) by cutting the head off entirely, after the slaughtering. The clean birds are not recognizable by certain signs, as the Rabbinites assert, but the names of the birds as found in the Pentateuch are decisive (and as these can not always be identified, the Karaites make the class of forbidden birds very large). Among the locusts only the four species expressly named in Lev. xi. 22 are permitted as food. It is forbidden to eat eggs because they must be considered as living things that can not be slaughtered, as is proved by Deut. xxii. 6–7, where it is permitted to take the young, but not the eggs. Of fish the eggs only are permitted; the blood is forbidden. The leper must still be considered as unclean (this, too, is directed against Anan, who had held that the laws regarding the clean and the unclean were not applicable in the Diaspora). The carcass of an animal, however, ceases to be unclean after use has been made of it in any way, as is proved by Lev. vii. 24.

Influence of Islam and Talmud.

In regard to the levirate marriage Daniel agrees with Anan that "aḥim," in Deut. xxv. 5, does not mean "brothers," which would violate the prohibition contained in Lev. xviii. 16, but "relations." The story of Judah and his sons (Gen. xxxviii. 8) proves nothing, because at that time the prohibition against marrying a brother's wife did not exist. The prohibition contained in Lev. xviii. 18 can not be taken literally (as the Rabbinites take it), for the wife's sister is forbidden under any circumstance, just as is the husband's brother (there is here an example of the method of analogy, "heḳḳesh"); it is rather the stepsister of the wife that is meant in the passage in question; *e.g.*, the daughter of the father-in-law's wife whom the last-named had by her first husband. In this case the prohibition ends with the wife's death. The daughter is not excluded from the heritage, as the Rabbinites say, although her portion is less than that of the son, being only one-third; for in the law of valuation in connection with vows (Lev. xxvii.) women were valued less than men. In conformity with this law, the mother also receives one-third. Daniel was doubtless influenced here by the Mohammedan law (see Koran, sura iv. 12, 175). In other respects Daniel follows the Talmud in holding that the descendants of one entitled to a portion succeed to his entire rights; the children of the son—*i.e.*, grandchildren—taking precedence over the daughter, their aunt. Finally, Daniel holds that responsibility for the observance of the commandments must begin not with the thirteenth, but with the twentieth year; that the New-Year begins on the tenth of Tishri, as follows from Ezek. xl. 1; and that Mohammedans also may act as witnesses of the new moon's appearance.

Daniel wrote several works in Hebrew, all of which, save for a few quotations and fragments, have been lost. There is undeniable evidence that he compiled a legal code ("Sefer ha-Miẓwot"), and a work on the rights of inheritance. The latter, against which Saadia directed his polemics, was perhaps merely a part of the code just mentioned. He also wrote commentaries to the Pentateuch, to Joshua, and to Judges, and probably to other Bib-cal books. They were not running commentaries, but explanations to certain passages, and contained also digressions. Words were often explained in Arabic. These commentaries, especially that to the Pentateuch, probably contained many of the decisions enumerated above.

Bibliography: The principal source regarding Daniel and his opinions is *Ḳirḳisani*, sec. i., ch. i.-ii. xviii. (ed. Harkavy, p. 280, lines 8-19; 285, 19-20; 316, 14-29); sec. iii., ch. xxi.-xxiii.; sec. xi., ch. xxvi.; sec. xii., ch. vii., xxxiii. (MSS. Br. Mus. Or. 2524, fols. 63-68; 2578, fols. 10-15 and 143-144; compare *Steinschneider Festschrift*, pp. 199 *et seq.*). For the other opinions of Daniel: Hadassi, *Eshkol*, 126ג, 233ו, 236ח, 240ר, 256ג, 287ג, 308ע, 316ח; Aaron b. Elijah, *Gan 'Eden*, 65b, below, and 169d, below; Bashyaẓi, *Aderet*, סדר ירושות, ch. ii., iii. Extracts from the ספר המצות, after quotations from Karaitic authors, are found in: Pinsker, *Liḳḳuṭe Ḳadmoniyyot*, ii. 188; Harkavy, in Berliner's *Magazin*, xx. 228; Poznanski, in *Jew. Quart. Rev.* viii. 683. A fragment of the commentary to Lev. i. 1-15, vi. 21-vii. 21, from the Cairo Genizah, has been published by Schechter, *Saadyana*, pp. 144-146 (*Jew. Quart. Rev.* xiv. 512; compare *ib.* 41, 79); another fragment, to Lev. xxv. 9-xxvi. 25, has been edited by Harkavy, in Fuchs' החוקר, i. 169-173, who ascribes it to Benjamin al-Nahawandi. Daniel, however, is the author, compare Harkavy, *Studien u. Mittheil.* viii. 192, and note 2; 187. Compare also Pinsker, *l.c.* i. 45; Fürst, *Geschichte des Karäerthums*, i. 78; Gottlober, בקרת לתולדות הקראים, p. 164; Harkavy, *Ḳirḳisani*, p. 271; Poznanski in *Jew. Quart. Rev.* viii. 681 *et seq.*; Margoliouth, *ib.* ix. 436, note 2.

K. S. P.

DANIEL BEN SAADIA HA-BABLI (or **Daniel the Babylonian**): Talmudic scholar; lived at Damascus in the thirteenth century. He was a pupil of Samuel b. Ali Halevi, the anti-Maimonist. After Maimonides' death he undertook a campaign against the latter's works, which, however, he conducted in a more temperate and judicial spirit than was shown by his master. His criticisms took the form of questions (forty-seven on the "Mishneh Torah" and thirteen on the "Book of Precepts"), which he sent to Abraham, the son of Maimonides. The partizans of Maimonides urged the excommunication of Daniel, but Abraham contented himself with writing a controversial work (ברכת אברהם, "Blessing of Abraham," Lyck, 1870) in refutation of Daniel's attacks. Later on Daniel attacked the orthodoxy of Maimonides, and reproached him for not believing in the existence of evil spirits. As there are in the Talmud several passages on demonology, he did not shrink from denouncing him as a heretic. Abraham not being willing to launch the anathema, the Maimonides party induced the exilarch David of Mosul to excommunicate Daniel, who died of grief.

DANIEL BEN SOLOMON (BEN ḤASDAI): Exilarch at Bagdad in the second half of the twelfth century. According to Pethahiah, Daniel's father, Solomon, was highly esteemed by the calif, a circumstance that for a time lent new dignity to the exilarchate, which had sunk into entire insignificance. Scholars assume that Daniel's father was also identical with the exilarch Ḥasdai, who, according to Benjamin of Tudela and Joseph Sambari ("Med. Jew. Chron." i. 123), was the teacher of the agitator David Alroy. The family, which traced its ancestry back to King David, lived in great splendor, to which Abraham ibn Ezra, who visited Bagdad in the middle of the twelfth century, alludes in his commentary to Zech. xii. 7, speaking of "the splendor of the house of David." Nothing is known of Daniel's political or literary activity. He doubtless approved the opposition to Maimonides led by the learned Samuel b. Ali of Bagdad, though Daniel himself did not come to the front. As he left no children, the exilarchate was transferred after his death to Mosul, where it was contested by two rival candidates, David ben Hodaya and Samuel. A fragment from the Cairo Genizah contains the colophon of a manuscript once in the possession of Daniel b. Solomon.

DANIELILLO ("Little Daniel") **OF LEGHORN:** Anonymous author of a small apologetic work of the seventeenth century, written in Spanish, which Grätz erroneously considers to be pseudepigraphic. It was copied by Isaac Mendes in 1738, and published at Brussels in 1868, under the title "Danielillo ó Respuestas á los Cristianos," by M. Caplan from a manuscript in the Royal Library in that city. By far the larger part of the work is devoted to a dialogue between D. Antonio de Contreras and Danielillo, but it contains many passages from the dialogue of Andrés Antonio and Obadiah, written in 1583, and still in manuscript (Wolf, "Bibl. Hebr." iv. 487, 726; De Rossi, "Bibl. Antichrist," p. 36). The principal contents of the work is a dialogue of the Augustinian monk Juan Carrasco of Madrid, who was converted to Judaism in Holland, and wrote a work in defense of Judaism and against Roman Catholicism (Nodriza-Haya, 1633). The Duke del Infantado, Hurtado de Mendoza, who is mentioned in the work, was Spanish ambassador at Rome in 1623. From page 104 to the end is given to the "Razonamiento," the discourse delivered in the presence of theologians and courtiers at Paris, at the command of Henry IV., by Elijah Montalto, physician to the king.

DANIELS, D. POLAK: Dutch communal worker at The Hague; died 1899. He was active in Jewish communal affairs, was president of the Jewish community for more than forty years, and was a member of the municipal council for the same length of time. His funeral was attended by the highest dignitaries of Holland.

Bibliography: *Jewish Chronicle*, May 12, 1899, p. 13.

DANILEVSKY. See Russia.

DANON, ABRAHAM: Turkish writer; born at Adrianople, European Turkey, in 1857; attended the Talmud Torah in that city, pursuing his Talmudic studies at a yeshibah. After having presided over a small seminary at Adrianople, he was appointed director of the seminary founded by the Alliance Israélite Universelle at Constantinople. Under the title "Toledot Bene Abraham," he published a Hebrew translation of Theodore Reinach's "Histoire des Juifs," Presburg, 1888, completing the story, as he says in the preface, by extracts from Graetz, Geiger, Kalman Schulmann, and others. Under the title "Maskil le-Aidan" (Aidan's Poem;

א"י"ד"ן, abbreviation of "Abraham Josef Danon"), he published a series of Hebrew translations of the poems of Vergil, Victor Hugo, and Sadi, together with some original contributions (Adrianople, 1888). In Sept., 1897, he went to Paris to represent the Oriental Jews at the Congress of Orientalists.

Danon's chief distinction rests on his initiative in founding at Adrianople in 1888 a historical review, bearing the title "Yosef-Da'at," or "El Progresso," which was published in Hebrew characters and in three languages; namely, Judæo-Spanish, Hebrew, and Turkish. The aim of the review was to collect all the documents relating to the history of the Oriental Jews. But the Ottoman government censorship suppressed this review, together with all others published in Turkey. As the fruit of patient labor, Danon published a collection of fifty-five Judæo-Spanish ballads which are sung in Turkey, each ballad being accompanied by its French translation. They first appeared in the "Revue des Etudes Juives," xxxii. and xxxiii., and were published separately by Durlacher, Paris in 1896. They form one of the most curious chapters in the literature of the Oriental Jews. Danon has also published some studies on the Oriental Jews (Jews of Adrianople and of Salonica), which appeared in the same review. Danon is the only author of the present generation of Oriental Jews who writes in Hebrew, other writers publishing their works in Judæo-Spanish.

DANON, BERAKAH BEN YOM-ṬOB: Talmudical scholar; lived at Jerusalem in the first half of the nineteenth century. He was the author of a work entitled "Bad Ḳodesh" (Holy Linen), containing sermons, and novellæ on Maimonides' "Yad." It was published in Salonica in 1846, together with a work by his father on the same subject, entitled "Kebod Yom-Ṭob."
